COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Management	
Course ID: FM.KIS/281AM/21	Course title: Business Analytics and Decision Making
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 3.	
Educational level: I., II.	
Prerequisites:	
Recommended prerequisites: Information Systems and Application Software, Statistics, Mathematics, Financial Management	
Course requirements: COURSE ACTIVITIES Homework Most weeks you will have an assignment that is designed to assess your mastery of the topics and techniques covered the previous week and provide feedback to improve your understanding of the material. Homework assignments will be assessed. You may work with your colleagues to figure out the underlying concepts and problem-solving processes, but are expected to work individually to answer the specific problems that are assigned. Completed assignments can be submitted via e-mail. Timely submission of the completed assignments is essential. The due date of each assignment will be stated clearly in the assignment description. Group Project In groups of 2-3 you should prepare either a data-related project or a research paper. Additional detail about the group project will be provided via e-mail or at SharePoint of the FMCU. These projects should provide an opportunity for you to test your understanding of the techniques, processes, and problems associated with mobilizing raw data for use in individual and organization decision making. Scale of assessment (preliminary/final): Grading 40% Homework 40 pts 60% Group Project: Proposal 10 pts. Midterm report 10 pts. Final Poster/Presentation/Paper 30 pts. Answers to questions in discussion 10 pts.	
Learning outcomes: After completing this course you will be able to: - Select and evaluate various types of data to for use in decision making; - Use prescriptive and descriptive analyses to reach defensible, data-driven conclusions; - Select and apply appropriate statistical methods to address decision problems; - Use MS Excel or Wolfram Mathematica for data manipulation and analysis - Critically evaluate data analyses and develop strategies for making better decisions.	
Class syllabus: Introduction Some Basic Concepts: Measurement, Design, Validity Data Visualization Data Manipulation Probability and Significance (Sample, Population, CLT, Sampling Error) Hypothesis	

Testing (Power, Effect Size) Chi-squared, t-tests Analysis of Variance (ANOVA, Contrasts, Trends, Interactions) Correlations Multiple Regression (Sets of IVs, Nominal Scales, Interactions)

Recommended literature:

Readings and Online Resources: There are many good texts and online sources for information on decision-making, statistical techniques and data tools. Because each student's needs and interests will differ, none of these are explicitly required, but here are some you may find helpful.

Prerequisites:	
Course requirements: Type of Activities: 2 hours lectures and 2 hours seminars Number of Hours: 4 hours per week Per Week; Per Level/Semester: Form of the Course: Full time / Combined Method During the semester midterm and/or final tests for 40 points. Score of 60 points will be given for the semester project and its presentation and oral examination. Scale of assessment (preliminary/final): 40/60	
Learning outcomes: By successfully completing this course, students will develop proficiency in cloud computing through the utilization of software resources offered by the Faculty of Management. This will enable them to cultivate a more comprehensive understanding of both the theoretical underpinnings and practical applications of cloud computing systems. The course is structured into four distinct phases, providing students with a well-rounded and progressive learning experience: Analytical Phase (2-4 weeks): During this initial phase, students will delve into the foundational concepts of cloud computing. They will critically analyze the key principles and components of cloud systems, setting the stage for more advanced exploration. Conceptual Phase (2-4 weeks): Building upon the analytical phase, students will transition to a conceptual phase where they deepen their understanding of cloud computing. They will explore conceptual frameworks, architecture, and models, gaining insight into how cloud systems are structured and function. Verification Phase (1-3 weeks): In the verification phase, students will engage in practical exercises and hands-on activities to validate their knowledge and skills. This phase provides an opportunity for students to apply what they've learned through real-world scenarios and technical tasks. Argumentative Phase (1-3 weeks): The final phase encourages students to engage in critical thinking and problem-solving within the context of cloud computing. They will analyze case studies, debate contemporary issues, and present arguments based on their acquired knowledge. Throughout these phases, students will not only acquire cloud computing skills but will also develop their analytical, conceptual, practical, and argumentative abilities. This holistic approach ensures	

that they are well-prepared to apply their knowledge effectively in the field of cloud computing and adapt to the ever-evolving technological landscape.
