

Course descriptions

TABLE OF CONTENTS

1. L-S-ZLa-001/16	Anatomy 1.....	4
2. L-S-ZLa-002/16	Anatomy 2.....	6
3. L-S-ZLa-003/16	Biology and Human Genetics 1.....	8
4. L-S-ZLa-004/16	Biology and Human Genetics 2.....	10
5. L-ZLa-O-6/16	Defence of the Diploma Thesis (state exam).....	12
6. L-S-ZLa-011/16	Dental Materials and Technologies 1.....	13
7. L-S-ZLa-012/17	Dental Materials and Technologies 2.....	14
8. L-ZLa-129/12	Dental Materials and Technologies 3.....	15
9. L-ZLa-086/10	Dental Prosthetics 1.....	16
10. L-ZLa-087/09	Dental Prosthetics 2.....	17
11. L-ZLa-088/00	Dental Prosthetics 3.....	18
12. L-ZLa-089/00	Dental Prosthetics 4.....	20
13. L-ZLa-090/00	Dental Prosthetics 5.....	22
14. L-ZLa-091/12	Dental Radiology.....	24
15. L-ZLa-014/00	Dermatovenerology.....	26
16. L-ZLa-016/09	Diploma Work 1.....	28
17. L-ZLa-017/00	Diploma Work 2.....	29
18. L-ZLa-018/00	Diploma Work 3.....	30
19. L-ZLa-108/00	Diploma Work 4.....	31
20. L-ZLa-109/00	Diploma Work 5.....	32
21. L-ZLa-045/09	Endodontics 1.....	33
22. L-ZLa-046/09	Endodontics 2.....	34
23. L-ZLa-019/00	Epidemiology.....	35
24. L-S-ZLa-082/16	First Aid.....	37
25. L-ZLa-092/00	Forensic Medicine.....	38
26. L-ZLa-024/00	Gerontostomatology.....	40
27. L-ZLa-025/00	Gyneacology and Obstetrics.....	41
28. L-S-ZLa-029/16	Histology and Embryology 1.....	43
29. L-S-ZLa-030/17	Histology and Embryology 2.....	44
30. L-ZLa-027/00	Histology and Embryology 2.....	45
31. L-ZLa-028/00	Hygiene.....	47
32. L-S-ZLa-038/17	Immunology.....	49
33. L-ZLa-ŠS-2/15	Internal Medicine (state exam).....	51
34. L-ZLa-041/00	Internal Medicine 1.....	52
35. L-ZLa-042/00	Internal Medicine 2.....	53
36. L-ZLa-043/00	Internal Medicine 3.....	54
37. L-ZLa-100/09	Internal Medicine 4.....	55
38. L-ZLa-039/09	Internal Propedeutics 1.....	56
39. L-ZLa-040/12	Internal Propedeutics 2.....	57
40. L-S-ZLa-049/16	Latin Medical Terminology.....	58
41. L-ZLa-096/09	Managment of a Dental Practice.....	59
42. L-ZLa-082/00	Maxillofacial Surgery 1.....	60
43. L-ZLa-083/09	Maxillofacial Surgery 2.....	61
44. L-ZLa-084/09	Maxillofacial Surgery 3.....	62
45. L-S-ZLa-052/17	Medical Biochemistry for Dentistry 2.....	63
46. L-S-ZLa-051/17	Medical Biochemistry for Dentistry 1.....	64
47. L-ZLa-005/00	Medical Biochemistry for Dentistry 2.....	65

48. L-S-ZLa-050/16	Medical Biophysics.....	67
49. L-S-ZLa-053/16	Medical Chemistry for Dentistry.....	69
50. L-S-ZLa-060/17	Medical Ethics.....	71
51. L-S-ZLa-053/17	Medical Microbiology 1.....	72
52. L-S-ZLa-054/17	Medical Microbiology 2.....	73
53. L-ZLa-053/09	Medical Microbiology 2.....	74
54. L-ZLa-050/12	Medical Psychology and Communication with Patients.....	76
55. L-ZLa-054/09	Neurology.....	77
56. L-ZLa-055/00	Ophthalmology.....	79
57. L-ZLa-079/10	Oral Surgery 1.....	81
58. L-ZLa-080/09	Oral Surgery 2.....	82
59. L-ZLa-081/09	Oral Surgery 3.....	83
60. L-ZLa-ŠS-3/16	Oral and Maxillofacial Surgery (state exam).....	84
61. L-ZLa-102/00	Oral and Maxillofacial Surgery.....	85
62. L-ZLa-008/00	Orthodontics 1.....	86
63. L-ZLa-009/09	Orthodontics 2.....	87
64. L-ZLa-010/00	Orthodontics 3.....	88
65. L-ZLa-011/00	Orthodontics 4.....	89
66. L-ZLa-012/00	Orthodontics 5.....	90
67. L-ZLa-ŠS-4/16	Orthopaedic Dentistry (state exam).....	91
68. L-ZLa-057/00	Orthopaedic Dentistry 1.....	92
69. L-ZLa-058/00	Orthopaedic Dentistry 2.....	94
70. L-ZLa-056-/00	Otorhinolaryngology.....	96
71. L-ZLa-068/00	Paediatric Dentistry.....	98
72. L-ZLa-067/00	Paediatrics.....	99
73. L-S-ZLa-071/17	Pathological Anatomy 1.....	101
74. L-ZLa-064/00	Pathological Anatomy 2.....	102
75. L-S-ZLa-073/17	Pathological Physiology 1.....	104
76. L-ZLa-065/12	Pathological Physiology 2.....	105
77. L-ZLa-059/00	Periodontology 1.....	106
78. L-ZLa-060/00	Periodontology 2.....	107
79. L-ZLa-061/00	Periodontology 3.....	108
80. L-ZLa-062/00	Periodontology 4.....	109
81. L-ZLa-020/00	Pharmacology 1.....	110
82. L-ZLa-021/12	Pharmacology 2.....	112
83. L-ZLa-X19/16	Physical Training (5).....	114
84. L-ZLa-X20/16	Physical Training (6).....	116
85. L-S-ZLa-103/16	Physical Training 1.....	118
86. L-S-ZLa-104/16	Physical Training 2.....	120
87. L-S-ZLa-105/17	Physical Training 3.....	122
88. L-S-ZLa-106/17	Physical Training 4.....	123
89. L-S-ZLa-025/16	Physiology 1.....	124
90. L-S-ZLa-026/17	Physiology 2.....	126
91. L-ZLa-022/00	Physiology 2.....	127
92. L-ZLa-124/16	Practice in an Out-patient Dental Clinic (1).....	129
93. L-ZLa-126/16	Practice in an Out-patient Dental Clinic (2).....	130
94. L-ZLa-121/16	Practice in an Out-patient dental clinic and Laboratory.....	131
95. L-ZLa-123/16	Practice-Internal Medicine.....	132
96. L-ZLa-122/16	Practice-Surgery.....	133

97. L-S-ZLa-076/16	Preclinical Dentistry 1.....	135
98. L-S-ZLa-077/16	Preclinical Dentistry 2.....	136
99. L-S-ZLa-078/17	Preclinical Dentistry 3.....	137
100. L-S-ZLa-079/17	Preclinical Dentistry 4.....	138
101. L-ZLa-073/09	Preclinical Dentistry 4.....	139
102. L-ZLa-075/10	Preventive Dentistry 1.....	140
103. L-ZLa-076/00	Preventive Dentistry 2.....	141
104. L-ZLa-077/00	Psychiatry.....	142
105. L-ZLa-044/10	Restorative Dentistry 1.....	144
106. L-ZLa-047/09	Restorative Dentistry 2.....	145
107. L-ZLa-048/00	Restorative Dentistry 3.....	146
108. L-S-ZLa-109/16	Slovak Language 1.....	147
109. L-S-ZLa-110/16	Slovak Language 2.....	148
110. L-S-ZLa-112/17	Slovak Language 3.....	149
111. L-S-ZLa-113/17	Slovak Language 4.....	150
112. L-ZLa-X25/00	Slovak language 5.....	151
113. L-ZLa-078/00	Social Medicine.....	152
114. L-ZLa-ŠS-1/16	Surgery (state exam).....	154
115. L-ZLa-032/00	Surgery 1.....	155
116. L-ZLa-033/00	Surgery 2.....	157
117. L-ZLa-034/00	Surgery 3.....	158
118. L-ZLa-035/00	Surgery 4.....	160
119. L-ZLa-030/00	Surgical Propedeutics 1.....	162
120. L-ZLa-031/09	Surgical Propedeutics 2.....	164
121. L-ZLa-ŠS-5/16	Therapeutic Dentistry (state exam).....	166
122. L-ZLa-093/00	Therapeutic Dentistry 1.....	167
123. L-ZLa-094/09	Therapeutic Dentistry 2.....	168
124. L-S-ZLa-088/17	Topographical Anatomy of the Head.....	169

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.AÚ/L-S-ZLa-001/16	Course title: Anatomy 1
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 48s / 36s Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 1.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100% participation on the practical exercises Passing 2 written tests with at least 60% from each Test evaluation: A: 91 - 100 %, B: 81 – 90 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 – 0 %	
Learning outcomes: Knowledge: - To be familiar with the architecture and structures of the human body (in general). - Knowing different parts of the skeletal system and joints - Studying structure of the organs of the alimentary, respiratory and urinary systems. Skills: - To understand and handle the anatomical terminology - Analyzing of the gained knowledge from the morphological and functional point of views. - Practical usage of theoretical information in dissection of muscles.	
Class syllabus: Introduction into anatomy. General anatomy of bones, joints and muscles. Digestive system. Respiratory system. Urinary system. Genital system. Planes and directions of the human body. Vertebrae, ribs, sternum. Joint of the vertebral column and thorax. Bones and joints of the upper limb. Bones and joints of the lower limb. The skull. Muscles and topographical regions of the upper limb. Muscles and topographical regions of the lower limb. Muscles and topographical regions of the head, neck and back. Muscles and topographical regions of the thorax, abdomen.	
Recommended literature: Platzer, W. Color Atlas of Human Anatomy. Vol.1. Locomotor System. 6th rev ed. Stuttgart; New York: Georg Thieme Verlag, 2009. 480p. ISBN13 9783131494818 Fritsch, H., Kuehnel, W. Color Atlas of Human Anatomy. Vol. 2. Internal organs. 5th ed. Stuttgart; New York: Georg Thieme Verlag, 2008. 458p. ISBN13 9781604065633 Kahle, W., Frotscher M. Color Atlas of Human Anatomy. Vol. 3. Nervous System and Sensory Organs. 6th ed. Stuttgart; New York: Georg Thieme Verlag, 2008. 426p. ISBN13 9783131536761 Netter, F. H. Atlas of Human Anatomy. 5th ed. Philadelphia: Saunders - Elsevier, 2010. 624p. ISBN: 978-1-4160-5951-6

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.AÚ/L-S-ZLa-002/16	Course title: Anatomy 2
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 48s / 60s Form of the course: on-site learning	
Number of credits: 9	
Recommended semester: 2.	
Educational level: I.II.	
Prerequisites: LF.AÚ/L-S-ZLa-001/16 - Anatomy 1	
Course requirements: Course requirements: 100% participation on the practical exercises and dissection Exam: - Practical part - Test (achieving at least 60% of correct answers) - Oral part (3 questions) Practical part: a. Topographical regions, vessels and nerves of upper and lower limb b. Structures and spaces of the thorax and abdomen The student must pass practical part and test before the oral part. Test evaluation: A: 91 - 100 %, B: 81 – 90 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 – 0 % Final mark of the semester is determined from the average of received scores.	
Learning outcomes: Knowledge: - Understanding and knowing the morphological structure of the heart, arteries and veins of the systemic and pulmonary circulations. - Studying the different parts of the lymphatic system and the endocrine glands - Knowing the structures of the central nervous system - Studying parts of the autonomic nervous system (sympathetic and parasympathetic) Studying the morphological structure of sense organs, skin and its appendages Skills: - To understand and handle the anatomical terminology - Analyzing of the gained knowledge from the morphological and functional point of views. - Practical usage of theoretical information in practical exercises and dissection of the thorax and abdomen. - Practical usage of theoretical information in the dissection of the thorax and abdomen. - Practical usage of theoretical information in dissection of the peripheral nerves and vessels.	

- Practical usage of theoretical information in the practical exercises from the central nervous system.

Class syllabus:

Male and female genital systems. Vascular system and heart. Lymphatic system. Endocrine glands. Nervous system (spinal cord, spinal nerves, nerve plexuses). Peripheral nerves. Digestive system. Respiratory system. Urinary system. Demonstration of the digestive organs. Nervous system (medulla oblongata, pons, cerebellum, mesencephalon, diencephalon, telencephalon, basal nuclei, cavities and meninges of the central nervous system). Injuries of the spinal cord. Motor and sensory disorders. Corneal and sucking reflexes. Paralysis of the facial nerve. Parkinsonism. Internal capsule hemorrhage. Cerebrospinal fluid and its circulation. Intracranial hypertension. Hydrocephalus. Autonomic nerves. Sense organs. Skin and its appendages. Dissection – thorax, abdomen, vessels and nerves of the upper limb, lower limb, head and neck.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚLBG/L-S-ZLa-003/16	Course title: Biology and Human Genetics 1
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 18s / 18s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100% participation on the practical exercises 1 seminar work Passing written test with at least 60% from each Test evaluation: A: 91 - 100 %, B: 81 – 90 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 – 0 %	
Learning outcomes: To gain basic information about cell morphology and physiology and about molecular biology and genetics.	
Class syllabus: The cell as the basic structural and functional unit. Cell surfaces, nucleus, nucleolus, mitochondria, endoplasmic reticulum, ribosomes, Golgi apparatus, cytoskeleton. Intercellular spaces and intercellular communication. Transport of materials, membrane receptors. Cell cycle; amitosis, mitosis (mitotic apparatus). Meiosis. Viruses: genome, reproduction, mutations and recombination, oncogenic viruses and acute transforming viruses. Prokaryotic cells -morphology, structure, and genome. Differences between prokaryotes and eukaryotes. Protista. Biology of oral cavity - symbionts and parasites relation to diseases. Molecular biology: structure of DNA and RNA, replication of DNA, transcription, translation, genetic code. Genes of eukaryotic cells. Resistance to antibiotics DNA analysis. Tissue cultivation, utilization of tissue engineering.	
Recommended literature: BÖHMER, D. and REPISKÁ, V.: Genetic Aspects of Normal and Pathologic Traits in Humans. Bratislava: Asklepios, 2009; 100 p. ISBN 978-80-7167-139-8. COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚLBG/L-S-ZLa-004/16	Course title: Biology and Human Genetics 2
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 20s / 20s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: I.II.	
Prerequisites: LF.ÚLBG/L-S-ZLa-003/16 - Biology and Human Genetics 1	
Course requirements: 100% participation on the practical exercises 1 seminar work Passing 1 written partial test with at least 60% Test evaluation: A: 91 - 100 %, B: 81 – 90 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 – 0 % Exam: a) written test, at least 60 %, B) theoretical part – 3 questions (cytology,molecular genetics, human genetics) Final mark of the semester is determined from the average of received scores.	
Learning outcomes: To gain basic information about cell morphology and physiology and about molecular biology and genetics.	
Class syllabus: Chromosomal base of inheritance: structure of chromosomes, nomenclature, methods of identification. Classification of inherited diseases. Single gene diseases in stomatology. Chromosomal aberrations. Stomatological aspects of syndromes caused by aberrations of chromosomes. Oncogenesis - molecular base of cancerogenesis, oncogenes and tumor-suppressor genes, their function. Genetic base of regulation of maxillo-facial region development. Multifactorial and polygenic inheritance, pathological traits with multifactorial inheritance, malformations. Threshold effect. Mutagenesis. Teratogenesis - basic characteristics, mechanisms of origin, possibilities of differential diagnosis.	
Recommended literature: BÖHMER, D. and REPISKÁ, V.: Genetic Aspects of Normal and Pathologic Traits in Humans. Bratislava: Asklepios, 2009; 100 p. ISBN 978-80-7167-139-8. COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.RK2/L-ZLa-091/12	Course title: Dental Radiology
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 14s / 14s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 5.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100% presence at practicals Exam: written part: score at least 60% in test practical part: assessment of one intraoral and one panoramic X-ray theoretical part: 2 questions (according to the syllabus) Test assessment: A: 91 - 100 %, B: 81 - 99 %, C: 73 - 80 %, D: 66 - 72 %, E: 60 - 65 %, Fx: 59 % and less. Total grade will be calculated as an average of partial results.	
Learning outcomes: Knowledge: - basic principles of radiation protection for dentists - imaging methods used in dentistry - indications and contraindications of intraoral and extraoral X-rays - radiologic anatomy of maxillofacial region and dental tissues - pathological changes in maxillofacial region and dental tissues on X-rays Skills: - assessment of normal panoramic and intraoral X-rays - diagnosis of pathologies in maxillofacial region and dental pathologies based on X-rays - methods and techniques of intraoral and panoramic X-rays	
Class syllabus: Dental X-ray equipments. Technical requirements for dental X-ray station. Radiological anatomy of the facial skeleton. General characteristics and classification of pathologies in maxillofacial region (radiolucency/radioopacity), foreign bodies, infections, cysts. Radiology of orthodontic anomalies. Pathology of maxillary sinuses and salivary glands. Fractures in maxillofacial region, systemic disease. Tumors in maxillofacial region. Importance of radiology in reconstructive dentistry. Basic criteria for an X-ray image in periodontology. Radiology of temporomandibular joint. Radiology in pediatric dentistry.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.DK/L-ZLa-014/00	Course title: Dermatovenerology
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 18s / 20s Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 9.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100 % attendance in practical lessons Exam: written – test: minimum score: 60 % Practical part of exam- patient's examination - preparing of hospital record, differential-iagnostic process, question from practical lessons Theoretical part of exam - 3 questions from dermatovenerology Results rating: A: 91 - 100 %, B: 81 - 99 %, C: 73 - 80 %, D: 66 - 72 %, E: 60 - 65 %, Fx: 59 % and less Final rating is determined as the average of all received ratings.	
Learning outcomes: Knowledge: Etiopathogenesis knowledge, clinical picture of dermatoses, diagnostic process, differential diagnoses, therapy of skin and mucous membrane disorders, sexually transmitted infections Practical skills: Dermatologic investigations and its practical use: histological investigation, allergologic investigation, mycological investigation, patient's examination. Collection of the material for histological investigation, microscopic investigation of pathological material. Provide diferential diagnoses proposals and methods of its therapy.	
Class syllabus: Anatomy, morphology, physiology of the skin and mucous membranes. Allergic eczema, toxic dermatitis, phototoxic and photoallergic reactions. Atopic dermatitis. Seborrheic dermatitis. Eczema microbiale. Erythemato-squamous diseases. Papulous and pustular dermatoses. Blistering diseases. Exanthema medicamentosum. Disorders of sebaceous glands. Alopecia. Viral dermatoses. Bacterial disorders of skin and mucous membranes. Fungal infections. Episoosis. Parasitis diseases. Diseases of connective tissue. Precanceroses, tumours of skin. Disorders of oral cavity.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚE/L-ZLa-019/00	Course title: Epidemiology
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 12s / 12s Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 11.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100% participation on practical lessons + success in exam by: - achieving at least limit test points to 65% is proceeding to the oral examination. Evaluation of the test: A: 91 - 100 %, B: 81 – 99 %, C: 73 – 80 %, D: 66 –72 %, E: 60 – 65%, Fx: 59 % and less - theoretic part – 3 questions (general epidemiology, special epidemiology, epidemiology of chronic diseases – cardiovascular and cancer) Total evaluation is determined from the mean value of acquired points of both parts of the exam.	
Learning outcomes: Knowledge: Basic knowledge about epidemic process, occurrence and distribution of infectious diseases and chronic non-communicable diseases with high incidence in Slovakia and worldwide. Epidemiology of nosocomial infections – risk factors, spread, importance of hygienic – epidemiologic regimen and the role of disinfection and sterilisation in introduction of measures and prevention. Nosocomial infections in dentistry and prevention. Knowledge about basic principles of vaccination and important role of vaccines in disease prevention. Prevalence of the most important risk factors contributed to disease occurrence (including oral health) and possibility to prevent diseases by lowering exposure and by elimination of these factors. Orientation in some national, WHO and ECDC programmes combating against infections and non-communicable civilisation diseases in the view of their control, elimination or even eradication. Knowledge of crucial relevant regulations in Slovak Republic in prevention of the most serious diseases. Skills: Basic cognitive logic skills in investigation of epidemic occurrence by collection of valid data, by their analysis and by evaluation of risk exposure using knowledge from several medical disciplines for proposal of measures, including measures targeted on contacts of the source of infection. Cognitive skills of using various methods in study of risk determinants of chronic diseases (including oral health) for primary and secondary prevention as well as for prognosis. Intuitive thinking for evaluation of risks for disease prevention. Practical skills in investigation and analysis of epidemics, using epidemiologic methods (descriptive, analytic, experimental) and surveillance	

for evaluation of disease occurrence and prevention of communicable diseases and chronic civilization diseases (including oral health).

Class syllabus:

Epidemiology, goals, health and social importance of the discipline. Basic epidemiologic methods, causality. Descriptive method (including information of oral health indicators), analytic method, experimental epidemiology, surveillance.

Sources of infections in the light of evolution of parasitism of microorganisms, forms of reservoirs, their characteristics, importance of epidemiologic measures. Mechanisms of transmission, phases and forms. Classification of infectious diseases, basic groups (intestinal infections, airborne infections, arthropod-borne infections, infections of skin and surface mucosae, zoonoses, nosocomial infections) and their general characteristics. Epidemic process, its essential conditions and characteristics, significance of natural and social factors. Principles of modern approaches of control of communicable diseases – containment of sources, interruption of transmission. Measures of prevention (including oral health). Measures in the focus of infection. Protection of susceptible population. Specific prophylaxis. Passive and active immunisation. Decontamination: disinfection, sterilisation, disinsection, rodent control. Information systems. Epidemiologic methods in study of epidemiologic characteristics of cardiovascular (including cerebrovascular) diseases and cancers, dental caries and parodontal diseases.

Prerequisites:	
Course requirements: 100% participation at practicals Exam: written test - minimum 60% theoretical part - 3 questions Evaluation of the test: A: 91 - 100 %, B: 81 - 99 %, C: 73 - 80 %, D: 66 - 72 %, E: 60 - 65 %, Fx: 59 % and less Total score is determined from the average of ratings received	
Learning outcomes: Knowledge: <ul style="list-style-type: none"> - - to learn the basics of forensic medicine and orientation in criminal matters in medical practice - - to gain the knowledge about effective cooperation in the process of identification of dead bodies - - to learn the basics about external and internal examination of a dead body and about determination of the cause of death - to acquire the knowledge about the compilation of medical certificates and expert's opinions and about the process of their interpretation in front of the court Skills: <ul style="list-style-type: none"> - examination of a dead body and filling in official documents - participation in the process of identification of persons with undetected identity - examination of an alleged assailant (principles, documentation) - examination of a victim (principles, documentation) - compilation of medical certificates 	
Class syllabus: Forensic medicine, its importance and role in medicine and society. Principles of criminal proceedings. Doctor as a witness, doctor as an expert. Medical liability. Death and process of dying. Procedures taken after death. Early and late postmortem changes. Mechanical injuries, abrasions, bruises, wounds. Mechanical asphyxia and its forms, hanging, ligature strangulation, manual strangulation (throttling), smothering, drowning. Fall from height. The effect of changes in atmospheric pressure and of elevated and reduced temperature. The effect of electricity and lightning. Starvation. Identification of persons according to teeth. Forensic procedures to detect poisoning.

Faculty: Faculty of Medicine					
Course ID: LF.KSMCh/L-ZLa-024/00		Course title: Gerontostomatology			
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 12s / 12s Form of the course: on-site learning					
Number of credits: 1					
Recommended semester: 10.					
Educational level: I.II.					
Prerequisites: LF.KSMCh/L-ZLa-087/09 - Dental Prosthetics 2					
Course requirements:					
Learning outcomes:					
Class syllabus: Aging of man. Physiological somatic and psychic changes during aging. Aging changes in orofacial region. Polymorbidity and medication older patients. Stomatological examination and treatment planning older people. Dental caries and dental hard tissues changes in the elderly.Root caries.Endodontics of elderly people. Salivary rate disturbancies and xerostomy older patients. Prosthetics in the elderly. Fixed and removable appliances of prosthetic elderly persons. The arrangement of the articulation. Surgery before prosthetic treatment in the elderly. Periodontal diseases in the older age. Stomatological surgery in the older people. Stomatological problems of medically compromised elderly patients. Stomatological implantology older people.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.GPK1/L-ZLa-025/00	Course title: Gyneacology and Obstetrics
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 18s / 20s Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 9.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100% attendance on practicals and seminars State exam - written test – pass the test (minimum 60 %) - theoretical part: 2 questions (in diferent topics of gynaecology and obstetrics) Test evaluation: A: 91 - 100 %, B: 81 - 99 %, C: 73 - 80 %, D: 66 - 72 %, E: 60 - 65 %, Fx: 59 % a menej The final evaluation is done from the average counted from all acquired marks	
Learning outcomes: Theoretical knowledge: - Anatomy and physiology of female genital tract - Gynaecological inflamation - Endometriosis - Bening and malignant tumors of female genital tract and breast - Physiology and pathology of pregnancy - Physiology and pathology of labour - Physiology and pathology of puerperium Practical skills - basic examination in gynaecology and obstetrics - asisstance by the gynaecological and obstetrical surgeries	
Class syllabus: Anatomy and physiology of female genital tract Gynaecological inflamation Endometriosis Bening and malignant tumors of female genital tract and breast Physiology and pathology of pregnancy Physiology and pathology of labour Physiology and pathology of puerperium

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚH/L-ZLa-028/00	Course title: Hygiene
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 12s / 18s Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 11.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100 % participation in practical lessons Written test - students need at least 75 % to pass the exam Oral exam - consists of 3 questions Evaluation of the test: A: 96 - 100 % , B: 91-95 % , C: 86 - 90 % , D: 81 - 85 % , E: 75-80 % , Fx: < 75 % Total score is determined from the average of received ratings	
Learning outcomes: Knowledge: <ul style="list-style-type: none"> - about regularities of environmental impact on public health - about health protection and promotion in the population and individual level - about preventive medicine principles - the basic legislation in this area Skills: <ul style="list-style-type: none"> - to control the basic methods for some internal and external environmental factors and the health status of different population groups monitoring - to investigate the health-nutritional status and formulate the necessary correction in order to protect the health of individuals and population groups, and the prevention of diseases - to communicate with the public about the issue of environmental, behavioural and psychosocial factors and health at the appropriate level - to work independently in the counseling field of public health, particularly in the area of oral health - the self-ability to use obtained results for the dental practice 	
Class syllabus: Living conditions and health. Basic environmental health factors. Water and morbidity. The health risks associated with food. Environmental factors and the issue of chronic diseases. The physiological peculiarities of age in primary prevention. Hygiene in common dental practice. Working environment of dentists. Dental surgery and its basic characteristics – spatial, microclimate, microbiological, visual and acoustic. Dental laboratory. Dental radiography. Hygiene requirements for the use of x-ray in dental practice. Health risks of ionizing radiation. Personal protective equipment for patients and staff. Additional risk factors at dentist's working place.	

Ergonomic principles during the patient's treatment. Dust in the working environment. Noise and vibrations, risk of health damage. Special risk of infection in the dental practice. Xenobiotics in the dental practice. Allergens. Heavy metals. Influence of the work environment on the health of dentists. Regime of work and rest and prevention of occupational diseases. Nosocomial infections in dental practice and their prevention. Oral ecosystem. The process of spreading diseases in dentistry. Hygiene of service in stomatological workplace. Disinfection and sterilization in the dental practice. Hygienic principles in the patient's treatment. Hygienic principles in the treatment of patients with infectious disease. Health risk assessments in relation to the environment. Hygiene measures in emergency situations (natural and technological disasters, war conflicts), problems of alternative accommodation, water supply, nutrition of the population.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.IÚ/L-S-ZLa-038/17	Course title: Immunology
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 24s / 18s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 4.	
Educational level: I.II.	
Prerequisites: LF.ÚLBG/L-S-ZLa-004/16 - Biology and Human Genetics 2	
Course requirements: - 80% participation on practicals - to pass two written tests at least on 60% Exam: written part: to pass the final test at minimally 60% oral exam: 3 questions Evaluation of the test: A:91-100%, B: 81-99%, C:73-80%, D: 66-72%, E:60-65%, Fx:≤ 59%.	
Learning outcomes: Knowledge: To gain knowledge of general (tissues, organs, cells, mediators and reactions of immune system) and clinical immunology (allergy, autoimmunity, transplantation, hypersensitivity reactions, inflammation, sepsis, immunodeficiencies, AIDS, tumor immunology,...). Student should understand the role of immune system in the pathogenesis of different diseases. To gain knowledge concerning cooperation of immune system with other systems (nerve system, endocrine system) and the linkage with psyche (psycho-neuro-endocrine immune supersystem) – a holistic view. The role of microbiome. To gain knowledge about symptomatology of different immune system mediated diseases and based on knowledge to establish a predicted diagnosis. Skills: to recognize life threatening immune system mediated diseases – states, when the early diagnosis and treatment can contribute to recovery or at least stabilize the patient (anaphylaxis, serum sickness, pseudoallergie, immunodeficiencies and others). 2. to interpret the results of laboratory immunological tests (eg. titer of antibodies, levels of IgM, IgG, IgA antibodies, the occurrence of autoantibodies, the results of immune profil of the patients. 3. to handle blood sampling, the way of blood sampling, to know which type of tubes and chemical substances are necessary for serum, plasma or DNA isolation. To know time intervals for repeated measurements and to be able to explain the obtained results. 4. to handle basic laboratory work habits - collection of blood, making blood smear, working with a microscope, pipetting, the isolation of serum and plasma.	
Class syllabus:	

Lectures: Immunology, forms of immunity, tissues and organs of immune system. Antigen – complete, incomplete, immunogenicity, specificity and characteristics of antigen. Antibodies, their structure, function, biologic activities. Monoclonal antibodies. Complement system. Phagocytosis. PRR receptors, alarmins, PAMPs and DAMPs. Inflammation, acute phase proteins. Sepsis and MODS. Cytokines, polarization of T cells, antiinfectious immunity. T-, NK- and NKT-lymphocytes. Membranous antigens. HLA complex and its biologic and medical importance. Tissue and organ transplantations. Antigen presentation and development of immune response. Hypersensitivity reactions. Anafylaxis, atopy, oral allergic syndrome. Serum shock, serum diasease, pseudoallergies. Central and peripheral tolerance. Breakdown of tolerance, autoimmunity - mechanisms of its development , symptoms (mainly in mouth cavity), diagnosis and therapy. Primary and secondary immune deficiencies and their symptoms, also in mouth cavity. AIDS. Immunosupression and immunostimulation. Therapy with monoclonal antibodies and cytokines. Practicals/interships: Serologic reactions and their role in immunodiagnosis. Laboratory diagnosis of AIDS. Examination of the immune profile of the subject – methods for determination of the activity of both non-specific (humoral, cellular) and specific immunity (cellular and humoral). Determination and monitoring of inflammation. Methods of transplantation immunology. In vivo and in vitro tests for the diagnosis of allergies. Laboratory diagnosis of autoimmunity.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚLChB/L-ZLa-005/00	Course title: Medical Biochemistry for Dentistry 2
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 24s / 36s Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 4.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100 % presence in practical exercises and seminars. On the average minimally 60 % of correct answers in written tests. Credits are awarded after passing the exam successfully. Exam: written part (minimally 80 % of correct answers) oral part – 2 questions	
Learning outcomes: Knowledge: Students will acquire knowledge of biochemical basis of functions in human tissues and organs. They will get information about molecular mechanisms of organ function regulation from gene expression up to the whole organism level. This is needed for understanding of changes in biochemical processes under pathological conditions and after pharmacological treatment. Skills: Students will master more complicated laboratory methods used in clinical biochemistry with relation to dentistry.	
Class syllabus: Basis of genetic information transfer, biochemical mechanism of DNA, RNA and protein synthesis. Regulation of gene expression. Vitamins as essential components of food. Gastrointestinal tract and digestion. Biochemistry of the liver. Synthesis and degradation of tetrapyrroles, metabolism of bilirubin. Biochemical aspects of homeostasis, roles of the kidneys in regulation of internal environment of an organism, acid base balance. Metabolism of water and minerals. Mechanisms of chemical signals transfer into a cell. Biochemical basis of the nervous system function. The vegetative nervous system. Hormones and their regulatory roles. The mouth cavity as an integral component of the human organism. Saliva – its secretion and meaning for the mouth cavity. Dental caries and theories of its appearance.	
Recommended literature: Practical exercises in biochemistry. Bratislava: Asklepios, the last edition P.C. Champe, R.A. Harvey: Biochemistry. J.B. Lippincott Company, the last edition J. Baynes, M.H. Dominiczak: Medical biochemistry. Mosby, the last edition	
Languages necessary to complete the course:

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚLFBIT/L-S-ZLa-050/16	Course title: Medical Biophysics
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 24s / 24s Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1.	
Educational level: I.II.	
Prerequisites:	
Course requirements: - 100% attendance at practicals - pass 2 written tests (at least 60%) - elaborate 10 protocols from practicals - elaborate semestral thesis Final Exam: written part – pass the test (at least 60%) theoretical part – 1 question from theoretical part, 1 question from practicals, interview about semestral thesis Evaluation of the test: A: 91 - 100 %, B: 81 - 99 %, C: 73 - 80 %, D: 66 - 72 %, E: 60 – 65 %, Fx: 59 % and less Total score is determined from the average of achieved grades.	
Learning outcomes: Knowledge: As a supportive course, it provides graduates of medical faculty physical literacy by which they would acquire physical knowledge about the functions of human body both in health, and in disease. Educate students in preventing damage to the organism caused by adverse effects of physical factors or specifically eliminating them. Skills: Practical knowledge and skills in the use of diagnostic and therapeutic methods in medicine. Apply knowledge in practice in health protection from physical factors (radiation) and their minimalization.	
Class syllabus: Biomechanics of organ systems. Biological oscillations – biological rhythms. Physical characteristics of the cells, tissues and organs. Principles of Molecular Biophysics and interaction of physical, chemical and biological factors with organic substances, cells and tissues. Basic diagnostic and therapeutic methods and biomedical monitoring. Biomaterials useful in medicine.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚLChB/L-S-ZLa-053/16	Course title: Medical Chemistry for Dentistry
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 24s / 24s Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: I.II.	
Prerequisites:	
Course requirements: Conditions for acceptance of practical education: - 100% attendance of practices and seminars - passing 10 written tests (for each test needed 60 % of points at least) Exam: - test (needed 70 % of points at least)	
Learning outcomes: Knowledge: - acquirement of knowledge of the structure, properties and biological functions of biogenic compounds - acquirement of knowledge of some pathophysiological processes in oral cavity – oxidative stress, glycation, glycooxidation and inflammation processes (gingivitis) - acquirement of knowledge of the dental materials structure and physico-chemical properties - acquirement of basic knowledge of inorganic and organic compounds toxicity Skills: - capability to apply obtained knowledge in comprehensive understanding of metabolic processes and their regulations in human organism - obtaining the practical experiences in a field of physico-chemical and biochemical methods used in laboratory and clinical practice	
Class syllabus: Lectures: Chemical composition of living systems and function of biogenic elements in organism. Biological mineralization – mineralization of bones and teeth, mineralization and its relationship to regulation of calcium, phosphorus and fluorine metabolism. Bioreactive forms of oxygen, nitrogen and chlorine. Chemical reactions in biological systems. Oral cavity and pH. Relationship between the environment of the oral cavity and the teeth, the pathophysiology of chemical reactions in the oral cavity, tooth decay theory. Structure and properties of substances used in dentistry. Classification of dental materials according to their chemical nature. Amalgams. Plastics as biomaterials. Resin composites and compomers. Resins and monomeric systems. Biochemically important reactions of organic compounds. The structure, properties and biological function of natural compounds (saccharides, lipids). Nonenzymatic glycation in diabetes. Polysaccharides. Chemical structure and functions of biological membranes. Steroids. Alkaloids. Reactions of	

amino acids. Peptide hormones and other biologically active peptides. Structure and functions of proteins. Nucleic acids and their sensitivity to mutagenic agents. Oxidative stress, oral cavity and antioxidative systems in organism. Structure and biological function of vitamins. Enzymes – their structure and biological function, mechanism of their action, regulation of catalytical efficiency of enzymes in the organism. Enzymes in oral cavity. The importance and application of enzymes in medicine.

Seminars and practicals: Principles of physico-chemical methods (spectrophotometry, potentiometry, chromatography) and their practical application in laboratory diagnostics. Determination of selected metal ions in biological material, determination of their effect on fragility of erythrocytes. Preparation of solutions and measurement of body fluids pH. Qualitative and quantitative determination of important physiological and pathological metabolites (urea, glucose, ketone bodies, total lipids, malondialdehyde). Thin-layer and gel-permeation chromatographies of amino acids and proteins. Determination and calculation of enzymes activities, study of effects of different factors.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.MÚ/L-ZLa-053/09	Course title: Medical Microbiology 2
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 20s / 24s Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 4.	
Educational level: I.II.	
Prerequisites:	
Course requirements: - 100% attendance at practicals - 2 written tests; each with the minimum success rate of 60 % Exam: written part - test with the minimum success rate of 60% theoretical part - 3 questions (medical microbiology, clinical microbiology. microbial infections in stomatology) Evaluation of the test: A: 100-91%, B: 90-81%, C: 80-73%, D: 72-66%, E: 65-60%, Fx: 59 % and less The total evaluation is determined from average of the obtained evaluations	
Learning outcomes: Knowledge: - normal oral flora and its role in establishment of dental caries, endodontic infections, periodontal diseases, parotitis and diseases of soft tissue and bones in the area of head and neck; knowledge of agents of diseases of oral mucosa and angular cheilitis - role of dental infections and infections in oral cavity in establishment of systemic infections of odontogenic etiology - knowledge about agents of infectious diseases of the particular organs and organ systems, about the mode of their transmission and the most important virulence factors used in the pathogenesis - predisposing factors for establishment of infectious diseases of the particular organs and organ systems, about the possibility of their prevention and therapy - sampling and transport of material corresponding to infectious diseases of particular organs and organ systems and the corresponding microbiological diagnostics Skills: on the model patients, evaluation and interpretation of microbiological diagnostical tests used in the diagnostics of diseases of microbial etiology in stomatology and infectious diseases of the particular organs and organ systems	
Class syllabus: Lectures: Basis of clinical microbiology. Normal oral flora. Carrier state of pathogenic microorganisms in oral cavity. Dental plaque and dental caries; infections of the pulp.	

Periodontal microbial diseases; microbial diseases of periapical tissues and jaw-bones. Periimplantitis. Salivary gland diseases. Microbial diseases of oral mucosa and oral manifestations of systemic diseases. Infections of the respiratory tract. Infections of odontogenic etiology. Infections of cardiovascular system. Infective endocarditis; sepsis. Neuroinfections. Infections of the skin, subcutaneous tissue; infections of muscles and bones. Infections of urogenital system. Gastrointestinal infections. Hepatitis. Retroviral infections and AIDS. Antiinfectious control, nosocomial infections, infections caused by resistant bacteria. Infections in dental office. Immune system of the oral cavity, vaccination. Practicals: Visualization and microscopical analysis of dental plaque. Laboratory diagnostics of microbial diseases of the oral cavity, dental and periodontal infections, infections of salivary glands, jaws and infections of odontogenic etiology. Laboratory diagnostics of respiratory infections, cardiovascular system, sepsis, neuroinfections, infections of skin, soft tissue and bones, gastrointestinal tract and urogenital tract.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.NK1/L-ZLa-054/09	Course title: Neurology
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 22s / 20s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 7.	
Educational level: I.II.	
Prerequisites: LF.ÚPA/L-ZLa-064/00 - Pathological Anatomy 2 and LF.ÚPF/L-ZLa-065/12 - Pathological Physiology 2	
Course requirements: 100 % attendance on practicals, patient examination and elaboration of complete patient record, written test – minimum 60 % Test grading: A: 93 - 100 %, B: 85 – 92 %, C: 77 – 84 %, D: 69 – 76 %, E: 60 – 68 %, Fx: 0 - 59 % Oral examination	
Learning outcomes: Knowledge: molecular mechanisms underlying nervous system activity, functional neuroanatomy, major neurologic syndromes, manifestation of nervous system disorders, principles and techniques of clinical and instrumental neurological examination, etiopathogenesis, clinical manifestation, diagnostic and therapy of common neurologic disorders Skills: mastering of technique and interpretation of clinical and instrumental neurological examination, identification of signs and symptoms of major neurological disorders, interpretation of laboratory findings in context of clinical picture, elaboration of diagnostic and therapeutic program in major neurological disorders	
Class syllabus: Signs and symptoms of nervous system disorders, major neurologic syndromes, clinical neurological examination – technique and interpretation, EEG, EP, EMG, USG, CT, MRI, lumbar puncture – principles, indications and interpretation, cerebrovascular diseases, epilepsy, headache and craniofacial pain, neurodegenerative diseases, vertebrogenic disorders, tumors of nervous system, infections of nervous system, demyelinating diseases, disorders of peripheral nervous system, disorders of neuromuscular transmission, disorders of skeletal muscles, trauma of nervous system, neurological complications of systemic disease	
Recommended literature: Biller J et al: The Neurological Examination, 6th ed., The McGraw-Hill Companies Inc, 2011, Benarroch E et al: Mayo Clinic Medical Neurosciences, 5th ed., Mayo Clinic Scientific Press 2008, Ropper AH et al: Adams&Victor's Principles of Neurology, 9th ed, The McGraw-Hill Companies, Inc, 2009, Bradley WQ et al: Neurology in Clinical Practice, 5th ed, Butterworth-Heinemann, 2007

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.KO/L-ZLa-055/00	Course title: Ophthalmology
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 12s / 12s Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 8.	
Educational level: I.II.	
Prerequisites:	
Course requirements: Knowledge: 100 % of participation in practicals Final test: 20 questions with minimum 60 % of correct answers Test score: A: 91 - 100 %, B: 81 – 99 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 % and less Exam: Theory: 3 questions: basic principles of optics, examination methods in Ophthalmology, general Ophthalmology, special Ophthalmology, Podoophthalmology, acute situations and first aid in Ophthalmology Total score is determined from the average of received ratings.	
Learning outcomes: Knowledge: - Acquiring basic, theoretical and practical knowledge in the field of Ophthalmology pediatric and adult patients. Basic examination in Ophthalmology (visual acuity test, direct and indirect ophthalmoscopy, slit lamp examination, perimetry) - Basic problems of clinical morphology and physiology of vision. Diagnostic procedures in ophthalmology: an investigation in daylight and side light. Biomicroscopy of the eye. Ophthalmoscopy direct and indirect. Investigation of visual acuity, field of vision and color perception. Additional tests in Ophthalmology: diagnostic ultrasound, fluorescein angiography of retinal blood vessels, optical coherence tomography, basic radiodiagnostics in Ophthalmology. Podoophthalmology, Ophtalmogenetics, Ophthalmogerontology, Ophthalmogeriatrics. Relationship between Ophthalmology and other medical specialties – stomatosurgery, maxillofacial surgery, otorinolaryngology. General disorders and their manifestations in the eye. Screening in Ophthalmology. Diseases of the eye subsidiary bodies. Diseases of the anterior segment of the eye. Modern cataract surgery. Refractive disorders of the eye. Basics of refractive surgery. Vascular and degenerative diseases of the retina and vitreous. Basics of vitreous-retinal surgery. Glaucoma. Traumatology of the eye. Neuroophthalmology, Ophthalmooncology. Skills: - The basis of investigation techniques, history, principles of treatment of diseases of the anterior and posterior segment of the eye, the algorithm in the differential diagnosis of eye diseases, especially inflammatory etiology and injuries.	

- Treatment of patients with diseases of the eye and orbit. Problems included patients with impairments of the eye to the environment - assessment activities. - First aid and urgent conditions in Ophthalmology. Tumors of the eye and disease of the orbit.

Class syllabus:

Clinical morphology, embryology and physiology of the eye. Redractory system of the eye. Pciples of the paediatric ophthalmology and ophthalmogenetics. Diseases of auxilliary organs of the eye. Iflammatory disease of the anterior segment of the eye. Glaucomas. Diease of the lens: cataract , subluxation and luxation of the lens. Diseases of the vitreous body. Retinal detachment. Vascular diseases of the retina. Diabetic retinopathy Traumatology of the eye.

Principles of the microsurgery of the eye> phacoemulsification, IOL implantation, pars plana vitrectomy. Trabeculectomy.

Skills:

- The basis of investigation techniques, history, principles of treatment of diseases of the anterior and posterior segment of the eye, the algorithm in the differential diagnosis of eye diseases, especially inflammatory etiology and injuries.

- Treatment of patients with diseases of the eye and orbit. Problems included patients with impairments of the eye to the environment - assessment activities. - First aid and urgent conditions in Ophthalmology. Tumors of the eye and disease of the orbit.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ORLK1/L-ZLa-056-/00	Course title: Otorhinolaryngology
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 18s / 25s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 8.	
Educational level: I.II.	
Prerequisites:	
Course requirements: All practicals need to be attended Ability to run patient's notes Test results need to reach 60% or more correct answers in order to pass (A: 91 - 100 %, B: 81 – 99 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 % and less) Practical exam Final evaluation takes into consideration all partial evaluations	
Learning outcomes: Knowledge: Profound theoretical knowledge in anatomy and physiology of ENT organs and neighboring areas. Knowledge on etiology, pathophysiology, diagnostics and treatment of ENT pathology. Basics of pharmacology in ENT, especially in infectious diseases. Theoretical knowledge on therapeutical approaches in ENT focused on oral cavity, nose, paranasal sinuses and the neck, principles of endoscopic diagnostic and surgical techniques in ENT. Principles of physiology and pathophysiology of hearing, basic knowledge of radiology in ENT. Basics of diagnostics and treatment in ENT oncology. Practical skills: History taking, physical examination of ENT organs, otoscopy, examination of the nose and nasal cavity including endoscopy, laryngoscopy including flexible laryngoscopy, epipharyngoscopy, examination of oral cavity and oropharynx, palpation of the neck. Reading and understanding of pure tone hearing test and tympanogram, principle of the neonatal hearing screening, evaluation of the CT and MRI of paranasal sinuses and the neck. Student must be able to make the provisional diagnosis including differential diagnoses, indicate appropriate examinations and therapeutically manage the patient.	
Class syllabus: Basics of anatomy and physiology of ENT organs. Standard examination methods including audiological diagnostics, neonatal screening of hearing. Symptoms of ENT diseases, diseases of ear, nose, sinuses, larynx, pharynx, oesophagus, thyroid and parathyroid glands, salivary glands and the neck. Tracheostomy, cricothyroidotomy, intubation. Tracheostomy care. Aspects of care after laryngectomy, tonsillectomy, ear and nose surgeries. ENT emergencies- choking, nose bleeds,	

bleeding from the mouth, management of inhaled and ingested foreign bodies. Management of the patient with head and neck cancer. Head and neck trauma.

Number of credits: 2					
Recommended semester: 11.					
Educational level: I.II.					
Prerequisites: LF.KSMCh/L-ZLa-048/00 - Restorative Dentistry 3					
Course requirements:					
Learning outcomes:					
Class syllabus: Developmental aspects in pedodontics. Primary, mixed and permanent dentitions. Child examination in stomatology and treatment planning in children. Management of child patient. Psychological aspects in paediatric stomatology. Medication in pedodontics. Prevention as basic principle in pediatric dentistry. Dental caries in children and its specificity. Therapy of primary and young permanent teeth. Endodontics in primary and young permanent dentitions. Injuries of the teeth in the child age. Prosthetics in children. Signs of the systemic diseases in oral cavity in children. Demonstration of some cases from pediatric dentistry.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.D_K/L-ZLa-067/00	Course title: Paediatrics
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 18s / 20s Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 9.	
Educational level: I.II.	
Prerequisites: LF.IK4/L-ZLa-042/00 - Internal Medicine 2	
Course requirements: 100% presence in practicals/internships Exam: written part – complete test minimally on 60% practical part – examination of pediatric patient theoretical part – 2 questions form pediatric problems Evaluation of test: A: 91-100%, B: 81-99%, C: 73-80%, D: 66-72%, E: 60-65%. Fx:59% and less General evaluation will be determined from average of acquired knowledge	
Learning outcomes: Knowledge: Division of children's age. Growth and development of child. Congenital heart diseases. Nutrition disorders. Malabsorption syndrome. Bleeding diseases. Diabetes mellitus. Thyroid diseases. Kidneys and urinary tract disorders. Disorders of Immune system. Respiratory diseases. Poisons. Principles of antibiotic treatment. Hypertension. Breast feeding especially from point of view of teeth development. Skills: Examination of child. History, status presence generalis and localis. Practical management of diagnostics and treatment of following states: Acute and chronic disorders of nutrition, respiratory diseases, kidney and urinary tract disorders, headache and bellyache, diabetes mellitus, Principles of antibiotic and antipyretic treatment in children, puberty problems.	
Class syllabus: Growth and development of child. Nutrition. Newborn period: physiology and pathology. Congenital and acquired heart disease, heart failure. Hypertension in children. Congenital and acquired respiratory diseases. Disorders of immune system. Congenital and acquired gastrointestinal tract disorders. Disorders of blood and blood produced organs – anemia, bleeding diseases, leukemias, Morbus Hodgkin. Congenital and acquired disorders of kidney and urinary tract. Endocrine diseases of childhood. Diabetes mellitus. Intoxications. Infectious and exanthematous diseases. Vaccination. Lectures: Division of children's age. Growth and development of child. Congenital heart diseases. Nutrition disorders. Malabsorption syndrome. Disorders of blood and blood produced organs. Diabetes

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚPA/L-ZLa-064/00	Course title: Pathological Anatomy 2
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 32s / 32s Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 5.	
Educational level: I.II.	
Prerequisites: LF.ÚPA/L-S-ZLa-071/17 - Pathological Anatomy 1	
Course requirements: 100% histopathology and autopsy class attendance. Histopathology class - to pass 2 written control tests - Multiple Choice Test, minimum score of 60 % Autopsy classes - Continuous oral evaluation of knowledge Complex exam: - Practical exam in autopsy room – oral form - Description of 1 histopathological slide - Final written multiple choice test – minimum score of 60 % - Oral exam 3 questions 1 - general pathology, oncology 1 - systemic pathology 1 – pathology of orofacial region Test scoring: A: 91 - 100 %, B: 81 – 99 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 % and less. Total score is determined from the average of ratings received.	
Learning outcomes: Knowledge: Morphologic changes of the organs in tumorous and non-tumorous processes. Tumor classification, grading, staging. Pathology of orofacial region. Diagnosis arrangement of autopsy report based on gross and microscopical examination. Skills: The use of modern immunohistochemical, molecular-biological and ultrastructural methods in diagnostics of pathological processes.	
Class syllabus: Special pathology of orofacial region: oral cavity and dental pathology– developmental dental anomalies, dental caries, diseases of the dental pulp, acute and chronic inflammations, parodontal and gingival diseases, bacterial and viral infections, oral manifestation of hormonal and systemic diseases, periodontal diseases, occlusal trauma. Diseases of oral mucosa, tongue and lips, developmental anomalies, inflammations, changes caused by systemic disorders, vitamins deficiency. Temporo-mandibular joint diseases. Pseudotumors of oral cavity, hyperplasia, odontogenic cysts, non-odontogenic cysts, benign and malignant orofacial region tumors	

– epithelial, mesenchymal. Odontogenic tumors. Salivary glands pathology – sialoadenosis, sialolithiasis, sialoadenitis, Sjogren syndrome, salivary gland tumors – benign, malignant. Special systemic pathology: cardiovascular system – vascular diseases, atherosclerosis, heart diseases, respiratory system – inflammations, allergies, emphysema, tumors, hemopoetic system, pathology of spleen, lymph nodes, nephropathology – vascular disorders, glomerulonephritis, tumors, ulcerous colitis, Crohn's disease, metabolic diseases, endocrine system – syndromes, tumors, neuroendocrine system, skin – inflammations, tumors, genitals – inflammations, sexually transmitted diseases, precancerous states, tumors, breast, endometrial dysfunctions, pathology of pregnancy, trophoblastic disease, nervous system – traumas, circulation disorders, inflammations, degenerative diseases, tumors, pathology of neonate.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚFKF/L-ZLa-020/00	Course title: Pharmacology 1
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 24s / 18s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 5.	
Educational level: I.II.	
Prerequisites: LF.ÚPF/L-S-ZLa-073/17 - Pathological Physiology 1	
Course requirements: - 100% attendance of tutorials - student must achieve at least 70% of maximum points (credit tests + seminar essay) - credit test evaluation: A: 94 - 100 %, B: 88 - 93 %, C: 82 - 87 %, D: 76 - 81 %, E: 70 - 75 %, Fx: 69 % and less	
Learning outcomes: Knowledge: Gain general knowledge about: - mechanisms of drug actions - fate of drugs in organisms - adverse drug reactions and other possible risks during therapy - preclinical and clinical evaluation of drugs Skills: - learn how to apply knowledge from general pharmacology in medical pharmacology and therapy of selected diseases	
Class syllabus: Drug and society. Sources of information about drugs. Nomenclature. Effects and side effects. Prescription. Drug and organism. Basic pharmacokinetic parameters. Mechanism of action on molecular level. Receptors. Adverse drug reactions. Interactions and their clinical relevance. Pharmacogenetics. Pharmacoepidemiology. Pharmacovigilance. Pharmacoeconomics. Pharmacology of autonomic nervous system. Pharmacotherapy of pain. Local anesthetics. Opioid and non-opioid analgesics. Pharmacotherapy during inflammation. Autacoids. NSAIDs. Immunomodulating agents. Biological drugs. Antirheumatic drugs. Pharmacology of the respiratory system. Anti-asthmatics. Antihistamines. Drugs affecting GIT. Peptic ulcer therapy. Prokinetic agents. Antiemetics. Cytostatics. Toxicology. Principles of antidotal therapy.	
Recommended literature: Brenner, GM, and Stevens, CM: Pharmacology, 4th edition Philadelphia: Saunders/Elsevier, 2013.viii, 520 p. ISBN 978-1-4557-0282-4. Educational level: I.II.	
Prerequisites: LF.ÚPF/L-ZLa-065/12 - Pathological Physiology 2 and LF.MÚ/L-S-ZLa-054/17 - Medical Microbiology 2	
Course requirements: - 100% attendance of tutorials - student must achieve at least 70% of maximum points (credit tests + seminar essay) - exam: written part - student has to reach at least 70% oral part - 3 questions (1 from general pharmacology, 2 from special pharmacology) - credit test evaluation: A: 94 - 100 %, B: 88 - 93 %, C: 82 - 87 %, D: 76 - 81 %, E: 70 - 75 %, Fx: 69 % and less	
Learning outcomes: Knowledge: Gain knowledge about drugs within specific pharmacodynamic groups (emphasis on the medical use in dentistry) with a focus on: - mechanism of action - pharmacokinetic properties - clinical use, contraindications - adverse effects - interactions with drugs, OTC products and other substances Skills: - learn how to apply knowledge of pharmacology in clinical disciplines - learn to assess the risk-benefit ratio of drugs in individual patient with an emphasis on medical pharmacology in dentistry	
Class syllabus: Pharmacology of cardiovascular system. Cardiotonics. Antiarrhythmics. Antianginal agents. Pharmacotherapy of heart failure. Antihypertensives. Vasodilators. Lipid-lowering agents. Anticoagulants. Fibrinolytics. Antiplatelet agents. CNS drugs. Neurotransmitters in the CNS. Antiparkinson agents. Antiepileptics. Antipsychotics. Anxiolytics and hypnotics. Therapy of insomnia. Cognitive enhancers. Pharmacology of the endocrine system. Pituitary hormones as drugs. Glucocorticoids. Thyroid hormones. Antidiabetics. Female and male hormones. Contraceptives. Hormone replacement therapy. Osteoporosis treatment. Antimicrobials. Beta-lactam antibiotics, macrolides, aminoglycosides, tetracyclines. Antituberculotics. Antiparasitic	

drugs. Antivirals. Pharmacotherapy of AIDS. Antimycotics. Principles of drug effect evaluation in individualised therapy.					
Recommended literature: Brenner, GM, and Stevens, CM: Pharmacology, 4th edition Philadelphia: Saunders/Elsevier, 2013.viii, 520 p. ISBN 978-1-4557-0282-4. Larner, J, Brody, TH and Minneman, KP: Brody's Human Pharmacology. Molecular to Clinical. 4th edition Philadelphia: Elsevier Mosby, 2005. 775 p. ISBN 978-0-323-03286-9.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.ÚTVŠ/L-ZLa-X19/16	Course title: Physical Training (5)
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 24s Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 5.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100% participation in seminars	
Learning outcomes: Knowledge: - Theoretical knowledge about the importance of physical activity and sport for a healthy life of man - Theoretical knowledge of the history and present various kinds of sport - Theoretical knowledge of strength training, swimming and tourism - The rules of the different sports - Sport as a means of fair play Skills: Practical skills of different kinds of sports - game activities, game combinations and game systems (defense, offense) Practical skills of strengthening	
Class syllabus: Teach the theory, methodology and practical coping following sports: basketball, volleyball, football- futsal, hockey, tennis, table tennis, badminton, swimming, aerobics, zumba, hiking (medium course, walking and water) and winter sports according to the interest of students. Foundations and principles of exercise in the gym. Practicing and mastering the basic game activities and simple combinations in game situations. Fundamentals of the rules, strategy and tactics in the selected sport. Exercises for medically fragile - fit, gym, swimming pool. Optional winter concentration.	
Recommended literature: Fitness and Strength Training for All Sports : Theory, Methods, Programs

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.FyÚ/L-S-ZLa-025/16	Course title: Physiology 1
Educational activities: Type of activities: lecture / practicals Number of hours: per week: per level/semester: 36s / 36s Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 2.	
Educational level: I.II.	
Prerequisites: LF.AÚ/L-S-ZLa-001/16 - Anatomy 1	
Course requirements: 100% presence in practical classes/seminars To prepare protocols from all performed practical tasks To submit the assigned seminar projects To pass successfully 3 written tests (minimum 70 % each) after completing a specific topic	
Learning outcomes: Knowledge: To obtain the knowledge of facts and to understand their relationships in the topic of blood physiology, physiology of the excitable tissues, physiology of respiration and metabolism. To gain basic knowledge about diseases prevention and healthy lifestyle. Skills: To acquire skills in recording, evaluation and interpretation of results of selected blood examinations, examinations of the respiratory system and metabolism. To gain/improve basic laboratory skills (use of microscope, pipette), basic medical examinations and measurements (determination of hematocrit, blood groups, haemoglobin concentration, count of blood elements, leukogram, metabolic rate, basics of spirometry, oximetry).	
Class syllabus: Blood - blood plasma, blood elements, acid-base balance, osmotic pressure, blood groups, blood coagulation and haemostasis, erythropoiesis. Excitable tissues - receptors, resting membrane potential, nerve excitability and action potential, synapses, functional properties of nerves, skeletal and smooth muscle. Respiration - functions of the respiratory system, ventilation, exchange of respiratory gases, the lung volumes and capacities, transport of O ₂ and CO ₂ , breathing and regulation of the blood pH, influence of changes in atmospheric pressure, regulation of breathing. Metabolism – energy intake and expenditure, basal and total metabolic rate and its measurement, energy value of nutrients, energy equivalent and respiratory quotient, oxygen debt, metabolism of carbohydrates, fats, proteins and its regulation.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.FyÚ/L-ZLa-022/00	Course title: Physiology 2
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 50s / 50s Form of the course: on-site learning	
Number of credits: 7	
Recommended semester: 3.	
Educational level: I.II.	
Prerequisites:	
Course requirements: 100% presence in practical classes/seminars To prepare protocols from all performed practical tasks To submit the assigned seminar projects To pass successfully 4 written tests (minimum 70 % each) after completing a specific topic Final complex examination: - complex written test (minimum points to pass 70%) - oral part of the examination: 2 questions on medical physiology The final evaluation is based on the results of both parts.	
Learning outcomes: Knowledge: To obtain the knowledge of facts and to understand their relationships in the topic of the digestive system and nutrition, cardiovascular physiology, thermoregulation, excretory system, endocrine system and reproduction, senses and central nervous system. To gain basic knowledge about diseases prevention and healthy lifestyle. Skills: To acquire skills in recording, evaluation and interpretation of results of selected examinations of dietary habits and nutritional status, of the cardiovascular system, sensory organs and central nervous system. To gain/improve skills in basic medical examinations and measurements (assessment of nutritional status, examination of the arterial pulse, blood pressure, ECG, visual acuity, eye ground, visual field, otoscopy and audiometry, examination of basic reflexes). To get skills in presentation of scientific information and information about diseases prevention and healthy lifestyle in form of short lecture and discussion.	
Class syllabus: The digestive system and nutrition - mastication, swallowing, gastric motility, the small and large intestine motility, the function of digestive juices and their secretion, digestion and absorption of nutrients, the function of the liver, regulations. Principles of balanced diet. Cardiovascular system - physiological properties of the cardiac muscle, cardiac cycle, heart sounds, arterial pulse, electrocardiography, blood flow in vessels, blood pressure, transcapillary exchange, lymph circulation, regional blood circulations.	

Thermoregulation - body temperature and its biorhythms, heat production and losses, mechanisms of thermoregulation.
 Kidneys - body fluids and their ion-structure, glomerular filtration and tubular processes, acid-base balance, formation and excretion of urine, regulation of renal functions.
 Endocrine glands and reproduction - mechanisms of hormonal action, functions of the hypothalamus - pituitary system, functions of other endocrine glands and their hormones.
 Special senses - classification and function, specialization of receptors, receptor potentials, vision, hearing, taste, olfaction, sense of balance, mechanoreception, thermoreception, nociception, proprioception.
 Central nervous system – reflex, reflex arch, sensation and perception, regulation of movements and muscle tone, higher nervous functions - memory, emotions, learning, speech.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Medicine	
Course ID: LF.PK/L-ZLa-077/00	Course title: Psychiatry
Educational activities: Type of activities: lecture / laboratory practicals Number of hours: per week: per level/semester: 12s / 12s Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 7.	
Educational level: I.II.	
Prerequisites: LF.ÚPF/L-ZLa-065/12 - Pathological Physiology 2	
Course requirements: 100% participation at practical trainings Exam: written test (minimally for 60%) Valuation of the test: A: 91 – 100 %, B: 81 – 99 %, C: 73 – 80 %, D: 66 – 72 %, E: 60 – 65 %, Fx: 59 % and less Oral exam: 2 questions (1 from general, 1 from special psychiatry) Overall valuation will be assigned due to the average of obtained valuations.	
Learning outcomes: Knowledge: Understand the etiology, pathogenesis, epidemiology, clinical manifestations of mental disorders. Learn the investigational procedures, principles of treatment and rehabilitation in psychiatry, legal status and assessment of persons with mental disorders in childhood and adulthood. Understand the causes, clinical, diagnostic and therapeutic procedures in emergency conditions in psychiatry. Understand the psychopathological symptoms and the classification of mental disorders according to ICD-10. Skills: to handle clinical psychiatric examination of persons with mental disorder, to elaborate the data from documentation, to work-out the psychiatric findings. To demonstrate the ability for examination of cognitive functions in adults by means of standardized assessment scale.	
Class syllabus: Causes, mechanisms and epidemiology of mental disorders. Psychopathology, classification, diagnostics, differential diagnosis, treatment, rehabilitation, assessment of psychiatric disorders in children and adults. First aid in psychiatry. Practicing of clinical examination, identification of symptoms, diagnostic conclusion and differential diagnosis, preparation of draft plan of further investigations and treatment of mental disorders. Training the use of screening and assessment scales.
