## TABLE OF CONTENTS

1. J-1-OSe-006/21 Administration and Documentation in Nursing.....	3
2. J-1-OSe-001/20 Anatomy and Physiology.....	5
3. J-1-OSe-002/20 Biochemistry.....	7
4. J-1-OSe-003/22 Biophysics and Radiology.....	9
5. J-1-OSe-026/21 Clinical Propedeutics.....	11
6. J-1-OSe-025/21 Communication.....	13
7. J-1-OSe-SS1/22 Defence of bachelor thesis ( <b>state exam</b> ).....	15
8. J-1-OSe-021/20 First Aid.....	16
9. J-1-OSe-CJ1/20 Foreign Language (1).....	18
10. J-1-OSe-CJ2/20 Foreign Language (2).....	20
11. J-1-OSe-CJ3/21 Foreign Language (3).....	22
12. J-1-OSe-036/22 Gynecology and Obstetrics and Nursing (1).....	24
13. J-1-OSe-037/22 Gynecology and Obstetrics and Nursing (2).....	26
14. J-1-OSe-019/20 Health Education (1).....	28
15. J-1-OSe-020/20 Health Education (2).....	31
16. J-1-OSe-004/21 Hygiene, Epidemiology and Nutrition.....	33
17. J-1-OSe-034/21 Internal Medicine/Gerontology and Nursing (1).....	35
18. J-1-OSe-035/22 Internal Medicine/Gerontology and Nursing (2).....	37
19. J-1-OSe-046/22 Legal Aspects of Nursing.....	39
20. J-1-OSe-038/22 Management in Nursing.....	41
21. J-1-OSe-007/20 Medical Terminology.....	43
22. J-1-OSe-009/20 Microbiology.....	45
23. J-1-OSe-039/22 Neurology and Nursing.....	47
24. J-1-OSe-012/20 Nursing I-1.....	49
25. J-1-OSe-SS2/22 Nursing I. ( <b>state exam</b> ).....	52
26. J-1-OSe-013/21 Nursing I. (2).....	54
27. J-1-OSe-040/21 Nursing Practice (1).....	57
28. J-1-OSe-041/22 Nursing Practice (2).....	60
29. J-1-OSe-048/22 Nursing Practice (3).....	63
30. J-1-OSe-029/22 Nursing Research (1).....	67
31. J-1-OSe-042/22 Nursing Research (2).....	69
32. J-1-OSe-043/22 Nursing Research (3).....	71
33. J-1-OSe-010/20 Nursing Techniques (1).....	73
34. J-1-OSe-011/21 Nursing Techniques (2).....	75
35. J-1-OSe-014/20 Pathological Anatomy and Pathological Physiology.....	78
36. J-1-OSe-015/20 Patient s Needs and Nursing Process (1).....	80
37. J-1-OSe-016/21 Patient s Needs and Nursing Process (2).....	83
38. J-1-OSe-044/22 Pediatrics and Nursing (1).....	85
39. J-1-OSe-045/22 Pediatrics and Nursing (2).....	87
40. J-1-OSe-022/21 Pharmacology.....	89
41. J-1-OSe-005/21 Philosophy and Ethics in Nursing.....	91
42. J-1-OSe-049/21 Primary Nursing Care.....	94
43. J-1-OSe-030/22 Psychiatry, Mental Health and Nursing.....	97
44. J-1-OSe-017/21 Psychology I. (1).....	99
45. J-1-OSe-018/21 Psychology I. (2).....	101
46. J-1-OSe-031/22 Psychology II. (1).....	103
47. J-1-OSe-033/22 Sociology and Social Politics.....	105

48. J-1-OSe-008/22	Summer Practice (1).....	107
49. J-1-OSe-028/22	Summer Practice (2).....	110
50. J-1-OSe-023/21	Surgery and Nursing (1).....	112
51. J-1-OSe-024/22	Surgery and Nursing (2).....	115
52. J-1-OSe-047/22	Winter Practice.....	118

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-006/21	<b>Course title:</b> Administration and Documentation in Nursing
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 8s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 1	
<b>Recommended semester:</b> 1.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> CS (8 hours) study of the literature and preparation on the presentation. Students evaluation takes the form of one partial tests and oral presentation. Minimum threshold of success: 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 10/90	
<b>Learning outcomes:</b> The student is familiar with the legislation for the use of medical and nursing documentation in the conditions of the Slovak Republic. He will be able to construct and record information in the nursing documentation according to the stages of the nursing process. The student applies various formal records for use in specific situations in clinical practice. The student demonstrates critical skills in recording problem situations in medical documentation using the SBAR method.	
<b>Class syllabus:</b> Medical documentation - the importance of keeping medical and nursing documentation, structure. Legislative and ethical aspects of creating and maintaining medical and nursing documentation. Archiving of patient's medical records. Recording of patient health and related care data to documentation in individual phases of the nursing process. Quality and effectiveness of nursing care documentation. Assessment and measurement tools and scales as part of nursing documentation. Requirements for proper record keeping. Specifics of keeping documentation at the pediatric and gynecological and obstetric departments. Specifics of keeping documentation in the surgical and internal medicine departments. Specifics of keeping documentation in the psychiatric ward and in primary health care. SBAR in communication and documentation in nursing. Extraordinary events and their documentation. References of students to assigned topics in controlled self-study using the framework of evidence-based practice.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLFÚA/J-1-OSe-001/20	<b>Course title:</b> Anatomy and Physiology
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 40s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 6	
<b>Recommended semester:</b> 1.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> 100% participation in tuitions. Mark, according to test results (of subjects anatomy, physiology) at least 60 %. Mark: A: 95–100 %, B: 88–94 %, C: 77–87 %, D: 66–76 %, E: 60–65 %, FX: 59 % and less. Scale of assessment (preliminary/final): 5/95	
<b>Learning outcomes:</b> <b>ANATOMY:</b> The graduate of Anatomy understand principles of human body, its parts and organs construction up to such details, that the gathered knowledge is permanent and becomes a base for understanding of physiological and pathological processes and changes. His knowledge should enable him to be an adequate partner for physicians in the process of health care. <b>PHYSIOLOGY:</b> The Physiology aim is to acquire basic knowledge about physiological functions of the human organs and systems, and about the relations between physiological systems. The emphasis is on the physiological mechanisms understanding in complex form for clinical practice. Practical application of knowledge from Physiology extends skills of the student (e.g. blood taking, blood analysis), which is necessary for understanding of human physiology and direct clinical application.	
<b>Class syllabus:</b> <b>ANATOMY:</b> Heart. Arterial and venous system, blood circulation. Respiratory system. Digestive system. Urinary system. The male reproductive system. Female reproductive system. Lymphatic system. Central nervous system. Spinal cord. Spinal nerves. Oblongata, pons, midbrain. Cranial nerves. Diencephalon. Sensory pathways. Basal ganglia. Motor pathways - pyramidal, extrapyramidal tracts. Visual organ. The organ of hearing. Autonomic nervous system. Vertebrae. Skull. Respiratory system. Heart. Urogenital system. Nervous system - hemispheres. Skeleton of upper and lower limbs. Muscular system - muscles of the head, neck, trunk and extremities. <b>PHYSIOLOGY:</b> Physiology of blood (erythrocytes, leukocytes, trombocytes, haemocoagulation, blood groups, blood transfusion, basic blood examinations). Physiology of cardiovascular system (Physiology	

of the heart and vessels, basic clinical methods). Physiology of respiratory system (ventilation, mechanics of breathing, artificial ventilation, basic clinical methods). Physiology of gastrointestinal tract, metabolism and nutrition. Physiology of kidneys. Physiology of muscles. Thermoregulation. Physiology of nervous system, reflexes, pain, sleep, memory. Physiology of sensory organs, examination methods. Physiology of endocrine system.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚLBch/J-1-OSe-002/20	<b>Course title:</b> Biochemistry
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 20s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 1.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> Assessment of students is in the form of a test, minimum success rate: 60%. Rating: A: 91-100%, B: 81-90%, C: 73-80%, D: 66-72%, E: 60-65%, FX: 59% and less	
<b>Learning outcomes:</b> At the end of the course students should acquire basic information about the course of processes in metabolism of substances not only in a healthy human organism but also in the body of patients, understanding the nature and mechanisms of changes, understanding biochemical parameters coming from clinical-biochemical laboratories.	
<b>Class syllabus:</b> Organization and chemical composition of organisms - cell structure, chemical composition of cell - organic, inorganic substances, enzymes and coenzymes). Intermediate metabolism - characteristics of metabolic processes, basics of bioenergetics. biological oxidation, metabolism of carbohydrates, lipids, amino acids, nucleotides, tetrapyrroles. Genetic information - replication, transcription, translation. Basics of metabolic regulation Biochemistry of the gastrointestinal tract - oral cavity, stomach, pancreas, bile, small intestine, large intestine. Liver biochemistry. Kidney biochemistry. Biochemistry of the nervous system - structure, metabolism, principles of nerve transmission, vegetative nervous system. Biochemistry of the endocrine system acid-base balance Blood plasma proteins Preparation of biological material for biochemical examination. Biochemical composition of living systems and its importance for metabolism and clinical-biochemical diagnostics. Possibilities of determination of analytes, pH and minerals in biological fluids (blood, urine, cerebrospinal fluid ...) Glucose testing. Diabetes mellitus and its laboratory diagnostics, glycosylated hemoglobin, ketone bodies. Examination of lipid profile. Atherosclerosis and its laboratory diagnostics.	

Examination of protein and non-protein nitrogenous substances. Urine examination for the presence of physiological and pathological components (glucose, proteins, ketone bodies, urobilinogen). Jaundice and its laboratory diagnostics  
Examination of minerals and acid-base balance parameters. Enzymes in clinical-biochemical diagnostics

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚLBf/J-1-OSe-003/22	<b>Course title:</b> Biophysics and Radiology
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 12s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 2.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Recommended prerequisites:</b> Basic characteristics of the principles of biophysical processes in a human body. Biophysical principles of diagnostic and therapeutic methods in medicine and nursing practice. Principal schemes of protection against ionizing and non-ionizing radiation (limits, an efective dose and personal dosimetry).	
<b>Course requirements:</b> Final credit test. Scale of assessment (preliminary/final): 100	
<b>Learning outcomes:</b> After completion of the subject Biophysics and radiology, students are able to master the basic physical and physical-chemical processes in biological systems and human body. Students understand biophysical principles of physiological and pathological processes in humans at a level of a cell, tissues and the organ systems. They know and apply to practice the basic biological effects of physical factors affecting the human body and a protection against their harmful influences. They master the biophysical principles of medical instrumentation used in diagnostic and some therapeutical methods. They know the principles of health protection against ionizing radiation, and the basics of dosimetry.	
<b>Class syllabus:</b> -Cell membrane structure and function. Transport mechanisms. Resting membrane potential. -Action potential, origin, spread. Synaptic transmission. -Biophysics of muscle contraction. -Biophysics of respiration. -Biophysics of blood circulation. -Biophysics of sound perception and light signals. -Interaction of mechanical and meteorological factors with living systems. -Properties and biological effects of ionizing and non-ionizing radiation. -Biophysical principles of modern imaging diagnostic and therapeutic methods using ionizing and non-ionizing radiation in medical and nursing practice.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-026/21	<b>Course title:</b> Clinical Propedeutics
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 24s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 4.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚA/J-1-OSe-001/20 - Anatomy and Physiology	
<b>Course requirements:</b> CS (28 hours) study of literature and preparation for the test. CPO (28 hours) anamnesis collection, recording of anamnestic data, physical examination and recording of physical examination findings. The evaluation of students takes place in the form of a written knowledge test and evaluation of the written elaboration of anamnestic data and physical examination. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> By completing the course, the student will demonstrate theoretical knowledge to take anamnesis and assess the overall condition of the patient. She / he can implement procedures of physical examination of individual systems. Subsequently, he can evaluate the anamnestic data and symptomatology of the disease and can assess the patient's condition with a focus on identifying cases requiring urgent medical and nursing intervention. The student will demonstrate knowledge of functional, imaging, endoscopic examination methods and punctures, the preparation of the patient for the given examinations, care during and after the examination. The student can apply the basic practical skills in clinical propedeutic in clinical work and understand the need for interdisciplinary and multidisciplinary teamwork. In order to streamline and standardize the communication of (critical) events in clinical nursing practice, the student can use the structured method of SBAR communication.	
<b>Class syllabus:</b> Anamnesis, methodology and data entry. Physical examination of the patient, methodology of physical examination methods and recording of findings from the physical examination. General examination of the patient (status presens generalis) and recording of findings from the overall examination. Examination of the cardiovascular system, assessment and analysis of subjective and objective symptoms (chest pain, shortness of breath, oedema, fatigue, palpitations, syncope, claudication, rest pain), another anamnesis. Basic principles of ECG recording evaluation. Clinical and functional examination methods of the vascular system.	

Examination of the respiratory system, assessment and analysis of subjective and objective symptoms (shortness of breath, cough, expectoration, wheezing, stridor, chest pain, drowsiness), another anamnesis. Functional examination methods.

Abdominal examination, assessment and analysis of subjective and objective symptoms (swallowing symptoms, nausea and vomiting, abdominal pain, constipation, diarrhoea, rectal bleeding, melena, generalized abdominal enlargement, jaundice and pruritus, appetite and weight). Examination of the uropoetic system, symptoms of the lower bladder, other anamnesis. Renal function tests.

Examination of the patient's neurological condition, assessment and analysis of subjective and objective symptoms (dizziness, headache, numbness and weakness, tremor, syncope, convulsions, visual symptoms), another anamnesis.

Examination of the eyes, ears, nose and neck, assessment and analysis of subjective and objective symptoms: eyes (redness, diplopia, vision loss, colour vision disorder, other anamnesis), ears (otalgia, otorrhea, dizziness, hearing loss, tinnitus, injury ear, deformities), nose (obstruction, secretion, epistaxis, sneezing, olfactory disorders, deformities, pain), neck (pain, pharyngeal globe, nodules, dysphonia, halitosis, stridor).

Examination of the musculoskeletal system, assessment and analysis of subjective and objective symptoms (pain, stiffness, oedema, crepitus, deformities, weakness, impaired sensitivity, loss of function, extra-articular symptoms), another anamnesis.

Examination methods - punctures (patient preparation, care after puncture). Endoscopic examination methods (patient preparation, examination process, nurse interventions, post-examination care). X-ray examination methods (patient preparation, examination process, nurse interventions, post-examination care).

Visit. Assistance with the patient's visit and examination. Nurse visit.

Admission, translation and discharge of the patient.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚPAs/J-1-OSe-025/21	<b>Course title:</b> Communication
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 12s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 1	
<b>Recommended semester:</b> 4.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> Student assessment takes form of preparation and presentation of the assignment (containing 12 hours of monitored self-study), a minimum limit is: 60 %. Evaluation: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, FX: 59 % or less Scale of assessment (preliminary/final): 0/100	
<b>Learning outcomes:</b> After completion of the subject the student obtains fundamental information about interpersonal communication in nursing, this subject contributes to the development of the communication skills of students especially regarding patient-nurse communication. Using the model situations and role plays, student can adequately respond to the different situations in communication, for instance anamnestic and educational interview with patients, active listening, conflict situations solving, emotionally demanding communication.	
<b>Class syllabus:</b> The significance and specifics of communication in the health care professions. Nonverbal communication (nvk): components and importance of nvk in professional communication, Self-knowledge, social skills, presentation in public. Assertiveness in communication and its development, Criticism, coping with the affective attack in communication. Interview: types of professional interview, types of questions. Active listening and empathy. Decision-making process in groups, cooperation. Conflicts, communication styles in conflict situations. Specifics of communication with selected groups of patients. Communication in emotionally demanding situations, patients reactions to the negative prognosis.

<b>Educational level:</b> I.	
<b>Recommended prerequisites:</b> subjects of study program core	
<b>Course requirements:</b> The state exam can be carried out by the student after the fulfillment of the obligations stated in study program.	
<b>Learning outcomes:</b> The graduate knows the basics of scientific work in the field of nursing and methods of obtaining scientific and professional information. He is capable of developing nursing practice, critical thinking and exploiting results of the research. The graduate knows the basics of work in a multimedia environment and knows the basics of one world language. The graduate enters into practice as a convinced defender of the independence of his profession and modern trends in nursing theory and practice. He can follow the principles of nursing ethics, which he is a carrier of.	
<b>Class syllabus:</b> Scientific methods and their classification. Ethical aspects of nursing research. Operation with professional literature and other documents. Searching for literary sources, their using and processing. Processing and storage of professional information. Citation in text. Reference list. Research project and its phases. Characteristics and importance of the particular phases of the research process. Formulation of research problems, questions and hypotheses. Possibilities of research problems determination in nursing, proposal of their solution, possibility of verification, method selection. Criteria for selecting a research tool. Preparation and processing of acquired empirical data. Descriptive statistics and its application in data processing. Qualitative methods. Qualitative data analysis. Casuistry - case study. Preparation and application. Interpretation of acquired data, discussion, conclusions. Formal and content requirements of the bachelor thesis. Methodology for the processing of verbal responses. Presentation of the results - verbal, written. Language and scientific style of thesis. Preparation of presentation, preparation for defense.	
<b>State exam syllabus:</b>	
<b>Recommended literature:</b> Study literature for the nursing study program. Available on: <a href="https://www.jfmed.uniba.sk/fileadmin/jlf/Pracoviska/akademicka-kniznica-a-audiovizualne-stredisko/povinnaa_odporucana_literatura/21-22/osetrovatelstvo_-_bakalarske_studium__6_.pdf">https://www.jfmed.uniba.sk/fileadmin/jlf/Pracoviska/akademicka-kniznica-a-audiovizualne-stredisko/povinnaa_odporucana_literatura/21-22/osetrovatelstvo_-_bakalarske_studium__6_.pdf</a>

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.KAIM/J-1-OSe-021/20	<b>Course title:</b> First Aid
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 8s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 1	
<b>Recommended semester:</b> 1.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> 100% participation in practical exercises, successful completion of a credit test. Students are evaluated for their theoretical preparation for practical exercises and active participation in practical teaching - mastering and solving model cases. Scale of assessment (preliminary/final): Exam	
<b>Learning outcomes:</b> After completing the course, the student will gain an overview of the position of first aid in medicine, learn to quickly orient themselves in critical situations and properly participate in maintaining health, preventing further damage and saving lives. The student will be motivated for the next study of medical disciplines. Emphasis is placed on individual and group solutions to acute problems and the acquisition of basic clinical skills.	
<b>Class syllabus:</b> The importance of first aid. Guiding principles for first aid. The chain of survival. Basic life-saving operations (head tilt, first aid for choking on foreign bodies, recovery position). BLS - BasicLifeSupport - basic emergency resuscitation. How to use the AED (Automatic External Defibrillator). First aid for traumatic life-threatening conditions (bleeding, wounds, dressing techniques, dislocations, fractures, head, neck, chest, abdomen and pelvis injuries, polytrauma, burns, frostbite, bites and stings, drowning). First aid for non-traumatic life-threatening conditions (heart attack and chest pain, asthma attack, shortness of breath and respiratory failure, stroke, seizures, diabetic emergencies, unconsciousness, anaphylaxis, poisoning, sudden childbirth). Practical skills in specific situations - proper extraction of the injured unconscious from the car, shooting a motorcycle helmet.	
<b>Recommended literature:</b> First aid, CPR, and AED. Alton L. Thygerson, medical writer; Steven M. Thygerson, medical writer; Benjamin Gulli, medical editor; Gina Piazza, medical editor; American College of Emergency Physicians; Jones and Bartlett Publishers, 2016 ERC guidelines 2021

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-019/20	<b>Course title:</b> Health Education (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 14s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 1.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> CPO (18 hours) elaboration of semestral thesis, preparation and presentation of educational materials for individuals, families and communities The evaluation of students takes place in the form of evaluation of the presentation of educational materials and evaluation of the semestral thesis. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60%; minimum percentage to succeed is 60%. Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> By completing the course, student gains basic knowledge and understanding of health issues, health promotion and disease prevention. Student will be familiarized with the roles of multidisciplinary team in the disease prevention and promotion of the health of an individual, family and community. Based on the usage of the method of educational process, the student is competent to assess the educational needs of a healthy individual, family and community. The graduate of the course will be able to define the basic concepts and key terms: health, disease, health promotion, prevention... The student will be able to integrate knowledge from the humanities and natural sciences into the context of health education; will be able to identify risk factors affecting health, lifestyle and the environment; will be competent to assess and identify educational needs in a healthy individual, family and community. Completion of the course also contributes to the formation of the student's proper attitude towards his/her health. In order to streamline and standardize the communication of (critical) events in nursing practice, the student uses the structured method of communication by SBAR.	
<b>Class syllabus:</b> Health education, content and objectives of the course. Definition of basic concepts: health, disease, health determinants, health promotion and disease prevention. National Health Promotion Programme - Health for All in the 21st century. Primary, secondary and tertiary prevention.	

Assessment of health and factors affecting health. Personal, social and demographic impacts on health. Social relations and their impact on health. Illness as the cause of disruption of social support environment.

Participating and interacting in the group.

Health Programmes.

Nutrition, eating habits and their impact on health.

Physical activity, exercise and importance for health.

Mental health.

Identification of educational needs. Methods of data collection – observation, interview, questionnaire measurement and analysis of the data obtained.

The educational process – assessment of the educational needs of individuals, families, communities.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-020/20	<b>Course title:</b> Health Education (2)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 12s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 2.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-019/20 - Health Education (1)	
<b>Course requirements:</b> CPO (28 hours)preparation of education methods, elaboration of semestral thesis (preparation of educational plan), presentation of implemented educational plans. The evaluation of students takes place in the form of evaluation of the presentation of educational methods and evaluation of the semestral thesis. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60%; minimum percentage to succeed is 60%. Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> By completing the course, the student acquires knowledge about educational programmes and educational plans for healthy and sick individuals, families and communities. Based on the usage of the method of educational process, the student is able to assess the educational needs of a healthy individual, family and community resulting in the determination of the educational diagnosis, planning, implementing and evaluating the educational process. The graduate of the course will be able to plan and implement the educational process for an individual, family and community; will be able to plan and implement the educational process for an individual, family and community in relation to the concrete disease; will be able to plan and implement the educational process for an individual of any age. Completion of the course also contributes to the formation of the student's proper attitude towards his/her health. In order to streamline and standardize the communication of (critical) events in nursing practice, the student uses the structured method of communication by SBAR.	
<b>Class syllabus:</b> Diagnosis of the educational process and determination of the educational diagnosis. Selected nursing diagnoses related to health promotion and disease prevention. Educational programmes, plans and methodological processing. Planning the educational process. Forms of organization and principles in the educational process. Educational strategies and methods. Evaluation of the effectiveness of educational interventions.	

Specific problems of childhood in relation to the education.  
 Specific problems of adolescence in relation to the education.  
 Specific problems of adulthood in relation to the education.  
 Specific problems of the elderly in relation to the education.  
 Planned Parenthood.  
 Health programmes in communities.  
 Activities to promote health in communities.  
 Planning and implementation of the educational programme.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚVZ/J-1-OSe-004/21	<b>Course title:</b> Hygiene, Epidemiology and Nutrition
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 18s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 3.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚA/J-1-OSe-001/20 - Anatomy and Physiology and JLF.ÚMI/J-1-OSe-009/20 - Microbiology	
<b>Course requirements:</b> <b>EVALUATION:</b> Requirements for successful completion of the course: a/ mandatory attendance at lectures (1 point per hour) (max. 18 points) Only one excused absence is allowed (in accordance with Study Rules of JFM CU) – however, points are not counted unless appropriately substituted/compensated (the form assigned by the respective teacher). b/ pre-exam test 12 questions (max. 12 points) c/ Exam - test (max. 70 points): 35 questions (1 question per 2 points) <b>Final evaluation:</b> Achieved points score Evaluation 100 – 91 A (excellent - 1) 90 – 81 B (very good - 1, 5) 80 – 73 C (good - 2) 72 – 66 D (satisfactory - 2,5) 65 – 60 E (sufficient - 3) 59 and less Fx (fail - 4) For successful completion of the course, achieving at least 60 points in final evaluation is needed. Scale of assessment (preliminary/final): 100/100	
<b>Learning outcomes:</b> After completion of the subject the student is able to apply basic knowledge of epidemiology and hygiene branches. Student understands nature of epidemic process, principles of immunization, sterilization, disinfection, disinfection and control of animal pests. The student is able to identify the major epidemiological characteristics of communicable and non-communicable diseases and is able to apply knowledge in the form of preventive and repressive measure. The student understands environmental factors of living and working places, ways of their identification, monitoring	

and control, preventive intervention programs. The student understands the role of hygiene and epidemiology in public health.

**Class syllabus:**

Public Health – history, definition, terminology and classification. Epidemiology - History, definition, distribution, status in public health. The process of spreading disease, outbreaks, preventive and repressive measures. Distribution of communicable diseases, epidemiological characteristics of particular groups, preventive and repressive measures. Hospital infections and their prevention. Epidemiological methods of work. Non-infectious and clinical epidemiology. Introduction to tropical medicine and epidemiology. Hygiene - history, definition, classification, position within the public health. Environmental hygiene. Nutrition hygiene and articles of daily use. Hygiene of children and adolescent. Preventive occupational medicine. Radiation hygiene. Hospital hygiene. Identification and monitoring of environmental factors (physical, chemical, biological, psychosocial) and health determinants influencing the health of individuals and populations. Preventive intervention strategies.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-034/21	<b>Course title:</b> Internal Medicine/Gerontology and Nursing (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 40s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 4	
<b>Recommended semester:</b> 4.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚPF/J-1-OSe-014/20 - Pathological Anatomy and Pathological Physiology and JLF.ÚO/J-1-OSe-016/21 - Patient's Needs and Nursing Process (2)	
<b>Course requirements:</b> CS (50 hours) study of literature and preparation for the test. CPO (50 hours) written semester work focused on the education of patients with diseases of internal organs. The evaluation of students takes place in the form of a written knowledge test and evaluation of the elaboration of a semester work. The minimum percentage to succeed is 60 %. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> By completing the course, the student can define and characterize the mechanism of origin, symptomatology, clinical picture, and diagnosis of diseases of internal organs, conservative therapeutic and nursing interventions. Based on a structured nursing assessment, she / he can identify the patient's nursing problems, formulate nursing diagnoses, plan, justify and implement nursing interventions in patients with acute and chronic diseases of internal organs. He / she can apply the knowledge gained from lectures and practical exercises to the solution of nursing problems in selected, the most common diseases in the internal medicine clinic. The student can graduate of the course works by the method of the nursing process in a specific group of patients with diseases of internal organs. The student can synthesize knowledge from medical, nursing and humanities disciplines with an emphasis on the patient's clinical condition, diagnostic, therapeutic and preventive-educational interventions, and in clinical practice can provide nursing care at the level of the nurse's competencies and in cooperation with other health professionals.	
<b>Class syllabus:</b> Internal Nursing. Cardiology: Primary, secondary and tertiary prevention of cardiovascular diseases and role of nurses in no pharmacological treatment. Ischemic heart disease – acute/chronic forms. Arterial hypertension. Acute states in cardiology. Pneumology: Chronic bronchitis. COPD. Bronchial asthma. Pneumonia. Pulmonary tuberculosis.	

Gastroenterology: Diseases of oesophagus and diseases of stomach. Functional disorders of GI tract. Peptic ulcer disease of stomach and duodenum. Diseases of colon and rectum. Functional disorders of GI tract - obstipation, diarrhoea. Nonspecific inflammatory bowel diseases. Acute and chronic pancreatitis. Hepatic diseases (chronic hepatitis, cirrhosis).

Endocrinology: Diseases of thyroid gland.

Diabetology: Diabetes mellitus, acute and chronic complications of diabetes mellitus. Diabetes mellitus and metabolic syndrome.

Disorders of nutrition and internal environment.

Nursing care about patient with disease of cardiovascular, bronchopulmonary, gastroenterology, endocrinology system and disorders of nutrition and internal environment.

<b>Recommended semester:</b> 1.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b>	
<b>Learning outcomes:</b> The aim of Latin teaching is to acquire terminological competence, i.e. capacity of accurate and correct usage of medical language at work with terminological materials presented in oral and written way, as well as acquisition of basic knowledge of general medical terminology.	
<b>Class syllabus:</b> 1. Historical and linguistic introduction to medical Latin A brief overview of the history of medical terminology. Introduction to Latin grammar # pronunciation, syllable length, accent. Noun declensions and their overview. Structure of multiword terms, close and loose attribute, prepositional phrases. Reading with correct pronunciation and meaning assessment. 2. First Latin and Greek declensions First Latin declension nouns and adjectives. First Greek declension nouns. Combination of a noun and an adjective. Word-formation characteristics of one-word terms, a noun suffix -ūra. Ad illustrandum: the term "pit" in anatomical terminology, various meanings of the terms "seam" and "fissure". 3. Second Latin and Greek declensions Second Latin declension nouns – masculine and neuter gender, gender exceptions - feminines. The rule for all neuters of all declensions. Second declension Greek nouns - masculines and neuters. Second declension adjectives. Adjective word-formation suffixes # suffix -ōsus, a, um. Substantivized adjectives of first and second declension. 4. Third Latin declension – consonant stems Third declension characteristics. Consonant declension - masculine and feminine nouns.	

Consonant declension - neuters.

Medical terms of third declension ending in -us.

Third declension nouns combined with first and second declension adjectives.

Expressing "side" in clinical diagnoses.

Substantive word-formation suffixes: -or and -iō.

#### A TEST

5. Third Latin declension – vowel stems

Vowel declension (masculines, feminines and neuters).

Definition of vowel declension nouns.

Special declension of the pattern "febris" type nouns.

Differences between the patterns "corpus" and "rēte".

Latin diminutives.

Ad illustrandum: names of body openings in anatomical nomenclature, various types of bone fragment displacement in a fracture.

6. Fourth and fifth declensions

Fourth declension nouns - masculines, neuters, gender exceptions - feminines.

Adjective suffix -oīdeus, a, um.

Ad illustrandum: Latin equivalents of the terms "cavity" and "channel".

Fifth declension nouns.

Combining fourth and fifth declension nouns with adjectives of first and second declension. Specific features of the term "speciēs".

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚMI/J-1-OSe-009/20	<b>Course title:</b> Microbiology
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 14s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 1.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> - it is obligatory to be present at practicals (1 absence is tolerated) - test during the semester Exam: End study evaluation of students is based on written exam – test. Scale of assessment (preliminary/final): 25%/75%	
<b>Learning outcomes:</b> The student receives information from bacteriology, virology, parasitology and mycology, about their structure, metabolism, pathogenic potential and pathogenesis of infectious diseases, genetics and antibiotics used for the treatment as well as methods of desinfection and prevention (vaccination included). The student is trained to use principal diagnostical procedures, understand their theoretical background, indication and interpretation. The student is able to manage the most common ways of sampling of infectious material, to process it for microscopi, cultivation, identification and ATB susceptibility and tools of pathogeneity testing. Theoretical knowledges are based on study of etiology of infections of systems.	
<b>Class syllabus:</b> Introduction to microbiology, Structure of bacterial cell, Physiology and metabolism of bacterial cell, Genetics of bacterial cell, .Antibiotics and resistance, Safety in microbiological laboratory,organization of study, Microscopy, Cultivation, inoculation, Identification of bacteria. Cultivation media. Anaerobic bacteria cultivation. ATB susceptibility testing, Taxonomy of bacteria, Bases of virology, parasitology, mycology, HIV and prions, Systemic diagnosis of infection ethiology

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-039/22	<b>Course title:</b> Neurology and Nursing
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 20s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 6.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-024/22 - Surgery and Nursing (2) and JLF.ÚO/J-1-OSe-035/22 - Internal Medicine/Gerontology and Nursing (2)	
<b>Course requirements:</b> CS (40 hours) study of the literature and preparation on the test CPO (30 hours) study of the literature and draw up of a written termly work on a selected topic in neurology and nursing. The evaluation of students is carried out through written test, termly work and oral exam; the minimum percentage to succeed is 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 40/60	
<b>Learning outcomes:</b> Student after complete a subject can describe basic information on the characteristics, diagnosis, etiopathogenesis, clinical symptomatology, treatment of selected neurological diseases; the specifics of nursing care of the patient with selected neurological diseases; the specifics of communication with the patient in selected neurological diagnoses; risk factors for falls in patients with selected neurological diseases; the areas of education of patients with selected neurological diseases and their family members. Student can use selected measurement tools in assessing the needs and problems of a patient with neurological disease and realize and can perform a assessment of patients with a neurological disease.	
<b>Class syllabus:</b> Common neurological tests and investigations. Headache. Consciousness changes. Dementia. Multiple sclerosis. Neurodegenerative diseases of brain. Motor neuron diseases. Back pain. Brain stroke. Specifics of nursing care of patients with selected neurological diseases. Specifics of communication in patients with neurological diseases. Specifics nursing care of patients with selected neurological diseases at risk of falls. Fall risk assessment, including fall risk factors for specific falls risk diagnoses, nursing diagnostics and preventive interventions to reduce the risk of falls. Education of patients and family members in selected neurological diseases. Nursing assessment and objectification of patient needs and problems with using of appropriate measurement tools.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-012/20	<b>Course title:</b> Nursing I-1
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 22s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 2.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> CS (25 hours) study of the literature and preparation for the tests. The evaluation of students is carried out through 2 written tests; the minimum percentage to succeed is 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> After completing the subject, the student can follow legal, ethical and professional standards for the nursing profession and can implement them in practice. He/she will demonstrate understanding factors influencing the advancement of nursing. He/she can apply the knowledge of selected classification systems in nursing to the nursing practice. He/she can describe and can demonstrate practically the development process of standards and care maps. He/she will demonstrate understanding, can describe the characteristics of selected evaluative and measuring techniques and can use them to assess particular clinical problems of the patient. The student will demonstrate understanding the basic knowledge from the patient safety issue and can implement them in nursing practice, emphasizing the risk of falls and risk of pressure ulcers in assessment, diagnostics, and planning nursing interventions.	
<b>Class syllabus:</b> Nursing as an applied scientific discipline. Nurse's function and role. Nurse's working methods. Fundamental documents of the nursing profession, impact on the professional training. Professional organization and its importance. Registration and regulation of the nursing profession. Factors influencing the advancement of nursing. Standardized terminology and classification systems in nursing: NANDA, NIC, NOC. Standards, development and its implementation in nursing practice. The development process of standards – structural, processual and evaluative criteria. The method of the nursing audit. The importance of standardization of nursing care, quality of nursing care. Care maps. Evaluative and measuring techniques in nursing. Assessment tools in nursing in the context of nursing care plans.

## STATE EXAM DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-SS2/22	<b>Course title:</b> Nursing I.
<b>Number of credits:</b> 5	
<b>Educational level:</b> I.	
<b>Recommended prerequisites:</b> subjects of study program core	
<b>Course requirements:</b> The state exam can be carried out by the student after the fulfilment of the obligations stated in study program.	
<b>Learning outcomes:</b> <p>The graduate knows the principles of nursing and he can apply them in his profession. He is generally educated and professionally prepared to understand the relationship between nursing science, biomedical sciences, social sciences and human sciences and he can transform this knowledge into the holistic approach in nursing practice. The graduate has theoretical knowledge from the fields that describe the organs and systems of a healthy and sick person, deal with his psychological processes and characteristics, the social environment, cultural influences, as well as his spirituality, belief and world-view so he can be able to support and protect health, prevent diseases, educate and motivate people to healthy lifestyle of individuals, family and the entire community and to provide quality nursing care. The graduate has skills and abilities to perform nursing activities for people in health and disease from prenatal period to the period of dying and death. The graduate has theoretical and practical skills to adequately choose a nursing model and use the nursing process. The graduate is ready to perform tasks of the nursing profession. He has the ability to manage and provide nursing care - preventive, educational, supportive, curative, rehabilitative or helpful - to individuals, families and groups. He has the ability to actively and effectively integrate into the health team. The graduate understands man as a result of the interaction of biological, physical, chemical, psychological, social, spiritual and other influences of the external and internal environment on man. The graduate knows the basics of scientific work in nursing and methods of obtaining scientific and professional information. By study of nursing, the graduate gains the motivation to further personal and professional growth through the lifetime learning. He / she is governed by the legislation that is necessary for the performing of nursing profession. The graduate knows the basics of work in a multimedia environment and knows the basics of one world language. The graduate has the assumptions to continue in the next study. The graduate enters into practice as a convinced defender of the independence of his profession and modern trends in nursing theory and practice. The graduate is the carrier of humanistic principles; he respects the veneration of life, human dignity and observation of human rights. He develops the ability of empathy. He adheres to the principles of nursing ethics, which he is a carrier of. The graduate is ready to manage the nursing process in all types and at all levels of health care facilities. He recognizes the organizational principles of various types of primary, secondary and tertiary health care facilities. The graduate has theoretical and practical skills to adequately choose a nursing model and use the nursing process. The graduate is ready to perform tasks of nursing profession. He has the ability to manage and provide nursing care - preventive, educational, supportive, curative,</p>	

rehabilitative or helpful - to individuals, families and groups. He / she has the ability to actively and effectively integrate into the health team. He is capable of developing nursing practice, critical thinking and exploiting results of the research.

**Class syllabus:**

Theoretical part: Legislative standards guiding the nursing practice. The importance of professional organizations (ICN, SK SaPA). Standards of nursing practice, development (methodology of DySSy development) and their application in practice. Standard terminology and classification systems in nursing. The importance of classification systems in the particular phases of the nursing process. Development of nursing diagnostic (NANDA-I classification system) and Gordon's functional and dysfunctional health patterns. Selected conceptual models: Nightingale's, Henderson 's, Orem's model of self-care, Leininger's model of transcultural nursing. Nursing ethics, basic principles, ethics code, information issues. Moral problems solving in nursing practice. Specifics of nursing care in internal medicine, surgery, pediatrics, gynaecology and obstetrics, neurology, psychiatry, in community nursing in relation to: acute conditions, chronic conditions, cardiovascular diseases, diseases of respiratory system, kidneys and urinary tract, gastrointestinal tract, locomotory apparatus, blood, skin, metabolic diseases, nutritional and internal medium disorders, oncological diseases, geriatric patients, dying patients and their families. Nursing process - method and nursing care of selected needs of patient. Educational process. Roles of nurse in primary care.

Practical part: Providing the individualized nursing care by the method of nursing process in the selected clinical environment. Performing the standard nursing procedures and techniques according to the nursing competency. Performing the records into the health documentation of patient. Performing the education of patient and relatives.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-013/21	<b>Course title:</b> Nursing I. (2)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 16s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 3.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-012/20 - Nursing I-1	
<b>Course requirements:</b> CS (28 hours) study of the literature and preparation for the tests. The evaluation of students is carried out through 2 written tests and oral exam; the minimum percentage to succeed is 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 40/60	
<b>Learning outcomes:</b> After completing the subject, the student can define and characterize particular conceptual models, theoretical assumptions, background and metaparadigms. He/she can describe the individual Gordon's functional and dysfunctional health patterns within the context of nursing care documentation. He/she can express the context of the documentation, can make correct recordings, and can demonstrate the utilization of selected evaluative and measuring techniques in assessing the patient's selected clinical problems. He/she can describe the issue of missed nursing care, can justify prevention strategies and can actively implement them in nursing practice. The student will demonstrate understanding the selected risks associated with the provision of nursing care, with an emphasis placed on nosocomial infections and medication errors.	
<b>Class syllabus:</b> Classification of models and theories. Metaparadigms. Florence Nightingale's characteristics of the period and conditions influence Nightingale's environmental model; central components. Importance of Nightingale's work. Biomedical model. Virginia Henderson – central components of the model. Definitions of the basic concepts. Definition of nursing. Needs in Henderson's work. Specifics of the nursing process, according to Henderson. Gordon's functional and dysfunctional health patterns, theoretical assumptions and background, basic concepts. Issue of multicultural nursing. Leininger's model, theoretical assumptions and background, basic concepts. Orem's conceptual model. Theoretical assumptions and background, basic concepts. The concept of missed, rationed, unfinished nursing care. Predictors, reasons and outcomes.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-040/21	<b>Course title:</b> Nursing Practice (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 90s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 4	
<b>Recommended semester:</b> 3.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-006/21 - Administration and Documentation in Nursing and JLF.ÚO/J-1-OSe-020/20 - Health Education (2) and JLF.ÚO/J-1-OSe-015/20 - Patient s Needs and Nursing Process (1) and JLF.ÚO/J-1-OSe-010/20 - Nursing Techniques (1)	
<b>Course requirements:</b> CPO (40 hours) preparaton and realization nursing process Subject completion is based on ongoing student evaluation during nursing practice in the following areas: (1) theoretical knowledge, (2) practical skills, (3) performing nursing process method (OSP) and nursing documentation. Minimum rate of success: at least 60 %. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 100/0	
<b>Learning outcomes:</b> Within completion of the subject student can apply fundamental principles of nursing care provision and standard procedures of selected nursing techniques and interventions while providing nursing care to the patients in real conditions of clinical nursing practice. Student can implement reliable information for safe healthcare practice. Within completion of the subject student can synthesize the knowledge from prerequisite disciplines and applies them to real clinical nursing practice. Student improves his/her skills in the implementation of basic nursing techniques, procedures and interventions while providing individualized nursing care to patients with selected diseases and conditions in surgery and internal medicine. With an emphasis on a holistic approach to the patient the student improves his/her skills in the implementation of nursing process in real conditions of clinical nursing practice – to be able to develop the competence of critical thinking in assessing biological, psychological, social and spiritual needs of a patient, identifying his/her actual or potential problems, formulating nursing diagnoses, planning and implementation of nursing interventions to meet outcomes/goals stated and evaluating the effectiveness of nursing care provided. Student uses structured and standardized method of SBAR communication to communicate (critical) events in clinical nursing practice effectively and efficiently. After completion of the subject student is able to actively participate in the work schedule in nursing unit, to make independent decisions based on critical thinking and assume full responsibility for	

these decisions, to contribute to ensuring continuity of nursing care within the context of primary, secondary and tertiary health care, to affect patient's health awareness and compliance in positive manner, convince him/her to participate actively in health promotion, health maintenance and health restoration.

Acquired clinical competences together with ability to argue for and justify the method / technique of the procedure or intervention chosen will be the basis for the ability to manage basic and frequently occurring clinical nursing situations and react to them correctly in real clinical practice in the future.

#### **Class syllabus:**

Nursing history / anamnesis focused on the disease of specific body system in internal medicine and surgery

Nursing physical examination

Implementation of a nursing process method to the care of patient with internal diseases

Implementation of a nursing process method to the care of surgical patient

Performance of basic nursing techniques and procedures:

Handling patient care articles, equipment and supplies

Medical asepsis and infection control

Dressing material and dressing technique

Bed making , transfer and positioning

Basic hygienic care

Special hygienic care

Physical mobility and immobility

Nutrition and serving food to patients

Enteral nutrition

Urinary elimination

Bowel elimination

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-041/22	<b>Course title:</b> Nursing Practice (2)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 240s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 6	
<b>Recommended semester:</b> 5.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-023/21 - Surgery and Nursing (1) and JLF.ÚO/J-1-OSe-008/22 - Summer Practice (1) and JLF.ÚO/J-1-OSe-011/21 - Nursing Techniques (2) and JLF.ÚO/J-1-OSe-040/21 - Nursing Practice (1) and JLF.ÚO/J-1-OSe-034/21 - Internal Medicine/Gerontology and Nursing (1)	
<b>Course requirements:</b> CPO (60 hours) elaboration and presentation/report on selected (critical) event from clinical practice using the SBAR method; elaboration and presentation/report on implementation of the nursing process method in selected patient. The evaluation of students is pursued by continuous evaluation of clinical skills in the performance of nursing practice, evaluation of written test and evaluation of SBAR and nursing process presentations/reports. The minimum percentage to succeed: 60 %. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 30/70	
<b>Learning outcomes:</b> By completion of the subject, the student can apply the knowledge from prerequisite clinical, nursing disciplines, and humanities in real conditions of clinical nursing practice. In providing individualized nursing care to patients with selected diseases and conditions in surgery and internal medicine, the student improves his/her skills in the implementation of basic and advanced nursing techniques, procedures and interventions while adhering to professional standards of clinical practice. The student can implement basic information concerning clinically correct and safe performance of the practice, respecting the principles of evidence-based practice. The student will demonstrate improving the skills of effective standardized communication of (critical) events in clinical practice using the SBAR method. With an emphasis on a holistic approach to the patient the student will demonstrate improving in the implementation of nursing process in real conditions of clinical nursing practice – to be able to develop the competence of critical thinking while assessing biological, psychological, social and spiritual needs of a patient, identifying patient's actual and potential problems, formulating the nursing diagnoses, planning and performing nursing interventions to meet determined outcomes/goals and evaluating the effectiveness of nursing care provided based on formulated criteria. The student can actively participate in the work schedule in nursing unit, can contribute to ensuring the continuity of nursing care within the context of primary,	

secondary and tertiary health care, to affect patient's health awareness and compliance in a positive manner, and convince him/her to participate actively in health promotion, health maintenance and health restoration.

### **Class syllabus:**

Implementation of a nursing process method in the care of a surgical patient / a patient with internal diseases. Nursing history/anamnesis and physical examination of a patient within the scope of the nurse competency. Objective assessment of patient needs and problems, administration of measurement tools and instruments within the scope of the nurse competency.

Management of symptomatology of selected diseases.

Standardized communication of (critical) events in clinical practice using the SBAR method.

Implementation of basic and advanced nursing techniques, practices and procedures in thematic areas:

Handling patient care articles, equipment and supplies, infection prevention and control

Dressing material and dressing techniques

Bed-making and positioning a patient

Prevention of immobilization and disuse syndrome

Basic and advanced personal hygiene

Oxygen therapy and thermotherapy

Vital signs

Nutrition and fluid balance

Elimination

Administering medications

Parenteral medications and parenteral nutrition

Specimen collection

Surgical nursing

Nursing care of a dead body

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-048/22	<b>Course title:</b> Nursing Practice (3)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 240s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 6	
<b>Recommended semester:</b> 8.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-028/22 - Summer Practice (2) and JLF.ÚO/J-1-OSe-047/22 - Winter Practice and JLF.ÚO/J-1-OSe-041/22 - Nursing Practice (2)	
<b>Course requirements:</b> CPO (60 hours) elaboration of school documentation on the implementation of a nursing process method in a selected surgical patient and a selected patient with an internal disease. The evaluation of students is pursued by continuous evaluation of clinical skills in the performance of nursing practice, evaluation of a report on selected (critical) event from clinical practice using the SBAR method, evaluation of a report on the implementation of a nursing process method in a selected patient in psychiatry and paediatrics, evaluation of written test and evaluation of elaborated school documentation on the implementation of a nursing process method in a selected surgical patient and a selected patient with an internal disease. The minimum percentage to succeed: 60 %. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 100/0	
<b>Learning outcomes:</b> By completion of the subject, the student can synthesize the knowledge from various medical, nursing disciplines, and humanities and can apply them to real clinical nursing practice with an emphasis on clinically correct and safe performance of the practice and respecting the principles of evidence-based practice. The student will demonstrate improving his/her skills in the implementation of basic and advanced nursing techniques, procedures and interventions while providing individualized nursing care to patients of all ages and selected diseases and conditions in surgery, internal medicine, psychiatry, and paediatrics. With an emphasis on a holistic approach to the patient the student can implement the method of nursing process in real conditions of clinical nursing practice – to develop the competence of critical thinking while assessing biological, psychological, social and spiritual needs of a patient, identifying patient's actual and potential problems, formulating the nursing diagnoses, planning and performing nursing interventions to meet determined outcomes/goals and evaluating the effectiveness of nursing care provided based on formulated criteria. In order to standardize the communication of (critical) events in clinical practice, the student can effectively use the structured method of SBAR communication. The student can actively participate in the work schedule in nursing unit, can make independent decisions based on critical thinking and assume full responsibility for these decisions, can contribute	

to ensuring the continuity of nursing care within the context of primary, secondary and tertiary health care, can affect patient's health awareness and compliance in a positive manner, and convince him/her to participate actively in health promotion, health maintenance and health restoration. The acquired clinical competences together with the argumentation and justification of the chosen procedure will be the starting point for the ability to respond clinically correctly and safely to situations that the student will be confronted with in clinical nursing practice in the future.

**Class syllabus:**

Implementation of a nursing process method in the care of a patient with selected diseases and conditions in surgery, internal medicine, psychiatry, and paediatrics. Nursing history/anamnesis and physical examination of a patient within the scope of the nurse competency. Objective assessment of patient needs and problems, administration of measurement tools and instruments within the scope of the nurse competency.

Management of symptomatology of selected diseases.

Standardized communication of (critical) events in clinical practice using the SBAR method.

Surgical units:

Nursing care of a patient with a chronic wound.

Nursing care of a patient with infection.

Nursing care of a patient with upper gastrointestinal tract disease.

Nursing care of a patient with lower gastrointestinal tract disease.

Nursing care of a patient with an acute abdomen.

Nursing care of a patient with a vascular disease (arterial system).

Nursing care of a patient with a vascular disease (venous system).

Nursing care of a patient with a chest and lung disease.

Nursing care of a patient with a breast disease.

Internal medicine units:

Nursing care of a patient with a cardiovascular disease.

Nursing care of a patient with a respiratory disease.

Nursing care of a patient with a gastrointestinal disease.

Psychiatric units:

Admission, transfer and discharge of a psychiatric patient.

Implementation of a nursing process method in the care of a mentally ill.

The specifics of nursing physical examination of a mentally ill.

The specifics of record keeping and documentation of a psychiatric patient.

The patient and the staff safety in the psychiatric ward.

Communication with the mentally ill.

Paediatric units:

Implementation of a nursing process method in the care of a child.

Hygienic care of a child.

The ways of a child nutrition.

Administration of medications in children.

The specifics of specimen collection in children.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-029/22	<b>Course title:</b> Nursing Research (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 18s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 6.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-005/21 - Philosophy and Ethics in Nursing and JLF.ÚO/J-1-OSe-020/20 - Health Education (2) and JLF.ÚO/J-1-OSe-016/21 - Patient's Needs and Nursing Process (2) and JLF.ÚO/J-1-OSe-013/21 - Nursing I. (2)	
<b>Course requirements:</b> CS (50 hours) study of literature and preparation for the test The evaluation of students takes place in the form of a written knowledge test and evaluation of the elaboration of the first part of the research project for the bachelor's thesis. Minimum success rate: 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 100/0	
<b>Learning outcomes:</b> By completing the course, the student can define and characterize the various quantitative and qualitative scientific research methods used in the field of nursing. Student can search for relevant literary sources, determine the research problem, choose appropriate research methods based on the formulated problem. Recognizes and adheres to the ethical requirements of research on the human subject. He / she can apply the results of research in practice. The student can apply the acquired knowledge in the preparation of the bachelor's thesis.	
<b>Class syllabus:</b> Science and its basic principles. The place of nursing in the system of sciences. Scientific methods and their classification. Ethical aspects of nursing research. Work with scientific literature and other documents. Search for literary sources, their use, and processing. Citation in the text and List of bibliographic references. Basic relations: document, reference, citation (methodology, representativeness of the selection of sources, processing and citation technique, ethical aspects of working with literature). Research project and its phases. Characteristics and significance of individual phases of the research process. Formulation of research problems, questions, and hypotheses. Possibilities of defining research problems in nursing, possibilities of verification, choice of method. Criteria for selecting a research instrument.	

Questionnaire. Purpose, structure, forms of items, a compilation of questionnaires, pilot study. Questionnaire processing.

Interview. Introduction, phases, questions, types, evaluation of the method.

Experiment. Experiment criteria. Use in nursing research. Topic selection, working hypothesis, the aim of the experiment. Selection of methodologies and experimental projects. Execution of the experiment and its documentation. Evaluation of results, discussion, generalization of knowledge.

Observation. Stages, types, structured, unstructured observations. Observation systems, scale assessment. Record. Observer training.

Qualitative methods. Qualitative data analysis. Case study. Preparation and use.

Interpretation of obtained data, discussion, conclusions.

Formal and content requirements of the bachelor thesis. Processing methodology.

Presentation of results - verbal, written. Language and scientific style of work. Preparation of the presentation prepared for the defense. Principles of correct presentation.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-042/22	<b>Course title:</b> Nursing Research (2)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 10s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 5	
<b>Recommended semester:</b> 7.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-029/22 - Nursing Research (1)	
<b>Course requirements:</b> CS (116 hours) study of relevant resources for the elaboration of the final thesis, elaboration of a research project (Part II) and the first chapter of the final thesis Evaluation of students based on the elaboration of the second part of the research project for the final thesis and the first chapter of the final work. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> By completing the course, student can define and characterize the individual quantitative and qualitative scientific methods used in the field of nursing and she / he can adequately use them in the preparation of research. Student can use descriptive statistics in data processing and file description, can create tables and graphs. The student can use thematic analysis in the processing of qualitative data. The student can list the essentials of final work of various nature.	
<b>Class syllabus:</b> Research sample specification and determination. Choice of method of obtaining empirical data. Selection of empirical data analysis method (quantitative and qualitative analysis). Presentation of analysed data. Sample description. Creating tables and graphs. Preparation and processing of obtained empirical data. Descriptive statistics and its use in data analysis. Absolute numbers, relative numbers. Mean position measures: arithmetic mean, median, mode. Measures of variability: standard deviation. Qualitative data analysis by thematic analysis. Requirements of final theses of various character (research, educational, nursing care plan, design and verification of the standard).

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-043/22	<b>Course title:</b> Nursing Research (3)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 8s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 4	
<b>Recommended semester:</b> 8.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-042/22 - Nursing Research (2)	
<b>Course requirements:</b> CPO (135 hours) a student under the guidance of a supervisor prepares a bachelor's thesis. The evaluation of the subject is based on the elaboration of a bachelor's thesis according to the evaluation of the supervisor. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> In preparing the final thesis, the student can search for relevant literary sources, can determine the research problem, and can choose adequate research methods to solve the formulated problem. The student can apply the ethical requirements necessary for research on the human subject. The student can specify the research file and analyses the obtained data based on statistical methods and / or qualitative data analysis, can interpret the findings and can suggest recommendations for practice, research and education. Based on the knowledge, the student can prepare a final thesis. The student can prepare a presentation of the obtained results in order to defend the final work.	
<b>Class syllabus:</b> Elaboration of the current overview of knowledge on the topic of the final thesis. Preparation and implementation of the practical part of the final thesis. Preparation of presentation of results and defence of final thesis.	
<b>Recommended literature:</b> Gavora, P. et al. Elektronická učebnica pedagogického výskumu. [online]. Bratislava: Univerzita Komenského, 2010. ## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-010/20	<b>Course title:</b> Nursing Techniques (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 60s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 4	
<b>Recommended semester:</b> 2.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-006/21 - Administration and Documentation in Nursing and JLF.ÚCJ/J-1-OSe-007/20 - Medical Terminology and JLF.ÚA/J-1-OSe-001/20 - Anatomy and Physiology	
<b>Course requirements:</b> CS (40 hours) studying literature and test preparation CPO (40 hours) preparation on the ongoing practical testing in the exercises Student assessment takes the form of ongoing theoretical and practical testing in the exercises and the final test. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> By completion of the subject student gains reliable evidence-based information for safe healthcare practice. Student understands fundamental principles of nursing care provision and standard procedures of selected nursing techniques and interventions. While using the methods of simulation, demonstration, case study method and learning by doing method the student will gain theoretical knowledge and practical skills in performance of basic nursing procedures within nursing care provision. After completion of this subject while performing nursing procedures student will be able to: <ul style="list-style-type: none"><li>- argue for and justify the method / technique of the procedure chosen,</li><li>- prepare equipment and supplies necessary to carry out the procedure,</li><li>- assess the patient in relation to the procedure,</li><li>- provide instructions and support the patient prior to the procedure,</li><li>- prepare the patient for the procedure from physical perspective,</li><li>- perform hand hygiene (hand washing and hygienic / surgical disinfection)</li><li>- carry out the procedure independently while following clinical standards and guidelines, respecting the principles of asepsis,</li><li>- communicate with the patient during the procedure,</li><li>- record and document the procedure and value assessed,</li><li>- provide patient education / instruction after the procedure,</li><li>- process all the equipment and items used (decontamination).</li></ul>	

- use the structured method of communication SBAR.

Acquired competences together with ability to argue for and justify the method / technique of the procedure chosen will be the basis for the ability to manage basic and frequently occurring clinical nursing situations and react to them correctly in real clinical practice in the future.

#### **Class syllabus:**

Medical asepsis and infection control.

Dressing material and dressing technique

Bed making, transfer and positioning

Basic hygienic care

Special hygienic care

Physical mobility and immobility 1

Physical mobility and immobility 2

Vital signs

Nutrition and serving food to patients

Enteral nutrition

Urinary elimination

Bowel elimination

Problem tasks on the topics covered / practice on models / formative and summative evaluation (OSCE, test, etc.)

#### **Recommended literature:**

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-011/21	<b>Course title:</b> Nursing Techniques (2)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 60s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 4	
<b>Recommended semester:</b> 3.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-010/20 - Nursing Techniques (1)	
<b>Course requirements:</b> CS (40 hours) studying literature and test preparation CPO (40 hours) preparation and realization of selected nursing procedures Assessment of students takes the form of continuous theoretical and practical testing in practices and a final test. Minimum level of success: 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> Students will have basic information regarding the correct and safe clinical practice performance with respect for the principles of evidence-based practice. Within this subject students in the clinical setting can use theoretical knowledge and practical skills acquired within the scope of nursing techniques first The student can demonstrate in practice: - We can make basic tools of the patch and wool and different kinds of bandages; - Operate aseptically and implement appropriate care for the used items; - Implement hygienic patient care - Assess the impact of immobility on the human body in a particular patient and perform exercises: active, passive and autoasistované; - To measure, assess, evaluate patient's vital signs - Know the principles of diet therapy and diet system; - Implement interventions to support physiological micturition and defecation, consider emptying disorders - Recognize the different forms of drugs, medicines and prepare to make different forms of drugs under doctor's office; - Apply oxygen inhalation therapy by surgery - Inject - subcutaneous, intramuscular and intravenous; - Prepare and administer infusions assist in transfúzioterapii knows the possible complications,	

- Appoint the principles of collection of biological material and to carry out particular types of donations
- Distinguish basic surgical instruments, drains and drainage systems; manipulate sterile material; wash and dress for surgery.

**Class syllabus:**

#Handling patient care articles, equipment and supplies. Disinfection of surfaces, articles, surgical instruments and mechanical equipment, disinfection of skin and hands. Preparing articles and supplies to sterilization process (pre-sterilization preparation).

#Bed-making. Assistive, safety and support devices of a bed. Manipulation with clean and polluted personal clothes and bed linen. Bed making for infants and toddlers.

#Personal hygiene, hygienic care and practices. Oral hygiene – mouth care (care of intact oral cavity, special oral care, caring for artificial dentures), importance of dental care. Skin care practices – morning and evening hygienic care, bathing a patient, complete bed bath, prevention of sores and pressure ulcers. Hair and nail care – brushing and combing hair, shampooing hair, shaving, hair care in special needs – nits (pediculosis) delousing. Dressing a patient with disabled extremity.

#Mobility and immobility. Preventive positioning of an immobile patient. Basic chest exercises / chest physiotherapy and leg exercises. Applying compression bandage of lower extremities / elastic compression stockings.

#Therapeutic use of heat and cold.

#Measuring, assessing and recording vital signs (body temperature, pulse, respiration, blood pressure, oxygen saturation), obtaining an electrocardiogram (ECG).

#Nutrition care. Dietary system, serving meals, assisting patients with eating, feeding the patients. Fluid intake and output, intake and output record.

#Managing urinary and bowel elimination – insertion of a straight / indwelling urinary catheter in a female, assistance in urinary catheterization in a male, administering an enema.

#Administering oral medications (including buccal and sublingual administration). Topical administration of medications – to the skin (including transdermal patch) and mucosa, instillation of eye and ear medications, nasal instillations, application to body cavities (vaginal medications and instillations, rectal medications, bladder irrigation).

#Oxygen therapy and respiratory inhalation (nebulization, inhalations).

#Parenteral medications – injections. Preparing and administering subcutaneous injections (s.c. – LMWH, insulin) and intramuscular injections (i.m.). Preparing and assisting in administration of intravenous injection (i.v.). Insertion of peripheral intravenous access device, caring for peripheral and central intravenous access devices.

#Parenteral nutrition and blood transfusions – preparing and assisting in application of intravenous solutions and infusions. Preparing and assisting in blood transfusions – care of a patient prior, during and after blood transfusion.

#Diagnostic and laboratory testing – taking venous blood samples, capillary blood samples (blood sugar analysis, blood gas analysis (CBG), urine specimen collection (screening for chemical properties, culture and sensitivity test), taking stool specimens, sputum specimen collection, swabs / cultures (mucosa, skin, wounds). Evaluation of laboratory results.

#Wound care – changing the wound dressing in aseptic / septic / chronic wounds, assisting in wound care, care of a patient with drain / drainage system.

Establishing and maintaining a sterile field. Assisting in small surgeries

Student uses structured and standardized method of SBAR communication to communicate (critical) events in clinical nursing practice effectively and efficiently.

<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚPF/J-1-OSe-014/20	<b>Course title:</b> Pathological Anatomy and Pathological Physiology
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 22s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 2.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚA/J-1-OSe-001/20 - Anatomy and Physiology	
<b>Course requirements:</b> Assessment of students is carried out in the form of test of continuous assessment of the study and written examination test, minimum passing score is 60%. Assessment scale: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, FX: 60 % and less. Scale of assessment (preliminary/final): Scale of assessment (preliminary/final): 0/100	
<b>Learning outcomes:</b> After completion of the subject the student will understand the basic morphological and functional manifestations of diseases, gain knowledge about the basic groups of causes of diseases, the mechanisms involved in the origin and development of symptoms and signs of diseases, biopsy and other methods that help diagnose diseases.	
<b>Class syllabus:</b> Introduction to the study of pathological anatomy and pathological physiology, etiology and pathogenesis. Biopsy and cytology in pathology. Inflammation. Overview of immunopathological processes. Neoplasia, benign and malignant neoplasms and their characteristic. Disorders of thermoregulation. Stress. Pathophysiology of shock. Disturbances of homeostasis - causes and mechanisms of disorders of water and electrolyte metabolism, causes and mechanisms of disorders of acid-base balance. Pathophysiology of nutrition. Diabetes mellitus. Pathology and pathophysiology of ischemic heart disease. Pathophysiology of arterial hypertension. Pathophysiology of heart failure. Disorders of the arterial and venous systems of the lower extremities.	

Pathology and pathophysiology of diseases of the gastrointestinal tract and peritoneum.  
Hepatobiliary disorders.  
Pathology and pathophysiology of the most important respiratory diseases.  
Functional consequences of the most important respiratory diseases, respiratory insufficiency.  
Pathology and pathophysiology of the most important urinary tract diseases, clinical syndromes in renal diseases, acute and chronic renal failure.  
Pathology and pathophysiology of the most important central nervous system disorders.  
Overview of blood pathology.  
Overview of pathology of the male and female reproductive system, pathological conditions associated with pregnancy.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-015/20	<b>Course title:</b> Patient s Needs and Nursing Process (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 24s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 2.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> CS (24 hours)study of the literature and preparation for the test. CPO (30 hours) based on the assessed patient data and the recorded nursing diagnosis, to justify the nursing diagnosis and develop an appropriate nursing care plan. The evaluation of students is carried out through written test and evaluation of the seminar paper focused on nursing diagnostics and nursing care planning; the minimum percentage to succeed is 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 100/0	
<b>Learning outcomes:</b> After completing the subject, the student can characterize the method of the nursing process; describe its phases - assessment, diagnosing, planning, implementation, evaluation. She / he can implement it in clinical practice; work with the patient's medical records and use the structured method of SBAR communication. Student can documents the implementation of phases of the nursing process. The student can assess the human needs (breathing, nutrition, hydration, urinary and faecal elimination, sleep and rest, exercise, self-care), she / he can determine nursing diagnoses; set goals of nursing care, outcome criteria and prepare a plan of nursing care, implement and evaluate nursing care. The student can apply the acquired knowledge in clinical practice.	
<b>Class syllabus:</b> Introduction of nursing process, definition of term, basis of development, overview of components of nursing process. The importance of the nursing process for clinical practice; barriers to the implementation of the nursing process. 1st phase of the nursing process – assessing; sources of information and methods of data acquisition, assessment according to M. Gorgon, types of assessment, documentation of assessment. 2nd phase of the nursing process – diagnosing; diagnostic process, Taxonomy II of nursing diagnoses according to NANDA-I. 3rd phase of the nursing process – planning; establishing priorities, goals and outcome criteria, nursing care, nursing care plans.	

4th phase of the nursing process – implementing; implementation process, nursing interventions - types, taxonomy.

5th phase of the nursing process – evaluating; process of evaluation.

Transmission of information in the health care team, SBAR communication strategy.

Patient medical records.

Human needs. Hierarchy of needs by A. H. Maslow. Factors influence human needs.

Breathing and nursing care

Nutrition and nursing care

Fluid, electrolyte and nursing care

Elimination and nursing care

Sleep and rest and nursing care

Physical activity and nursing care

Self-care, self-sufficiency and nursing care

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-044/22	<b>Course title:</b> Pediatrics and Nursing (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 30s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 6.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-024/22 - Surgery and Nursing (2) and JLF.ÚO/J-1-OSe-035/22 - Internal Medicine/Gerontology and Nursing (2)	
<b>Course requirements:</b> CS (30 hours) study of literature and preparation for test. CPO (30 hours) written semester work focused on the nursing process in a child with a selected disease. The evaluation of students is carried out through written test and evaluation of the semester work. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60%, minimum percentage to succeed is 60 %. Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> After completion of the subject, the student can characterize the specifics of nursing process in paediatrics. The student can demonstrate the assessment of the needs, the basic physical examination and assessment of growth and development in different age periods. The student can describe the specifics of nutrition in childhood, nursing care of physiological, premature and pathological newborn. The student can define and characterize the symptomatology, clinical picture, diagnosis and treatment of diseases of physical systems in childhood. A student can identify nursing problems in the paediatric patients in selected diseases of the physical systems and obtained knowledge and skills can apply in the planning and implementation of the nursing care.	
<b>Class syllabus:</b> Introduction to paediatrics. Basics of physical examination in paediatrics. The distribution of children's age, growth and development. Nutrition in childhood. Disorders of the internal environment. Physiological newborn, premature and pathological newborn. Respiratory diseases in childhood. Cardiovascular diseases in childhood. Gastrointestinal diseases in childhood. Renal and urinary tract diseases in childhood. Hematologic diseases in childhood.	

Introduction to paediatrics nursing, specifics of nursing process in paediatrics. Specifics of child assessment, assessment of growth and development in children. Child nutrition care. Nursing care of physiological newborn, premature and pathological newborn. Nursing care of children with respiratory diseases. Nursing care of children with cardiovascular diseases. Nursing care of children with gastrointestinal diseases. Nursing care of children with renal and urinary tract diseases. Nursing care of children with hematologic diseases.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-045/22	<b>Course title:</b> Pediatrics and Nursing (2)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 28s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 4	
<b>Recommended semester:</b> 7.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-044/22 - Pediatrics and Nursing (1)	
<b>Course requirements:</b> CS (40 hours) study of literature and preparation for test and exam. CPO (30 hours) written semester work focused on a selected problem in paediatrics and nursing. The partial evaluation of students is carried out through written test and evaluation of the semester work. The minimum percentage to succeed is 60 %. Oral exam. The minimum percentage to succeed is 60 %. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 40/60	
<b>Learning outcomes:</b> After completion of the subject, the student can identify nursing problems in the paediatric patients in selected diseases of the physical systems and can obtain knowledge and skills applies in the planning and implementation of the nursing care in practice, as well as on the basis of model situations created by using case studies. The student can characterize the specifics of the assessment and management of pain in children in the various age categories and obtained knowledge applies to the clinical nursing practice. The student can apply the acquired knowledge to the solution of acute situations in childhood. The student can describe palliative nursing care and selected syndromes occurring in childhood.	
<b>Class syllabus:</b> Skin diseases in childhood. Endocrine diseases in childhood. Diabetes mellitus in childhood. Neurology diseases in childhood. Development of the immune system and immunoalterative diseases in childhood. Oncological diseases in childhood. Emergencies and acute threats in childhood. Cardiopulmonary resuscitation in childhood. The specifics of the pain in childhood. Down syndrome, CAN syndrome, SIDS syndrome, baby shaken syndrome. Nursing care of children with skin diseases.	

Nursing care of children with endocrine diseases.  
 Nursing care of children with diabetes mellitus.  
 Nursing care of children with neurology diseases.  
 Nursing care of children with immunoalterative diseases.  
 Nursing care of children with oncological diseases.  
 Palliative nursing care in childhood.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚFa/J-1-OSe-022/21	<b>Course title:</b> Pharmacology
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 22s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 2	
<b>Recommended semester:</b> 3.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚPF/J-1-OSe-014/20 - Pathological Anatomy and Pathological Physiology	
<b>Course requirements:</b> During semester: written work. Final exam: Written test. Assessment: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, Fx: 60 % and lower. Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> The graduate of Bachelor's study knows by subjects graduation: From the field of General pharmacology – route of drugs administration particularly in terms of onset and duration of action, parenteral way of administration in nursing practice, principles of drugs storage, the rules for handling drugs classified among psychotropic and narcotic substances, principles of poisoning treatment by selected drugs groups with the administration of specific antidotes, characteristics of drugs doses (single, daily, maximum, Etc.), drugs interact with food and drink, peculiarities of therapy according to age. From the field of Special pharmacology – characteristic of individual pharmacological groups and agents, effects (desirable and side), most essential contraindications and other information for drug use in nursing practice.	
<b>Class syllabus:</b> Basic definition in pharmacology, HVLP, IPL, „narcotic law“, toxicomania. The route of drug administrations, drug dosage, side effects, and drug interaction. Parenteral way of administration in nursing practice. <ul style="list-style-type: none"><li>• Factors affecting of drugs effect, Peculiarities of therapy according to age.</li><li>• Pharmacology of autonomic nervous system</li><li>• Pharmacology of central nervous system</li><li>• Opioid analgesics, Pain management</li><li>• Non-opioid analgesics, Antitheapeutics</li><li>• Pharmacology of cardiovascular system</li><li>• Pharmacology of gastrointestinal system</li><li>• Pharmacology of respiratory system</li><li>• Antimicrobial drugs</li></ul>	

- Drugs affecting the function of the endocrine glands
- Treatment of drug poisoning
- Disinfectants and antiseptics
- Toxicomanias

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-033/22	<b>Course title:</b> Sociology and Social Politics
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 14s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 1	
<b>Recommended semester:</b> 5.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚPAs/J-1-OSe-018/21 - Psychology I. (2)	
<b>Course requirements:</b> CS (14 hours) study of literature and preparation for the test. The evalation of students take the form of a written knowledge test. Minimum success rate: 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 0/100	
<b>Learning outcomes:</b> By completing the course, the student will demonstrate basic knowledge of general sociology as a scientific discipline, with application to health care and nursing. Student can define the characteristics of sociology of health and disease, the position of the patient in the health and social care system, social status and role of the patient, social relations between health care / patient and family, the role of self-help groups of patients with chronic diseases. Student will demonstrate an overview of social policy; can describe the importance of health literacy in disease prevention and management, the possibilities of its evaluation and the impact of socio-demographic indicators of the Slovak adult population on its level. In nursing care, the student can implement knowledge of applied sociology and social policy in patient / family care; can cooperate with a social worker of a medical facility within their competencies.	
<b>Class syllabus:</b> Sociology as a social science discipline. Sociology in healthcare. Socio-demographic indicators of the Slovak population. Social policy of the Slovak Republic. Sociology of health, social effects on health. Social determinants of health. Health indicators of the Slovak population. Sociology of the disease, social consequences. Social aspects of chronic diseases. Sociology of the patient and family. Patient needs - sociological aspect. The position of the patient in the hospital system and in society. Patient groups, volunteering. Social inequality and social exclusion in access to health. Health literacy.

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-008/22	<b>Course title:</b> Summer Practice (1)
<b>Educational activities:</b> <b>Type of activities:</b> practice <b>Number of hours:</b> <b>per week:</b> per level/semester: 240s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 6	
<b>Recommended semester:</b> 4.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚO/J-1-OSe-011/21 - Nursing Techniques (2) and JLF.ÚO/J-1-OSe-016/21 - Patient's Needs and Nursing Process (2)	
<b>Course requirements:</b> CPO (60 hours) seminar work focusing on the nursing documentation from surgical/internistic disciplines. The conditions for evaluation the course (ABSO): - participation in continuous practice according to the criteria set out in the Book of Clinical nursing practice, - confirmations: Assignment letter to a specific workplace, completion of occupational health and safety, Record of arrivals and departures at the workplace, a completed List of prescribed practical activities, - nursing documentation from surgical / internistic disciplines. Scale of assessment (preliminary/final): 0/100	
<b>Learning outcomes:</b> After completion of the course the student will be able to provide individualized nursing care with an emphasis on a holistic approach to the needs of patients having any disease. Student will improve his implementation of the required basic nursing techniques, practices and performances, and he will follow standard criteria for specific performance. The student also acquaints himself with the fundamental knowledge and skills for the provision of community-based nursing care.	
<b>Class syllabus:</b> Providing of individualized nursing care by nursing process method at selected clinical workplaces (surgical / internal medicine disciplines departments) and community departments. Performing the prescribed nursing procedures and techniques in patients. Documentation of nursing procedures and techniques and health care in the medical records of patients at clinical departments. Performing the education of patient and their family members (in the range of competence of nurse).

## COURSE DESCRIPTION

<b>Academic year:</b> 2022/2023	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Jessenius Faculty of Medicine in Martin	
<b>Course ID:</b> JLF.ÚO/J-1-OSe-023/21	<b>Course title:</b> Surgery and Nursing (1)
<b>Educational activities:</b> <b>Type of activities:</b> practicals <b>Number of hours:</b> <b>per week:</b> per level/semester: 40s <b>Form of the course:</b> on-site learning	
<b>Number of credits:</b> 4	
<b>Recommended semester:</b> 4.	
<b>Educational level:</b> I.	
<b>Prerequisites:</b> JLF.ÚPF/J-1-OSe-014/20 - Pathological Anatomy and Pathological Physiology and JLF.KAIM/J-1-OSe-021/20 - First Aid and JLF.ÚO/J-1-OSe-016/21 - Patient s Needs and Nursing Process (2)	
<b>Course requirements:</b> CS (50 hours) study of literature and preparation for the test. CPO (50 hours) processing of selected problems from general surgery from the point of view of nursing according to the latest recommendations and EBN (Evidence Based Nursing), presentation. The evaluation of students takes place in the form of a written knowledge test and evaluation of the written elaboration of checked practical outcomes. Minimum success rate: 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 50/50	
<b>Learning outcomes:</b> After completion of the subject the student will understand the mechanism of formation, development, symptomatology, clinical features, diagnosis, therapeutic and nursing procedures of acute and chronic wounds, fractures and degenerative musculoskeletal diseases, burns, burns, shock, cancer, breast cancer and urological disorders. On the basis of an independent nursing assessment, he/she is able to identify the nursing problems of the surgical patient, determine the priority nursing interventions in the acute and planned admission of the patient, justify the planned interventions. The knowledge acquired from lectures and practical exercises can be applied to the solution of nursing problems in selected, most common diseases, injuries, emergencies in general surgery in the natural conditions of clinical practice as well as on model situations created using case studies (adult, senior, polymorbid patient, patient with diabetes in surgery). The graduate of the course, student can work with the method of the nursing process, to implement specific nursing interventions in the perioperative period with a focus on the prevention of postoperative complications (in multi-day surgery, in one-day surgery, in mini-invasive surgery). The graduate of the course, student can synthesize knowledge from medical, nursing and humanities with emphasis on clinical condition, diagnostic, therapeutic and preventive measures in terms of early recovery of the patient in general surgery. The graduate of the course can communicate in the medical team using the SBAR method.	
<b>Class syllabus:</b>	

Introduction to surgery - definition of the field, history of surgery and the concept of surgery. Principles of surgical treatment. Surgical approaches to body cavities. Basics of minimally invasive surgery.

Wounds, healing of individual structures. Factors influencing wound healing. Principles of treatment of aseptic and septic lesions of the skin cover. Surgical wound treatment. Prevention of wound infection. Nursing care of a patient with a wound. Support the wound healing process.

Fractures and injuries of joints. Nursing care of a patient with a fracture and other injuries of the musculoskeletal system. Walking training on auxiliary crutch.

Burns, burn shock. Nursing care of a patient with burns.

Perioperative nursing care. Local and general anesthesia. The role of the nurse in local and general anesthesia. Intraoperative nursing care. Intensive nursing care in surgery. Chronic pain. Shock.

Infection in surgery. Nosocomial infections. Antibiotics and chemotherapeutics in surgery.

Minimization of the risk of surgical wound infection by nursing interventions. Preparation of the operating field. Nursing care of a patient with an infection in surgery.

Postoperative complications. Minimization of the risk of postoperative complications by nursing interventions. Nursing care of a patient with postoperative complications.

Clinical symptomatology and principles of cancer diagnosis. Basic characteristics of surgical procedures in the treatment of tumours and their metastases. Nursing care of a patient with cancer in surgery. Stoma, their indication and principles of comprehensive care. Standard of care for patients with intestinal stoma complications.

Inflammatory and tumour diseases of the mammary gland. Nursing care for patients with benign and malignant breast diseases.

Gerontological patient in surgery. Multimorbidity. Nursing care of gerontological and multimorbid patients in surgery.

Patient with diabetes mellitus in surgery. Complications of diabetes mellitus in surgery. Nursing care for diabetics in the perioperative period. Diabetic foot. Nursing care of a patient with diabetic foot syndrome.

Urological diseases, inflammatory and cancer diseases. Nursing care of patients with benign and malignant diseases in urology.

Degenerative diseases of the musculoskeletal system. Perioperative care of a patient with degenerative musculoskeletal disease (TEP).

Plastic surgery - reconstruction of birth defects, corrective and aesthetic operations.

Transplant and donor program in surgery. The role of the nurse in the donor and transplant program. Ethical aspects of nurse's work in surgery.

CPO (50 hours) processing of selected problems from general surgery from the point of view of nursing according to the latest recommendations and EBN (Evidence Based Nursing), presentation. The evaluation of students takes place in the form of a written knowledge test and evaluation of the written elaboration of checked practical outcomes. Minimum success rate: 60%. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): 40/60	
<b>Learning outcomes:</b> By completing the course the student will demonstrate knowledge of the mechanism of onset, development, symptomatology, clinical picture, diagnosis, therapeutic and nursing procedures in selected, most common diseases, injuries, emergencies and birth defects in special surgery: diseases of the gastrointestinal tract, hepato-pancreas tract, surgical diseases of the intrathoracic organs, surgical diseases of the arterial and venous system, diseases of the CNS and peripheral nerves, diseases of the head, neck and ENT, eye diseases, diseases in maxillofacial surgery, pediatric surgery. Based on an independent nursing assessment, he / she can identify the nursing problems of the surgical patient, determine the priority nursing interventions in the acute and planned admission of the patient, and justify the planned interventions. The knowledge from lectures, seminars and practicals can be applied to the solution of nursing problems in selected, most common diseases, injuries (including polytrauma), emergencies in special surgery in natural clinical practice as well as on model situations created using case studies. The graduate of the course, student can work by the method of the nursing process, to implement specific nursing interventions in the perioperative period with a focus on the prevention of postoperative complications (in multi-day surgery, in one-day surgery, in mini-invasive surgery). The graduate of the course is able to synthesize knowledge from medical, nursing and humanities disciplines with emphasis on clinical condition, diagnostic, therapeutic and preventive measures in terms of early recovery of the patient in special surgery. She / he can apply theoretical knowledge of clinical psychology, medical ethics and nursing ethics. The graduate of the course, student can prepare educational plans and implement education for the	

surgical patient in the perioperative period with the involvement of the patient and support persons. The graduate of the course can communicate in the medical team using the SBAR method.

### **Class syllabus:**

Clinical nutrition in surgery. Nutritional requirements in postoperative care. Perioperative fluid management. Standard postoperative nutrition protocols. Nursing care of a surgical patient with malnutrition, with postoperative nutritional jejunostomy.

Benign and malignant surgical diseases of the oesophagus, stomach and duodenum. Perioperative nursing care for a surgical patient with oesophageal, gastric and duodenal diseases. Benign and malignant surgical diseases of the small, large intestine and rectum. Perioperative nursing care of a surgical patient with a disease of the small intestine, colon and rectum. Benign and malignant surgical diseases of the liver, gallbladder, biliary tract and pancreas. Perioperative nursing care for a surgical patient with diseases of the liver, gallbladder, biliary tract and pancreas. Diseases of the anterior abdominal wall, hernia. Perioperative nursing care of a patient with hernia. Acute abdomen management, bleeding from the digestive tract. Perioperative nursing care for a patient with acute abdomen and bleeding.

Particular features on pediatric surgery. The most common surgical diseases in the neonatal and pediatric period. Acute abdomen in children.

Surgical diseases of the aorta and peripheral arteries. Perioperative nursing care of a patient with aortic and peripheral artery disease. Surgical diseases of the venous system. Perioperative nursing care of a patient with a disease of the venous system.

Benign and malignant surgical lung diseases. Acquired heart disease. Surgical treatment options. Perioperative nursing care in thoracic surgery and cardiac surgery.

Congenital and acquired benign and malignant diseases in ENT and head and neck surgery. Perioperative nursing care in head, neck and ENT surgery.

Traumatology of the CNS and peripheral nerves. Surgical diseases of the brain and spinal cord. Perioperative nursing care in neurosurgery.

Polytrauma, its characteristics. Traumatology of the chest, intra-thoracic and intra-abdominal organs. Nursing care of patients with polytrauma.

Benign and malignant diseases in dentistry and maxillofacial surgery. Perioperative nursing care in maxillofacial surgery.

Benign and malignant eye diseases. Perioperative nursing care in ophthalmic surgery.
