Grading scale: A: 100 - 93 pts; B: 92 - 85 pts; C: 84 - 77 pts; D: 76 - 69 pts; E: 68 - 60 pts; Fx: 59 - 0 pts. Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> The graduate of the course (PhD student) is able to identify the main elements of scientific research, such as "research problem", "hypothesis", "research study design", "operationalization", "testable implications", "data collection and analysis", "hypothesis testing and evaluation", etc. They can use them to critically analyse scientific and scholarly work and to structure their own research. The student is familiar with basic conceptual and empirical methods, can critically evaluate the conditions for their adequate application in research, and can identify ethical issues related to the planning, implementation and presentation of research. Apply the acquired knowledge and skills in the design and analysis of their own dissertation project and research.	
<b>Class syllabus:</b> <ol style="list-style-type: none"> <li>1. Methodological features of science</li> <li>2. Scientific methods: conceptual, empirical and complex methods</li> <li>3. Types and structure of research</li> <li>4. Research design</li> <li>5. Arguments and reasoning</li> <li>6. Causality and its place in empirical research</li> <li>7. <b>Learning outcomes:</b> The courses are closely focused on discussions related to dissertations. Students will be able to discuss and critically evaluate research works from the different fields of psychology and they will improve their argumentation skills.	
<b>Class syllabus:</b> The course has the character of a panel discussion of doctoral students with several teachers working at the department. It is realized in blocks. It has the character of free professional discussions for the doctoral student's dissertation, who together with the teacher is also the moderator of this seminar. The doctoral student will acquaint in detail team of colleagues about the project of his / her dissertation thesis and informs at what stage of its creation he / she is located. All seminar participants will receive relevant literature on the topic and bearing points of the discussion in advance. Seminar participants are required to show professional readiness, providing feedback on the presentation and activity at this seminar. External lecturers, primarily from other fields, are also part of the doctoral seminars (biomedicine, speech therapy, psychiatry, etc.) as well as external psychologists. These lecturers bring various topics, which may also be indirectly related to the focus of the study. The goal is extension of students' knowledge as well as research methods and procedures in related scientific disciplines.

\* Note: We chose the American Psychological Association (APA) citation format because it is dominant within international citing standards not only for the field of psychology but also for other social and behavioral sciences. From the beginning, we consistently lead students to writing according to APA standards, which concerns not only citations but also the text structure, table and graph formats and other requirements. Foreign departments in Europe and the USA proceed in the same way.
