TABLE OF CONTENTS

1. J-1-PA-001/22 Anatomy and Physiology.....	3
2. J-1-PA-048/22 Anesthesiology, Anaesthesia, Resuscitation.....	5
3. J-1-PA-CJ4/22 Basics of English Language 1.....	7
4. J-1-OS-CJ5/22 Basics of English Language 2.....	9
5. J-1-PA-CJ6/22 Basics of German Language 1.....	11
6. J-1-PA-CJ7/22 Basics of German Language 2.....	13
7. J-1-PA-067/21 Biochemistry.....	15
8. J-1-PA-068/18 Biophysics and Radiology.....	17
9. J-1-PA-041/16 Childbirth Preparation and Parenthood (1).....	19
10. J-1-PA-042/16 Childbirth Preparation and Parenthood (2).....	21
11. J-1-PA-049/17 Clinical Genetics.....	23
12. J-1-PA-029/22 Clinical Propedeutics.....	25
13. J-1-PA-031/16 Communication.....	27
14. J-1-PA-SS1/17 Defence of Bachelor Thesis (state exam).....	29
15. J-1-PA-005/15 Embryology.....	30
16. J-1-PA-011/16 First Aid.....	32
17. J-1-PA-CJ1/15 Foreign Language (1).....	34
18. J-1-PA-CJ2/22 Foreign Language (2).....	36
19. J-1-PA-CJ3/16 Foreign Language (3).....	39
20. J-1-PA-010/15 Gynecology (1).....	41
21. J-1-PA-028/16 Gynecology (2).....	43
22. J-1-PA-028/22 Gynecology (2).....	45
23. J-1-PA-021/21 Health Education I. (1).....	47
24. J-1-PA-022/15 Health Education I. (2).....	49
25. J-1-PA-037/16 Health Education II.....	51
26. J-1-PA-004/15 Hygiene and Epidemiology.....	53
27. J-1-PA-061/22 Legal Aspects of Midwifery.....	55
28. J-1-PA-050/17 Management and Organization of Health Service.....	57
29. J-1-PA-070/22 Medical Biology and Genetics.....	59
30. J-1-PA-024/22 Medical Terminology.....	61
31. J-1-PA-006/15 Microbiology.....	64
32. J-1-PA-SS2/22 Midwifery I. (state exam).....	66
33. J-1-PA-019/15 Midwifery I. (1).....	68
34. J-1-PA-020/15 Midwifery I. (2).....	70
35. J-1-PA-032/16 Midwifery II. (1).....	72
36. J-1-PA-033/16 Midwifery II. (2).....	74
37. J-1-PA-051/22 Midwifery II. (3).....	76
38. J-1-PA-060/22 Midwifery II. (4).....	78
39. J-1-PA-056/17 Newborn and Infant Care.....	80
40. J-1-PA-017/22 Nursing Techniques (1).....	82
41. J-1-PA-018/22 Nursing Techniques (2).....	84
42. J-1-PA-007/15 Nutrition of a Woman, Newborn and Infant.....	86
43. J-1-PA-009/15 Obstetrics (1).....	88
44. J-1-PA-026/16 Obstetrics (2).....	90
45. J-1-PA-026/22 Obstetrics (2).....	92
46. J-1-PA-027/16 Obstetrics (3).....	94
47. J-1-PA-008/22 Pathological Anatomy and Pathological Physiology.....	96

48. J-1-PA-015/15	Patient s Needs and Nursing Process (1).....	98
49. J-1-PA-016/15	Patient s Needs and Nursing Process (2).....	101
50. J-1-PA-030/16	Pediatrics.....	103
51. J-1-PA-044/16	Pharmacology.....	105
52. J-1-PA-TV1/15	Physical Education (1).....	107
53. J-1-PA-TV2/15	Physical Education (2).....	109
54. J-1-PA-052/16	Practice in Midwifery (1).....	111
55. J-1-PA-062/16	Practice in Midwifery (2).....	114
56. J-1-PA-065/22	Practice in Midwifery (3).....	116
57. J-1-PA-066/17	Practice in Midwifery (4).....	118
58. J-1-PA-053/22	Primary Care for Woman and Child.....	121
59. J-1-PA-045/16	Primary Care for Woman and Family (1).....	123
60. J-1-PA-046/16	Primary Care for Woman and Family (2).....	125
61. J-1-PA-012/22	Professional Ethics.....	127
62. J-1-PA-054/17	Psychiatry and Psychohygiene.....	129
63. J-1-PA-014/15	Psychology I. (2).....	131
64. J-1-PA-013/15	Psychology I. -1.....	133
65. J-1-PA-134/22	Psychology of a Woman 1.....	135
66. J-1-PA-135/22	Psychology of a Woman 2.....	137
67. J-1-PA-036/16	Research in Midwifery (1).....	139
68. J-1-PA-058/17	Research in Midwifery (2).....	141
69. J-1-PA-064/17	Research in Midwifery (3).....	143

71. J-1-PA-057/22	Sexual and Reproductive Health Care (2).....	147
72. J-1-PA-063/22	Sexual and Reproductive Health Care (3).....	149
73. J-1-PA-055/22	Sociology and Sociology of Family.....	151
74. J-1-PA-025/22	Summer Practice (1).....	153
75. J-1-PA-047/16	Summer Practice (2).....	155
76. J-1-PA-040/19	Theory in Midwifery.....	157
77. J-1-PA-059/17	Winter Practice.....	159

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLFÚA/J-1-PA-001/22	Course title: Anatomy and Physiology
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: 100% participation in practicals, at least 60% success rate on written tests (subjects – anatomy, physiology). Mark: A: 95–100 %, B: 88–94 %, C: 77–87 %, D: 66–76 %, E: 60–65 %, FX: 59 % and less. Scale of assessment (preliminary/final): 5/95	
Learning outcomes: ANATOMY: The graduate of Anatomy understand principles of human body, its parts and organs construction up to such details, that the gathered knowledge is permanent and becomes a base for understanding of physiological and pathological processes and changes. His knowledge should enable him to be an adequate partner for physicians in the process of health care. PHYSIOLOGY: The Physiology aim is to acquire basic knowledge about physiological functions of the human organs and systems, and about the relations between physiological systems. The emphasis is on the physiological mechanisms understanding in complex form for clinical practice. Practical application of knowledge from Physiology extends skills of the student (e.g. blood taking, blood analysis), which is necessary for understanding of human physiology and direct clinical application.	
Class syllabus: ANATOMY: Viscerology: Cardiovascular system. Respiratory system. Digestive system. Urogenital system. Central and peripheral nervous system. Locomotor system - bones, joints of bones. Skeleton of the head, neck, trunk, limbs. Muscles of the head, neck, trunk, limbs. Body cavities. Organs of the thorax, abdomen, pelvis. Vessels and nerves of head, neck, trunk, limbs. PHYSIOLOGY: Physiology of blood (erythrocytes, leukocytes, trombocytes, haemocoagulation, blood groups, blood transfusion, basic blood examinations). Physiology of cardiovascular system (Physiology of the heart and vessels, basic clinical methods). Physiology of respiratory system (ventilation, mechanics of breathing, artificial ventilation, basic clinical methods). Physiology of gastrointestinal tract, metabolism and nutrition. Physiology of kidneys. Physiology of muscles. Thermoregulation. Physiology of nervous system, reflexes, pain, sleep, memory. Physiology of sensory organs, examination methods. Physiology of endocrine system.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.KAIM/J-1-PA-048/22	Course title: Anesthesiology, Anaesthesia, Resuscitation
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 5.	
Educational level: I.	
Prerequisites:	
Course requirements: 100% participation in practical exercises, successful completion of a credit test. Students are continuously evaluated for their theoretical preparation for practical exercises and active participation in practical teaching - coping and solving model situations.	
Learning outcomes: After completing the course, the student will gain an overview of the status of anesthesiology, anesthesia and intensive care, learn to quickly orient in the method of general anesthesia and properly participate in the safety of health care, prevention of further harm and saving lives. The basics also include the basics of intensive care and resuscitation. The student will be motivated for the next study and will gain a basic overview of the functioning of medicine as a life-saving process. Emphasis is placed on individual and group solutions to acute problems and the acquisition of basic clinical skills.	
Class syllabus: Diagnostika a liečba život ohrozujúcich stavov podľa ABCDE, základná KPR, stabilizácia základných vitálnych funkcií, predoperačná príprava, úvod do celkovej anestézie, vedenie celkovej anestézie, regionálna anestézia. Účasť na operačných sálach a jednotke intenzívnej starostlivosti.	
Recommended literature: Stoelting RK, Miller RD Basics of anesthesia, fifth edition, Churchill Livingstone Elsevier, Philadelphia, 2007, 697 pp Barash, P.G. et al. Clinical anesthesia. 7th ed., Philadelphia: Lippincott Williams & Wilkins, 2013. Allmann, K.G. Oxford Handbook of Anaesthesia. Oxford: Oxford University Press, 2011. 1309 s. ISBN 978-0-19-958404-8 Marini JJ, Wheeler AP Critical Care Medicine. The Essentials. Lippincott Williams & Wilkins; 4 edition (1 Nov 2009) Bersten AD, Handy JM Oh's Intensive Care Manual, Elsevier; 8 edition, 2018

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚCJ/J-1-PA-CJ4/22	Course title: Basics of English Language 1
Educational activities: Type of activities: practicals Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: 1 written test, 1 oral exam/presentation, minimum percentage to pass each is 60% Evaluation: A: 91-100%, B: 90-81%, C: 80-73%, D: 72-66%, E: 65-60%, FX: less than 60% Scale of assessment (preliminary/final): 50% / 50%	
Learning outcomes: The main output of the course is to revise and strengthen the basics of English grammar, so that the students are able to express themselves independently, formulate ideas, ask questions, use grammatical tenses correctly. At the same time, emphasis is placed also on expanding vocabulary and developing the ability to listen to and interpret foreign text.	
Class syllabus: 1. My family Introduction, family members, dating, useful phrases, conjugation of the verbs "to be" and "to have", simple present tense, personal pronouns 2. My family Introduction, family members, dating, useful phrases, conjugation of the verbs "to be" and "to have", simple present tense, personal pronouns 3. The country I live in works Giving direction, tourist attractions and sightseeing in Slovakia, weather, meeting with a friend, asking a question with interrogative pronouns, serial numbers, imperative mood 4. The country I live in works Giving direction, tourist attractions and sightseeing in Slovakia, weather, meeting with a friend, asking a question with interrogative pronouns, serial numbers, imperative mood 5. Letters and correspondence Personal letter, worksheet, invitation, thank-you note, telephoning and useful phrases, temporary present tense, indicative pronouns 6. Letters and correspondence Personal letter, worksheet, invitation, thank-you note, telephoning and useful phrases, temporary present tense, indicative pronouns 7. TEST I	

8. Company profile	Leisure time, jobs, definite/indefinite articles, gradation of adjectives, adverbs, adjectives
9. Company profile	Leisure time, jobs, definite/indefinite articles, gradation of adjectives, adverbs, adjectives
10. Education and school	Slovak education system, request for advice, simple past tense, passive voice, some and any
11. Education and school	Slovak education system, request for advice, simple past tense, passive voice, some and any
12. Applying for a job	Advertisement, job opportunities, simple present tense, continuous present tense, irregular verbs
13. Applying for a job	Advertisement, job opportunities, simple present tense, continuous present tense, irregular verbs
14. Oral exam – presentation of a chosen topic

Learning outcomes: The aim of the course is to provide students applying / admitted to an Erasmus exchange or internship with the basics of the German language needed to survive in a German-speaking country in everyday situations in contact with local people and to ignite interest in both the language and local history, and culture.	
Class syllabus: 1. Hallo! Sprechsituationen: die Kollegen begrüßen, sich verabschieden. Grammatik: Alphabet, Aussagesätze. Übungen. 2. Leute aus Deutschland. Sprechsituationen: sich vorstellen, Grammatik: W-Fragen, Verb-formen in Präsens, Fragewörter. Übungen. 3. – 4. Wie geht's? Sprechsituationen: Wie es jemandem geht sagen, was man trinken möchte. Telefonnummer und Adresse sagen, Grammatik: Ja/Nein Fragen, Verbformen im Präsens, Zahlen, Verbposition. Übungen. 5. – 6. Was kostet das? Sprechsituationen: Über Preise sprechen, Verkaufsgespräche führen, Gegenstände beschreiben, Kleinanzeigen verstehen, Grammatik: Zahlen bis 1 Million, Nomen und Artikel, bestimmter und unbestimmter Artikel, Personalpronomen. Übungen. 7. – 8. Wie spät ist es? Sprechsituationen: Uhrzeiten/Tageszeiten angeben, über den Tagesablauf sprechen, sich verabreden, Grammatik: trennbare Verben, Satzklammer bei trennbaren Verben, trennbare Verben, Zeitangaben im Satz.	

9. – 10. Was darf's sein? Sprechsituationen: Einkaufsdialoge verstehen, einen Einkaufszettel schreiben, Kochrezepte verstehen, Grammatik: Mengenangaben, Plural der Nomen, Akkusativformen, Verben mit Akkusativ.

11. – 12. Familienleben.

Sprechsituationen: über die Familie sprechen, das Datum sagen/ schreiben, Grammatik: Possessivartikel: mein-, dein-, sein-, ...

13. Wann bist du geboren? Sprechsituationen: über Geburtstage sprechen, über Vergangenes sprechen, Grammatik: Ordinalzahlen und Datum, Präteritum von sein und haben

14. Examen

Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: Assessment of students is in the form of an exam, minimum success rate: 60%. Rating: A: 91-100%, B: 81-90%, C: 73-80%, D: 66-72%, E: 60-65%, FX: 59% and less	
Learning outcomes: At the end of the course the student obtains basic information about the course of processes in metabolism of substances not only in a healthy human organism but also in the body of patients, understanding the nature and mechanisms of changes, understanding biochemical parameters coming from clinical-biochemical laboratories	
Class syllabus: Organization and chemical composition of organisms - cell structure, chemical composition of cell - organic, inorganic substances, enzymes and coenzymes). Intermediate metabolism - characteristics of metabolic processes, basics of bioenergetics. biological oxidation, metabolism of carbohydrates, lipids, amino acids, nucleotides, tetrapyrroles. Genetic information - replication, transcription, translation. Basics of metabolic regulation Biochemistry of the gastrointestinal tract - oral cavity, stomach, pancreas, bile, small intestine, large intestine. Liver biochemistry. Kidney biochemistry. Biochemistry of the nervous system - structure, metabolism, principles of nerve transmission, vegetative nervous system. Biochemistry of the endocrine system acid-base balance Blood plasma proteins Preparation of biological material for biochemical examination. Biochemical composition of living systems and its importance for metabolism and clinical-biochemical diagnostics. Possibilities of determination of analytes, pH and minerals in biological fluids (blood, urine, cerebrospinal fluid ...) Glucose testing. Diabetes mellitus and its laboratory diagnostics, glycosylated hemoglobin, ketone bodies. Examination of lipid profile. Atherosclerosis and its laboratory diagnostics.	

Examination of protein and non-protein nitrogenous substances. Urine examination for the presence of physiological and pathological components (glucose, proteins, ketone bodies, urobilinogen). Jaundice and its laboratory diagnostics
Examination of minerals and acid-base balance parameters. Enzymes in clinical-biochemical diagnostics

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚLBf/J-1-PA-068/18	Course title: Biophysics and Radiology
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 2 / 1 per level/semester: 28 / 14 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: Continuous assessment at practical sessions and seminars, final credit test.	
Learning outcomes: After completion of the subject Biophysics and radiology, students are able to master the basic physical and physical-chemical processes in biological systems and human body. Students understand biophysical principles of physiological and pathological processes in humans at a level of a cell, tissues and the organ systems. They know and apply to practice the basic biological effects of physical factors affecting the human body and a protection against their harmful influences. They master the biophysical principles of medical instrumentation used in diagnostic and some therapeutical methods.	
Class syllabus: -Cell membrane structure and function. Transport mechanisms. Resting membrane potential. -Action potential, origin, spread. Synaptic transmission. -Biophysics of muscle contraction. -Biophysics of respiration. -Biophysics of blood circulation. -Biophysics of sound perception and light signals. -Interaction of mechanical and meteorological factors with living systems. -Properties and biological effects of ionizing and non-ionizing radiation. -Biophysical principles of modern imaging diagnostic and therapeutic methods using ionizing and non-ionizing radiation in medicine and midwifery.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-1-PA-041/16	Course title: Childbirth Preparation and Parenthood (1)
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: JLF.ÚPAs/J-1-PA-013/15 - Psychology I. -1 and JLF.ÚPAs/J-1-PA-020/15 - Midwifery I. (2)	
Course requirements: KS (15) and KPV (20) Development and presentation of an educational program focused on exercise during pregnancy, childbirth and puerperium. Evaluation of students is provided through running test and practical demonstration of the chosen topic, Minimal level to pass the subject: 60 %. Evaluation: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, Fx: 59 % a menej. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: The course includes knowledge and promotes development of abilities and gaining of skills in childbirth preparation and parenthood in clinical departments. After his completion student is able provide individualized nursing care to woman and family in childbirth preparation and parenthood. Student is able keep nursing techniques by accepted criterions of output and needs of woman in all age groups.	
Class syllabus: History of chidbirth preparation and parenthood.Goals of childbirth preparation childbirth and parenthood. Forms of childbirth preparation and parenthood.Methods of childbirth preparation and parenthood – Lamaze, Odent, Bradley, Kitzinger, Leboyer. Lectures of chidbirth preparation and parenthood 1 . - 12. week of gestation, 12. – 24. week of gestation, 24. – 36. week of gestation,36. week of gestation to labour.Lectures of chidbirth preparation and parenthood 1. stage of labour – physical, psychological and social changes. Lectures of chidbirth preparation and parenthood 2. stage of labour.Lectures of chidbirth preparation and parenthood 3. stage of labour.Lectures of chidbirth preparation and parenthood 4. stage of labour. Lectures of chidbirth preparation and parenthood stadium after labour and delivery.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚLBL/J-1-PA-049/17	Course title: Clinical Genetics
Educational activities: Type of activities: lecture Number of hours: per week: 1 per level/semester: 14 Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 5.	
Educational level: I.	
Prerequisites: JLF.ÚA/J-1-PA-001/22 - Anatomy and Physiology	
Course requirements: Lectures are obligatory. Mark, according to two preliminary tests results (at least 60 %). Scale of assessment (preliminary/final): 100 / 0	
Learning outcomes: During the study students gain basic information about clinical genetics and its use in medicine, including the knowledge about the human karyotype, the distribution and nomenclature of human chromosomes, mutations and mutagenic agents, the causes of mutations and their consequences, monogenic and polygenic inheritance, autosomal and gonosomal conditions, selected genetic disorders, their laboratory diagnostics, screening, prevention and treatment used in medical practice.	
Class syllabus: <ul style="list-style-type: none">• Human cytogenetics. Normal human karyotype and methods of its study. Cytogenetic nomenclature. Sex chromosomes and sex determination.• Chromosomal aberrations: origin, types, manifestations; chromosome aberrations as a cause of pathological conditions; chromosome variants. Chromosome instability syndromes. Chromosomal fragile sites.• Monogenic inheritance in humans. Nomenclature of human loci and alleles. Basic terms. Autosomal dominant inheritance in pedigrees and population. Autosomal recessive inheritance and its criteria; the effects of parental consanguinity; segregation analysis.• Inheritance of genes located on sex chromosomes. Mitochondrial inheritance. Examples of monogenic diseases.• Polygenic inheritance in humans. Gene interactions in humans. Polygenic inheritance of quantitative traits. Correlation between relatives. Heritability and coefficient of genetic determination: possibilities of human determination. Polygenic inheritance of qualitative traits: threshold model. Examples of polygenic inherited quantitative traits and diseases. Inheritance and environment: twin method.• Mutations and mutagenesis. Spontaneous mutations in humans. Mutation frequency and assay methods (direct and indirect); relation of frequency and the age of parents. Induced mutations and mutagenic agents. Methods for testing the mutagenic effect of environmental factors in humans.	

Mutations and Human Health. Mutagenesis and carcinogenesis. Oncogenes and tumor suppressor genes. Molecular basis of carcinogenesis.

- Genetic polymorphisms in humans. Definition of genetic polymorphism. Origin of polymorphism in population. Types of polymorphisms: DNA polymorphism, protein polymorphism, isoenzymes, chromosome polymorphism, blood-group systems, HLA system. Practical use of genetic polymorphism. Genetic polymorphism in the study of human evolution.
- Genetics in medicine. Genetically determined pathological conditions: types, abundance in the population, contribution of the genetic component to morbidity and mortality. Participation of genetics in diagnosis, treatment, prevention and elucidation of etiology of human diseases. Genetic diagnostics, screening, carrier detection. Specific treatment of genetic disorders. Genetic counseling and prenatal genetic diagnostics.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-1-PA-029/22	Course title: Clinical Propedeutics
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 2.	
Educational level: I.	
Prerequisites: JLF.ÚA/J-1-PA-001/22 - Anatomy and Physiology	
Course requirements: CS - study of literature and preparation for the test. Anamnesis collection, recording of anamnestic data, physical examination and recording of physical examination findings. The evaluation of students takes place in the form of a written knowledge test and evaluation of the written elaboration of anamnestic data and physical examination. Overall rating: A: 91-100%, B: 81-90%, C: 74-80%, D: 73-66%, E: 60-65%, FX: 59% and less. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: By completing the course, the student is able to apply theoretical knowledge to take anamnesis and assess the overall condition of the patient. Can implement procedures of physical examination of individual systems. Subsequently, he is able to evaluate the anamnestic data and symptomatology of the disease and can assess the patient's condition with a focus on identifying cases requiring urgent medical and nursing intervention. The student demonstrates knowledge of functional, imaging, endoscopic examination methods and punctures, the preparation of the patient for the given examinations, care during and after the examination. The student can apply the basic practical skills in clinical propedeutic in clinical work and understand the need for interdisciplinary and multidisciplinary teamwork. In order to streamline and standardize the communication of (critical) events in clinical nursing practice, the student uses the structured method of SBAR communication.	
Class syllabus: Anamnesis, methodology and data entry. Physical examination of the patient, methodology of physical examination methods and recording of findings from the physical examination. General examination of the patient (status presens generalis) and recording of findings from the overall examination. Examination of the cardiovascular system, assessment and analysis of subjective and objective symptoms (chest pain, shortness of breath, oedema, fatigue, palpitations, syncope, claudication, rest pain), another anamnesis. Basic principles of ECG recording evaluation. Clinical and functional examination methods of the vascular system. Examination of the respiratory system, assessment and analysis of subjective and objective symptoms (shortness of breath, cough, expectoration, wheezing, stridor, chest pain, drowsiness), another anamnesis. Functional examination methods. Abdominal examination, assessment and analysis of subjective and objective	

symptoms (swallowing symptoms, nausea and vomiting, abdominal pain, constipation, diarrhoea, rectal bleeding, melena, generalized abdominal enlargement, jaundice and pruritus, appetite and weight). Examination of the uropoetic system, symptoms of the lower bladder, other anamnesis. Renal function tests. Examination of the patient's neurological condition, assessment and analysis of subjective and objective symptoms (dizziness, headache, numbness and weakness, tremor, syncope, convulsions, visual symptoms), another anamnesis. Examination of the eyes, ears, nose and neck, assessment and analysis of subjective and objective symptoms: eyes (redness, diplopia, vision loss, colour vision disorder, other anamnesis), ears (otalgia, otorrhea, dizziness, hearing loss, tinnitus, injury ear, deformities), nose (obstruction, secretion, epistaxis, sneezing, olfactory disorders, deformities, pain), neck (pain, pharyngeal globe, nodules, dysphonia, halitosis, stridor). Examination of the musculoskeletal system, assessment and analysis of subjective and objective symptoms (pain, stiffness, oedema, crepitus, deformities, weakness, impaired sensitivity, loss of function, extra-articular symptoms), another anamnesis. Examination methods - punctures (patient preparation, care after puncture). Endoscopic examination methods (patient preparation, examination process, nurse interventions, post-examination care). X-ray examination methods (patient preparation, examination process, nurse interventions, post-examination care). Visit. Assistance with the patient's visit and examination. Nurse visit. Admission, translation and discharge of the patient.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-1-PA-031/16	Course title: Communication
Educational activities: Type of activities: practicals Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: JLF.ÚPAs/J-1-PA-013/15 - Psychology I. -1	
Course requirements: Assesment of student outcomes takes form of presentation of the essay , a monitored self-study (20 hours) is also a necessary condition of the assessment. Minimal required level is: 60 %. Evaluation: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, FX: 59 % and less Scale of assessment (preliminary/final): 0/100	
Learning outcomes: After completion of the subject the student obtains fundamental information about interpersonal communication and its significance in health-care professions. The student understands principles of professional interview, the importance of active listening and empathy; is able to identify and interpret contents of verbal and non-verbal communication. This course contributes to development of students' social skills. On the basics of the solution of model situations, student can adequately respond to the demands of patients, their family members, as well as co-workers and to deal with conflict situations and criticism.	
Class syllabus: <ul style="list-style-type: none">- Introduction, aims of the course, the significance and specifics of communication in the health care professions.- Self-knowledge, methods of exploring and evaluation of others.- Social skills, presentation in public.- Ability of self- presentation, motivation and personality profile.- Nonverbal communication (nvk): components and importance of nvk in professional communication, interpretation of nvk, compliance and non-compliance of nvk and verbal communication.- Assertiveness in communication and it's development, manipulation.- Criticism, coping with the affective attack in communication.- Interview: types of interview, phases of professional interview, types of questions.- Active listening and empathy.- Group discussion, group decision-making and cooperation.- Conformity, dominance vs. obedience and power issues in communication.- Conflicts and their solution, prejudice in communication.	

- Communication styles in conflict situations.
- Specifics of communication with selected groups of patients.

STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.GPK/J-1-PA-SS1/17	Course title: Defence of Bachelor Thesis
Number of credits: 5	
Recommended semester: 5., 6..	
Educational level: I.	
Learning outcomes: <p>The graduate masters the basics of scientific work in the field of nursing and methods of obtaining scientific and professional information. Can develop midwifery practices, think critically and use research results. The graduate masters the basics of working in a multimedia environment and masters the basics of one world language. The graduate will enter the practice as a convinced supporter of the independence of their profession and modern trends in nursing theory and practice. It follows the principles of ethics in midwifery, which it bears.</p>	
Class syllabus: <p>Scientific methods and their classification. Ethical aspects of midwifery research. Work with professional literature and other documents. Search for literary sources, their use and processing. Processing and storage of professional information. Citation in the text and List of bibliographic references. Research project and its phases. Characteristics and significance of individual phases of the research process. Formulation of research problems, questions and hypotheses. Possibilities of determining research problems in nursing, proposal of their solution, possibilities of verification, choice of method. Research instrument selection criteria. Preparation and processing of obtained empirical data. Descriptive statistics and its use in data processing. Qualitative methods. Qualitative data analysis. Case study - case study. Preparation and use. Interpretation of obtained data, discussion, conclusions. Formal and content requirements of the bachelor thesis. Methodology of processing verbal answers. Presentation of results - verbal, written. Language and scientific style of work. Preparation of the presentation preparation for the defense.</p>

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.KAIM/J-1-PA-011/16	Course title: First Aid
Educational activities: Type of activities: practicals Number of hours: per week: 1 per level/semester: 14 Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: 100% participation in practical exercises, successful completion of a credit test. Students are evaluated for their theoretical preparation for practical exercises and active participation in practical teaching - mastering and solving model cases. Scale of assessment (preliminary/final): Exam	
Learning outcomes: After completing the course, the student will gain an overview of the position of first aid in medicine, learn to quickly orient themselves in critical situations and properly participate in maintaining health, preventing further damage and saving lives. The student will be motivated for the next study of medical disciplines. Emphasis is placed on individual and group solutions to acute problems and the acquisition of basic clinical skills.	
Class syllabus: The importance of first aid. Guiding principles for first aid. The chain of survival. Basic life-saving operations (head tilt, first aid for choking on foreign bodies, recovery position). BLS - BasicLifeSupport - basic emergency resuscitation. How to use the AED (Automatic External Defibrillator). First aid for traumatic life-threatening conditions (bleeding, wounds, dressing techniques, dislocations, fractures, head, neck, chest, abdomen and pelvis injuries, polytrauma, burns, frostbite, bites and stings, drowning). First aid for non-traumatic life-threatening conditions (heart attack and chest pain, asthma attack, shortness of breath and respiratory failure, stroke, seizures, diabetic emergencies, unconsciousness, anaphylaxis, poisoning, sudden childbirth). Practical skills in specific situations - proper extraction of the injured unconscious from the car, shooting a motorcycle helmet.	
Recommended literature: First aid, CPR, and AED. Alton L. Thygerson, medical writer; Steven M. Thygerson, medical writer; Benjamin Gulli, medical editor; Gina Piazza, medical editor; American College of Emergency Physicians; Jones and Bartlett Publishers, 2016 ERC guidelines 2021

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-1-PA-037/16	Course title: Health Education II.
Educational activities: Type of activities: practicals Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: JLF.ÚPAs/J-1-PA-022/15 - Health Education I. (2)	
Course requirements: Evaluation of students is provided through seminar essay. Minimal level to pass the subject: 60 %. Evaluation: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, Fx: 59 % a menej. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Students will acquire skills in promoting, maintaining and returning health in primary, secondary and tertiary prevention in all age groups. The student is able to provide a holistic approach based on systematic and individualized nursing care oriented health of individuals, families and communities. The student can use the methods and means of education appropriate for each target group.	
Class syllabus: Specifics about the education of women preparing for gynecological examination Specifics about the education of women menstrual cycle Specifics of education about intimate hygiene during menstruation Specifics of education of women on the prevention of inflammatory diseases of genitals Specifics of education of women about preventing sexually transmitted diseases Specifics of education of women on the prevention of cancer of genitals Specifics of education of women on the prevention of breast cancer Specifics of education of women about breast self-examination Planning and implementation of educational program . Specifics of education of women on the prevention of estrogen deficient syndrome vegetatívneho Specifics of education of women on the prevention of estrogen deficient metabolic syndrome - Osteoporosis Specifics of education of women on the prevention of estrogen deficient metabolic syndrome - Atherosclerosis Specifics of education of women on the prevention of estrogen deficient metabolic syndrome - obesity Specifics of education of women on the prevention of organic - estrogen - deficient syndrome metabolic syndrome Specifics of education of women on the prevention of stress incontinence	

Specifics of education of women on the prevention of stress incontinence - Therapeutic Exercises
Planning and implementation of educational program

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚVZ/J-1-PA-004/15	Course title: Hygiene and Epidemiology
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: EVALUATION: Requirements for successful completion of the course: a/ mandatory active attendance at practicals and lectures (per 2 points, max. 28 p.) Only one excused absence is allowed (in accordance with Study Rules of the JFM CU) – however, points are not counted unless appropriately substituted/compensated (the form assigned by the respective teacher). Activity of student and each seminary can be awarded in points by teacher – (max. 2 points). b/ Exam - test (max. 72 points): 36 questions (1 question per 2 points) Final evaluation: Achieved points score Evaluation 100 – 91 A (excellent - 1) 90 – 81 B (very good - 1, 5) 80 – 73 C (good - 2) 72 – 66 D (satisfactory - 2,5) 65 – 60 E (sufficient - 3) 59 and less Fx (fail - 4) For successful completion of the course, achieving at least 60 points in final evaluation is needed. Scale of assessment (preliminary/final): 100/100	
Learning outcomes: After completion of the subject the student is able to apply the basic knowledge on epidemiology and hygiene branches. Student understands nature of epidemic process, principles of immunization, sterilization, disinfection, disinfestation and control of animal pests. The student is able to identify the major epidemiological characteristics of communicable and non-communicable diseases and is able to apply knowledge in the form of preventive and repressive measure. The student understands environmental factors of living and working places, ways of their identification, monitoring and control, preventive intervention programs. The student understands the role of hygiene and epidemiology in public health.	

Class syllabus:

Epidemiology - history, definition, distribution, position in public health. Epidemiological methods. Regularities of the epidemic process. Classification of communicable diseases, epidemiological characteristics of the specific groups, preventive and repressive measures. Hospital infections and their prevention. Hand hygiene. Role of immunity, passive and active immunization. Epidemiology of non-communicable diseases, clinical epidemiology. Introduction to epidemiology of tropical diseases, travel medicine and disaster medicine. Hygiene - history, definition, classification, position within the public health. Environmental hygiene. Goals and content of Environmental Hygiene, Nutritional Hygiene and items of daily use, Hygiene of Children and Youngsters, Preventive Occupational medicine, Radiation Hygiene and Hospital Hygiene. Identification and monitoring of environmental factors (physical, chemical, biological, psychosocial) and health determinants influencing the health of individuals and population. Preventive intervention strategies.

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚCJ/J-1-PA-024/22	Course title: Medical Terminology
Educational activities: Type of activities: practicals Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: 95% participation in seminars, at least 60% success in two written tests per semester. Grading: A: 91-100%, B: 90-81%, C: 80-73%, D: 72-66%, E: 65-60%, FX: less than 60% Exam: final grade summary result for credit (40%) and exam performance (60%) Scale of assessment (preliminary/final): Exam: final grade summary result for credit (40%) and exam performance (60%)	
Learning outcomes: The aim of Latin teaching is to acquire terminological competence, i.e. capacity of accurate and correct usage of medical language at work with terminological materials presented in oral and written way, as well as acquisition of basic knowledge of general medical terminology.	
Class syllabus: 1. Introduction to medical Latin. I. Latin and Greek declensions A brief overview of the history of medical terminology. Introduction to Latin grammar # pronunciation, syllable length, accent. Noun declensions, overview of declensions. Structure of multiword terms, close and loose attribute, prepositional phrases. Nouns and adjectives of the 1st Latin Declension. 1st declension Greek nouns. Connection of a noun with an adjective. Ad illustrandum: the term "pit" in anatomical terminology, the meanings of the terms "seam" and "fissure". 2. 2nd Latin and Greek declensions 2nd Latin declension nouns - masculine, neuters, gender exceptions - feminines. The rule of neuters of all declensions. 2nd declension Greek nouns - masculines and neuters. 2nd declension adjectives. Adjective word-forming suffixes -# suffix -ōsus, a, um. Ad illustrandum: "humerus" and related terms; substantivized 1st and 2nd declension adjectives. 3. 3rd Latin consonant declension Consonant declension - masculine and feminine nouns. Consonant declension - neuters. 3rd declension medical terms ending in -us. 3rd declension nouns combined with 1st and 2nd declension adjectives. Ad illustrandum: expressing side in clinical diagnoses; eponyms in medical terminology. 4. 3rd Latin vowel declension	

Vowel declension (masculine, feminine and neuter nouns). Definition of vowel declension nouns. Special declension of the "febris" type nouns. Differences between "corpus" and "rēte" patterns. Latin diminutives.

Ad illustrandum: terms representing openings in the anatomical nomenclature; types of bone fragment displacement in fracture.

5. 4th and 5th declensions

4th declension nouns – masculine, neuter gender. Gender exceptions: feminine nouns. 5th declension nouns. Combining 4th and 5th declension nouns with 1st and 2nd declension adjectives.

Overview of Latin declensions. Specifics of the term "speciēs". Adjective suffix -oīdeus, a, um.

Ad illustrandum: Latin equivalents of the terms "cavity" and "channel".

6. 3rd declension adjectives

3rd declension Latin adjectives – one-termination, two-termination and three-termination adjectives. Declension of 3rd declension adjectives. Greek adjectives of the 3rd declension. The meaning of adjective suffixes -ālis, e / āris, e.

Ad illustrandum: Use of close and loose attribute. Synonymous names in Terminologia Anatomica.

7. TEST I

8. Comparison of adjectives

Regular, irregular and incomplete comparison of adjectives. Specifics of comparatives and superlatives in medical terminology. Order of attributes in Latin.

Ad illustrandum: the term "labium" and its meanings; exceptions to the use of the "major - minor" comparative.

9. 3rd Greek declension

Consonant declension, vowel declension. Clinical terms formed by the system suffixes -ītis, -ōma, -ōsis. Some basic Greek stems. Adjective suffix -icus, a, um.

Ad illustrandum: exceptions to the formation of terms denoting inflammation; the term "cardia" and its meanings.

10. Numerals.

Formal and grammatical structure of the medical prescription.

Cardinal, ordinal, multiple numerals, numeric multiple adverbs, decimal point. Declension of numerals. Combination of a numeral with a noun - expression of a counted object. Verbs in medical terminology - infinitive, imperative, present subjunctive. Formal and grammatical structure of the prescription, abbreviations used in prescription, examples of prescription writing. Some basic Greek stems.

Ad illustrandum: cranial nerves - nervī crāniālēs.

11. Prefixes

Word formation - basic rules of derivation. Latin and Greek prefixes: a) prefixes with the meaning of direction, place, time b) prefixes with the meaning of quality, negation. Some basic Greek stems.

Ad illustrandum: obstetrics: terms relating to the time of birth; naming the body planes.

12. Suffixes. Adverbs

Noun suffixes, adjective suffixes. Latin and Greek suffixes in Slovak. The most common adverbs in medical terminology. Some basic Greek stems.

Ad illustrandum: terms derived from the words "corōna" and "korónē"; adjectives derived from the word "spīna".

13. Compound words

The most common components of compound words. Connecting vowels. Position and frequency of compound words components. Word-formation models; semi-affixes. Overview of components: a) human body b) body substances, fluids, secretions c) quantity, quality d) colors e) process, diseased state f) therapy, diagnostics, surgical procedures.

Ad illustrandum: mūsculī collī; Latin titles.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚMI/J-1-PA-006/15	Course title: Microbiology
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: - it is obligatory to be present at practicals (1 absence is tolerated) - test during the semester Exam: End study evaluation of students is based on written exam – test. Scale of assessment (preliminary/final): 25 % / 75 %	
Learning outcomes: The student receives information from bacteriology, virology, parasitology and mycology, about their structure, metabolism, pathogenic potential and pathogenesis of infectious diseases, genetics and antibiotics used for the treatment as well as methods of desinfection and prevention (vaccination included). The student is trained to use principal diagnostical procedures, understand their theoretical background, indication and interpretation. The student is able to manage the most common ways of sampling of infectious material, to process it for microscopy, cultivation, identification and ATB susceptibility and tools of pathogeneity testing. Theoretical knowledges are based on study of etiology of infections of systems.	
Class syllabus: Introduction to microbiology, Structure of bacterial cell, Physiology and metabolism of bacterial cell, Genetics of bacterial cell, .Antibiotics and resistance, Safety in microbiological laboratory,organization of study, Microscopy, Cultivation, inoculation, Identification of bacteria. Cultivation media. Anaerobic bacteria cultivation. ATB susceptibility testing, Taxonomy of bacteria, Bases of virology, parasitology, mycology, HIV and prions, Systemic diagnosis of infection ethiology

STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.GPK/J-1-PA-SS2/22	Course title: Midwifery I.
Number of credits: 10	
Recommended semester: 5., 6..	
Educational level: I.	
Learning outcomes: <p>Graduates of the midwifery study program are able to meet the requirements of a discipline that integrates the theory of midwifery with scientific knowledge from other disciplines, necessary for providing the health services to the public within the frame of the primary, secondary and tertiary prevention. Graduates are able to provide health care for women, families or communities of women during health or illness and to contribute to promotion of health.</p> <p>The goal of the Jessenius Faculty of Medicine in Martin JLF UK is to provide graduates of the bachelor's midwifery study program with the following knowledge, abilities and skills:</p> <p>The graduate have knowledge of the basic care of the mother and child in midwifery and is able to apply knowledge in the praxis. He/she is generally educated and trained to understand the associations between midwifery, biomedical sciences, social sciences and life sciences, and is able to transform this knowledge into a holistic approach to midwifery practice.</p> <p>The graduate has theoretical knowledge of disciplines that describe the organs and systems of healthy and sick individual, the mental processes and characteristics, and social environment. He/she is able to support and promote health, prevent disease, educate and motivate women and families to lead a healthy life-style. The graduate is able to use his/hers skills required within the midwifery techniques training in the praxis.</p> <p>Based on their knowledge, skills and social maturity, the graduate is able to contribute to the professionalization of midwifery and increase the prestige and respect of midwifery profession in society.</p> <p>The graduate is able to ready to perform multifaceted midwifery-related tasks. He/she has the ability to manage and provide preventive, supportive, curative and rehabilitative care for women thorough their reproductove age, during pregnancy, childbirth and the postpartum period.</p> <p>The graduate is able to provide education for women, their families and medical professionals. He/she has the ability to actively and effectively cooperate within the medical team.</p> <p>He/she can improve the midwifery practice and think critically.</p> <p>The graduate will enter the practice as a convinced supporter of independence and modern trends within the theory and practice in midwifery.</p> <p>The graduate is a bearer of humanistic principles, develops the ability of empathy, respects human dignity and human rights, especially the rights of women and children. He/she follows the principles of professional ethics.</p> <p>The graduate follows all the legislation necessary for the exercise of the profession of midwife.</p>	

The graduate masters the basics of scientific work and methods of work with scientific data. The graduate masters the basics work in a multimedia environment and masters the basics of one world language.
The graduate has the prerequisites to continue further study

Class syllabus:

THEORETICAL PART:

Legislative standards governing midwifery. Importance of professional organizations (ICM, EMA, SK SaPA). Standards in midwifery, creation (DySSy creation methodology) and their use in practice. Standard terminology and classification systems in midwifery. The importance of classification systems in individual phases of the nursing process. Development of nursing diagnostics (NANDA classification system) and Gordon's functional and dysfunctional patterns of health.

Selected conceptual models: Nightingale's, Henderson's, Orem's model of self-care, Leininger's model of transcultural nursing. Nursing ethics, basic principles, code of ethics, information issues. Solving moral problems in the practice of midwifery.

Midwifery care focused on the treatment of women during physiological pregnancy, childbirth and the puerperium, as well as the treatment of pregnant women, mothers and the puerperium in pathological conditions.

Newborn and infant care primary care for women and families, preparation for childbirth and parenthood, sexual and reproductive health care for women, health education, nutrition for women, newborns and infants and research in midwifery.

PRACTICAL PART

Providing individualized nursing care by the method of the nursing process in gynecology. clinic Implementation of prescribed nursing procedures and techniques.

Implementation of individual examination methods and procedures used in assessing the health and state of health of women, newborns, infants and their families

Making records in patients' medical records.

Implementation of education of patients, mothers and their relatives.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-1-PA-018/22	Course title: Nursing Techniques (2)
Educational activities: Type of activities: practicals Number of hours: per week: 6 per level/semester: 84 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: I.	
Prerequisites: JLF.ÚPAs/J-1-PA-017/22 - Nursing Techniques (1)	
Course requirements: Checked practical outcome (17 hours) - preparation and implementation of selected practical procedures - Participation in practice to specific criteria - Written test at the beginning of each practical, the threshold of success: 60% - Written test in 7th and 13 th week of the semester, the threshold of success: 60% Evaluation: A: 91–100 %, B: 81-90 %, C: 73-80 %, D: 66-72 %, E: 60-65 %, FX: 60 % and less. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: The student will be effectively controlled by individual performances in midwifery. He/she will be follow the standard criteria specific performance criteria (structure, process, outcome).	
Class syllabus: Dressings, Bandages, Binders. Infection Control. Bedmaking. Hygiene. Activity and Mobility. Vital signs. Nutrition. Diagnostic Procedures. Elimination. Medications. Intavenous Therapy and Blood Transfusion. Specimen Collection. Care of the surgical Client. Admitting, Transfer, Discharge. Care of a body after Death. Care of a woman with gynaecological problems. Care of a woman during labor. Care of a woman during puerperium.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.KDD/J-1-PA-007/15	Course title: Nutrition of a Woman, Newborn and Infant
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 1	
Recommended semester: 2.	
Educational level: I.	
Prerequisites: JLF.ÚO/J-1-PA-015/15 - Patient s Needs and Nursing Process (1)	
Course requirements: 90% attendance at lectures 90% participation in practical exercises Scale of assessment (preliminary/final): final test	
Learning outcomes: The student will acquire basic information about the particular nutrition of children, about the composition and importance of breast milk, about the composition of substitute milk formulas and indications of their use, about nutrition of physiological and pathological newborns. They will learn the technique of breastfeeding, and storing breast milk.	
Class syllabus: Nutrition in particular periods of pregnancy, food pyramid. Eating in pregnancy, nursing process. Breast milk, its composition and comparison with cow's milk The importance of breastfeeding and its contraindications by mother and child. Drugs, addictive substances, drugs and breastfeeding. Nutritional need for a newborn and a premature baby. Natural nutrition of the newborn, low birth weight newborn. Basics of parenteral nutrition of a newborn, its indications and complications. Preparations of substitute infant formula, initial and follow-on milk, dietetic formulas, antireflux and hypoallergenic milk, prebiotics, probiotics, symbiotics. Baby nutrition in the first year of life: natural nutrition, milk substitute, non-milk supplements and infant beverages. Infant nutrition in some selected pathological conditions.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.GPK/J-1-PA-009/15	Course title: Obstetrics (1)
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 2 per level/semester: 14 / 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 2.	
Educational level: I.	
Prerequisites: JLF.ÚA/J-1-PA-001/22 - Anatomy and Physiology	
Course requirements: Active participation in 80% of practical exercises. Scale of assessment (preliminary/final): Continuous assessment	
Learning outcomes: By completing the course the student will gain basic knowledge about the anatomy and physiology of female genitals in relation to pregnancy and childbirth. The student will get information about fertilization, development and growth of the fetus, the course of physiological pregnancy and physiological childbirth. The student will get acquainted with the diagnostic procedures used during physiological pregnancy, childbirth and the puerperium. The student is able to apply his knowledge in basic obstetrics, in monitoring the condition of the fetus and in the management of physiological childbirth.	
Class syllabus: Anatomy of a small pelvic bone from an obstetric point of view, pelvimetry. Origin and development of pregnancy, development and growth of the fetus, fetal circulation, placenta. Pregnancy diagnosis. Prenatal diagnosis. Fetal storage. Obstetric examination, gynecological and obstetric anamnesis. Spontaneous delivery by head, delivery time, medical management of childbirth. Childbirth injuries. Cardiotocography in pregnancy. Non stress test and oxytocin stress test. Ultrasonography in pregnancy. USG diagnosis of pathological conditions in pregnancy. Fetal pulse oximetry and ST segment analysis of FEKG during childbirth. Diagnosis of fetal metabolic status by peri-postpartum acidobase examination. Newborn condition assessment. Physiological seizures.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.GPK/J-1-PA-027/16	Course title: Obstetrics (3)
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 4.	
Educational level: I.	
Prerequisites: JLF.GPK/J-1-PA-009/15 - Obstetrics (1) and JLF.GPK/J-1-PA-026/22 - Obstetrics (2)	
Course requirements: Students are evaluated in the form of an oral exam. The minimum success rate is: 65%. Approximate assessment: A: 93-100%, B: 86-92%, C: 79-85%, D: 72-78%, E: 65-71%, FX: 64% and less. Scale of assessment (preliminary/final): Final exam.	
Learning outcomes: During the study of the subject, the student will deepen her knowledge of the most serious pathological conditions in pregnancy. By solving problem tasks, she will learn to use the obtained information in practice. The student can provide expert information and advice on physiological pregnancy. The student recognizes the symptoms of pathological conditions during pregnancy, childbirth and six weeks, and can provide adequate nursing care. She can assist the doctor in dealing with these conditions.	
Class syllabus: Premature birth, premature rupture of membranes. Post-term pregnancy. Preinduction and induction of labor. Abortion induction in II. trimester. Hypertensive diseases in pregnancy Diabetes mellitus during pregnancy and childbirth Fetal growth restriction Anthropozoonoses Bleeding conditions in obstetrics, DIC, amniotic fluid embolism Basic demographic indicators, maternal mortality and its causes

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPF/J-1-PA-008/22	Course title: Pathological Anatomy and Pathological Physiology
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 2 per level/semester: 14 / 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 2.	
Educational level: I.	
Prerequisites: JLF.ÚA/J-1-PA-001/22 - Anatomy and Physiology and JLF.ÚLBch/J-1-PA-067/21 - Biochemistry	
Course requirements: Assessment of students is carried out in the form of written examination, minimum passing score is 60%. Assessment scale: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, FX: 60 % and less. Scale of assessment (preliminary/final): Scale of assessment (preliminary/final): 0/100	
Learning outcomes: After completion of the subject the student will understand the basic morphological and functional manifestations of diseases, gain knowledge about the basic groups of causes of diseases, the mechanisms involved in the origin and development of symptoms and signs of diseases, biopsy and other methods that help diagnose diseases.	
Class syllabus: Introduction to the study of pathological anatomy and pathological physiology, etiology and pathogenesis. Biopsy and cytology in pathology. Inflammation. Overview of immunopathological processes. Neoplasia, benign and malignant neoplasms and their characteristic. Disorders of thermoregulation. Stress. Pathophysiology of shock. Disturbances of homeostasis - causes and mechanisms of disorders of water and electrolyte metabolism, causes and mechanisms of disorders of acid-base balance. Pathophysiology of nutrition. Diabetes mellitus. Pathology and pathophysiology of ischemic heart disease. Pathophysiology of arterial hypertension. Pathophysiology of heart failure.	

Disorders of the arterial and venous systems of the lower extremities.
Pathology and pathophysiology of diseases of the gastrointestinal tract and peritoneum.
Hepatobiliary disorders.
Pathology and pathophysiology of the most important respiratory diseases.
Functional consequences of the most important respiratory diseases, respiratory insufficiency.
Pathology and pathophysiology of the most important urinary tract diseases, clinical syndromes in renal diseases, acute and chronic renal failure.
Pathology and pathophysiology of the most important central nervous system disorders.
Overview of blood pathology.
Overview of pathology of the male and female reproductive system, pathological conditions associated with pregnancy.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-1-PA-015/15	Course title: Patient s Needs and Nursing Process (1)
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 2 per level/semester: 14 / 28 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: CS 15 hours:study of the literature and preparation for the test. CPO 30 hours based on the assessed patient data and the recorded nursing diagnosis, to justify the nursing diagnosis and develop an appropriate nursing care plan. The evaluation of students is carried out through written test and evaluation of the seminar paper focused on nursing diagnostics and nursing care planning; the minimum percentage to succeed is 60%. Overall evaluation: A: 91–100%, B: 81–90%, C: 72–80%, D: 73–66%, E: 60–65%, FX: 59% and less. Scale of assessment (preliminary/final): 100/0	
Learning outcomes: After completing the subject, the student characterizes the method of the nursing process, describe its phases - assessment, diagnosing, planning, implementation, evaluation. Can implement it in clinical practice; work with the patient's medical records and use the structured method of SBAR communication. Student documents the implementation of phases of the nursing process. The student is able to assess the human needs (breathing, nutrition, hydration, urinary and faecal elimination, sleep and rest, exercise, self-care), determine nursing diagnoses; set goals of nursing care, outcome criteria and prepare a plan of nursing care, implement and evaluate nursing care. The student applies the acquired knowledge in clinical practice.	
Class syllabus: Introduction of nursing process, definition of term, basis of development, overview of components of nursing process. The importance of the nursing process for clinical practice; barriers to the implementation of the nursing process. 1st phase of the nursing process – assessing; sources of information and methods of data acquisition, assessment according to M. Gorgon, types of assessment, documentation of assessment. 2nd phase of the nursing process – diagnosing; diagnostic process, Taxonomy II of nursing diagnoses according to NANDA-I. 3rd phase of the nursing process – planning; establishing priorities, goals and outcome criteria, nursing care, nursing care plans.	

4th phase of the nursing process – implementing; implementation process, nursing interventions - types, taxonomy.

5th phase of the nursing process – evaluating; process of evaluation.

Transmission of information in the health care team, SBAR communication strategy.

Patient medical records.

Human needs. Hierarchy of needs by A. H. Maslow. Factors influence human needs.

Breathing and nursing care

Nutrition and nursing care

Fluid, electrolyte and nursing care

Elimination and nursing care

Sleep and rest and nursing care

Physical activity and nursing care

Self-care, self-sufficiency and nursing care

Educational activities: Type of activities: practicals Number of hours: per week: 8 per level/semester: 112 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: JLF.ÚO/J-1-PA-015/15 - Patient s Needs and Nursing Process (1) and JLF.ÚPAs/J-1-PA-017/22 - Nursing Techniques (1) and JLF.ÚO/J-1-PA-016/15 - Patient s Needs and Nursing Process (2) and JLF.ÚPAs/J-1-PA-018/22 - Nursing Techniques (2) and JLF.ÚPAs/J-1-PA-019/15 - Midwifery I. (1) and JLF.ÚPAs/J-1-PA-020/15 - Midwifery I. (2) and JLF.KDD/J-1-PA-007/15 - Nutrition of a Woman, Newborn and Infant and JLF.GPK/J-1-PA-009/15 - Obstetrics (1) and JLF.GPK/J-1-PA-010/15 - Gynecology (1)	
Course requirements: <ul style="list-style-type: none">- Checked practical outcome (20 hours) - preparation on plan of care- Participation in the practice according to specific criteria- Continuous evaluation of practical performance, the minimum threshold of success: 60%.- Evaluation of theoretical knowledge according to established themes, the minimum threshold of success: 60%.- Continuous daily evaluation of information about patient, the minimum threshold of success: 60%- Evaluation 1 plan of care midwifery in women during puerperium according to established criteria, the minimum threshold of success: 60% . Final Evaluation: A= 91 – 100 % , B= 81 – 90 % , C= 73 – 80 %, D= 66 – 72 %, E = 60 – 65 %, FX - menej ako 60% Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Student performs assigned techniques in midwifery. He/she provides individualized care of the woman during labor and postpartum period. He/she performs routine newborn care, including care of Newborn at Birth.	
Class syllabus: Delivery room: Equipment of birthing rooms. Specifics of documentation in the delivery room. Implementation of nursing interventions - preparing for birth. Admission of woman in labor at delivery room. Care about woman in the first stage of labor. Care about woman in the second stage of labor. Care about woman in the third and fourth stage of labor. Postpartum department:	

Organization and system of work in the postpartum department. Prevention of nosocomial infections in the postpartum department. Specifics of the documentation in the postpartum department.

Admission, transfer, discharge of woman after birth.

Care about woman 6 hours after birth.

Care about woman in the next hours and days after birth.

Neonatal department:

Organization and system of work on the neonatal department. Routine daily care about newborns.

Nutrition

of newborn, breast milk substitutes.

Initial Care of the Newborn, Apgar score. Newborn screening

Gynaecological department:

Organization of work at gynaecological department. Specifics documentation at gynaecological department. Admission of patients.

Specifics documentation at gynaecological department. Transfer and discharge of the patient.

Implementation of nursing interventions - measuring and recording vital signs.

Implementation of nursing interventions - the collection of biological material.

Infusion.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-1-PA-062/16	Course title: Practice in Midwifery (2)
Educational activities: Type of activities: practicals Number of hours: per week: 8 per level/semester: 112 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 4.	
Educational level: I.	
Prerequisites: JLF.ÚO/J-1-PA-015/15 - Patient's Needs and Nursing Process (1) and JLF.ÚO/J-1-PA-016/15 - Patient's Needs and Nursing Process (2) and JLF.ÚPAs/J-1-PA-017/15 - Nursing Techniques (1) and JLF.ÚPAs/J-1-PA-018/22 - Nursing Techniques (2) and JLF.ÚPAs/J-1-PA-019/15 - Midwifery I. (1) and JLF.ÚPAs/J-1-PA-020/15 - Midwifery I. (2) and JLF.GPK/J-1-PA-026/22 - Obstetrics (2) and JLF.GPK/J-1-PA-028/22 - Gynecology (2)	
Course requirements: - checked practical outcome (10 hours) - preparation of plan of care - Participation in the practice according to specific criteria - Continuous evaluation of practical performance, the minimum threshold of success: 65%. - Evaluation of theoretical knowledge according to established themes, the minimum threshold of success: 60%. - Continuous daily evaluation of information about patient, the minimum threshold of success: 60% - Evaluation 1 plan of care midwifery in woman during labor according to established criteria, the minimum threshold of success: 60% Final evaluation of subject: A= 91 – 100 % , B= 81 – 90 % , C= 73 – 80 %, D= 66 – 72 %, E = 60 – 65 %, FX - menej ako 60% Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Student performs assigned techniques in midwifery. He/she develops critical thinking in assessing the patient's needs, identifying current and potential problems, formulating nursing diagnoses, goals, resulting criteria, planning and implementation of nursing interventions to evaluate the effectiveness of care in midwifery. He/she is able to provide individualized care about woman during delivery and postpartum period. He/she performs care about newborn, including initial care. He/she takes a special examination of pregnant women in prenatal counseling, including CTG examination.	
Class syllabus: Delivery room: Latent, active and transient phase of labor - identification in practice. Nursing diagnosis in the first stage of labour - solving them in practice. Nursing diagnosis in the second stage of labour - solving them in practice.	

Nursing diagnosis in the third and fourth stage of labour - solving them in practice.

Postpartum department:

Postpartum Assessment. Nursing diagnosis for postpartum – their solution in practice. Breastfeeding - the indication for right and wrong latch - assessment in practice. Nursing diagnosis for breastfeeding - their solution in practice.

Neonatal department:

Assessment of the newborn. The initial care about newborn (repeat). Physiological specificities of neonatal period - assessment in practice. Nursing diagnosis in the neonatal period.

Gynecological ambulance:

Organisation of work in out patient clinic. Documentation. Special examination of pregnant women

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-1-PA-065/22	Course title: Practice in Midwifery (3)
Educational activities: Type of activities: practicals Number of hours: per week: 16 per level/semester: 224 Form of the course: on-site learning	
Number of credits: 10	
Recommended semester: 5.	
Educational level: I.	
Prerequisites: JLF.ÚPAs/J-1-PA-052/16 - Practice in Midwifery (1)	
Course requirements: Checked individual study (20 hours) study of literature and preparation for tests Checked practical outcome (47 hours) preparation of a patient care plan - Participation in exercises according to established criteria - Continuous evaluation of practical performances, minimum limit 60% - Evaluation of theoretical knowledge according to set topics, min. 60% limit - Continuous daily evaluation of information about the assigned patient, min. 60% limit - Evaluation of 1 plan of midwifery care for a woman according to set criteria, min. 60% limit - Training and implementation of 5 births in the obstetric simulator Evaluation: Evaluation: A: 91-100%, B: 81-90%, C: 73-80%, D: 66-72%, E: 60-65%, Fx: 59% and less. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Graduate of the subject is able to actively perform the prescribed performance in midwifery. She is able to provide individualized parental care during childbirth and offspring. Performs a physical examination of the newborn, including the first treatment. She performs general examination and special postnatal examination of pregnant woman in counseling (external obstetric examination) of women in counseling, including CTG record.	
Class syllabus: Delivery room: CTG analysis and evaluation of the record, cardiotocography in twin pregnancy. Care about a woman during breech delivery. Care about a woman during operative delivery. Care about a woman during induced labor. Care about a woman intapartum complication. Postpartum department: Care about a woman during postpartum period. Care about a woman with bleeding in the puerperium. Care about a woman with puerperal infections.	

Care about a woman with bladder and rectal injuries and dams in puerperium.

Newborn department:

Routine daily care for healthy newborns.

Nutrition of newborn, breast-feeding.

Physical examination of the newborn. Initial care of newborn - repetition.

Primary health Care (Gynaecological clinic):

Organization of treatment - preventive care in outpatient prenatal facilities.

Equipment gynecological and prenatal clinic and work organization. Evidence of pregnant women and the role of midwife. General examination of pregnant women antenatal clinic. Special obstetric examination of pregnant women in counseling. External obstetric examination. Cardiotocography - analysis and evaluation of the record.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-1-PA-066/17	Course title: Practice in Midwifery (4)
Educational activities: Type of activities: practicals Number of hours: per week: 16 per level/semester: 224 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 6.	
Educational level: I.	
Prerequisites: JLF.ÚPAs/J-1-PA-052/16 - Practice in Midwifery (1) and JLF.ÚPAs/J-1-PA-062/16 - Practice in Midwifery (2)	
Course requirements: participation in the exercises is 100% - during the semester it is possible to justify 1 exercise with proof of the reason for absence - due to PN or due to others obstacles on the student's side (without the need to replace). In the absence of others exercises due to long-term PN or other obstacles on the part of the student it is possible to replace a maximum of 3 justified exercises in the 14th week of the semester, at the same time in case of non-participation in the exercises, the student must meet the conditions of continuous assessment (continuous evaluation of performance in practice, care plan, evaluation of theoretical knowledge). If they do not participate beyond the possible replacement of the exercises, the student will be evaluated mark Fx. - Continuous assessment of practical performance (A - Fx) - Assessment of theoretical knowledge according to specified topics (A - Fx) - Continuous daily evaluation of information about the assigned patient by the OSP method t.z. phase assessment, diagnostics, planning, implementation and evaluation (A - Fx) - Test from OST 3rd, 5th week (topics will be specified by the course leader) A: 91 - 100%, B: 81-90%, C: 73-80%, D: 66-72%, E: 60-65%, FX: 59% and less (Test will be in MOODLE environment) - Demonstrate compliance with the performance in the Record of Practical Practices and Procedures in Maternity assistance: <ul style="list-style-type: none">• Counseling for pregnant women, including performing a prenatal examination on 30 pregnant women (for at the end of the study 100 prenatal examinations in pregnant women)• Supervision and care of 10 pregnant women (at the end of the study supervision and care of at least 40 pregnant)	

- Delivery of 10 births (at the end of the study, delivery of 40 births, if this number cannot be achieved can be reduced to 30 births and 20 childbirth aids)
 - Supervision and care of 10 women during high - risk pregnancies (at the end of the Surveillance study and care for 40 women during high-risk pregnancies)
 - 20 postnatal examinations of the sixth week (100 postnatal examinations at the end of the study hexadecimal)
 - 20 examinations of physiological newborns (100 physiological examinations at the end of the study) newborns).
 - 2 realizations of episiotomy and subsequent suture
 - Assistance with 1-2 pelvic deliveries
 - Supervision and care of 5 pathological newborns
 - submission and evaluation of a midwifery care plan for a woman with pathology six-week plan, a midwifery care plan for a woman after surgery or a midwifery care plan for a woman with a pathological birth (a student selects only 1 patient and submits 1 plan. Rating (A - Fx).
- Scale of assessment (preliminary/final): 50/50

Learning outcomes:

Graduate of the subject is able to actively perform the prescribed performance in midwifery. She is able to provide individualized parental care during childbirth and offspring. Takes care for a newborn with hyperbilirubinemia. She performs a special pediatric examination of a pregnant woman in a counseling center. Provides care for a pregnant woman with a risk of pregnancy in a gynecological clinic.

Class syllabus:

Delivery room:

Admission of woman in labor at delivery room. Preparing for Vaginal delivery. Care about woman in the first stage of labor Care about woman with complication such as uterine hypotony and atony. Care about woman in the second stage of labor. Vaginal delivery - active management, assistance (repeat). Care about a woman during breech delivery.

Care about woman with episiotomy - realization, suture, check. Care about woman in the third and fourth stage of labor (repeat).

Postpartum department:

Care about a woman during postpartum period.

Exercise in the puerperium.

Care about a woman with breast disorders during puerperium.

Care about a woman after operative delivery. Care about a woman with hypertension and diabetes mellitus.

Newborn department:

Initial care of newborn. Routine daily care for healthy newborns. Physical examination of the newborn.

Care about newborn with hyperbilirubinemia. Nutrition of newborn. Newborn screening.

Primary health Care (Antenatal clinic):

Care about a pregnant women with high risk pregnancy.

Special examination of pregnant women in antenatal clinic.

Prenatal Education.
