Recommended semester: 5.	
Educational level: I.	
Prerequisites:	
Course requirements: Apprentissage du français dans un environnement plus orienté professionnel et vers celui des affaires. Ce cours s'adresse principalement à des étudiants débutants qui souhaitent découvrir ou améliorer leur français en contexte professionnel ou de rechercher d'emploi dans un environnement francophone. Le programme couvre le niveau A1-A2 avec des bases solides et prépare à l'examen de DELF Pro A1/A2 et également a diplôme de français professionnel de la Chambre et de Commerce et d'Industrie de Paris. Cet apprentissage permet d'enrichir et de compléter son profil professionnel en abordant des aspects culturels francophones de manière globale et non stéréotypées. Scale of assessment (preliminary/final): La note finale tiendra compte du travail fourni (participation et présentation) pendant le semestre et également de l'examen écrit final. Le travail de présentation sera réalisé à l'oral et comptera pour 40 points de la note finale. Plusieurs mises en situations seront proposées aux étudiants qui leur permettront de mieux appréhender le monde entrepreneurial multiculturel. La participation à ces mises en situation sera également comptabilisée dans la note finale. L'étudiant pourra obtenir une note de 0 à 10 points. Un examen final, écrit, sera proposé sous forme de questions relatives aux notions développées dans les chapitres composant le programme. Pendant la période d'examen, l'étudiant peut obtenir les 50 points restants. Cette évaluation est conforme au règlement des études de l'Université et aux niveaux individuels de classification. Les échelles de notation sont attribuées sur la base du système de points appliqué. Un minimum de 91 est requis pour obtenir une note A. Pour obtenir une note de B au moins 81 pour cent. Pour obtenir une note de C au moins 73 pour cent, une note D d'au moins 66 % et une note E d'au moins 60 %. Les crédits ne seront pas attribués un étudiant qui gagne moins de 60 pour cent.	
Learning outcomes: Savoir présenter un produit ou un service, se renseigner sur un produit, parler des prix, savoir négocier le prix et acheter ou vendre le produit. Savoir réserver une chambre d'hôtel, de régler la chambre d'hôtel, réserver et prendre un taxi, parler des moyens de transports, expliquer et comprendre un itinéraire, comprendre une invitation, avoir des échanges informels avec des collègues.

Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Recommended prerequisites: The course has no prerequisites.	
Course requirements: The course is taught as follows: Lectures will be accessible online through MS Teams. When logging in to MS Teams, it is necessary to use the university e-mail address in the form of the surname number@uniba.sk and join the team FMUK_Mathematics_1_English using the code: ny4mn13. All study materials will also be published here. The student is obliged to listen to the lecture before the exercises and online consultation. According to the schedule, online consultations with the lecturer will be included. Students registered for the course will receive invitations to their calendar for regular online consultations. If they did not understand something in the lecture, they can add questions to the lecture before the online consultation in MS Teams. These will be answered during the online consultation by the lecturer. It is necessary to mention a specific problem that they did not understand. Exercises are mandatory, they will take place according to the valid schedule, either in person or in case of worsened epidemiological situation online. Individual students are firmly assigned to groups. It is not allowed to exchange in groups. Course evaluation during the semester: 1.) 5 min. test during online consultations, each for 1 point (min. 10 tests the student should take) (min. 10 tests the student should take, we take into account 2 possible absences) (10 points), without the possibility of writing a substitute test. 2.) 10-min. test at seminars, each for 2 points (min. 8 tests the student should pass, we take into account 2 possible absences) (16 points), without the possibility of writing a substitute test. 3.) 2 written works in the middle and at the end of the semester for 12 points (max. 24 points). The test can be taken in an alternate period during the semester, if the student proves his / her absence by a confirmation from a doctor. Assessment of the subject during the trial period: The final written examination at the exam lasts 80 minutes, consists of 5 examples (2 from linear algebra and 3 from mathematical analysis). (max. 50 points)	

Exam: a student can complete 1 regular and one corrective term if he / she does not reach the required number of points to complete the course on the regular term. The dates will be year-round and will be published well in advance and taking into account the epidemiological situation. During the tests, the student will log in to the MS Teams application, have a microphone, camera and will perform a test in the Moodle system. The student completes the course if he / she obtains at least 60% of points (ie 30 points) from the continuous assessment, so that he / she can go to the exam and min. 60% of the exam points (ie 30 points) to pass the exam. The points that the student obtains during the semester and in the exam are included in the final grade of the subject. Before solving the exam test, student must be logged in to the MS Teams application, have a microphone and camera switch on. Student is performing the exam test in the Moodle system. Student writes the solution by hand on paper, continuously is inserting own solution into the Moodle system while checking the compliance of its solution on paper with what it enters into the system. When the exam test is closed, the signed handwritten solution will be photographed or scanned together with student card (ISIC) and putted into the Moodle system. The student is obliged to have ensured a functioning internet connection during the exam tests.
Learning outcomes: The course gives students the possibility to understand a basic mathematical principles of the linear algebra and calculus of the function of the 1 variable with emphasis to economy and management. All the topics are supported by applications.
Class syllabus: 1. Linear algebra: vectors and matrices. n-dimensional vectors and matrices: Vector and Matrices Operations, linear dependence and independence. Matrices: transposes and inverse matrix, singular, regular matrices, rank of matrices, determinants, their basic properties. Solution of the system linear equations (Gauss Elimination Method, Cramer's Rule). Matrices as Linear Transformations, Eigenvalue, Eigenvectors. Application to Market, Leontief Input-Output Models. 2. Calculus of the Function of One Variable. Concept of Limit, Continuity and Differentiability of a Function of One Variable. Rules of Differentiation for a Function of One Variable. L'Hospital Rule. Differentials. Taylor Series. Extreme Values of a Function of One Variable. Integral Calculus: Indefinite Integrals: Basic rules of Integration, Substitution method, Integration per partes. Definite Integrals. Some economical applications.

Cases of breaking the Code of Ethics of Comenius University can be judged as breaking the duties following from legal regulations, (...). Such judgement may be connected with enforcing accompanying legal consequences on academic, (...) disciplinary level.

In accordance with the regulations of the internal regulation No. 13/2018 approved by the Academic senate of Comenius University in Bratislava the Disciplinary Regulations of Comenius University in Bratislava for Students, a disciplinary offence of a student is any form of copying or forbidden cooperation or providing answers during written or oral examination (assessment of knowledge) or during preparation for it within the course, or using technical devices or any information carriers in other than allowed ways during written or oral evaluation of study results (assessment of knowledge) or during preparation for it within the course. Committing a disciplinary offence may lead to imposing some disciplinary precautions on the student: admonition, conditional suspension of studies or dismissal from studies.

COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/307B/16	Course title: Special Topics in IT Projects
Educational activities: Type of activities: lecture Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 6.	
Educational level: I.	
Prerequisites:	
Course requirements: During the semester there will be a written test for 30 points (so-called midterm exam). Rating 70 points will be awarded for a semester project and its presentation. Scale of assessment (preliminary/final): Test 30%, Presentation of seminar project 30%, Seminar work (.docx) 40%	
Learning outcomes: The paradigm of digitization is radically changing the world's business and society. Related to this is the growing volume of IT projects, which places increasing demands on project managers. The aim of the course is to include bachelor's degree graduates among the excellently theoretically prepared graduates in the field of project management with a focus on ICT. To acquaint students with the specifics and modern-agile approaches in their management.	
Class syllabus: • Correctly estimate and control the scope of the IS / ICT project • Manage the time, cost and quality of the IS / ICT project • Work effectively with human resources • Use all available means of communication • Monitor and detect potential risks in a timely manner • Maximize the benefits of external collaboration • Combine the individual parts of the IS / ICT project into a functional whole Thematic plan: 1. Types of IT projects, Introduction to software development 2. Software development process, software development participants, software life cycle models 3. Architectural design 4. Requirements and specification of IT project 5. Estimation of scope in IT projects 6. Risk management 7. Implementation: classical procedures and agile procedures 8. Methodology Scrum, Kanban, Lean Development, Test Driven Development 9. Verification and validation - testing	

10. Effective communication on IT project
11. Selected principles of software engineering
12. Software development management support tools

Course ID: FM.KEF/115B/00	Course title: Statistical Methods
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Recommended prerequisites: Statistics	
Course requirements:	
Learning outcomes: By completing the course, the student will gain an overview of the issues of data analysis using statistical methods for the needs of the manager. He will master statistical methods suitable for 2 and multidimensional analysis of quantitative and qualitative variables. He will gain an overview of the possibilities provided by the SAS SAS Guide for statistical data analysis and will also acquire the necessary skills to work in this software.	
Class syllabus: 1. Introduction to the subject: The view of the methods of examining dependencies between statistical variables. 2. Analysis of dependence between qualitative variables - association (chi-quadrat test). 3. Analysis of variance - ANOVA. Parametric and nonparametric ANOVA methods. 4. Correlation analysis. Covariance and correlation matrix. 5. Regression analysis: Linear and nonlinear models. Simple linear model. Least squares method (LSM). 6. Multiple linear model. Methods of selecting variables for a model. Multicollinearity. 7. Introduction to stochastic processes: types of stochastic processes, stationary process, autocorrelation function. 8. Application of time series in management. Indices. 9. Decomposition of time series into components (multiplier, additive): trend, cycle, seasonality and random component. Subjective trend in the time series. 10. Estimation of trend using mathematical curves (line, parabola, Gompertz curve, exponential trend, logistic trend). 11. Moving averages method in determining the trend. Exponential smoothing. 12. Seasonal component in time series. Winter's method (additive, multiplier). 13. Random tests. Forecasting by time series analysis.
