

Course descriptions

TABLE OF CONTENTS

1. dVP-037/21	Aesthetic aspects of physical activity.....	6
2. dVP-028/21	Authorship or co-authorship in the creation of teaching texts.....	8
3. dVP-032/21	Biochemical bases of movement performance.....	9
4. dVP-007/21	Choreography of a movement composition and its presentation at a domestic competition.....	11
5. dVP-017/21	Citations from publications during studies-foreign (credits for 1 citation).....	12
6. dVP-017a/22	Citations from publications during studies-foreign (credits for 1 citation).....	13
7. dVP-017b/22	Citations from publications during studies-foreign (credits for 1 citation).....	14
8. dVP-017c/22	Citations from publications during studies-foreign (credits for 1 citation).....	15
9. dVP-017d/22	Citations from publications during studies-foreign (credits for 1 citation).....	16
10. dVP-017e/22	Citations from publications during studies-foreign (credits for 1 citation).....	17
11. dVP-017f/22	Citations from publications during studies-foreign (credits for 1 citation).....	18
12. dVP-017g/22	Citations from publications during studies-foreign (credits for 1 citation).....	19
13. dVP-017h/22	Citations from publications during studies-foreign (credits for 1 citation).....	20
14. dVP-017i/22	Citations from publications during studies-foreign (credits for 1 citation).....	21
15. dVP-017j/22	Citations from publications during studies-foreign (credits for 1 citation).....	22
16. dVP-017k/22	Citations from publications during studies-foreign (credits for 1 citation).....	23
17. dVP-017l/22	Citations from publications during studies-foreign (credits for 1 citation).....	24
18. dVP-017m/22	Citations from publications during studies-foreign (credits for 1 citation).....	25
19. dVP-017n/22	Citations from publications during studies-foreign (credits for 1 citation).....	26
20. dVP-017o/22	Citations from publications during studies-foreign (credits for 1 citation).....	27
21. dVP-017p/22	Citations from publications during studies-foreign (credits for 1 citation).....	28
22. dVP-017r/22	Citations from publications during studies-foreign (credits for 1 citation).....	29
23. dVP-017s/22	Citations from publications during studies-foreign (credits for 1 citation).....	30
24. dVP-017t/22	Citations from publications during studies-foreign (credits for 1 citation).....	31
25. dVP-017u/22	Citations from publications during studies-foreign (credits for 1 citation).....	32
26. dVP-017v/22	Citations from publications during studies-foreign (credits for 1 citation).....	33
27. dVP-016/21	Citations from publications during study-at-home (credits for 1 citation).....	34
28. dVP-016a/22	Citations from publications during study-at-home (credits for 1 citation).....	35
29. dVP-016b/22	Citations from publications during study-at-home (credits for 1 citation).....	36
30. dVP-016c/22	Citations from publications during study-at-home (credits for 1 citation).....	37
31. dVP-016d/22	Citations from publications during study-at-home (credits for 1 citation).....	38
32. dVP-016e/22	Citations from publications during study-at-home (credits for 1 citation).....	39
33. dVP-016f/22	Citations from publications during study-at-home (credits for 1 citation).....	40
34. dVP-004/21	Creating the choreography of a movement composition and its presentation at the World Championships, ME, OH, SP.....	41
35. dPP-009/21	Creation of a dissertation I.....	42
36. dPP-011/21	Creation of a dissertation II.....	43
37. dPP-005/21	Creation of a dissertation project.....	45
38. dPP-004a/21	Creative scientific research/pedagogical activity.....	47
39. dPP-004b/21	Creative scientific research/pedagogical activity.....	48
40. dPP-006a/21	Creative scientific research/pedagogical activity.....	49
41. dPP-008a/21	Creative scientific research/pedagogical activity.....	50
42. dPP-010/21	Creative scientific research/pedagogical activity.....	51
43. dPP-010a/21	Creative scientific research/pedagogical activity.....	52
44. dPP-012a/21	Creative scientific research/pedagogical activity.....	53
45. d-1a/22	Defence of dissertation thesis (state exam).....	54

46. dVP-033/21	Determinants of physical activity.....	55
47. dVP-035/21	Diagnostics of endurance and strength abilities.....	57
48. dVP-034/21	Diagnostics of speed and coordination skills.....	59
49. dVP-036/21	Educational peculiarities of the process in sports of people with health disorders.....	60
50. dPP-007/21	Elaboration of the dissertation project and execution of the dissertation exam.....	62
51. dPP-007x/22	Elaboration of the dissertation project and execution of the dissertation exam (state exam).....	63
52. dVP-025/21	Elaboration of the opponent's assessment for the final thesis.....	64
53. dVP-025a/22	Elaboration of the opponent's assessment for the final thesis.....	65
54. dVP-025b/22	Elaboration of the opponent's assessment for the final thesis.....	66
55. dVP-025c/22	Elaboration of the opponent's assessment for the final thesis.....	67
56. dVP-025d/22	Elaboration of the opponent's assessment for the final thesis.....	68
57. dVP-025e/22	Elaboration of the opponent's assessment for the final thesis.....	69
58. dVP-025f/22	Elaboration of the opponent's assessment for the final thesis.....	70
59. dVP-025g/22	Elaboration of the opponent's assessment for the final thesis.....	71
60. dVP-025h/22	Elaboration of the opponent's assessment for the final thesis.....	72
61. dVP-025i/22	Elaboration of the opponent's assessment for the final thesis.....	73
62. dVP-025j/22	Elaboration of the opponent's assessment for the final thesis.....	74
63. dVP-025k/22	Elaboration of the opponent's assessment for the final thesis.....	75
64. dVP-025l/22	Elaboration of the opponent's assessment for the final thesis.....	76
65. dVP-025m/22	Elaboration of the opponent's assessment for the final thesis.....	77
66. dVP-025n/22	Elaboration of the opponent's assessment for the final thesis.....	78
67. dVP-025o/22	Elaboration of the opponent's assessment for the final thesis.....	79
68. dVP-031/21	English terminology of sports sciences.....	80
69. ERAS001/22	Erasmus - Student Mobility for Traineeship.....	82
70. dPP-003/21	Ethics of Scientific Research.....	83
71. dVP-112a/21	Ethics of Scientific Research.....	84
72. dVP-039/21	Game performance.....	86
73. dVP-064/21	Health oriented fitness.....	88
74. dVP-040/21	Holistic ethics of the athlete person.....	90
75. dVP-041/21	Integration and inclusion in sport.....	92
76. dVP-043/21	International aspects of physical and sports education.....	94
77. dVP-020/21	Leading a team or athlete at an international competition (World Championships, European Championships, Olympic Games, World Cup competitions): - Main.....	96
78. dVP-020a/22	Leading a team or athlete at an international competition (World Championships, European Championships, Olympic Games, World Cup competitions): - Main.....	97
79. dVP-020b/22	Leading a team or athlete at an international competition (World Championships, European Championships, Olympic Games, World Cup competitions): - Main.....	98
80. dVP-020c/22	Leading a team or athlete at an international competition (World Championships, European Championships, Olympic Games, World Cup competitions): - Main.....	99
81. dVP-020d/22	Leading a team or athlete at an international competition (World Championships, European Championships, Olympic Games, World Cup competitions): - Main.....	100
82. dVP-020e/22	Leading a team or athlete at an international competition (World Championships, European Championships, Olympic Games, World Cup competitions): - Main.....	101
83. dVP-022/21	Leading a team or athlete at the top level in Slovakia: - Main coach - Assistant coach.....	102
84. dVP-015/21	Lecture at the professional seminar of workplaces.....	103

85. dVP-023/21 Management of a team or an athlete at the top level in Slovakia - assistant coach.....	104
86. dVP-026/21 Management of the work within the ŠVOUČ-faculty conference.....	105
87. dVP-027/21 Management of the work within the ŠVOUČ-national conference.....	106
88. dVP-042/21 Mathematical and statistical methods.....	107
89. dPP-001/21 Methodology of Sport Sciences.....	109
90. dVP-044/21 Modeling and evaluation of sports equipment.....	111
91. dVP-045/21 Motor learning.....	113
92. dVP-029/21 Other activities related to pedagogical activities.....	115
93. dVP-029a/22 Other activities related to pedagogical activities.....	116
94. dVP-029b/22 Other activities related to pedagogical activities.....	117
95. dVP-029c/22 Other activities related to pedagogical activities.....	118
96. dVP-029d/22 Other activities related to pedagogical activities.....	119
97. dVP-029e/22 Other activities related to pedagogical activities.....	120
98. dVP-029f/22 Other activities related to pedagogical activities.....	121
99. dVP-018/21 Other activities related to scientific activity.....	122
100. dVP-019/21 Own pedagogical activity.....	123
101. dVP-019a/22 Own pedagogical activity.....	124
102. dVP-019d/22 Own pedagogical activity.....	125
103. dVP-019e/22 Own pedagogical activity.....	126
104. dVP-019f/22 Own pedagogical activity.....	127
105. dVP-019g/22 Own pedagogical activity.....	128
106. dVP-019h/22 Own pedagogical activity.....	129
107. dVP-019i/22 Own pedagogical activity.....	130
108. dVP-019j/22 Own pedagogical activity.....	131
109. dVP-019k/22 Own pedagogical activity.....	132
110. dVP-019l/22 Own pedagogical activity.....	133
111. dVP-019m/22 Own pedagogical activity.....	134
112. dVP-019n/22 Own pedagogical activity.....	135
113. dVP-019o/22 Own pedagogical activity.....	136
114. dVP-019p/22 Own pedagogical activity.....	137
115. dVP-019r/22 Own pedagogical activity.....	138
116. dVP-19b/22 Own pedagogical activity.....	139
117. dVP-19c/22 Own pedagogical activity.....	140
118. dVP-046/21 Peculiarities of sports training for children and youth.....	141
119. dVP-047/21 Periodization of sports training.....	143
120. dVP-038/21 Philosophy and sport.....	145
121. dVP-011/21 Presentation at a domestic scientific event with publication of the presentation - co-author.....	147
122. dVP-011a/22 Presentation at a domestic scientific event with publication of the presentation - co-author.....	148
123. dVP-011b/22 Presentation at a domestic scientific event with publication of the presentation - co-author.....	149
124. dVP-011c/22 Presentation at a domestic scientific event with publication of the presentation - co-author.....	150
125. dVP-011d/22 Presentation at a domestic scientific event with publication of the presentation - co-author.....	151
126. dVP-010/21 Presentation at a domestic scientific event with publication of the presentation - sole author.....	152

127. dVP-009/21 Presentation at a foreign scientific event with publication of the presentation - co-author.....	153
128. dVP-009a/22 Presentation at a foreign scientific event with publication of the presentation - co-author.....	154
129. dVP-009b/22 Presentation at a foreign scientific event with publication of the presentation - co-author.....	155
130. dVP-009c/22 Presentation at a foreign scientific event with publication of the presentation - co-author.....	156
131. dVP-009d/22 Presentation at a foreign scientific event with publication of the presentation - co-author.....	157
132. dVP-008/21 Presentation at a foreign scientific event with publication of the presentation - sole author.....	158
133. dPP-002/21 Presentation of scientific work.....	159
134. dVP-048/21 Problem students in physical and sports education.....	161
135. dVP-012/21 Professional papers in foreign journals and anthologies - sole author.....	163
136. dVP-013/21 Professional works in domestic journals and anthologies - sole author.....	164
137. dVP-049/21 Psychological preparation in sports.....	165
138. dVP-001/21 Publication in a journal indexed in WOS, SCOPUS, ADD	167
139. dVP-001a/22 Publication in a journal indexed in WOS, SCOPUS, ADD	168
140. dVP-001b/22 Publication in a journal indexed in WOS, SCOPUS, ADD	169
141. dVP-001c/22 Publication in a journal indexed in WOS, SCOPUS, ADD	170
142. dVP-001d/22 Publication in a journal indexed in WOS, SCOPUS, ADD	171
143. dVP-006/21 Publication in a peer-reviewed domestic journal or in a co-authored collection.....	172
144. dVP-006a/22 Publication in a peer-reviewed domestic journal or in a co-authored collection.....	173
145. dVP-006b/22 Publication in a peer-reviewed domestic journal or in a co-authored collection.....	174
146. dVP-006c/22 Publication in a peer-reviewed domestic journal or in a co-authored collection.....	175
147. dVP-005/21 Publication in a peer-reviewed domestic journal or in an anthology - single author.....	176
148. dVP-003/21 Publication in another peer-reviewed foreign journal or in an anthology - co-author.....	177
149. dVP-003a/22 Publication in another peer-reviewed foreign journal or in an anthology - co-author.....	178
150. dVP-003b/22 Publication in another peer-reviewed foreign journal or in an anthology - co-author.....	179
151. dVP-003c/22 Publication in another peer-reviewed foreign journal or in an anthology - co-author.....	180
152. dVP-003d/22 Publication in another peer-reviewed foreign journal or in an anthology - co-author.....	181
153. dVP-003e/22 Publication in another peer-reviewed foreign journal or in an anthology - co-author.....	182
154. dVP-002/21 Publication in another peer-reviewed foreign journal or in an anthology - single author.....	183
155. dVP-062/21 Reasearch and development of speed abilities.....	184
156. dVP-060/21 Research and development of coordination skills.....	186
157. dVP-061/21 Research and development of mobility skills.....	188

158. dVP-063/21	Research and development of strength abilities.....	190
159. dVP-059/21	Research and effectiveness of the development of endurance skills.....	193
160. dVP-050/21	Social context of sport.....	195
161. dVP-051/21	Sport and Olympism.....	197
162. dVP-053/21	Sports chronobiology.....	199
163. dVP-052/21	Sports hermeneutics.....	201
164. dVP-054/21	Sports training.....	203
165. dVP-055/21	Standardization of functional and motor tests.....	205
166. dVP-70/22	Study visit.....	207
167. dVP-024/21	Supervising of bachelor thesis.....	208
168. dVP-024a/22	Supervising of bachelor thesis.....	209
169. dVP-024b/22	Supervising of bachelor thesis.....	210
170. dVP-024c/22	Supervising of bachelor thesis.....	211
171. dVP-024d/22	Supervising of bachelor thesis.....	212
172. dVP-024e/22	Supervising of bachelor thesis.....	213
173. dVP-024f/22	Supervising of bachelor thesis.....	214
174. dVP-024g/22	Supervising of bachelor thesis.....	215
175. dVP-024h/22	Supervising of bachelor thesis.....	216
176. dVP-024i/22	Supervising of bachelor thesis.....	217
177. dVP-024j/22	Supervising of bachelor thesis.....	218
178. dVP-024k/22	Supervising of bachelor thesis.....	219
179. dVP-024l/22	Supervising of bachelor thesis.....	220
180. dVP-057/21	Technical and tactical preparation and their research in sports games.....	221
181. dVP-056/21	The structure of sports performance.....	223
182. dVP-058/21	Training in sports games.....	225
183. dVP-014/21	Various publications and documents that cannot be classified in any of the listed categories.....	227
184. dVP-065/21	Woman in Sport.....	228

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-037/21	Course title: Aesthetic aspects of physical activity
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Overall course evaluation 100% -91% - A, 90% -81% - B, 80% -71% - C, 70% -61% - D, 60% -51% -E, 50% and less FX Final evaluation: elaboration of a seminar work on the issue of factors of aesthetic aspects of physical activity in the context of the thematic scope of the dissertation theses.	
Learning outcomes: The student will get deeper knowledge in the field of research of aesthetics of movement and physical activity with a focus on the basic principles, principles and roles of aesthetics in the science of sport. He knows the aesthetic aspects of the body and their development in relation to physical activity and selected sports activity, and is able to define aesthetic aspects of evaluation of selected sports performance and apply them creatively in real models.	
Class syllabus: 1. Basics, definition of the term, tasks of aesthetics within the sciences of sport. 2. Aesthetic aspects in relation to physical activity, development of aesthetic values. 3. Aesthetic aspects of the body and corporality in terms of sports activity. 4. Aesthetic aspects of sports performance evaluation. 5. Status and perspectives of research in the field of aesthetics of physical activity.	
Recommended literature: 1. DA COSTA, L.A & T. OLIVEIRA LACERDA. 2016. On the aesthetic potential of sports and Physical Education, Sport, Ethics & Philosophy, 10: 4, 444 -464, DOI: 10.1080/17511321.2016.1210209. 2. OBORNÝ, J. & SEMAN, F. 2013. Estetika tela, telesnosti a športového pohybu. Zborník príspevkov z vedeckej konferencie s medzinárodnou účasťou. Bratislava: Slovenská vedecká spoločnosť pre telesnú výchovu a šport v spolupráci s Univerzitou Komenského, Fakultou telesnej výchovy a športu, 2013. 206 s. ISBN 978-80-89075-38-6. 3. POMER, J. COURSE DESCRIPTION

Academic year: 2022/2023								
University: Comenius University Bratislava								
Faculty: Faculty of Physical Education and Sports								
Course ID: FTVŠ/dVP-032/21			Course title: Biochemical bases of movement performance					
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning								
Number of credits: 3								
Recommended semester:								
Educational level: III.								
Prerequisites:								
Course requirements:								
Learning outcomes: After completing the course the student is familiar with biochemical processes that are the basis of sport performance in individual sport disciplines. He understands the ways of creating energy in different types of physical activity, metabolic response to loading of various character. He knows the causes of fatigue and the limitation of sports performance, the genetic basis of sport performance and the influence of nutritional supplements on athlete performance as well.								
Class syllabus: 1. Biochemical processes providing energy for different sport disciplines. 2. Impact of nutrition on performance in specific sport disciplines 3. Mechanisms of the fatigue and biochemical limitation of sport performance. 4. Biochemical adaptation to training.								
Recommended literature: 1. MAUGHAN, Ronald J. a Michael GLEESON. The Biochemical Basis of Sports Performance. Oxford: University Press, 2010. ISBN 978-0199208289. 2. MAUGHAN, Ronald, J. a Louise M. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dPP-005/21	Course title: Creation of a dissertation project
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Continuous assessment: presentation at scientific seminars and conferences, participation in conferences of student scientific, professional and artistic activities, consultations Final evaluation: theoretical and methodological qualities of the dissertation project	
Learning outcomes: The student masters the operationalization of research procedures, has thoroughly mastered, and verified the basic relevant methods of scientific work related to the processing of theoretical and empirical knowledge in the field of sports sciences. He can apply this knowledge in the process of word processing of the dissertation project. He acquired the ability to independently search for adequate scientific literature. He can professionally defend the basic ideas of his project.	
Class syllabus: 1. Research work in the sense of a set scientific problem and hypotheses of the dissertation. 2. Processing of theoretical knowledge into a relevant system form and evaluation of the basic set of obtained empirical data, facts and figures. 3. Continuous presentation of partial results of the work in a journal publication and at scientific seminars and conferences. 4. Defense of the dissertation project before the commission to perform the dissertation examination.	
Recommended literature: Internal regulation no. 7/2018 Directive of the Rector of Comenius University in Bratislava, Full text of internal regulation no. 12/2013 Directive of the Rector of Comenius University in Bratislava on the basic requirements for final theses, rigorous theses and habilitation theses, control of their originality, storage and access to Comenius University in Bratislava, as amended by Supplement no. 1 and Appendix no. 2. Foreign and domestic scientific monographs, journals, proceedings, electronic databases and other information sources on the issues of the dissertation project.

STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/d-1a/22	Course title: Defence of dissertation thesis
Number of credits: 0	
Educational level: III.	
State exam syllabus:	
Last change:	
Approved by:	

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-033/21	Course title: Determinants of physical activity
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Overall course evaluation 100% -91% - A, 90% -81% - B, 80% -71% - C, 70% -61% - D, 60% -51% -E, 50% and less FX Final evaluation: elaboration of a seminar work on the issue of factors of physical activity vs. inactivity in the context of the thematic scope of the dissertation theses.	
Learning outcomes: The student knows the theoretical basis of research and the structure of determinants of physical activity, understands the variability of social and biological factors of physical activity, their weight in different stages of ontogenesis and in the way of life of differentiated groups of the population. He knows the methodological approaches to research of subjective and objective factors and correlates determining physical activity. The student is able to synthesize, critically evaluate and creatively apply the analyzed knowledge in the context of their own research problem as a starting point of their own research.	
Class syllabus: <ul style="list-style-type: none"> - Structure of determinants of physical activity and the importance of their identification. - Methodological approaches and research methods of factors determining physical activity. - Social determinants of physical activity. - Conditions as a factor of physical activity (natural, economic, institutionalized). - School as an institutionalized determinant of physical activity. - Family - biological and social factor of physical activity of children and youth. - Barriers to physical activity and causes of abandonment of sports activity, analysis and evaluation. 	
Recommended literature: 1. ALEKSOVSKA, K., PUGGINA, A., GIRALDI, L. et al. 2019. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-035/21	Course title: Diagnostics of endurance and strength abilities
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% a menej FX Elaboration of model methods and protocols for functional evaluation in selected sport or discipline within year's training cycle.	
Learning outcomes: Students understand basic principles of energy sources for muscle work depending of intensity and duration of exercise. They are familiar with the terms of power and capacity within the frame of evaluation of anaerobic alactacid and lactacid capabilities. They know the concepts of anaerobic threshold, maximal oxygen uptake, maximal aerobic power as well as direct and indirect methods of their evaluation. They understand principles of muscle force regulation, are familiar with the terms of maximal force, 1RM, muscle power, rate of the force development, strength endurance as well as with the methods for their assessment. They know how to apply results of diagnostic procedure for the evaluation of training efficiency and control of intensity of training stimuli.	
Class syllabus: 1. Direct methods of evaluation of aerobic capabilities. 2. Indirect methods of evaluation of aerobic capabilities. 3. Evaluation of anaerobic capabilities. 4. Biomechanical and physiological principles of the evaluation of strength capabilities. 5. Traditional and modern methods for the evaluation of strength capabilities. 6. Practical application of the evaluation of strength capabilities.	
Recommended literature: 1. Mc DOUGALL, A.: Physiological tests for elite athletes. Human Kinetics, 2012. 2. REIMAN, P.M., MANSKE, R.C.: Functional Testing in Human Performance, Human Kinetics 2009. 3. KOMADEL, L., HAMAR, D., MARČEK, T. Diagnostika trénovanosti. Bratislava: Šport, 1985.

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-036/21	Course title: Educational peculiarities of the process in sports of people with health disorders
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Continuous assessment: Elaboration of a seminar work with an analysis of the possibilities of implementing a physical education process with people with health disorders. Final evaluation: Elaboration of a creative scientific task with acceptance of the peculiarities of health disorders in a specific sport.	
Learning outcomes: The student knows the expanding knowledge of the didactics of the physical education process of various kinds with people with health disorders. He has a theoretical view and skills for applying the specifics of pedagogical work in order to improve physical and sports performance. Can create an implementation idea of the structure of competencies for managing the physical education process with people with chronic non-communicable diseases and disabilities. Can apply the theoretical basis of the physical education process in the real conditions of his dissertation.	
Class syllabus: Physical education process with athletes with health disorders. Methods and methodological approaches to the study of causal relationships between elements of the educational system. Peculiarities of education through sports during sports activities and specifics of peculiarities of education in sports sciences. Status and perspectives of research in sports of individuals with health disorders from the point of view of the subject of research in sports sciences.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-031/21	Course title: English terminology of sports sciences
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Student performance evaluation: qualification degree Mid-term evaluation: none End of term evaluation: seminar paper (100 %)	
Learning outcomes: Students will become familiar with basic terminology of sports sciences. They will be able to apply the knowledge acquired in scientific research. They will develop skills needed for professional presentation of their research design and outcomes.	
Class syllabus: English terminology in sports sciences: 1. Scientific and non-scientific articles (type, structure and style of academic writing). 2. Research project (general guidelines and best practices for research proposals). 3. Scientific research presentation (traditional and contemporary approaches).	
Recommended literature: 1. HARTLEY, J. Academic writing and publishing: a practical handbook. London, UK: Routledge, 2008. 2. MAČURA, P. et al. English for Slovak sports experts. Bratislava: Univerzita Komenského v Bratislave, 2013. 3. SAVAGE, A., SHAFIEI, M. Effective academic writing. Oxford, UK: Oxford University Press, 2012. 4. SWORD, H. Stylish academic writing. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-039/21	Course title: Game performance
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Overall evaluation of the course: 100% -91% - A, 90% -81% - B, 80% -71% - C, 70% -61% - D, 60% -51% -E, 50% and less FX Partial evaluation of the course: - Active participation 80% - passed / failed. - Seminar work - 100%.	
Learning outcomes: The graduate of the course knows the methodological approaches to the study of the structure of individual game performance and team game performance in sports games. Can diagnose the assumptions of game performance, the conditions under which game performance takes place (external and internal load) and evaluate the results of the player and the team in the match. Masters the methods of data registration, methods of registration, statistical methods and data presentation options.	
Class syllabus: 1. Game performance as a target category of sports training and its structure, methodological approaches to the study of the structure of game performance. 2. Methodological approaches in the diagnosis of the player's load in the match. 3. Methodological approaches to the evaluation of the game performance of players and teams in sports games.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-040/21	Course title: Holistic ethics of the athlete person
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Positive evaluation of the presentation at the seminar (in an online discussion); acceptance of the final work. Defense (online) of a written study in the range of 3-5 pages thematically focused on the emotional ethical aspects of the dissertation project and the results of the dissertation research.	
Learning outcomes: The student is able to demonstrate in a sophisticated form an understanding of the specificity of holistic ethical reflection of the human body, spirit and mind and historical vicissitudes in the development of views on the relationship between body and soul and their current significance. He has the ability to apply a creative and humanistic view to the problem of calocagathy. Demonstrates the development of practical pedagogical and methodological skills in the use of ethical knowledge and training strategies in sports and physical education.	
Class syllabus: Ethical analysis of the meaning of the athlete's body, spirit and mind; the ethos of sports and sports movement; the moral health of the athlete; authentic and inauthentic forms of calocagathy; study of the ethical specificity of sports movement; rivalry and hostility in sports activities; analysis of the ethical aspects of the athlete's relationship to his body; axiological experience of sport by an athlete; critical analysis of instrumentalist approaches to the human being of an athlete.

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-041/21	Course title: Integration and inclusion in sport
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Continuous assessment: Elaboration of a seminar work with an analysis of the possibilities of implementing integration in sport (50%). Final evaluation: Elaboration of a creative scientific task with the acceptance of inclusion in relation to the issue of sport, sports training (50%).	
Learning outcomes: The student will acquire knowledge about the process and principles of inclusion, integration, socialization in the world, in Europe, in Slovakia and in the conditions of school performance and elite sports and sports for all from the point of view of the subject of research in sports sciences. Can apply this knowledge to research with the intentions of the dissertation.	
Class syllabus: Scientific humanological interpretation of the term's integration, inclusion, socialization, discrimination. Modifications, conditions and specifics of this process in sports sciences. Bases of inclusion in sports, training and competitions. Characteristics of research projects and analysis of their results in the field of individual sports.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-043/21	Course title: International aspects of physical and sports education
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% -A, 90%-81% -B, 80%-71% -C, 70%-61% -D, 60%-51% -E, 50% and less FX Interim evaluation: 1 x test Final evaluation: defence of writing work, 3 –5 pages, focused on description of PE teaching system in selected country and opportunities to use this knowledge in Slovakia and in student work.	
Learning outcomes: Student understands importance of international knowledge and experiences in creation of educational models; student has knowledge about system of PE teaching in different countries; student has knowledge about management, aims and activities of most important international organisations in the field of PE, he/her understands organisation of international events and he/her knows content of different international comparative studies and is familiar with documents published on international level and know them critically analyse.	
Class syllabus: Physical inactivity as a part of global problems of nowadays world; Physical education teaching in abroad; Modern pedagogical conception of physical education teaching; International organisations, institutions associations supported physical education and its teachers; International events focused on physical education and school sports; International comparative studies and projects; International documents supported physical education and school sports; Global recommendations for quality physical education.	
Recommended literature: 1. Internet websites of selected international organisations (ICSSPE, FIEP, EUPEA, AIESEP, ISCPES, IFAPA). 2. ANTALA, Branislav et al. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-042/21	Course title: Mathematical and statistical methods
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100% -91% - A, 90% -81% - B, 80% -71% - C, 70% -61% - D, 60% -51% -E, 50% and less FX Continuous assessment: 0% Final evaluation: 100% in the trial period Seminar work in which the student processes in detail, with the help of a statistical program, the entered data.	
Learning outcomes: The student will gain in-depth knowledge of how to search for relevant impact literature on the researched issues and in the field of statistics. The student will get acquainted with information technologies, which will be used in statistical processing of obtained data or obtaining foreign contacts. The student will deepen their knowledge in assessing the homogeneity of the examined sample and in comparing quantitative and qualitative data in the sports sciences. They will acquire theoretical knowledge about the possibilities of applying analysis of variance. He will learn the basics of correlation analysis, regression functions and multidimensional analysis in projects of physical education and sports. Can use regressive means of statistics for modelling physical education and sports. He can verify hypotheses by relevant procedures.	
Class syllabus: 1. Dependent and independent variables in research projects. 2. Null hypothesis. 3. Use of multidimensional statistics in educational projects (multiple correlations and regression analysis, partial correlation and determination, factor analysis, discriminant analysis, ANOVA, ANCOVA ...). 4. Interpretive possibilities based on the used statistical methods.	
Recommended literature: 1. THOMAS, Jerry, .R., NELSON, Jack, K. a Stephen J. ILVERMAN. Research Methods in Physical Activity. Champaign: Human Kinetics, 2015. ISBN 978-1450470445. 2. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dPP-001/21	Course title: Methodology of Sport Sciences
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Ongoing evaluation: Annotations 10 articles from research in sports sciences – 50% Final evaluation: Elaboration of the dissertation project in the range of 15 – 20 pages	
Learning outcomes: The student masters the current paradigm of research projects in the Sports Sciences. He knows what is a system-structural and genetic approach in solving research projects. Masters the basic research situations, target categories, formulation of the research question and the creation of scientific hypotheses. He distinguishes between methods of quantitative and qualitative research can interpret and creatively apply the results of his own research. He masters the scientific solution of the established problems of sports practice.	
Class syllabus: - The system of sports sciences. - Research situations in sports sciences (Bussov, Cattelov, Havlíček's model). - Research project, problem definition, target research categories, formulation of research questions, formulation of hypotheses, determination of research methods, determination of a sample, collection of empirical data and their processing. - Measurement theory, creation of tests, verification of their validity, reliability, measurement errors, creation of standards, and their processing. - Basic characteristics of the experiment (internal and external validity of experimental projects, randomization, single, double and double blind experiment). - True and quasi-experimental (internal and external validity of experimental projects). - Qualitative research in sports sciences (method of analytical induction, permanent comparison, triangulation, transcription, coding, creation of categories and typologies, content analysis, grounded theory, methods of work in historical science).

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-044/21	Course title: Modeling and evaluation of sports equipment
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Continuous assessment: 50% - partial seminar work. Final evaluation: based on continuous evaluation 50%, 50% - seminar work	
Learning outcomes: Student will gain knowledge about the creation of movement models and evaluation of technology with regard to the categorization of sports according to the share of technique in the structure of sports performance. It controls the optimization of the creation of models of movement chains, which create a specific sports performance with an emphasis on the individualization of somatic and functional parameters of the athlete.	
Class syllabus: 1. Sports technique: - sports performance structure factors (share), - motion model, - individual technique. 2. The structure of motion as a picture of technology and its characteristics (kinematic and dynamic substructure). 3. Creation and optimization of motion models (the role of empiricism and science). 4. Methods of creating motion models: - a description of the structure of the movement, - identifying prevailing trends, - a combination of description and identification of trends. 5. Evaluation of individual technique (model, knowledge of mechanical laws, consideration of individual peculiarities, differentiated approach according to the nature of sports activities). 6. Biomechanical analysis of selected movement activities (selection made with regard to the topics of students' dissertations) and the creation of models of their movement structures.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-046/21	Course title: Peculiarities of sports training for children and youth
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Overall course evaluation 100% -91% - A, 90% -81% - B, 80% -71% - C, 70% -61% - D, 60% -51% -E, 50% and less FX Final evaluation: elaboration of a seminar work on the issue of specificity of sports training in children and youth in the context of the thematic scope of the dissertation theses.	
Learning outcomes: The student will get deeper knowledge in the field of research of sports training of children and youth with a focus on the educational peculiarities of the training process. He knows the developmental peculiarities and factors influencing the sports training of children and youth. He knows the theory of general and special adaptation syndrome and premature sports specialization. Masters the models and stages of long-term sports training in the selected sport. Can creatively apply the principles of creating long-term sports training in real models.	
Class syllabus: 1. Basic principles of sports training of children and youth. 2. Developmental, age and sexual peculiarities. 3. Methodological bases of sports training of children and youth. 4. Ecological peculiarities of sports training of children and youth. 5. Sports performance of children and youth, its development and monitoring. 6. Status and perspectives of research of sports training of children and youth.	
Recommended literature: 1. FAIGENBAUM, A. 2015. Physical activity in children and adolescents. Academy College of Sports Medicine Bulletin. 2. FEELEY, T. F., AGEL, J., & LAPRADE F. R. 2016. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-047/21	Course title: Periodization of sports training
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100% -91% - A, 90% -81% - B, 80% -71% - C, 70% -61% - D, 60% -51% -E, 50% and less FX Method of evaluation and completion of the course: Final evaluation: Seminar work on an essential topic (100%).	
Learning outcomes: The student will gain knowledge about the system of periodization of training and competition load in terms of current biological, kinanthropological and other theories. Can analyze the dynamics of load in small, medium and large cycles in a one-year training cycle. Masters the laws of development, maintenance and loss of sports form. Can creatively apply the acquired knowledge in modeling the training load for a particular type of sport. Can use the means of diagnosing and controlling changes in the status of athletes to modify sports training projects.	
Class syllabus: <ul style="list-style-type: none"> - Content analysis of the structure of sports performance. - Structural construction of the factors of the structure of sports performance. - Starting points for effective loading of the organism in the training process. Quantitative and qualitative aspect. - Biological basis of adaptation processes in terms of periodization. - Periodization of the structure of training and competition load in the development of alactic skills. - Periodization of the structure of training and competition load in the development of lactic skills. - Periodization of the structure of training and competition load in the development of aerobic skills. - Periodization of the structure of training and wrestling (competitive) load in the development of "combined" (sports games - intermittent loads) skills. - Dependence on the development, maintenance and loss of sports form. - Application of biochemical and physiological indicators in the periodization of training load and in the tuning of sports form.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-062/21	Course title: Research and development of speed abilities
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: After completing the education, the student demonstrates the acquired competencies by presenting a scientific problem in the selected area on the basis of current scientific journal, foreign language sources, where he analyzes the methodological approaches to solving the selected issue. For the presentation must get min.51 %. (100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 51%)	
Learning outcomes: The student masters the latest examples of research problems solved in the field of speed abilities in the world. Can characterize the causes of the effectiveness of supramaximal means of developing running speed. It controls the structure and factors determining speed abilities. He is able to design a procedure for examining these factors. Masters the knowledge of the effectiveness of the development of speed abilities in difficult conditions (fall, sledge, brakes, segment weights). He knows the current methodological problems related to research in the field of periodization of the development of speed abilities. Can formulate methodological problems of research into the development of speed abilities. Masters the knowledge of the influence of individual methods of development of speed abilities on changes in motor performance. He is able to give examples of solved research projects in sports games and in individual sports. He will develop a procedure and recommendations for further research and is able to practically demonstrate skills in data acquisition in the selected area on the basis of available modern diagnostic tools. He can formulate a scientific problem and, with appropriate methodological tools, implement the acquisition of new knowledge and can also interpret it in context, while he can also suggest a procedure for the use of knowledge in sports practice.	
Class syllabus: Examples of research problems solved in the field of speed capabilities in the world. Characteristics and effectiveness of supramaximal means of developing speed abilities, their structure and factors. Knowledge of the effectiveness of the development of speed abilities in difficult conditions (parachute, sledge, brakes, segment weights). Current knowledge in the field of periodization of the development of speed abilities. Methodological problems of speed abilities development research.	

Knowledge about the influence of individual methods of speed abilities development on changes in motor performance. Examples of solved research projects in sports games and in individual sports.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-060/21	Course title: Research and development of coordination skills
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Student performance evaluation: qualification degree Mid-term evaluation: none End of term evaluation: seminar paper (100 %)	
Learning outcomes: Students will become familiar with theory of coordination skills development. They will be able to apply the knowledge acquired in research and practice. They will develop skills needed for design of exercise programs specific to age and a particular sport as well as for evaluation of their effectiveness.	
Class syllabus: 1. Specificity of coordination skills development in individuals of various ages. 2. Specificity of coordination skills development in sports, which require their great level. 3. Design of sport-specific and health-oriented exercises programs focused on development of coordination skills and evaluation of their effectiveness.	
Recommended literature: 1. BROWN, L. Training for speed, agility, and quickness. Champaign, IL: Human Kinetics, 2014. 2. COOK, G. Athletic body in balance. Champaign, IL: Human Kinetics, 2003. 3. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-063/21	Course title: Research and development of strength abilities
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: After completing the education, the student demonstrates the acquired competencies by presenting a scientific problem in the selected area on the basis of current scientific journal, foreign language sources, where he analyzes the methodological approaches to solving the selected issue. For the presentation must get min.51 %. (100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 51%)	
Learning outcomes: The student masters the latest examples of research problems solved in the field of speed abilities in the world. Can characterize the causes of the effectiveness of supramaximal means of developing running speed. It controls the structure and factors determining speed abilities. He is able to design a procedure for examining these factors. Masters the knowledge of the effectiveness of the development of speed abilities in difficult conditions (fall, sledge, brakes, segment weights). He knows the current methodological problems related to research in the field of periodization of the development of speed abilities. Can formulate methodological problems of research into the development of speed abilities. Masters the knowledge of the influence of individual methods of development of speed abilities on changes in motor performance. He is able to give examples of solved research projects in sports games and in individual sports. He will develop a procedure and recommendations for further research and is able to practically demonstrate skills in data acquisition in the selected area on the basis of available modern diagnostic tools. He can formulate a scientific problem and, with appropriate methodological tools, implement the acquisition of new knowledge and can also interpret it in context, while he can also suggest a procedure for the use of knowledge in sports practice.	
Class syllabus: Examples of research problems solved in the field of strength abilities in the world. Characteristics and effectiveness of the latest means of developing force and speed-force capabilities, their structure and factors. Knowledge of the effectiveness of the development of strength abilities. Current knowledge in the field of periodization of the development of strength abilities. Methodological problems of research into the development of strength abilities. Knowledge about the influence of	

individual methods of strength development on changes in motor performance. Examples of solved research projects in sports games and in individual sports.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-059/21	Course title: Research and effectiveness of the development of endurance skills
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Continuous assessment: 50% - partial seminar work. Final evaluation: based on continuous assessment 50%, 50% - seminar work.	
Learning outcomes: The student knows the historical background of methods of development of endurance skills. The student masters the latest examples of research problems solved in the field of endurance skills in the world. He masters the structure and factors determining endurance skills. He is able to design a procedure for examining these factors. He can characterize the effectiveness of continuous and the effectiveness of interval methods of aerobic endurance development. He masters current knowledge about the effectiveness of the development of anaerobic endurance skills in individual sports and sports games. He can formulate methodological problems of research into the development of endurance skills. He masters examples of solved research projects in sports games and in individual sports.	
Class syllabus: Historical background of methods of development of endurance skills. Examples of research problems solved in the field. Characteristics and effectiveness of continuous methods of aerobic endurance development. Characteristics and effectiveness of interval methods for the development of endurance skills. Current knowledge about the effectiveness of the development of aerobic endurance skills in individual sports and sports games. Current knowledge about the effectiveness of the development of anaerobic endurance skills in individual sports and sports games. Methodological problems of research on the development of endurance skills. Examples of solved research projects in sports games and in individual sports.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-050/21	Course title: Social context of sport
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Discussion on the social determinants of relevant sports physical activity, which is the subject of the dissertation. Written work in the range of 5 pages including the elaboration of definitions of 5 terms that are relevant to the doctoral student's dissertation research. Distance defense of written work.	
Learning outcomes: The student is able to demonstrate in a sophisticated form an understanding of sport as a social phenomenon in the intentions of the study program of sports sciences. The student is able to extrapolate the development trends of the influence of the social sphere of society in individual historical stages and in socio-cultural contexts. He is able to perform a scientific analysis of the determinants of the sports movement.	
Class syllabus: Social anthropology and sport. Social conditions, motives and barriers to sports physical activities. Sport, politics and social policy. Manifestations of social pathology in sport. Social aspects of the professional position of coach, athlete, physical education and sports teacher. Humanistic and socially oriented sports activity, sports and physical education.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-051/21	Course title: Sport and Olympism
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Positive evaluation of the presentation at the seminar; acceptance of the final work. Seminar work on the topic of the 70s of the 20th century and the crisis in the Olympic movement. Sketch of Olympic negatives, critical views on sport and Olympism. Final evaluation: written work "The direction of the Olympic movement after the Olympic congresses in the years in the late 20th and early 21st century."	
Learning outcomes: The student understands the relationship between contemporary sport and Olympism as a philosophy of life not only against the background of the Olympic Games, but also in terms of the development of world society. He masters the extended issues of the relationship between sport and politics. He has knowledge of the management of world Olympism and the role of the International Olympic Committee. He thoroughly understands the issue of Olympic education and the direction of the Olympic movement in the world after the Olympic congresses in the years in recent decades.	
Class syllabus: Brief historical excursion into the ancient Olympic Games and the role of sport and religion within them. Educational aspects of the beginnings of the renewal of the modern Olympic Games. Pierre de Coubertin and his role in the development of sport as an educational environment. The resumption of the Olympic Games and the beginnings of neo-Olympism as a philosophy of life. A fundamental change in the direction of sports in general and at the Olympic Games. Pierre de Coubertin's resignation to pedagogical efforts at the Olympic Games. Significant commercialization and politicization of contemporary sport and the dominance of sports powers at the Olympic Games. Crisis moments in the activities of the International Olympic Committee in the 80s and 90s of the 20th century. The need for a renaissance of the educational role of sport.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-053/21	Course title: Sports chronobiology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 1. Elaboration of the final subject work with the prescribed minimum number of references (50%). 2. Individual presentation on a given topic (50%).	
Learning outcomes: The student is able to design a chronobiological experiment with respect to sports sciences; he/she knows special chronobiological methodologies of data collection and statistical procedures in their analysis. The student possesses the knowledge the course of diurnal changes of individual types of physical performance and understands their mechanisms. The student masters the specifics of adaptation to different types of training and known / assumed mechanisms of adaptation.	
Class syllabus: - Introduction to chronobiology - history, characteristics of biological rhythms. - Circadian rhythms - mechanisms of molecular clocks and their external manifestations with emphasis on the neuromuscular system, hormonal system and metabolism. - Daily changes in physical performance and their mechanisms. - Adaptive changes to time-specific training - strength, endurance, combined. - Special chronobiological test protocols with respect to physical activity.	
Recommended literature: 1. JANČOKOVÁ, Ľudmila et al. Chronobiológia od teórie k športovej praxi. Banská Bystrica: Belianum, 2013. ISBN 978-80-557-0634-4. 2. SEDLIAK, Milan. Steroidné hormóny pri telesnom zaťažení. Bratislava: Slovenská vedecká spoločnosť pre telesnú výchovu a šport, 2017. ISBN 978-80-89075-60-7.

Course ID: FTVŠ/dVP-052/21	Course title: Sports hermeneutics
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Positive evaluation of the presentation at the seminar; acceptance of the final work. Discussion on the topic of the dissertation and defense of one's own hermeneutic conception of meaning and understanding of the results of dissertation research. Description of a hermeneutic circle in relevance to one's own dissertation. Written work in the extent of 3 pages on the topic "Social utility and applicability of dissertation research results in practice".	
Learning outcomes: The student has acquired knowledge of historical and contextual forms of hermeneutics. He demonstrated a sophisticated understanding of the importance of the hermeneutics of sport for a student of a sports science study program.	
Class syllabus: Developmental transformations of the content of the term hermeneutics and its representatives. Content of the term sports hermeneutics. Hermeneutics of sport and the art of meaningful interpretation of relevant concepts of sports terminology. Hermeneutics of sport as a method of understanding the human dimension of sport. Hermeneutic circle in sports sciences. Understanding sport as a basis for scientific knowledge of sport.	
Recommended literature: 1. HOGENOVÁ, Anna et al. Hermeneutika sportu. Praha: Karolinum, 1998. ISBN: 80-7184-744-5. 2. HOGENOVÁ, Anna a Nad'a PELCOVÁ, (Eds.). Hodnoty ve výchově, umění a sportu. COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-054/21	Course title: Sports training
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Ongoing evaluation: Elaboration of programs: - sports training from selected sports 25% - literature annotations (at least 5 foreign sources of research character) - 25% Final evaluation: exam (50%)	
Learning outcomes: The student masters the content of basic and related concepts. He knows adaptation theories, means, forms and methods of training load, their connections and diagnostics. He has an overview of the latest theories and knowledge from sports training, which he can creatively apply in sports training projects. Can use scientific procedures to determine and control the general and special objectives of sports training projects. Can apply new methodological approaches in researching the problems of sports training. He is acquainted with the latest knowledge in the field of sports training through specific research projects and literature.	
Class syllabus: - Load and adaptation in sports training from the perspective of current research projects. - Development of fitness and coordination skills and the way of their diagnosis in sports training on the examples of research work. - Acquisition and improvement of sports skills (sports equipment) and the method of their diagnosis on the examples of research work. - Inter- and intra-individual research projects, experimental and ex post facto monitoring applied in sports training. - Current topics: spring locomotor systems and their development in sports training, neogenesis of muscle cells under the influence of load, modern approaches in the development of motor skills and abilities.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-055/21	Course title: Standardization of functional and motor tests
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Student performance evaluation: qualification degree Mid-term evaluation: none End of term evaluation: seminar paper (100 %)	
Learning outcomes: Students will become familiar with theory of standardization of functional and fitness tests. They will be able to apply the knowledge acquired in research and practice. They will develop skills needed for identification of basic test characteristics and for interpretation of test results.	
Class syllabus: 1. Test design. Test standardization. Fundamental characteristics of functional and fitness tests. Application in functional testing of physical performance. 2. Laboratory and field testing requirements. Objectivity. Reliability. Validity. Sensitivity. Specificity. 3. Examples of functional and fitness tests standardization.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-057/21	Course title: Technical and tactical preparation and their research in sports games
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Final evaluation: 50 % written seminar paper on a given topic, 50 % exam.	
Learning outcomes: The student will gain extended knowledge of the theory and didactics of sport games. He/she has knowledge of technical preparation in sport games, the knowledge of criteria of features and stages of learning sports techniques. He/she masters the psychological and physiological phases of learning individual game activities and collective game activities. Student masters the issue of laterality and transfer of motor skills and game skills. He/she has an overview of the theoretical basis of tactical and theoretical preparation, and an overview of the algorithmization and evaluation of tactical performance in sports games. He/she can use the methods of tactical preparation in sports training of sports players.	
Class syllabus: The concept, meaning, trainability of sports technique, stages of technical preparation, criteria and features of sports technique, learning phases in the acquisition of sports technique, psychological and neurophysiological bases of movement learning, content of general and special teaching of technique, learning methods, causes of technique stagnation, control, tests, technique training in children and adolescents, memory, forgetting, lateral transfer, vertical transfer, the relationship between speed and technique in sport games, the relationship between speed and individual game activities, individual tactics, group tactics, tactics of the whole team game, focus of practical tactical preparation and theoretical tactical preparation in sports games, algorithmization in training and preparation, formulas, signals, evaluation of tactical performance in sports games, tactical preparation vs game preparation, methods of tactical preparation, approaches to tactical preparation.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-056/21	Course title: The structure of sports performance
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 100%-91% - A, 90%-81% - B, 80%-71% - C, 70%-61% - D, 60%-51% -E, 50% and less FX Ongoing evaluation: - Participation, mastering of issues based on literature (30%) Final evaluation: - Written elaboration and presentation of the structure of sports performance in the selected sport (70%)	
Learning outcomes: The student masters the theory of the multilevel model of factors determining the level of sports performance. He has an overview of the historical and methodological context of research into the structure of sports performance. He masters the current paradigm of systemic-structural and genetic approach to studying the structure of sports performance. He distinguishes mathematically quantified models of the structure of sports performance compared to qualitative models of expert origin. He masters the methodology of research into the structure of sports performance using methods of multidimensional statistics with the application of partial and regression functions. Based on the content analysis and methodological approaches, he can create a research project on the structure of sports performance in a selected sport.	
Class syllabus: 1. Sports performance as a system of factors and the genesis of its research. 2. Multilevel model of sports performance structure. 3. Examples of empirical models of sports performance structure and methods of their construction. 4. Methodological problems of quantification of sports performance structure models. Multiple correlation analysis, partial, discriminant and factor analysis. 5. Consultation and compilation of a model of the structure of sports performance in the chosen sport. 6. Consultations and control on the above issues.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Physical Education and Sports	
Course ID: FTVŠ/dVP-065/21	Course title: Woman in Sport
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Overall course evaluation 100% -91% - A, 90% -81% - B, 80% -71% - C, 70% -61% - D, 60% -51% -E, 50% and less FX Final evaluation: elaboration of a seminar work on the issue of specificity of women in sports and in the context of the thematic scope of the dissertation theses.	
Learning outcomes: The student knows the theoretical basis of gender issues. He is able to scientifically analyze the position of women in sport in the historical context of changes and stereotypes in the concept of her social role. He knows the trends of changes in the body's self-perception and motives of sports. The student is able to analyze the specific factors of women's sports careers, the causes of its abandonment and the problems of women's employment in the physical education and sports movement. The student is able to synthesize, evaluate, extract and creatively use the analyzed knowledge in solving their own research.	
Class syllabus: 1. Gender aspects in women's sports, reflection on women's sports in society. 2. The position of women in the process of forming the relationship of children to physical activity. 3. Motivational factors of physical activity and sports of women. 4. Physical self-perception and physical appearance in relation to sports activity of girls. 5. Problems in the process of building women's sports careers. 6. Employment of women in sports organizations and the Olympic movement. Výskum v oblasti zdravotne orientovanej zdatnosti
