Course requirements: During the semester: active participation (10 points), home works (20 points), tests during the semester (20 points); Final assessment: comprehensive test (50 points); Grading A: 100 - 92, B: 91 - 84, C: 83 - 76, D: 75 - 68, E: 67 - 60, FX: 59 - 0 pts. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Students will be informed on the basics in logical analysis of natural language as condition for successful studying of professional texts and on arguments contained in them. They need to comprehend basic syntactical and semantical aspects of natural language and to be acquainted with basics of propositional and predicate logic as well as with rules of valid inference. They will be acquainted with: tools for compacting texts, obtaining practice in their reconstruction; non-deductive forms of inference and the most known forms of eristic arguments; basic knowledge related to theory of definition and theory of questions and answers.	
Class syllabus: Language and its functions; language as codification of meaning. Singular and general expressions (properties and relations). Subject and predicate of sentence. Syntactical structure of atomic and molecular terms. Modalities in language, kinds and their function; intuitive understanding of state of affairs. Concept vs. representation, expressing concepts by language and relations among them. Semantically conditioned relations among terms. Modifiers and kinds of them; fuzzy terms. Argumentation, arguments; structure of arguments; deductive arguments. Propositional logic – syntax and semantics. Principle of compositionality for propositions. Propositional connectives in natural language. Propositional logical implication – basic rules of correct inference. Inference in natural language. Expressing of necessary and sufficient condition (promises, legal regulations, causes). Tools for text compacting. Predicate logic. Expressing generality in natural language. Application of basic predicate logic rules to inference in natural language. Abductive inferences and searching for the best explanation. Argument fallacies and eristic arguments. Definitions. Questions; presuppositions and false questions; types of answers.

Number of credits: 5	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: Student work has been assessed based on 6 components: in-class activity, 2 teaching demonstrations, peer assessment of demonstrated methods, reflective essay on knowledge and skills developed during the course. Assessment scale is the following: A: 91 and more B: 90 - 81 C: 80 - 71 D: 70 - 61 E: 60 - 51 Fx: 50 – 0 Scale of assessment (preliminary/final): 70/30	
Learning outcomes: At the end of the term student is expected to demonstrate the following knowledge and skills: Define - using own words – the foundational terminology in education/pedagogy, namely: education, upbringing, teaching and learning, training, pedagogy and its disciplines, development, socialisation, knowledge, skills, habits, competences, authority, learning outcomes, educational aims, methods, forms and components of education, active learning, student-centred learning, internationalisation of (higher) education, assessment and feedback, peer learning, peer assessment and observation protocol. Based on their individual interests, students may moreover include their own terms into this list. List and describe the tools of active learning Apply two methods of active learning: demonstrate a lesson to help students learn one or more assigned terms Evaluate the effectiveness of demonstrated active learning methods Self-assess the learning outcomes you attained in this course	
Class syllabus: 2. Foundational terminology, categories of educational sciences 3. Education/pedagogy as a discipline exploring education 4. Institutionalisation of education 5. Schooling and educational system 6. Learning and teaching in higher education: active learning, student-centred learning, internationalisation 7. Assessment and feedback, peer learning 8. Peer assessment	

9. Class observation and observation protocol 10. Teaching demonstration, part I. 11. Teaching demonstration, part II. 12. End-of-the term colloquium

Educational level: I.	
Prerequisites:	
Course requirements: The output of the completed course is during the teaching part (continuously): - Elaboration of continuous tasks and assignments max. 10 b. - Continuous test of knowledge and skills max. 20 b. - Development of a quantitatively oriented research project max. 30 b. In the trial period (at the end): - Final test of knowledge and skills max. 40 b. TOTAL max. 100 points A minimum of 60% pass is required to successfully complete the course. CLASSIFICATION: A - 91 - 100 (excellent - excellent results), B - 80 - 90 (very good - above average standard), C - 70 - 80 (good - normal reliable work), D - 60 - 70 (satisfactory - acceptable results), E - 50 - 60 (sufficient - the results meet the minimum criteria), Fx - 0 - 50 (insufficient). The teacher accepts max. 2 absences with proven documents. The exact date of the mid-term evaluation will be announced at the beginning of the semester. Exam dates will be published via AIS no later than the last week of the semester. Scale of assessment (preliminary/final): = 60/40.	
Learning outcomes: Upon successful completion of the course, students are able to explain in their own words the basic methodological concepts, methods of collecting research data, stages and principles of quantitative and qualitative pedagogical research. They are able to name and describe individual procedures of collection and empirically correct analysis of research data and procedures of their statistical evaluation. They can explain the methodological consequences of individual methods of compiling a research sample. They are able to design their own quantitatively oriented educational research, survey, or teacher action research and describe the procedures of independent research efforts. They can apply the acquired knowledge in the independent development of a research project.	

Class syllabus:

1. Pedagogical research - definition of basic terms: cognition, science in human cognition, scientific theory, research, pedagogical research, theory, practice, method, methodology. Relation of pedagogical research to practice (R&D). Research - action research - evaluation.
2. Planning, organization and implementation of field pedagogical research: Stages of research work. Research plan and diary of a pedagogical researcher. Research information preparation. Ethics in research work.
3. Thinking about a research problem: The difference between a topic and a research problem. Thinking and judgment of a researcher. Selecting the essential and distinguishing partial phenomena from the general background. Preparation of a research project.
4. Qualitative and quantitative research design: Comparison of qualitative and quantitative research, their philosophical background, goals, focus and procedures in the collection and processing of research data.
5. Quantitative oriented pedagogical research and its main phases: Determining the research problem. Variables and hypotheses and their place in pedagogical research. Hypothesis testing in scientific research. Measurement and quantification in pedagogical research.
6. Methods of research sample selection and determination of research data collection methods: research method, research tool, validity, reliability and correlation coefficient of research tool. Selection, study and preparation, or creation of tools for collecting research data.
7. Methods of research data collection: Observation, questionnaire, assessment scales, interviews, tests of knowledge and skills, sociometry, semantic differential and pedagogical experiment
8. Processing of obtained research data: Preparation for analysis, Analysis and interpretation of obtained research data (verbal or numerical). Discussion of research conclusions. Making recommendations for practice.
9. Computer data analysis: MS Excel, Statistics and others.

Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 5.	
Educational level: I.	
Prerequisites:	
Course requirements: Continuous during the semester: homework (20 points), midterm test during the semester (30 points); Final assessment: summative test (50 points). Violation of academic ethics may result in the nullification of points earned in the respective assessment item. Grading scale: A: 100-93 points; B: 92-85 points; C: 84-77 points; D: 76-69 points; E: 68-60 points; Fx: 59-0 points. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Graduates of the course understand the key categories of scientific methodology and empirical research in the social sciences. They are able to apply basic conceptual methods as well as methods of data collection and analysis to solve research problems. They can distinguish between different types of research and research designs and evaluate their adequacy for achieving research objectives. They are able to apply their knowledge and skills in the preparation of final theses in the profile of their discipline.	
Class syllabus: Science and its distinctive features. The language of science. Conceptual methods of science. Empirical methods of science. Social science methods: questionnaire method; interview method; textual analysis, etc. Research design and types of research. Number of credits: 5	
Recommended semester: 6.	
Educational level: I.	
Prerequisites:	
Recommended prerequisites: This subject is related to the course Aesthetic Theory and develops thinking about art in the sense that it presents art as a language, as a modelling system that serves as a means of communication between the author and the perceiver. In addition, the basic concepts that specify the sign nature of the language of art are gradually explicated.	
Course requirements: Violation of academic ethics will be punished, and the student will lose all the received points in the relevant assessment. During the semester, each student will present a paper; students may receive a maximum of 30 points for the preparation and presentation of the paper, and must receive a minimum of 10 points to be admitted to the examination. An oral examination follows the end of the semester, for which a student may obtain a maximum of 70 points. The instructors will accept a maximum of 2 absences with documented evidence.
