STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-2-PA-SS3/19	Course title: Community Care for Woman and Family
Number of credits: 5	
Educational level: II.	
Learning outcomes: The graduate has the ability and skills to perform evidence-based midwifery in health and disease from the prenatal period to the period of dying and death. It is able to support and protect health, prevent diseases, educate and motivate women, families, communities and healthy quality of life in midwifery using standards in midwifery. The PA graduate is able to make independent and qualified decisions in the provision of care for pregnant women, mothers and newborns, their families as well as gynecologically ill women in primary, secondary and subsequent health care. During the decision-making process, the PA graduate actively cooperates with the doctor in the provision of care for pregnant women, mothers and newborns, their families as well as gynecologically ill women in primary, secondary and subsequent health care. The PA graduate has the theoretical and practical skills to appropriately choose the model of midwifery care and use the nursing process. Through the study of midwifery, the graduate will gain motivation for further personal and professional growth through lifelong learning. The PA graduate understands a person as a whole as a result of the interaction of biological, physical, chemical, psychological, social, spiritual and other influences of the external and internal environment on a person. The PA graduate will enter practice as a convinced supporter of the independence of their profession and modern trends in theory and practice in midwifery. The graduate is a bearer of humanistic principles, respects respect for life, human dignity and respect for the rights of man and the unborn child. It follows the principles of ethics.	
Class syllabus: ntroduction to community care for women and family, starting points, focus and goals. Specifics of community care for women, family and children. Legal regulations relating to community care in midwifery in the Slovak Republic. Documentation in community care. Community education. Community care for pregnant women - planning the first visit. Community care for pregnant women - planning and implementation of subsequent visits. Childbirth plan in community care. Psychophysical preparation for childbirth in the community. Preparing for parenthood in the community. Home birth - planning, environment preparation. Home birth - realization. Childbirth pain as a problem in the home environment. Maternity centers and houses in community care for women and families. Maternity centers and their role in community care for women and families.	

Specifics of community care in midwifery with problematic week care. The role of a community midwife in childbirth in a hospital setting. Postpartum care for six-week-olds and newborns in the home environment. Breastfeeding support and lactation counseling in the community. Specifics of community care in midwifery for pregnant women with associated illness. Specifics of community care in midwifery for the Roma community. Specifics of community care in midwifery for adolescent women. Specifics of community care in midwifery for abused women. Specifics of community care in midwifery for marginalized women (homeless women, single mothers, disabled women ...). Specifics of community care in midwifery for women with addiction (alcohol, drugs ...). Specifics of community care for senior women. Specifics of community care for gynecologically ill women.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-2-PA-011/22	Course title: Community Care for Woman and Family (2)
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: II.	
Prerequisites: JLF.ÚPAs/J-2-PA-002/22 - Community Care for Woman and Family (1)	
Course requirements: 100% attendance at lectures. At least 60% success rate of the final test. 38 h. KS - controlled preparation for teaching. Scale of assessment (preliminary/final): Ongoing 40%Final 60 %	
Learning outcomes: Characterize the specifics of home birth, prepare the environment and plan the birth itself, prepare a list of devices needed for home birth, define management of non-pharmacological effects of home birth pain, determine the role of community midwife in hospital birth, characterize birth centers and their role in community care for women and family, to support breastfeeding in the practice of midwifery, to characterize the specifics of community care for women with associated diseases and problems during pregnancy and puerperium.	
Class syllabus: Home care for a woman during childbirth - childbirth plan, childbirth preparation, childbirth aids. Birth centers and houses in community care for women and family. Management of home birth, transportation. Nursery/community centers and their role in community care for women and families. The role of community midwife in hospital delivery. Postnatal care of the newborn in the home environment, first treatment of the newborn in the home environment, subsequent care. Home care for women in puerperium, specifics of community care in midwifery assistance for women with problem puberty. Supporting breastfeeding and lactation counseling in the community. Childbirth as a problem in the home environment. Community care for specific groups of women.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-2-PA-025/22	Course title: Community Care of Newborn and Suckling
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Course requirements: CS (20 hours) study of literature and preparation for the test. Written semester work focused on selected topic. Examination – written form (test), the minimum percentage to succeed is 60 %. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 - 66%, E: 65 - 60%, FX # 60% Scale of assessment (preliminary/final): Semestral work 40%Final written exam (test) 60%	
Learning outcomes: By completing the course the student will define the specifics of the nursing process in community care for newborns and infants. Can describe the first treatment of the newborn in the natural social environment, mention the differences with the hospital environment. Can perform a physical examination of the newborn and infants, assess its bio-psycho-social needs and psychomotor development. The student can characterize the care of child in home environment, can name the vaccination of children in the first year of life. Can assess the risk of accidents in children at home, characterize the main areas of education of parents in childcare in the first year of life.	
Class syllabus: Specifics of community care of newborns and infants, specifics of the nursing process. Nursing diagnostics focusing on newborns and infants. First treatment of a newborn in a natural social environment. Assessment of the child in the first year of life. Assessment of bio-psycho-social needs, physical assessment, assessment of psychomotor development. Daily care of newborns and infants with focus on assessment and satisfaction of bio-psycho-social needs in the home environment. Disease prevention in children with a focus on child vaccination, preventive examinations in the first year of the child's life. Assessment of the home environment in terms of safety and injury prevention, ensuring the healthy development of the child. Specifics of education in child care in the first year of life

STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-2-PA-SS1/19	Course title: Defense of Diploma Thesis
Number of credits: 5	
Educational level: II.	
Learning outcomes: he graduate masters the basics of scientific work in the field of nursing and methods of obtaining scientific and professional information. Can develop midwifery practices, think critically and use research results. The graduate masters the basics of working in a multimedia environment and masters the basics of one world language. The graduate will enter the practice as a convinced supporter of the independence of their profession and modern trends in nursing theory and practice. It follows the principles of ethics in midwifery, which it bears.	
Class syllabus: Scientific methods and their classification. Ethical aspects of midwifery research. Work with professional literature and other documents. Search for literary sources, their use and processing. Processing and storage of professional information. Citation in the text and List of bibliographic references. Research project and its phases. Characteristics and significance of individual phases of the research process. Formulation of research problems, questions and hypotheses. Possibilities of determining research problems in nursing, proposal of their solution, possibilities of verification, choice of method. Research instrument selection criteria. Preparation and processing of obtained empirical data. Descriptive statistics and its use in data processing. Qualitative methods. Qualitative data analysis. Case study - case study. Preparation and use. Interpretation of obtained data, discussion, conclusions. Formal and content requirements of the diploma thesis. Methodology of processing verbal answers. Presentation of results - verbal, written. Language and scientific style of work. Preparation of the presentation preparation for the defense.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-2-PA-043/22	Course title: Practice in Midwifery (3)
Educational activities: Type of activities: practicals Number of hours: per week: 16 per level/semester: 224 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Course requirements: checked individual study 50 hours individual study of literature 100% participation in practice - Confirmation of 224 internships in the relevant semester of the academic year - List of practical performances - practical performances according to the prepared schedule (part of the Practice Recorder). Scale of assessment (preliminary/final): 50/50	
Learning outcomes: The course synthesizes knowledge from midwifery, management of prenatal care, psychology of women in the conditions of clinical practice. In providing care to women / mothers, newborns and infants, the student works by the method of the nursing process. After completing the course, the student should be able to provide individualized care in midwifery to women / mothers and their families in health and disease in primary, secondary and follow-up health care as well as in community care.	
Class syllabus: The student performs the prescribed performances according to the practice recorder and improves in their performance. He records the realized performances in the practice recorder. · The student is involved in the work schedule of the department. · The student works by the method of the nursing process · The student provides individualized nursing care to pregnant women / mothers / six-week-olds / newborns in the relevant department. · The student provides individualized care to women in outpatient care and the community. · The student keeps the nursing documentation used at the workplace. · The student carries out the education of pregnant women, mothers, six weeks. · The student in patient care applies the knowledge gained in individual subjects during the study.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-2-PA-040/22	Course title: Psychology of a Woman II.
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 2 / 1 per level/semester: 28 / 14 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Student assessment takes the form of a written test and oral examination, minimum limit for success: 60%. Rating: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 66–72 %, E: 60–65 %, FX: 59 % or less Scale of assessment (preliminary/final): 50/50	
Learning outcomes: After completing the course, student will be able to apply theoretical knowledge in clinical practice, and will gain an overview of the common mental health disorders with emphasis on psychology of women. Student will be able to highlight the socio-cultural factors influencing the motherhood and psychological experiences of the mother. The aim of the subject is to explain prenatal development with an emphasis on the development of brain functions, the importance of psychosocial factors in prenatal development and childbirth, the psychological experiences of women during pregnancy and childbirth, and the importance of the attachment to the development of the child.	
Class syllabus: Psychopathology: a brief overview of the psychological disorders with special emphasis toward specifics of female psychological disorders. Psychology of women and motherhood. Image of motherhood; Experiences. Cultural and sub-cultural values connected to motherhood. Pregnancy in adolescence – risk, preparation for childbirth and childcare. Psychosocial adaptation before and after childbirth. Infertility – experiencing of women, men, families. Prenatal development, importance of prenatal development factors in the etiopathogenesis of later psychiatric illnesses, possibilities of mother- fetus communication in the prenatal period. Psychosocial factors affecting prenatal development: stress, emotional state of the mother. Psychosocial maturity for pregnancy. Perinatal loss: Impact on mother, father, role of medical staff, coping and defensive mechanisms. The process of childbirth in terms of mother's psychological experience, communication between midwife and woman during childbirth. Attachment - relationship between mother and child: Definition of meaning, influence on the child's further cognitive, emotional and social development. Possibilities to support the optimal development of attachment in the early post-natal period from the point of view of the midwife.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚPAs/J-2-PA-003/22	Course title: Research in Midwifery II.-1
Educational activities: Type of activities: practicals / lecture Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Student assessment takes the form of a written test, minimum limit for success: 65%. Rating: A: 93–100 %, B: 86–92 %, C: 79–85 %, D: 72–78 %, E: 65–71 %, FX: 64 % or less Scale of assessment (preliminary/final): 0/100	
Learning outcomes: Aim of the course is to provide students with a theoretical background in the most commonly used methods in scientific research, and basic knowledge of the methodological terminology. Another aim of the course is to provide a general overview of an empirical methods of gathering the scientific data and methods of analysis and interpretation, and planning a research project. Successful passing of the subject creates the prerequisites for acquiring the principles of the data collection process in the context of midwifery research. The subject also informs students of the most frequently used data collection instruments - questionnaires, interviews, assessment scales and psychometric properties of the data collection instrument.	
Class syllabus: Methods and goals of scientific research: description, prediction, explanation, hypothesis, types of variables. Types of research design: experiment, ex-post facto research, correlation studies, surveys, clinical studies, „double- blind“ studies. Research sampling, matching, randomization, matched studies. Time factor in a research studies: cross-sectional vs. longitudinal research, prospective and cohort studies. Qualitative methods of research. Ethical aspects of studies. Specifics of research in midwifery. Scientific project of the bachelor thesis. Operationalization of concepts in research, scientific hypothesis, principles of formulation and hypothesis verification. Data collection methods - questionnaire, standardized vs. non-standardized questionnaire, process of the validation. Psychometric properties of the instrument, validity, reliability, cut-of score. Observation in research, assessment scales, interview, analysis of interviews.
