COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/301AB/17	Course title: China in the Globalized World
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I., II.	
Prerequisites:	
Course requirements: Research Paper: Students should conduct an analysis on a topic of choice on China's economic growth, reform, trade and investment, corporate sector reform, financial system or the role of Chinese economy in the world. Students can also choose a particular industry and analyze its opportunities and challenges with reference to topics discussed in the course. The paper should be maximum 12 pages (double sided, 12-point font) in length excluding tables and figures. Students are expected to present their research in the final lecture. Depending on the size of the class students might be expected to work in teams. Scale of assessment (preliminary/final): Class Participation / Presentation 50%	
Learning outcomes: China's rapid economic development in the last four decades not only dramatically transformed the country itself but also reshaped the global economic landscape. As the second largest economy and the largest exporter in the world, China's rise is an issue of keen interest to global politics, businesses, academics as well as ordinary people. This course will provide students with an overview of the Chinese economic development and its role in the world. We will look at the history, achievements, challenges and future prospects of the Chinese economy. We are going to examine how China's economy interact with the world through trade and investment. We will also discuss China's financial system and reforms given its relevance for future growth. Through the discussions of these topics we try to distinguish myth from reality and gain a better understanding of the Chinese economy.	
Class syllabus: (1) An Overview of Economic Growth and the Historical Background of Chinese Economy o This session presents an overview of China's economic growth in recent history in a global perspective. To provide a general background of this growth, we will look at how China's geographical characteristics and natural endowments shaped the economic development in a diverse region. We will also look at the general course of development of China's economy throughout ancient history and consider how China lost its economic lead in the 19th century. o Chapter 1-3 (2) Economic Reforms and Transition to Market	

o We will consider how China has transformed from a socialist central-planned economy to a vibrant market driven economy and delivered impressive economic growth in the process. This session will provide an overview of the gradualist economic reforms undertaken in China in the transition process and discuss the strategies and principles underlying the reforms.

o Chapter 4

(3) Economic Structure and the “Middle-Income Trap”

o We will analyze the structural composition of the Chinese economy and how different demand drivers have contributed to growth. We will compare the economic structure of China with other countries and discuss the difference in development models, using Korea and Japan as examples. We will then discuss the “middle-income trap” and the challenges China faces in order to continue the growth trajectory and avoid stagnation.

o Chapter 6

(4) Is China Over-invested? The Case of Infrastructure Development

o In this session we consider the risks and prospects of China’s investment-driven growth model. Infrastructure development takes on a key role in sustaining economic growth and stability during and after the global financial crisis. We look at the example of China’s high-speed railway development to consider the role of infrastructure investment in China’s economic management, the extent of infrastructure development and the room left for future growth.

o Chapter 14

(5) Reform of State-owned Enterprises (SOE) in the Industrial Sector

o This session will present an overview of SOEs in China’s industrial sector and examine the role they play in the economic development in the past and the present. We will consider the problems in the SOE sector and discuss the strategies of SOE reforms. Taking the steel sector as an example we look at the progress and challenges faced by SOE reforms. We will also discuss further reform initiatives and the obstacles they face.

o Chapter 13, 15

(6) China’s International Trade

o We look at the strategy and reform process of China’s foreign trade and consider how China transformed itself from an isolated closed economy to a global manufacturing powerhouse. We will also look at the changing structure of trade. We will examine China’s competitiveness in the global manufacturing landscape and consider the challenges faced by the trading sector.

o Chapter 16

(7) China’s Foreign Exchange and Reserve Management

o China state-controlled exchange rate mechanism is a major source of contention in international trade disputes. This session will provide an overview of the development of China’s unique exchange rate management regime and consider how it transitioned from a tightly controlled exchange regime to a dollar peg and then to a managed float policy. We will discuss the role of the currency policy in the build-up of foreign exchange reserve and the persistent trade surplus.

(8) China’s Balance of Payments and Global Imbalances

o We will take a deeper look into China’s current account surplus and reserve accumulation by putting it in the perspective of global imbalances. We will consider the extent that China’s policies and development contributes to global imbalances. Using iPhone production as an example we look at how new models of global manufacturing impacts US-China trade imbalance. We will consider the imbalance from the perspective of capital flow and discuss how saving and investment impacts the build-up of imbalances.

(9) FDI and China’s Investment Overseas

o In this session we will look at the inflow and outflow of foreign direct investment (FDI) into China. We consider the sources, processes and impacts of FDI in China. We will also look at the growing trend of China’s outward investment.

<p>o Chapter 17</p> <p>(10) China's Financial Sector and Reforms</p> <p>o This session will provide an overview of China's financial sector and the reform process. We look at the liberalization of China's banking sector and the development of capital markets. We consider the development of shadow-banking, or financing firms outside of the formal banking sector, and the opportunities and risks that are associated with it.</p> <p>o Chapter 19</p> <p>(11) Čínske dlhové a tieňové bankovníctvo</p> <p>V tejto časti sa budeme zaoberať témou rastúcej páky Číny a obáv z potenciálnej dlhovej krízy. Budeme analyzovať zloženie dlhu Číny a zvažíme príčiny zvyšujúcich sa úrovni zadlženia. Pozrieme sa na vývoj tieňového bankovníctva alebo finančných firiem mimo formálneho bankového sektora, ako aj príležitosti a riziká, ktoré s ním súvisia.</p> <p>Maliszewski a kol., 2016, "Riešenie problému podnikového dlhu v Číne", pracovný dokument MMF WP / 16/203</p> <p>H uang Y., Bosler C., 2014, "Čínska dlhová dilema, znižujúca sa miera rastu."</p>

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMn/003M/00	Course title: Company Code of Ethics
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: ---	
Course requirements: 100% continuous evaluation on the basis of fulfilment of tasks assigned during the class (90%) and active participation in class (10%). For the „A“ evaluation 91 points at least are needed, for the „B“ evaluation 81 points at least are needed, for the „C“ evaluation 73 points at least are needed, for the „D“ evaluation 66 points at least are needed, for the „E“ evaluation 60 points at least are needed.	
Learning outcomes: Students will gain up-to-date knowledge on preparation of codes of ethics and to learn about the methodic steps of creation of codes of ethics.	
Class syllabus: 1. Ethics program of organization 2. Institutionalization of ethics in organization 3. Nature of codes of ethics 4. Kinds of codes of ethics 5. Meaning of corporate codes of ethics 6. Order of steps in preparing corporate code of ethics 7. Content of corporate code of ethics 8. Structure of corporate code of ethics 9. Forms for supporting corporate code of ethics 10. Applying corporate code of ethics 11. Control of work corporate codes of ethics 12. Change of corporate code of ethics	
Recommended literature: REMIŠOVÁ, A.: Vademecum of Business Ethics. Bratislava: Sprint2, 2011. Selected codes of ethics from Internet.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/050M/17	Course title: Computer Networks for Managers
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: By completing the subject, the student will acquire the theoretical knowledge about network communication models, knowledge of active and passive network elements and currently used network models, ie ISO-OSI and TCP/IP. The aim of the subject is to provide the basic theoretical knowledge about communication in the computer network to students. On a practical page, the subject will be discussed by installing, connecting the workstation to the network (installing and configuring Windows and Linux systems and connecting them to the network). By completing the subject the student will acquire the theoretical bases, with which he will understand the mechanisms of communication in computer networks. Education is divided into an alternative form to 4 phases AKVA - Analytical (2-4 weeks), Conceptual (2-4 weeks), Verification (1-3 weeks), Argumentative (1-3 weeks). Študent po absolvovaní predmetu získa teoretické vedomosti o modeloch sieťovej komunikácie, znalosti o aktívnych a pasívnych sieťových prvkoch a v súčasnosti používaných sieťových modeloch, tj ISO-OSI a TCP/IP. Účelom predmetu je poskytnúť študentovi základné teoretické vedomosti o problematike komunikácie v počítačovej sieti. Po praktickej stránke sa bude predmet zaoberať inštaláciou, pripájaním pracovnej stanice do siete (inštalácia a konfigurácia systémov Windows a Linux a ich pripojenie do siete). Absolvovaním predmetu získa študent teoretické základy, s pomocou ktorých pochopí mechanizmy komunikácie v počítačových sieťach. Vzdelávanie je v alternatívnej forme rozdelené do 4 fáz AKVA – Analytická (2-4 týždne), Konceptná (2-4 týždne), Verifikačná (1-3 týždne), Argumentačná (1-3 týždne).	
Class syllabus: 1. Introduction to computer networks 2. Windows Workstation on the network	

3. Linux as a network client 4. ISO-OSI reference model - introduction, 1. layer 5. ISO-OSI Reference Model - 2nd and 3rd vs 6. ISO-OSI reference model - 4-7th layer 7. The TCP-IP protocol set 8. Direction of communication in TCP-IP networks 9. Install and configure Windows 10. Installing and Configuring Linux 11. Configuring operating systems according to network needs

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMn/052M/00	Course title: Conflict Solving
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Individual written paper (30%), Team presentation (40%), In-class activities (30%).	
Learning outcomes: Students are familiarized with different types and sources of conflicts at workplace and possible approaches how to deal with them. By taking part in various active excersices, using case studies, discussions and role plays, students acquire skills in identification, analysing and solving conflicts, and they improve their negotiation skills.	
Class syllabus: 1. Role of conflict at workplace. 2. Basic approaches to dealing with conflicts. 3. Nature and development of conflict. 4. Negotiation styles (competitive, cooperative, principial and virtual negotiation). 5. People in conflicts. 6. Motivational and interactive preferences in resolving conflict. 7. Negotiation - techniques, approaches and results. 8. Interests and power in conflicts. 9. Strategies of resolving conflicts. 10. Practical exercises aimed to identification of a conflict in a given situation. 11. Student presentations. Class involves a series of case studies, negotiation exercises, in-class debates, and a course project.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/050M/00	Course title: Consumer Behavior
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Course requirements:	
Learning outcomes: # Familiarize students with the field of consumer behavior and with its relations to other marketing functions # Develop understanding of critical issues in managing consumer behavior # Combine theoretical framework with a real-world application	
Class syllabus: Week Topic Sept 21st – Sept 25th Week 1 Consumer behavior and consumer research # Why study consumer behavior? # Evolution of consumer behavior # How do you study consumers? # Underlying principles of consumer behavior (including B2B market) Sept 28th – Oct 2nd Week 2 Marketing strategies for customer-centric organizations # The century of the consumer # From market analysis to market strategy – where does CB fit? # Customer loyalty and retention strategies – CRM # Global marketing strategy Oct 5th – Oct 9th Week 3 The consumer decision process - intro # Introduction into CDP model # Variables that shape the decision process # Types of decision process # Factors influencing the extent of problem solving Case 11 – Creating brands that last Oct 12th – Oct 16th	

Week 4 The consumer decision process – part 1 (pre-purchase processes)

Need recognition

Search for information

Pre-purchase evaluation of alternatives

Oct 19th – Oct 23rd

Week 5 The consumer decision process – part 2 (purchase)

Purchase

Case 5 – Crimson cup

Oct 26th – Oct 30th

Week 6 The consumer decision process – part 3 (post-purchase processes)

Consumption

Post-consumption evaluation

Divestment

Nov 2nd – Nov 6th

Week 7 Guest speaker

Nov 9th – Nov 13th

Week 8 Individual determinants of consumer behavior – part 1

Demographics, psychographics and personality

Consumer Motivation

Case 4 – Family furniture

Nov 16th – Nov 20th

Week 9 Individual determinants of consumer behavior – part 2

Consumer knowledge

Consumer beliefs, feelings, attitudes and intentions

Nov 23rd – Nov 27th

Week 10 Environmental influences on consumer behavior

Culture, ethnicity and social class

Family and household influences

Group and personal influence

Case 6 - Aldi

Nov 30th – Dec 4th

Week 11 Influencing consumer behavior

Making contact

Shaping consumers opinions

Helping consumer to remember

Dec 7th – Dec 11th

Week 12 Measuring consumer behavior – market research

Managing customer insight

Market research in practice

Case 7 – National Christmas tree association

Dec 14th - Dec 18th

Week 13 Guest speaker

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/049M/00	Course title: Corporate Social Responsibility and Management
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The total 100 % rating of the subject consists of: <ul style="list-style-type: none"> • Continuous evaluation: 30 points for active participation in lessons and case studies. • Seminar paper elaboration and presentation: 70 points. The topics of the seminar work concern the possibilities of applying socially responsible business in different sectors of the national economy, respectively. in different fields of activity, with emphasis on the following areas: social responsibility objectives; analysis of CSR measures; economic justification of social responsibility; advantages and barriers to the application of social responsibility, or others (taking into account the particularities of the chosen sector / subject of activity).	
Learning outcomes: The aim of the subject is to give students a chance to apply a socially responsible business, which is an indication of how business entities can influence their activities interests of other groups in their immediate surroundings. Highlight the fact that the company is a direct part of the surrounding world, not only focusing on economic growth but also on the impact of social, environmental and / or environmental impacts.	
Class syllabus: Corporate Social Responsibility - Definitions and History. Corporate Social Responsibility and Related Terms. Reasons for adopting the concept of socially responsible business. Corporate Social Responsibility in the World and Slovakia. World Movement of Corporate Social Responsibility. Strategies of Corporate Social Responsibility for Transnational Companies in Slovakia. Corporate Social Responsibility under the conditions of small and medium-sized enterprises. The bases of adopting the concept of socially responsible entrepreneurship in small and medium-sized enterprises. Themes and barriers to the application of this concept. Economic rationale for applying this concept. Corporate Social Responsibility in the Supply Chain. The Importance of Corporate Responsibility in the Supply Chain. Current issues of this concept in the supply chain. The role and responsibility of final consumers.	

Corporate Social Responsibility and community support.
 Business Citizenship. Motivation of cooperation. Benefits and risks of mutual cooperation. Trends in cooperation and business and non-profit sector.
 Corporate Social Responsibility and Public Policy.
 The importance of public policy in the everyday life of citizens. Creating and managing CSR strategies. Examples of public support for CSR in the EU and Slovakia.
 Assessing Corporate Social Responsibility. Examples and annual reports of socially responsible business organizations.
 Performance indicators. Principles of preparation of annual reports. Challenges to the future.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/094M/09	Course title: Corporate Valuation (1)
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Financial Management, Fundamentals of Financial Management	
Course requirements: In the course of the semester, the student will be awarded a project of evaluation of the selected company, which will serve for the overall evaluation. In order to obtain an A rating, it is necessary to obtain a minimum of 91 points, to obtain a score B of at least 81 points, a C rating of at least 76 points, a D score of at least 66 points and an E score of at least 60 points. Scale of assessment (preliminary/final): The prerequisite for this class is a passing grade in foundations of accounting and statistics and to be familiar with the basic financial concepts. Therefore, it is expected that students will be comfortable with the following topics: basics financial concepts and accounting principles and basics statistical concepts.	
Learning outcomes: This is an introductory course in corporate valuation. The course has two main objectives: 1) Develop an understanding of the tools that are used to analyze firm's financial statements, for preparing financial plans and to realize basics evaluating methods for valuing firms: DCF method, DDM method and Valuation Multiples. 2) Understand the basic issues involved in how the evaluation process is working in real world. Emphasis will be placed on appreciating the limitations and challenges that are faced when applying the theoretical framework of Corporate Valuation approaches in firm valuation.	
Class syllabus: Brief Syllabus: 1. Basic characteristics of the Corporate Valuation. 2. Legal minimum for enterprises combinations in Slovakia. 3. Valuation methods based on financial ratios. 4. Valuation methods based on discounted cash flow approach. 5. Estimating/forecasting future Free Cash Flow of the firm. 6. Calculation Weighted Average Cost of Capital. 7. Determining real value of the firm from stockholders view. 8. Case Study (Appraisal of the company which is traded on the stock exchange). 9. Case Study (Appraisal of the company which is traded on the stock exchange)	

10. Case Study (Appraisal of the company which is traded on the stock exchange)						
11. Case Study (Appraisal of the company which is traded on the stock exchange)

3. Hitchner, J. R.: Financial Valuation, Applications and Models, John Wiley & Sons, Inc., 2013.
4. Bloomberg Professional Terminal
5. yahoo.finance.com

Languages necessary to complete the course:

English

Notes:

Notes:

We will use lecture notes and they will be distributed during the semester. The lecture notes are self-contained, thus, no textbook is required. For those of you who wish to use a textbook in addition to the class notes, I recommend that you use:

Brigham, E. F., Ehrhardt, M. C.: Financial Management, 14th Edition, Thomson, South-Western, 2014.

This textbook can be used as background reading for those of you who wish to read ahead of the lecture or dig deeper into the material. This textbook is available for purchase online at Amazon.com and it is also available at the FMUK Library.

There will be several cases studies in this course. The cases are intended to help you understand the course material and prepare you for your own project.

I will announce in class when you should start to prepare your own project and when the project solutions are due in class. The solutions for the project will be discussed in class. You can work alone or with other students on the project. However, you need to write up your own individual solution for your project and turn it in for credit. If you work with other students, note their names on your solution.

Please bring a PC to class. We will use MS Excel for calculation.

During the class we will use Bloomberg Professional Terminal as source of financial data.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/311M/18	Course title: Corporate banking
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Active participation on the seminar, a written semestral project and the presentation of outcome of the project are necessary requirements for achieving good grade. Active preparation for each seminar and a short presentation on a selected topic are also necessary. Scale of assessment (preliminary/final): Written semestral project: 30 %, Presentation of outcome of project: 30%, Short presentation on a selected topic 10%, Activity on seminars 30%.	
Learning outcomes: Students should understand the process of approving financing in a corporate bank, and the roles of respective departments (Lending, Risk, Legal) in approving and providing of financing. Students should be able to assess the ability of a company to receive financing, based on its financial statements. Students should be able to use knowledge and skills gained in subjects accounting, financial accounting, micro/macro-economics to assess the financial strength of a company and its ability to receive and repay a loan.	
Class syllabus: Financing as a core product of a corporate bank Financial analysis of a company – understanding of financial statements, questions for clients Structuring of a loan – understanding the need of financing and structuring Approval of financing – Risk management Legal documentation – Legal department Project financing – structured and project financing

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/136M/10	Course title: Diploma Thesis Seminary (2)
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: 100 percent - an interim evaluation of the semester. To obtain assessment and must be obtained at least 91 points, to obtain evaluations of at least 81 points B, C for the evaluation of at least 73 points for the evaluation of at least 66 points D and E on the evaluation of at least 60 points.	
Learning outcomes: Completion of the course gives students a comprehensive knowledge base necessary for processing the theoretical background of the thesis.	
Class syllabus: 1 In cooperation with the Head of the precision work formulations aim of the thesis (main and partial) in accordance with the requirements of fair reachability, measurability, acceptability and verifikovateľnosti. 2 Plagiarism and its various forms. Legal and ethical aspects of writing theses on order. Theses matter of law. Ethical rules related to respecting the intellectual property of others. 3 Selection of appropriate methods of examination of the issues of the thesis. Techniques and styles of scientific work. 4 The formulation of hypotheses, which constitute assumption or presumption that the student wants to check in the thesis. Assessment of relevance and eligibility hypotheses. 5 Processing timetable solutions thesis topic (approval, and arranging theoretical background, orientation and study in the literature, the processing of the logical framework, formulation own contribution of work, processing methodology of work, carrying out research (primary, secondary), processing of the original work, the formulation conclusions, proofreading of the work). 6 Processing the theoretical background of the thesis to the requirements of new trends in management. Creating text theoretical chapter of the thesis, refinement relationships and formulations of individual components of the text.	
Recommended literature:	
Languages necessary to complete the course: Slovak

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/047_M/12	Course title: Enterprise Communication Systems
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: By completing the subject, the student will acquire skills in the field of corporate communication systems by using the program equipment available to the faculty and gaining deeper theoretical knowledge from the field of communication systems used in current and corporate practice. Education is divided into an alternative form to 4 phases AKVA - Analytical (2-4 weeks), Conceptual (2-4 weeks), Verification (1-3 weeks), Argumentative (1-3 weeks).	
Class syllabus: Topic 1: Introduction to Information Technologies Used to Transfer Information in Private Communication Networks Topic 2: Introduction to Telecommunications Topic 3: ISDN Topic 4: DSL Topic 5: Optical networks Topic 6: ATM Principles Topic 7: Transfer devices Topic 8: Mobile Telecommunications Topic 9: Satellite communications Topic 10: X.25 Topic 11: Frame Relay Topic 12: Voice over the Internet

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/014M/15	Course title: Ethical hacking
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: Clarify the complexity and extent of the problem of securing systems for processing data and providing information with an emphasis on the role of the manager in the process of building and operating such systems. Upon successful completion of this course, students will master the basics of IT security and will be able to test IS / ICT security and business, apply IS / IT principles and information security in their management activities on IT and non-IT positions, and operate within the information management security in the company, at various stages of the life cycle of the information system in all managerial positions. Alternative activity in the four ACVA phases of the project solution – Analytical (2-4 weeks), Conceptual (2-4 weeks), Verifying (1-3 weeks) and Argumentative (1-3 weeks).	
Class syllabus: General safety bases and the definition of a "secure information system". Basic technical and program resources for IS protection. Network Security Specifications. Security and IS creation process. IS security and operation. The human factor and the security culture of the organization. Basic safety principles. IS audit. Lectures and seminars - thematic plan: 1. Introduction to Ethical Hacking	

2. Practical demonstration of hacker tools for Linux and Windows 3. Practical demonstration of IT security penetration test 4. Practical demonstrations of Viruses 5. Demonstration of network monitoring 6. Direct attack attacks on network devices 7. Demonstrate protection against hacker techniques 8. Personal security and security of biometric personal data 9. ISO 27001 - Safety Management System 10. Law 122-2013 - Personal Data Protection Act 11. OWASP - Open Web Application Security Project 13. Social engineering 14. Trends in safety management 15. Student battle in a sandbox

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/309M/18	Course title: Fundamentals of professional text creation
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: To complete the Course it takes to actively participate on the lessons. Work independently during the semester and carefully prepare for each lesson. During the Semester students will be asked to work on tasks related to the content of each of the lessons. The final assessment of the is based on the rules set in University Study Regulations, with an interim evaluation of 50% of the overall assessment. The final evaluation follows after a successful presentation of the semester work (50%). Scale of assessment (preliminary/final): Interim evaluation 50% Semestral work 50%	
Learning outcomes: After completing the Course, the students are able to master the writing and defence of the final thesis. Understand and apply suitable research methods, formulate and interpret the findings. Stylistically articulate and present the results of the findings. They also learn to quote correctly, work with the literature used, and create bibliographic references with the help of a citation manager.	
Class syllabus: The Course provides formal, methodological and stylistic preparation and subsequent implementation of the final thesis. From the selection of the topic, through the processing of the literature review, the selection of the methodology, data collection, data analysis and the interpretation of the results. To acquaint the conceptual framework of the final thesis and its theoretical, methodological and analytical basis. For more efficient work on the thesis, students will learn the basics of working with a citing manager. Specialists will be invited to the special topics as well.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/013M/00	Course title: Information and Communication Technologies
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The aim of the subject is to prepare the student for effective orientation in information and communication technologies. This course provides an overview of the technical and software features of computer-based systems. The main focus is on mobile, desktop, server systems, and embedded platforms for their characteristics and related communication technologies. The discussed technologies are developed from the point of view of creating software applications and technical equipment. The focus is on modern information and communication technologies used in enterprises. Practical examples of selected businesses and technologies in the virtual environment will be presented on the subject. After completing the course, the student will expand and acquire new knowledge resulting from the development and development of ICT, understand the new concept in this field, analyze and apply this knowledge in professional subjects.	
Class syllabus: 1. Introduction to the problem. (history, information, data, technology) - Historical development of computational systems. Terminology and explanation of terms. 2. Hardware - Explanation of basic architectures of calculating devices. Explanation of the main principles and differences of mobile devices, workstations, servers and monitors, embedded computing devices. 3. Windows, OSX, Linux operating systems 4. Software - The cross-section of software used in business practice. Modern approach to creating software (open source, programming languages and environments, mobile applications and cross-platform software, cloud computing) 5. Networks - Basic principles of networks, network components. Linking information technologies. Internet Principle.	

6. State and international eGovernment information systems, eHealth
7. Security of Information Technologies - Physical security, software security, organizational security.
8. Modern trends in ICT - IOT, Quantum computers.

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/269M/16	Course title: International Public Policy
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: I., II.	
Prerequisites:	
Course requirements: Students are expected to have a basic understanding of international relations theories and the workings of international institutions. They should be able to understand and produce work in English at an advanced level.	
Learning outcomes: This course prepares students for systematic understanding of public policy and its issues and how political institutions, processes and public policies operate in world affairs. How is public policy created? What actors are involved? What are the challenges of cooperation and what implications does it have for policy-making? We will look at a range of both theoretical and empirical scholarship. International issues such as international organisations, cyber-security, piracy or humanitarian work will be covered as well as cross-cutting themes that are not exclusive to the international arena namely organisational management and behavioral economics.	
Class syllabus: 1. Introduction to International Public Policy 2. Actors in the policy process 3. Challenges of cooperation and policy-making 4. Global public policy issues I 5. Global public policy issues II 6. Behavioural and economic insights into public policy

Course ID: FM.KIS/018M/00	Course title: Intranet
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The aim of the course is to prepare the student for effective orientation in the environment of the internal network and information infrastructure of enterprises and to become acquainted with its dependence on intranet information systems. This course provides an overview of the technical and software features of internal computer systems based on computer technologies. The focus is on the architecture of the internal enterprise network and its link to business processes using mobile platforms, desktop technologies and server systems. Discovered intranet technologies are at present indispensable and a key part of businesses, and proper organization and management are needed. Practical examples of selected businesses and technologies in the virtual environment will be presented on the subject. After completing the subject, the student will expand and gain new knowledge resulting from the development of intranet management and development in selected enterprises. Students will understand the new concept in this field, they can analyze and apply this knowledge in professional subjects and in practice.	
Class syllabus: 1. Introduction to the problem. (intranet history, information, data, technology) - Historical development of computing systems in intranet environments. Terminology and explanation of terms. 2. Hardware - Explaining the basic architectures of the computing devices in intranet environments. Technical specifications of intranet devices and their relationship to business processes. 3. Specifics of intranet operating systems - Windows, OSX, Linux, Mobile platforms 4. Intranet software applications - The cross-section of software used in enterprise intranets. File management. Internal education systems. Expert systems. Integrated production control systems. Remote access systems. Cloudy cloudy in enterprises, manager of mobile devices in the business.	

5. Intranet Network Architecture - Basic used network architectures for their principles and management. Monitoring network and access in intranet. VPN 6. Intranet Security - Physical security, software security, organizational security. 7. Modern trends in intranet and outsourcing of cloud computing and hybrid cloud systems.

Faculty: Faculty of Management	
Course ID: FM.KIS/019M/00	Course title: Intranet
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The aim of the course is to prepare the student for effective orientation in the environment of the internal network and information infrastructure of enterprises and to become acquainted with its dependence on intranet information systems. This course provides an overview of the technical and software features of internal computer systems based on computer technologies. The focus is on the architecture of the internal enterprise network and its link to business processes using mobile platforms, desktop technologies and server systems. Discovered intranet technologies are at present indispensable and a key part of businesses, and proper organization and management are needed. Practical examples of selected businesses and technologies in the virtual environment will be presented on the subject. After completing the subject, the student will expand and gain new knowledge resulting from the development of intranet management and development in selected enterprises. Students will understand the new concept in this field, they can analyze and apply this knowledge in professional subjects and in practice.	
Class syllabus: 1. Introduction to the problem. (intranet history, information, data, technology) - Historical development of computing systems in intranet environments. Terminology and explanation of terms. 2. Hardware - Explaining the basic architectures of the computing devices in intranet environments. Technical specifications of intranet devices and their relationship to business processes. 3. Specifics of intranet operating systems - Windows, OSX, Linux, Mobile platforms 4. Intranet software applications - The cross-section of software used in enterprise intranets. File management. Internal education systems. Expert systems. Integrated production control systems. Remote access systems. Cloudy cloudy in enterprises, manager of mobile devices in the business.	

5. Intranet Network Architecture - Basic used network architectures for their principles and management. Monitoring network and access in intranet. VPN 6. Intranet Security - Physical security, software security, organizational security. 7. Modern trends in intranet and outsourcing of cloud computing and hybrid cloud systems.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/054M/00	Course title: Investment Banking
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Banking, Financial markets and institutions	
Course requirements: The student must prepare PowerPoint presentations to selected topics. Based on these presentations, discussion will take place during the lectures. Moreover, every student must work on investment strategies and investment portfolio as a member of a team. The final evaluation reflects activities of the student during the lectures. The required minimum is 55 points.	
Learning outcomes: By passing of this subject, the student should obtain various practical skills. He should also gain a basic knowledge of functioning of big investment banks and about their role on financial markets where they represent various investors, as well as support companies and entrepreneurs.	
Class syllabus: <ol style="list-style-type: none"> 1. Investment banking – the basic terms, investment bank, investment banking 2. The main and supplemental roles of investment services. Types of emission operations. The role of an investment bank in the emission process. 3. Securities trading – on own account, on client's account 4. Insider information and protection from insider trading 5. Management of client's portfolio – creation, revision, performance measurement 6. Creation of new structured products for clients 7. Realities trading, other activities, international activities 8. Capital raising options. Own capital investments. Venture Capital 9. Asset securitization 10. Project financing 11. The role of investment banks in fusions and acquisitions. Speculative acquisitions, restructuralisation 12. Analyses and enterprise valuations. The methods of enterprise valuations 13. The actual problems of investment banking in the World

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/111M/00	Course title: Joint Foreign Policy of EU
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Scale of assessment (preliminary/final): The evaluation of the subject is in accordance with the Internal Regulation no. 20/2017 (Study Regulations UK) and aims to evaluate the acquired abilities and habits of the graduates of the subject in the possible use of AKVA assessment methods (analysis, concept, verification, argumentation) /CÚSP (objectivity, complexity, teamwork, outputs).	
Learning outcomes: Students acquire knowledge about the issue of EU Common Foreign Policy, which will be widened by exercises to national specifics. The subject is focused on the development of creative managerial thinking.	
Class syllabus: Short syllabus: 1. Ráciom; Methodological and motivational introduction to the subject, interpretation of the different approach and values of foreign policy cooperation at European level, relationship of preferences of the Common Foreign Policy and concerns about the loss of state sovereignty. 2. Legislation, principles and objectives of EU foreign policy; The interpretation of the Maastricht, Amsterdam and Treaty of Nice as the legislative basis, the EU's second pillar, operating outside the normal Community rules, including decision-making and the role of the various institutions. Analysis of the basic objectives of the Common Foreign Policy under TEU, Art. J 1. - 4. Interpretation of the Basis of the Common Foreign Policy of the EU. 3. Key actors in EU foreign policy; Differentiating individual actors and understanding their role creates a prerequisite for European integration studies. Analysis of the role of the various actors: European Council, Council of Ministers, COOPER and Political Committee, Working Groups, Secretariat, Presiding Country, Troika, Commission, European Court of Justice. 4. Instruments and procedures for taking decisions in II. EU pillar; The basic interpretation will focus on systematic cooperation (information and common action on issues of mutual interest, common approach to external representation, cooperation in international	

organizations not represented by all Member States, activities in the UN Security Council), common positions (TEU Art. J.2.) And associated activities.

5. Historical development of EU foreign policy;
Differentiating the two phases of the EU's Common Foreign Policy. Creating political and defensive communities. Building EPC - a pragmatic approach. The transition from the EPC to the Common Foreign Policy and its financing under different regimes.

6. Future prospects for EU foreign policy (EU and US);
Changes in improvements in many foreign policy mechanisms and instruments, the Treaty of Amsterdam, the Treaty of Nice, the draft Constitutional Treaty. Analysis of attitudes and relationships between the US and the EU, and overcoming the bureaucratic integrated conglomerate that is far from the European Union or the United States.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KSP/009M/00	Course title: Managerial Decision-Making
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Finished bachelor degree.	
Course requirements: The overall evaluation is in accordance with the faculty evaluation system: A = 91-100%; B = 81-90%; C = 73-80%; D = 66-72%; E = 65-60%; F = 0-59%. Scale of assessment (preliminary/final): Ongoing: 40% / Exam: 60%. The exam consists of the written mid-term exam during the semester 30% and of the final exam during the examination period 30%.	
Learning outcomes: Decision-making belongs to main responsibilities and functions of the managers and managers are regarded and evaluated in terms of success in making decisions. The goal of the course is to improve the decision-making skills of students and to contribute to their ability to effectively and creatively solve problems both individually and within the teams. The course graduates would learn to perceive decision-making as a systematic process in the context of problem solving. They would be able to use rational methods of decision-making under conditions of certainty, risk and uncertainty as well as to solve the sequence of successive decisions. They would be familiar with the techniques of decision-making in groups and teams. They would sense the psychological perspective of the decision-making. They would practice the gained theoretical knowledge practically by means of the various simulations and case studies.	
Class syllabus: 1. Introduction into the subject. Decision-making in management. The nature of managerial decision-making. The decision-making process. 2. The rational approaches in the managerial decision-making. Methods and approaches of the decision-making under certainty, uncertainty and risk. The sequence of decisions and decision trees. 3. The psychological aspect of managerial decision-making. The two systems in us. The heuristics of anchoring, availability and representativeness. The prospect theory. The irrational types of choices. The limits of the human mind. 4. The group decision making. Defining the group's assignment, planning and organizing the overall group effort and staffing the decision group. Directing and controlling the group meeting. The creative methods and techniques of group decision-making.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/026M/00	Course title: Marketing Analytics
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Grading: 30 % SAS models <ul style="list-style-type: none"> • Association analysis model: 10% • Cross sell model: 10% • Segmentation model: 10% 70 % final oral exam The overall student rating consists of the sum of the percentages for the analyzed analytical models, the active participation and the percentage obtained for the oral exam. The individual analytical models are developed continuously on individual seminars, in particular the procedures are always explained and demonstrated at the seminar. The oral exam is comprehensively evaluated with regard to the quality of the model processing and the solving of the given task. Each student gets the job to use the selected model that was taken during the semester. The evaluation will be based on model quality and explanation of its use for marketing purposes. The individual grades of the grading scale are awarded on the basis of the total number of points / points that reflects the degree of completion of the subject. The ratio of continuous and final evaluation is 30: 70. Grading scale: 100 –91=A/ 90-81=B/ 80-73=C/ 72-66=D/ 65-60=E/ 59-0=Fx Scale of assessment (preliminary/final): 30:70	
Learning outcomes: After completing the course students will be able to work with the program SAS Enterprise Miner and will be able to perform and interpret basic analysis like cross sell, up sell, association analysis and segmentation.	
Class syllabus: 1. Basic characteristics of marketing analytics Marketing Research and its components. Role and status of marketing analytics in the organization. Customer Life Cycle. 2. Statistical Software Enterprise Miner Strana: 2	

Introduction to SAS Enterprise Miner software. Basic terms. Data retrieval, fault finding and missing data records, impute and replacement, data cleansing, data standardization.

3. Types of analysis used in marketing analytics

Customer segmentation. Cross Sell, Up Sell, Customer Retention and Customer lifetime value.

4. Customer segmentation

Definitions, basic types of segmentation. Business rules - Profit ranking, RFM (Recency, Frequency, Monetary), Supervised clustering - Decision tree, Unsupervised clustering - K-means clustering. Creating customer segments.

5. Profiling customer segments

Segmentation strategies. A detailed description of each customer group in terms of their sociodemographic

profile, purchasing behavior, experience and needs.

6. Cross Sell and Up Sell.

Definition of terms. Basic components of Cross Sell Modeling. Next Best Offer. Analysis of customer potential for sales of products and services. The analysis provides valuable patterns of buying behavior in the form of transparent outputs. Its conclusions are used in referral systems, when compiling promotional packages, determining the content of promotional catalogs, and especially targeting marketing campaigns to existing customers.

7. Association analysis

Using association analysis (shopping cart analysis) to identify the Next Best Offer. Model results in managing campaigns.

8. Sequence analysis

Using sequential analysis to identify Next Best Offer. Sequence analysis also uses a variable to capture information about the order of product purchase by individual customers. The result is two to multi-element rules that show the sequence of purchases. Using modeling results in managing campaigns.

9. Propensity to Buy

Basic principles of predictive modeling. Practical example of modeling propensity to purchase and interpretation of results. Utilizing modeling results in managing campaigns.

10. Customer Retention

Definitions. Customer retention and profitability of the organization. Fundamental retention strategy for the organization. Analysis of the retention factors. Modeling propensity to leave.

11. Modelling customer retention and fraud detection

Which customers will leave next month? Using modeling results to manage the campaigns. Fraud processing. Detection and prevention of fraud in various areas of business (insurance fraud, tax cuts, employee fraud).

12. Customer lifetime value (CLV).

Definition of terms. Basic approaches to calculating the lifetime value of the customer: a) Coverage (sales minus variable costs). b) Marketing and other costs not included in the coverage. c)

Probability of purchase over a given time period. Each of these indicators needs to be modeled on the basis of historical trends and predictive indicators.

13. Utilizing CLV in marketing

The CLV expresses true financial value of customers, enables customer segmentation and segmentation according to their financial potential and the subsequent prioritization of customers and resources. The data will help in deciding: To which existing and potential customers do we invest more and into which less? How to redirect resources? What steps to take to maintain a customer who wants leave our company and go to competition? How to increase customers' profitability?

14. Final class

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/235M/18	Course title: Public procurement in practise
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: A few tasks regarding practical aspects of public procurement, representing 40% of overall assessment, are going to be assigned during the semester (group work, individual case studies). Minimum of 25% of semester assessment is needed to be let to examination. Final oral exam representing 60% of overall assessment, minimum 30% met needed to pass, is completing the classes. Scale of assessment (preliminary/final): Group work/case studies during the semester – 40% (min 25% needed to allow for exam) Oral exam – 60% (min 30% needed to allow for exam) Continuous / final evaluation rate: 40/60	
Learning outcomes: Basic overview of processes in state procurement is gained after completing the course. As well as the capability to identify basic terms concerning the topic. The students should be able to describe the state procurement cycle, beginning by its publishing and ending by signing the agreement, by both factotum and applicant. They also should achieve manager's view to public procurement preparation, as well as presenting of the options and identifying applicant's possibilities in public procurement.	
Class syllabus: Basic terms in public procurement. Basic overview of individual orders (excess, under, order with low value...) Basic overview of individual processes in public procurement. Revisional processes How to announce public procurement (managing of the public procurement process) How to present the offer in public procurement Administrational obligations of economical subject in public procurement.	
Recommended literature: Act no. 343/2015 Z.z. about public procurement and change and completion of other acts. COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/331M/16	Course title: Research Methods in Information Technologies
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I., II.	
Prerequisites:	
Course requirements: Attendance, literature research, field research, and writing a semestral paper. Scale of assessment (preliminary/final): 100	
Learning outcomes: Learning Outcomes Upon successful completion of this subject, students should: <ul style="list-style-type: none"> • be able to identify and justify an appropriate research methodology for a research problem; • be able to determine and evaluate philosophical assumptions, underpinning research approaches and strategies; • be able to design a quantitative and/or qualitative research study for the chosen research problem; • be able to evaluate research design approaches to data collection. • review and critique research literature, research design and reported findings in a sub-discipline of IT; • communicate research findings, orally and in writing, in research and industry settings; • explain the ethical and professional issues that may arise in IT research and demonstrate them in practice; • identify, explain and critique major research philosophies and paradigms; • evaluate, select and justify research methods and techniques of data collection and analysis appropriate to particular research designs, projects and disciplines; • analyse and describe the technical, professional and socio-economic contexts that motivate research, and the implications of research outcomes; • design and carry out a rigorous and ethical research project and produce a report explaining the project, its design and interpretation of the results. • apply research skills to operate effectively as a member of a research project team. 	
Class syllabus: Learning Outcomes Upon successful completion of this subject, students should: <ul style="list-style-type: none"> • be able to identify and justify an appropriate research methodology for a research problem; • be able to determine and evaluate philosophical assumptions, underpinning research approaches and strategies; 	

- be able to design a quantitative and/or qualitative research study for the chosen research problem;
- be able to evaluate research design approaches to data collection.
- review and critique research literature, research design and reported findings in a sub-discipline of IT;
- communicate research findings, orally and in writing, in research and industry settings;
- explain the ethical and professional issues that may arise in IT research and demonstrate them in practice;
- identify, explain and critique major research philosophies and paradigms;
- evaluate, select and justify research methods and techniques of data collection and analysis appropriate to particular research designs, projects and disciplines;
- analyse and describe the technical, professional and socio-economic contexts that motivate research, and the implications of research outcomes;
- design and carry out a rigorous and ethical research project and produce a report explaining the project, its design and interpretation of the results.
- apply research skills to operate effectively as a member of a research project team.

Notes:

This subject familiarizes participants with a range of approaches used in information technology research, with an emphasis on approaches commonly used in practical settings. The advantages and limitations of different research approaches are examined, as well as their applicability in different information technology contexts. Experience is provided in the design of research studies, in the analysis and interpretation of data, and in report presentation. Participants acquire skills that are useful in the conduct of research agendas and in the critical evaluation of others' research work.

This subject also will enable students to choose and justify a research methodology from a broad range of quantitative and qualitative research methods relevant across the Information Technology (IT) discipline. Students will prepare a research plan incorporating a critique of existing knowledge, appropriate research methodology, suitable data collection techniques and an

outline of the ethical issues impacting their research topic. Students are provided the opportunity to write a substantial proportion of their methodology/data collection chapter and publish their preliminary work by identifying a publication outlet, such as a journal or conference, and providing the publication template.

Besides, this subject exposes students to research across the range of IT disciplines, preparing them to conduct research in their home discipline. It provides broad coverage of the issues, concepts, methods and techniques associated with Computer Science, Software Engineering, Information Systems and Information Management. It introduces students to major research philosophies and paradigms, the principles of research design, research ethics, and research methods and techniques of data collection and analysis appropriate to IT research generally and to their sub-discipline specifically. It covers oral and written communication skills.

Skills developed and knowledge acquired from this subject will prepare students to conduct and communicate their own research, as well as to be knowledgeable and critical interpreters of others' research.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/302AM/17	Course title: Skills for Success – From University to Workplace
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: I., II.	
Prerequisites:	
Course requirements: in-class presence and active participation (student can miss max 1x180 min) – 40 % Continuous evaluation: partial assignments handed-in for each of the 6 topics – 30 % Final evaluation: group presentation on selected topic from the course syllabus taking place in the last class and feedback giving to the teammates – 30 % Scale of assessment (preliminary/final): 70% / 30%	
Learning outcomes: The aim of the soft skills course needed for proper navigation on the job market of shared service centers is to acknowledge students with the portfolio of highly effective communication tools. Companies associated within the Business Service Center Forum and the under the auspices of the American Chamber of Commerce in Slovakia currently employ more than 29 000 full-time employees. They have identified soft communication skills as the most crucial, but also one of the least developed, skills fresh graduates possess when entering the job market. Upon successful completion of the course in English language, the students would be capable of more effective team work in international environment, managing their work time properly and efficiently and of communicating with higher portion of assertiveness. They will also increase their capabilities in providing and receiving constructive feedback, conflict resolution at a workplace and captivating their audience while presenting or applying design principles into daily communication routine.	
Class syllabus: Module 1 – Team Work – predominantly covered by the company Lenovo. The aim of this module is to raise awareness about the importance of team work at every work place. It would help the participants to understand behavioral forms supportive of team work, confidence and engagement building as well as team work for better and quicker results. Students will have an opportunity to role play those behavioral patterns hindering the quality of work and relations at a workplace. Furthermore, they would learn what kind of roles can they play in a team, how to use their strengths and how to eradicate their weaknesses in team work. The instructor would use the following education methods: role play, analysis, discussion and feedback. The module would last 180 minutes and would be delivered in English language. Module 2 – Time Management - predominantly covered by the company Siemens. This module aims to address the following topics:	

- Why do we want to manage our time better? What exactly do we want to change/get better at?
- How do we improve (and through what) quality of our life & are there any new activities?
- My mission, areas of responsibility, priority goals, activities. What do my coworkers expect from me?
- What are the priorities I decide by during managing my time? How do I spend my time and what is really important (to me)?
- Planning, tools and methods (my roles and activities). What are the rules I need to comply with during planning my activities? What do I need to avoid?
- How to set my goals & rules I need to comply with, eliminating mistakes, rescheduling activities?
- How to fight time eaters (subjective and objective ones), how to identify them? Tools to eliminate them (or minimize them).

Central to the module is the sub-topic of priorities management, where the lecturer would focus on taking control and balancing multiple tasks even when they are all priorities with the aim of minimizing the impact of most common time wasters. Handling all of the unexpected demands and unplanned situations that destroy the most careful scheduling is also part the education outcome. The module would last 180 minutes and would be delivered in English language.

Module 3 - Verbal and non-verbal communication – predominantly covered by the company PriceWaterhouseCoopers. This module would be divided into 2 blocks:

Block A (productive conversations) - People think that simple talking makes a good conversation. This block will deal with the issue why misunderstandings happen? Talking is simply not enough, for productive conversations much more is required than just ability to speak. The instructor would acknowledge the students with answers for the following questions: „How to make the other person sure we listen well? What and why to do it?“; „In which situations and how to raise a proper questions in order to get answers on what we’re asking?“ or „how to be authentic and convey a message of a competent and reliable employee?“. Techniques and scenarios of productive conversations are also part of education in Block A, and students will also get an opportunity to master the balance between Advocacy and Inquiry.

Block B (assertive communication) – Students would be presented assertive communication as highly effective tool used to express our feelings and point of view without being aggressive or stepping on other people’s toes. The lecturer would cover the following topics within Block B.

- How assertive you are? Knowing self is the best start (role play).
- Assertive rules and Transactional analysis based on Eric Berne.
- Aggressive - assertive - passive behaviors. And also passive aggressive. How to recognize them and how to respond?
- Effective strategies for dealing with others while taking into account the intended level of assertiveness and cooperation. When is it suitable to take a “defeat” strategy? Is “Compromise” the “Golden mean”?
- Good Assertive techniques.

The module would last 180 minutes and would be delivered in English language.

Module 4 – Conflict Resolution & Mindset - predominantly covered by the company IBM. The aim of this module is to introduce conflicts as moments that cannot be prevented, the most important thing is to learn how to handle or manage them. The students would learn strategies and techniques for addressing conflicts. Knowing when and how to use them can make participants more effective at handling challenging situations. By the end of this module, participants will be able to:

- Discuss what conflict is, how conflict can be both destructive and constructive, and how learning to overcome the barriers of addressing conflict can benefit their career.
- Recognize the five most common conflict resolution styles and improve their conflict

management skills by learning when to use or avoid using each style.

- Discuss how conflict resolution can improve their relationships, enhance their collaboration skills and increase their professional effectiveness.
- Discuss how mindset influences perception of conflict situations and helps them to manage the conflict in a constructive way.

The module would last 180 minutes and would be delivered in English language.

Module 5 – Presentation Skills – predominantly covered by the company DELL. To have the idea is simply not enough in the corporate environment. The aim of this module is to provide the students with knowledge that it is equally important to accompany the ideas with a story, structure and image so that their presentations are motivating, memorable and compelling. Participants will undergo the theory as well as three steps of creating the presentation – content creation, basic techniques and principles of design and performance of their presentation. Practical exercises with the assistance of the lecturer where participants are able to try different techniques and principles are involved during these three cycles. Following this module, participants will be able to create engaging presentations or apply design principles to everyday communication. The module would last 180 minutes and would be delivered in English language.

Module 6 – Feedback – covered by companies Siemens, IBM, PriceWaterhouseCoopers. We hear about feedback all the time, whereas everybody is aware of how important it is to give feedback and everybody is interested to know how his/her performance and achievements are appreciated. However the lecturer would outline the students there is a difference between ‘feedback’ and ‘effective feedback’ and this module is aimed at explaining how to give/receive effective feedback which leads to improved performance and behaviors. The students will acknowledge themselves within this module also with the following topics:

- What is feedback? What types do we have?
- The difference between criticism and feedback, their definition.
- When do we give feedback?
- What do we achieve (or want to achieve) by giving our feedback to someone?
- Rules for effective and supportive feedback – verbal and nonverbal expressions, exercises.

Portion of the feedback module would be dedicated to final group presentation, being a comprehensive part of the overall student evaluation. The presentation will be delivered in video format as well as live performance on stage in front of the audience, while the team members will be requested to provide horizontal feedback to their teammates. The module would last 180 minutes and would be delivered in English language.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/303AM/17	Course title: Skills for Success – From University to Workplace
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2., 4.	
Educational level: I., II.	
Prerequisites:	
Course requirements: in-class presence and active participation (student can miss max 1x180 min) – 40 % Continuous evaluation: partial assignments handed-in for each of the 6 topics – 30 % Final evaluation: group presentation on selected topic from the course syllabus taking place in the last class and feedback giving to the teammates – 30 %	
Learning outcomes: The aim of the soft skills course needed for proper navigation on the job market of shared service centers is to acknowledge students with the portfolio of highly effective communication tools. Companies associated within the Business Service Center Forum and the under the auspices of the American Chamber of Commerce in Slovakia currently employ more than 29 000 full-time employees. They have identified soft communication skills as the most crucial, but also one of the least developed, skills fresh graduates possess when entering the job market. Upon successful completion of the course in English language, the students would be capable of more effective team work in international environment, managing their work time properly and efficiently and of communicating with higher portion of assertiveness. They will also increase their capabilities in providing and receiving constructive feedback, conflict resolution at a workplace and captivating their audience while presenting or applying design principles into daily communication routine.	
Class syllabus: Module 1 – Team Work – predominantly covered by the company Lenovo. The aim of this module is to raise awareness about the importance of team work at every work place. It would help the participants to understand behavioral forms supportive of team work, confidence and engagement building as well as team work for better and quicker results. Students will have an opportunity to role play those behavioral patterns hindering the quality of work and relations at a workplace. Furthermore, they would learn what kind of roles can they play in a team, how to use their strengths and how to eradicate their weaknesses in team work. The instructor would use the following education methods: role play, analysis, discussion and feedback. The module would last 180 minutes and would be delivered in English language. Module 2 – Time Management - predominantly covered by the company Siemens. This module aims to address the following topics: <ul style="list-style-type: none"> • Why do we want to manage our time better? What exactly do we want to change/get 	

better at?

- How do we improve (and through what) quality of our life & are there any new activities?
- My mission, areas of responsibility, priority goals, activities. What do my coworkers expect from me?
- What are the priorities I decide by during managing my time? How do I spend my time and what is really important (to me)?
- Planning, tools and methods (my roles and activities). What are the rules I need to comply with during planning my activities? What do I need to avoid?
- How to set my goals & rules I need to comply with, eliminating mistakes, rescheduling activities?
- How to fight time eaters (subjective and objective ones), how to identify them? Tools to eliminate them (or minimize them).

Central to the module is the sub-topic of priorities management, where the lecturer would focus on taking control and balancing multiple tasks even when they are all priorities with the aim of minimizing the impact of most common time wasters. Handling all of the unexpected demands and unplanned situations that destroy the most careful scheduling is also part the education outcome. The module would last 180 minutes and would be delivered in English language.

Module 3 - Verbal and non-verbal communication – predominantly covered by the company PriceWaterhouseCoopers. This module would be divided into 2 blocks:

Block A (productive conversations) - People think that simple talking makes a good conversation. This block will deal with the issue why misunderstandings happen? Talking is simply not enough, for productive conversations much more is required than just ability to speak. The instructor would acknowledge the students with answers for the following questions: „How to make the other person sure we listen well? What and why to do it?“; „In which situations and how to raise a proper questions in order to get answers on what we’re asking?“ or „how to be authentic and convey a message of a competent and reliable employee?“. Techniques and scenarios of productive conversations are also part of education in Block A, and students will also get an opportunity to master the balance between Advocacy and Inquiry.

Block B (assertive communication) – Students would be presented assertive communication as highly effective tool used to express our feelings and point of view without being aggressive or stepping on other people’s toes. The lecturer would cover the following topics within Block B.

- How assertive you are? Knowing self is the best start (role play).
- Assertive rules and Transactional analysis based on Eric Berne.
- Aggressive - assertive - passive behaviors. And also passive aggressive. How to recognize them and how to respond?
- Effective strategies for dealing with others while taking into account the intended level of assertiveness and cooperation. When is it suitable to take a “defeat” strategy? Is “Compromise” the “Golden mean”?
- Good Assertive techniques.

The module would last 180 minutes and would be delivered in English language.

Module 4 – Conflict Resolution & Mindset - predominantly covered by the company IBM. The aim of this module is to introduce conflicts as moments that cannot be prevented, the most important thing is to learn how to handle or manage them. The students would learn strategies and techniques for addressing conflicts. Knowing when and how to use them can make participants more effective at handling challenging situations. By the end of this module, participants will be able to:

- Discuss what conflict is, how conflict can be both destructive and constructive, and how learning to overcome the barriers of addressing conflict can benefit their career.
- Recognize the five most common conflict resolution styles and improve their conflict management skills by learning when to use or avoid using each style.

- Discuss how conflict resolution can improve their relationships, enhance their collaboration skills and increase their professional effectiveness.
- Discuss how mindset influences perception of conflict situations and helps them to manage the conflict in a constructive way.

The module would last 180 minutes and would be delivered in English language.

Module 5 – Presentation Skills – predominantly covered by the company DELL. To have the idea is simply not enough in the corporate environment. The aim of this module is to provide the students with knowledge that it is equally important to accompany the ideas with a story, structure and image so that their presentations are motivating, memorable and compelling. Participants will undergo the theory as well as three steps of creating the presentation – content creation, basic techniques and principles of design and performance of their presentation. Practical exercises with the assistance of the lecturer where participants are able to try different techniques and principles are involved during these three cycles. Following this module, participants will be able to create engaging presentations or apply design principles to everyday communication. The module would last 180 minutes and would be delivered in English language.

Module 6 – Feedback – covered by companies Siemens, IBM, PriceWaterhouseCoopers. We hear about feedback all the time, whereas everybody is aware of how important it is to give feedback and everybody is interested to know how his/her performance and achievements are appreciated. However the lecturer would outline the students there is a difference between ‘feedback’ and ‘effective feedback’ and this module is aimed at explaining how to give/receive effective feedback which leads to improved performance and behaviors. The students will acknowledge themselves within this module also with the following topics:

- What is feedback? What types do we have?
- The difference between criticism and feedback, their definition.
- When do we give feedback?
- What do we achieve (or want to achieve) by giving our feedback to someone?
- Rules for effective and supportive feedback – verbal and nonverbal expressions, exercises.

Portion of the feedback module would be dedicated to final group presentation, being a comprehensive part of the overall student evaluation. The presentation will be delivered in video format as well as live performance on stage in front of the audience, while the team members will be requested to provide horizontal feedback to their teammates. The module would last 180 minutes and would be delivered in English language.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/161M/17	Course title: Strategic Partnerships
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Marketing.	
Course requirements: The seminar work has the topic Forms and types of alliance and partnership relations in the given sector. The aim of the thesis is to identify the profiling types of partnerships in the sector, to present them from the most leeful to the harshest, and to deal with the most widespread types of partnerships in the industry on a global scale. It is necessary to analyze how these relationships have affected the situation in the sector, identify which types of relationships in the sector dominate and why. The analysis must be based on information on trends in the sector, the most important enterprises in the sector. Finally, it is necessary to synthesize the knowledge and try to outline our own conclusions, to make a prognosis of the development trends in the sector from the point of view of the strategic relations therein. Seminar work must include resources used. Scale of assessment (preliminary/final): interim evaluation 100 %	
Learning outcomes: To teach students what types and forms of partnerships work between businesses - from the most lenient to the most serene, giving them insight into the different types of partnerships, the preconditions for their creation and effective functioning as well as the extinction of the partnership and its causes. Within the subject, we will present the genesis of the relationships, the advantages and the risks of the individual forms, their current form and the most widespread types, including those and the latest ones. We point out that strategic partnerships have become a phenomenon of the global economy and a necessity, not just a possibility.	
Class syllabus: 1. Strategické partnerstvá, strategické aliancie – história a súčasnosť, pojmy a ich používanie v manažmente. 2. Partnerstvá ako fenomén globálnej ekonomiky – strategické a nestrategické partnerstvá, typy a formy. 3. Kto môže a kto nemôže byť strategickým partnerom, Príprava na strategické partnerstvo, predpoklady, výhody a nevýhody jednotlivých foriem. Majetkové a nemajetkové prepojenia firiem.	

4. Sieťové aliancie dôvody zostieňovania podnikov. Typy sietí: siete pod vedením koordinátora, siete v odvetví, klastre
5. Joint ventures – pojem, strategické ciele, typy JV, zmluva o joint venture, predpoklady fungovania, implementácia a zánik spoločných podnikateľských činností.
6. Mergers&Acquisitions - úvod do problematiky, pojmy, genéza tesných foriem partnerstiev, právne normy a regulácie. Majetkové prepojenie podnikov. Konkrétne kroky na prípravu a fungovanie partnerstva.
7. Fúzie – management fúzie, jednotlivé fázy a ich priority, stratégia, vyhodnotenie úspešnosť vzájomného splynutia.
8. Konsolidácie – typy, formy, ako a kedy sa konsolidácie uskutočňujú.
9. Akvizície. Akvizičná politika veľkých globálnych firiem, Typy akvizícií.
Dobrovoľné a nedobrovoľné akvizície. Fázy akvizičného procesu, problémy a ich riešenie.
10. Obranné taktiky voči akvizícii. Konkrétne taktiky, najvyužívanejšie taktiky a možnosť ich kombinácie.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KSP/026M/00	Course title: Strategy of Non-profit Organizations
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Bachelor diploma in management or economist	
Course requirements: During the semester, on exercises, present the selected topic and upload it as a case study. The project is individual, it is a comparison of two non-governmental organizations that have a similar focus but other ways of enforcing certain ideas or principles. NGOs should be more, at least nationally, or internationally integrated into international structures, in particular to assess the strategy and success of such an organization from a variety of perspectives. This can be a classic NGO with a different focus but also a corporate NGO. The goal is to compare the marketing strategies of selected NGOs and evaluate the success or failure of selected NGOs and make a comparison - your own opinion. Scale of assessment (preliminary/final): Continuous evaluation 100%	
Learning outcomes: To provide students an overview of the strategic options and approaches that can be applied in a non-profit sector. The purpose is to introduce specific types of strategic approaches and strategies are formed for the non-profit organizations and are used within them and provide for the new organization-specific options and opportunities. The subject is also specific management approaches and management of non-profit organizations.	
Class syllabus: 1. Non-profit organization - non-governmental NGO sector. Characteristics, definition, international status, functioning .. Specification for the non-profit and public-law sector. 2. Types of non-governmental organizations in the Slovak Republic. Foundations, Non-Investment Funds, Civil Associations, Non-Profit Organization. The place of NGOs in EU legislation. Characteristics, differences and common features. Significance and impact, impact on the EU economy 3. No profit-making organization. Theoretical views and practical experience, specifics. Establishment, functioning and disappearance of a non-profit organization. Performance criteria, growth sources. Possible categorization. Different and common characters.	

4. Nonprofit sector and profit sector .Planning a nonprofit organization. The role of the nonprofit sector at present, the goals and their emergence. Individual and social needs. Non-Governmental Organization Management - Common features and differences. strategies
5. Strategic possibilities and opportunities. Types of usable strategic analyzes, their purpose and purpose, the possibilities of their use and the types of evaluation in the specific conditions of a non-profit organization. Objectives of the analyzes and their evaluation.
6. Competitive advantage in NGOs. The competitive advantage of a nonprofit organization, why and how to build it, how to implement it. Using KV, sharing KV. Partnerships of non-governmental organizations. Comparative competitive advantages.
7. NGO funding NGO funding models Ways and methods of raising funds for specific purposes, managing them. Atypical methods of financing projects, collections and services in the non-governmental sector.
8. NGO Marketing Strategy - Reasons, Methods of Specification, Marketing Communication Methods, and Presentations of Their Activities. Successful and unsuccessful marketing strategies. Rating criteria, time factor. Resources on marketing strategies
9. Managing NGOs. Specification of the management work. Human Resources Management - Employees and Volunteers. Management, Managing Authorities, Board of Directors, and Advisory Bodies. Management structures, their functionality, performance and efficiency. Functional and non-functioning non-profit organization.
10. Roles of strategic partnerships in non-profit organizations. Types and forms of partnership, standard and non-standard forms. Partner as the guarantor of the mission of the organization. Options and perspectives for the development of partnerships, advantages and disadvantages.
11. Strategic marketing objectives of the non-profit sector. Top trends. Long-term perspectives and goals - conditionality and dependence. Possibilities of influencing society. Sources of internal growth, allocation of resources.
12. Selection theme - based on the requirements and needs of the students.
13. Evaluation of the subject and evaluation of the projects

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/310AM/18	Course title: Supervisory Review and Evaluation Process
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: I., II.	
Prerequisites:	
Course requirements: Students are evaluating based on an ongoing assessment and their inputs in the workshops and seminars. Active attendance is required. The seminar and workshop is finalised by the short research paper and presentation. Students work individually and in the teams.	
Learning outcomes: Practical examples are demonstrated to students to enhance their knowledge and linkage between strategic management and regulatory landscape in banking.	
Class syllabus: Introduction into the Supervisory Review and Evaluation Process (SREP) The scope of the SREP covers all Directive 2013/36/EU (CRD IV) and Regulation (EU) No. 575/2013 (CRR) requirements, and encompasses three main elements: A Risk Assessment System (RAS) is used for evaluating an institution's risk levels and controls; RAS is comprised of the following elements: • Business model assessment; • Governance and risk management assessment; • Risks to capital; and • Risks to liquidity and funding A comprehensive review of the institution's Internal Capital Adequacy Assessment Process (ICAAP) An Internal Liquidity Adequacy Assessment Process (ILAAP); A decision on relevant supervisory measures, if any. The risks to which credit institutions are exposed are assessed by risk levels and risk controls, allowing for constrained supervisory judgement. The outcome of the risk assessment can result in supervisory actions and measures – the implication for banks is explained in details.	
Recommended literature: BIS, EBA/ECB publications Research papers All will be sent to students in the electronical form. Publications are available on internet.

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/161AM/18	Course title: Sustainable Energy Economics
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I., II.	
Prerequisites:	
Course requirements: Scale of assessment (preliminary/final): 85% / 15% (final presentation)	
Learning outcomes: Smart cities face new business cases as they react to the changes in lifestyle We live differently, commute differently, use space differently and plan our lives differently than 10 years ago. Shared economy use cases are increasingly mainstream and the corresponding business cases as well. People have need to be more engaged and informed, barriers to market are low, information are omnipresent. This course attempts to reveal how do cities and citizens manage to harness the technological innovations and scrape the value they enable. If you are interested in new business cases around smart cities and smart energy, embark with us on a series of 10 lectures with experienced consultants who have run technology start-ups and worked in the energy industry. In the introductory lectures of the course you will learn about the smart city landscape in Europe and in the US. The emerging new technologies, such as IoT, AI, and smart energy solutions will be examined from the perspective of cities and citizens needs, demand and deployment. You will discuss new business models and case studies in renewable energy project finance, electric and autonomous mobility, civic engagement and much more. Blocks of topics will be summarised with an engaging in-class group projects, which you will prepare and present under the guidance of the lecturer, or a guest speaker, who worked on and pitched similar projects in real life. We want students to understand how the business world around smart cities and new energy solutions evolves, how are new technologies perceived and implemented.	
Class syllabus: Topics: Introduction to smart cities, urbanization and shared economy Energy value chain and smart grids in modern cities and homes Selected IoT use cases and business models in transport and energy management Machine learning potential in the built world Summary of the block, team research based on MIT best practice in entrepreneurship - research the market for your innovative solution	

Clean electricity based on gas, business models and project financing: urban combined heat and power
 Energy storage, its methods and economic importance. Battery storage, development of battery prices and growing range of applications.
 Electric mobility and a new lifestyle in the mobility of urban population, new economic models and trends in personal mobility and connectivity to electromobility.
 Summary of the block, group pitch - sell your smart city solution to a municipality
 Electricity markets and the importance of flexibility: wholesale, Day ahead market, Intra-day market, Demand Response, markets, Support services, quasi-markets and distribution companies flexibility aggregation.
 Price formation on various energy markets. Trading / investing on the markets with electricity, oil and gas. Commonalities and differences between these commodities. Spot prices and futures contracts for energy commodities.
 The role and importance of information technology and social media in smart cities. Artificial intelligence, optimization, virtual reality, infrastructure planning and investment modeling.
 Summary of the block, group proposal and pitch - tender on an RfP specification.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/161M/17	Course title: Sustainable Energy Economics
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I., II.	
Prerequisites:	
Course requirements:	
Learning outcomes: The course comprises three thematic blocks of the economic aspects of sustainable energy and resource management. In its introduction the course will teach different energy production means, their geo-political impacts and new market trends. In the second block students explore innovative technological approaches and clean energy concepts. The concluding block discusses new business models that disrupt the energy industry and its long established players. Each block of topics is summarised by a fun and engaging project to prepare and present in class under the guidance of lecturer, who carried out such projects and participated in such situations in real life. This economy course aims to educate future consultants, dedicated utility managers, environmental experts, serial entrepreneurs, or students who just want to broaden their horizons for their future jobs.	
Class syllabus: Block 1 - Getting started: Energy value chain: power generation, power transmission, energy distribution, wholesale, retail Energy mix in Europe and in the world: sources of energy, energy supply, trends in construction of new power-plants, cross-border trade implications and relationships Nuclear energy and its importance in the energy mix: the principle of nuclear power, economic model of the base electricity, the impact on energy prices Gas Energy and its geopolitical implications: gas extraction method of fracking, gas transmission forms, the use of gas in Europe and the world, industries dependent on gas, the growing trend of electricity production from gas and significance of peak electricity. Summary of the block, team roleplay - private banking pitch of an energy project Block 2 - Getting clean: Clean electricity based on gas, business models and project financing: urban combined heat and power (steam engines, back pressure, gas turbines), household fuel cells and their possibility of finance	

Renewable decentralized energy sources and their business models: solar energy, wind energy, small hydro power, biogas, other.

Energy storage, its methods and economic importance. Battery storage, development of battery prices and growing range of applications.

Electric mobility and a new lifestyle in the mobility of urban population, new economic models and trends in personal mobility and connectivity to electromobility. New trends in freight and transport - evolving business models in logistics and its impact on energy. Business models of the future, such as the "Physical Internet."

Summary of the block, group pitch - sell your clean energy solution to a municipal utility

Block 3 - Getting smart:

Electricity markets and the importance of flexibility: wholesale, Day ahead market, Intra-day market, Demand Response, markets, Support services, quasi-markets and distribution companies flexibility aggregation.

Price formation on various energy markets. Trading / investing on the markets with electricity, oil and gas. Commonalities and differences between these commodities. Spot prices and futures contracts for energy commodities.

The role and importance of information technology and social media in innovating energy companies. Artificial intelligence, optimization, virtual reality, mobile, intelligent asset management, utilization of sensor technology, infrastructure planning and investment modeling.

Smart Grid: investment in smart meters and their return, investment in technology sensors and real time data transmission.

Energy companies 2.0 and the reason for their occurrence: the death spiral of the original energy model trends of decentralization and independence

Disruptive business models within the new energy landscape.

Case studies: Solar city, Opower, Vandebron, Edison Electric, Energypool.

Summary of the block, group proposal and pitch - tender on RfP specification
