COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/067_M/14	Course title: Brand Management
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Marketing	
Course requirements: During the semester, it is necessary to process the selected topic, present it and submit the presentation in electronic form. There are 2 variants. 1. one company that has several brands in its portfolio. It is necessary to map the hierarchical structure of brands in the company, identify the characteristics and goals of all (or selected) brands, examine their elements, image and positioning, evaluate their success (or failure) and name the reasons for success or failure of branding policy. Part of the work is the analysis of used or potential synergistic effects but also the real or potential threat of cannibalization of brands. In the end, it is necessary to evaluate how successfully or unsuccessfully the brand management works in the selected company. 2. Comparison of two competing companies, where it is necessary to identify characteristics and goals in relation to building brands, name the methods and tools used, deal with the image and personality characteristics of selected brands as well as their historical context. In the end, it is necessary to make a comparison of selected brands - brand elements, image, positioning and analyze the success of the method and means of building them and evaluate their perspectives. The semester project is individual and within it it is required to compare the success of positioning and management of the analyzed brands. During the semester, students have the opportunity to get 50% of the evaluation, in the examination period 50 points. Scale of assessment (preliminary/final): 50% during the semester, 50% during the probationary period	
Learning outcomes: Student will gain a set of knowledge in the field of brand building management, learn when it is necessary to build a brand and when not. They will get acquainted with how to build, position and manage a brand, they will know how it is possible to acquire a brand and use one that is owned by another entity. They will learn the typology of brands, they will be able to assess what models the company uses in the process of building a brand and grasp their advantages and disadvantages. The purpose is to acquaint students with the basic approaches, opportunities, strategic and marketing alternatives in the process of building or acquiring a brand or brands at the company level. They will be able to grasp the role and importance of the brand for the company, they will get acquainted with	

the possibilities of expanding the brand portfolio at the company level, or vice versa, slimming the company by selling brands from the portfolio. Part of the course is an outline of the issue of brand protection, issues of brand valuation methodologies, creating synergies between brands. brands and comparison of existing brand rankings.

Class syllabus:

1. Brand What is a brand, the genesis of brands, the current importance of the brand in the company. Creating a brand. Brand building. When to build a brand and when not. What brand to build.
2. Company and brand. The importance of the brand for the company. Brand building and brand management. Brand positioning. Brand loyalty.
3. Brand in the theory and practice of management. Definitions and terms. Typology of brands. Different approaches to building a brand. Conditions for building and functioning of the brand.
4. Brand values. Brand and its value. Brand as value and moral commitment.
5. Branding - advantages and disadvantages. Brand acquisition - advantages and disadvantages. Franchising, licensing, acquisition, network entry.
6. The effect of the brand. Local - national - continental - global brands. The process of creating a global brand. Successful and unsuccessful brand.
7. Monolithic strategy - one brand for all products. Corporate brand. The pros and cons. Synergies between products.
8. Strategy - many brands in the portfolio. The pros and cons. Synergistic effects between brands and possibilities of their use. Cannibalization of brands.
9. Private labels - brands of sellers. Reasons for origin. The pros and cons. Types of private labels.
10. Personality and brand image. Building brand personality characteristics and brand image - changing personality characteristics, rebranding and changing brand positioning.
11. Brand protection. Forms and types of protection, national and international trademark. What is possible and necessary to protect. Protection price.
12. Brand equity. The concept of brand equity, brand equity components. Brand as the most valuable intangible asset of the company. Brand as an investment. Growth of brand value and company value.
13. The most valuable and stable brands, the reasons for which they are and what process preceded their current position. Brand valuation, 4 basic methods. Maintaining brand value.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/315M/16	Course title: Business Analytics and Decision Making
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Information Systems and Application Software, Statistics, Mathematics, Financial Management	
Course requirements: COURSE ACTIVITIES Homework Most weeks you will have an assignment that is designed to assess your mastery of the topics and techniques covered the previous week and provide feedback to improve your understanding of the material. Homework assignments will be assessed. You may work with your colleagues to figure out the underlying concepts and problem-solving processes, but are expected to work individually to answer the specific problems that are assigned. Completed assignments can be submitted via e-mail. Timely submission of the completed assignments is essential. The due date of each assignment will be stated clearly in the assignment description. Group Project In groups of 2-3 you should prepare either a data-related project or a research paper. Additional detail about the group project will be provided via e-mail or at SharePoint of the FMCU. These projects should provide an opportunity for you to test your understanding of the techniques, processes, and problems associated with mobilizing raw data for use in individual and organization decision making. Scale of assessment (preliminary/final): Grading 40% Homework 40 pts 60% Group Project: Proposal 10 pts. Midterm report 10 pts. Final Poster/Presentation/Paper 30 pts. Answers to questions in discussion 10 pts.	
Learning outcomes: After completing this course you will be able to: <ul style="list-style-type: none"> - Select and evaluate various types of data to for use in decision making; - Use prescriptive and descriptive analyses to reach defensible, data-driven conclusions; - Select and apply appropriate statistical methods to address decision problems; - Use MS Excel or Wolfram Mathematica for data manipulation and analysis - Critically evaluate data analyses and develop strategies for making better 	

decisions.

Class syllabus:

Introduction

Some Basic Concepts: Measurement, Design, Validity

Data Visualization

Data Manipulation

Probability and Significance (Sample, Population, CLT, Sampling Error)

Hypothesis Testing (Power, Effect Size)

Chi-squared, t-tests

Analysis of Variance

(ANOVA, Contrasts, Trends, Interactions)

Correlations

Multiple Regression

(Sets of IVs, Nominal Scales, Interactions)

Recommended literature:

Readings and Online Resources:

There are many good texts and online sources for information on decision-making, statistical techniques and data tools. Because each student's needs and interests will differ, none of these are explicitly required, but here are some you may find helpful.

Judgment and Decision Making:

- The Psychology of Judgment and Decision Making (Scott Plous) McGraw-Hill - ISBN: 0070504776

- Thinking, Fast and Slow (Daniel Kahneman) Farrar, Straus and Giroux - ISBN: 0374275637 (Hardcover); 0374533555 (Paperback); 0385676514 (Kindle); 0739357980 (Audio).

Statistics and Statistical Reasoning

- HyperStat Online Statistics Textbook - <http://davidmlane.com/hyperstat/>

- Williams, F. & Monge, P. (2001), Reasoning with Statistics: How to Read Quantitative Research (5th Edition), Harcourt College Publishers: Fort Worth, TX, ISBN 0-15-50681-6

- Rice Virtual Lab in Statistics - <http://onlinestatbook.com/rvls.html>

- Online Statistics Education: An Interactive Multimedia Course of Study - <http://onlinestatbook.com/2/index.html>

- Statistics to Use - <http://www.physics.csbsju.edu/stats/>

- Statistica's StatSoft Electronic Statistics Textbook - The entire textbook can be downloaded for free. The parent website (<http://www.statsoftinc.com/>) has a link to StatSoft's public service textbook is available online.

- Web interface for statistical education at Claremont Graduate School (<http://wise.cgu.edu/tutor.asp>)

Excel Tutorials

- Parsons, J.J. Oja, D. Ageloff, R. & Carey, P. New Perspectives on Microsoft Excel 2010: Comprehensive

SPSS Tutorials

- SPSS On-Line Training Workshop - <http://calcnet.mth.cmich.edu/org/spss/toc.htm>

- Resources to help you learn and use SPSS - <http://www.ats.ucla.edu/stat/spss/>

- Shannon, D.M. & Davenport, M.A. (2001) Using SPSS to Solve Statistical Problems: A Self Instruction Guide. Upper Saddle River NJ: Prentice Hall

- SPSS Tools and Tips - <http://www.spsstools.net/>
 - IBM SPSS Guides - <http://www.norusis.com/index.php>
 Wolfram Mathematica Tutorials
<http://library.wolfram.com/infocenter/Books/8501/>
 VARIAN, H.: Computational Economics and Finance Modeling and Analysis with Mathematica. Springer, 1996. ISBN 978-03-879-4518-7
 WOLFRAM, S. 2015. An Elementary Introduction to the Wolfram Language. <http://www.wolfram.com/language/elementary-introduction/preface.html>
<http://www.wolfram.com/learningcenter/tutorialcollection/> - Wolfram Mathematica Tutorial Collection from Wolfram Research (a collection of free downloadable pdf files)

Languages necessary to complete the course:

English language

Notes:

While much has been written about the promise of “big data”, using data resources to improve the individual and group decision making remains a significant challenge. Information professionals play a significant role in crafting datasets, performing analyses, and developing information resources that bridge the gap between raw data and decision makers needs.

This course will introduce basic concepts in data analytics including measure construction, hypothesis testing, data exploration, pattern identification, and statistical analysis. The course also provides an overview of commonly used data manipulation and analytic tools. Through homework assignments, projects, and in-class activities, you will practice working with these techniques and tools to create information resources that can used in individual and organizational decision-making and problem-solving

Learning outcomes: # Familiarize students with the field of consumer behavior and with its relations to other marketing functions # Develop understanding of critical issues in managing consumer behavior # Combine theoretical framework with a real-world application	
Class syllabus: Week Topic Sept 21st – Sept 25th Week 1 Consumer behavior and consumer research # Why study consumer behavior? # Evolution of consumer behavior # How do you study consumers? # Underlying principles of consumer behavior (including B2B market) Sept 28th – Oct 2nd Week 2 Marketing strategies for customer-centric organizations # The century of the consumer # From market analysis to market strategy – where does CB fit? # Customer loyalty and retention strategies – CRM # Global marketing strategy Oct 5th – Oct 9th Week 3 The consumer decision process - intro # Introduction into CDP model # Variables that shape the decision process # Types of decision process # Factors influencing the extent of problem solving Case 11 – Creating brands that last Oct 12th – Oct 16th	

Week 4 The consumer decision process – part 1 (pre-purchase processes)

Need recognition

Search for information

Pre-purchase evaluation of alternatives

Oct 19th – Oct 23rd

Week 5 The consumer decision process – part 2 (purchase)

Purchase

Case 5 – Crimson cup

Oct 26th – Oct 30th

Week 6 The consumer decision process – part 3 (post-purchase processes)

Consumption

Post-consumption evaluation

Divestment

Nov 2nd – Nov 6th

Week 7 Guest speaker

Nov 9th – Nov 13th

Week 8 Individual determinants of consumer behavior – part 1

Demographics, psychographics and personality

Consumer Motivation

Case 4 – Family furniture

Nov 16th – Nov 20th

Week 9 Individual determinants of consumer behavior – part 2

Consumer knowledge

Consumer beliefs, feelings, attitudes and intentions

Nov 23rd – Nov 27th

Week 10 Environmental influences on consumer behavior

Culture, ethnicity and social class

Family and household influences

Group and personal influence

Case 6 - Aldi

Nov 30th – Dec 4th

Week 11 Influencing consumer behavior

Making contact

Shaping consumers opinions

Helping consumer to remember

Dec 7th – Dec 11th

Week 12 Measuring consumer behavior – market research

Managing customer insight

Market research in practice

Case 7 – National Christmas tree association

Dec 14th - Dec 18th

Week 13 Guest speaker

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/095M/10	Course title: Corporate Valuation (2)
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The prerequisite for this class is a passing grade in Introduction to Financial management and in Financial management. Another prerequisite for this class is in foundations of accounting and statistics. Therefore, it is expected that students will be comfortable with the following topics: Weighted Average Cost of Capital (WACC), Discounted cash flow model (DCF), Valuation Multiples, diversification, valuation of stocks - Dividend Discount Model (DDM), Capital Asset Pricing Model (CAPM), financial planning (AFN formula), financial ratios, Value Based Management, depreciation, standard deviation and correlation. Scale of assessment (preliminary/final): Grading: Problem and Cases Sets: 30%Project: 70%	
Learning outcomes: This is an advanced business valuation course. The course has three main objectives: 1. Develop an understanding of the tools used to prepare a complete DCF valuation model in MS Excel for a publicly tradable company. 2. Understand advanced issues related to how the evaluation process works in the real world. 3. Emphasis is placed on assessing the constraints and problems encountered by the analyst in applying the theoretical framework of company valuation	
Class syllabus: Class Syllabus: <ul style="list-style-type: none"> • Introduction to financial modelling in MS Excel • How to analyze industry trends? • Financial analysis of a company • FCF calculation, CAPEX&OPEX preparation • DCF model preparation (financial plan) • DCF model preparation (WACC, TV growth rates, FCF) • Preparation of valuation model with using Valuation Multiples approach (analyzing data for industry and for company) • Preparation of valuation model with using Valuation Multiples approach (calculation of values and interpreting results) • Dividend Discount Model preparation (DDM) • Case Study 	

- Case Study

2. Brigham, E. F., Ehrhardt, M. C.: Financial Management, 14th Edition, Thomson, South-Western, 2014.
3. Hitchner, J. R.: Financial Valuation, Applications and Models, John Wiley & Sons, Inc., 2013.
4. Bloomberg Professional Terminal
5. yahoo.finance.com

Languages necessary to complete the course:

English

Notes:

Notes:

We will use lecture notes and they will be distributed during the semester. The lecture notes are self-contained, thus, no textbook is required. For those of you who wish to use a textbook in addition to the class notes, I recommend that you use:

Brigham, E. F., Ehrhardt, M. C.: Financial Management, 14th Edition, Thomson, South-Western, 2014.

This textbook can be used as background reading for those of you who wish to read ahead of the lecture or dig deeper into the material. This textbook is available for purchase online at Amazon.com and it is also available at the FMUK Library.

There will be several cases studies in this course. The cases are intended to help you understand the course material and prepare you for your own project.

I will announce in class when you should start to prepare your own project and when the project solutions are due in class. The solutions for the project will be discussed in class. You can work alone or with other students on the project. However, you need to write up your own individual solution for your project and turn it in for credit. If you work with other students, note their names on your solution.

Please bring a PC to class. We will use MS Excel for calculation.

During the class we will use Bloomberg Professional Terminal as source of financial data.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/229M/16	Course title: Corporate valuation
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: In the course of the semester, the student will be awarded a project of evaluation of the selected company, which will serve for the overall evaluation. In order to obtain an A rating, it is necessary to obtain a minimum of 91 points, to obtain a score B of at least 81 points, a C rating of at least 76 points, a D score of at least 66 points and an E score of at least 60 points.	
Learning outcomes: Learning outcomes: The seminar should provide students with basic knowledge of business valuation as they are implemented in practice. An essential part of effective management is the correct determination of the company's value. The course will provide students with insights into the basic processes of determining the value of the company from the initial analysis of financial statements and ratios to the understanding of the complex method of discounted cash flows. The course will provide students with answers to questions such as what the value of a company is and what basic parameters it affects; what techniques analysts use on the financial markets to determine whether a stock company's stock is overestimated or underestimated; what is the difference in understanding the value of the firm as a self-sustaining entity and potential acquisition target; how to compile a simplified valuation model for a listed company? Practical examples will be used for seminars to understand the issue. Bloomberg Professional Terminal will be used for seminars to quickly and efficiently gather and analyze information from both the financial and business environment. Upon successful completion of the course the student should understand the basic aspect of the company's valuation and should be able to perform an advanced financial analysis of the company. After completing the subject, the student should be prepared to work in the financial field as a financial adviser or financial analyst at positions requiring basic to advanced knowledge of corporate financial analysis and valuation.	
Class syllabus: Basic business valuation characteristics. 2. The legal minimum for business combinations in Slovakia. 3. Company valuation methods based on price multiples. 4. Company valuation methods based on discounted cash flows.	

5. Estimate of future cash flows of the company. 6. Determination of the weighted average cost of capital. 7. Company valuation methods based on discounted dividends. 8. Valuation of non-operating assets of the company. 9. Case Study - Valuation of a publicly traded company on the stock exchange. 10. Case Study - Valuation of a publicly traded company on the stock exchange. 11. Case Study - Valuation of a publicly traded company on the stock exchange. 12. Case Study - Valuation of a publicly traded company on the stock exchange

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/268M/16	Course title: Data Science and Big Data Analytics
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: I., II.	
Prerequisites:	
Course requirements: Although Data Science represents complex area, students become familiar with essential of this science in a proper way. In order to complete this course successfully and gain the maximum benefits from it, students should have basic quantitative background and understanding of basic statistics, and practical working with notebook. It is an advantage if they have some experience with a scripting language and some knowledge of database. All prerequisites will be reviewed during the Session 0 and available as the reference during the course.	
Learning outcomes: Upon the successful completion of this course, students will be able to immediately participate on a big data or other analytics projects and they will be able to explain how advanced analytics can be leveraged to create competitive advantage. They will be able to frame a business challenge as an analytics challenge, apply appropriate analytic techniques and tools to analyse data and create models to identify important insights. They will be able to design data visualizations to communicate insights to stakeholders.	
Class syllabus: <ol style="list-style-type: none"> 1. Introduction to Data Science and Big Data Analytics 2. Basic Data Analytic Methods Using R I. 3. Basic Data Analytic Methods Using R II. 4. Data Science Project 5. Predictive Analytics - Linear Regression 6. Association Rules 7. Clustering 8. Classification 9. Text Analytics 10. Sentiment Analytics 11. Deep Learning I. 12. Deep Learning II.

Faculty: Faculty of Management	
Course ID: FM.KEF/086M/00	Course title: Economy Processes Modelling
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements:	
Learning outcomes:	
Class syllabus: Brief Syllabus: 1. Introduction into analysis of time series. Introduction into analysis of time series. Decomposition of time series, deterministic and residual parts. 2. Box – Jenkison methodology. Procedure, advantages and disadvantages. Identification of model in Box – Jenkinson methodology, correlation analysis and its relevance in BJ methodology, information criteria and their relevance in BJ methodology. Stationary models of time series. AR, MA and ARMA processes. Stationarity and invertibility of ARMA processes. 4. Estimation parameters methods 5. Predictions in time series. The best linear predictor. West and McCranks's three predictive schemes. Diebold – Mariano's test. Evaluation of best prediction. 6. Spectral analysis. Periodogram, Fisher test. 7. Introduction, market with stocks and options, basic knowledge. Merton analysis. Evolution of stock prices on financial market, their stochastic behaviour. Brief survey and repetition from the 2nd year: Option. European call option, European put option and its relation to the stock's price. Portfolio. Definition of diffuse process, Itô's process, drift, dispersing coefficient. Itô's lemma and its consequences for stock and option price differential. Black Scholes formula. 8. American financial derivatives. American call and put options, basic differences between American and European one and possibilities of searching its solution as a free boundary problem. 9. Numerical methods of approximate solution for financial derivatives.	

Explicit methods, trinomic, binomic tree. Approximate methods of calculating European and American options. Implicit methods for calculating European options. Implicit methods for calculating American options. Obstacle problem.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/047_M/12	Course title: Enterprise Communication Systems
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: By completing the subject, the student will acquire skills in the field of corporate communication systems by using the program equipment available to the faculty and gaining deeper theoretical knowledge from the field of communication systems used in current and corporate practice. Education is divided into an alternative form to 4 phases AKVA - Analytical (2-4 weeks), Conceptual (2-4 weeks), Verification (1-3 weeks), Argumentative (1-3 weeks).	
Class syllabus: Topic 1: Introduction to Information Technologies Used to Transfer Information in Private Communication Networks Topic 2: Introduction to Telecommunications Topic 3: ISDN Topic 4: DSL Topic 5: Optical networks Topic 6: ATM Principles Topic 7: Transfer devices Topic 8: Mobile Telecommunications Topic 9: Satellite communications Topic 10: X.25 Topic 11: Frame Relay Topic 12: Voice over the Internet

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/014M/15	Course title: Ethical hacking
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 4.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: Clarify the complexity and extent of the problem of securing systems for processing data and providing information with an emphasis on the role of the manager in the process of building and operating such systems. Upon successful completion of this course, students will master the basics of IT security and will be able to test IS / ICT security and business, apply IS / IT principles and information security in their management activities on IT and non-IT positions, and operate within the information management security in the company, at various stages of the life cycle of the information system in all managerial positions. Alternative activity in the four ACVA phases of the project solution – Analytical (2-4 weeks), Conceptual (2-4 weeks), Verifying (1-3 weeks) and Argumentative (1-3 weeks).	
Class syllabus: General safety bases and the definition of a "secure information system". Basic technical and program resources for IS protection. Network Security Specifications. Security and IS creation process. IS security and operation. The human factor and the security culture of the organization. Basic safety principles. IS audit. Lectures and seminars - thematic plan: 1. Introduction to Ethical Hacking	

2. Practical demonstration of hacker tools for Linux and Windows 3. Practical demonstration of IT security penetration test 4. Practical demonstrations of Viruses 5. Demonstration of network monitoring 6. Direct attack attacks on network devices 7. Demonstrate protection against hacker techniques 8. Personal security and security of biometric personal data 9. ISO 27001 - Safety Management System 10. Law 122-2013 - Personal Data Protection Act 11. OWASP - Open Web Application Security Project 13. Social engineering 14. Trends in safety management 15. Student battle in a sandbox

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KSP/062M/16	Course title: Intellectual Capital and Innovations in the Dynamic Business
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: The evaluation consists of the following parts: (1) active participation in lectures and seminars 10%, (2) presentations in seminars 20%, (3) written test 20%, (4) written report of intellectual capital statement 40%, (5) final presentation of intellectual capital statement 10%. The overall evaluation is in accordance with the faculty evaluation system: A = 91-100%; B = 81-90%; C = 73-80%; D = 66-72%; E = 65-60%; F = 0-59% points.	
Learning outcomes: The course deals with the question of how to turn knowledge into innovation and then get it into the market. Effective knowledge and innovation management are essential for successful business growth. Students will gain knowledge about methods of building and using intellectual capital and efficient creation and commercialization of products and services. Upon completion of the course, students will be able to prepare a statement of intellectual capital and apply the acquired knowledge in business practice.	
Class syllabus: <ol style="list-style-type: none"> 1. Introduction 2. Definition and importance of intellectual capital 3. Intellectual capital and dynamically growing enterprises 4. Intellectual capital and strategic management 5. Reporting and models of intellectual capital 6. Analysis and measurement of intellectual capital 7. Knowledge management 8. COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/030M/00	Course title: International Marketing
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Marketing	
Course requirements: 40 % interim evaluation: - active attendance (in case of unjustified absence or unpreparedness to seminar - loss of 10%), - semester project – application of theoretical knowledge on selected organization – 20%, - semester work on selected and approved topic – 20%, 60 % final evaluation - exam – written, online test using the selected application (MS Forms) Electronic communication and method of distribution of study materials is carried out by MS Teams application. The semester project is elaborated continuously at individual seminars, namely the assignment is always given one week in advance at the seminar. Students can work on the semester project in groups or individually. Semester project is handed out without the possibility of additional adjustments and additional exchanges. Semester work is complexly evaluated in terms of its quality. Semester work must be prepared and submitted at least one week before the first final test date. Semester work is handed without the possibility of additional adjustments and additional exchanges. Scale of assessment (preliminary/final): 40/60	
Learning outcomes: After graduating students will have the opportunity to learn more about business and business subjects in the international and global market environment as well as the international market environment, to define suitable strategies for entering the given markets as well as to apply the marketing mix elements in the international context. The subject allows to estimate and analyze the international environment, to determine the appropriate strategy for entering the international market and to understand the application of the marketing mix elements in the context of the international environment.	
Class syllabus: 1. International Marketing – Introduction to the issue. 2. International environment.	

3. International markets and international marketing research.
4. Entry strategies for foreign markets.
5. Market segmentation, target market selection and positioning.
6. International marketing mix.
7. Product.
8. Brand.
9. Distribution.
10. Price.
11. Marketing communication.
12. Implementation of marketing strategies. Selected aspects of international marketing.
13. An overview of the content of the subject and a lecture on the current topic.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/019M/00	Course title: Intranet
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The aim of the course is to prepare the student for effective orientation in the environment of the internal network and information infrastructure of enterprises and to become acquainted with its dependence on intranet information systems. This course provides an overview of the technical and software features of internal computer systems based on computer technologies. The focus is on the architecture of the internal enterprise network and its link to business processes using mobile platforms, desktop technologies and server systems. Discovered intranet technologies are at present indispensable and a key part of businesses, and proper organization and management are needed. Practical examples of selected businesses and technologies in the virtual environment will be presented on the subject. After completing the subject, the student will expand and gain new knowledge resulting from the development of intranet management and development in selected enterprises. Students will understand the new concept in this field, they can analyze and apply this knowledge in professional subjects and in practice.	
Class syllabus: 1. Introduction to the problem. (intranet history, information, data, technology) - Historical development of computing systems in intranet environments. Terminology and explanation of terms. 2. Hardware - Explaining the basic architectures of the computing devices in intranet environments. Technical specifications of intranet devices and their relationship to business processes. 3. Specifics of intranet operating systems - Windows, OSX, Linux, Mobile platforms 4. Intranet software applications - The cross-section of software used in enterprise intranets. File management. Internal education systems. Expert systems. Integrated production control systems. Remote access systems. Cloudy cloudy in enterprises, manager of mobile devices in the business.	

5. Intranet Network Architecture - Basic used network architectures for their principles and management. Monitoring network and access in intranet. VPN 6. Intranet Security - Physical security, software security, organizational security. 7. Modern trends in intranet and outsourcing of cloud computing and hybrid cloud systems.

Course ID: FM.KEF/054M/00	Course title: Investment Banking
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Banking, Financial markets and institutions	
Course requirements: The student must prepare PowerPoint presentations to selected topics. Based on these presentations, discussion will take place during the lectures. Moreover, every student must work on investment strategies and investment portfolio as a member of a team. The final evaluation reflects activities of the student during the lectures. The required minimum is 55 points.	
Learning outcomes: By passing of this subject, the student should obtain various practical skills. He should also gain a basic knowledge of functioning of big investment banks and about their role on financial markets where they represent various investors, as well as support companies and entrepreneurs.	
Class syllabus: <ol style="list-style-type: none"> 1. Investment banking – the basic terms, investment bank, investment banking 2. The main and supplemental roles of investment services. Types of emission operations. The role of an investment bank in the emission process. 3. Securities trading – on own account, on client's account 4. Insider information and protection from insider trading 5. Management of client's portfolio – creation, revision, performance measurement 6. Creation of new structured products for clients 7. Realities trading, other activities, international activities 8. Capital raising options. Own capital investments. Venture Capital 9. Asset securitization 10. Project financing 11. The role of investment banks in fusions and acquisitions. Speculative acquisitions, restructuralisation 12. Analyses and enterprise valuations. The methods of enterprise valuations 13. The actual problems of investment banking in the World

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMn/011M/00	Course title: Leadership
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: 100 % evaluation during semester entails: active in-class participation. in-class written tasks (short quizzes, test in the middle of semester), research project and its presentation at the end of semester. Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The aim of this course is to provide students with new and up-to-date knowledge from the sphere of leadership. The course derives from Organizational behaviour and HRM. Students will gain deeper understanding of the nature of leadership as one of managerial functions and will develop competencies that are tied to the effective leading of subordinates. They will adopt practical manuals of how to effectively lead subordinates. They will internalize new knowledge through case studies analysis and active self-reflection and self-evaluation.	
Class syllabus: <ol style="list-style-type: none"> 1. Introduction to the leadership studies. 2. Followers of the leader. How to become an effective member of the team. 3. Personality traits of effective leaders. 4. Charismatic (values oriented) and transformational leadership. 5. Participative and directive style of leadership. People-oriented and task-oriented leaders. 6. Situational approaches to leadership. Leader and leadership in the times of crisis. 7. The ethical leader. 8. Politics-related tactics in leadership. 9. The process of influencing of subordinates. 10. The team-oriented leader. 11. Virtual leadership. 12. Presentations of in-class tasks. Summary.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/030AM/16	Course title: Management Information Systems
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 1.	
Educational level: I., II.	
Prerequisites: FM.KIS/003AB/16 - Databases	
Recommended prerequisites: EXPECTED KNOWLEDGE THE STUDENT IS REQUIRED TO HAVE Familiarity with the basic hardware and software components of a computer and an ability to use the computer for word processing and e-mail are required. VISUAL AIDS Students should use PowerPoint presentations tools. For the project data flow diagrams they should use Visio and also if they wish MindManager software.	
Course requirements: COURSE REQUIREMENTS Students are required to prepare for each class by: <ul style="list-style-type: none"> • reading the recommended literature; • verifying their understanding by doing the multiple choice tests available for the recommended literature; • preparing themselves for group and class discussion of the case problems assigned and about their project work; MISSED CLASSES, PARTICIPATION AND THEIR EFFECTS ON YOUR GRADE I know that absences are sometimes unavoidable due to sickness, business travel etc. However, we have only a few hours of class time, so my policy dictates that each class-hour missed without pre-arrangement make-up work will cost you percent, i.e. you will lose 1 point of your grade for each class-hour missed unless you arrange make-up work with me beforehand. Furthermore, my policy on attendance stipulates that any student missing more hours of classes will not be able to make the grade in the given semester. Although you will not be able to make up completely for any absence, since you will have missed all discussion and interaction in the class itself, you can nevertheless make up for some of the loss by completing various assignments. I therefore urge you to contact me in advance if you are forced to miss a class and arrange how you can make up for the absence. Failure to do so will result in an unexcused absence. Normally the make-up assignment will involve submitting by e-mail, not later than 2 weeks after the absence, written answers to: <ul style="list-style-type: none"> • a list of questions related to missed lectures • Case Problems assigned for the missed class and any other assignments for that class 	

Your grade for Participation will be based on how well you involve and express yourself in the class. Your grade for Case Problems will be based on how well you involve and express yourself in the class and group discussion of these case studies.

FINAL GRADES

Midterm exam papers will be given at the second half of the semester. Semester projects can be presented not later than end of examination period of the semester.

COURSE FORMAT

The general format of each class will be:

review of assigned reading and discussion

lectures interspersed with group and class discussion of relevant case studies

class review of term projects

CASE STUDIES

Case Studies, labelled Case Problems, are described at the end of each chapter of the text. Students should analyze those listed in the schedule and be prepared to discuss them. Students may be asked to present the results of their analysis.

TERM PROJECT

1 Each student is required, as a member of a team of not more than four or five, to identify and then analyze a non-trivial, unresolved problem or opportunity which has the potential to be solved or improved by a computerized information system.

2 The problem/opportunity may exist in a business with which the students are familiar, or in Society at large. An example in these days of electronic commerce could be the design of a web site. Another might be a sales reporting system for the local grocer. Of course, the most important example is the development of information system

3 The team should prepare a term paper in the form of a consulting report to top management recommending how to solve the problem or take advantage of the opportunity. Apart from an analysis of the problem/opportunity, the report should include an outline design of the proposed solution, illustrating necessary hardware and software components, as well as a proposal on how the system is to be developed.

4 The report should be not less than 7 pages typed single spaced per person in the team and should be handed in by the _last_ Class (the end of the semester). Late submissions will be penalized.

5 You are also required to summarize your results in a twenty minute group presentation. You will earn extra marks for doing an executive summary of not more than one page and providing copies of it to your fellow students at the time of your class presentation.

6 As this course is about information systems in a business orientation, you should put emphasis on managerial and business issues rather than technical aspects; although systems and data analysis should be carried out using the modelling tools you will learn during the course. It is very important that you include references to the sources of your data, in order that I can verify these.

7 The 40% of the course grade assigned to the Term Project will be graded according to the following criteria, i.e. how well you have:

i defined the problem or opportunity and determined the user requirements for solving the problem or exploiting the opportunity

ii analyzed the current situation, the problem/opportunity and the users' requirements

iii considered alternative solutions, examined the technical, economic and organizational feasibility of each and selected the most appropriate

iv illustrated how the chosen solution will work [i.e. how the system's hardware, software, data, people components will interact]

v identified and designed in outline the databases and processes involved in the system

vi identified input and output screens, forms and reports and specified the purpose of each

vii identified and planned any hardware and software procurement needed by the system and scheduled the system's subsequent development and implementation

Specific deliverables to be included in the semester paper are as follows:

SYSTEM PHASE PROJECT DELIVERABLES % of GRADE

PROBLEM STUDY PROBLEM DEFINITION

- o BACKGROUND SITUATION DESCRIPTION
- o PROBLEMS, OPPORTUNITIES & DIRECTIVES
- o RECOMMENDATIONS FOR IMPROVEMENT 5%

FEASIBILITY STUDY FEASIBILITY REPORT

- o CURRENT SYSTEM DESCRIPTION
- o NEW USER/SYSTEM REQUIREMENTS
- o IDENTIFICATION OF ALTERNATIVE SOLUTIONS
- o ANALYSIS OF EACH ALTERNATIVE SOLUTION
- o S/W, H/W & P/W RESOURCES NEEDED
- o TECHNICAL FEASIBILITY
- o ECONOMIC FEASIBILITY
- o ORGANIZATIONAL FEASIBILITY
- o OPERATION FEASIBILITY
- o RECOMMENDATIONS 10%

SYSTEMS ANALYSIS SYSTEM PROPOSAL

- o SYSTEM ENVIRONMENT DIAGRAM (a sketch of the following :)
- o HARDWARE COMPONENTS
- o SOFTWARE COMPONENTS
- o PEOPLE COMPONENTS
- o COMMUNICATIONS COMPONENTS
- o LOGICAL DATA MODEL
- o ENTITY RELATIONSHIP DIAGRAM
- o TABLE DATA STRUCTURES
- o LOGICAL PROCESS MODEL
- o CONTEXT DIAGRAM
- o 1ST LEVEL DATA FLOW DIAGRAM
- o USER INTERFACES
- o LIST OF PROPOSED INPUT FORMS/SCREENS, INCL. DESCRIPTION OF PURPOSE OF EACH
- o PROPOSED PROCUREMENT PLAN
- o PROPOSED DEVELOPMENT SCHEDULE 15%

8 All the above must be written in electronic form and, of course, if you prefer in printed version, too. You are not expected to implement any part of the system, although in some parts, e.g. design of screens, it may well be easier to draft them on the computer.

9 It is necessary to get my agreement of your choice of term project by the first quarter of the semester (from the beginning of the semester), at which time you should submit a brief description of the problem you are attempting to solve and what likely solutions you are considering.

10 A brief progress report should be made to the class in the middle of the semester classes, when each team should report:

- what has been achieved so far
- what major problems have been encountered
- what schedule of activities is planned for the rest of the course

Although the term project as described above may seem large, it is entirely manageable, especially as you will be learning all you need to know during the course. And since you will be developing a real information system it can also be extremely rewarding.

Scale of assessment (preliminary/final): Grading % of grade
Mid-Term Exam 40
Term Project 40
Class Presentation of Term Project and Discussion 20
Course grade: A is 91-100%, B is 81-90%, C is 73-80, D is 66-72, E is 61-65, and F is ≤ 60 .

Learning outcomes:

The course concentrates on analysis and development of information systems in business organizations. This course will develop the framework for an information system and explore how systems that support the business functions of the organization are integrated and aid the manager with decision-making responsibilities within the operational, tactical, and strategic hierarchy of the company. Underlying the examination of various types of organizational information systems will be an exploration of emerging technologies that drive these systems. This course provides the student with the knowledge and skills necessary to understand and use information technology effectively and shows how information technology provides organizations with a strategic competitive advantage.

Class syllabus:**SCHEDULE**

Lecture 1 MANAGING INFORMATION SYSTEMS

Lecture 2 SYSTEMS THEORY

Lecture 3 SYSTEM DEVELOPMENT LIFE CYCLE

Lecture 4 THE IMPACT OF INFORMATION TECHNOLOGY ON BUSINESS, E-BUSINESS

Lecture 5 CLOUD COMPUTING

Lecture 6 DATABASES, DATA MINING, DATA and BUSINESS ANALYTICS

Lecture 7 NETWORKS & DATA COMMUNICATIONS

MID-TERM EXAM

Lecture 8 SERVICE ORIENTED ARCHITECTURE, E-SERVICE MANAGEMENT

Lecture 9 INFORMATION SYSTEMS FOR DECISION SUPPORT, INFORMATION TECHNOLOGY ISSUES FOR MANAGEMENT

Lecture 10 EXPERT SYSTEMS, ARTIFICIAL INTELLIGENCE & NEURAL NETWORKS

Lecture 11 INFORMATION SYSTEMS FOR THE ENTERPRISE, BUSINESS INTELLIGENCE

Lecture 12 SECURITY & ETHICAL CHALLENGES

FINAL EXAM**Recommended literature:**

To be able to benefit fully from each class, it is really very important to read the scheduled chapters and prepare the assigned Case Problems before class. We will cover a great deal of material in the course and even if you are knowledgeable about Business Information Systems, you will be wasting your time and money, as well as your chances of a good grade, if you do not read the text.

Notes:

STATEMENT OF COURSE OBJECTIVES

- a) To assist the student in understanding the issues and problems facing the manager or business user of computer-based information systems, and what solutions are available.
- b) To enable the student to learn how to make intelligent decisions about computer based information systems, and as a user, to attain their effective application.
- c) To prepare the student for participation as a user or a manager in the development of business information system.
- d) To assist the student in appreciating the problems of management in attempting to direct and control corporate information technology.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMn/019M/12	Course title: Management in Global Environment
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: 40% case study, 20% presentation of case study, 10% active participation, 30% test. To obtain a rating A, at least 91 points must be obtained, to obtain B at least 81 points must be obtained, for rating C at least 73 points, for rating D at least 66points and for rating E at least 60 points. Scale of assessment (preliminary/final): 70/30	
Learning outcomes: The course supports students' ability to analyse and understand changes in the business environment as a result of processes of globalisation and presents stories of managers who succeed in the global business. Good understanding of specificities of management in a global environment, particularly in the European Union, are among key competencies of graduates. Case studies develop analytical skills of students and allow them to know the concrete examples of successful global firms and understand what are the key success factors for doing business in a global environment.	
Class syllabus: Globalisation and global environment, impacts and risk of globalisation. Impact of international and regional organisations on the business environment. Analysis of company resources when entering international business. Analyses of environment for global business. Forms of entry on foreign markets, advantages/disadvantages. Equity and non-equity models. Strategic aspects of foreign markets entry. Competition rules in the global business. International human resource management. Cultural and behavioural aspects of global management.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KSP/009M/00	Course title: Managerial Decision-Making
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Finished bachelor degree.	
Course requirements: The overall evaluation is in accordance with the faculty evaluation system: A = 91-100%; B = 81-90%; C = 73-80%; D = 66-72%; E = 65-60%; F = 0-59%. Scale of assessment (preliminary/final): Ongoing: 40% / Exam: 60%. The exam consists of the written mid-term exam during the semester 30% and of the final exam during the examination period 30%.	
Learning outcomes: Decision-making belongs to main responsibilities and functions of the managers and managers are regarded and evaluated in terms of success in making decisions. The goal of the course is to improve the decision-making skills of students and to contribute to their ability to effectively and creatively solve problems both individually and within the teams. The course graduates would learn to perceive decision-making as a systematic process in the context of problem solving. They would be able to use rational methods of decision-making under conditions of certainty, risk and uncertainty as well as to solve the sequence of successive decisions. They would sense the psychological perspective of the decision-making. They would be familiar with the techniques of decision-making in groups and teams. They would practice the gained theoretical knowledge practically by means of the various simulations and case studies.	
Class syllabus: 1. Introduction into the subject. Decision-making in management. The nature of managerial decision-making. The decision-making process. 2. The rational approaches in the managerial decision-making. Methods and approaches of the decision-making under certainty, uncertainty and risk. The sequence of decisions and decision trees. 3. The psychological aspect of managerial decision-making. The two systems in us. The heuristics of anchoring, availability and representativeness. The prospect theory. The irrational types of choices. The limits of the human mind. 4. The group decision making. Defining the group's assignment, planning and organizing the overall group effort and staffing the decision group. Directing and controlling the group meeting. The creative methods and techniques of group decision-making.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/254M/16	Course title: Managerial accounting
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Principles of Accounting, Cost Accounting	
Course requirements: test 1- 15% test 2- 25% final test - 60% Scale of assessment (preliminary/final): 40/60	
Learning outcomes: The objective of the Course: This course aims to present the different costing systems and methods which are used in determining the cost of products and services in the organization. It aims also to show the role of costing accounting as a managerial tool for business strategy, planning and controlling. In addition, this course will introduce the “different costs for different purposes” theme, and indicates how cost accounting helps managers make better decisions.	
Class syllabus: <ol style="list-style-type: none"> 1. Managerial accounting – its role and comparison with cost and financial accounting 2. Cost – Cost categories, cost behavior, relevant and irrelevant costs from decision making perspective 3. Cost behavior - Estimate cost functions using several methods and subsequent evaluation of the functions. Curves of Learning. 4. CVP analysis- BEpoint, Margin of Safety, operating and financial leverage, apply cost-volume-profit analysis and sensitivity analysis. 5. Absorption costing and Variable costing. 6. Job costing – cost drivers, cost pools, cost-allocation base, traditional costing, Kaizen Costing 7. Job Costing, Activity-Based Costing – apply job cost accounting under actual and normal costing, comprehend the activity-based costing approach in a cost system. 8. Master Budget, Flexible Budgets - Construct operating and financial budgets, static and flexible budget and analyze variances. Explain the financial and nonfinancial measures of quality and time. 9. Responsibility accounting, Strategic Profitability Analysis, Customer Profitability Analysis- 	

Perform customer-profitability analysis and sales variance analysis. 10. Traditional methods of pricing, target costing, life-cycle-costing 11. Transfer pricing, International transfer pricing 12. Apply process-costing methods using the weighted average method and FIFO method. 13. Balanced Scorecard

Course ID: FM.KEF/004M/00	Course title: Market Risk Analysis of Financial Portfolios
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: The student is expected to attend regular seminars (10point) and to prepare a case study (40point). At the end of the semester, the student will pass a test, which will include a theoretical and practical part of 2x25 points. In total, a student can earn 100 points; Student needs min 60 points. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Students will learn about the methodology of measurement of market risks. Based on practical examples, they will learn to do risk analysis of financial portfolios using classical and modern VaR methods. Students will solve practical examples using appropriate software.	
Class syllabus: 1. Introduction into risk measurement 2. Risk measurement before VaR – Markovitz model 3. Single-factor model - CAPM 4. VaR Metodology 5. Non-parametric Approaches VaR 6. Parametric Approaches VaR 7. Monte Carlo Simulation Methods 8. Risk Factor Analysis based on PCA – Principal component analysis 9. Expected tail losses 10. Stress Testing 11. Backtesting Market Risk Models

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/026M/00	Course title: Marketing Analytics
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Grading: 30 % SAS models <ul style="list-style-type: none"> • Association analysis model: 10% • Cross sell model: 10% • Segmentation model: 10% 70 % final oral exam The overall student rating consists of the sum of the percentages for the analyzed analytical models, the active participation and the percentage obtained for the oral exam. The individual analytical models are developed continuously on individual seminars, in particular the procedures are always explained and demonstrated at the seminar. The oral exam is comprehensively evaluated with regard to the quality of the model processing and the solving of the given task. Each student gets the job to use the selected model that was taken during the semester. The evaluation will be based on model quality and explanation of its use for marketing purposes. The individual grades of the grading scale are awarded on the basis of the total number of points / points that reflects the degree of completion of the subject. The ratio of continuous and final evaluation is 30: 70. Grading scale: 100 –91=A/ 90-81=B/ 80-73=C/ 72-66=D/ 65-60=E/ 59-0=Fx Scale of assessment (preliminary/final): 30:70	
Learning outcomes: After completing the course students will be able to work with the program SAS Enterprise Miner and will be able to perform and interpret basic analysis like cross sell, up sell, association analysis and segmentation.	
Class syllabus: 1. Basic characteristics of marketing analytics Marketing Research and its components. Role and status of marketing analytics in the organization. Customer Life Cycle. 2. Statistical Software Enterprise Miner Strana: 2	

Introduction to SAS Enterprise Miner software. Basic terms. Data retrieval, fault finding and missing data records, impute and replacement, data cleansing, data standardization.

3. Types of analysis used in marketing analytics

Customer segmentation. Cross Sell, Up Sell, Customer Retention and Customer lifetime value.

4. Customer segmentation

Definitions, basic types of segmentation. Business rules - Profit ranking, RFM (Recency, Frequency, Monetary), Supervised clustering - Decision tree, Unsupervised clustering - K-means clustering. Creating customer segments.

5. Profiling customer segments

Segmentation strategies. A detailed description of each customer group in terms of their sociodemographic

profile, purchasing behavior, experience and needs.

6. Cross Sell and Up Sell.

Definition of terms. Basic components of Cross Sell Modeling. Next Best Offer. Analysis of customer potential for sales of products and services. The analysis provides valuable patterns of buying behavior in the form of transparent outputs. Its conclusions are used in referral systems, when compiling promotional packages, determining the content of promotional catalogs, and especially targeting marketing campaigns to existing customers.

7. Association analysis

Using association analysis (shopping cart analysis) to identify the Next Best Offer. Model results in managing campaigns.

8. Sequence analysis

Using sequential analysis to identify Next Best Offer. Sequence analysis also uses a variable to capture information about the order of product purchase by individual customers. The result is two to multi-element rules that show the sequence of purchases. Using modeling results in managing campaigns.

9. Propensity to Buy

Basic principles of predictive modeling. Practical example of modeling propensity to purchase and interpretation of results. Utilizing modeling results in managing campaigns.

10. Customer Retention

Definitions. Customer retention and profitability of the organization. Fundamental retention strategy for the organization. Analysis of the retention factors. Modeling propensity to leave.

11. Modelling customer retention and fraud detection

Which customers will leave next month? Using modeling results to manage the campaigns. Fraud processing. Detection and prevention of fraud in various areas of business (insurance fraud, tax cuts, employee fraud).

12. Customer lifetime value (CLV).

Definition of terms. Basic approaches to calculating the lifetime value of the customer: a) Coverage (sales minus variable costs). b) Marketing and other costs not included in the coverage. c)

Probability of purchase over a given time period. Each of these indicators needs to be modeled on the basis of historical trends and predictive indicators.

13. Utilizing CLV in marketing

The CLV expresses true financial value of customers, enables customer segmentation and segmentation according to their financial potential and the subsequent prioritization of customers and resources. The data will help in deciding: To which existing and potential customers do we invest more and into which less? How to redirect resources? What steps to take to maintain a customer who wants leave our company and go to competition? How to increase customers' profitability?

14. Final class

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMn/038M/00	Course title: Organization Cultures (European Features)
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Preliminary assessment (60%) - case studies, essay, assessed work and its presentation, in-class test Final assessment (40%) - final written exam A = 100 – 91 points; B = 90 – 81 points; C = 80 – 73 points; D = 72 – 66 points; E = 65 – 60 points; FX (failed) = 59 – 0 points Scale of assessment (preliminary/final): 60/40	
Learning outcomes: The course aims to develop an understanding of differences in cultural evolution of individual European countries and their materialization in typical organizational cultures in the context of HR management as a basis for organizational culture typology. On completion of this course the student will be able to analyse organizational culture; identify, understand and interpret the differences in organizational cultures; use the acquired skills in managerial work.	
Class syllabus: 1. Introduction to organizational cultures in the context of HR management (definitions, substance and forms of organizational culture, subcultures and countercultures, organizational socialization, change of organizational culture, diagnosis of culture). 2. European features of organizational cultures in the context of HR management (contrastive approach to national cultures of the selected states; identification of relevant differences; states and their typical organizational cultures; typology of organizational cultures).

Languages necessary to complete the course:

English language

Notes:

This subject familiarizes participants with a range of approaches used in information technology research, with an emphasis on approaches commonly used in practical settings. The advantages and limitations of different research approaches are examined, as well as their applicability in different information technology contexts. Experience is provided in the design of research studies, in the analysis and interpretation of data, and in report presentation. Participants acquire skills that are useful in the conduct of research agendas and in the critical evaluation of others' research work.

This subject also will enable students to choose and justify a research methodology from a broad range of quantitative and qualitative research methods relevant across the Information Technology (IT) discipline. Students will prepare a research plan incorporating a critique of existing knowledge, appropriate research methodology, suitable data collection techniques and an

outline of the ethical issues impacting their research topic. Students are provided the opportunity to write a substantial proportion of their methodology/data collection chapter and publish their preliminary work by identifying a publication outlet, such as a journal or conference, and providing the publication template.

Besides, this subject exposes students to research across the range of IT disciplines, preparing them to conduct research in their home discipline. It provides broad coverage of the issues, concepts, methods and techniques associated with Computer Science, Software Engineering, Information Systems and Information Management. It introduces students to major research philosophies and paradigms, the principles of research design, research ethics, and research methods and techniques of data collection and analysis appropriate to IT research generally and to their sub-discipline specifically. It covers oral and written communication skills.

Skills developed and knowledge acquired from this subject will prepare students to conduct and communicate their own research, as well as to be knowledgeable and critical interpreters of others' research.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/312M/16	Course title: Security Management
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Course requirements: The assessment of the subject is in accordance with the FM UK Study Regulations. Evaluation is aimed at assessing the skills and work habits of students, which are assessed on the basis of OCTO in ACVA phases: Objective 25% Complexity 25% Team work 25% Outputs 25% Together, max. 100 points/semester, where the following points can be obtained in the individual AKVA phases: Analytical - 20 points, Conceptual - 20 points, Verification - 20 points, Argumentative - 40 point Scale of assessment (preliminary/final): 100/0	
Learning outcomes: By completing the subject, the student will acquire skills in the field of security management with an emphasis on the implementation of EU directives in the area of GDPR, ePrivacy and CyberSecurity. The result is a processed organization project that reflects business processes in the organization. Alternative activity in the four ACVA phases of the project solution – Analytical (2-4 weeks), Conceptual (2-4 weeks), Verifying (1-3 weeks) and Argumentative (1-3 weeks).	
Class syllabus: 1. Safety - Definitions 2. EU GDPR Regulation 3. EU ePrivacy Directive 4. EU CyberSecurity Directive 5. Physical security 6. Personnel safety 7. Security of information systems 8. Security of personal data 9. Energy security	
Recommended literature: EU Legislation

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/302AM/17	Course title: Skills for Success – From University to Workplace
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: I., II.	
Prerequisites:	
Course requirements: in-class presence and active participation (student can miss max 1x180 min) – 40 % Continuous evaluation: partial assignments handed-in for each of the 6 topics – 30 % Final evaluation: group presentation on selected topic from the course syllabus taking place in the last class and feedback giving to the teammates – 30 % Scale of assessment (preliminary/final): 70% / 30%	
Learning outcomes: The aim of the soft skills course needed for proper navigation on the job market of shared service centers is to acknowledge students with the portfolio of highly effective communication tools. Companies associated within the Business Service Center Forum and the under the auspices of the American Chamber of Commerce in Slovakia currently employ more than 29 000 full-time employees. They have identified soft communication skills as the most crucial, but also one of the least developed, skills fresh graduates possess when entering the job market. Upon successful completion of the course in English language, the students would be capable of more effective team work in international environment, managing their work time properly and efficiently and of communicating with higher portion of assertiveness. They will also increase their capabilities in providing and receiving constructive feedback, conflict resolution at a workplace and captivating their audience while presenting or applying design principles into daily communication routine.	
Class syllabus: Module 1 – Team Work – predominantly covered by the company Lenovo. The aim of this module is to raise awareness about the importance of team work at every work place. It would help the participants to understand behavioral forms supportive of team work, confidence and engagement building as well as team work for better and quicker results. Students will have an opportunity to role play those behavioral patterns hindering the quality of work and relations at a workplace. Furthermore, they would learn what kind of roles can they play in a team, how to use their strengths and how to eradicate their weaknesses in team work. The instructor would use the following education methods: role play, analysis, discussion and feedback. The module would last 180 minutes and would be delivered in English language. Module 2 – Time Management - predominantly covered by the company Siemens. This module aims to address the following topics:	

- Why do we want to manage our time better? What exactly do we want to change/get better at?
- How do we improve (and through what) quality of our life & are there any new activities?
- My mission, areas of responsibility, priority goals, activities. What do my coworkers expect from me?
- What are the priorities I decide by during managing my time? How do I spend my time and what is really important (to me)?
- Planning, tools and methods (my roles and activities). What are the rules I need to comply with during planning my activities? What do I need to avoid?
- How to set my goals & rules I need to comply with, eliminating mistakes, rescheduling activities?
- How to fight time eaters (subjective and objective ones), how to identify them? Tools to eliminate them (or minimize them).

Central to the module is the sub-topic of priorities management, where the lecturer would focus on taking control and balancing multiple tasks even when they are all priorities with the aim of minimizing the impact of most common time wasters. Handling all of the unexpected demands and unplanned situations that destroy the most careful scheduling is also part the education outcome. The module would last 180 minutes and would be delivered in English language.

Module 3 - Verbal and non-verbal communication – predominantly covered by the company PriceWaterhouseCoopers. This module would be divided into 2 blocks:

Block A (productive conversations) - People think that simple talking makes a good conversation. This block will deal with the issue why misunderstandings happen? Talking is simply not enough, for productive conversations much more is required than just ability to speak. The instructor would acknowledge the students with answers for the following questions: „How to make the other person sure we listen well? What and why to do it?“; „In which situations and how to raise a proper questions in order to get answers on what we’re asking?“ or „how to be authentic and convey a message of a competent and reliable employee?“. Techniques and scenarios of productive conversations are also part of education in Block A, and students will also get an opportunity to master the balance between Advocacy and Inquiry.

Block B (assertive communication) – Students would be presented assertive communication as highly effective tool used to express our feelings and point of view without being aggressive or stepping on other people’s toes. The lecturer would cover the following topics within Block B.

- How assertive you are? Knowing self is the best start (role play).
- Assertive rules and Transactional analysis based on Eric Berne.
- Aggressive - assertive - passive behaviors. And also passive aggressive. How to recognize them and how to respond?
- Effective strategies for dealing with others while taking into account the intended level of assertiveness and cooperation. When is it suitable to take a “defeat” strategy? Is “Compromise” the “Golden mean”?
- Good Assertive techniques.

The module would last 180 minutes and would be delivered in English language.

Module 4 – Conflict Resolution & Mindset - predominantly covered by the company IBM. The aim of this module is to introduce conflicts as moments that cannot be prevented, the most important thing is to learn how to handle or manage them. The students would learn strategies and techniques for addressing conflicts. Knowing when and how to use them can make participants more effective at handling challenging situations. By the end of this module, participants will be able to:

- Discuss what conflict is, how conflict can be both destructive and constructive, and how learning to overcome the barriers of addressing conflict can benefit their career.
- Recognize the five most common conflict resolution styles and improve their conflict

management skills by learning when to use or avoid using each style.

- Discuss how conflict resolution can improve their relationships, enhance their collaboration skills and increase their professional effectiveness.
- Discuss how mindset influences perception of conflict situations and helps them to manage the conflict in a constructive way.

The module would last 180 minutes and would be delivered in English language.

Module 5 – Presentation Skills – predominantly covered by the company DELL. To have the idea is simply not enough in the corporate environment. The aim of this module is to provide the students with knowledge that it is equally important to accompany the ideas with a story, structure and image so that their presentations are motivating, memorable and compelling. Participants will undergo the theory as well as three steps of creating the presentation – content creation, basic techniques and principles of design and performance of their presentation. Practical exercises with the assistance of the lecturer where participants are able to try different techniques and principles are involved during these three cycles. Following this module, participants will be able to create engaging presentations or apply design principles to everyday communication. The module would last 180 minutes and would be delivered in English language.

Module 6 – Feedback – covered by companies Siemens, IBM, PriceWaterhouseCoopers. We hear about feedback all the time, whereas everybody is aware of how important it is to give feedback and everybody is interested to know how his/her performance and achievements are appreciated. However the lecturer would outline the students there is a difference between ‘feedback’ and ‘effective feedback’ and this module is aimed at explaining how to give/receive effective feedback which leads to improved performance and behaviors. The students will acknowledge themselves within this module also with the following topics:

- What is feedback? What types do we have?
- The difference between criticism and feedback, their definition.
- When do we give feedback?
- What do we achieve (or want to achieve) by giving our feedback to someone?
- Rules for effective and supportive feedback – verbal and nonverbal expressions, exercises.

Portion of the feedback module would be dedicated to final group presentation, being a comprehensive part of the overall student evaluation. The presentation will be delivered in video format as well as live performance on stage in front of the audience, while the team members will be requested to provide horizontal feedback to their teammates. The module would last 180 minutes and would be delivered in English language.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/181M/19	Course title: Sustainable Energy Economics
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Scale of assessment (preliminary/final): 85% / 15% (final presentation)	
Learning outcomes: Smart cities face new business cases as they react to the changes in lifestyle We live differently, commute differently, use space differently and plan our lives differently than 10 years ago. Shared economy use cases are increasingly mainstream and the corresponding business cases as well. People have need to be more engaged and informed, barriers to market are low, information are omnipresent. This course attempts to reveal how do cities and citizens manage to harness the technological innovations and scrape the value they enable. If you are interested in new business cases around smart cities and smart energy, embark with us on a series of 10 lectures with experienced consultants who have run technology start-ups and worked in the energy industry. In the introductory lectures of the course you will learn about the smart city landscape in Europe and in the US. The emerging new technologies, such as IoT, AI, and smart energy solutions will be examined from the perspective of cities and citizens needs, demand and deployment. You will discuss new business models and case studies in renewable energy project finance, electric and autonomous mobility, civic engagement and much more. Blocks of topics will be summarised with an engaging in-class group projects, which you will prepare and present under the guidance of the lecturer, or a guest speaker, who worked on and pitched similar projects in real life. We want students to understand how the business world around smart cities and new energy solutions evolves, how are new technologies perceived and implemented.	
Class syllabus: Topics: Introduction to smart cities, urbanization and shared economy Energy value chain and smart grids in modern cities and homes Selected IoT use cases and business models in transport and energy management Machine learning potential in the built world Summary of the block, team research based on MIT best practice in entrepreneurship - research the market for your innovative solution	

Clean electricity based on gas, business models and project financing: urban combined heat and power

Energy storage, its methods and economic importance. Battery storage, development of battery prices and growing range of applications.

Electric mobility and a new lifestyle in the mobility of urban population, new economic models and trends in personal mobility and connectivity to electromobility.

Summary of the block, group pitch - sell your smart city solution to a municipality

Electricity markets and the importance of flexibility: wholesale, Day ahead market, Intra-day market, Demand Response, markets, Support services, quasi-markets and distribution companies flexibility aggregation.

Price formation on various energy markets. Trading / investing on the markets with electricity, oil and gas. Commonalities and differences between these commodities. Spot prices and futures contracts for energy commodities.

The role and importance of information technology and social media in smart cities. Artificial intelligence, optimization, virtual reality, infrastructure planning and investment modeling.

Summary of the block, group proposal and pitch - tender on an RfP specification.

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KMk/076M/15	Course title: Tourist Industry
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Course requirements: The overall evaluation of students consists of the sum of percentages for the developed semester project, semester work, continuous assessment and active participation and the percentages obtained for the exam. Semester project: During the semester it is necessary to process the selected topic, present it and submit the presentation in electronic form. The topic of the project must be practically focused on: marketing activities and promotion of a selected tourist destination in the Slovak Republic and will concern the analysis of the competitiveness of a selected destination in the Slovak Republic or neighboring Slovakia. During the semester, students have the opportunity to get 100% of the evaluation, 50% for active participation, discussion of projects and project presentation and 50% for the final semester project. Scale of assessment (preliminary/final): During the semester, students have the opportunity to get 100% of the evaluation, 50% for active participation, discussion of projects and project presentation and 50% for the final semester project.	
Learning outcomes: After completing the course, the student should be able to assess whether and what marketing strategies are suitable for the development of tourism for specific entities and destinations, get acquainted with how tourism entities should cooperate in the context of tourism development and which marketing strategies to choose. The aim of the course is to gain a set of knowledge in the field of tourism, to get acquainted with the basic concepts, to get acquainted with the terminology and issues of tourism. The purpose is to analyze the factors of competitiveness of tourism entities, to outline a strategy for the development of tourism destinations and tourism management in the Slovak Republic and EU countries. Students will get acquainted with the basic unit of tourism, the functioning of tourism entities, the product portfolio and the need to offer product packages, use synergy effects and strategic partnerships. The course draws attention to the importance of an effective marketing strategy of the destination, both internally - to attract domestic tourists, and externally - in relation to foreign tourists. In the course we will also deal with the situation after the pandemic and the new problems facing tourism.	
Class syllabus: 1. Topic Introduction to the issue.	

Basic concepts and terminology. Tourism concept. International definition. Selected concepts of international classification, interpretations and interpretations. Reasons and causes of CR development. World Tourism Organization.

2. Topic - The concept of tourism and the tourism industry.

Who is a tourist? Development of tourism - conditions and causes. Development of tourism in the last decade, specifics of CR. Trends in tourism - trends in service providers, customer trends, destination trends. Pandemic and its consequences for the CR industry.

Topic 3 - Competitiveness of the country

The importance of tourism for the economies of countries. The competitiveness of the country, the factors that affect it and the need to coordinate regions and destinations. The impact of tourism on the country's GDP. Successful and unsuccessful countries in the field of tourism.

4. Topic - Forms of CR

Development of tourism in the EU, policy of sustainable tourism. Mass tourism, individual tourism. Global tourism. Modern travel options, IT entry into CR.

5. Topic - Tourism providers, tourism entities.

Travel agencies, travel agencies, business entities in the Czech Republic. The role of local and regional authorities in creating CR products. CR development and product packages.

6. Topic - Definition of service providers - accommodation, catering services - categorization, typology, quality standards, selected trends. Attractions and events - the main products of CR. Marketing mix in CR.

7. Topic - Strategies in the field of tourism, analysis of the industry - the effects of various environmental factors, driving forces in the industry, strategic groups in the industry, replicable and inimitable competitive advantages in tourism.

8. Topic - Marketing in CR

Specifics of the marketing mix. Successful marketing in CR. Marketing intermediaries and their role. Destination marketing - creating a destination strategy and its implementation. Human resources in tourism. Substitutes of tourism.

9. Topic - Strategic partnerships in tourism

The need for partnerships in tourism, the design of partnerships and the functioning of partnerships. Clustering of tourism entities, the role of regional tourism organizations. Modern trends - networking of companies, hotel networks, franchising, licenses, management contracts.

10. Topic - Tourism in the Slovak Republic

Tourism development strategies, tourism development, national and regional strategies. Objectives of tourism according to the priorities of the government, the Slovak Agency for Tourism, activities of the Ministry of Foreign Affairs for building the Slovakia brand. The role of regional organizations of the CR and the Ministry of Transport. Aftermath opportunities.

11. Topic - Business conditions in tourism.

Tourism in Europe - support for the development of tourism, financing of tourism from EU funds. Doing business in CR. Analytical techniques, planning in tourism - benefits and risks, human resources.

12. Topic - Destination management

Destination as the basic unit of CR. The concept of destination - primary offer, communication accessibility, destination amenities. Destination competitiveness - on a local, national and international scale. Successful and unsuccessful CR destinations. Attraction of the destination. OOCR and their role in destination management.

13. Topic - Brand in tourism

Country and destination marker. Fashionable and stable brands. Brand communication - methods and means. Brands of CR entities. Destination marker. Principles of sustainability in tourism.
