Exam dates will be published via AIS no later than the last week of the semester. Scale of assessment (preliminary/final): = 60/40.	
Learning outcomes: Upon successful completion of the course, students are able to explain in their own words the basic methodological concepts, methods of collecting research data, stages and principles of quantitative and qualitative pedagogical research. They are able to name and describe individual procedures of collection and empirically correct analysis of research data and procedures of their statistical evaluation. They can explain the methodological consequences of individual methods of compiling a research sample. They are able to design their own quantitatively oriented educational research, survey, or teacher action research and describe the procedures of independent research efforts. They can apply the acquired knowledge in the independent development of a research project.	

Class syllabus:

1. Pedagogical research - definition of basic terms: cognition, science in human cognition, scientific theory, research, pedagogical research, theory, practice, method, methodology. Relation of pedagogical research to practice (R&D). Research - action research - evaluation.
2. Planning, organization and implementation of field pedagogical research: Stages of research work. Research plan and diary of a pedagogical researcher. Research information preparation. Ethics in research work.
3. Thinking about a research problem: The difference between a topic and a research problem. Thinking and judgment of a researcher. Selecting the essential and distinguishing partial phenomena from the general background. Preparation of a research project.
4. Qualitative and quantitative research design: Comparison of qualitative and quantitative research, their philosophical background, goals, focus and procedures in the collection and processing of research data.
5. Quantitative oriented pedagogical research and its main phases: Determining the research problem. Variables and hypotheses and their place in pedagogical research. Hypothesis testing in scientific research. Measurement and quantification in pedagogical research.
6. Methods of research sample selection and determination of research data collection methods: research method, research tool, validity, reliability and correlation coefficient of research tool. Selection, study and preparation, or creation of tools for collecting research data.
7. Methods of research data collection: Observation, questionnaire, assessment scales, interviews, tests of knowledge and skills, sociometry, semantic differential and pedagogical experiment
8. Processing of obtained research data: Preparation for analysis, Analysis and interpretation of obtained research data (verbal or numerical). Discussion of research conclusions. Making recommendations for practice.
9. Computer data analysis: MS Excel, Statistics and others.
