COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KSP/034BE/16	Course title: Introduction to Logistics
Educational activities: Type of activities: lecture Number of hours: per week: per level/semester: 12s Form of the course: combined	
Number of credits: 3	
Recommended semester: 3., 5.	
Educational level: I.	
Prerequisites:	
Course requirements: a) active participation 20%, b) seminar paper 30%, c) written test 50%	
Learning outcomes: Students are familiar with the role and basic methods of design and management of material flow in enterprises. The framework of knowledge consists on subdivision into inbound logistics, production logistics and distribution logistics. The course explains the issues of inventory management, warehousing, transportation and processing of logistical information.	
Class syllabus: 1. Definition and tasks of logistics 2. Procurement and supplier management 3. Inbound logistics 4. Production logistics 5. Distribution logistics 6. Inventory management 7. Warehousing and transportation 8. Processing of logistics information	
Recommended literature: HULVEJ, J. Logistika: Učebné texty. Bratislava: Kartprint, 2016. DUPAL, A., BREZINA, I. Logistika v manažmente podniku. Bratislava: Sprint, 2006. LAMBERT, D. M., STOCK, J. COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMn/060BE/00	Course title: Introduction to Management I
Educational activities: Type of activities: lecture Number of hours: per week: per level/semester: 16s Form of the course: combined	
Number of credits: 5	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: 40% - Essay, discussion, active participation in solving case studies, 60% - written exam. Scale of assessment (preliminary/final): 40/60	
Learning outcomes: Listener by completing a course acquires knowledge of the main areas of management. Student deepens their knowledge by examining and processing the specified issue, and the aim, inter alia, is to cultivate skills for discovering various expert sources and process them into a coherent work. Developing the student's skills and knowledge are also linked to discussions and case studies.	
Class syllabus: 1. Managers and management – management as a process, science, and profession. 2. Management theory development. 3. Organizational culture. 4. Organizational environment. 5. Management in a global environment. 6. Social responsibility and managerial ethics. 7. Managerial decision-making. 8. Foundations of planning. 9. Strategic management. 10. Forecasting.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/064BE/00	Course title: Mathematics I
Educational activities: Type of activities: lecture Number of hours: per week: per level/semester: 16s Form of the course: combined	
Number of credits: 5	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Basic knowledge of linear algebra, matrix, determinants, solution of systems of linear algebraic equations, economic examples. Calculus of the function of one variable, exploitation of the function investigation in economic practice. Fundamentals of the integral number of functions of one variable, a certain integral and its economic applications.	
Class syllabus: Introduction to linear algebra. Basic concepts of linear algebra, vector, matrix, operations with them. Linear vector independence. Matrix rank, Gaussian matrix shape. Inverse matrix. Solving the linear system of equations. Frobeni's sentence. Custom numbers and custom matrix vectors. Leontiev's economic model ² . Differential number of functions of one real variable. Function of one real variable, basic properties. Basic Economic Functions - Function of Cost, Income, Profit, Demand Function. Limit. Asymptotes of the function. Differential of function and its use in practice and applications in economics - marginal values. Monotony of functions, extremes, economic verbal tasks at the extreme. Convexity, concavity of function. Function flow, graph. Taylor's polynomial, Taylor's veto. 3. Integral number of functions of one real variable. The concept of desktop content and motivation to define a particular integral. Certain integral, basic properties. Indefinite integral, basic properties and calculation methods. Substitution method, per partes method. Integrating rational functions. Applications of a particular integral: area content, volumes, curve length. Economic applications, calculation of surplus value of the consumer of the producer.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/097BE/00	Course title: Money and Banking
Educational activities: Type of activities: lecture Number of hours: per week: per level/semester: 16s Form of the course: combined	
Number of credits: 5	
Recommended semester: 5.	
Educational level: I.	
Prerequisites:	
Recommended prerequisites: Economics III, Fundamentals of Financial Management	
Course requirements: During the semester there will be two continuous tests within the exercise, with a maximum of 30 points overall. 70 points can be obtained after the final exam of the subject during the test period. Rating A is required to receive at least 91 points out of the total, to obtain a score of B at least 81 points, to obtain a score of at least 72 points, to obtain a score D of at least 66 points, and to get E at least 60 points out of the total number. The participation in the final exam of the subject is a minimum of 21 points from the seminars.	
Learning outcomes: A graduate of the subject acquires knowledge of money and currency, can identify basic monetary policy instruments. Has knowledge of the financial system, financial markets, is able to use financial instruments. The graduate is able to distinguish different forms of banking systems, including the history and current state of the banking system in Slovakia, and distinguishes specialized banking institutions operating on the Slovak market. It will recognize the central and other tasks of central banks, as well as the tools that these institutions apply to their functioning. The graduate is familiar with the legal conditions of the operation of commercial banks, their legal form and main activities, they can identify bank risks and use basic banking products. The graduate gains knowledge of the functioning of the most important multilateral financial institutions.	
Class syllabus: 1. Money and money circulation: nature, functions and forms of money, currency and monetary system, monetary policy and its objectives, monetary policy instruments, foreign exchange policy. 2. Financial system: the role of the financial system, financial markets and financial instruments, financial market participants, regulation of financial markets, financial market in the Slovak Republic. 3. Banking system in the Slovak Republic: forms of the banking system, development and current state of the banking system in Slovakia, banking sector, specialized non-bank institutions. 4. The status and scope of central banks (National Bank of Slovakia and European Central Bank): establishment, legal form and basic functions, monetary policy and monetary policy instruments, regulation of the banking sector.	

5. The status and main activities of commercial banks: the legal form of banks, the principal activities of commercial banks, the requirements of banks, the management of assets and liabilities, banking risks, banking products. 6. Multilateral Financial Institutions: European Bank for Reconstruction and Development, European Investment Bank, International Monetary Fund, World Bank.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/116BE/00	Course title: Statistics
Educational activities: Type of activities: lecture Number of hours: per week: per level/semester: 16s Form of the course: combined	
Number of credits: 5	
Recommended semester: 3.	
Educational level: I.	
Prerequisites:	
Recommended prerequisites: Mathematics /1/, Mathematics /2/	
Course requirements: The test is written. It consists of 3 examples: 1.Description Statistics - Data Processing Using Table, Charts, Descriptive Statistics 2.Bayes' sentence, conditional probability, pivot tables 3. Calculate the probability of normal distribution The maximum point gain is 100 points. Scale of assessment (preliminary/final): 0/100	
Learning outcomes: Statistics and likelihood play a big role in the decision-making process of the manager. Objective of the course in terms of learning outcomes and competences The aim of the course is to acquaint students with basic methods of descriptive statistics and probability bases for cross-sectional analysis	
Class syllabus: 1.Introduction to the theory of statistics - basic concepts, methods of data presentation, methods of data description (descriptive statistical methods). 2. Introduction to Probability Theory. Random phenomenon, probability, conditional probability 3. Bayes' veto, independence of phenomena. 4. Random variable and its characteristics. Probability distribution of a discrete random variable. 5. Continuous random variable. Probability distribution of a continuous random variable.
