COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KSP/016PE/10	Course title: Production Management and Operations Management
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: combined	
Number of credits: 8	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Recommended prerequisites: Basic management course I, II	
Course requirements: Evaluation during semester 40 %. Evaluation in the exam period 60 %.	
Learning outcomes: The goal of the Operations management course is to obtain the basic knowledge about the effective management of processes regarding transformation of the inputs into outputs, and corresponding operations within these processes, and the value creation and addition to the inputs in producing the goods or providing services. The effective management of transformation processes and operations and value creation will be explained based on the principles and applied tools of lean management and lean logistics concepts. Both manufacturing and service companies are a subject of the research.	
Class syllabus: 1. Characteristics of Operations Management and Effective Production System 2. Characteristics of Lean Management 3. Process Management in Capacity Shortage 4. Process Management in Capacity Excess 5. Process Improvement through Target Condition 6. Tolls for Process Improvement and Problem Solving 7. Inventory Management and Pull System 8. Characteristics of the Design for Operational Excellence 9. Creating the Culture of Continuous Improvement and Engaged Workforce

COURSE DESCRIPTION

University: Comenius University in Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KEF/117PE/10	Course title: Statistics
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: combined	
Number of credits: 8	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: The case study with processing of real data in selected statistical software using adequate statistical methods. The evaluation of the subject is composed from 1. the case study processing 45% ; 2. the case study presentation, eg. using MS PowerPoint, 15% 3. test online 40%. Scale of assessment (preliminary/final): 45 case study/15 presentation of case study/40 online test	
Learning outcomes: Students will be able to analyze real data using the selected statistical methods using appropriate software, IBM SPSS, Wolfram Mathematica, SAS, R, etc. and to apply them in management, focusing on data processing of managerial practice.	
Class syllabus: Descriptive statistics. Probabilistic distributions of one and multivariate random variables. Random choice. Create a sample from a given distribution. Interval estimates, hypothesis testing - parametric, non-parametric. Analysis of dependence of random variables of different types. Cross table. ANOVA one and two factor. Linear regression models, OLS. Multivariate regression method. Time Series, Decompositions: Trend, Season, Cycle Data analysis using IBM SPSS, SAS, respectively. Wolfram Mathematica. Working with real data - evaluation of questionnaires, or verification of economic, marketing and financial models based on real data.
