COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.Dek/A-dSZ-013/20	Course title: Information Resources and Communication in Science
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning, distance learning	
Number of credits: 6	
Recommended semester: 1., 3.	
Educational level: III.	
Prerequisites:	
Course requirements: Assessment: 4 assignments during the semester, 5 points each, minimal condition for a successful finish of the course – to complete and hand in at least 3 of them and obtain at least 11 points. Grading scale: 0-59%-FX, 60-67%-E, 68-75%-D, 76-83%-C, 84-91%-B, 92-100%-A The teacher will accept a maximum of two absences in case they are supported with relevant documentation. Violation of academic ethics will be punished, and the student will lose all the received points in the relevant assessment. Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The students will get acquainted with internal and external information resources (what, where and how is accessible at Comenius university, or elsewhere), with the system of working with these resources and the possibilities of their use in university research and education. Students will also get informed about principal Slovak and foreign grant schemes and calls for application, about the process of submitting project application and about the procedures how the grant finances should be spent in the institutional conditions of the Faculty of Arts, Comenius University in Bratislava (FiF UK). They will learn about the working procedures within scholarly journals and peer review principles, as well as about fundamental administrative processes at FiF UK which have a direct connection with the research activities of a PhD student.	
Class syllabus: Basic information on organization of libraries at Comenius University (CU). Databases produced by CU. Orientation in the CU union online catalogue. Database of publication outputs. Central register of publication outputs of the Slovak Republic. KIS3G project – union catalogue of Slovak libraries. Union catalogue of Slovak periodicals. Project of the Centre of science and technical information (CVTI SR) – NISPEZ. Abstract databases. Fulltext databases. Scientometrics databases. CU directive on publications. Categories of publications and references. Indexed (Web of Science, Scopus) and Current-Contents journals. Reference managers. Financing of science and research in Slovakia, relevance of grant schemes and participation of PhD students in grant projects. The most significant grant schemes in Slovakia and abroad. How to write a grant application (Grant of	

CU young researchers, VEGA scheme). Project cycle and spending project finances. Science and research journals: how to identify the top quality. Communication with the journal and peer-review.

COURSE DESCRIPTION

Academic year: 2021/2022	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF/A-dSZ-004/13	Course title: Logical Semantics and Reasoning
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning, distance learning	
Number of credits: 6	
Recommended semester: 2., 4.	
Educational level: III.	
Prerequisites:	
Course requirements: Continuous during the semester: active participation (50 points), home preparation (50 points); Final grade: summative test (60 points); Grading scale: A: 100-91 points; B: 90-81 points; C: 80-76 points; D: 75-70 points; E: 69-60 points; Fx: 59-0 points. Violation of academic ethics may result in the cancellation of the points earned in the respective grade item. Scale of assessment (preliminary/final): 100/0	
Learning outcomes: The students deepened their knowledge of the possibilities of applying logic in the field of semantic analysis of scientific and professional texts; they became familiar with the principles of logical semantics; they became familiar with linguistic phenomena that violate the principles of logical semantics and linguistic phenomena that distort these principles; and they became familiar with the rules for the creation and reconstruction of condensed texts. Students learned methods of interpreting texts and improved their argumentation and discussion skills in the practice of their discipline.	
Class syllabus: 1. Traditional semantics: concept name versus concept; concept versus idea associated with the concept name; content and scope of the concept, conceptual features, scope relations of concepts. 2. Principles of logical semantics (LS) for the analysis of natural language - p. effective communication, p. objectivity of the meaning of an expression, p. competent language user (practical mastery of the rules of language, basic ability to reason (logically), knowledge base - knowledge of the core lexis of the language, the range of analytical truths and empirical truths that are relevant to the text being analysed, p. of complete meaning, p. of compositionality (compositionality) of meaning, p. of predication and supposition de dicto and de re, Parmenides' (Frege's) principle of what a sentence is about, p. of substitutability (Leibniz's principle of salva veritate), p. of possibilism (anti-actualism). 3. Theories of meaning (TM): extensional vs. intensional TM; the de dicto and de re substitution of expressions; logical vs. linguistic synonymy of expressions. Hyperintentional TM (epistemic and doxastic attitudes; types of contexts) and structuration of meanings of expressions - meaning of an expression as a structured procedure. 4. Interaction of logical operators and vectors of condition (and its	

facticity or irreality), time and relevance (factual, hypothetical and counterfactual conditionals; deductive and abductive predication and retrodiction). 5. Violation of LS principles: idioms, metaphors, oxymorons, privative modifiers. Distortion of the validity of LS principles in condensed text: sentence elision (entymeme), word and phrase elision, intra-textual referencing; rules for the formation of elisions and references, and rules for the reconstruction of condensed and unconstrained texts. Argumentation and discussion in practice: deductive, abductive, persuasive, heuristic. Reasoning versus explanation.

Course ID: FiF/A-dSZ-003/13	Course title: Methodology of Science
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning, distance learning	
Number of credits: 6	
Recommended semester: 2., 4.	
Educational level: III.	
Prerequisites:	
Course requirements: Active participation in class and continuous problem solving: 50 points. Presentation of the methodological structure of the dissertation project in the form of a seminar paper (10-12 pages): 50 points. Violation of academic ethics may result in the cancellation of the points earned in the relevant assessment item. Grading scale: A: 100 - 93 pts; B: 92 - 85 pts; C: 84 - 77 pts; D: 76 - 69 pts; E: 68 - 60 pts; Fx: 59 - 0 pts. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: The graduate of the course (PhD student) is able to identify the main elements of scientific research, such as "research problem", "hypothesis", "research study design", "operationalization", "testable implications", "data collection and analysis", "hypothesis testing and evaluation", etc. They can use them to critically analyse scientific and scholarly work and to structure their own research. The student is familiar with basic conceptual and empirical methods, can critically evaluate the conditions for their adequate application in research, and can identify ethical issues related to the planning, implementation and presentation of research. Apply the acquired knowledge and skills in the design and analysis of their own dissertation project and research.	
Class syllabus: <ol style="list-style-type: none"> 1. Methodological features of science 2. Scientific methods: conceptual, empirical and complex methods 3. Types and structure of research 4. Research design 5. Arguments and reasoning 6. Causality and its place in empirical research 7. Models of scientific explanation and prediction 8. Models of hypothesis testing and evaluation 9. Errors in inference, representation and interpretation of data

Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning, distance learning	
Number of credits: 6	
Recommended semester: 1., 3.	
Educational level: III.	
Prerequisites:	
Course requirements: During semester: active participation (10 pts), homework (20 pts), presentation of the selected topic (20 pts); After semester: essay, 4 - 6 standard pages (50 pts); Classification scale: A: 100 - 93 pts; B: 92 - 85 pts; C: 84 - 77 pts; D: 76 - 69 pts; E: 68 - 61 pts; Fx: 60 - 0 pts. Violation of academic ethics may result in the cancellation of the obtained points in the relevant evaluation item. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: By completing the course, students gains knowledge about the basic problems and concepts of philosophy of language, theory of meaning and use of language. In general, the course enables students to consider the philosophical aspects of language and its use. Since the subject has a partially interdisciplinary character, students gain knowledge they can use in their work in other scientific disciplines.	
Class syllabus: Philosophical reflection of language. Philosophy of language versus linguistics versus theory of communication. Language and expression. Expression and meaning. The problem of determining the boundaries between semantics and pragmatics. Theory of meaning: semantic meaning versus pragmatic meaning; meaning modeling; propositions and truth conditions; context-sensitive expressions and their influence on the truth conditions of statements; different conceptions of propositions. Theory of reference and singular expressions: proper names, singular descriptions, indexical expressions; use of descriptions - referential, attributive. Pragmatics of language: conversational implicatures; speech act theory; constatives and performatives; conditions for a speech act execution. Context and meaning: explicit and implicit components of semantic content. Contextualism versus semantic minimalism.
