Course ID: FiF/A-dSZ-004/13	Course title: Logical Semantics and Reasoning
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning, distance learning	
Number of credits: 6	
Recommended semester: 2., 4.	
Educational level: III.	
Prerequisites:	
Course requirements: Continuous during the semester: active participation (50 points), home preparation (50 points); Final grade: summative test (60 points); Grading scale: A: 100-91 points; B: 90-81 points; C: 80-76 points; D: 75-70 points; E: 69-60 points; Fx: 59-0 points. Violation of academic ethics may result in the cancellation of the points earned in the respective grade item. Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The students deepened their knowledge of the possibilities of applying logic in the field of semantic analysis of scientific and professional texts; they became familiar with the principles of logical semantics; they became familiar with linguistic phenomena that violate the principles of logical semantics and linguistic phenomena that distort these principles; and they became familiar with the rules for the creation and reconstruction of condensed texts. Students learned methods of interpreting texts and improved their argumentation and discussion skills in the practice of their discipline.	
Class syllabus: 1. Traditional semantics: concept name versus concept; concept versus idea associated with the concept name; content and scope of the concept, conceptual features, scope relations of concepts. 2. Principles of logical semantics (LS) for the analysis of natural language - p. effective communication, p. objectivity of the meaning of an expression, p. competent language user (practical mastery of the rules of language, basic ability to reason (logically), knowledge base - knowledge of the core lexis of the language, the range of analytical truths and empirical truths that are relevant to the text being analysed, p. of complete meaning, p. of compositionality (compositionality) of meaning, p. of predication and supposition de dicto and de re, Parmenides' (Frege's) principle of what a sentence is about, p. of substitutability (Leibniz's principle of salva veritate), p. of possibilism (anti-actualism). 3. Theories of meaning (TM): extensional vs. intensional TM; the de dicto and de re substitution of expressions; logical vs. linguistic synonymy of expressions. Hyperintentional TM (epistemic and doxastic attitudes; types of contexts) and structuration of meanings of expressions - meaning of an expression as a structured procedure. 4. Interaction of logical operators and vectors of condition (and its	

facticity or irreality), time and relevance (factual, hypothetical and counterfactual conditionals; deductive and abductive predication and retrodiction). 5. Violation of LS principles: idioms, metaphors, oxymorons, privative modifiers. Distortion of the validity of LS principles in condensed text: sentence elision (entymeme), word and phrase elision, intra-textual referencing; rules for the formation of elisions and references, and rules for the reconstruction of condensed and unconstrained texts. Argumentation and discussion in practice: deductive, abductive, persuasive, heuristic. Reasoning versus explanation.
