Exercises are mandatory, they will take place according to the valid schedule, either in person or in case of worsened epidemiological situation online. Individual students are firmly assigned to groups. It is not allowed to exchange in groups. Course evaluation during the semester: 1.) 5 min. test during online consultations, each for 1 point (min. 10 tests the student should take) (min. 10 tests the student should take, we take into account 2 possible absences) (10 points), without the possibility of writing a substitute test. 2.) 10-min. test at seminars, each for 2 points (min. 8 tests the student should pass, we take into account 2 possible absences) (16 points), without the possibility of writing a substitute test. 3.) 2 written works in the middle and at the end of the semester for 12 points (max. 24 points). The test can be taken in an alternate period during the semester, if the student proves his / her absence by a confirmation from a doctor. Assessment of the subject during the trial period: The final written examination at the exam lasts 80 minutes, consists of 5 examples (2 from linear algebra and 3 from mathematical analysis). (max. 50 points) Exam: a student can complete 1 regular and one corrective term if he / she does not reach the required number of points to complete the course on the regular term. <p>Learning outcomes:</p> <p>This course is a continuation of Mathematics I and gives students the possibility to gain mathematical skills in solving optimization problems. In many economic applications, a manager deals with situations where several variables have to be included into the mathematical model, e.g. usually the output depends on a set of different input factors. Therefore, this course deals with optimization problems for functions depending on more than one independent variable. Students will solve some real problem using software Wolfram Mathematica.</p>
