TABLE OF CONTENTS

1. 419-PhD-A/15 Active participation at the domestic scientific event 4).....	3
2. 418-PhD-A/15 Active participation at the international scientific events 4).....	4
3. 425-PhD-A/15 Activities other (eg. A member of the organizing committee of the conference).....	5
4. 504-PhD-A/15 Analytical Chemistry (state exam).....	6
5. 404-PhD-A/15 Authorship of teaching aids and texts.....	9
6. 506-PhD-A/15 Biochemistry (state exam).....	10
7. 426-PhD-A/15 Citation SCI, SSCI.....	12
8. 427-PhD-A/15 Citation other.....	13
9. 702-PhD-A/15 Clinical Pharmacy (state exam).....	14
10. 405-PhD-A/15 Co-authorship of teaching aids and texts.....	16
11. 410-PhD-A/15 Co-supervisor of the final work of bachelor study.....	17
12. 407-PhD-A/15 Co-supervisor of the work to attend to Student's scientific conference.....	18
13. 429-PhD-A/15 Completion of a defined stage of the scientific program of the PhD student.....	19
14. 300-PhD-A/15 Dissertation Work Thesis Defense (state exam).....	20
15. 430-PhD-A/15 Dissertation writing, if was taken to the defense.....	21
16. 400-PhD-A/15 Foreign language exam.....	22
17. 402-PhD-A/15 Individual study of the scientific literature.....	23
18. 424-PhD-A/15 Involvement in the resolution of another research project.....	24
19. 423-PhD-A/15 Obtaining of "Grant FaF UK for young scientists" (Co- investigator of grant 5).....	25
20. 422-PhD-A/15 Obtaining of "Grant FaF UK for young scientists" (Principal Investigator 5).....	26
21. 421-PhD-A/15 Obtaining of "University Grant for Young Researchers" (Co - investigator of grant) 5).....	27
22. 420-PhD-A/15 Obtaining of "University Grant for Young Researchers" (Principal Investigator 5).....	28
23. 406-PhD-A/15 Participation in the management of the thesis in Master's degree.....	29
24. 403-PhD-A/15 Passing other subject of the offer 2) of other university faculties.....	30
25. 401-PhD-A/15 Passing prescribed doctoral lectures and seminars 1).....	31
26. 411-PhD-A/15 Passing the Dissertation exam.....	32
27. 409-PhD-A/15 Pedagogical activities - seminars.....	33
28. 408-PhD-A/15 Pedagogical activity - exercises.....	34
29. 701-PhD-A/15 Pharmaceutical Botany (state exam).....	35
30. 500-PhD-A/15 Pharmaceutical Chemistry (state exam).....	36
31. 810-PhD-A/15 Pharmaceutical Technology (state exam).....	38
32. 800-PhD-A/15 Pharmacology (state exam).....	40
33. 703-PhD-A/15 Plant Molecular Biology (state exam).....	42
34. 428-PhD-A/15 Presentation at the conference of young scientists.....	43
35. 417-PhD-A/15 Professional publications in domestic journal.....	44
36. 416-PhD-A/15 Professional publications in international journals.....	45
37. 900-PhD-A/15 Retail Pharmacy and Social Pharmacy (state exam).....	46
38. 415-PhD-A/15 The original publication in non current contents domestic journals or conference proceedings.....	48
39. 414-PhD-A/15 The original publication in non current contents international journals or conference proceedings.....	49

40. 413-PhD-A/15	The original publication in peer-reviewed domestic journal.....	50
41. 412-PhD-A/15	The original publication in peer-reviewed international journals.....	51

COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/419-PhD-A/15	Course title: Active participation at the domestic scientific event 4)
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: distance learning	
Number of credits: 4	
Recommended semester:	
Educational level: III.	
Prerequisites:

STATE EXAM DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/504-PhD-A/15	Course title: Analytical Chemistry
Number of credits: 0	
Educational level: III.	
Course requirements: Successful completion of the exam.	
Learning outcomes: After completing the course, the doctoral student will gain advanced theoretical knowledge in the use of modern instrumental analytical methods chromatographic, electromigration, electrochemical, spectral (MS, NMR, IR, UV-VIS, Fluorescent) and nuclear analytical as well as multidimensional techniques (SPE-HPLC, HPLC- HPLC, CE-CE, MS / MS and combinations thereof) in pharmaceutical and biomedical analysis. An integral part of the acquired knowledge are methods of preparation of pharmaceutical and biological samples as well as environmental samples by conventional (off-line) and advanced (on-line) techniques for the mentioned analytical methods. In connection with the synthesis and structural analysis of (i) new molecules as potential drugs or drug carriers for innovative dosage forms as well as (ii) innovative materials (nanostructures) as part of analytical systems and dosage forms, the doctoral student will gain knowledge and skills also for other specific approaches and techniques such as Raman spectroscopy on-line coupled with microwave synthesis, semi-preparative chromatography, electron microscopy, and light scattering-based structural analysis techniques.	
Class syllabus: Course contents: Analysis of organic bioactive substances, levels of drugs and their metabolites, degradation products and biomarkers of diseases in biological materials (blood, urine, tissues, etc.). Analysis of new organic molecules (potential drugs and drug carriers for innovative dosage forms) in reaction mixtures from organic syntheses and isolated products. Inorganic analysis of biogenic and toxic elements in individual components of the environment (air, soil, herbal drugs, water). Bioinorganic analysis of new metal complexes in reaction mixtures from organic syntheses and isolated products. Use of modern instrumental techniques: <ul style="list-style-type: none"> • chromatographic (HPLC, GC) and electromigration separation methods (CZE, ITP, IEF, EKC) and their mutual combinations (2D HPLC, 2D / 3D CE) with integrated sample pretreatment for separation of complex (multicomponent) mixtures of substances • spectral methods UV-VIS, FS and LIF (for rapid quantitative evaluation of substances in simple matrices), MS, MS / MS, NMR, IR, Raman spectroscopy, EPR, XRC / XRD (for detailed structural analysis molecules and their complexes) • combined separation and spectral methods (LC-UV / MS, CE-UV / LIF / MS, etc.) to identify and determine trace levels of analytes in simple and complex (multicomponent) matrices (biological samples, dosage forms, synthetic reaction mixtures, isolated products from reaction mixtures) 	

- electrochemical methods with conventional and advanced sensors (biosensors) for rapid determination of selected substances in simple and complex matrices
- radioanalytical methods: radionuclide X-ray fluorescence analysis (RRFA) for direct determination of elements in solid materials
- methods of analysis of light scattering and electron microscopy for the analysis of nanostructures (shape, size/dimensions, distribution of nanoparticles)
- methods of (semi) preparative chromatography for separation and isolation of selected components from reaction mixtures

Instrumental analytical methods:

Principle of the method, experimental setup (instrumentation), methods of qualitative and quantitative evaluation, analytical and application potential. Optimization, validation and application of methods.

Electrochemical methods:

Potentiometry

Voltammetry (DPV, SWV, CV)

Ion selective electrodes

Biosensors

FIA

Separation chromatographic analytical methods:

Planar and column chromatography

High performance liquid chromatography.

Ion exchange chromatography.

Gas chromatography.

Multidimensional techniques (2D HPLC, SPE-HPLC)

Combining HPLC with advanced detection techniques (HPLC-MS, HPLC-MS / MS)

Separation analytical methods of electromigration:

Electrophoresis in planar arrangement, electromigration techniques in capillary arrangement.

Capillary zone electrophoresis (CZE).

Capillary isotachopheresis (ITP).

Isoelectric focusing (IEF).

Electrokinetic chromatography (EKC).

Capillary gel electrophoresis (CGE).

Capillary electrochromatography (CEC).

Multidimensional techniques (2D CE, 3D CE)

CE coupling with advanced detection techniques (CE-LIF, CE-MS, CE-MS / MS).

Separation preparative chromatographic and electromigration methods:

(semi) preparative liquid chromatography.

Preparative isotachopheresis.

Spectral analytical methods:

Emission spectral analysis

Fluorescence analysis

Atomic absorption spectrophotometry

Molecular absorption spectroscopy in the visible and ultraviolet region of the spectrum

Infrared spectroscopy

Raman spectroscopy.

Mass spectrometry.

Nuclear magnetic resonance.

Non-spectral optical methods:

Refractometry.

<p>Polarimetry.</p> <p>X-ray crystallographic and diffraction analysis (XRC, XRD).</p> <p>Electron paramagnetic resonance (EPR).</p> <p>Detectors:</p> <p>Optical spectrometric detectors - absorption, fluorescence, MS, non-spectrometric</p> <p>Electrochemical detectors,</p> <p>Radiometric detectors</p> <p>Nuclear analytical methods:</p> <p>Nuclear analytical indicator methods - radiochromatography, isotope dilution analysis, radioimmunoassay and their use.</p> <p>Nuclear analytical methods based on natural radioactivity.</p> <p>Activation analysis.</p> <p>Nuclear analytical methods - non-activation interaction analysis.</p> <p>Beta-dispersion analysis.</p> <p>Radionuclide X-ray fluorescence analysis.</p> <p>Identification of β and γ radiation.</p> <p>Other analytical methods:</p> <p>Methods based on light scattering analysis.</p> <p>Electron microscopy.</p> <p>Statistical processing of analytical results and validation of analytical methods and procedures:</p> <p>Validation parameters (precision, accuracy, linearity, sensitivity, LOD, LLOQ, LOQ, selectivity, robustness, stability, recovery, matrix effect, sample throughput, carry over).</p> <p>Testing statistical hypotheses.</p> <p>Validation protocols (ICH, FDA).</p>
State exam syllabus:
<p>Recommended literature:</p> <p>Mikuš, P., Maráková, K.: HYPHENATED ELECTROPHORETIC TECHNIQUES IN ADVANCED ANALYSIS, Bratislava, KARTPRINT, 2012. 217 s.</p> <p>Mikuš, P., Hanko, M., Piešťanský, J., Maráková, K., Dokupilová, S., Mikulová, M.: Analytical chemistry: Instrumental analysis. STATE EXAM DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/506-PhD-A/15	Course title: Biochemistry
Number of credits: 0	
Educational level: III.	
Course requirements: Successful completion of the exam.	
Learning outcomes: After completing selected chapters in biochemistry, the PhD.-student can manage (i) basic biochemical and molecular-biological analyzes, (ii) methodical procedures related to protein analysis techniques, and (iii) enzymological studies on cellular and molecular levels. The student will obtain knowledge about metabolic pathways and their regulation at the level of (i) signaling molecules, (ii) localization at a subcellular level, and (iii) monitoring of gene expression, which creates the precondition for studying the drug mechanism of individual pharmacotherapeutic groups.	
Class syllabus: # Dynamic concept of properties and functions of the biological system. # DNA, RNA: composition, bonds and stability, biological significance. # Biomembranes, respiratory chain, generation of energy. # Metabolism of nutrients – interrelationship, thermodynamic aspect, energetical aspect, biological oxidations. # Enzymology of nutrient metabolism – catabolism and anabolism – carbohydrates, simple and complex lipids, amino acids, nucleotides, proteins. # Enzyme kinetics. # Basic issues of xenobiochemistry and its attributes. # Integration of metabolism in terms of physiological and pathological conditions of the organism. # Experimental techniques with animal and plant cell cultures. # Plant biochemistry: nitrogen metabolism, enzymology of secondary metabolites, signalling cascades.	
State exam syllabus:	
Recommended literature: D. Voet, J. Voet: Biochemistry, 4th ed., John Wiley & Sons, 2010. G. Litwack: Human Biochemistry, 1st ed., Elsevier, 2017. Selected chapters will be provided in electronic form.	
Languages necessary to complete the course: English language	
Notes: Lecturers: doc. Mgr. Andrea Bilková, PhD.; doc. Mgr. Martina Hrčka Dubníčková, PhD.; doc. PharmDr. Marek Obložinský, PhD.; RNDr. František Bilka, PhD.; Ing. Ludmila Pašková, PhD.

STATE EXAM DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/702-PhD-A/15	Course title: Clinical Pharmacy
Number of credits: 0	
Educational level: III.	
Course requirements: Passing of the exam.	
Learning outcomes: The PhD students will expand and deepen their expertise of the latest knowledge of clinical pharmacy in connection with the effects of medicines and with the reduction of pharmacotherapeutic risk, medication errors and pharmacotherapeutic problems. Students will learn how to apply the acquired knowledge in real-world practice at various levels related to pharmacotherapy in cooperation with physicians.	
Class syllabus: The focus is on one or more of the following areas of clinical pharmacy: <ul style="list-style-type: none"> - pre-clinical and clinical evaluation of new medicines, - regulatory measures in this area in relation to the registration of medicinal products, - clinical pharmacokinetics, - symptomatology and pharmacotherapy of acute and chronic diseases, - the effect of the disease process on the effects of medicines, - monitoring of pharmacotherapy and drug levels, - interpretation of laboratory results with respect to pharmacotherapy, - the most serious pharmacotherapeutic problems related to - adverse drug reactions, including allergic drug reactions, - drug interactions, - medication errors, - patient safety during treatment, - pharmacovigilance, - rational use of medicines in high-risk groups of patients, - compliance, adherence to therapy and concordance, - oral and parenteral nutrition, - lifestyle medicines. 	
State exam syllabus:

STATE EXAM DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/701-PhD-A/15	Course title: Pharmaceutical Botany
Number of credits: 0	
Educational level: III.	
Course requirements: Successful passing of the exam	
Learning outcomes: After successful completion of the course, the student should know the anatomical and morphological structure of plant organs with special emphasis to important medicinal plant species, know selected plant species with medicinal effects and classify them within the botanical system.	
Class syllabus: Plant systematics and taxonomy of pharmaceutically important plant species. Plant cytology - morphological and functional features of the cell, cell inclusions, Identification features of pharmaceutically important plants. Anatomical structure and tissue types according of developmental stage and function. Specific features of pharmaceutically important species.	
State exam syllabus:	
Recommended literature: Siphunov A. 2020: Introduction to botany.	
Languages necessary to complete the course: English language	
Notes: Lecturer: doc. Ing. M. Habán, PhD.

STATE EXAM DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/500-PhD-A/15	Course title: Pharmaceutical Chemistry
Number of credits: 0	
Educational level: III.	
Course requirements: Successful passing of the exam	
Learning outcomes: Expansion and intensification of knowledge from pharmaceutical chemistry that can be used by the student to formulate scientific hypotheses to create a basis for the analytical part of the dissertation and to formulate conclusions following the obtained results.	
Class syllabus: Pharmaceutical/Medicinal Chemistry is a science unto itself, a central science positioned to provide a molecular bridge between basic science of biology and clinical science of medicine (analogous to chemistry being the (central) science between traditional disciplines of biology and physics). From a very broad perspective, a drug design may be divided into two phases fundamental concepts about: a) drugs, receptors, and drug–receptor interactions; b) drug–receptor interactions applied to human disease. Pharmaceutical/Medicinal Chemistry is interdisciplinary, drawing very suitably on Theoretical Chemistry, Organic Chemistry, Analytical Chemistry, Molecular Biology, Pharmacology, and Biochemistry. Despite these complexities, Pharmaceutical/Medicinal Chemistry has its own clear line – the design and discovery of drug molecules with a comprehensive and precise definition and characterization of their properties, taking into account i) structural integrity of the drug molecules (in pharmaceutical, pharmacokinetic and pharmacodynamic phase, respectively), ii) their structural fragments (pharmacophore, toxicophore, metabophore, biophore, etc.; interchangeable bioisosteres), iii) structural properties, iv) physicochemical features (solubility, surface activity, acid-base and lipohydrophilic properties, stability), v) shape properties (geometric, conformational, topological, steric), vi) stereochemical properties (optical isomers, enantiomers, geometric isomers), estimation of binding affinities (in vitro ligand binding assays) and impact of the drugs - enantiomers and isomers to relevant biological targets), vii) electronic properties. Following that knowledge, structure–biological activity relationships and/or structure-pharmacokinetics relationships and/or structure-toxicity relationships are comprehensively investigated (SAR, STR, QSAR).

STATE EXAM DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/810-PhD-A/15	Course title: Pharmaceutical Technology
Number of credits: 0	
Educational level: III.	
Course requirements: final exam	
Learning outcomes: By passing the course, the PhD. student will have a complex theoretical knowledge of drugs as dispersion and application systems in terms of theoretical and practical preparation of innovative dosage forms.	
Class syllabus: Pharmaceutical preparations are of a dosage (application) form which depends on the means of administration and coexistence of relevant drugs and excipients. Pharmaceutical technology (galenics) deals with composition, formulation, production, evaluation, and quality assurance of individually prepared and manufactured pharmaceutical preparations. It studies conditions for formulation of drugs and excipients into pharm. preparations, rules governing these processes, relations of the preparation with the effect of contained drugs. The subject of the study are these areas: <ul style="list-style-type: none"> - Pharm. preparations as systems composed of drugs and excipients (constitutive, stabilizing, corrective, etc.), conditions for coexistence of components in pharm. preparation. - Procedures and devices for preparation and manufacturing of pharm. preparations - Evaluation and quality assurance of pharm. preparations in terms of composition, technology, structure - Relations between the pharm. preparation and bioavailability of administered drugs - Stability of pharm. preparations and its possible ensuring - Containers 'materials, technique for pharm. preparations 'containers, study of interactions between containers and drugs / excipients Current research is oriented to drug carriers (polymeric, lipid - liposomes) in the role of drug delivery systems as nanoparticles. It begins with the synthesis of the carrier, incorporation of the drug, continues with formulation of dosage form, stability studies of formulated particles and in vitro drug release study. At the end of this difficult process the biologic activity and in vivo bioavailability are evaluated in cooperation with other departments/institutions. Also, nanodispersion systems as e.g., micro- and nanoemulsions are studied, especially related to low soluble drugs (e.g., terbinafine, minoxidil, indomethacin, tretinoin) intended for topical application with local or systemic effect e.g., also using the mechanisms of transdermal passage. In the preparation of these systems, various types of polymers (e.g., chitosan, thermosensitive polymers) and specific excipients are used to create a specific structure of given formulation with improved properties (e.g., better bioadhesion, stability, capacity to release the low soluble drugs, improved permeation, and penetration to target tissues in required concentration).

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/703-PhD-A/15	Course title: Plant Molecular Biology
Number of credits: 0	
Educational level: III.	
Course requirements: Successful completion of the exam.	
Learning outcomes: After completing the course, the PhD. student will gain deeper and comprehensive knowledge about the flow of genetic information and the possibilities of its influence, as well as about the cell signaling systems with respect to the mechanisms of drugs action that have plant origin. The student will obtain informations about the possibilities of preparing of new drugs by modern biotechnological procedures based on techniques using recombinant DNA. The student will get acquainted with different types of cloning and expression vectors and their application in the production of specific biopharmaceuticals produced by plants or by plants cell cultures.	
Class syllabus: Flow of genetic information in plant cells – possibilities of drug influence: replication, transcription, translation and post-translational modifications. Mutations and repair mechanisms. Intracellular compartments in plant cells and protein transport. Principles of plant cell communication. Protein kinase networks and signal processing integration. Transport processes in the plant cell. Fundamentals of recombinant DNA technology. Principles of gene manipulation. Use of biotechnological processes in the production of secondary metabolites. Preparation of recombinant DNA, cloning and expression vectors, plasmids and bacteriophages, DNA and cDNA libraries, hybridization. Preparation and use of transgenic plants, biopharmaceuticals produced by transgenic plants and cell cultures, GMO plants.

STATE EXAM DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Pharmacy	
Course ID: FaF/900-PhD-A/15	Course title: Retail Pharmacy and Social Pharmacy
Number of credits: 0	
Educational level: III.	
Course requirements: Successful completion of the exam.	
Learning outcomes: Social pharmacy - pharmacy enables the third-level doctoral student to develop theoretical knowledge and apply their skills to the social and economic aspects of the position of drugs and medicines in society. The necessary content is language training, enabling to confront the state and knowledge of individual aspects of medicine and drug in society abroad.	
Class syllabus: Theoretical problems of pharmacy and medicines in society - characteristics of medicines, ensuring the way and safety of medicines from their origin to use in the individual patient, 2. The share of pharmacy in social and health policy - WHO pharmaceutical programs, 3. Drug policy - legislation, system application, management systems, marketing application, consumption and need for drugs and medicines, 4. Pharmaceutical and pharmaceutical care - research, production, control of drugs and medicines, dispensing and provision of information, implementation of good manufacturing, distribution and pharmaceutical practice, 5. Pharmaceutical informatics - content, scope, programs and their use, drug compliance and abuse, self-treatment and its pharmaceutical aspects 6. Drug and society - position and importance of drug, pharmacoepidemiology, compliance, non-compliance, consumption and need for drugs, pharmacoconomics, pharmaceutical informatics, 7. The position of pharmacy in society and healthcare - social, health and drug policy, management and marketing of pharmaceutical activities, legislative aspects of drug policy implementation, 8. History of pharmacy and museology - the position of the drug in the various stages of social development.
