TABLE OF CONTENTS

1. J-2-VZ-023/16	Assessment, Management and Communication of Health Risks.....	2
2. J-2-VZ-006/15	Basics of Clinical Disciplines with Focus on Disease Prevention.....	4
3. J-2-VZ-035/15	Basics of Scientific and Research Work.....	6
4. J-2-VZ-014/15	Decision Making and Health.....	8
5. J-2-VZ-SS1/16	Defense of Diploma Thesis (state exam).....	10
6. J-2-VZ-020/16	Diploma Thesis Seminar.....	12
7. J-2-VZ-021/16	Emergent Situations in Communicable Diseases.....	14
8. J-2-VZ-022/16	Health Care Financing.....	16
9. J-2-VZ-036/15	Health Insurance.....	18
10. J-2-VZ-024/16	Health Protection Legislation.....	20
11. J-2-VZ-034/16	Healthcare Politics.....	22
12. J-2-VZ-001/15	Immunology and alergology.....	24
13. J-2-VZ-026/16	International Public Health.....	26
14. J-2-VZ-011/15	Intervention Programmes in Public Health.....	28
15. J-2-VZ-025/16	Management and Health Care Work.....	30
16. J-2-VZ-007/15	Mental Health and mental disorders.....	32
17. J-2-VZ-012/15	Nosocomial infections.....	34
18. J-2-VZ-033/16	Occupational Health Services and Health Protection at Work.....	36
19. J-2-VZ-002/15	Oral health.....	38
20. J-2-VZ-004/15	Practice in Hygiene and Epidemiology.....	40
21. J-2-VZ-013/15	Promotion and protection of health.....	42
22. J-2-VZ-SS2/16	Public Health (2) (state exam).....	44
23. J-2-VZ-003/15	Public Health Counselling.....	46
24. J-2-VZ-037/16	Public Health of Specific Population Groups (Health Inequalities).....	48
25. J-2-VZ-016/15	Public Relations.....	50
26. J-2-VZ-031/15	Research in Public Health II. (1).....	52
27. J-2-VZ-028/16	Research in Public Health II. (2).....	54
28. J-2-VZ-032/16	Research in Public Health II. (3).....	56
29. J-2-VZ-027/16	Social Aspects in Health Care.....	58
30. J-2-VZ-015/15	Sociology of health.....	59
31. J-2-VZ-009/15	Toxicology and Occupational Diseases.....	60
32. J-2-VZ-008/15	Travel and Tropical Medicine (1).....	62
33. J-2-VZ-029/15	Travel and Tropical Medicine (2).....	64
34. J-2-VZ-005/15	Vaccinology.....	66

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚVZ/J-2-VZ-023/16	Course title: Assessment, Management and Communication of Health Risks
Educational activities: Type of activities: practicals Number of hours: per week: 2 per level/semester: 30 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Decision Making and Health	
Course requirements: Scale of assessment (preliminary/final): 0/100	
Learning outcomes: After completion of the subject the student is able to identify, characterize and assess the health risks. Risk-benefit analysis – The student understands analysis and comparisons of benefits and costs either of human activities or insufficient activities concerning health. The student understands the importance of risk assessment as a base for process of control of risk in determining of priorities and important political decisions.	
Class syllabus: Definition of basic terms, risk management as qualitative and quantitative estimation of the likelihood of adverse effects and factors affecting human health. The process of assessment of health risk – identification of hazard, characteristics of the risk, evaluation of exposure, estimation of risk. Using of a system of analysis of health risk in practice. Exemplary studies of the assessment of health risk in EIA process. Management and communication of health risk.	
Recommended literature: Recommended literature: KOMÁREK, L., PROVAZNÍK, K. Základy prevence. Praha: SZÚ, 2009, 603 s. Manuál prevence v lékařské praxi, souborné vydání, 2005 - http://www.sweb.cz/centrumprev/	
Languages necessary to complete the course: slovak, czech

STATE EXAM DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚVZ/J-2-VZ-SS1/16	Course title: Defense of Diploma Thesis
Number of credits: 5	
Educational level: II.	
Recommended prerequisites: Research in Public Health II-1, Research in Public Health II-2, Diploma Seminar	
Learning outcomes: The student is able to propose and realize a modest scientific work. He/she can work with already collected data or use part of findings of other research projects (under condition of approval of person responsible for the given project). The student is able to present knowledge and orientation in the given problem. He/she can practically process, analyse and appropriately interpret the results.	
Class syllabus: Work under supervision of the tutor Retrieving of existing current scholar information on the given field Development of the text of the thesis Formulation of goals, selection of a target population or collection of samples Selection of appropriate study design and methods Collecting of empiric data Processing and analysis of the collected data Interpretation of results, development of a discussion Formulation of conclusions and recommendations for practice Putting together comprehensive final diploma thesis keeping the required form Development of the presentation for the defence of the final diploma thesis	
State exam syllabus: Processing diploma thesis - the student perspective on the issues examined and its interpretation

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚMI/J-2-VZ-001/15	Course title: Immunology and alergology
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 15 / 15 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: Microbiology 2	
Course requirements: - it is obligatory to be present at practicals (1 absence is tolerated) - 1 test during the semester - oral presentation according the schedule Exam: End study evaluation of students is based on written exam – test. Minimal cut off level is 60%. Scale of assessment (preliminary/final): 0%/100%	
Learning outcomes: The student receives information from specific and nonspecific immunity, immune competent cells, mechanisms of regulation of immune answer. The student is able to characterise the antigens, their structure and immunogenic potential as well as immunoglobulins, their function, mechanisms of antibody production, idiotypes, alltype, isotypes. The reached knowledges enable to understand the problems of vaccination, types of vaccines., of hypersensitivity, autoimmunity and immunodeficiencies. Transplantation and tumor immunity are covered at introductional level.	
Class syllabus: Introduction to immunology Discrimination between self and non self Antigens a receptors Terminology, Nonspecific immunity – barriers, cells, mechanism and functions Specific immunity – molecules, immunoglobulins, organs and cells differentiation Lymphocytes – activation APC Regulation of immunity , cytokines Tumor immunity Transplantation immunity Hypersensitivity Immunotherapy Immunostimulation IDS Antiinfective immunity Autoantibody detection

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.KSMCh/J-2-VZ-002/15	Course title: Oral health
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 15 / 15 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Attendance 80 % Continuous assessment test form, minimum level success 65 %, maximum number of points are 20, minimum number of points are 13. Scale of assessment (preliminary/final): Final evaluation in the form of test examination, minimum to pass: 65% Evaluation Scale: A: 93–100 %, B: 86–92 %, C: 79–85 %, D: 72–78 %, E: 65–71 %, FX: 64 % and less	
Learning outcomes: Acquisition of complex information about the aims, projects and epidemiological studies concerning the oral health. Students understand the principles of prevention from occurrence of prosthetic defects, orthodontics anomalies, diseases of TMJ, oncological diseases in oromaxillofacial region and injuries in oromaxillofacial area. Students are capable of applying the knowledge actively in work with patients in dental practice.	
Class syllabus: Definition of Oral Health and Prevention. Primary, Secondary and Tertiary Prevention, projects of WHO. Epidemiology of Diseases of Oral Cavity, Methods of Epidemiologic Studies, Results Interpretation. The Role of Nutrition, Biochemical Activity and Metabolism in Oral Cavity. The Importance of Nutrition in Prevention of Caries. Oral Health – Aims of WHO For Oral Health Protection. Project WHO – „Health for all by the Year 2000“ and „Health 21“. Caries, Definition, Etiology, Diagnostics, Treatment and Complications. Dental Plaque: Definition, Composition, and Etiopathogenesis in Formation of Diseases of Oral Cavity Plaque Detection, Indices. Role of Dental Hygiene in Oral Health, Motivation and Briefing of the Patient. Dental Calculus: Definition, Composition, and Etiopathogenesis in Formation of Diseases of Oral Cavity. Initial Arrangement of Individual Prophylaxy.	

Professional Teeth Cleaning. Reconstruction and Polishing of Fillings to Remove the Marginal irritations. Local and General Methods of Teeth Fluoridation. Epidemiology of Chronic, Infectious, Non- transmissible Diseases – Caries, Periodontal Diseases. Results of Epidemiological Studies in Europe and in the Slovak Republik. Age- groups Important for Observation of Parameters of Oral Health Participation of Particular Governmental Structures in Health Protection. Importance of Education and Briefing on Oral Health in Primary Prevention Practical Realisation of Oral Health Education in Elementary Schools for Children Aged 6-14 - According to the Model and Recommendations of WHO. Prevention of the Overall Complications in Dentistry Prevention of Complications and Treatment of Patients with Complex Diseases. Prevention of Orthodontic Anomalies. Prevention in Prosthetics. Prevention of Diseases of TMJ. Prevention of Injuries in Oromaxillofacial Region. Prevention of Oncological Diseases in Oromaxillofacial Region.
