COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3-UES-020/19	Course title: Organizations and institutions in international relations
Educational activities: Type of activities: lecture + seminar Number of hours: per week: 4 per level/semester: 56 Form of the course: on-site learning	
Number of credits: 10	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: Conditions for passing the course: # active participation (20%) # development of a research project (50%) # defending the research project (30%) Rating: A: 91-100 points; B: 81-90 points; C: 73-80 points; D: 66-72 points; E: 60-65 points; Fx: 0-59 points	
Learning outcomes: Learning outcomes: Students will gain knowledge of the theoretical and applied perspectives on the existence, dynamics and relationships of functioning in an institutional system in an international environment. Particular focus is given on understanding international norms, rules and values, decision-making processes, international relations, the behaviour of international organisations and other actors, in the context of organisational theories, international relations theories, European integration and human rights theories.	
Class syllabus: Course contents: 1. State and international organisations 2. Rationality and its limits; Organizational theories 3. New institutionalism in political science and international relations 4. Sovereignty and Globalization 5. Power and interdependence 6. Regimes and institutions 7. Efficiency and ideas 8. International and human security 9. Environment and Governance 10. Intergovernmentalism and integration 11. National and international institutional dynamics 12. International liability

COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3-UES-230/15	Course title: PhD Reserch Seminar
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 10	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: Active participation in seminars and reading preparation for seminars 2, 3, 4 and 5. Summary for presenting project to interviewees. Peer review of a colleague's summary. Presentation based on draft thesis.	
Learning outcomes: The course focuses on the practical application of research methods to individual thesis topics. Students will read and discuss contemporary literature on a number of methods, and reflect on their own research questions, theoretical frameworks, methodology and ethical dilemmas. By the end of the course they will be able to present, explain and discuss their work both orally and in writing.	
Class syllabus: 1. Research design/Introduction to research methods 2. Field experiments and grounded theory 3. Sampling issues and working with documents 4. Interviewing and working with elites/Research ethics 5. Writing up and what can go wrong/Discussing research summaries 6. Presentation of doctoral projects I 7. Presentation of doctoral projects II 8. Presentation of doctoral projects III

COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3-UES-350/21	Course title: Qualitative Research Methods
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 10	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: ASSESSMENT CRITERIA: Please note that the student must pass EACH assignment in order to pass the course. If the student fails one assignment the student will have 3 weeks to rewrite it. Week 2 (Steven Saxonberg) Operationalizing assignment Students will define the key terms they will use in their dissertation and define them clearly so that somebody who does not know the topic can understand it. They will also explain at least one of the theories that they will use. They will also explain this theory in a manner that somebody, who has never heard of this theory can understand it. They will further explain how they will apply the theory. This assignment should be around 3 pages and will be due in week 10, so that students will have had time to study at least one theory in great detail. Week 3 (Steven Saxonberg) Assignment for theories of science Compare Popper's critical rationalist approach with Isaac's scientific realist approach. What are the advantages and disadvantages of each approach? Which approach do you prefer? Which approach do you think is most applicable to your dissertation and why is it the most applicable? Write about 1,000 words or 2 single-spaced pages. Include page numbers from the two texts in your notes. That is in each paragraph when you discuss one of their ideas, make it clear which pages in their texts take up these issues. Assignment for comparative studies Take the main research question from your doctoral dissertation and discuss how you could apply your research question in a two-country comparison. Discuss both how you could analyze your research question using the method of difference and the method of agreement. For each method repeat the table in the Skocpol & Somer's article and explain why you think your countries are comparable. This means you will have either 3 countries totally or 4. For example, you might choose to use Slovakia for both the method of agreement and the method of difference, but you would use a different country to compare Slovakia for each method. In that case you will have 3 countries. Or you might decide to have two completely different sets of countries. That is fine. The important thing is that you show you know how to use the two methods. The paper once again should be about	

1,000 words. You should include references both to the article (with page numbers) and to sources that you use for data on the countries that you compare.

Each paper will be pass-fail.

Weeks 4, 5 (Andrej Findor)

Assignment: Cognitive interviews (pass-fail)

Students are expected to conduct 5 cognitive interviews about research materials related to their PhD. projects and report their findings. The written report, including interview script, sample (respondents') characteristics, the original version of research materials, respondents' comments, and revised version of research materials, is due in the semester's examination period.

Weeks 6-13 (Tomáš Profant)

Assignments (pass-fail)

Test from QCA

Test from CDA

Presentation from QCA

Presentation from QCA

Presentations

The evaluation of your presentations will be loosely based on this form:

http://www.ece.mtu.edu/labs/presentation_grade_sheet.htm

In case you fail, you can redo the presentation during the examination period.

Test

The tests from QCA and CDA will consist of three questions. You can retake the tests during the exam period. There will be only one possibility to retake the tests.

Learning outcomes:

The aim of this course is to enable the students to understand the basic elements of the philosophy of science, of writing a PhD. thesis and of the comparative method. The course focuses in greater detail on three particular methods. First, Andrej Findor will explain how to conduct interviews. Second, Tomáš Profant will explain how to do critical discourse analysis and third, he will explain how to do qualitative content analysis.

Class syllabus:

Week 1

Introduction to the course (Tomáš Profant, Andrej Findor, Steven Saxonberg)

Week 2

How to write a good dissertation (Steven Saxonberg)

Week 3

Philosophy of science and comparative methodology (Steven Saxonberg)

Week 4

Interviews and focus groups (Andrej Findor)

Week 5

Cognitive interviews (Andrej Findor)

Week 6

Qualitative Content Analysis (Introduction) (Tomáš Profant)

Week 7

Qualitative Content Analysis (Test and Presentation of the practice) (Tomáš Profant)

Week 8

Critical Discourse Analysis (Introduction) (Tomáš Profant)

Week 9

Critical Discourse Analysis (Test and Presentation of the practice) (Tomáš Profant)

Week 10

Students' presentations (QCA, CDA) (Tomáš Profant)
 Operationalizing assignment due (Steven Saxonberg)
 Week 11
 Students' presentations (QCA, CDA) (Tomáš Profant)
 Week 12
 Discussion of students' papers – operationalizing assignment (Tomas Profant)
 Assignment:
 One discussant per paper. Students read each other's papers and comment on them during the class.
 Week 13
 Discussion of students' papers – operationalizing assignment (Tomas Profant)

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3-UES-340/21	Course title: Seminar on Qualitative Research Methods
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 2 per level/semester: 14 / 28 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: Conditions for passing the course: 1) Attendance and participation (30 %) Students are entitled for maximum 2 absences, which have to be justified according to Code of Studies. Participation points are awarded based on submission of short homework assignments (mostly responses to reading material) and activity in the class discussions. 2) Midterm exam (30 %) The exam will survey students' familiarity with key questions addressed in the first part of the course. It will consist of a set of open-ended questions. 3) Research proposal employing one of the studied methods (40 %). The proposal will be submitted in the final exam period. Detailed instructions will be provided in class. Students are entitled for 1 re-take of assignments. Students are entitled for maximum 2 absences, which have to be justified according to Code of Studies. Rating: A: 91-100 points; B: 81-90 points; C: 73-80 points; D: 66-72 points; E: 60-65 points; Fx: 0-59 points	
Learning outcomes: Learning outcomes: This is an advanced course for PhD students interested in deepening their understanding of diverse approaches to studying European society and politics and current trends in studying international and transnational phenomena. Upon its completion students will gain insight into real-life work of researchers working with a variety of theoretical and methodological frameworks. The course will have an opening and closing session focused on general nuts and bolts of qualitative methods in dissertation research. The ten substantive sessions will consist of presentations and workshop sessions of faculty and researchers across the FSES departments and/or guest speakers from other local and international departments. Every session will start with an opening presentation and continue with interactive discussion. Students are expected to come to class prepared, having done the required reading and being ready to engage in discussion with the lecturers. Besides getting access to a variety of research styles, the students will also train their academic communication skills (constructive criticism, argument-focused debate, etc.).	
Class syllabus:	

Course contents:

(Please note that the schedule is tentative and might change depending on the availability of guest lecturers)

1. Introduction to the course. Role of methodology in doctoral work. Rules, rights and assignments.
2. Field research, critique of the notion of “the field”. Coloniality, ethics and directions in current IR and European studies.
3. Approaches to studying conflict, peace and cooperation. International and transnational processes, actors and institutions.
4. Qualitative methods in advancing political theory and political philosophy. Studying statehood and unrecognized states.
5. Historical and ethnographic methods. Focus on post-socialism.
6. Complexity in the Anthropocene. IR and interdisciplinary conversations on human and non-human agency.
7. Feminist approaches to studying politics. Gender as an analytical lens.
8. Learning to swim in inaccessible and confusing contexts. Interviewing and other conversational strategies.
9. Analysis of audiovisual material. Making sense of words and images.
10. The world at home. Studying global processes in local settings. Urban ethnography and/or participatory action research.
11. Legal research methods. Making sense of proceedings of European courts. Finding and analyzing court documents.
12. Final colloquium

Additional literature will be posted on the course website. Students will work with a variety of sources, including academic books, journal articles and relevant commentary and audio-visual material addressing selected cases. Please note that the reading list will be expanded to reflect current work of guest speakers. Students will have access to a Moodle site with guides on current academic work addressing specific questions and research problems studied in the course.

COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3-UES-330/21	Course title: Social Science Data Analysis in R
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 2 per level/semester: 14 / 28 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements:	
Learning outcomes: Študenti a študentky si osvoja základy analýzy sociálnovedných dát v jazyku R s dôrazom na praktické využitie pre prípravu ich dizertačných projektov. Absolventi a absolventky kurzu budú vedieť vizualizovať a popísať dáta, ktoré sa v sociálnych vedách najčastejšie využívajú (longitudálne, experimentálne, demografické, ekonomické a pod.); analyzovať vzťahy medzi premennými; a reportovať výsledky podľa princípov otvorenej vedy.	
Class syllabus: 1. Úvod a predstavenie kurzu; 2. Práca s jazykom R v prostredí RStudio; 3. Reprodukovateľnosť a otvorená veda, manažment dát; 4. Popis dát a základy vizualizácie v R; 5. Práca so škálami; 6. Ako skúmať kauzalitu 1; 7. Ako skúmať kauzalitu 2; 8. Ako robiť predikcie 1; 9. Ako robiť predikcie 2; 10. "Kvalitatívne dáta" (text) a mapy ; 11. Príprava reprodukovateľných výstupov; 12. Záver kurzu (extra téma podľa požiadaviek a potrieb účastníkov a účastníčok) 13. Záverečná práca
