

## Course descriptions

### TABLE OF CONTENTS

|                   |   |     |
|-------------------|---|-----|
| 1. B-VUZde027/22  | Abuse prevention.....   | 4   |
| 2. B-VUZde027/22  | Abuse prevention.....   | 7   |
| 3. B-ANGde015/22  | An Overview of the Development of the English Language.....         | 10  |
| 4. B-ANGde034/22  | Analysis and Development of Teaching Materials.....                 | 13  |
| 5. B-ANGde022/22  | Anglo-American Short Story.....                                     | 17  |
| 6. B-ANGde036/22  | Anglophone Countries in Historical Contexts.....                    | 21  |
| 7. B-PEDde011/22  | Application of digital technologies in the subject of pedagogy..... | 24  |
| 8. B-VUZde008/22  | Bachelor thesis seminar.....  | 28  |
| 9. B-VUZde008/22  | Bachelor thesis seminar.....  | 30  |
| 10. B-VUZšt011/15 | Bachelor's thesis defence ( <b>state exam</b> ).....                | 32  |
| 11. B-VUZde029/22 | Basics of the first aid.....  | 35  |
| 12. B-VUZde029/22 | Basics of the first aid.....  | 38  |
| 13. B-ANGde032/22 | Chapters from British and American Literature.....                  | 41  |
| 14. B-PEDde027/22 | Child and adolescents in life crisis situations.....                | 45  |
| 15. B-PEDde027/22 | Child and adolescents in life crisis situations.....                | 48  |
| 16. B-VUZde031/22 | Child biological development and school hygiene.....                | 51  |
| 17. B-VUZde031/22 | Child biological development and school hygiene.....                | 55  |
| 18. B-PEDde031/22 | Colloquium on selected issues of upbringing and education.....      | 59  |
| 19. B-VUZde005/22 | Communication in education.....                                     | 62  |
| 20. B-VUZde005/22 | Communication in education.....                                     | 65  |
| 21. B-VUZde025/15 | Constructivism in education.....                                    | 68  |
| 22. B-VUZde025/15 | Constructivism in education.....                                    | 69  |
| 23. B-PEDde024/22 | Contemporary alternative models of education.....                   | 70  |
| 24. B-PEDde024/22 | Contemporary alternative models of education.....                   | 74  |
| 25. B-VUZde039/22 | Creative class.....   | 78  |
| 26. B-VUZde039/22 | Creative class.....   | 79  |
| 27. B-ANGde037/22 | Developing English Vocabulary.....                                  | 80  |
| 28. B-ANGde031/22 | Developing Phonetic and Phonological Skills.....                    | 83  |
| 29. B-VUZde035/22 | Developing critical thinking.....                                   | 86  |
| 30. B-VUZde035/22 | Developing critical thinking.....                                   | 88  |
| 31. B-PEDde033/22 | Development of creativity.....                                      | 90  |
| 32. B-PEDde033/22 | Development of creativity.....                                      | 93  |
| 33. B-VUZde002/22 | Digital technologies 1.....   | 96  |
| 34. B-VUZde002/22 | Digital technologies 1.....   | 105 |
| 35. B-VUZde012/22 | Digital technologies 2.....   | 114 |
| 36. B-VUZde012/22 | Digital technologies 2.....   | 122 |
| 37. B-VUZde013/22 | Digital technologies 3.....   | 130 |
| 38. B-VUZde013/22 | Digital technologies 3.....   | 131 |
| 39. B-ANGde017/22 | Discourse Analysis.....   | 132 |
| 40. B-PEDde022/22 | Education towards tolerance.....                                    | 136 |
| 41. B-PEDde022/22 | Education towards tolerance.....                                    | 140 |
| 42. B-PEDde018/22 | Educational counselling.....  | 144 |
| 43. B-PEDde018/22 | Educational counselling.....  | 147 |
| 44. B-ANGde052/22 | Efficiency Strategies of University Studies.....                    | 150 |
| 45. B-ANGde051/22 | English Grammar Practice.....                                       | 151 |
| 46. B-ANGde054/22 | English Language Competitions in the form of Games.....             | 152 |
| 47. B-ANGde004/22 | English Morphology I.....   | 153 |

|                   |   |     |
|-------------------|---|-----|
| 48. B-ANGde007/22 | English Morphology II.....                                      | 157 |
| 49. B-ANGde016/22 | English Phraseology.....  | 162 |
| 50. B-ANGde008/22 | English Syntax.....   | 165 |
| 51. B-ANGde011/22 | English Word-formation.....                                     | 170 |
| 52. B-VUZde030/22 | Environmental education.....                                    | 174 |
| 53. B-VUZde030/22 | Environmental education.....                                    | 177 |
| 54. B-VUZde016/22 | Ethics and professional ethics.....                             | 180 |
| 55. B-VUZde016/22 | Ethics and professional ethics.....                             | 183 |
| 56. B-VUZde024/22 | Family education.....   | 186 |
| 57. B-VUZde024/22 | Family education.....   | 189 |
| 58. B-PEDde032/22 | Family education and cooperation between school and family..... | 192 |
| 59. B-PEDde032/22 | Family education and cooperation between school and family..... | 195 |
| 60. B-VUZde018/22 | Gender aspects of education.....                                | 198 |
| 61. B-VUZde018/22 | Gender aspects of education.....                                | 201 |
| 62. B-PEDde001/22 | General educational theory.....                                 | 204 |
| 63. B-PEDde007/22 | General theory of instruction.....                              | 208 |
| 64. B-ANGde018/22 | Grammatical Analysis of the Text.....                           | 212 |
| 65. B-PEDde009/22 | Guidelines for writing professional texts in education.....     | 215 |
| 66. B-PEDde009/22 | Guidelines for writing professional texts in education.....     | 218 |
| 67. B-VUZde022/22 | History of education.....                                       | 221 |
| 68. B-VUZde022/22 | History of education.....                                       | 223 |
| 69. B-VUZde014/22 | History of philosophy 1.....                                    | 225 |
| 70. B-VUZde014/22 | History of philosophy 1.....                                    | 228 |
| 71. B-VUZde015/15 | History of philosophy 2.....                                    | 231 |
| 72. B-VUZde015/15 | History of philosophy 2.....                                    | 232 |
| 73. B-PEDde003/22 | History of schooling and education.....                         | 233 |
| 74. B-ANGde003/22 | History, Life and Culture of Great Britain and the USA.....     | 236 |
| 75. B-ANGde024/22 | ICT in Language Education.....                                  | 240 |
| 76. B-ANGde027/22 | Intercultural Communication.....                                | 244 |
| 77. B-PEDde028/20 | Internship A.....   | 247 |
| 78. B-PEDde028/20 | Internship A.....   | 248 |
| 79. B-PEDde029/20 | Internship B.....   | 249 |
| 80. B-PEDde029/20 | Internship B.....   | 250 |
| 81. B-VUZde017/15 | Introduction to gender studies.....                             | 251 |
| 82. B-VUZde017/15 | Introduction to gender studies.....                             | 252 |
| 83. B-ANGde002/22 | Introduction to the Study of Anglophone Literature.....         | 253 |
| 84. B-ANGde001/22 | Introduction to the Study of the English Language.....          | 257 |
| 85. B-ANGde053/22 | Language in Use - Conversation B2-C1.....                       | 261 |
| 86. B-ANGde013/22 | Language in Use – B2-C1.....                                    | 262 |
| 87. B-ANGde028/22 | Language in Use – Reading Comprehension.....                    | 266 |
| 88. B-ANGde030/22 | Language in Use – Speaking.....                                 | 270 |
| 89. B-ANGde029/22 | Language in Use – Writing.....                                  | 274 |
| 90. B-ANGde014/22 | Learner-centred Approach to English Language Teaching.....      | 278 |
| 91. B-VUZde023/22 | Leisure time education.....                                     | 281 |
| 92. B-VUZde023/22 | Leisure time education.....                                     | 284 |
| 93. B-ANGde033/22 | Literature and Popular Culture.....                             | 287 |
| 94. B-VUZde032/22 | Medial education.....   | 291 |
| 95. B-VUZde032/22 | Medial education.....   | 294 |
| 96. B-ANGde010/22 | Methodology of Writing Professional Texts in English.....       | 297 |

|                    |  |     |
|--------------------|--|-----|
| 97. B-PEDde008/22  | Methodology of research in educational science.....                      | 301 |
| 98. B-VUZde033/22  | Multicultural education.....   | 304 |
| 99. B-VUZde033/22  | Multicultural education.....   | 307 |
| 100. B-VUZde020/22 | Pathopsychology for teachers.....  | 310 |
| 101. B-VUZde020/22 | Pathopsychology for teachers.....  | 311 |
| 102. B-PEDde017/22 | Pedagogy of children and adolescents with learning disabilities.....     | 312 |
| 103. B-PEDde017/22 | Pedagogy of children and adolescents with learning disabilities.....     | 315 |
| 104. B-VUZde028/22 | Pedagogy of individuals with special educational needs.....              | 318 |
| 105. B-VUZde028/22 | Pedagogy of individuals with special educational needs.....              | 322 |
| 106. B-ANGde006/22 | Phonetics and Phonology of English Language.....                         | 326 |

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde027/22  | <b>Course title:</b><br>Abuse prevention |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 1., 3., 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course: The course is completed with an assessment, the ratio of the midterm and final assessment is 100/0. The task of the students is to prepare a midterm paper for 40 points and to pass a midterm test for 60 points, a total of 100 points. A minimum of 60% of the maximum possible course grade is required for successful completion of the course.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |  |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes and transferable competences:

The aim of the course is to provide basic knowledge about the problems of drug consumption, their effects, the etiology of drug addiction. The course pays special attention to the issues of the drug scene, drug policy development and criminal sanctions, or drug crime. Students will be able to identify the internal and external causes of addiction, summarize the manifestations of different types of addiction, indicate and propose specific forms of addiction prevention. They will deepen their knowledge and competences in working with people with addiction, they will learn to apply preventive practices through examples and concrete activities in school practice.

Students and learners will develop communication skills using professional terminology in the field of substance and non-substance addictions. They will improve their skills in working with professional literature and producing professional texts. Students will be able to apply knowledge creatively to problem-based assignments.

### **Class syllabus:**

Brief outline of the course:

1. Basic terminology (social pathology, drug, addiction, abstinence, codependence, prevention, etc.).
2. Classification and characteristics of selected groups of psychotropic substances.
3. Specifics and classification of substance addictions.
4. Causes and factors of drug use.
5. The emergence of addiction and its symptoms.
6. Non-substance addictions (classification, characteristics).
7. Prevention of addiction and its forms.
8. Options for help in the field of addiction (basic psychotherapeutic approaches in addiction treatment, pharmacotherapeutic help, family accompaniment).
9. National Drug Control Programme. The roles of the Departments of Education, Culture, Health, Justice, Home Affairs and Labour, Social Affairs and Family.

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde027/22  | <b>Course title:</b><br>Abuse prevention |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 2., 4., 6.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course: The course is completed with an assessment, the ratio of the midterm and final assessment is 100/0. The task of the students is to prepare a midterm paper for 40 points and to pass a midterm test for 60 points, a total of 100 points. A minimum of 60% of the maximum possible course grade is required for successful completion of the course.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |  |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes and transferable competences:

The aim of the course is to provide basic knowledge about the problems of drug consumption, their effects, the etiology of drug addiction. The course pays special attention to the issues of the drug scene, drug policy development and criminal sanctions, or drug crime. Students will be able to identify the internal and external causes of addiction, summarize the manifestations of different types of addiction, indicate and propose specific forms of addiction prevention. They will deepen their knowledge and competences in working with people with addiction, they will learn to apply preventive practices through examples and concrete activities in school practice.

Students and learners will develop communication skills using professional terminology in the field of substance and non-substance addictions. They will improve their skills in working with professional literature and producing professional texts. Students will be able to apply knowledge creatively to problem-based assignments.

### **Class syllabus:**

Brief outline of the course:

1. Basic terminology (social pathology, drug, addiction, abstinence, codependence, prevention, etc.).
2. Classification and characteristics of selected groups of psychotropic substances.
3. Specifics and classification of substance addictions.
4. Causes and factors of drug use.
5. The emergence of addiction and its symptoms.
6. Non-substance addictions (classification, characteristics).
7. Prevention of addiction and its forms.
8. Options for help in the field of addiction (basic psychotherapeutic approaches in addiction treatment, pharmacotherapeutic help, family accompaniment).
9. National Drug Control Programme. The roles of the Departments of Education, Culture, Health, Justice, Home Affairs and Labour, Social Affairs and Family.

knowledge and can present it in his/her own presentation without the teacher's assistance, can logically and systematically lead a discussion with colleagues, demonstrates excellent presentation skills, logically and constructively summarizes the facts and contexts in his/her final paper.

B (very good performance): The student has an excellent overview of the development of the English language, understands and independently correlates the changes in the individual periods, has thorough knowledge, can present the knowledge in his/her own presentation without the teacher's assistance with only a minimum of errors (linguistic expressions, presentation skills), The student can logically and systematically lead a discussion with his/her colleagues with a minimum of the teacher's assistance, demonstrates excellent presentation skills, logically summarises facts and contexts in the final paper.

C (good performance): The student has an overview of the development of the English language, understands and, with help, correlates the changes and their consequences in the different periods, with the help of the teacher, with minor errors in speech, can present his/her knowledge in a presentation, with the teacher's assistance logically and systematically leads the discussion with colleagues, demonstrates good presentation skills, logically and summarizes the facts and contexts in his/her final paper.

D (satisfactory performance): The student has an overview of the development of the English language, understands the changes and their consequences in the different periods, has clear knowledge, makes mistakes (language, presentation skills) in the presentation (also in writing), with teacher's assistance, the student leads the discussion with colleagues, satisfactorily manages to summarize the facts and contexts in his/her final paper.

E (sufficient performance): The student has a basic overview of the development of the English language, knows the changes and their consequences in the different periods, demonstrates sufficient knowledge, makes language and presentation skills mistakes in the presentation (also in the written assignments), with the teacher's assistance the student leads a discussion with colleagues, is able to summarize the studied facts in his/her final paper.

Scale of assessment (preliminary/final): Continuous assignment (100 percent): Elaboration and presentation of a topic of the student's choice: 30% Leading a discussion by the student on the topic of his presentation: 10% Final seminar paper: 20% Final test: 40%

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate's profile, this course focuses on the acquisition of the following knowledge, skills, and competences:

Knowledge:

The student will gain an overview of the development of the English language and will acquire historical context. The student will gain an overview of the different periods and influences on the development of the language and is familiar with cross-cultural contexts. The student understands the impact of historical events on the development of the English language and is able to relate relevant information learned in previous courses.

Skills:

The student is able to use relevant materials, select information, demonstrate digital skills in creating and presenting his/her work. He/she demonstrates presentation and communication skills in front of an audience, using their own creativity and critical thinking skills. The student develops the skills to communicate fluently at the required B2 – C1 CEFR level and to convey relevant information to the audience.

Competences:

The student can use self-study strategies effectively, he/she develops metacognitive awareness and autonomy. The student actively works with a variety of resources, demonstrates presentation skills in English at the required B2 – C1 CEFR level. He/she can lead a discussion effectively, actively

participates in the discussion at the required linguistic level, demonstrates his/her argumentative skills and has personal and affective prerequisites for a humanistic and intercultural approach to the teaching process.

**Class syllabus:**

Course contents:

Main themes of the course: The place of English among other languages in the world; Indo-European languages; Scandinavian influence on the development of English; Middle English: Norman and French influence on the development of English; The influence of Greek and Latin on the development of English; The emergence of American English; English as a world language

Through the above content, the student will acquire theoretical knowledge about the development of the English language, he/she will perceive English in the context of other world languages and understand intercultural contexts. Through self-presentation, the student will develop his/her presentation skills, systematic and analytical abilities, and will use knowledge and skills acquired in other courses to discuss issues independently.

The student deepens his/her skills in working with professional texts, selecting relevant information, communicating the information to other students and then processing and critically analysing the information. The student is able to use digital technologies and is familiar with other sub-disciplines of linguistics.

**Recommended literature:**

Compulsory readings:

| <b>Recommended prerequisites:</b><br>none   |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (100 points):<br>Analysis of a selected textbook (25 points)<br>Creation of a set of modified activities for dyslexic learners (25 points)<br>Creation of a set of activities for a selected authentic text for learners in the lower secondary education (25 points)<br>Creation of a set of activities for a certain part of a selected film for learners in the upper secondary education (25 points)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX<br>A (excellent performance): The student can independently analyse the selected textbook, can independently create a set of modified activities for learners with dyslexia, can independently select   |  |

an appropriate authentic text and film for the target age group and proficiency level, and prepare activities.

B (very good performance): The student can analyse a selected textbook with minimal assistance, can create a set of modified activities for learners with dyslexia with minimal assistance from the teacher, can select an appropriate authentic text and film for the target age group and proficiency level with minimal assistance from the teacher, and can prepare activities.

C (good performance): The student, with the teacher's help, is able to analyse the selected textbook, is able, with the teacher's help, to create a set of modified activities for learners with dyslexia, is able, with the teacher's help, to select an appropriate authentic text and film for the target age group and proficiency level, and is able to prepare activities but with minor faults.

D (satisfactory performance): The student, with intensive teacher's assistance, can analyse a selected textbook, create a set of modified activities for learners with dyslexia, select an appropriate authentic text and film for the target age group and appropriate proficiency level and with intensive teacher's assistance, the student can prepare activities but with multiple faults.

E (sufficient performance): The student, with support and intensive help from the teacher, can analyse the selected textbook, can create a set of modified activities for dyslexic learners but with multiple faults, the student can select an appropriate authentic text and film for the target age group and proficiency level but with support and intensive help from the teacher, and the student can prepare activities but with multiple faults.

FX (insufficient performance): The student fails to analyse the selected textbook, fails to create a set of modified activities for learners with dyslexia, fails to select an appropriate authentic text and film for the target age group and proficiency level, and fails to prepare activities.

Scale of assessment (preliminary/final): Continuous assessment (100 points): Analysis of a selected textbook (25 points) Creation of a set of modified activities for dyslexic learners (25 points) Creation of a set of activities for a selected authentic text for learners in the lower secondary education (25 points) Creation of a set of activities for a certain part of a selected film for learners in the upper secondary education (25 points)

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

- The student knows the legislation applied regarding the use of English language textbooks in Slovak state primary and secondary schools.
- The student knows the theoretical principles of creating teaching materials based on the knowledge of the theoretical principles of creating and planning the educational process.

Skills:

- The student is familiar with relevant didactic materials, can analyse, select and create various teaching materials in relation to the teaching objectives, based on the knowledge acquired in the profile courses "Fundamentals of English language didactics" and "Learner-centred approach in English language teaching".
- The student is able to use digital technologies when creating teaching materials and is able to apply basic pedagogical-psychological theoretical concepts into the teaching practice

Competences:

- The student is able to acquire, through self-learning, the knowledge necessary for the analysis of textbooks and the creation of teaching materials and is able to justify his/her methodological procedures.
- The student is able to create and implement teaching materials based on a student-centred approach into the teaching process.

**Class syllabus:**

Course contents:

Didactic materials (basic terminology, classifications), their functions and implementation in the teaching process - through brainstorming, students present their knowledge and opinions about the didactic materials used in English lessons. Through a brief explanation of the subject matter, they will expand their knowledge, which will be later implemented in their works.

Textbook, its meaning, evaluation of textbooks, legislation related to the purchase and distribution of approved textbooks, textbooks and workbooks, editorial portal, digitalization of textbooks, eAktovka - they will present their ideas about the function of the textbook, as well as the process of approving textbooks by the Ministry of Education, Science, Research and Sport and will demonstrate their ideas about this process by creating a mind map. They will become familiar with the legislation and then they will discuss to what extent their ideas about the legislation process were the same. They will analyse a selected English textbook based on the criteria of the Ministry of Education, Science, Research and Sport.

Teaching materials for learners with SEN - through a brief explanation of the subject matter, students are introduced to the multisensory approach and examples of activities and strategies used in teaching learners with SEN and then they create activities themselves.

Authentic materials in teaching English, reading comprehension, listening comprehension - in the discussion, they will present their experience with the use of authentic materials in learning English with a focus on developing reading and listening comprehension, through a brief explanation of the subject matter, they will become familiar with the necessary terminology and methodological procedure for incorporating authentic materials into the curriculum and with the principles applied in teaching reading and listening comprehension. They will select an appropriate authentic text and film for a selected group of learners and create activities.

| <b>Course requirements:</b><br>Course requirements:<br>Continuous assessment (100 points/percent):<br>Presentation of a selected short story (30 points/percent)<br>Active participation in the analysis of the works during class (10 points/percent)<br>Written literary analysis based on the chosen topic (60 points/percent)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX<br>A (excellent performance): The student knows the basic development of the short story and its specifics in different historical periods, can independently analyse a short literary work against the background of the narratological principle and the read theme, is able to find elements in the work related to a particular literary method, can apply his/her analysis to a pedagogical level and present  |  |

it in front of the class, can interpret the work in writing, and has the knowledge to use the literary text in English language teaching by using the appropriate methods.

B (very good performance): The student knows the main features of the development of the short story and its specifics in the different historical periods, can analyse a short literary work with minimal help against the background of the narratological principle and the theme of the reading, is mostly able to find elements in the work related to a particular literary method, is largely able to apply his/her analysis to a pedagogical level and present it to the class, is able to interpret the work in writing with minimal help, has sufficient knowledge to use the literary text in English language teaching using appropriate methods with little guidance.

C (good performance): The student knows the basic features of the development of the short story and its specifics in individual historical periods, can analyse a short literary work with greater help against the background of the narratological principle and the read theme, is largely able to find in the work elements related to a particular literary method, with some help, can apply his/her analysis to a pedagogical level and present it to the class, can interpret the work in writing with the teacher's help, has the basic knowledge to use the literary text in English language teaching by using appropriate methods with little guidance.

D (satisfactory performance): The student knows some features of the development of the short story and its specifics in the different historical periods, can analyse a short literary work with great help against the background of the narratological principle and the read theme, is able to find elements in the work related to a particular literary method to a small extent, with more help, can apply his/her analysis to a pedagogical level and present it in front of the class; with considerable help from the teacher, can interpret the work in writing; has a certain amount of knowledge in order to use the literary text for English language teaching by using appropriate methods with more advice.

E (sufficient performance): The student knows only partial features of the development of the short story and its specifics in the individual historical periods, can only with the support of the teacher analyse a short literary work against the background of the narratological principle and the read theme, is narrowly able to find in the work the elements related to a particular literary method, can apply his/her analysis to a pedagogical level and present them to the class with a great deal of help from the teacher, can interpret the work in writing with substantial support from the teacher, can use his/her knowledge to apply the literary text to the teaching of the English language by using appropriate methods with intensive help from the teacher.

Scale of assessment (preliminary/final): Continuous assessment (100 points/percent): Presentation of a selected short story (30 points/percent) Active participation in the analysis of the works during class (10 points/percent) Written literary analysis based on the chosen topic (60 points/percent)

### **Learning outcomes:**

Objectives and learning outcomes

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

The student(s) know one of the basic literary genres and understand its specificities and development, since the short story is also an essential genre in the education of pupils in primary and secondary education; they have knowledge of the possibilities of discussing a literary text in the classroom and how to use it in discussions based on life themes and for the benefit of individual self-reflection; they know the basic methodology for the use of a literary text in the pedagogical process.

Skills:

Students are familiar with relevant works, their media presentations and materials, and are able to analyse and select them in relation to teaching objectives, Students are able to appropriately

apply different media representations of literary works as an innovative method of learner-centred teaching in an English lesson plan for any selected ISCED and relevant language level according to the CEFR, using a variety of appropriate learning tasks and organisational forms of teaching, students have developed analytical skills, are able to discuss independently, in pairs and in groups.

Competences:

Students are able to argue, present and defend their views and opinions, are able to critically approach a written text and think critically about basic psychological, social and cultural issues that translate not only into their own experience, but also into their position as a competent and understanding teacher for primary and secondary education in the country.

### **Class syllabus:**

Course contents:

Main themes of the course: An introduction to the theory of the short story genre, the psychological short story (Edgar Allan Poe, "The Tell-Tale Heart"), women's writing between realism and modernism (Katherine Mansfield, "Bliss"), the modernist feminist short story (Virginia Woolf, "The Mark on the Wall"), the postmodern existentialist short story (John Barth, "Night-Sea Journey"), political short story (Donald Barthelme, "Game"), postmodern reproductive rights short story (Kurt Vonnegut, "Welcome to the Monkey House"), feminist remix short story (Angela Carter, "The Company of Wolves"), postmodern science fiction short story (Isaac Asimov, "What if"), hypertext short story (Judy Malloy, "Uncle Roger").

Through the above mentioned course content and using the mentioned methods of education, the student acquires knowledge, develops his/her didactic skills and competences corresponding to the profile of a graduate of the Bachelor's degree in the study programme of Teaching English Language and Literature in Combination.

| <b>Recommended semester:</b> 3.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Recommended prerequisites:</b><br>none  |   |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (100 points/percent):<br>Online quizzes – ungraded (A minimum score of 70% on the quizzes is required to complete the course. Students have an unlimited number of attempts before the actual class.)<br>Summaries of readings and class discussions (10 points/percent)<br>Presentations (30 points/percent)<br>End-of-term test focusing on the critical analysis of assigned texts and questions related to presentations (60 points/percent)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX  |   |

A (excellent performance): The student is knowledgeable in the history and contemporary social issues of Anglophone societies; critically engages with texts; carefully plans research; presents a clear, informative, and well-structured project.

B (very good performance): The student is knowledgeable in the history and contemporary social issues of Anglophone societies; has minor errors in reconstructing arguments; has a good research project, but presentation is not entirely clear.

C (good performance): The student has a general but slightly superficial knowledge of Anglophone history and societies; understands the texts correctly but does not always see the argumentative structure; research project is correct but not informative

D (satisfactory performance): The student has a satisfactory grasp of the history and contemporary social issues of Anglophone societies; understands the text adequately but cannot relate it to contemporary issues; two of the four major aspects of the research project and its presentation (methods, academic content, structure, and execution) are acceptable

E (sufficient performance): The student has minimal knowledge of the history and contemporary social issues of Anglophone societies; understands the texts literally but fails to see the substance of the argument; only one of the four major aspects of the research project and its presentation (methods, academic content, structure, and execution) is acceptable.

FX (insufficient performance): The student lacks minimal knowledge of the history and contemporary social issues of Anglophone societies; fails to understand the texts; none of the four major aspects of the research projects (methods, contents, structure, and execution) meets the criteria of acceptance.

Scale of assessment (preliminary/final): Continuous assessment (100 points/percent): Online quizzes – ungraded (A minimum score of 70% on the quizzes is required to complete the course. Students have an unlimited number of attempts before the actual class.) Summaries of readings and class discussions (10 points/percent) Presentations (30 points/percent) End-of-term test focusing on the critical analysis of assigned texts and questions related to presentations (60 points/percent)

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

Students gain knowledge of the historical development of Anglophone societies (UK, USA, Canada, Australia) and know about their application potential in developing intercultural literacy. Students understand the cultural differences between Anglophone societies. They are familiar with the methodology of landscape research with broader social, cultural, and intercultural contexts. They have clear ideas about the potentials of applying literary texts in teaching.

Skills:

Students are able to work with scholarly texts, critically analyse texts, and reassess the relevance of historical knowledge to the analysis of social debates. They develop analytical and argumentative skills for the discussion of social conflicts. They become aware of the general themes of contemporary Anglophone societies. They develop presentation and argumentation skills. They become aware of the possibilities of working with literary text in English language teaching.

Competences:

Students can identify the various positions in debates and can take a position. They are able to cope with professional texts, they are able to independently acquire and apply knowledge. They are able to present and defend the results of their research project. They are able to communicate effectively, collaborate and solve professional problems as a team.

**Class syllabus:**

Course contents:

General awareness of the history of Anglophone societies: the main periods of British and American history, the main steps in the constitutional development of the UK and the USA, the British Empire, the colonial and post-colonial development of Canada and Australia, other English-speaking societies in the world

General themes in the development of Anglophone societies: migration, democracy and civil rights, diversity

Contemporary social issues and debates in historical perspectives: immigration, racism, multiculturalism, Brexit, global responsibility, challenges to democracy, postcolonial tensions

Projects related to specific social issues and their historical roots

Through the above course content and methods of education, students will acquire knowledge, develop their pedagogical skills and competences corresponding to the profile of a graduate of the bachelor's degree in the study programme Teaching of English Language and Literature in Combination.

| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde011/22  | <b>Course title:</b><br>Application of digital technologies in the subject of pedagogy |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 4   |  |
| <b>Recommended semester:</b> 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b> PdF.KPg/B-VUZde002/22 - Digital technologies 1  |  |
| <b>Course requirements:</b><br>Prerequisites for passing the course: 100% pass mark.<br>Assessment: consists of an interim and a final assessment (50+50 points).<br>The interim evaluation consists of:<br>- from a critical analysis of foreign and domestic literary sources, which will be used to select specific DT and software applications and to select the possibilities of their application in the teaching of pedagogy (20 points),<br>- the creation of a concept/formulation of partial components of a semester project using selected DT and software applications in teaching pedagogy (30 points).<br>The final assessment consists of: completion of a proposal of a semester project concept using the selected DT and software applications in teaching pedagogy and preparation for the presentation - 50 points.<br>The semester project consists of: the creation of a project according to a set structure for 80b. It includes the creation of an idea/problem, project planning, project implementation, evaluation and self-reflection of the project using the selected DT(s) and software applications in teaching pedagogy = its oral presentation by students (micro-output) in the 11th week of continuous teaching.<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester. |  |

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Learning objectives and outcomes:

By completing the course Online Teaching Tools and Fundamentals of E-Learning, the student should:

- to get an overview of the available DT and software applications in the focus on teaching pedagogy,
- Gain knowledge of both the effective use of DT and software applications and the techniques and methodologies for their successful integration in a pedagogy teaching focus,
- to acquire basic competences in the creation of electronic teaching materials and interactive presentations for selected parts of the curricula of general education subjects at the secondary level of education with the use of supporting software applications,
- to acquire basic competences with design, creation of new interactive forms of teaching materials through selected DT and software applications in teaching pedagogy.

Transferable competences: students apply the acquired knowledge and competences in the use of modern DT and software applications for electronic support of teaching pedagogy primarily through their own creative activity and in their future school practice.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the course Online Teaching Tools and Fundamentals of E-Learning, the student should:

- to get an overview of the available DT and software applications in the focus on teaching pedagogy,
- Gain knowledge of both the effective use of DT and software applications and the techniques and methodologies for their successful integration in a pedagogy teaching focus,
- to acquire basic competences in the creation of electronic teaching materials and interactive presentations for selected parts of the curricula of general education subjects at the secondary level of education with the use of supporting software applications,
- to acquire basic competences with design, creation of new interactive forms of teaching materials through selected DT and software applications in teaching pedagogy.

Transferable competences: students apply the acquired knowledge and competences in the use of modern DT and software applications for electronic support of teaching pedagogy primarily through their own creative activity and in their future school practice.

### **Class syllabus:**

Brief outline of the course:

Brief introduction to the development, current situation and estimation of future trends in the field of DT and software applications at the relevant educational levels. Programs and tools for creating teaching materials for teaching pedagogy. Possibilities and methodology of creating educational materials through selected DT and software applications in teaching pedagogy. Design, creation and evaluation, self-reflection of the created semester project in the focus on teaching pedagogy. Methodology of presenting (teaching) in the online environment. Oral presentation by students (micro-presentation).

Due to the rapid production of new software usable in the pedagogical process, the specific content structure of the course will be adapted to the current requirements of practice and students.

| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 2   |   |
| <b>Recommended semester:</b> 6.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment (100% of the interim assessment).<br>The student's task is to solve the assignments given continuously during the semester and to hand in the final thesis project at the end of the midterm evaluation. The student actively participates in presenting and discussing solutions to the interim assignments in seminars, for which he/she receives points (20%). The solution of each interim assignment that is handed in on the due date is evaluated with points (40%). The student receives points (40%) for the final thesis project at the end of the interim assessment. All points will be added together at the end of the interim assessment. For successful completion of the course it is necessary to obtain at least 60% of the points.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results), the student actively works on continuous assignments, participates in the presentation and discussion of the assignments in seminars. Reflects both critically and creatively on interim assignments. He/she is able to produce a final thesis project at an excellent level.<br>B (90-81%, very good - above average standard), the student actively works adequately on the continuous assignments, participates in the presentation and discussion of the given assignments in seminars. He/she reflects adequately on the intermediate assignments and is able to produce a final thesis project at a very good level.<br>C (80-73%, good - normal reliable work), the student has performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge. The final thesis project is done at a good level.<br>D (72-66%, satisfactory - acceptable results), the student was less prepared during the semester, has slight deficiencies in theoretical knowledge. Cannot critically analyze information. He/she prepared the final thesis project at a satisfactory level.<br>E (66-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge. Intermediate tasks meet the minimum criteria, as well as the development of the final thesis project. |   |

Fx (59-0%, insufficient - extra work required).

**Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

The aim of the course is to familiarize students theoretically and practically with the principles and procedures that need to be mastered for the successful preparation of a bachelor's thesis.

The student is able to define the topic of his/her own bachelor thesis, is able to correctly determine the methods of its processing, acquires the ability to work selectively and correctly with the professional literature on the chosen topic. He/she knows the individual parts of the final thesis. Is able to prepare and present the results of the thesis and is able to respond to questions on the thesis in discussion.

**Class syllabus:**

Brief outline of the course:

Types of bachelor theses. The timetable of thesis processing. Definition of the topic and goal of the thesis. Study of literature. Excerpting of material. Theoretical and methodological conception of the thesis. Methodology of problem processing. Methodology of elaboration of the thesis. Formal-compositional requisites of the final thesis. How to prepare for the defence of the thesis.

**Recommended literature:**

Recommended reading:

Selection of literature according to the chosen topic of the thesis;

Current directive of the Rector of Charles University on the basic requirements of thesis;

LICHNEROVÁ, L. (2016). Písanie a obhajoba záverečných prác - vysokoškolské skriptá pre študentov Univerzity Komenského v Bratislave. Bratislava: Stimul. ISBN 978-80-8127-155-7

## STATE EXAM DESCRIPTION

|  |   |
|--|---|
| <b>Academic year:</b> 2022/2023  |   |
| <b>University:</b> Comenius University Bratislava  |   |
| <b>Faculty:</b> Faculty of Education   |   |
| <b>Course ID:</b><br>PdF.KPg/B-VUZšt011/15   | <b>Course title:</b><br>Bachelor's thesis defence |
| <b>Number of credits:</b> 12   |   |
| <b>Educational level:</b> I.   |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The state examination of the defence of the thesis, its conditions and procedural aspects are regulated by the Internal Regulation No.1/2020 Study Regulations of the Faculty of Arts of Charles University, as well as by the Internal Regulation No. 5/2021 Study Regulations of the Charles University.<br>A student may take the state examination a) after obtaining at least such number of credits that after obtaining credits for successful completion of the last state examination he/she achieves the necessary number of credits for proper completion of studies and b) after successful completion of compulsory courses, compulsory elective courses and elective courses in the composition determined by the study programme except for the state examination and c) no disciplinary proceedings are conducted against him/her.<br>In the bachelor's degree, the student receives 12 credits for the successful defence of the bachelor's thesis (credits included in the UZ study plan).<br>According to the VP 23/2021 Internal Quality Assurance System for Higher Education of the Charles University in Bratislava, the student is evaluated in particular:<br>- Demonstration of the student's ability to collect and interpret relevant data (facts), usually within the field of study in which the student has completed the programme of study, with the possibility of interdisciplinary overlap into other fields if necessary;<br>- Demonstrate the ability to make informed decisions that also take into account social, scientific and ethical considerations;<br>- Ability to communicate information, concepts, problems and solutions to both professional and lay audiences.<br>- the ability to think and work creatively in the field of study in which they have completed their degree programme.<br>- knowledge and understanding of the problem/issue addressed.<br>- Applying their skills in collecting, interpreting and processing basic literature, which may include its application in practice, or solving a sub-task related to the student's future field of study/ assignment.<br>The rating is awarded on a scale:<br>A 100 - 91% (excellent - outstanding results),<br>B 90 - 81% (very good - above average standard),<br>C 80 - 73% (good - normal reliable operation),<br>D 72 - 66% (satisfactory - acceptable results),<br>E 65 - 60% (sufficient - results meet minimum criteria),<br>Fx 59% or less (insufficient). |   |

A student is evaluated with the FX grade if he/she has fulfilled the requirements for the grade only at a level not exceeding 60% of the total highest possible level of fulfilment of the requirements for the completion of the subject of the state examination - the defence of the bachelor thesis. In the same way, a student shall be assessed with an FX grade if he/she has submitted a thesis in violation of paragraph 7 of Article 56 of the UK Internal Regulation 23/2021 or has submitted a thesis that does not substantially meet the requirements under paragraph 1(d), paragraph 2(d) or paragraph 3(d) of Article 56 of the UK Internal Regulation 23/2021 Internal Quality Assurance System for Higher Education at the University of Bratislava.

The details and specifications of the requirements of the final theses for the individual teacher study programmes in combination (approbation) will be specified in the respective Study Programme Descriptions.

**Learning outcomes:**

Learning outcomes:

The learning outcome is in accordance with the Long-Term Plan of the Charles University/PdF, the mission and strategic goals of the Charles University/PdF, in accordance with the description of the field of study, in accordance with the NKR/SKR/DD, in accordance with the profile of the graduate, in accordance with the learning objectives and learning outcomes in the individual subjects of the study programme curriculum, and other relevant documents.

The student is able to demonstrate his/her ability to work creatively in the field of study in which he/she has completed the study programme when conceiving his/her bachelor thesis. The student is able to demonstrate adequate knowledge of the subject matter and to apply his/her skills in collecting, interpreting and processing the basic literature, or its application in practice, or is able to solve a sub-task related to the focus of the student's bachelor's thesis.

**Class syllabus:**

Brief outline of the course:

1. Contribution of the thesis to the field of study. The evaluation of the bachelor thesis assesses whether the student has adequately demonstrated the ability to work creatively in the field of study in which he/she has completed the study programme, reflects the degree of demonstration of knowledge and knowledge of the issue, assesses the skills applied in collecting, interpreting and processing the basic literature, or the extent to which the student has mastered the application of theoretical assumptions in practice or how he/she is able to solve a subtask that is related to the focus of the student's bachelor thesis;
2. Originality of the thesis (the thesis must not be plagiarized, must not infringe the copyrights of other authors), the documentation for the defence of the thesis as a subject of the state examination includes originality protocols: from the Central Register and Theses, the results of which are commented on by the supervisor and the opponent in their opinions;
3. Correctness and correctness of citation of used information sources, research results of other authors and author teams, correctness of description of methods and working procedures of other authors or author teams;
4. Compliance of the structure of the thesis with the prescribed structure defined by the Internal Regulation No. 2/2018 Directive of the Rector of Charles University in Bratislava;
5. Respecting the recommended scope of the final thesis (the recommended scope of a bachelor's thesis is usually 30 - 40 standard pages - 54 000 to 72 000 characters including spaces), the adequacy of the scope of the thesis is assessed by the supervisor of the thesis;
6. Linguistic and stylistic level of the work and formal editing;
7. The manner and form of defending the thesis and the student's ability to respond adequately to the comments and questions in the supervisor's and opponent's evaluations.

|  |
|--|
| 8. In the study programme focused on the teaching of art-educational subjects, the presentation of artistic outputs and performances may be part of the final thesis and its defence.                                  |
| <b>State exam syllabus:</b>  |
| <b>Recommended literature:</b><br>Recommended reading:<br>according to the focus of the bachelor thesis topic  |
| <b>Languages necessary to complete the course:</b><br>Slovak language, in the case of language approbations also the language of the respective subject approbation  |
| <b>Notes:</b><br>Examination committee approved by the Scientific Council of PdF UK. State examination: the defence of the bachelor thesis is carried out only from one approbation. Credits are counted towards "UZ". |

| <b>University:</b> Comenius University Bratislava  |   |
| <b>Faculty:</b> Faculty of Education   |   |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde029/22   | <b>Course title:</b><br>Basics of the first aid |
| <b>Educational activities:</b><br><b>Type of activities:</b> practicals<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 2  |   |
| <b>Recommended semester:</b> 1., 3., 5.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment:<br>(a) a continuous written assessment with a maximum of 80 points aimed at testing knowledge and understanding of general first aid principles as well as basic first aid principles for life-threatening conditions (cessation of breathing, blood circulation), serious injuries (bleeding, burning, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices) and minor injuries<br>(b) by developing an activity on the chosen first aid topic in the form of a simulation of the health problem mentioned above as well as an active performance of a drill on the basic principles of first aid with a maximum of 20 points.<br>A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. Credit will not be awarded to a student who scores less than 40 points on the written midterm and fails to prepare for the activity. A minimum score of 60% is required to pass the course.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results), excellent performance, the student has excellent knowledge of theoretical knowledge of medical procedures in cases of health threat, can simulate a case of health threat based on the theoretical knowledge and solve the situation when providing first aid in practice<br>B (90-81%, very good - above average standard), excellent performance, the student knows the theoretical knowledge of medical procedures in cases of health threat very well, can simulate a case of health threat only partially on the basis of the theoretical knowledge, but can deal with the situation when providing first aid in practice<br>C (80-73%, good - normal reliable work), good performance, although the student has a good knowledge of theoretical knowledge of medical procedures in cases of health hazards, but cannot simulate a case of a health hazard on their basis, but can partially solve the situation when providing first aid in practice |   |

D (72-66%, satisfactory - acceptable results), satisfactory performance, the student partially knows the theoretical knowledge of health procedures in cases of health threats, but is unable to simulate a case of a health threat and is only partially able to apply the theory to practice

E (65-60%, sufficient - results meet the minimum criteria), satisfactory performance, the student has only minimal knowledge of the theoretical knowledge of health procedures in cases of health threats, is unable to simulate a case of a health threat and is able to apply the theory to practice only partially

Fx (59-0%, insufficient - extra work required), insufficient performance, student does not have sufficient knowledge of basic health procedures in health emergencies, nor is he/she able to simulate a health emergency and apply the theory to practice

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes and transferable competences:

The aim of the course is to teach students the basics of first aid, cardiopulmonary resuscitation, as well as the management of serious medical conditions. Upon completion of the course, the student will gain theoretical knowledge of medical procedures in cases of health threats to children and adolescents. At the same time, the student will strengthen his/her communication and organizational skills in dealing with serious health emergencies through simulated situations.

### **Class syllabus:**

Brief outline of the course:

1. General principles of first aid (the student acquires basic knowledge and knowledge of the general principles of first aid, can recognize basic first aid from rapid medical and technical assistance, can assess the situation without endangering his/her own life, assess the health condition of the affected - the severity and extent, take urgent measures to save life and knows the correct procedure for calling the ambulance service)
2. Positioning and displacement. (the student is familiarized with the basic positions in providing first aid and possible methods of removal, so that the health of the affected person does not further endanger)
3. First aid for life-threatening conditions (respiratory arrest, circulatory arrest) (the student will be able to recognize the signs of respiratory arrest and circulatory arrest and subsequently provide cardiopulmonary resuscitation in both adults and children in the correct way).
4. First aid for serious injuries (bleeding, burns, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices). (the student is able to recognise the risks to health in different degrees of bleeding, burning, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices, to administer appropriate basic first aid in relation to the extent of the injury and consequently to recognise the signs of shock and to provide the correct anti-shock measures)
5. First aid for minor injuries (the student can recognise minor injuries and provide appropriate first aid)

Discussion of a closely related literary work from another period of British or American literature  
 Active participation in class discussions (10 points/percent)  
 Written analysis of a selected topic based on a literary work (60 points/percent)  
 Grading:  
 100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX  
 A (excellent performance): The student has a deep knowledge of literary periods and trends in British and American literature, can connect incidental influences in British and American literature, is also sensitive to variations of the same themes and motifs in different periods, clearly sees the social and cultural factors behind literary variations, demonstrates systems knowledge and its application in literary analysis.  
 B (very good performance): The student has a good understanding of literary periods and trends in British and American literature, discovers a variety of incidental influences in British and American literature, is able to relate variations of the same themes and motifs in different periods to each other, can provide some explanation of the social and cultural factors behind literary variations, demonstrates systemic knowledge and is partially able to apply it to literary analysis, in-class oral exercises contain minor errors or confusions.  
 C (good performance): The student has a solid understanding of literary periods and trends in British and American literature, discovers some incidental influences in British and American literature, recognizes some variations of the same themes and motifs in different periods, can point to some of the social and cultural factors behind literary variations without a thorough explanation, attests to systemic knowledge and is partially able to apply it to literary analysis, oral exercises in class contain some major errors.  
 D (satisfactory performance): The student has sufficient knowledge of literary periods and trends in British and American literature, discovers few incidental influences in British and American literature, has limited understanding of the social and cultural factors behind literary variation, is able to apply background and theoretical knowledge only to works discussed but not to unfamiliar texts, both oral exercises contain major errors.  
 E (sufficient performance): The student has minimal knowledge of literary periods and trends in British and American literature, identifies only a few obvious incidental influences in British and American literature, can apply only clichés of social and cultural history to the works analysed, applies theory and background knowledge in an insubstantial way to the texts, only one of the oral exercises is acceptable.  
 FX (insufficient performance): The student fails to demonstrate minimal knowledge of literary periods and trends in British and American literature, cannot identify any significant incidental influences, cannot connect social and cultural history with relevant contents of the works discussed, fails to integrate theory and practice to a#minimal degree, neither of the oral exercises are acceptable.  
 Scale of assessment (preliminary/final): Continuous assessment (100 points/percent): Online quizzes – not graded (A minimum score of 70% on the quizzes is required for the completion of the course. Students have an unlimited number of attempts before the actual class.) Preparation of two of the following assignments to develop argumentative and analytical skills (30 points/percent): Summary of the historical and cultural context of the chosen literary work Review of a scholarly article related to the selected literary work Preparation of an exercise to teach any aspect of the selected literary work Follow-up research on a question raised in a previous class discussion Moderating the discussion of a question (the moderator introduces the question and prepares the arguments for the debate) Presentation of one of the adaptations or intermedial transpositions of the selected literary work Discussion of a closely related literary work from another period of British or American literature Active participation in class discussions (10 points/percent) Written analysis of a selected topic based on a literary work (60 points/percent)

**Learning outcomes:**

**Objectives and learning outcomes:**

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

**Knowledge:**

Students gain knowledge of canonical and non-canonical works of British and American literature from a variety of periods that address important themes of the individual and society, understand literary terminology and the contexts of the works analysed, recognize synchronic and diachronic variations in British and American literature, recognize prosodic and stylistic features of literary texts over time, gain proficiency in adaptation studies and transmediality, and become knowledgeable in the pedagogical implications of literature.

**Skills:**

Students are able to work with literary texts and scholarly studies and apply analytical-critical and linguistic thinking in analysing and discussing texts. Students develop the ability to communicate fluently about professional aspects of literature and culture in English at the B2 level. They acquire presentation and digital skills and are able to search for relevant information in a digital environment and work in the digital learning environment Moodle. They develop elementary didactic skills and are able to analyse pedagogical situations.

**Competences:**

Students can effectively use self-study strategies, read literature in a foreign language, argue in discussions. They also acquire interpersonal skills, e.g. they can communicate effectively in a group and solve problems in a team. They acquire literary and intercultural competences that enable them to engage in professional life.

**Class syllabus:**

**Course contents:**

Major periods of British and American literature with representative authors and works: recapitulating and expanding the horizon of knowledge.

Exploration of the transformations of a selected theme (e.g., heroism, love, marriage, poverty, marginalization, family, city and country, climate and nature, monsters) in pairs of British and American literary samples from different periods (medieval and early modern, 19th century, modern and post-modern).

Literary inspirations and rewritings: the transformation of basic literary material (story, legend, myth) in several British and American samples.

Through the above course content and methods of education, students will acquire knowledge, develop their pedagogical skills and competences corresponding to the profile of a graduate of the bachelor's degree in the study programme Teaching of English Language and Literature in Combination.

**Recommended literature:**

**Compulsory readings**

Primary literary texts according to the course requirements

| <b>Academic year:</b> 2022/2023  |   |
| <b>University:</b> Comenius University Bratislava  |   |
| <b>Faculty:</b> Faculty of Education   |   |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde027/22   | <b>Course title:</b><br>Child and adolescents in life crisis situations |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |   |
| <b>Number of credits:</b> 3  |   |
| <b>Recommended semester:</b> 2., 4., 6.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed with an evaluation, the ratio of the interim and final evaluation is 100/0. The task of the students is to prepare an interim seminar paper (maximum 40 points). The students present and discuss their seminar work in a group, followed by a colloquial assessment in the form of a class discussion. Active communication and the ability for healthy reflection and self-reflection are assessed (max. 20 points). The assessment will also include a mid-term test on the material covered (max. 40 points). A minimum of 60% of the maximum possible course grade is required for successful completion of the course.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>Weighting of intermediate/final assessment: 100/0<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help |   |

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

The aim of the course Children and Adolescents in Crisis Life Situations is to provide students with knowledge about possible crisis situations of children and adolescents and their implications for the educational process in school.

By completing the course

- Students will gain an overview of the crisis situations that the current generation of children and youth is going through and the impact that different types of crises leave in the area of emotionality, behaviour and actions of the child/pupil/pupils, which, of course, also affects the whole area of their upbringing and education;

- acquire the ability to detect warning signs of possible danger to the pupil/pupils, the ability to implement crisis intervention and to cooperate with other institutions and the family in resolving crisis situations;

- they know how to apply the knowledge in an educational context in order to preventively strengthen pupils' resilience to psychological stress and develop their personality strengths.

Transferable competences: improving communication skills, critical thinking and contextual reasoning.

### **Class syllabus:**

Brief outline of the course:

1. Terminological definitions- life crisis, stressful situation, emotional loss, disasters/natural calamities, hurtful events.

2. Classification, development, course of life crises. Specifics of crises in children and adolescents. Psychological, somatic and social consequences of unprocessed crisis events on a person's life. First aid in a crisis situation.

3. Crisis situations related to the family environment. Relational crisis - disruption or loss of relationship (divorce and separation of parents, death in the family) ; Material loss - loss of housing and/or employment of parents. Alcoholism, drugs and violence in the family;

4. Peer and school-related crisis situations - non-acceptance to school; loss of position and role in the group, exclusion from the group; bullying and cyberbullying; peer violence. Adolescent partnership and sexuality as a source of crisis.

5. Intrapsychic crisis - loss of expectations, plans, ideals. Psychospiritual crisis in adolescents.

6. Self-harm (self-mutilation) in children and adolescents. Warning signs and signs. Prevalence, causes and consequences.

7. Specifics of suicidal (suicidal) behavior in children and adolescents. Warning signs of suicidal threat. Crisis intervention in case of suicide attempt.

8. Possibilities of cooperation between the teacher and other institutions and the family in dealing with crisis situations.
9. Crisis intervention and its phases - initiation, implementation and termination of the intervention.
10. Forms of crisis intervention - direct face-to-face assistance , distance (telephone, chat, e-mail, etc.), outreach services - outpatient and residential.
11. Resilience to psychological distress as crisis prevention; development of personality strengths; resilience development techniques.

| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 3   |   |
| <b>Recommended semester:</b> 1., 3., 5.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment (100% of the interim assessment).<br>The subject is finished:<br>(a) a continuous written assessment with a maximum score of 80 points aimed at reviewing knowledge and knowledge of the child's developmental characteristics and the factors that affect the child's biological physiological development and which may be the causes of pathological growth and at the same time the consequences of a lower level of the child's ability to cope with the educational process of school education; reviewing the knowledge and use of methods that assess and diagnose physiologically healthy , resp. pathological biological growth and development of the child and, ultimately, on the issue of prevention and protection of the child's health in all its components of the bio-psycho-social nature of the child's development<br>b) by developing protocols for the assessment and diagnosis of biological development with a maximum score of 20 points as a form of the ability to apply theoretical knowledge about physiologically healthy or pathological biological development of the child to pedagogical practice<br>A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E.<br>Credit will not be awarded to a student who scores less than 40 points on the written midterm review and fails to complete a protocol for assessing and diagnosing the child's biological development. A minimum score of 60% is required to pass the course.<br>The rating is awarded on a scale:<br>A (100-91%, proficient - outstanding), excellent performance, the student has an excellent command of the knowledge of physiologically healthy biological development of the child and has an excellent understanding of the environmental factors that cause pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critically assesses the adequacy of the demands of the educational process on the physical and psychological performance of the child, the student can apply the methods of assessment and |   |

diagnosis of biological development on practical examples and can apply them in the education and training of children

B (90-81%, very good - above average standard), excellent performance, the student has a very good command of the knowledge of the physiologically healthy biological development of the child, knows very well which of the environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is borderline, but the student can apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children

C (80-73%, good - normal reliable work), good performance, although the student has a good command of the knowledge of the physiologically healthy biological development of the child, he/she knows well which environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the area of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is absent, but can partially apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children

D (72-66%, Satisfactory-Acceptable performance), Satisfactory performance, the student partially knows the knowledge of physiologically healthy biological development of the child and partially knows which environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the child's physical and psychological performance is absent but he/she is able to apply the methods of evaluation and diagnosis of biological development in the form of practical examples and apply them in the education of children only partially

E (65-60%, satisfactory - results meet minimum criteria), satisfactory performance, the student has only minimal knowledge of the physiologically healthy biological development of the child, and similarly minimal knowledge of the environmental factors that cause pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the child's physical and psychological performance is absent, and is able to apply methods of evaluation and diagnosis of biological development in the form of practical examples and apply them in the education and training of children only partially

Fx (59-0%, insufficient - extra work required), inadequate performance, student does not sufficiently master the basic knowledge of physiologically healthy biological development of the child, at the same time does not sufficiently know which of the environmental factors are the causes of the emergence of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, is neither able to critically evaluate the adequacy of the demands of the educational process on the child's physical and psychological performance, nor is he or she able to apply methods of assessing and diagnosing biological development in the form of practical examples and apply them in the education and training of children

**Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

Upon completion of the course, students should have knowledge and understanding of the biological laws of growth and development and the factors that determine them. They will acquire knowledge of the bio-psycho-social integration of the human organism. Understand the spatio-temporal sequence and interdependence of changes in the structure and function of the human organism.

They will become familiar with critical developmental periods and risk factors interfering with physiological growth and development. They will understand the principles of regulation and adaptation of the organism in the context of environmental influences. At the same time, students will strengthen their mathematical skills and analytical abilities in the development of protocols for the assessment of child biological development. Ultimately, the course will provide students with the ability to evaluate the appropriateness of the demands of the educational process on a child's physical and psychological performance in relation to the child's level of biological maturation

### **Class syllabus:**

Brief outline of the course:

1. Defining ontogeny. Progressive and regressive changes with age. Biological explanation of the concepts of growth and development. The laws of growth and development. Typical and atypical growth and development. (The student can distinguish between physiologically healthy and pathological biological development of a child for the purpose of applying knowledge in the education of children, in the form of effective collaboration with special educators, psychologists, and other practitioners)

2. Factors determining growth and development: genetic, neurohormonal, environmental factors. Genetic factors: heredity, mutations - gene, chromosomal aberrations. Mutagens and teratogens. Mutations. Chromosomal aberrations. (The student knows and understands the endogenous environmental factors that determine the hereditary predisposition of the child to cope with the demands of the educational process on the psychological and physical load of the organism)

3. Environmental factors. Definition of environment, external, internal environment. Neurohormonal regulation. Importance of neural and hormonal regulation as a mechanism of biological adaptation. Determination of growth and developmental processes by environmental factors. Nutrition. Maternal factors. Climatic and geographical factors. Socio-economic level. Morbidity. (The student knows which of the factors act on the biological development of the child and which may be the consequences of the child's lower ability to cope with the educational process of the student's schooling)

4. Ontogenetic development. The division of ontogeny: the biological definition of the different periods. Prenatal, perinatal, postnatal periods. Prenatal period - formation and development of the embryo (gestation), importance of the placenta. Environmental risk factors threatening prenatal development. Perinatal period. Childbirth, newborn at risk. Postnatal period - characteristics of the neonatal, infant, toddler, preschool, junior and senior school age periods in terms of somatic changes (growth, motor development) and risks of developmental disruption. Brief overview of anatomy and physiology of organ systems. (the student distinguishes the age-specific characteristics of the individual systems in the different periods of ontogenesis and is able to use and apply these characteristics in the practice of school education)

5. Methods of assessment of physical growth and development, determination of biological maturity. Adequacy of the demands of the educational process on the child's physical and psychological performance - Biological rhythms. Dynamic stereotype. Fatigue and resumption of work activity. (The student can diagnose the level of development of children of preschool and younger school age, critically evaluate the adequacy of the demands of the educational process on the physical and psychological performance of the child and on the basis of the diagnosis to design and implement an appropriate intervention)

6. Pathologically altered growth and development. Prevention of disorders of somatic development - primary, secondary, tertiary. (the student knows how to prevent pathologically altered growth and development in its beginnings, and knows the basics of prevention and protection of the child's health in all components of the bio-psycho-social nature of the child's development)

7. Principles of the organisation of teaching in terms of physical and mental hygiene. Hygiene of the school environment and conditions for educational activities of pupils. (the student knows the

basic principles of the organisation of teaching and the correct hygiene of the school environment in terms of the physical and mental hygiene of the pupil)

| <b>Academic year:</b> 2022/2023   |   |
| <b>University:</b> Comenius University Bratislava   |   |
| <b>Faculty:</b> Faculty of Education  |   |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde031/22  | <b>Course title:</b><br>Colloquium on selected issues of upbringing and education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 5   |   |
| <b>Recommended semester:</b> 5.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed with an examination. The weighting of the interim and final assessment is 50/50.<br>The intermediate assessment (50%) consists of an assessment of the student's ability to identify and clearly explain the essence of the selected current problem in the field of education and training (maximum 3 points), to identify and describe the current state of the solution to the selected problem in educational theory and practice (maximum 5 points), to analyse and critically evaluate the proposed solutions (maximum 5 points), to formulate his/her own conclusions and recommendations for practice, including their argumentation (maximum 3 points), and the ability to manage the discussion of the selected problem (maximum 4 points). The maximum possible number of points in the intermediate assessment is 20.<br>The final assessment (50%) consists of an examination grade for an essay on a selected issue in the field of education. The maximum possible number of points for the essay is 20.<br>For successful completion of the course it is necessary to obtain at least 60% of the points (24 points).<br>The overall grade is awarded on a grading scale:<br>A (40-37 points) - excellent (outstanding results),<br>B (36-33 points) - very good (above average standard),<br>C (32-30 points) - good (average results),<br>D (29-27 points) - satisfactory (acceptable results),<br>E (26-24 points) - sufficient (results meet the minimum criteria),<br>FX (23-0 points) - underperforming (unacceptable results).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester. |   |

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 50/50

**Learning outcomes:**

Learning outcomes:

Upon completion of the course, students will be able to identify current issues in education. They will be able to search, analyse and critically evaluate relevant information sources that describe, analyse and evaluate current issues in education. Students will be able to present and discuss their findings clearly and comprehensibly.

Transferable competences: in presenting and discussing their findings in seminars, students will develop their communication, lecturing and metacognitive skills. Students will also be able to present selected current issues in education and their analysis and evaluation through an essay. Students will be able to use the acquired knowledge and competences creatively in the study of other pedagogical disciplines and in their future pedagogical practice.

**Class syllabus:**

Brief outline of the course:

Identification of current problems of education and training and examination of the current state of their solution. Collecting, analysing and evaluating information on the problems under study. Preparing and managing the presentation and discussion of selected issues. Creating an essay.

**Recommended literature:**

Recommended reading:

According to the selected current topics and according to the teacher's recommendations

**Languages necessary to complete the course:**

slovak language

**Notes:**

teaching of the subject is provided by teachers who are dedicated to the current issues of education and education and research of the subject is part of their research and publication activities

## COURSE DESCRIPTION

|  |  |
|--|--|
| <b>Academic year:</b> 2022/2023  |  |
| <b>University:</b> Comenius University Bratislava  |  |
| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde005/22   | <b>Course title:</b><br>Communication in education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 3  |  |
| <b>Recommended semester:</b> 2., 4., 6.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course: 100% pass mark.<br>Assessment: consists of 2 intermediate assessments (40+60, total 100 points).<br>Interim assessment 1: consists of the preparation of a term paper and its oral presentation or practical application in class. This is a prepared micro-performance (alone or in pairs).<br>Semester work for interim assessment 1: consists of a creative assignment for 40b (20+20). This includes preparation of an oral micro-presentation for 10-15 minutes and feedback (20b) and preparation of a visual presentation in a graphics program (20b).<br>Intermediate assessment 2: consists of a review of the knowledge acquired, i.e. a test for 60p. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester. |  |

For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

For a grade of D at least 66 points. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.

At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the Communication in education course, the student should:

- Be able to compare student-centered and teacher-centered approaches in communication,
- be able to justify the choice and appropriateness of the communication approaches used in teaching,
- be able to create a presentation with high quality content and visually interesting,
- be able to apply theoretical knowledge in the creation of oral micro output,
- be able to present a micro performance in front of a group and be able to give or receive feedback,
- be able to argue correctly and be able to make a factually correct argument,
- understand the importance of selection and analysis of information and information sources,
- know methods for Developing of critical thinking,
- acquire presentation and communication skills and be able to apply them in practical tasks.

Transferable competences: the student strengthens soft skills such as communication skills through creative tasks in the course, furthermore analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and through their application in discussion, strengthens interpersonal skills within the group - activation and taking initiative and responsibility.

### **Class syllabus:**

Brief outline of the course:

The aim of the course is the practical use of theoretical knowledge about effective communication in the educational process through training and micro-performances. The course is designed to prepare students for the future teaching profession in the field of critical and independent thinking, communication and rhetorical skills, collaboration, creative activity, self-assessment, feedback, etc. Using various activating methods and problem-based tasks, students will actively participate in the teaching and create the content of the course themselves, in which they will use their own potential and develop the inter and intra personal aspects of their own personality.

Topics:

Communication in education in theory - definition of communication, types of communication, information theory and its components. Communication in education - its functions, levels, basic rules, organizational forms. Interaction styles of the teacher. Extralinguistic means of communication, paralinguistic aspects of speech. Verbal communication - monologue, dialogue,

conversation, questioning, argumentation. Organizational forms and space in communication. Types of teaching according to the number of participants. Classroom layout. Communication in education in practice - teachers' inappropriate approaches in Communication in education. Appropriate communication approaches and strategies in teacher work - learner centred approach, humanism, non-directivity. Presentation - structure and arrangement of speech/speech/lecture. Selection and appropriateness of information within an oral presentation. Analysis of speakers. Visualisation and arousal of interest. Organisation of time. Argumentation - composition of argument, types of argument. Logic and errors in argumentation. Types of interviews. Debate - how to conduct a conversation, the structure of a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection, giving and receiving criticism. Critical thinking and methods to develop critical thinking.

## COURSE DESCRIPTION

|  |  |
|--|--|
| <b>Academic year:</b> 2022/2023  |  |
| <b>University:</b> Comenius University Bratislava  |  |
| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde005/22   | <b>Course title:</b><br>Communication in education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 3  |  |
| <b>Recommended semester:</b> 1., 3., 5.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course: 100% pass mark.<br>Assessment: consists of 2 intermediate assessments (40+60, total 100 points).<br>Interim assessment 1: consists of the preparation of a term paper and its oral presentation or practical application in class. This is a prepared micro-performance (alone or in pairs).<br>Semester work for interim assessment 1: consists of a creative assignment for 40b (20+20). This includes preparation of an oral micro-presentation for 10-15 minutes and feedback (20b) and preparation of a visual presentation in a graphics program (20b).<br>Intermediate assessment 2: consists of a review of the knowledge acquired, i.e. a test for 60p. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester. |  |

For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

For a grade of D at least 66 points. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.

At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the Communication in education course, the student should:

- Be able to compare student-centered and teacher-centered approaches in communication,
- be able to justify the choice and appropriateness of the communication approaches used in teaching,
- be able to create a presentation with high quality content and visually interesting,
- be able to apply theoretical knowledge in the creation of oral micro output,
- be able to present a micro performance in front of a group and be able to give or receive feedback,
- be able to argue correctly and be able to make a factually correct argument,
- understand the importance of selection and analysis of information and information sources,
- know methods for Developing of critical thinking,
- acquire presentation and communication skills and be able to apply them in practical tasks.

Transferable competences: the student strengthens soft skills such as communication skills through creative tasks in the course, furthermore analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and through their application in discussion, strengthens interpersonal skills within the group - activation and taking initiative and responsibility.

### **Class syllabus:**

Brief outline of the course:

The aim of the course is the practical use of theoretical knowledge about effective communication in the educational process through training and micro-performances. The course is designed to prepare students for the future teaching profession in the field of critical and independent thinking, communication and rhetorical skills, collaboration, creative activity, self-assessment, feedback, etc. Using various activating methods and problem-based tasks, students will actively participate in the teaching and create the content of the course themselves, in which they will use their own potential and develop the inter and intra personal aspects of their own personality.

Topics:

Communication in education in theory - definition of communication, types of communication, information theory and its components. Communication in education - its functions, levels, basic rules, organizational forms. Interaction styles of the teacher. Extralinguistic means of communication, paralinguistic aspects of speech. Verbal communication - monologue, dialogue,

conversation, questioning, argumentation. Organizational forms and space in communication. Types of teaching according to the number of participants. Classroom layout. Communication in education in practice - teachers' inappropriate approaches in Communication in education. Appropriate communication approaches and strategies in teacher work - learner centred approach, humanism, non-directivity. Presentation - structure and arrangement of speech/speech/lecture. Selection and appropriateness of information within an oral presentation. Analysis of speakers. Visualisation and arousal of interest. Organisation of time. Argumentation - composition of argument, types of argument. Logic and errors in argumentation. Types of interviews. Debate - how to conduct a conversation, the structure of a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection, giving and receiving criticism. Critical thinking and methods to develop critical thinking.

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde024/22  | <b>Course title:</b><br>Contemporary alternative models of education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 2., 4., 6.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment. During the semester there will be two colloquial midterm assessments of 20 points each and 2 midterm assignments of 10pts each will be worked on. Final assessment 40pts.<br>A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. To pass the course, a minimum of 60% of the marks must be obtained.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |  |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

- The graduate of this course is well versed in and able to critically evaluate alternative schools of the 20th century and in the trends of alternative pedagogy in the 21st century.

- It takes a comprehensive approach to alternative pedagogy, using both a process of analysis and synthesis in the search for solutions. It employs thinking strategies based on critical evaluation in its decision making, which relies on facts and clearly articulated information from reliable sources of information.

- She approaches alternative directions in education as one possible source of inspiration for her future teaching practice.

- The graduate is able to use the acquired knowledge and skills in solving (problem) tasks creatively. Can analyze the problem and synthesize new solutions. Actively and flexibly brings new solutions to the assigned task. They are able to formulate clear conclusions and their justifications, which they can present to both the professional community and the general public.

- Graduates of the course are encouraged to adopt a growth-oriented mind-set and lifelong learning. Transferable competences on which the course reflects: development of communication, organisational and digital skills. Fostering analytical, critical, creative and growth-oriented thinking; developing skills related to facilitation and mentoring. Promoting the development of reflective, self-reflective skills and the perception of one's own responsibility for personal decisions. Ongoing assignments: students work in small groups on one of three main topics (Alternative Pedagogy in the First Half of the 20th Century, in the Second Half of the 20th Century, and Critical Theories of Education in the 20th Century).

Colloquial continuous assessment: each group of students presents 2 times during the semester the different areas they have worked on together in the group.

Final assessment: students keep a portfolio (not something like a journal) for the course throughout the semester, capturing their reflection after each class meeting (what I found interesting, what surprised me, what I learned, what I disagreed with, what I needed to convey differently). At the end of the lecture period, each student who has fulfilled the requirements of the mid-term evaluation will have an individual interview with the teacher, where they will present their portfolio, carry out a self-assessment. The final evaluation is an intersection of the instructor's feedback and the student's self-reflection.

### **Class syllabus:**

Brief outline of the course:

1. Alternative and norm in education
2. Traditional and conventional in education
3. Alternative pedagogy in the first half of the 20th century

Chicago Laboratory School - John Dewey

Montessori pedagogy - Maria Montessori  
Waldorf Pedagogy - Rudolf Steiner  
Freinet Pedagogy - Celestin Freinet  
The Jena Plan - Peter Peterson  
The Dalton Plan - Helen Parkhurst  
Summerhill Democratic School - Alexander S. Neill  
4. Alternative pedagogy in the second half of the 20th century  
Integrative-Thematic Teaching - Susan Kovalik  
Russian Family School - Mikhail Petrovich Stetina  
Intuitive Pedagogy - Pär Ahlbom  
Free Democratic Schools (Sudbury Valley Schools) - Daniel Greenberg  
ESBZ (Evangelische Schule Berlin Zentrum) - Margret Rasfeld  
5. Critical theories of education in the 20th century  
Emil Durkheim, Talcott Parsons, Frankfurt School - Theodor Adorno, Erich Fromm, Jurgen Habermas, Herbert Marcuse  
Pedagogy of Liberation - Paulo Freire  
Unschooling society - Ivan Illich  
Theory of reproduction - Pier Bourdieu  
Deprivation Theory - Basil Bernstein  
Anti-pedagogical theories (e.g. Alice Miller)  
6. Alternative pedagogy in the 21st century  
Trends in alternative education around the world  
Trends in alternative education in Slovakia  
(unschooling, homeschooling, forest schools and kindergartens, educational groups ...)

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde024/22  | <b>Course title:</b><br>Contemporary alternative models of education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 1., 3., 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment. During the semester there will be two colloquial midterm assessments of 20 points each and 2 midterm assignments of 10pts each will be worked on. Final assessment 40pts.<br>A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. To pass the course, a minimum of 60% of the marks must be obtained.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |  |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

- The graduate of this course is well versed in and able to critically evaluate alternative schools of the 20th century and in the trends of alternative pedagogy in the 21st century.

- It takes a comprehensive approach to alternative pedagogy, using both a process of analysis and synthesis in the search for solutions. It employs thinking strategies based on critical evaluation in its decision making, which relies on facts and clearly articulated information from reliable sources of information.

- She approaches alternative directions in education as one possible source of inspiration for her future teaching practice.

- The graduate is able to use the acquired knowledge and skills in solving (problem) tasks creatively.

Can analyze the problem and synthesize new solutions. Actively and flexibly brings new solutions to the assigned task. They are able to formulate clear conclusions and their justifications, which they can present to both the professional community and the general public.

- Graduates of the course are encouraged to adopt a growth-oriented mind-set and lifelong learning.

Transferable competences on which the course reflects: development of communication, organisational and digital skills. Fostering analytical, critical, creative and growth-oriented thinking; developing skills related to facilitation and mentoring. Promoting the development of reflective, self-reflective skills and the perception of one's own responsibility for personal decisions.

Ongoing assignments: students work in small groups on one of three main topics (Alternative Pedagogy in the First Half of the 20th Century, in the Second Half of the 20th Century, and Critical Theories of Education in the 20th Century).

Colloquial continuous assessment: each group of students presents 2 times during the semester the different areas they have worked on together in the group.

Final assessment: students keep a portfolio (not something like a journal) for the course throughout the semester, capturing their reflection after each class meeting (what I found interesting, what surprised me, what I learned, what I disagreed with, what I needed to convey differently). At the end of the lecture period, each student who has fulfilled the requirements of the mid-term evaluation will have an individual interview with the teacher, where they will present their portfolio, carry out a self-assessment. The final evaluation is an intersection of the instructor's feedback and the student's self-reflection.

### **Class syllabus:**

Brief outline of the course:

1. Alternative and norm in education
2. Traditional and conventional in education
3. Alternative pedagogy in the first half of the 20th century

Chicago Laboratory School - John Dewey

Montessori pedagogy - Maria Montessori  
Waldorf Pedagogy - Rudolf Steiner  
Freinet Pedagogy - Celestin Freinet  
The Jena Plan - Peter Peterson  
The Dalton Plan - Helen Parkhurst  
Summerhill Democratic School - Alexander S. Neill  
4. Alternative pedagogy in the second half of the 20th century  
Integrative-Thematic Teaching - Susan Kovalik  
Russian Family School - Mikhail Petrovich Stetina  
Intuitive Pedagogy - Pär Ahlbom  
Free Democratic Schools (Sudbury Valley Schools) - Daniel Greenberg  
ESBZ (Evangelische Schule Berlin Zentrum) - Margret Rasfeld  
5. Critical theories of education in the 20th century  
Emil Durkheim, Talcott Parsons, Frankfurt School - Theodor Adorno, Erich Fromm, Jurgen Habermas, Herbert Marcuse  
Pedagogy of Liberation - Paulo Freire  
Unschooling society - Ivan Illich  
Theory of reproduction - Pier Bourdieu  
Deprivation Theory - Basil Bernstein  
Anti-pedagogical theories (e.g. Alice Miller)  
6. Alternative pedagogy in the 21st century  
Trends in alternative education around the world  
Trends in alternative education in Slovakia  
(unschooling, homeschooling, forest schools and kindergartens, educational groups ...)

correctly use many synonymic and antonymic expressions in English vocabulary, knows and can actively use English collocations and idioms at C1 level.

B (very good performance): The student can practically identify individual types of English word-formation, has a good vocabulary formed through various word-formation processes, knows the types of individual word classes and the ways of their functional and stylistic use, knows and can correctly use synonymic and antonymic expressions in English vocabulary, knows and can actively use English collocations and idioms at C1 level.

C (good performance): The student can practically identify most types of English word-formation, has a reasonably wide vocabulary formed through different word-formation processes, knows the types of individual word classes and some ways of their functional and stylistic use, knows and can use synonymic and antonymic expressions in English vocabulary, knows and can use English collocations and idioms at B2 level.

D (satisfactory performance): The student can practically identify most types of English word-formation, has an adequate vocabulary formed through different word-formation processes, knows the types of individual word classes and some ways of their application, knows and can use some synonymous and antonymic expressions in English vocabulary, knows and can use some English collocations and idioms.

E (sufficient performance): The student can practically identify some types of English word-formation, has a sufficient vocabulary of words formed through different word-formation processes, knows the basic types of individual word classes and some ways of using them, knows and can use some synonymous and antonymic expressions in English vocabulary, knows and can use some English collocations and idioms.

Scale of assessment (preliminary/final): Continuous assessment (100%): 1st practical test (50%)  
2nd practical test (50%)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the learning objectives declared in the profile of a graduate, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

The student will increase his/her knowledge of the vocabulary of the English language, the classification of types of word-formation, different types of word classes, he/she will review the principles of the formation of paradigmatic and syntagmatic relations between lexical units of the language system, he/she will become familiar with the basic communicative functions of lexemes.

Skills:

The student is familiar with the problems of individual types of word-formation, knows how to lexically analyse vocabulary in terms of word classes, knows and can use the vocabulary generated by paradigmatic and syntagmatic relations in the language system, can practically apply the acquired theoretical knowledge in the analysis of a coherent authentic text, can use the acquired knowledge in an appropriate and adequate way in his/her professional practice.

Competences:

The student learns to work independently and in a team when solving lexical tasks, can communicate on topics related to the formation and meaning of English words, can find and use digital resources and aids useful for his/her further independent development, acquires vocabulary-building strategies.

### **Class syllabus:**

Course contents:

Main themes of the course: English word formation - affixation, compounding, conversion; shortening and blending of words, nouns and adjectives in English, verbs and adverbs, English

prepositions and conjunctions, synonyms and antonyms in English vocabulary, jargon, semantic fields, English collocations and idioms, multi-word lexemes with interpersonal function.

By means of the above content, the student will consolidate his/her knowledge of the structural-functional attributes of the lexical level of the English language, will learn how to use theoretical knowledge in practice in the analysis of English vocabulary, will develop his/her foreign language (especially lexical and semantic) skills and vocabulary at the B2 – C1 level, will learn to work independently and in a team to solve lexical tasks and problems, and will be able to apply the acquired knowledge and skills appropriately in the classroom.

**Recommended literature:**

Compulsory readings:

McCARTHY, M. (1990). Vocabulary. Oxford: Oxford University Press.

McCARTHY, M. and O'DELL, F. (2017). English Vocabulary in Use. Upper-intermediate. 4th edition. Cambridge University Press.

WATCYN-JONES, P. and FARRELL, M. (2002). Test your Vocabulary 4. Harlow: Pearson Education Limited.

All of the above books are available in Slovak libraries and/or bookshops.

**Languages necessary to complete the course:**

English, Slovak

The student is entitled to alternative dates of the tests (if he/she has not attended the assessment for medical or other serious reasons), but the student is not entitled to any re-sits.<br>Continuous assessment (100%):<br>1st practical test (20%)<br>Pronunciation of short sentences (20%)<br>2nd practical test (30%)<br>Oral text presentation (30%)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX  |   |

A (excellent performance): The student correctly pronounces English words (individually and in sentences), correctly implements all segmental and suprasegmental phenomena of English pronunciation when reading a prepared continuous text, correctly transcribes words and short sentences, his/her pronunciation is fully intelligible, he/she can analyse continuous speech in terms of all segmental and suprasegmental phenomena; is familiar with and can demonstrate pronunciation differences between British and American English.

B (very good performance): The student correctly pronounces English words (individually and in sentences), correctly implements almost all segmental and suprasegmental phenomena of English pronunciation when reading a prepared continuous text, correctly transcribes words and short sentences, his/her pronunciation is fully intelligible, he/she can analyse continuous speech in terms of many of the segmental and suprasegmental phenomena covered in the class; knows and can demonstrate most of the pronunciation differences between British and American English.

C (good performance): The student pronounces most English words (individually and in sentences) correctly, uses appropriately most segmental and suprasegmental phenomena when reading a prepared continuous text, transcribes words correctly - makes only minor errors in sentences, his/her pronunciation is fully intelligible, can analyse continuous speech in terms of most of the segmental and suprasegmental phenomena covered in the course; knows and can demonstrate all the important pronunciation differences between British and American English.

D (satisfactory performance): The student pronounces most English words (individually and in sentences) correctly; when reading a prepared continuous text, he/she correctly realizes all essential segmental and suprasegmental phenomena; he/she transcribes words correctly, but makes minor errors in sentences; his/her pronunciation is reasonably intelligible; he/she can analyse continuous speech in terms of the main segmental and suprasegmental phenomena; he/she knows and can demonstrate the essential pronunciation differences between British and American English.

E (sufficient performance): The student pronounces most English words correctly, correctly implements basic segmental and suprasegmental phenomena when reading a prepared continuous text, makes errors when transcribing words and sentences, his/her pronunciation is generally intelligible, can analyse continuous speech only in terms of the most basic segmental and suprasegmental phenomena; knows and can demonstrate only some pronunciation differences between British and American English.

Scale of assessment (preliminary/final): Continuous assessment (100%): 1st practical test (20%)  
Pronunciation of short sentences (20%) 2nd practical test (30%) Oral text presentation (30%)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the learning objectives declared in the profile of a graduate, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

During the course, the student will review and consolidate his/her theoretical knowledge of phonetics and phonology, will become familiar with a variety of different types of phonetic-phonological tasks that can be used practically in the classroom, will become familiar with the methods of analysis of continuous speech from segmental and suprasegmental points of view, will become familiar with the differences between British and American English.

Skills:

The student will improve his/her pronunciation of English words (both individually and in sentences), increase the level of intelligibility of his/her speech, will be able to detect pronunciation errors and deficiencies in the speech of his/her classmates, will be able to solve different types of phonetic-phonological tasks, will become familiar with the strategies of text analysis from both segmental and suprasegmental points of view, will be able to identify the main differences between

British and American pronunciation, will be able to apply theoretical knowledge through practical examples.

Competences:

The student learns to work independently and in a team when solving phonetic-phonological problems and tasks, can communicate on topics related to speech-sound production and correct English pronunciation, learns the principles of phonological analysis of text, can search for and use resources and aids for his/her further independent development, develops his/her abstract thinking skills, can appropriately apply the acquired phonetic-phonological knowledge and strategies in his/her further education and in his/her professional practice.

**Class syllabus:**

Course contents:

Main themes of the course: Production and realisation of vowels and consonants in words and sentences – their phonetic-phonological analysis, pronunciation training and phonetic-phonological analysis of word and sentence stress, suprasegmental phenomena (linking, assimilation, elision, rhythm, intonation) and their phonetic-phonological characteristics, types of English pronunciation. By means of the above content, the student will deepen the knowledge of the structural-functional attributes of the sound level of the English language acquired in the course Phonetics and Phonology of the English Language, learn the ways of applying theoretical knowledge through practical practice of English pronunciation and phonetic-phonological analysis of English words and sentences, will develop his/her foreign language (especially pronunciation, transcription and listening) skills at B2 – C1 level, will learn to work independently and in a team to solve phonetic-phonological tasks, will be able to analyse and correct his/her own pronunciation and the pronunciation of his/her peers.

**Recommended literature:**

Compulsory reading:

PAVLÍK, R. (2018). Developing Phonetic and Phonological Skills. Bratislava: Z-F Lingua.

Recommended readings:

ROACH, P. (2009). English Phonetics and Phonology: A Practical Course. Cambridge University Press.

HEWINGS, M. (2007). English Pronunciation in Use: Advanced. Cambridge University Press.

UNDERHILL, A. (2005). Sound Foundations. Learning and Teaching Pronunciation. Oxford: Macmillan Education.

All of the above books are available in Slovak libraries and/or bookshops.

**Languages necessary to complete the course:**

English, Slovak

| <b>Faculty:</b> Faculty of Education  |   |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde033/22  | <b>Course title:</b><br>Development of creativity |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 3   |   |
| <b>Recommended semester:</b> 2., 4., 6.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment. During the semester there will be two colloquial interim assessments of 15 points each and 1 interim assignment 30b will be processed. Final assessment in the form of a group presentation of the 40b learning block project. A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. To pass the course, a minimum of 60% of the marks must be obtained.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |   |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks. Ongoing tasks: students work in small groups on their own learning block project (working with so-called learning environments such as Micro.Bit, Conductive Colours, Makey-Makey, etc.), the aim of which is to enable students to develop the so-called competences necessary for the 21st century through the chosen learning environment.

Colloquial mid-term evaluation: each group of students presents 2 times during the semester the mid-term tasks that they have worked on together in the group (project plan and SMART goals of their project).

Final assessment: students keep a portfolio (not something like a journal) for the course throughout the semester, capturing their reflection after each class meeting (what I found interesting, what surprised me, what I learned, what I disagreed with, what I needed to convey differently). At the end of the lecture period, each student who has fulfilled the requirements of the mid-term evaluation will have an individual interview with the teacher, where they will present their portfolio, carry out a self-assessment. The final evaluation is an intersection of the teacher's feedback, the student's self-reflection and a group presentation of the project to representatives from the practice (teachers and school management).

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

- The course graduate is knowledgeable/learned and can critically evaluate information.
- He approaches the assigned tasks in a complex manner, using both the process of analysis and synthesis in the search for solutions. In making decisions, he/she uses thinking strategies based on critical evaluation, which is based on facts and clearly formulated information from reliable information sources.
- He approaches teaching methods aimed at supporting the development of pupil creativity as one of the possible approaches and as a source of inspiration for his future teaching practice.
- The graduate is able to use the acquired knowledge and skills in solving (problem) tasks creatively. Can analyze the problem and synthesize new solutions. Actively and flexibly brings new solutions to the assigned task. They are able to formulate clear conclusions and their justifications, which they can present to both the professional community and the general public.
- Graduates of the course are encouraged to adopt a growth-oriented mind-set and lifelong learning.
- Throughout the course, students are encouraged to look at the school environment where a learning community of learners is to be formed and the development of creative thinking is to be continually encouraged.

Transferable competences on which the course reflects: development of communication, organisational and digital skills. Fostering analytical, critical, creative and growth-oriented thinking; developing skills related to facilitation and mentoring. Promoting the development of reflective, self-reflective skills and the perception of one's own responsibility for personal decisions.

### **Class syllabus:**

Brief outline of the course:

1. Creativity as a natural human trait
2. School as a learning organisation
3. Teacher Professional Development Plan
4. Mentoring in teaching practice
5. Project-Based Learning
6. Resolving conflicts in the classroom with the win-win method
7. Problem-solving method - problem-based learning (Design Thinking)

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde002/22  | <b>Course title:</b><br>Digital technologies 1 |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 2., 4.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course<br>The course is completed by assessment, the weighting of the interim and final assessment is 100/0.<br># active participation in seminars conducted by both face-to-face and distance learning methods;<br># processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;<br># development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Present an original and visually impressive presentation of the educational content of the selected teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at Charles University; The structure of the presentation should be based on one of the templates from the library of customizable templates supported by Prezi Present; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defense of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required)<br>For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, |  |

excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes and transferable competences:

The aim of the educational discipline Digital Technologies 1 is to develop digital skills of students of teacher-oriented study programmes at the Faculty of Education of the Charles University (hereinafter referred to as the Faculty of Education of the Charles University) to be able to effectively use an appropriate range of didactic software applications in the context of the concept of design and creation of interactive educational activities, knowledge quizzes and assignments, electronic portfolios, impressive didactic presentations, new interactive forms of teaching material and other pedagogical/school documentation usable in the intent of their future teaching profession at different levels of regional education in the Slovak Republic.

By completing the educational discipline Digital Technologies 1, the student has the competences and digital skills to effectively use the tools of the SMART Notebook software application and the SMART Lumio cloud environment by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.

By completing the educational discipline, the student also has the competences and digital skills in the field of design and creation of mind maps through the tools of the Mindomo software application (or FreeMind, XMind) applicable in educational activities implemented in schools and educational institutions for the target group of intact pupils, as well as pupils with special educational needs in order to improve their communication skills and critical thinking.

By completing the educational discipline Digital Technologies 1, the student acquires professional digital competencies in the concept of design and creation of impressive non-linear presentations and interactive presentations of educational content implemented through the Prezi Present cloud

platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.

By completing the educational discipline Digital Technologies 1, the student has, last but not least, the competences and digital skills to effectively use the cloud platform Microsoft 365 with an emphasis on software applications Sway, Word and Excel by creating supplementary teaching materials for the needs of school teaching and maintaining the relevant pedagogical documentation. The student masters the basic possibilities of using the online communication platform Microsoft Teams applicable in the implementation of distance learning at the level of regional education

### **Class syllabus:**

The content of the educational discipline Digital Technologies 1 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.

Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.

Application of SMART Notebook software application and SMART Lumio cloud environment in the educational process

# We develop professional digital competences by the ability to effectively use the tools of the SMART Notebook desktop application and the SMART Lumio cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in the lesson in the school classroom or in the home environment in the case of distance/hybrid education;

# We acquire digital skills in working with the SMART response 2 tool supported by the SMART Notebook desktop application and the SMART Lumio cloud environment in the context of creating knowledge questions - selecting one correct answer from multiple answer alternatives, selecting multiple correct answers from multiple answer alternatives, selecting Yes/No answers, free-form questions - in test sessions designed to test the knowledge of pupils of regional education in the Slovak Republic;

# We are mastering the methodology of applying knowledge tests communicated to students through SMART response 2 in the SMART Notebook desktop application and gamification activities supported by the cloud environment SMART Lumio to the process of school teaching of subjects at the lower/upper secondary level of education;

# We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the SMART Board interactive whiteboard.

Topics:

# Basic functions and calibration of the SMART Board interactive touchscreen/tablet; Symptoms, causes and solutions to some of the problems encountered when using the SMART Board interactive touchscreen/tablet; Installing and updating the SMART Notebook desktop application; Creating a teacher's virtual classroom in the SMART platform;

# Creating and editing objects in the SMART Notebook environment; Using basic tools to support the presentation of processed content; Working with multimedia content from the SMART Gallery; Sharing your own content on the SMART Exchange website; Adding links to external educational resources; Adding sound to objects, Animating objects; Using and sharing your own content; Applying graphic content from other software applications - importing and editing objects;

Applying objects from the Lesson Activity Toolkit 2.0; Creating gamification activities in SMART Lab; SMART Response 2 - creating and administering knowledge tests/quizzes;

# Principles of Gamification; Gamification Elements in Educational Content; Some Results of Exact Studies on the Application of Gamification in Education; Application of Gamification in Education in Primary and Secondary Schools; Examples of Gamification Activities Used in the Teaching of Science, Social Studies, Art, Education and Vocational Education.

# Teacher/student login to SMART Lumio cloud platform account; Managing the library of learning activities; Creating gamification activities in SMART Lumio - SMART Lesson Activity Builder (Lab); Editing activities in edit mode; Making activities available to students - delivery mode; Sharing options for gamification activities;

# Setting up and converting a lesson page to a Handout or Workspace activity; Working with predefined graphical activity templates for use in activating student learning, inquiring about student knowledge, or reflecting; Sharing lessons with the created educational materials with students in SMART Lumio.

Within the distance assignment, the student will create a set of interactive learning/quiz activities and digital presentation material for the target group of learners with effective use of the widest possible range of tools, objects, pre-prepared templates, advanced functions, settings and features supported by the SMART Notebook authoring environment in a range of at least 10 presentation pages/activities. In the accompanying document (a separate file of \*.docx format) to the created presentation materials and educational activities stored in \*.notebook format, the student shall indicate the methodology of their inclusion in the educational activities of the target group of pupils.

Within the distance assignment, the student will create a set of 10 gamification educational/quiz activities for the target group of students with effective use of pre-made templates and tools of the SMART Lumio cloud environment. The condition is that each type of gamification activity should only occur once in the created set of activities. In the accompanying document (a separate file of \*.docx format) to the created gamification educational/quiz activities saved by the student, the student shall indicate the methodology of their application in the educational activities of the target group of pupils.

As part of the distance learning assignment, the student will create a 3-page set of pre-prepared content convertible to Handout format activities and a 3-page set of pre-prepared content convertible to Workspace format activities. In the accompanying document (a separate \*.docx file) for the created Handout and Workspace activities stored in the SMART Lumio cloud, the student will indicate the methodology of their application to the educational activities of the target group of students.

Creating and using mind maps in the educational process with the support of digital solutions

# We develop professional digital competences by competence in the design and creation of mind maps through the tools of the software application Mindomo (or FreeMind/XMind), usable in our own educational activities implemented in schools and school facilities for the target group of intact pupils, as well as pupils with special educational needs in order to improve communication skills and critical thinking;

# We are mastering the methodology of applying mind maps communicated to students through Mindomo (or FreeMind/XMind) to the process of school teaching of the subjects of their approbation at primary school / high school;

Topics:

# Explanation of terminology in the field of mind/concept mapping; Desktop/cloud software applications for creating mind maps in the educational process at primary/ secondary schools; Functions and types of mind maps; Principles and principles of creating mind maps; Possibilities of using mind maps in the process of preparation for teaching and directly in the classroom;

Familiarization with the user environment of the Mindomo software application (or FreeMind/XMind);

# Structuring a mind map; Inserting, editing and formatting nodes; Creating and formatting branches; Encrypted node; Editing multi-line nodes; Creating image nodes; Moving/copying nodes and groups of nodes in the map; Inserting annotations to nodes; Linking nodes with local links - independent linking of ideas; Hypertext linking of nodes to external information sources - links in nodes leading to external sources (web) or to local files on the local disk of the computer; Importing content into the mind map; Exporting the map to the output of different formats; Text search in the subnetwork of the current node; Mind maps and their use when working with pupils with SEN.

As part of the distance assignment, the student will design and create one mind map from any thematic area of school subject teaching in primary/elementary school. The focus of the mind map should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school/SHS in the intent of the approbation subjects that the student studies in the teacher education programmes at the Faculty of Education at the Charles University. In the mind map, tools and functions of the Mindomo (or FreeMind/XMind) application environment will be applied in the intent of the complexity of the explained issue. The student will justify in a brief written form the choice of the processed content/topic in the form of a mind map, their functionality and use in his/her educational activities.

Creation of non-linear presentations of educational content through the Prezi presentation platform supporting teacher's interpretation and systematization of students' knowledge

# We acquire professional digital competencies in the concept of design and creation of impressive non-linear presentations of educational content realized through the Prezi Present cloud platform Prezi applicable to our own pedagogical activities;

# We are mastering the methodology of applying the presentation of educational content communicated to pupils through Prezi Present to the process of school teaching of subjects of their approbation at primary school / high school;

Topics:

# Introduction of the software tool Prezi Present as a presentation platform - creation of trendy, effective presentations; Explanation and clarification of the terms used in the field of creating didactic presentations in the environment of Prezi Present; Possibilities of using the presentation application Prezi Present in the preparation and creation of supporting educational materials effectively usable in the teaching of their own subject; Presentation of examples of presentations used in teaching science, social science, art-educational and vocational educational disciplines; Illustrative comparison of differences between classical (Microsoft PowerPoint) and dynamic (Prezi Present) presentations;

# Theoretical background of presentation preparation and the system of selection of presented information; Basic steps of the procedure for creating didactic presentations in Prezi Present; Functionality of the online presentation tool Prezi Present; Creating dynamic presentations in Prezi Present - working with text and graphic objects; Creating topic/subtopic structures, changing the order of topics/subtopics, Creating depth and rotation effects; Inserting additional graphic visuals into a presentation in Prezi Present; Working in edit mode for main topics, subtopics and other presentation content; Creating visual effects and animations of presentation objects;

# Use of templates - change the design - colors, background, fonts; Inserting audio tracks on the background of individual topics/subtopics, the whole presentation; 3D presentations; Importing and editing PowerPoint presentations in Prezi Present; Sharing presentations with other users, sharing on social networks, on web portals; Exporting presentations to \*.pdf and Portable Prezi (for off-line presentation); Export options and presentation size; Working with Prezi Present in off-line mode.

Within the distance assignment, the student will use the Prezi Present presentation tool to create an original didactic and visually engaging presentation of the educational content for the target group

of students. The focus of the presentation should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at the primary school / secondary school in the intent of the approbation subjects that the student is studying in the study programmes of teaching at the Faculty of Education of the Charles University. The presentation will be at least 30 presentation views (= topics at the highest hierarchical level, subtopics at lower hierarchical levels and stack structure pages) to a minimum hierarchical nesting depth of three.

Use of Microsoft 365 platform in teacher's pedagogical activity

# We develop professional digital competencies in the concept of design and creation of responsive presentations with educational content and emphasis on the cloud solution Microsoft Sway usable in educational activities implemented in schools or school facilities;

# We are mastering the methodology of applying the presentation of educational content communicated to pupils through Microsoft Sway to the process of school teaching of subjects of their approbation at primary school / secondary school;

# We hone professional digital skills to include the ability to effectively use a range of form content controls and ActiveX elements of Microsoft Word in the creation of interactive worksheets, tests and supplementary learning materials for pupils or other classroom agenda documents usable in the context of pedagogical activity;

# We are mastering the methodology of applying interactive worksheets communicated to pupils through Microsoft Word to the process of school teaching of subjects of their area of specialization at primary school / high school;

# Develop professional digital skills in the creation of large documents (such as letters, invitations, labels) through a mass correspondence tool usable in the maintenance of relevant pedagogical documentation;

# We develop professional digital skills in the creation of statistical calculations, compound expressions using functions for finding conditional frequency, sum, or arithmetic mean and techniques for addressing continuous and discontinuous areas in expressions/functions usable in the tabular processing of classroom data (student evaluations in knowledge or sports activities) supported by Microsoft Excel;

# We hone professional competencies to include the ability to effectively apply advanced conditions and techniques for conditional formatting of table records using functions;

# We extend digital skills to include the ability to effectively apply an advanced filtering tool to large tabular data by defining compound logical conditions (AND/OR), wildcards (\*, ?), and a Subtotal function usable in maintaining appropriate pedagogical documentation;

# Develop professional digital skills in creating cumulative graphical visualizations of tabulated data in the context of changing attributes of individual chart elements;

# We apply other selected tools of the Microsoft 365 cloud platform, with an emphasis on the Microsoft Teams software application for teachers to use in conducting online learning activities.

Topics:

# A basic theoretical introduction to Microsoft cloud solutions;

# Sway presentation platform - creation of interactive school materials (portfolios), impressive presentations of educational content; Other possibilities of practical use of Microsoft Sway in educational activities; Concept of creating multimedia responsive presentations; Creating a new Sway, creating a Sway by importing an existing file/presentation, creating a Sway based on a template; Articulating presentation content; Options for inserting and formatting supported visuals via tabs; Grouping multimedia content; Influencing the appearance of a presentation; Changing the layout of content; Adapting specific elements to the style of a presentation; Exporting a presentation in \*.pdf/\*.docx; Additional options for setting up the presentation in Sway; Share Sway output from a personal Microsoft account; Share Sway output from an account assigned by the educational organization;

# Editing large text documents in the Microsoft Word environment - standard settings; Using tabs; Text blocks; Columns; Objects in text - equation editor; Tables in text; Editing a document using a style; Creating your own style and editing an existing style. Document Revision. Definition of the terms section and reference and possibilities of their use; Document revision and its use in writing term papers and qualification papers; Document structuring - dividing a document into sections, types of section breaks, page settings in sections, creating a header and footer in a document divided into sections; Possibilities of using a structured document within the agenda of a teaching staff member; Creating references - automatic content creation, content setup, content formatting, numbering figures and tables, creating a list of tables and figures, footnotes and endnotes, cross-references, citations and list of references used, creating a document index; Creating templates - the importance of a template type document. Electronic forms - what are form elements and what is their difference from ActiveX elements, settings of form elements, ActiveX element and its settings, Form security; Application of the acquired experience and skills of working with Microsoft Word text editor in creating documents useful in own pedagogical activities; Creation of large documents - letters, invitations, labels - by means of the tool of mass correspondence useful in the framework of keeping the relevant pedagogical documentation.

# Working with tabular data in Microsoft Excel; Inserting data into cells; Predefined and custom data format; Working with cells - moving, cutting, copying; Bulk filling of data and creating expressions/patterns; Applying elementary functions; Modifying function parameters; Modifying table appearance; Sorting tabular data; Data lists - creating custom lists; Increasing values. Rounding; Absolute and relative cell addressing; Hiding table values; Notes in cells; Working with large data - automatic and extended data filter, Subtotal function; Operations between sheets; Conditional formatting of table data; More advanced functions - If, Count, CountIf, SumIf, SumIfS, AverageIfS; Contingency table; Search functions; Creating forms.

# We get familiar with the Microsoft Teams online communication platform environment; Creating teams; Creating a pure team in MS Teams; Creating teams from an existing team and basic team customization; Creating a team from an Office 365 Group; Setting up and managing teams; Managing team members; Managing teams in bulk; Guest in a Team Class; Invitation from MS Teams; Channels; Cards; Creating your first online lesson; Creating a link to a lesson; Connecting students to an online lesson; Running a lesson with MS Teams; Preparing a lesson outline; Presenting in MS Teams; Tools available during the implementation of an online lesson on the student's/teacher's side (e.g. Conversation panel; Reporting for a word; Downloading a list of participants, etc.); Course notes - notepad; Uploading files with educational content; Creating a shared file for pupils/students in the virtual classroom; Creating a quiz; Quiz evaluation, Quiz setup. Within the distance task, the student will design and create a document in the form of an electronic workbook in Microsoft Word using a template and applying content controls and ActiveX elements - text field, drop-down field, drop-down list, comma field, option button, command button - usable in the context of teaching subjects of his/her area of specialization at primary school / high school. Within the distance task, the student will create a table of fictitious evaluation of pupils in the framework of knowledge or sports activities implemented in schools or school facilities in the range of at least 20 rows and 10 columns, where the functions of the Microsoft Excel spreadsheet application will be used in the context of the complexity of the explained issue.

In a distance task, the student formats a table of fictitious assessment of pupils in knowledge/sport activities, applying various conditions and techniques of conditional formatting of the table entries in the intent of the difficulty of the explained problem.

In the distance task, the student will create three different graphical visualisations of the data from the table of the previous distance task, in which he/she has processed the assessments achieved in the knowledge/sport activities implemented in schools or school facilities. They will add to the

graphical visualisation the title of the graph, the axis names as well as other parameters of the graph as they wish in the context of the readability of the graph.

In the distance task, the student applies an extended filter to the table from the previous distance task to display the student's name and grade attained in the context of the knowledge/sport activities carried out in the school or school facilities and filters to another location within the same worksheet/workbook when defining specific filter conditions (e.g. grade attained below/above a set value, etc.). Within the framework of the distance task, the student will create through the Microsoft Sway application an original, dynamic and visually impressive presentation of the learning issue for the target group of pupils according to his/her own discretion in the intent of school teaching of the subjects of his/her apprenticeship at primary school/elementary school. The aim of the presentation to be realized by the student is to make it multimedia and at the same time attractive for the target group of pupils in terms of content. The scope of the presentation in Microsoft Sway must consist of at least 25 presentation views - cards with the subject content. To organize the presentation, the student should use its layout into sections, subsections and layers in order to increase the clarity of the presented topic for the student

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes and transferable competences:

The aim of the educational discipline Digital Technologies 1 is to develop digital skills of students of teacher-oriented study programmes at the Faculty of Education of the Charles University (hereinafter referred to as the Faculty of Education of the Charles University) to be able to effectively use an appropriate range of didactic software applications in the context of the concept of design and creation of interactive educational activities, knowledge quizzes and assignments, electronic portfolios, impressive didactic presentations, new interactive forms of teaching material and other pedagogical/school documentation usable in the intent of their future teaching profession at different levels of regional education in the Slovak Republic.

By completing the educational discipline Digital Technologies 1, the student has the competences and digital skills to effectively use the tools of the SMART Notebook software application and the SMART Lumio cloud environment by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.

By completing the educational discipline, the student also has the competences and digital skills in the field of design and creation of mind maps through the tools of the Mindomo software application (or FreeMind, XMind) applicable in educational activities implemented in schools and educational institutions for the target group of intact pupils, as well as pupils with special educational needs in order to improve their communication skills and critical thinking.

By completing the educational discipline Digital Technologies 1, the student acquires professional digital competencies in the concept of design and creation of impressive non-linear presentations and interactive presentations of educational content implemented through the Prezi Present cloud

platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.

By completing the educational discipline Digital Technologies 1, the student has, last but not least, the competences and digital skills to effectively use the cloud platform Microsoft 365 with an emphasis on software applications Sway, Word and Excel by creating supplementary teaching materials for the needs of school teaching and maintaining the relevant pedagogical documentation. The student masters the basic possibilities of using the online communication platform Microsoft Teams applicable in the implementation of distance learning at the level of regional education

### **Class syllabus:**

The content of the educational discipline Digital Technologies 1 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.

Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.

Application of SMART Notebook software application and SMART Lumio cloud environment in the educational process

# We develop professional digital competences by the ability to effectively use the tools of the SMART Notebook desktop application and the SMART Lumio cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in the lesson in the school classroom or in the home environment in the case of distance/hybrid education;

# We acquire digital skills in working with the SMART response 2 tool supported by the SMART Notebook desktop application and the SMART Lumio cloud environment in the context of creating knowledge questions - selecting one correct answer from multiple answer alternatives, selecting multiple correct answers from multiple answer alternatives, selecting Yes/No answers, free-form questions - in test sessions designed to test the knowledge of pupils of regional education in the Slovak Republic;

# We are mastering the methodology of applying knowledge tests communicated to students through SMART response 2 in the SMART Notebook desktop application and gamification activities supported by the cloud environment SMART Lumio to the process of school teaching of subjects at the lower/upper secondary level of education;

# We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the SMART Board interactive whiteboard.

Topics:

# Basic functions and calibration of the SMART Board interactive touchscreen/tablet; Symptoms, causes and solutions to some of the problems encountered when using the SMART Board interactive touchscreen/tablet; Installing and updating the SMART Notebook desktop application; Creating a teacher's virtual classroom in the SMART platform;

# Creating and editing objects in the SMART Notebook environment; Using basic tools to support the presentation of processed content; Working with multimedia content from the SMART Gallery; Sharing your own content on the SMART Exchange website; Adding links to external educational resources; Adding sound to objects, Animating objects; Using and sharing your own content; Applying graphic content from other software applications - importing and editing objects;

Applying objects from the Lesson Activity Toolkit 2.0; Creating gamification activities in SMART Lab; SMART Response 2 - creating and administering knowledge tests/quizzes;

# Principles of Gamification; Gamification Elements in Educational Content; Some Results of Exact Studies on the Application of Gamification in Education; Application of Gamification in Education in Primary and Secondary Schools; Examples of Gamification Activities Used in the Teaching of Science, Social Studies, Art, Education and Vocational Education.

# Teacher/student login to SMART Lumio cloud platform account; Managing the library of learning activities; Creating gamification activities in SMART Lumio - SMART Lesson Activity Builder (Lab); Editing activities in edit mode; Making activities available to students - delivery mode; Sharing options for gamification activities;

# Setting up and converting a lesson page to a Handout or Workspace activity; Working with predefined graphical activity templates for use in activating student learning, inquiring about student knowledge, or reflecting; Sharing lessons with the created educational materials with students in SMART Lumio.

Within the distance assignment, the student will create a set of interactive learning/quiz activities and digital presentation material for the target group of learners with effective use of the widest possible range of tools, objects, pre-prepared templates, advanced functions, settings and features supported by the SMART Notebook authoring environment in a range of at least 10 presentation pages/activities. In the accompanying document (a separate file of \*.docx format) to the created presentation materials and educational activities stored in \*.notebook format, the student shall indicate the methodology of their inclusion in the educational activities of the target group of pupils.

Within the distance assignment, the student will create a set of 10 gamification educational/quiz activities for the target group of students with effective use of pre-made templates and tools of the SMART Lumio cloud environment. The condition is that each type of gamification activity should only occur once in the created set of activities. In the accompanying document (a separate file of \*.docx format) to the created gamification educational/quiz activities saved by the student, the student shall indicate the methodology of their application in the educational activities of the target group of pupils.

As part of the distance learning assignment, the student will create a 3-page set of pre-prepared content convertible to Handout format activities and a 3-page set of pre-prepared content convertible to Workspace format activities. In the accompanying document (a separate \*.docx file) for the created Handout and Workspace activities stored in the SMART Lumio cloud, the student will indicate the methodology of their application to the educational activities of the target group of students.

Creating and using mind maps in the educational process with the support of digital solutions

# We develop professional digital competences by competence in the design and creation of mind maps through the tools of the software application Mindomo (or FreeMind/XMind), usable in our own educational activities implemented in schools and school facilities for the target group of intact pupils, as well as pupils with special educational needs in order to improve communication skills and critical thinking;

# We are mastering the methodology of applying mind maps communicated to students through Mindomo (or FreeMind/XMind) to the process of school teaching of the subjects of their approbation at primary school / high school;

Topics:

# Explanation of terminology in the field of mind/concept mapping; Desktop/cloud software applications for creating mind maps in the educational process at primary/ secondary schools; Functions and types of mind maps; Principles and principles of creating mind maps; Possibilities of using mind maps in the process of preparation for teaching and directly in the classroom;

Familiarization with the user environment of the Mindomo software application (or FreeMind/XMind);

# Structuring a mind map; Inserting, editing and formatting nodes; Creating and formatting branches; Encrypted node; Editing multi-line nodes; Creating image nodes; Moving/copying nodes and groups of nodes in the map; Inserting annotations to nodes; Linking nodes with local links - independent linking of ideas; Hypertext linking of nodes to external information sources - links in nodes leading to external sources (web) or to local files on the local disk of the computer; Importing content into the mind map; Exporting the map to the output of different formats; Text search in the subnetwork of the current node; Mind maps and their use when working with pupils with SEN.

As part of the distance assignment, the student will design and create one mind map from any thematic area of school subject teaching in primary/elementary school. The focus of the mind map should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school/SHS in the intent of the approbation subjects that the student studies in the teacher education programmes at the Faculty of Education at the Charles University. In the mind map, tools and functions of the Mindomo (or FreeMind/XMind) application environment will be applied in the intent of the complexity of the explained issue. The student will justify in a brief written form the choice of the processed content/topic in the form of a mind map, their functionality and use in his/her educational activities.

Creation of non-linear presentations of educational content through the Prezi presentation platform supporting teacher's interpretation and systematization of students' knowledge

# We acquire professional digital competencies in the concept of design and creation of impressive non-linear presentations of educational content realized through the Prezi Present cloud platform Prezi applicable to our own pedagogical activities;

# We are mastering the methodology of applying the presentation of educational content communicated to pupils through Prezi Present to the process of school teaching of subjects of their approbation at primary school / high school;

Topics:

# Introduction of the software tool Prezi Present as a presentation platform - creation of trendy, effective presentations; Explanation and clarification of the terms used in the field of creating didactic presentations in the environment of Prezi Present; Possibilities of using the presentation application Prezi Present in the preparation and creation of supporting educational materials effectively usable in the teaching of their own subject; Presentation of examples of presentations used in teaching science, social science, art-educational and vocational educational disciplines; Illustrative comparison of differences between classical (Microsoft PowerPoint) and dynamic (Prezi Present) presentations;

# Theoretical background of presentation preparation and the system of selection of presented information; Basic steps of the procedure for creating didactic presentations in Prezi Present; Functionality of the online presentation tool Prezi Present; Creating dynamic presentations in Prezi Present - working with text and graphic objects; Creating topic/subtopic structures, changing the order of topics/subtopics, Creating depth and rotation effects; Inserting additional graphic visuals into a presentation in Prezi Present; Working in edit mode for main topics, subtopics and other presentation content; Creating visual effects and animations of presentation objects;

# Use of templates - change the design - colors, background, fonts; Inserting audio tracks on the background of individual topics/subtopics, the whole presentation; 3D presentations; Importing and editing PowerPoint presentations in Prezi Present; Sharing presentations with other users, sharing on social networks, on web portals; Exporting presentations to \*.pdf and Portable Prezi (for off-line presentation); Export options and presentation size; Working with Prezi Present in off-line mode.

Within the distance assignment, the student will use the Prezi Present presentation tool to create an original didactic and visually engaging presentation of the educational content for the target group

of students. The focus of the presentation should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at the primary school / secondary school in the intent of the approbation subjects that the student is studying in the study programmes of teaching at the Faculty of Education of the Charles University. The presentation will be at least 30 presentation views (= topics at the highest hierarchical level, subtopics at lower hierarchical levels and stack structure pages) to a minimum hierarchical nesting depth of three.

Use of Microsoft 365 platform in teacher's pedagogical activity

# We develop professional digital competencies in the concept of design and creation of responsive presentations with educational content and emphasis on the cloud solution Microsoft Sway usable in educational activities implemented in schools or school facilities;

# We are mastering the methodology of applying the presentation of educational content communicated to pupils through Microsoft Sway to the process of school teaching of subjects of their approbation at primary school / secondary school;

# We hone professional digital skills to include the ability to effectively use a range of form content controls and ActiveX elements of Microsoft Word in the creation of interactive worksheets, tests and supplementary learning materials for pupils or other classroom agenda documents usable in the context of pedagogical activity;

# We are mastering the methodology of applying interactive worksheets communicated to pupils through Microsoft Word to the process of school teaching of subjects of their area of specialization at primary school / high school;

# Develop professional digital skills in the creation of large documents (such as letters, invitations, labels) through a mass correspondence tool usable in the maintenance of relevant pedagogical documentation;

# We develop professional digital skills in the creation of statistical calculations, compound expressions using functions for finding conditional frequency, sum, or arithmetic mean and techniques for addressing continuous and discontinuous areas in expressions/functions usable in the tabular processing of classroom data (student evaluations in knowledge or sports activities) supported by Microsoft Excel;

# We hone professional competencies to include the ability to effectively apply advanced conditions and techniques for conditional formatting of table records using functions;

# We extend digital skills to include the ability to effectively apply an advanced filtering tool to large tabular data by defining compound logical conditions (AND/OR), wildcards (\*, ?), and a Subtotal function usable in maintaining appropriate pedagogical documentation;

# Develop professional digital skills in creating cumulative graphical visualizations of tabulated data in the context of changing attributes of individual chart elements;

# We apply other selected tools of the Microsoft 365 cloud platform, with an emphasis on the Microsoft Teams software application for teachers to use in conducting online learning activities.

Topics:

# A basic theoretical introduction to Microsoft cloud solutions;

# Sway presentation platform - creation of interactive school materials (portfolios), impressive presentations of educational content; Other possibilities of practical use of Microsoft Sway in educational activities; Concept of creating multimedia responsive presentations; Creating a new Sway, creating a Sway by importing an existing file/presentation, creating a Sway based on a template; Articulating presentation content; Options for inserting and formatting supported visuals via tabs; Grouping multimedia content; Influencing the appearance of a presentation; Changing the layout of content; Adapting specific elements to the style of a presentation; Exporting a presentation in \*.pdf/\*.docx; Additional options for setting up the presentation in Sway; Share Sway output from a personal Microsoft account; Share Sway output from an account assigned by the educational organization;

# Editing large text documents in the Microsoft Word environment - standard settings; Using tabs; Text blocks; Columns; Objects in text - equation editor; Tables in text; Editing a document using a style; Creating your own style and editing an existing style. Document Revision. Definition of the terms section and reference and possibilities of their use; Document revision and its use in writing term papers and qualification papers; Document structuring - dividing a document into sections, types of section breaks, page settings in sections, creating a header and footer in a document divided into sections; Possibilities of using a structured document within the agenda of a teaching staff member; Creating references - automatic content creation, content setup, content formatting, numbering figures and tables, creating a list of tables and figures, footnotes and endnotes, cross-references, citations and list of references used, creating a document index; Creating templates - the importance of a template type document. Electronic forms - what are form elements and what is their difference from ActiveX elements, settings of form elements, ActiveX element and its settings, Form security; Application of the acquired experience and skills of working with Microsoft Word text editor in creating documents useful in own pedagogical activities; Creation of large documents - letters, invitations, labels - by means of the tool of mass correspondence useful in the framework of keeping the relevant pedagogical documentation.

# Working with tabular data in Microsoft Excel; Inserting data into cells; Predefined and custom data format; Working with cells - moving, cutting, copying; Bulk filling of data and creating expressions/patterns; Applying elementary functions; Modifying function parameters; Modifying table appearance; Sorting tabular data; Data lists - creating custom lists; Increasing values. Rounding; Absolute and relative cell addressing; Hiding table values; Notes in cells; Working with large data - automatic and extended data filter, Subtotal function; Operations between sheets; Conditional formatting of table data; More advanced functions - If, Count, CountIf, SumIf, SumIfS, AverageIfS; Contingency table; Search functions; Creating forms.

# We get familiar with the Microsoft Teams online communication platform environment; Creating teams; Creating a pure team in MS Teams; Creating teams from an existing team and basic team customization; Creating a team from an Office 365 Group; Setting up and managing teams; Managing team members; Managing teams in bulk; Guest in a Team Class; Invitation from MS Teams; Channels; Cards; Creating your first online lesson; Creating a link to a lesson; Connecting students to an online lesson; Running a lesson with MS Teams; Preparing a lesson outline; Presenting in MS Teams; Tools available during the implementation of an online lesson on the student's/teacher's side (e.g. Conversation panel; Reporting for a word; Downloading a list of participants, etc.); Course notes - notepad; Uploading files with educational content; Creating a shared file for pupils/students in the virtual classroom; Creating a quiz; Quiz evaluation, Quiz setup. Within the distance task, the student will design and create a document in the form of an electronic workbook in Microsoft Word using a template and applying content controls and ActiveX elements - text field, drop-down field, drop-down list, comma field, option button, command button - usable in the context of teaching subjects of his/her area of specialization at primary school / high school. Within the distance task, the student will create a table of fictitious evaluation of pupils in the framework of knowledge or sports activities implemented in schools or school facilities in the range of at least 20 rows and 10 columns, where the functions of the Microsoft Excel spreadsheet application will be used in the context of the complexity of the explained issue.

In a distance task, the student formats a table of fictitious assessment of pupils in knowledge/sport activities, applying various conditions and techniques of conditional formatting of the table entries in the intent of the difficulty of the explained problem.

In the distance task, the student will create three different graphical visualisations of the data from the table of the previous distance task, in which he/she has processed the assessments achieved in the knowledge/sport activities implemented in schools or school facilities. They will add to the

graphical visualisation the title of the graph, the axis names as well as other parameters of the graph as they wish in the context of the readability of the graph.

In the distance task, the student applies an extended filter to the table from the previous distance task to display the student's name and grade attained in the context of the knowledge/sport activities carried out in the school or school facilities and filters to another location within the same worksheet/workbook when defining specific filter conditions (e.g. grade attained below/above a set value, etc.).

Within the framework of the distance task, the student will create through the Microsoft Sway application an original, dynamic and visually impressive presentation of the learning issue for the target group of pupils according to his/her own discretion in the intent of school teaching of the subjects of his/her apprenticeship at primary school/elementary school. The aim of the presentation to be realized by the student is to make it multimedia and at the same time attractive for the target group of pupils in terms of content. The scope of the presentation in Microsoft Sway must consist of at least 25 presentation views - cards with the subject content. To organize the presentation, the student should use its layout into sections, subsections and layers in order to increase the clarity of the presented topic for the student

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde012/22  | <b>Course title:</b><br>Digital technologies 2 |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 2., 4., 6.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b> PdF.KPg/B-VUZde002/22 - Digital technologies 1  |  |
| <b>Course requirements:</b><br>Prerequisites: B-VUZde002 / Digital technologies 1<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment (100% of the interim assessment).<br># active participation in seminars conducted by both face-to-face and distance learning methods;<br># processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;<br># development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Video an original and visually impressive video presentation of the educational content of the selected teaching subject at primary school / secondary school in the context of the subjects that the student studies in the study programs of teaching at the Faculty of Education of Charles University; The structure of the video presentation should be based on the presentation created in the Prezi Present software application; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defence of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required)<br>For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation |  |

in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 70/30

### **Learning outcomes:**

Learning outcomes and transferable competences:

The aim of the educational discipline Digital Technologies 2 is to develop digital skills in the field of work with selected software (desktop and cloud) didactic applications and to be able to apply them effectively in the context of their future teaching profession.

By completing the educational discipline Digital Technologies 2, the student has the competences and advanced digital skills to effectively use the tools of the software application ActivInspire and the cloud environment ClassFlow by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.

By completing the educational discipline Digital Technologies 2, the student acquires advanced professional digital competences in the concept of design and creation of interactive video presentations of educational content implemented through Prezi Present and Prezi Video cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.

By completing the educational discipline, the student acquires competence and advanced digital skills in the concept of design, creation and administration of (gamification) quiz and educational activities and knowledge games with dynamic elements created through the cloud tool Socrative 2.0, Kahoot!, Wizer.me and Google Forms usable in own educational activities implemented in schools and school facilities for the target group of intact pupils as well as pupils with special educational needs.

By completing the educational discipline Digital Technologies 2, the student has, last but not least, competencies and advanced digital skills in the field of vector graphic creation in the environment of the cloud application Prezi Design in the implementation of the work activities of a pedagogical employee of regional education or his/her own professional development.

**Class syllabus:**

Brief outline of the course

The content of the educational discipline Digital Technologies 2 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area. content structure of the discipline can be adapted to the current requirements of practice and students.

Application of ActivInspire software application and ClassFlow cloud environment in the educational process

# We master the principle and methodology of working with selected (Promethean World Ltd) digital didactic resources designed to support interactive teaching of subjects of its approbation in primary and secondary schools;

# We develop professional digital competences by the ability to effectively use the software tools of the ActivInspire desktop application and the ClassFlow cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in a lesson in the school classroom or in home conditions in the case of distance/hybrid education; In the context of the above activity, the trainee is also expected to learn the methodology for applying the activities developed in the school classroom;

# We gain knowledge about desktop digital voting solutions and (trendy) cloud-based applications for creating knowledge tests/quizzes currently available on the market as an interactive didactic means of teaching, advantages and disadvantages of their deployment in the teaching process in the field of regional education;

# We acquire digital skills in creating, editing and administering knowledge tests through voting sessions and supported by the ActivInspire software application and ActivExpression2 digital voting device to stimulate pupil activation and attention in the classroom; We use the ExpressPoll voting session; we use the question creation wizard to create test activities in the teacher stimulation; we implement the work with the question set wizard for processing at the pupil's own pace (voting session in the pupil stimulation) in the teaching of the subjects of his/her apprenticeship;

# We are mastering the methodology of applying the knowledge tests communicated to pupils through the ActivInspire application and the ActivExpression2 digital voting device to the process of school teaching of the subjects of their approbation in primary/ secondary schools;

# Develop skills in statistically processing the results of whole group voting activities into the ActivInspire demonstration workbook, as well as exporting them to Microsoft Excel;

# We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the ActivBoard interactive whiteboard.

Topics:

# Design of demonstration workbooks - options for setting up and customizing the ActivInspire work environment; Main toolbar - demonstration for familiarizing yourself with the most commonly used tools - ideas for their use in the creation of interactive educational content; Annotation mode on the desktop; Browsers in ActivInspire; Export/Import (\*.flipchart) of demonstration workbooks; Teacher-student collaboration on the whiteboard - dual user mode;

# Adding additional graphical content to the ActivInspire demonstration workbook; Importing and exporting asset packages; Defining object properties; Using layers and layering: Blind Map, Magic Tunnel, Magic Ink - ideas for using them when designing educational activities aimed at the target

group of students; Adding and removing links to linked external files/internet resources; Creating and using grid features when designing educational activities; Creating interactive demonstration workbooks - creating containers; Working with actions; Suggestions for their use of selected actions in the creation of interactive materials usable in the educational process; Benefits of using profiles; Annotating the desktop; Using desktop tools; Working in dual user mode; Using mathematical and design tools; Demonstrations of the use of mathematical and design tools in the creation of interactive materials usable in the educational process;

# We extend professional digital competencies with the ability to effectively apply gamification educational activities through predefined templates - Sorting into categories, Crossword, Learning Cards, Assigning and Sorting items and other templates supported by the cloud-based ClassFlow application;

# Current trends in the application of digital voting solutions for education; Technological principle of digital voting systems; Possibilities of using digital voting systems in school teaching in primary schools / elementary schools ; Methodology of working with digital voting systems; Digital voting solutions - effective support of group cooperation in classrooms stimulating the learning process;

# We use the ActivExpression2 digital voting system in the classroom; Components of an intelligent digital voting solution; Registration of ActivExpression2 voting devices in ActivInspire; Voting Browser; Types of voting sessions and test questions supported by the ActivInspire software application and ActivExpression2 voting device; Working with voting session results in ActivInspire - viewing results in different formats; Exporting results from ExpressPoll from prepared questions and from a set of self-paced questions to Microsoft Excel; Suggestions for educational activities and games using ActivExpression2 voting devices to promote student activation and attention in the classroom.

Within the framework of the distance assignment, the student in the ActivInspire environment will develop a set of engaging learning activities, knowledge games, engaging presentations of educational content as new interactive forms of learning material supporting the activation and attention of students in the classroom. In conceptualising the design and development of the task, the learner will make use of as wide a range of available tools, functions, actions and features as possible. Within a developed demonstration workbook of at least 6 pages, the student will be expected to primarily use the container activity, magic ink, magic tunnel, set actions and constraints on objects, and apply the presentation tools of the ActivInspire environment. In the accompanying document (a separate file of \*.docx format) to the created presentation materials and educational activities stored in \*.flipchart format, the student will indicate the methodology of their inclusion in the educational activities of the target group of pupils.

Within the distance assignment, the student will create a set of 10 gamification educational activities for the target group of students with the effective use of pre-prepared templates and tools of the ClassFlow cloud environment. In the accompanying document (a separate file of \*.docx format) to the created gamification activities, the student will include the methodology of their integration into the educational activities of the target group of pupils.

Within the framework of the distance task, the student will create, through the ClassFlow cloud environment, a test activity conceived from 20 test questions of supported types with the potential possibility of its use in the teaching of the subjects of his/her apprenticeship to pupils at primary school / secondary school.

We create video presentations of educational content through the cloud application Prezi Video

# We develop professional digital competencies in the design and creation of compelling non-linear video presentations of educational content realized through Prezi Present and Prezi Video cloud platform Prezi by expressing visual ideas applicable to our own pedagogical activities;

# We are mastering the methodology of applying video presentation of educational content communicated to pupils through Prezi Video to the process of school teaching of subjects of its approbation at primary school / high school;

# We innovate didactic approaches to educational activities implemented in schools or educational institutions through immersive non-linear video presentations created in the cloud platform Prezi.

Topics:

# We create a video presentation in the Prezi Video online editor environment from scratch using the Quick record tool - selecting a suitable template, inserting text content and other graphic visuals; supplementing the video presentation with a recording of your own image and sound;

# We create a video presentation in the Prezi Video online editor environment by offering reusable videos recorded by other Prezi Video users;

# Creating a video presentation based on a Prezi Present; Adding an accompanying commentary; Adding a video with accompanying commentary.

Within the distance assignment, the student will create an original didactic and visually engaging video presentation of educational content of his/her choice for the target group of pupils, using the Prezi cloud platform (Prezi Present and Prezi Video), in a range of at least 20 presentation views, usable in teaching the subjects of his/her specialisation at primary school/junior high school.

# We use selected Web 2.0 software tools to obtain feedback from students participating in the school teaching process, in the case of students enrolled in distance (online) learning;

# We are expanding the knowledge framework in the field of application of gamification (game-based learning) as one of the innovative and activating methods applied in the educational process at the primary school level;

# We are expanding digital skills to include the ability to effectively use Socrative 2.0, a cloud-based application designed to create and manage knowledge/quiz activities in order to get immediate feedback from students participating in a lesson in the classroom or at home in the case of distance/hybrid learning;

# We are mastering the methodology of applying knowledge/quiz activities communicated to students through Socrative 2.0 to the process of school teaching of subjects of their area of interest in primary schools;

# We extend professional digital competences with the ability to create gamification quiz activities and knowledge games through the online platform Kahoot! into the school learning process in a fun and playful way - transforming traditional knowledge testing through quizzes in an activating form using digital means;

# We acquire competencies in the application of the application methodology, in the Kahoot! author-prepared, gamified educational and quiz activities to the process of school teaching of subjects of their approbation in primary school / secondary school;

# We develop digital competences by the ability to effectively use the cloud tool Wizer.me for creating multimedia online worksheets with educational content for the target group of primary school pupils;

# We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Wizer.me to the process of school teaching of subjects of their approbation in primary school / secondary school;

# We master the principle and methodology of working with the cloud application Google Forms designed for the creation of online knowledge tests and research tools usable in the context of pedagogical activities;

Topics:

# Socrative.com - a web-based tool for online testing of student knowledge; Free registration vs. benefits of paid registration for teachers; Creating a teacher/student account; Test administration panel in Socrative 2.0 - Creating a new test - question types for creating your own tests - multiple

choice, yes/no and short open answer; Managing teacher-created tests; Creating a copy of a test - a variant for a parallel group with slightly different questions; Deleting a test; Downloading a test to a document in \*.pdf; Editing the created test; Importing a test from another teacher - sharing tests between teachers; Access to the results of all (already) completed tests; Modes of making the test available to pupils - immediate feedback: Instant Feedback; Teacher-controlled test; Selecting the ways of displaying the results; Defining the appearance of the test results - a general overview of all pupils with statistics of pupil's success and questions; Separate \*.Separate pdf files for each pupil; Success statistics for each test question; Practical examples of administered tests in the Socrative 2.0 environment for different educational disciplines and learning topics;

# For the sake of brevity, the thematic focus of Kahoot! is analogous in content to the Socrative 2.0 application;

# Cloud Computing; Google Drive; Viewing Google Docs options; Description of the Google Forms environment - Questions tab; Creating a form; Editing the appearance of the form; Setting up the form as a quiz; Evaluating the data obtained from the form administration - Answers tab; Sending the form to respondents; Setting up Google Form sharing - in Google Drive and in the Google Forms editor; Setting up Google Form sharing for a user with an un-created Google account. As part of the distance task, the student will create a knowledge test with ten multiple choice questions, ten yes/no questions and ten short free-form questions using the online software application Socrative. The focus of the knowledge test should be situated in a curricular issue of the student's choice falling within the educational content of the subject taught at primary/ secondary school, in the context of the subjects of interest that the student is studying in the teacher education programmes at PdF UK. The knowledge test defined in this way will be implemented by the student among his/her classmates in his/her educational group. As part of the distance assignment, the student will create a software application Kahoot! test activity made up of 20 knowledge questions of supported types. The focus of the test activity should be situated in a teaching issue of his/her own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student studies in the study programs of teaching at the Faculty of Education of the Charles University. The test activity defined in this way will be implemented by the student among the classmates of his/her educational group.

Within the distance assignment, the student will design and create an engaging multimedia worksheet with educational content for the target group of pupils in primary school / secondary school in the environment of the cloud tool Wizer.me; To the created digital graphic output (in a separate file format \*.docx), the student will provide a methodology for its inclusion in the educational activities of the target group of pupils.

As part of the distance learning assignment, the student will create a knowledge quiz activity with a minimum of 15 questions of supported types via the Google Forms cloud application. The focus of the knowledge quiz should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at PdF UK. The knowledge quiz defined in this way will be implemented by the student among the classmates of his/her educational group.

Creation of digital graphic outputs in the environment of selected cloud applications

# Acquire digital competences by the ability to effectively use the Prezi Design cloud tool of the Prezi cloud platform to create multimedia posters with educational content intended for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;

# We develop digital competences by the ability to effectively use the cloud tool Glogster (edu.Glogster.com) for digital storytelling - creating engaging multimedia posters with educational content - designed for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;

# We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Prezi Design and Glogster to the school teaching of subjects that the student studies in the study programs of teaching at the Faculty of Education at Charles University.

Topics:

# Prezi Design as a comprehensive graphic design and data visualization tool; Template library; Creating and editing content by adding multimedia items in the editor; Adding, moving and layering objects; Using \*.ppt, \*.pdf and \*.doc in Prezi Design; Implementing animated elements into the graphic content you create; Creating visual effects to images by applying masks and filters; Adding links to text objects, graphics and shapes; Multi-page design; Linking text, images, icons and shapes to pages and sections; Sharing content created in Prezi Design with your audience on social media using private or public links; Collaborating in the Prezi Design environment; Adding/removing collaborators; Adding an entire team of collaborators; Collaborating in real time;

# Creating and editing engaging data visualizations using maps; Creating a social post - adding and editing content, adding animation to the content of the post being created; Downloading and sharing the created content for publishing purposes;

# Creating infographics for visual representation of information and data, Adding and editing content; Creating gif and mp4 videos in the Prezi Design environment; Embedding videos from Prezi Video into Prezi Design; Adding videos to Prezi Design and editing settings; Media integrations in Prezi Design - adding content from Prezi Video to projects.

Within the distance task, the student will design and create in the cloud tool Prezi Design an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects, which the student studies in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format \*.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.

Within the distance task, the student will design and create in the cloud tool edu.Glogster an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format \*.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde012/22  | <b>Course title:</b><br>Digital technologies 2 |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 3., 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b> PdF.KPg/B-VUZde002/22 - Digital technologies 1  |  |
| <b>Course requirements:</b><br>Prerequisites: B-VUZde002 / Digital technologies 1<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment (100% of the interim assessment).<br># active participation in seminars conducted by both face-to-face and distance learning methods;<br># processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;<br># development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Video an original and visually impressive video presentation of the educational content of the selected teaching subject at primary school / secondary school in the context of the subjects that the student studies in the study programs of teaching at the Faculty of Education of Charles University; The structure of the video presentation should be based on the presentation created in the Prezi Present software application; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defence of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required)<br>For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation |  |

in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 70/30

### **Learning outcomes:**

Learning outcomes and transferable competences:

The aim of the educational discipline Digital Technologies 2 is to develop digital skills in the field of work with selected software (desktop and cloud) didactic applications and to be able to apply them effectively in the context of their future teaching profession.

By completing the educational discipline Digital Technologies 2, the student has the competences and advanced digital skills to effectively use the tools of the software application ActivInspire and the cloud environment ClassFlow by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.

By completing the educational discipline Digital Technologies 2, the student acquires advanced professional digital competences in the concept of design and creation of interactive video presentations of educational content implemented through Prezi Present and Prezi Video cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.

By completing the educational discipline, the student acquires competence and advanced digital skills in the concept of design, creation and administration of (gamification) quiz and educational activities and knowledge games with dynamic elements created through the cloud tool Socrative 2.0, Kahoot!, Wizer.me and Google Forms usable in own educational activities implemented in schools and school facilities for the target group of intact pupils as well as pupils with special educational needs.

By completing the educational discipline Digital Technologies 2, the student has, last but not least, competencies and advanced digital skills in the field of vector graphic creation in the environment of the cloud application Prezi Design in the implementation of the work activities of a pedagogical employee of regional education or his/her own professional development.

**Class syllabus:**

Brief outline of the course

The content of the educational discipline Digital Technologies 2 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area. content structure of the discipline can be adapted to the current requirements of practice and students.

Application of ActivInspire software application and ClassFlow cloud environment in the educational process

# We master the principle and methodology of working with selected (Promethean World Ltd) digital didactic resources designed to support interactive teaching of subjects of its approbation in primary and secondary schools;

# We develop professional digital competences by the ability to effectively use the software tools of the ActivInspire desktop application and the ClassFlow cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in a lesson in the school classroom or in home conditions in the case of distance/hybrid education; In the context of the above activity, the trainee is also expected to learn the methodology for applying the activities developed in the school classroom;

# We gain knowledge about desktop digital voting solutions and (trendy) cloud-based applications for creating knowledge tests/quizzes currently available on the market as an interactive didactic means of teaching, advantages and disadvantages of their deployment in the teaching process in the field of regional education;

# We acquire digital skills in creating, editing and administering knowledge tests through voting sessions and supported by the ActivInspire software application and ActivExpression2 digital voting device to stimulate pupil activation and attention in the classroom; We use the ExpressPoll voting session; we use the question creation wizard to create test activities in the teacher stimulation; we implement the work with the question set wizard for processing at the pupil's own pace (voting session in the pupil stimulation) in the teaching of the subjects of his/her apprenticeship;

# We are mastering the methodology of applying the knowledge tests communicated to pupils through the ActivInspire application and the ActivExpression2 digital voting device to the process of school teaching of the subjects of their approbation in primary/ secondary schools;

# Develop skills in statistically processing the results of whole group voting activities into the ActivInspire demonstration workbook, as well as exporting them to Microsoft Excel;

# We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the ActivBoard interactive whiteboard.

Topics:

# Design of demonstration workbooks - options for setting up and customizing the ActivInspire work environment; Main toolbar - demonstration for familiarizing yourself with the most commonly used tools - ideas for their use in the creation of interactive educational content; Annotation mode on the desktop; Browsers in ActivInspire; Export/Import (\*.flipchart) of demonstration workbooks; Teacher-student collaboration on the whiteboard - dual user mode;

# Adding additional graphical content to the ActivInspire demonstration workbook; Importing and exporting asset packages; Defining object properties; Using layers and layering: Blind Map, Magic Tunnel, Magic Ink - ideas for using them when designing educational activities aimed at the target

group of students; Adding and removing links to linked external files/internet resources; Creating and using grid features when designing educational activities; Creating interactive demonstration workbooks - creating containers; Working with actions; Suggestions for their use of selected actions in the creation of interactive materials usable in the educational process; Benefits of using profiles; Annotating the desktop; Using desktop tools; Working in dual user mode; Using mathematical and design tools; Demonstrations of the use of mathematical and design tools in the creation of interactive materials usable in the educational process;

# We extend professional digital competencies with the ability to effectively apply gamification educational activities through predefined templates - Sorting into categories, Crossword, Learning Cards, Assigning and Sorting items and other templates supported by the cloud-based ClassFlow application;

# Current trends in the application of digital voting solutions for education; Technological principle of digital voting systems; Possibilities of using digital voting systems in school teaching in primary schools / elementary schools ; Methodology of working with digital voting systems; Digital voting solutions - effective support of group cooperation in classrooms stimulating the learning process;

# We use the ActivExpression2 digital voting system in the classroom; Components of an intelligent digital voting solution; Registration of ActivExpression2 voting devices in ActivInspire; Voting Browser; Types of voting sessions and test questions supported by the ActivInspire software application and ActivExpression2 voting device; Working with voting session results in ActivInspire - viewing results in different formats; Exporting results from ExpressPoll from prepared questions and from a set of self-paced questions to Microsoft Excel; Suggestions for educational activities and games using ActivExpression2 voting devices to promote student activation and attention in the classroom.

Within the framework of the distance assignment, the student in the ActivInspire environment will develop a set of engaging learning activities, knowledge games, engaging presentations of educational content as new interactive forms of learning material supporting the activation and attention of students in the classroom. In conceptualising the design and development of the task, the learner will make use of as wide a range of available tools, functions, actions and features as possible. Within a developed demonstration workbook of at least 6 pages, the student will be expected to primarily use the container activity, magic ink, magic tunnel, set actions and constraints on objects, and apply the presentation tools of the ActivInspire environment. In the accompanying document (a separate file of \*.docx format) to the created presentation materials and educational activities stored in \*.flipchart format, the student will indicate the methodology of their inclusion in the educational activities of the target group of pupils.

Within the distance assignment, the student will create a set of 10 gamification educational activities for the target group of students with the effective use of pre-prepared templates and tools of the ClassFlow cloud environment. In the accompanying document (a separate file of \*.docx format) to the created gamification activities, the student will include the methodology of their integration into the educational activities of the target group of pupils.

Within the framework of the distance task, the student will create, through the ClassFlow cloud environment, a test activity conceived from 20 test questions of supported types with the potential possibility of its use in the teaching of the subjects of his/her apprenticeship to pupils at primary school / secondary school.

We create video presentations of educational content through the cloud application Prezi Video

# We develop professional digital competencies in the design and creation of compelling non-linear video presentations of educational content realized through Prezi Present and Prezi Video cloud platform Prezi by expressing visual ideas applicable to our own pedagogical activities;

# We are mastering the methodology of applying video presentation of educational content communicated to pupils through Prezi Video to the process of school teaching of subjects of its approbation at primary school / high school;

# We innovate didactic approaches to educational activities implemented in schools or educational institutions through immersive non-linear video presentations created in the cloud platform Prezi.

Topics:

# We create a video presentation in the Prezi Video online editor environment from scratch using the Quick record tool - selecting a suitable template, inserting text content and other graphic visuals; supplementing the video presentation with a recording of your own image and sound;

# We create a video presentation in the Prezi Video online editor environment by offering reusable videos recorded by other Prezi Video users;

# Creating a video presentation based on a Prezi Present; Adding an accompanying commentary; Adding a video with accompanying commentary.

Within the distance assignment, the student will create an original didactic and visually engaging video presentation of educational content of his/her choice for the target group of pupils, using the Prezi cloud platform (Prezi Present and Prezi Video), in a range of at least 20 presentation views, usable in teaching the subjects of his/her specialisation at primary school/junior high school.

# We use selected Web 2.0 software tools to obtain feedback from students participating in the school teaching process, in the case of students enrolled in distance (online) learning;

# We are expanding the knowledge framework in the field of application of gamification (game-based learning) as one of the innovative and activating methods applied in the educational process at the primary school level;

# We are expanding digital skills to include the ability to effectively use Socrative 2.0, a cloud-based application designed to create and manage knowledge/quiz activities in order to get immediate feedback from students participating in a lesson in the classroom or at home in the case of distance/hybrid learning;

# We are mastering the methodology of applying knowledge/quiz activities communicated to students through Socrative 2.0 to the process of school teaching of subjects of their area of interest in primary schools;

# We extend professional digital competences with the ability to create gamification quiz activities and knowledge games through the online platform Kahoot! into the school learning process in a fun and playful way - transforming traditional knowledge testing through quizzes in an activating form using digital means;

# We acquire competencies in the application of the application methodology, in the Kahoot! author-prepared, gamified educational and quiz activities to the process of school teaching of subjects of their approbation in primary school / secondary school;

# We develop digital competences by the ability to effectively use the cloud tool Wizer.me for creating multimedia online worksheets with educational content for the target group of primary school pupils;

# We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Wizer.me to the process of school teaching of subjects of their approbation in primary school / secondary school;

# We master the principle and methodology of working with the cloud application Google Forms designed for the creation of online knowledge tests and research tools usable in the context of pedagogical activities;

Topics:

# Socrative.com - a web-based tool for online testing of student knowledge; Free registration vs. benefits of paid registration for teachers; Creating a teacher/student account; Test administration panel in Socrative 2.0 - Creating a new test - question types for creating your own tests - multiple

choice, yes/no and short open answer; Managing teacher-created tests; Creating a copy of a test - a variant for a parallel group with slightly different questions; Deleting a test; Downloading a test to a document in \*.pdf; Editing the created test; Importing a test from another teacher - sharing tests between teachers; Access to the results of all (already) completed tests; Modes of making the test available to pupils - immediate feedback: Instant Feedback; Teacher-controlled test; Selecting the ways of displaying the results; Defining the appearance of the test results - a general overview of all pupils with statistics of pupil's success and questions; Separate \*.Separate pdf files for each pupil; Success statistics for each test question; Practical examples of administered tests in the Socrative 2.0 environment for different educational disciplines and learning topics;

# For the sake of brevity, the thematic focus of Kahoot! is analogous in content to the Socrative 2.0 application;

# Cloud Computing; Google Drive; Viewing Google Docs options; Description of the Google Forms environment - Questions tab; Creating a form; Editing the appearance of the form; Setting up the form as a quiz; Evaluating the data obtained from the form administration - Answers tab; Sending the form to respondents; Setting up Google Form sharing - in Google Drive and in the Google Forms editor; Setting up Google Form sharing for a user with an un-created Google account. As part of the distance task, the student will create a knowledge test with ten multiple choice questions, ten yes/no questions and ten short free-form questions using the online software application Socrative. The focus of the knowledge test should be situated in a curricular issue of the student's choice falling within the educational content of the subject taught at primary/ secondary school, in the context of the subjects of interest that the student is studying in the teacher education programmes at PdF UK. The knowledge test defined in this way will be implemented by the student among his/her classmates in his/her educational group. As part of the distance assignment, the student will create a software application Kahoot! test activity made up of 20 knowledge questions of supported types. The focus of the test activity should be situated in a teaching issue of his/her own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student studies in the study programs of teaching at the Faculty of Education of the Charles University. The test activity defined in this way will be implemented by the student among the classmates of his/her educational group.

Within the distance assignment, the student will design and create an engaging multimedia worksheet with educational content for the target group of pupils in primary school / secondary school in the environment of the cloud tool Wizer.me; To the created digital graphic output (in a separate file format \*.docx), the student will provide a methodology for its inclusion in the educational activities of the target group of pupils.

As part of the distance learning assignment, the student will create a knowledge quiz activity with a minimum of 15 questions of supported types via the Google Forms cloud application. The focus of the knowledge quiz should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at PdF UK. The knowledge quiz defined in this way will be implemented by the student among the classmates of his/her educational group.

Creation of digital graphic outputs in the environment of selected cloud applications

# Acquire digital competences by the ability to effectively use the Prezi Design cloud tool of the Prezi cloud platform to create multimedia posters with educational content intended for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;

# We develop digital competences by the ability to effectively use the cloud tool Glogster (edu.Glogster.com) for digital storytelling - creating engaging multimedia posters with educational content - designed for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;

# We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Prezi Design and Glogster to the school teaching of subjects that the student studies in the study programs of teaching at the Faculty of Education at Charles University.

Topics:

# Prezi Design as a comprehensive graphic design and data visualization tool; Template library; Creating and editing content by adding multimedia items in the editor; Adding, moving and layering objects; Using \*.ppt, \*.pdf and \*.doc in Prezi Design; Implementing animated elements into the graphic content you create; Creating visual effects to images by applying masks and filters; Adding links to text objects, graphics and shapes; Multi-page design; Linking text, images, icons and shapes to pages and sections; Sharing content created in Prezi Design with your audience on social media using private or public links; Collaborating in the Prezi Design environment; Adding/removing collaborators; Adding an entire team of collaborators; Collaborating in real time;

# Creating and editing engaging data visualizations using maps; Creating a social post - adding and editing content, adding animation to the content of the post being created; Downloading and sharing the created content for publishing purposes;

# Creating infographics for visual representation of information and data, Adding and editing content; Creating gif and mp4 videos in the Prezi Design environment; Embedding videos from Prezi Video into Prezi Design; Adding videos to Prezi Design and editing settings; Media integrations in Prezi Design - adding content from Prezi Video to projects.

Within the distance task, the student will design and create in the cloud tool Prezi Design an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects, which the student studies in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format \*.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.

Within the distance task, the student will design and create in the cloud tool edu.Glogster an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format \*.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students

| <b>Type, volume, methods and workload of the student - additional information</b><br>Type of activities, scope (number of hours) and methods of educational activities:<br>Form of teaching: 2S<br>Teaching mode: in-person, combined<br>Scope (number of hours): 2 per week, 22 per semester<br>Student workload: 75 hours in total<br>Direct teaching = 22 hours, home preparation (studying for seminars, working on home assignments) = 13 h, preparation for theoretical test 1 = 10 hours, preparation for the theoretical test 2 = 10 hours, analysis of text 1 = 10 hours, analysis of text 2 = 10 hours<br>Teaching methods:<br>Presentation of the material, explanation, dialogue, discussion, analysis of short texts, completing tasks and assignments   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Recommended prerequisites:</b><br>none   |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assignment (100 percent):<br>Continuous theoretical test 1 (25 percent)<br>Continuous theoretical test 2 (25 percent)<br>Stylistic analysis of two English texts (2 x 25 percent)<br>A#minimum of 50 per cent for each of the text analyses (= 2 x 12.5 percent) is required for the mark. A#draft of the analysis is handed in and the student completes it according to the instructor's comments. Continuous test cannot be re-taken.<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70%, E, 69–0% FX<br>A (excellent performance). The student has thorough knowledge and is able to apply the mechanisms and principles to analyse texts, reliably identifies the genre, register and assesses the level of cohesion and coherence of the text, has an above-standard knowledge of the criteria of textuality, which allows him/her to effectively distinguish between authentic and inauthentic, |  |

factual or journalistic text, the student is able to consistently analyse the functional meaning of the individual formal language structures within a broader conversation, is able to effectively apply theoretical knowledge.

B (very good performance): The student has a good command of the mechanisms and principles for analysis of a text, can correctly identify the genre, the register and is able to assess the level of cohesion and coherence of the text, has an excellent knowledge of the criteria of textuality, which enables him/her to distinguish between an authentic and an inauthentic factual or journalistic text, can correctly determine the functional meaning of the individual formal language structures in the context of a broader discourse, is able to effectively apply theoretical knowledge.

C (good performance): The student knows and applies the mechanisms and principles for the analysis of a text, can mostly correctly identify the genre, the register and assess the level of cohesion and coherence of the text, has the knowledge of the criteria of textuality, which allows him/her to distinguish between authentic and inauthentic factual or journalistic text, can correctly determine the functional meaning of the most of the formal language structures in the context of a broader discourse, is able to effectively apply theoretical knowledge at an appropriate level.

D (satisfactory performance): The student knows some basic mechanisms and principles for the analysis of a coherent text, can mostly correctly identify the genre, the register and assess the level of cohesion and coherence of the text, knows several criteria of textuality, which allows him/her to distinguish to some extent between authentic and inauthentic, factual or journalistic text, can correctly determine the functional meaning of the basic formal language structures in the context of a broader discourse, is able to effectively apply the basic theoretical knowledge at an acceptable level.

E (sufficient performance): The student knows the basic mechanisms and principles for analysis of the text, can identify the basic types of genres, registers and to some extent assess the level of cohesion and coherence of the text. The student knows the basic criteria of textuality, which allows him/her to partially distinguish between authentic and inauthentic factual or journalistic text, can correctly determine the functional meaning of the basic formal language structures in the context of a broader conversation, is able to apply the basic theoretical knowledge at a lower level.

Scale of assessment (preliminary/final): Continuous assignment (100 percent): Continuous theoretical test 1 (25 percent) Continuous theoretical test 2 (25 percent) Stylistic analysis of two English texts (2 x 25 percent) A minimum of 50 per cent for each of the text analyses (= 2 x 12.5 percent) is required for the mark. A draft of the analysis is handed in and the student completes it according to the instructor's comments. Continuous test cannot be re-taken.

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate's profile, this course focuses on the acquisition of the following knowledge, skills, and competences:

Knowledge:

By completing the course, the student will:

- acquire new theoretical knowledge in the field of discourse analysis
- learn the mechanisms and principles of text analysis
- understand the nature of textuality and learn the basic elements of cohesion
- understand the concept of communicative dynamism and the treatment of the theme (in different types of clauses and sentences), understand the theme development in the text)
- understand the basic aspects of speech theory.

Skills:

The student can:

- analyse language in relation to a specific context and correctly determine the functional meaning of particular formal aspects of language within a larger discourse, i.e., a text

- correctly interpret a text in the light of the knowledge acquired in general linguistics, semiotics, pragmatics, psychology, anthropology classes, interpret a text with respect to other aspects of the situational, cultural, linguistic, and social context
- identify the genre / type of any text in the English language and relate it to a particular type of discourse
- perform a basic linguistic, stylistic, and discursive analysis of English factual and journalistic texts
- apply the knowledge of the basic criteria of textuality to distinguish between high quality (authentic) and low quality (inauthentic) factual or journalistic texts
- identify cohesion, coherence, implicatures and other discursive variables in a text
- apply theoretical knowledge in the analysis of a coherent authentic text and in student's own pedagogical practice.

Competences:

With the completion of the course, the student:

- will have developed the ability to work individually and as a team (through problem solving activities and assignments)
- will be able to communicate his/her ideas effectively and support his/her claims with arguments
- will be able to make interdisciplinary connections between knowledge from other linguistic disciplines
- will be able to work with professional text which they critically analyse and use for their further professional development
- will be able to plan and organise their further education and develop effective strategies for learning grammar.

### **Class syllabus:**

Course contents:

Main themes of the course: Disciplines which concern text and discourse analysis, text and discourse, characteristics of text and textual analysis, qualitative differences between textual analyses at the level of written and spoken text (types of texts, units of written text and its complexity, cultural conventions of written expressions, interaction strategies, conversational principles, etc. ), situationality of the text, intertextuality, acceptability and informativeness of the text, means of lexical cohesion of the text, possible application of the text analysis in grammar, vocabulary and phonology

Through the above content, the student will learn about the interaction of the different linguistic patterns and the speaker's intention in the broader discourse, the characteristics of written and spoken text and different approaches to their analysis). The student will develop foreign language knowledge and skills (especially reading, listening, vocabulary and semantic skills) at B2-C1 level, be able to read professional literature in English. The student will learn to work independently and, in a team. The student will be able to apply acquired knowledge.

| <b>Academic year:</b> 2022/2023  |   |
| <b>University:</b> Comenius University Bratislava  |   |
| <b>Faculty:</b> Faculty of Education   |   |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde022/22   | <b>Course title:</b><br>Education towards tolerance |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |   |
| <b>Number of credits:</b> 3  |   |
| <b>Recommended semester:</b> 1., 3., 5.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment.<br>Assessment: consists of 2 intermediate assessments (40+60, total 100 points).<br>Intermediate assessment 1: consists of a term paper and its oral presentation<br>Semester work for intermediate assessment 1: Critical analysis of a relevant source on a selected topic in tolerance education for a minimum of 10 min. and 10 images (in the selected graphic program) for 40 points.<br>A relevant source is defined as: e.g., a revival article, study, documentary, scholarly discussion, etc.<br>The topic of the term paper: it should be related to current issues in education (multiculturalism, pro-sociality, stereotypes, minorities, tolerance, inclusion, discrimination, extremism, etc.). The chosen topic should address various social issues that we can systematically promote through education and training (e.g. critical thinking) and through various cross-cutting themes (e.g. media education, civic initiative, ecology, segregation, otherness, religious freedom, human rights, plurality of opinion, etc.). For the presentation, the student will prepare critical questions for social discourse and lead the discussion.<br>Intermediate assessment 2: consists of a test of the acquired knowledge, i.e. a 60-point test. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, |   |

excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach in developing interim assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

For a grade D of at least 66 points. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.

At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the course Education for Tolerance, the student should:

- Demonstrate key knowledge and skills in the field of education for tolerance - multicultural education, ethics education, global education, education for human rights, etc,
- be able to evaluate and select relevant sources on the topic of education for tolerance,
- be able to apply critical analysis of a relevant source,
- be able to lead a debate and ask critical questions in social discourse,
- be able to create and apply activities to promote tolerance in the classroom,
- understand social values within the framework of tolerance as a key area in education.

Transferable competences: the student strengthens soft skills such as communication skills, analytical thinking in evaluating information and working with text, critical thinking and thinking in context through discussion, strengthens interpersonal skills within the group - activation and taking initiative and responsibility through creative tasks in the course.

### **Class syllabus:**

Brief outline of the course:

The aim of the course is to prepare students for the future teaching profession in the areas of critical and independent thinking, collaboration, creative activity, self-knowledge, etc. in the areas of tolerance, multiculturalism, empathy and positive communication. Using a variety of activating methods and problem-based assignments, students will actively participate in the learning process and create course content themselves, in which they will use their own potential and develop intra and interpersonal aspects of their personality.

Topics:

Definition of basic concepts, tolerance, empathy, positive communication and positive attitudes, pro-sociality, multicultural education, stereotypes, minorities, refugees, European context, developing relationships and active listening. Applying PE in the school environment, aims of PE, diversity, religious freedom, plurality of opinion in society and education, countering extremism. Methods for developing education for tolerance. Experiential pedagogy. Overview of methods and activities, concrete examples, video demonstrations, institutions and organisations involved in the protection of HR, third sector. Video analysis - discussion questions, argumentation, development of critical thinking in the framework of education for tolerance, discussion. Positive communication, how to argue properly, how to avoid manipulation, forms of discrimination. Democracy and freedom. How to develop democratic thinking within a European context, values of society and personal values. The teacher, the personality of the teacher and his/her goals in the educational process in education for tolerance. Otherness and prejudice.

| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |   |
| <b>Number of credits:</b> 3  |   |
| <b>Recommended semester:</b> 2., 4., 6.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment.<br>Assessment: consists of 2 intermediate assessments (40+60, total 100 points).<br>Intermediate assessment 1: consists of a term paper and its oral presentation<br>Semester work for intermediate assessment 1: Critical analysis of a relevant source on a selected topic in tolerance education for a minimum of 10 min. and 10 images (in the selected graphic program) for 40 points.<br>A relevant source is defined as: e.g., a revival article, study, documentary, scholarly discussion, etc.<br>The topic of the term paper: it should be related to current issues in education (multiculturalism, pro-sociality, stereotypes, minorities, tolerance, inclusion, discrimination, extremism, etc.). The chosen topic should address various social issues that we can systematically promote through education and training (e.g. critical thinking) and through various cross-cutting themes (e.g. media education, civic initiative, ecology, segregation, otherness, religious freedom, human rights, plurality of opinion, etc.). For the presentation, the student will prepare critical questions for social discourse and lead the discussion.<br>Intermediate assessment 2: consists of a test of the acquired knowledge, i.e. a 60-point test. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, |   |

excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach in developing interim assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

For a grade D of at least 66 points. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.

At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the course Education for Tolerance, the student should:

- Demonstrate key knowledge and skills in the field of education for tolerance - multicultural education, ethics education, global education, education for human rights, etc,
- be able to evaluate and select relevant sources on the topic of education for tolerance,
- be able to apply critical analysis of a relevant source,
- be able to lead a debate and ask critical questions in social discourse,
- be able to create and apply activities to promote tolerance in the classroom,
- understand social values within the framework of tolerance as a key area in education.

Transferable competences: the student strengthens soft skills such as communication skills, analytical thinking in evaluating information and working with text, critical thinking and thinking in context through discussion, strengthens interpersonal skills within the group - activation and taking initiative and responsibility through creative tasks in the course.

### **Class syllabus:**

Brief outline of the course:

The aim of the course is to prepare students for the future teaching profession in the areas of critical and independent thinking, collaboration, creative activity, self-knowledge, etc. in the areas of tolerance, multiculturalism, empathy and positive communication. Using a variety of activating methods and problem-based assignments, students will actively participate in the learning process and create course content themselves, in which they will use their own potential and develop intra and interpersonal aspects of their personality.

Topics:

Definition of basic concepts, tolerance, empathy, positive communication and positive attitudes, pro-sociality, multicultural education, stereotypes, minorities, refugees, European context, developing relationships and active listening. Applying PE in the school environment, aims of PE, diversity, religious freedom, plurality of opinion in society and education, countering extremism. Methods for developing education for tolerance. Experiential pedagogy. Overview of methods and activities, concrete examples, video demonstrations, institutions and organisations involved in the protection of HR, third sector. Video analysis - discussion questions, argumentation, development of critical thinking in the framework of education for tolerance, discussion. Positive communication, how to argue properly, how to avoid manipulation, forms of discrimination. Democracy and freedom. How to develop democratic thinking within a European context, values of society and personal values. The teacher, the personality of the teacher and his/her goals in the educational process in education for tolerance. Otherness and prejudice.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the course Educational Counselling is to provide students with an initial framework of knowledge in the field of the educational counselling system. Upon successful completion of the course, students will be able to navigate the school counseling system. They understand the place and role of the guidance counselor in the guidance counseling system and master the prerequisites for the position of guidance counselor. Know the differences in the responsibilities of the class teacher, guidance counsellor or school counsellor in the provision of guidance on educational issues. They know the methods of educational counselling. They know strategies for the prevention of problem behaviour and understand their importance. They are able to apply the acquired knowledge in solving specific problem situations in educational practice. They are oriented in school career guidance. They can describe and interpret the importance of school cooperation with educational guidance and prevention institutions, social and legal protection bodies and others.

Transferable competences: by analysing, solving and discussing seminar assignments, students are able to communicate their conclusions, think critically and think in context.

### **Class syllabus:**

Brief outline of the course:

1. School guidance system.
2. The framework for the work of an educational counsellor, professional and personal prerequisites of an educational counsellor, education of an educational counsellor.
3. The class teacher and his/her role in advising pupils and guardians in education and training.
4. Methods of work in educational counselling.
5. Strategies for preventing problem behaviour in pupils.
6. Addressing pupils' educational difficulties.
7. Methods and options for intervention of problem behaviour of pupils.
8. Career counselling.
9. Educational counselling in the field of care for gifted pupils.
10. Cooperation of the school with other institutions, family. Social and legal protection of children and youth.

| <b>Prerequisites:</b> PdF.KAJL/B-ANGde001/22 - Introduction to the Study of the English Language   |  |
| <b>Recommended prerequisites:</b><br>B-ANGde001 Introduction to the Study of the English Language  |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>The student is entitled to sit for the Continuous tests in an alternative date (in case of medical or other compelling reasons); but is not entitled to sit for improvement tests. Attendance of the course (maximum of 3 excused absences) is a prerequisite for the examination.<br>Continuous assessment (40%):<br>Continuous test containing practical activities and tasks<br>Final assessment (60%):<br>Final test aimed at determining the level of theoretical knowledge, development of practical tasks, application of the acquired theoretical knowledge in practical exercises<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX  |  |

A (excellent performance): The student thinks independently in context, links the theoretical knowledge acquired with practical skills. The student has an excellent command of technical terminology and uses it in describing and determining grammatical phenomena. Analyses a simple sentence independently and without the teacher's help. Independently and correctly determines all grammatical categories of nouns in a previously unknown text, understands and can explain the relationships within a nominal phrase without the teacher's assistance. Can justify his/her practical outcomes using new theoretical knowledge.

B (very good performance): The student thinks independently in context, links acquired theoretical knowledge with practical skills. The student has an appropriate level of knowledge of technical terminology and uses it to describe and determine grammatical phenomena. Analyses a simple sentence with minimal help from the teacher, correctly determines almost all grammatical categories of nouns in a previously unknown text, understands and can explain relationships within a nominal phrase. Can justify their practical output using new theoretical knowledge, makes minor errors in terminology, also relies on descriptive justifications and explanations.

C (good performance): The student can correlate phenomena only with the teacher's help, links some acquired theoretical knowledge with practical skills. He/she has an adequate level of knowledge of technical terminology and uses it to describe and determine grammatical phenomena with the teacher's assistance. With the teacher's help, analyses a simple sentence, correctly determines most grammatical categories of nouns in a previously unknown text, understands and can explain in a simple way the relationships within a nominal phrase. Can justify their practical output with terminological inaccuracies, relying on descriptive justifications and explanations. Has mastery of terminology, has minor problems in linking terminology to practical activities.

D (satisfactory performance): The student can correlate phenomena only with teacher assistance. The student knows basic vocabulary at an appropriate level and, with the teacher's assistance, uses it to describe and determine grammatical phenomena. Relies on the teacher's questions to analyse them. With the teacher's assistance, analyses a simple sentence, correctly determines most grammatical categories of nouns in a previously unknown text, understands and can explain in a simple way the relationships within a nominal phrase. Can justify their practical output with terminological inaccuracies, relying on descriptive justifications and explanations. Has a basic command of terminology but has difficulty linking it to practical activities. Relies on learned procedures and examples to elaborate.

E (sufficient performance): The student understands each grammatical category in isolation, lacks connection to context. The student has a sufficient command of basic vocabulary and, with the active help of the teacher, uses it to describe and determine grammatical phenomena. Relies on the teacher's questions. Analyses a simple sentence with the teacher's active assistance, determines grammatical categories of nouns in isolation, determines relationships within a nominal phrase with the help of the teacher's questions. Relies on descriptive justifications and explanations. Knows basic terminology but has difficulty linking it to practical activities. Relies on learned procedures and examples from classroom lessons to work them out.

Scale of assessment (preliminary/final): Continuous assessment (40%): Continuous test containing practical activities and tasks Final assessment (60%): Final test aimed at determining the level of theoretical knowledge, development of practical tasks, application of the acquired theoretical knowledge in practical exercises.

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a#graduate, this course aims for a student to develop the following knowledge, skills, and competences:

Knowledge:

In the course, the student will consolidate the theoretical knowledge of the hierarchy of language units. The student will be able to identify the different word types and understand the connections between them within a simple sentence. The student will learn the characteristics of nouns, adjectives, articles and pronouns, and will acquire knowledge of all grammatical categories determined for nouns.

Skills:

The student is able to use the acquired theoretical knowledge for practical analysis and analysis of grammatical phenomena, be able to independently develop an analysis of a simple sentence, determine word types and grammatical categories of nouns. The student is able to participate in discussions on the grammatical phenomena discussed and is able to identify and correct the mistakes of his/her classmates. The student critically analyses, problem solves and produces relevant examples from practice, can find and describe the main differences and similarities between grammatical phenomena in Slovak and English. He/she uses own experience of the teaching process and critically analyses appropriate and inappropriate ways of teaching grammar.

Competences:

Students can communicate the results of their work in an appropriate manner, can critically evaluate their own analyses as well as those of classmates with whom they collaborate, and can solve relevant professional issues in a team manner at the appropriate language level B2-C1 CEFR. When working in groups, the student is able to participate in solving assignments and present the result of the work of the whole group. Using theoretical knowledge, they can argue and explain the solutions developed. The student explains grammatical phenomena at the required level and draws attention to more detailed analyses with correctly focused questions, thus creating the prerequisites for his/her own future practice in the field of foreign language education.

### **Class syllabus:**

Course contents:

Main themes of the course: Language units, word types, phrases, sentence articles, nominal phrases, nouns, their grammatical categories and structural-functional characteristics, articles, pronouns, adjectives and their structural, syntactic and semantic characteristics.

Through the above content, the student will acquire linguistic terminology relevant to pedagogical grammar. It will systematize the knowledge of the functioning of English grammar acquired in the previous course of introduction to English language learning and systematically develop it further. The student will acquire knowledge of the structural, syntactic and semantic aspects of nominal phrases and their components and will understand their structural-functional characteristics. The student will develop declarative and procedural grammatical knowledge, and will develop comparative-linguistic thinking on the basis of comparing selected phenomena of Slovak and English grammar.

The presentation of didactically processed linguistic grammar is enriched with suggestions for the use of transfer and prevention of interference from the Slovak language, as well as suggestions for the creation of effective learning strategies and methodological recommendations for the teaching of the phenomena in question.

### **Recommended literature:**

Compulsory readings:

(selected chapters corresponding to the course syllabus)

CLOSE, R. A. (1993). *A#University Grammar of English: Workbook*. London: Longman.

CHALKER, S. (1992). *A Student's English Grammar: Workbook*. London: Longman.

QUIRK, R. and GREENBAUM, S. (1990). *A#Student's Grammar of the English Language*. London: Longman.

| <b>Recommended semester:</b> 3.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b> PdF.KAJL/B-ANGde001/22 - Introduction to the Study of the English Language   |   |
| <b>Recommended prerequisites:</b><br>B-ANGde001 Introduction to the Study of the English Language  |   |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (40 points/percent):<br>Continuous applicational test 1 (20 points/percent)<br>Continuous applicational test 2 (20 points/percent)<br>The student is entitled to an alternative date of the mid-term assessment (if he/she has not attended the assessment for medical or other serious reasons). No part of the mid-term assessment can be resat. Class attendance (maximum of 3 authorized absences, or depending on the situation) and taking part in the midterm assessment (24+ points (60%)) are the requirements for being allowed to take the final exam.<br>Final assessment (60 points/percent):<br>Theoretical written exam<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX  |   |

A (excellent performance): The student can reliably explain, demonstrate, and apply construction features and semantics of English definite and indefinite verb phrases; analyse the communicative specifics of their use; correctly identify, demonstrate, and apply a wide range of types and degrees of modality; demonstrate aspects of their realization and meaning, and reliably resolve controversial situations; can reliably distinguish between prototypical and specific (non-prototypical) mappings of form (structure) and temporal meaning (semantics) within a verb phrase; in continuous language production, errors in the basic mappings of form (structure) and temporal meaning (semantics) are rare; at the application level, the student can experiment with specific (non-prototypical) mappings to meet intended communicative goals creatively and appropriately; when working with a text, a student can explain them, prove the validity of their use; the student can explain, apply and evaluate the use of specific aspects of the system of voice; can analyse and demonstrate the use of auxiliary verbs and their specific features on the basis of their linguistic characteristics; can compare, distinguish and illustrate the individual morpho-syntactic features and semantics of each type of subjunctive; presented theoretical knowledge and its application is at an excellent level.

B (very good performance): The student can identify, explain and apply most of English definite and indefinite verb phrases reliably and can demonstrate the mechanics of their construction, semantics and communicative aspects; can correctly identify, demonstrate and apply a wide range of types and degrees of modality and can demonstrate aspects of its realisation and meaning; can distinguish between prototypical and specific (non-prototypical) mappings of form (structure) and temporal meaning (semantics) within a verb phrase; in continuous language production, errors in the basic mappings of form (structure) and temporal meaning (semantics) are almost non-existent, the production reflects the application of specific (non-prototypical) mappings guided by the intended communicative goals; when working with a text, the student can explain and prove the validity of their use and experiment with them; can explain, apply and evaluate the use of specific aspects of the verb voice system; can analyse and demonstrate the use of auxiliary verbs and their specific features on the basis of their linguistic characteristics; can describe them clearly and give appropriate examples; can illustrate and compare the morpho-syntactic features and semantics of the different types of subjunctive; presented theoretical knowledge and its application is at an above-standard level.

C (good, reliable performance): The student can recognize and describe the frequent types of English definite and indefinite verb phrases and can demonstrate the mechanics of their construction and semantics; in most cases, the student can correctly demonstrate the type and degree of modality and demonstrate aspects of its realization and meaning; in continuous linguistic production, errors in the basic mappings of form (structure) and temporal meaning (semantics) are minimal; in production, application of specific (non-prototypical) mappings reflects the basic communicative goals; the student can explain them when working with the text and demonstrate the justification for their use; the student can explain, demonstrate and apply the morphosyntactic aspects of the verb voice system; the student can outline an analysis of the linguistic characteristics of auxiliary verbs; can describe them comprehensibly and give appropriate examples; can demonstrate and apply the morpho-syntactic requisites and semantics of the various types of subjunctive; presented theoretical knowledge and its application is at an expected, appropriate level.

D (satisfactory performance): The student can recognize and describe structurally frequent types of English definite and indefinite verb phrases; can mostly correctly discuss the type and degree of modality and explain meaning in basic usage; in continuous language production, errors in basic mappings of form (structure) and temporal meaning (semantics) are rare but observable; in production, specific (non-prototypical) mappings are less frequent; when working with a text, the student can recognise, explain and demonstrate them, although at the level of application inaccuracies are existent; the student has adequate knowledge of the morphosyntactic aspects of the verb voice system, the student can explain the basics of the linguistic characteristics of auxiliary

verbs; can describe basic morpho-syntactic requisites and semantics of the individual types of subjunctive; presented theoretical knowledge and its application is at a below-average level.

E (sufficient performance): The student can recognize the most frequent types of English definite and indefinite verb phrases; can mostly correctly identify the type and degree of modality and define its meaning in basic uses; in continuous linguistic production, the student makes occasional errors in the basic mappings of form (structure) and temporal meaning (semantics); in production, specific (non-prototypical) relations are characterised by low frequency; when working with a text, the student can reproduce them, describe them in general terms and give contextually appropriate examples; the application suffers from increased error rate; the student has adequate knowledge of the basic morphosyntactic aspects of the verb voice system; can reproduce the basic linguistic characteristics of auxiliary verbs; can identify and name the basic morpho-syntactic requisites and semantics of individual types of subjunctive; presented theoretical knowledge and its application is at a sufficient level.

Scale of assessment (preliminary/final): Continuous assessment (40 points/percent): Continuous applicational test 1 (20 points/percent) Continuous applicational test 2 (20 points/percent) The student is entitled to an alternative date of the mid-term assessment (if he/she has not attended the assessment for medical or other serious reasons). No part of the mid-term assessment can be resat. Class attendance (maximum of 3 authorized absences, or depending on the situation) and taking part in the midterm assessment (24+ points (60%)) are the requirements for being allowed to take the final exam. Final assessment (60 points/percent): Theoretical written exam

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a#graduate, this course aims for the student to develop the following knowledge, skills, and competences:

Knowledge:

Upon successful completion of this course, the student:

- will understand the morpho-syntax of English verbs and adverbs based on structural-functional and cognitive linguistics;
- will be able to demonstrate the organization of the English verb phrase and its formal characteristics;
- will be able to identify, describe and give examples of verb phrases according to the discursive requirements of continuous speech (text);
- will understand the nature of the relationship between form (structure) and temporal meaning (semantics) and is able to combine forms and functions into secondary, non-prototypical mappings;
- will be able to distinguish between different types of modality and to contrast their structural and semantic specificities;
- will have a systematised network of knowledge of the functioning of English grammar acquired in practical language courses and in other relevant courses of study (B-ANGde004).

Skills:

Upon successful completion of this course, the student:

- will be able to analyse the structure and function of English verb forms, verb phrases and constructions containing adverbs from a variety of perspectives;
- will be able to produce sentences in which the morpho-syntax of the verb phrase and the adverbial phrase corresponds to the desired semantics,
- will be able to demonstrate semantic contradictions based on the ability to discriminate the structural aspects of an English verb phrase, identifies contradictions of a semantic nature and suggests an appropriate modification,

- will be able to reflect the basic differences between English and Slovak verbs, will be acquainted with the relevant reference grammars and manuals which he will be able to work with for the purpose of their further development and preparation for the performance of their profession;
- will be able to apply the theoretical knowledge in the analysis of a coherent authentic text and in their own pedagogical practice;
- will have developed analytical and metalinguistic thinking when working with a linguistic material.

**Competences:**

Upon successful completion of this course, the student:

- will have developed individual and teamwork skills (through problem solving and morpho-syntactic tasks);
- will be able to communicate their ideas effectively and support their claims with arguments;
- will be able to apply the knowledge of English verbs and adverbs and knowledge from other linguistic disciplines in an interdisciplinary manner;
- will be able to work with an academic text, critically analyse and use them for their further professional development;
- will be able to plan and organise their further learning and develop effective strategies for learning grammar.

**Class syllabus:**

Course contents:

Main themes of the course: Classification of English verbs and their morpho-syntactic, semantic and syntactic characteristics; morpho-syntactic characteristics and semantics of English verb phrases governed by modal verbs; morpho-syntactic characteristics and semantics of English verb phrases governed by the verbs do, be and have; morpho-syntax and semantics of verb tense and aspect; morpho-syntax and basic functions of verb voice; morpho-syntax and semantics of verb mood; morpho-syntactic characteristics of adverbs and their semantics

Through the above content, the student will become familiar with the structural-functional characteristics of English verb forms and adverbs, recognize the basic structural features of English verb phrases and adverbs, develop metalinguistic awareness through which they will be able to identify correct, sub-optimal and incorrect realizations of a verb phrase with respect to its syntactic and hyper-syntactic environment, critically analyse them and be able to suggest an appropriate method of modification; by applying theoretical knowledge in problem-based tasks, the student develops the ability of analytical thinking and argumentation in English; by working with a professional text in English, the student develops their foreign language skills at the B2-C1 level. The presentation of linguistic grammar adjusted for pedagogical purposes is enriched with suggestions for the use of transfer and prevention of interference from the Slovak language, as well as suggestions for the creation of effective learning strategies and methodological recommendations for teaching the phenomena in question.

## COURSE DESCRIPTION

|   |   |
|---|---|
| <b>Academic year:</b> 2022/2023   |   |
| <b>University:</b> Comenius University Bratislava   |   |
| <b>Faculty:</b> Faculty of Education  |   |
| <b>Course ID:</b><br>PdF.KAJL/B-ANGde016/22   | <b>Course title:</b><br>English Phraseology |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Type, volume, methods and workload of the student - additional information</b><br>Type of activities, scope (number of hours) and methods of educational activities:<br>Form of teaching: 2S<br>Teaching mode: in-person, combined<br>Scope (number of hours): 2 per week, 22 per semester<br>Student workload: 75 hours in total<br>Direct teaching = 22 h, continuous out-of-class preparation (revising + homework) = 11 h, 1st practical test = 12 h, 2nd practical test = 13 h, theoretical test = 17 h<br>Teaching methods:<br>Concise explanation/description of the subject matter, individual practice of the discussed lexical phenomena (collocations and idioms), pair-work, didactic games, discussion of the topics covered in the class, phraseological analysis of short authentic texts, comparison of the collocations and idioms in English and Slovak, building strategies aimed at the broadening of the English vocabulary |   |
| <b>Number of credits:</b> 3   |   |
| <b>Recommended semester:</b> 4.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Recommended prerequisites:</b><br>none   |   |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (100%)<br>1st practical test (30%)<br>2nd practical test (30%)<br>Theoretical test (40 %)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX<br>A (excellent performance): The student has a perfect command of the structural characteristics of English multi-word expressions, can correctly identify the semantic transparency of collocations and idioms, knows the stylistic properties and emotional colouring of prefabricated expressions in English, can correctly use collocations and idioms in terms of their interpersonal function, knows many translation equivalents of English and Slovak multi-word expressions, is ready to apply theoretical and practical knowledge in the classroom.   |   |

B (very good performance): The student has a good command of the structural characteristics of English multi-word expressions, can correctly identify the semantic transparency of collocations and idioms, knows their main stylistic features and emotional colouring, can correctly use many collocations and idioms in terms of their interpersonal function, knows the translation equivalents of English and Slovak multi-word expressions, is ready to apply theoretical and practical knowledge in the classroom.

C (good performance): The student knows the basic structural characteristics of English multi-word expressions, can mostly correctly identify the semantic properties of collocations and idioms, knows and uses some of their stylistic properties, can generally correctly use collocations and idioms in terms of their interpersonal function, knows some translation equivalents of English and Slovak multi-word expressions, is ready to apply the theoretical and practical knowledge in the classroom.

D (satisfactory performance): The student knows some basic structural properties of English multi-word expressions, can mostly correctly identify semantic properties of collocations and idioms, can identify some stylistic properties of prefabricated expressions, can mostly correctly use collocations and idioms in terms of their interpersonal function, knows the basic translation equivalents of English and Slovak multi-word expressions, is ready to apply some theoretical and practical knowledge in the classroom.

E (sufficient performance): The student knows some basic structural properties of English multi-word expressions, can identify some semantic properties of collocations and idioms, can recognize stylistic properties of prefabricated expressions but only uses them to a limited extent, can correctly use some collocations and idioms in terms of their interpersonal function, identifies only the basic differences between English and Slovak phraseology, is ready to apply basic theoretical and practical knowledge in a limited way in practice.

Terms of evaluation:

The final grade will be given to those students who have satisfactory attendance (maximum of 3 authorized absences, or depending on the situation) and who have taken all three tests administered during the semester. The student is entitled to alternative dates of the three tests (if he/she has not attended the assessment for medical or other serious reasons), but he/she is not entitled to any re-sits.

Scale of assessment (preliminary/final): Continuous assessment (100%) 1st practical test (30%)  
2nd practical test (30%) Theoretical test (40 %)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the learning objectives declared in the profile of a graduate, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

The student will become familiar with basic phraseological terminology and deepen his/her knowledge of English vocabulary. The student will learn the structural-functional characteristics of English phraseology, the theoretical principles of formal and semantic analysis of English multi-word expressions, the basic contextual determinants of the use of collocations and idioms, the theoretical foundations of the translation of English prefabricated units.

Skills:

The student makes use of different types of multi-word expressions, can analyse collocations and idioms from different perspectives, can practically apply the acquired theoretical knowledge in the analysis of a continuous authentic text, is able to identify linguistic and sociocultural aspects of English phrases, is able to identify the basic differences between English and Slovak word-formation, can use dictionaries and online resources to acquire English vocabulary, is able to read and critically analyse academic literature, is able to use the acquired knowledge in an appropriate and suitable way, has acquired strategies for vocabulary acquisition.

Competences:

The student will be able to work independently and in a team to solve phraseological problems and tasks, be able to communicate on topics related to the formation and meaning of English collocations and phrases, be able to find and use digital resources and tools for his/her further professional development, can read professional (phraseological) literature, has developed the ability to analyse and synthesize linguistic material, is able to link the acquired theoretical knowledge with the subject of research in other linguistic disciplines, is able to apply the acquired knowledge and strategies in an appropriate way in his/her further education and in his/her professional practice.

**Class syllabus:**

Course contents:

Main themes of the course: General problems of multi-word expressions, collocations and idioms, formal and semantic properties of collocations, comparison of English and Slovak collocations, classification of idioms, formal and semantic characteristics of idioms, stylistic aspects of idioms, geographical variations of idioms, English and Slovak idioms from the translational point of view  
By means of the above content, the student learns about the idiomatic level of the English language, its structural-functional characteristics, learns the ways of applying theoretical knowledge through practice in the analysis of English phraseology, develops his/her foreign language (especially idiomatic) skills and competences at the B2-C1 level, can read academic literature in English, learns to work independently and in a team solving phraseological issues and problems, can appropriately apply the acquired knowledge and skills in practice.

**Recommended literature:**

Compulsory reading:

PAVLÍK, R. (2020). English Collocations and Idioms: An Introduction to the Study of Multiword Expressions. Bratislava: Z-F Lingua

Recommended readings:

FERNANDO, C. (1996). Idioms and Idiomaticity. Oxford University Press.

KVETKO, P. (2015). English Idioms: Theory and Applications. Trnava: Univerzita sv. Cyrila a Metoda.

MLACEK, J. (1984). Slovenská frazeológia. 2nd edition. Bratislava: SPN.

All of the above books are available in Slovak libraries and/or bookshops.

**Languages necessary to complete the course:**

English, Slovak

**Notes:**

| <b>University:</b> Comenius University Bratislava  |  |
| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KAJL/B-ANGde008/22  | <b>Course title:</b><br>English Syntax |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar / lecture<br><b>Number of hours:</b><br><b>per week: 2 / 1 per level/semester: 28 / 14</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Type, volume, methods and workload of the student - additional information</b><br>Type of activities, scope (number of hours) and methods of educational activities:<br>Form of teaching: 1L+2S<br>Teaching mode: in-person, combined<br>Scope (number of hours): 3 per week, 33 per semester<br>Student workload: 125 hours in total<br>Classes = 33 hours, home preparation (readings for seminars + assignments) = 27 hours, preparation for Continuous assessment (applicational test 1) = 13 hours, preparation for Continuous assessment (applicational test 2) = 13 hours, preparation for the final assessment = 39 hours<br>Teaching methods:<br>Lecturing, explanation, conversation, discussion, grammatical analysis of short authentic texts, solving tasks and assignments, comparison of grammatical phenomena (structural-functional characteristics) in Slovak and English |  |
| <b>Number of credits:</b> 5  |  |
| <b>Recommended semester:</b> 4., 6.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b> PdF.KAJL/B-ANGde004/22 - English Morphology I and PdF.KAJL/B-ANGde007/22 - English Morphology II   |  |
| <b>Recommended prerequisites:</b><br>B-ANGde004 English Morphology I; B-ANGde007 English Morphology II   |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (40 points/percent):<br>Continuous applicational test 1 (20 points/percent)<br>Continuous applicational test 2 (20 points/percent)<br>The student is entitled to an alternative date of the mid-term assessment (if he/she has not attended the assessment for medical or other serious reasons). No part of the mid-term assessment can be resat. Class attendance (maximum of 3 authorized absences, or depending on the situation) and taking part in the midterm assessment (24+ points (60%)) are the requirements for being allowed to take the final exam.<br>Final assessment (60 points/percent):<br>Theoretical written exam or oral exam<br>Grading:  |  |

100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX

A (excellent performance): The student can reliably explain, demonstrate and use variations of the English verb order, demonstrate their mechanics, semantics and analyse the discursive circumstances of their use, can correctly categorise the type of agreement, demonstrate aspects of its realisation and reliably resolve controversial situations, can distinguish between the structural and functional characteristics of clause elements, experiment with them and combine them, can explain, apply and evaluate the use of specific aspects of English sentence negation, can reliably resolve the redundancy of linguistic material by applying pro-forms and ellipses with appropriate structural, positional and type characteristics, can compare, distinguish and illustrate among individual types of clauses and subordinate clauses on the basis of their morpho-syntactic features; presented theoretical knowledge and its application is at an excellent level.

B (very good performance): The student can reliably identify, explain, and use most variations of English word order and demonstrate their mechanics, semantics, and discourse requirements; in most cases, the student can correctly recognize the type of agreement and demonstrate aspects of its realization; the student can distinguish between and experiment with the structural and functional characteristics of clause elements, can explain, apply and evaluate the use of specific aspects of English sentence negation, can deal with the redundancy of linguistic material by means of pro-forms and ellipses with appropriate structural, positional and type characteristics, can illustrate and compare the basic morpho-syntactic features of different types of sentences and subordinate clauses

C (good, reliable performance): The student can recognize and explain most of the variations of English word order and demonstrate their mechanics and semantics, in most cases, the student can correctly recognize the type of agreement and demonstrate aspects of its realization, can explain and demonstrate the structural-functional characteristics of clause elements, can explain and demonstrate aspects of English sentence negation, can demonstrate and use pro-forms and ellipses with different structural, positional and type characteristics, can demonstrate the basic morpho-syntactic requisites of different types of clauses and subordinate clauses; presented theoretical knowledge and its application is at an expected, appropriate level.

D (satisfactory performance): The student can recognize most of the variations of the English word order, can mostly correctly recognize the type of agreement and explain the aspects of its realization, can recognize and correctly describe the structural-functional characteristics of the basic clause elements, has adequate knowledge of the basic aspects of negation of an English sentence, can classify and give examples of pro-forms and ellipses with different structural, positional and typological characteristics, can describe and explain the basic morpho-syntactic features of individual sentence types and subordinate clauses; presented theoretical knowledge and its application is at a below-average level.

E (sufficient performance): The student can recognise the most frequent variations of the English word order, can mostly correctly identify the type of agreement and determine its realisation, can correctly identify the structural-functional characteristics of the basic clause elements, has an adequate command of the basic aspects of negation of an English sentence, can name the different types of pro-forms and ellipses and recognise them according to their structural, positional and type characteristics, can identify and name the basic morpho-syntactic features of individual types of sentences and subordinate clauses; presented theoretical knowledge and its application is at a sufficient level.

Scale of assessment (preliminary/final): Continuous assessment (40 points/percent): Continuous applicational test 1 (20 points/percent) Continuous applicational test 2 (20 points/percent) The student is entitled to an alternative date of the mid-term assessment (if he/she has not attended the assessment for medical or other serious reasons). No part of the mid-term assessment can be resat. Class attendance (maximum of 3 authorized absences, or depending on the situation) and taking

part in the midterm assessment (24+ points (60%)) are the requirements for being allowed to take the final exam. Final assessment (60 points/percent): Theoretical written exam or oral exam

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a#graduate, this course aims for the student to develop the following knowledge, skills, and competences:

Knowledge:

Upon successful completion of this course, the student:

- will understand the syntactic features of English sentences based on structural-functional and cognitive linguistics;
- will be able to demonstrate the mechanisms and principles of the formation of different types of sentences in the English language;
- will be able to identify, describe and give examples of variations of the word order according to the discursive requirements of a continuous speech (text);
- will understand the nature of the relationship between form (structure) and function (sentence structure) and be able to combine different forms and functions;
- will be able to distinguish between different types of subordinate clauses according to their structural and semantic characteristics;
- will have a systematised network of knowledge of the functioning of English grammar acquired in practical language courses and in other relevant courses of study (B-ANGde004, ANGde007).

Skills:

Upon successful completion of this course, the student:

- will be familiar with the structural and functional units of an English sentence, acquire the ability to analyse the structure of an English sentence from different points of view;
- will be able to produce sentences in accordance with the various principles of English word order,
- will be able to identify errors of a syntactic nature and suggest an appropriate modification;
- will be able to find and describe the main differences and similarities between the syntactic phenomena of Slovak and English language;
- will be able to construct their language production in accordance with the similarities and differences in the composition of English and Slovak sentences; will be acquainted with the relevant reference grammars and manuals which he will be able to work with for the purpose of their further development and preparation for the performance of their profession
- will be able to apply the theoretical knowledge in the analysis of a coherent authentic text and in their own pedagogical practice;
- will have developed analytical and metalinguistic thinking when working with a linguistic material.

Competences:

Upon successful completion of this course, the student:

- will have developed individual and teamwork skills (through problem solving and morpho-syntactic tasks);
- will be able to communicate their ideas effectively and support their claims with arguments;
- will be able to apply the knowledge of English verbs and adverbs and knowledge from other linguistic disciplines in an interdisciplinary manner;
- will be able to work with an academic text, critically analyse and use them for their further professional development;
- will be able to plan and organise their further learning and develop effective strategies for learning grammar.

### **Class syllabus:**

**Course contents:**

Main themes of the course: Classification of sentences, their structure and function (declarative, interrogative, imperative, exclamative), clause elements and their syntactic features, word order and its variations, agreement (concord), negation (at the level of a clause, clause element, its scope and focus), coordinating and subordinating conjunctions (structure, syntax and semantics).

Through the above content, the student will become familiar with the structural-functional characteristics of individual types of sentences, with the structural features of the English sentence as a whole and its individual components; will develop a metalinguistic awareness, thanks to which they will be able to critically analyse the syntactic level of the linguistic material, identify the correct, sub-optimal and incorrect elements in the grammatical realisation of one's speech, justify their correctness or incorrectness and will be able to propose a method of modification; by applying theoretical knowledge in problem solving tasks, the student develops the ability of analytical thinking and argumentation in the English language; by working with authentic texts in the English language, the student develops their foreign language skills at the B2-C1 level. The presentation of linguistic grammar adjusted for pedagogical purposes is enriched with suggestions for the use of transfer and prevention of interference from the Slovak language, as well as suggestions for the creation of effective learning strategies and methodological recommendations for teaching the phenomena in question.

| <b>Recommended prerequisites:</b><br>none   |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (40%)<br>Mid-term practical test (40%)<br>Final assessment (60%)<br>Final practical test (30%)<br>Final theoretical test (30%)<br>Grading:<br>100–95% A, 94–90% B, 89–85% C, 84–80% D, 79–75% E, 74–0% FX<br>A (excellent performance): The student can practically recognize individual types of lexemes, can correctly determine the type of motivation of lexical units, can correctly determine the structural-functional characteristics of English words, has a theoretical and practical command of all types of word-formation, can correctly identify various types of meaning and semantic shifts, has a broad  |  |

vocabulary, can identify the basic differences between English and Slovak word-formation, has a rich theoretical lexical knowledge.

B (very good performance): The student can practically recognize the different types of lexemes, he/she can in most cases correctly identify the type of motivation of lexical units, can identify the structural-functional characteristics of most English words, has a theoretical and practical command of most types of word-formation, can generally correctly identify the different types of meaning and shifts in meaning, has a broad vocabulary, can identify the basic differences between English and Slovak word-formation processes, has a broad theoretical knowledge of the subject.

C (good performance): The student can practically recognize most types of lexemes, can in most cases correctly identify the type of motivation of lexical units, can correctly identify the structural-functional characteristics of common English words, has a theoretical and practical command of the basic types of word-formation, can identify the basic types of meaning and shifts in meaning, has an adequate vocabulary, can identify the basic differences between English and Slovak word-formation, has adequate theoretical knowledge.

D (satisfactory performance). The student can practically recognize most of the basic types of lexemes, can mostly correctly identify the type of motivation of lexical units, can correctly identify the structural-functional characteristics of common English words, has adequate command of the basic types of word-formation, can identify the basic types of meaning and semantic shifts, has an adequate vocabulary, can identify the most basic differences between English and Slovak word-formation, has sufficient theoretical knowledge.

E (sufficient performance): The student can practically recognise most of the basic types of lexemes, can mostly correctly identify the type of motivation of lexical units, can correctly identify the structural-functional characteristics of frequent English words, has adequate knowledge of the basic types of word-formation, knows some types of meaning and some semantic shifts, has a sufficiently large vocabulary, has sufficient lexical theoretical knowledge.

#### Terms of evaluation

The student is entitled to an alternative date of the mid-term assessment (if he/she has not attended the assessment for medical or other serious reasons). The student is not entitled to a re-sit of the mid-term test. Class attendance (maximum of 3 authorized absences, or depending on the situation) and taking part in the midterm assessment (with any result) are the requirements for being allowed to take the final exam.

#### Objectives and learning outcomes:

Based on the learning objectives declared in the profile of a graduate, this course focuses on the acquisition of the following knowledge, skills and competences:

#### Knowledge:

The student will become familiar with basic lexical terminology and will deepen his/her knowledge of the vocabulary of modern English. The student will learn the structural-functional characteristics of the English vocabulary, the theoretical principles of word-formation, and an understanding of word meaning.

#### Skills:

The student is familiar with the problems of different types of word-formation, can lexically analyse words from different points of view, and form lexemes in accordance with the principles of word-formation, can make practical use of the acquired theoretical knowledge in the analysis of a coherent authentic text, can identify the basic differences between English and Slovak word-formation, learn to use dictionaries and online resources to increase his/her English vocabulary, is able to read and critically analyse academic literature, is able to use the acquired knowledge in an appropriate and adequate way in practice, he/she has developed strategies for vocabulary acquisition.

#### Competences:

The student learns to work independently and in a team to solve lexical (word-formation and semantic) problems and tasks, is able to communicate on topics related to the formation and meaning of English words, is able to find and use digital resources and aids useful for further independent development and expansion of his/her vocabulary, develops the ability to analyse and synthesize linguistic material, is familiar with academic literature, is able to link the acquired theoretical knowledge with the subject of research in other linguistic disciplines, is able to apply the acquired knowledge and strategies in an appropriate way in his/her further education and in his/her professional practice.

Scale of assessment (preliminary/final): Continuous assessment (40%) Mid-term practical test (40%) Final assessment (60%) Final practical test (30%) Final theoretical test (30%)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the learning objectives declared in the profile of a graduate, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

The student will become familiar with basic lexical terminology and will deepen his/her knowledge of the vocabulary of modern English. The student will learn the structural-functional characteristics of the English vocabulary, the theoretical principles of word-formation, and an understanding of word meaning.

Skills:

The student is familiar with the problems of different types of word-formation, can lexically analyse words from different points of view, and form lexemes in accordance with the principles of word-formation, can make practical use of the acquired theoretical knowledge in the analysis of a coherent authentic text, can identify the basic differences between English and Slovak word-formation, learn to use dictionaries and online resources to increase his/her English vocabulary, is able to read and critically analyse academic literature, is able to use the acquired knowledge in an appropriate and adequate way in practice, he/she has developed strategies for vocabulary acquisition.

Competences:

The student learns to work independently and in a team to solve lexical (word-formation and semantic) problems and tasks, is able to communicate on topics related to the formation and meaning of English words, is able to find and use digital resources and aids useful for further independent development and expansion of his/her vocabulary, develops the ability to analyse and synthesize linguistic material, is familiar with academic literature, is able to link the acquired theoretical knowledge with the subject of research in other linguistic disciplines, is able to apply the acquired knowledge and strategies in an appropriate way in his/her further education and in his/her professional practice.

### **Class syllabus:**

Course contents:

Main themes of the course: The focus of lexicology, types of words, the main properties of lexemes, word structure, affixation, compounding and conversion, shortening and blending of words, back-formation, reduplication and lexical ellipsis, marginal types of word-formation, lexical and grammatical meaning, semantic aspects of sentences and utterances, semantic shifts.

By means of the above content, the student will learn about the lexical level of the English language, its structural-functional characteristics, and the ways of applying theoretical knowledge through practice in the analysis of English vocabulary, develops his/her foreign language (especially lexical and semantic) skills and vocabulary at the B2-C1 level, is able to read academic literature in English, learns to work independently and in a team to solve lexical questions and problems, is able to appropriately use the acquired knowledge and skills in the classroom.

**Recommended literature:**

Compulsory reading:

| <b>Educational activities:</b><br><b>Type of activities:</b> lecture<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 3  |  |
| <b>Recommended semester:</b> 1., 3., 5.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment (100% of the interim assessment).<br>The student will be evaluated on an ongoing basis:<br>a) defending a term paper with the content of current environmental problems on the territory of the Slovak Republic as well as environmental problems that are solved globally with a maximum value of 20 points<br>b) its elaboration in the form of analysis and critical evaluation of the chosen environmental issue, in the form of creating reflections from each presented environmental topic and application of the chosen topic to the education of pupils with a maximum value of 80 points.<br>A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. Credit will not be awarded to a student who obtains less than 40 points in a seminar paper and fails to defend the paper. To pass the course, a minimum score of 60% is required.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results), excellent performance, the student can work well with professional literature dealing with the issue of current environmental problems not only in the Slovak Republic but also at the global level, can critically evaluate environmental problems in society and create appropriate activating methods for the environmental problem usable in pedagogical practice<br>B (90-81%, very good - above average standard), excellent performance, the student can work with the literature dealing with the issues of current environmental problems not only in the Slovak Republic but also at the global level very well, but critical thinking in the field of environmental science is borderline, but can create appropriate activating methods for the environmental problem usable in pedagogical practice<br>C (80-73%, good - normal reliable work), good performance, the student can work well with literature dealing with current environmental problems not only in the Slovak Republic but also at the global level, but critical thinking in the field of environmental science is partially absent, but can create appropriate activating methods for the environmental problem usable in pedagogical practice |  |

D (72-66%, satisfactory - acceptable results), satisfactory performance, the student can only partially work with professional literature dealing with current environmental problems not only in the Slovak Republic but also at the global level, critical thinking in the field of environmental science is partially absent and only partially knows how to apply environmental theory in the form of the creation of activating methods in pedagogical practice

E (65-60%, sufficient - the results meet the minimum criteria), sufficient performance, the student can work with the literature dealing with current environmental problems not only in the Slovak Republic but also at the global level at a minimum level, critical thinking in the field of environmental science is absent and his ability to apply environmental theory in the form of creating activating methods in pedagogical practice is minimal

Fx (59-0%, insufficient - additional work required), insufficient performance, student is unable to work with literature dealing with current environmental issues not only in the Slovak Republic but also on a global level, nor critically evaluate environmental issues and is unable to apply environmental theory in the form of creating activating methods to pedagogical practice

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes and transferable competences:

Upon completion of the course, the student will gain basic information on nature conservation, quality of life assurance and remediation options, which will subsequently enable him/her to solve problems in environmental issues. He will be able to apply all this knowledge to teaching practice; he will strengthen his digital skills in searching for literature on environmental issues on appropriate professional domestic and foreign Internet portals, as well as his communication skills, critical thinking and evaluation of environmental problems in society.

### **Class syllabus:**

Brief outline of the course:

1. Ecology. (the student can distinguish between the concepts of ecology and environmental science, knows the relationships of organisms in the environment and how endogenous and exogenous factors affect the environment)
2. Stability and biodiversity of ecosystems. Protected areas. Regulation of trophic chains. Anthropocentrism, biocentrism and ecocentrism. (the student will learn to perceive the interconnectedness of relationships in nature, the sensitivity of ecosystem stability, how this stability is affected by man himself and ultimately be able to take a stance on the protection of individual ecosystems for the need to maintain balance in nature)
3. Waste management. (the student will get acquainted with the issues of waste management, the creation and regulation of the amount of waste in society, the problem of black dumps but also with the process of recycling as an option for environmental protection)
4. Transport and the greenhouse effect. (the student is able to assess the negative impact of transport use on the environment and is able to adopt the right attitude to dealing with the issue in terms of protecting the environment in which he/she lives)
5. Environmental education in primary schools. Environmental projects of the Slovak Republic. (The student knows how to incorporate environmental education as a cross-cutting theme in the state educational programme, knows how environmental education contributes to the development of the pupil's personality by acquiring the ability to understand, analyse and evaluate the relationships between man and his environment on the basis of knowledge of the laws governing life on Earth, to know and understand the connections between the development of human population and the relationship to the environment in different areas of the world, to understand the connections between local and global problems and their own responsibility in relation to the environment, ultimately the student will also become familiar with the current environmental projects of the

Slovak Republic that support this education at primary school and will be able to bring the environmental problems to the student's mental level by appropriate activating methods)

| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde016/22   | <b>Course title:</b><br>Ethics and professional ethics |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 3  |  |
| <b>Recommended semester:</b> 1., 3., 5.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>100% of the interim grade, which includes 30% class activity (30 points) and 70% project (70 points).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>The rating is awarded on a scale:<br>A (100-94%, excellent - outstanding results), the student reflects correctly and actively both critically and creatively knowledge, including its meaningful integration into the realities of life and pedagogical practice.<br>B (93-86%, very good - above average standard), the student reflects critically on knowledge appropriately, including their meaningful integration into the realities of life and pedagogical practice.<br>C (85-76%, good - routine reliable work), students performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge.<br>D (75-68%, satisfactory - acceptable results), students were less prepared during the semester, they have slight deficiencies in theoretical knowledge. They cannot critically analyze information.<br>E (67-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge.<br>Fx (59-0%, insufficient - extra work required).<br><b>Learning outcomes:</b><br><b>Learning objectives and outcomes and transferable competences:</b><br>The thematic focus of the course introduces students to applied ethics and its disciplinary divisions, to defining the basic concepts of ethics, explaining morality as a social regulator, moral norms and the principles of creating ethical codes. It focuses on the professional ethics of the teaching profession (teacher competences, ethical dilemmas in the teaching profession, etc.) and the importance of a code of ethics in this profession. The aim of the course is to highlight the importance of a favourable |  |

classroom and school climate and to work with the content of the Convention on the Rights of the Child. Using selected examples from other branches of applied ethics (bioethics, media ethics, etc.) to show the importance of the presence of a code of ethics in the professions, the possibility of using classical ethical concepts and also different alternatives in solving ethical dilemmas.

This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).

The course contributes to the gradual development of important professional competences of future teachers by its focus and methods of education.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

The thematic focus of the course introduces students to applied ethics and its disciplinary divisions, to

defining the basic concepts of ethics, explaining morality as a social regulator, moral norms and the principles of creating ethical codes. It focuses on the professional ethics of the teaching profession (teacher competences, ethical dilemmas in the teaching profession, etc.) and the importance of a code of ethics in this profession. The aim of the course is to highlight the importance of a favourable classroom and school climate and to work with the content of the Convention on the Rights of the Child. Using selected examples from other branches of applied ethics (bioethics, media ethics, etc.) to show the importance of the presence of a code of ethics in the professions, the possibility of using classical ethical concepts and also different alternatives in solving ethical dilemmas.

This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication). The course contributes to the gradual development of important professional competences of future teachers by its focus and methods of education.

### **Class syllabus:**

Brief outline of the course:

1. Introduction to the subject: defining the basic concepts: ethics and morality.

Ethics and professional ethics: definition of basic terms: applied ethics - sectoral division of applied ethics. Professional ethics as a part of applied ethics.

2. Professional tact and etiquette as a basis for the formation of the code of ethics of individual professions.

3. The teaching profession and the teacher's code of ethics. Status and role of the teacher. Resolving dilemmas in the teaching profession.

4. Positive climate in the classroom, relationships between school climate factors.

5. Convention on the Rights of the Child.

6. A closer definition of bioethics and its areas of interest on concrete examples, the issue of the code of ethics. Classical ethical theories and alternative methods in solving ethical dilemmas.

| <b>Course ID:</b><br>PdF.KPg/B-VUZde024/22  | <b>Course title:</b><br>Family education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 1., 3., 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points).<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, and above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help |  |

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the Family Education course is to convey basic information about the family as an educational institution and about the possible impact of the specifics of family life and family education on the educational process in school. The student is able to define the family as an educational institution, remembers its functions, knows the typology of families. The student can explain the transformations of the family in a historical context and the transformations of the family within its life cycle. The student knows and understands the educational goals, content, methods and means of family education. The student is able to critically evaluate and articulate the specifics of family education in alternative forms of partnership cohabitation. The student is able to categorize styles of family education. Describe and interpret inappropriate approaches in family education and predict their possible effects on student performance in school. The student is able to apply the acquired knowledge in solving educational difficulties of the pupil resulting from the specifics of family life and family education.

Transferable competences: by analysing, proposing solutions and discussing problem problems assigned during seminars, the student is able to communicate his/her conclusions, think critically, think in context.

### **Class syllabus:**

Brief outline of the course:

1. Definition of family (traditional vs. newer concept of family), family typology and functions.
2. Basic demographic changes of the family in historical context (from traditional to postmodern family).
3. Family life cycle. Marriage as an institution. Education for marriage and parenthood.
4. The (un)stable family - the contemporary family and the issue of divorce. Inappropriate approaches in family upbringing in the period of divorce. Pupil in school in the period of parents' divorce process.
5. Alternative forms of cohabitation (cohabitation, mingle, single, "patchwork", homosexual partnerships...) - specifics of family education in alternative forms of cohabitation.
6. Pedagogy of the family. Theory of family education. Objectives, content, methods and means of family education. Styles of family education.
7. Relational attachment as a key prerequisite for harmonious personality development. Pupil's manifestations at school with regard to the type of relational attachment.
8. Alternative family education. Specifics of raising a child in foster care.
9. Different forms of violence in the family and their negative impact on the child's personality.

10. Specifics of family education in families with children with disabilities.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the course Family Education and Family-School Cooperation is to convey basic information about the contemporary family as an important socializing and educational institution. Students will be introduced to the implications of the specifics of family life and family education specifically for the educational process in school. The student will be able to define the family as an educational institution, remember its functions, and know the typology of families. The student can explain the transformations of the family in a historical context and the transformations of the family within its life cycle. The student knows and understands the educational goals, content, methods, styles and means of family education. Describe and interpret inappropriate approaches in family education and predict their possible effects on student performance in school. The student will be able to apply the knowledge acquired in solving educational difficulties of the pupil resulting from the specifics of family life and family education. The student deals with trends and current forms in family-school cooperation, is able to analyze them and propose solutions in approaches of this cooperation. A particular issue in the aims of education is the knowledge of the aims, criteria and methods of home education.

Transferable competences: by analysing, proposing solutions and discussing the problem tasks assigned during the seminars, the student is able to communicate his/her conclusions, think critically, and reason in context.

Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student will also complete an intermediate written assessment of knowledge (maximum possible points - 60). To pass the course, a minimum of 60% of the points must be obtained (min. 60 out of 100 points).<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |  |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the course Family Education and Family-School Cooperation is to convey basic information about the contemporary family as an important socializing and educational institution. Students will be introduced to the implications of the specifics of family life and family education specifically for the educational process in school. The student will be able to define the family as an educational institution, remember its functions, and know the typology of families. The student can explain the transformations of the family in a historical context and the transformations of the family within its life cycle. The student knows and understands the educational goals, content, methods, styles and means of family education. Describe and interpret inappropriate approaches in family education and predict their possible effects on student performance in school. The student will be able to apply the knowledge acquired in solving educational difficulties of the pupil resulting from the specifics of family life and family education. The student deals with trends and current forms in family-school cooperation, is able to analyze them and propose solutions in approaches of this cooperation. A particular issue in the aims of education is the knowledge of the aims, criteria and methods of home education.

Transferable competences: by analysing, proposing solutions and discussing the problem tasks assigned during the seminars, the student is able to communicate his/her conclusions, think critically, and reason in context.

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

Students know the mechanisms to prevent the violation of equal opportunities for women and men (girls and boys) in education; they can identify gender stereotypes and their negative consequences in the educational process. They use methods to deepen gender democracy in school; They perceive the educational process from a gender perspective. They can name and find connections between gender-sensitive education and the cross-cutting theme of education for marriage and parenthood (sex education); apply the gender perspective in relational sex education.

Learning objectives:

Students will acquire knowledge and skills that will enable them to prevent violations of equal opportunities for women and men (girls and boys), eliminate gender stereotypes and their negative consequences in the educational process, deepen gender democracy at school, and perceive the educational process from a gender perspective.

### **Class syllabus:**

Brief outline of the course:

Definition of the terms: gender, sex, gender stereotypes, gender sensitive education, direct and indirect discrimination. Education and training from a gender perspective - theories of gender socialisation, feminist pedagogy, models of gender-sensitive pedagogy. Gender in the pedagogical process. Inequalities in school from a gender perspective. Language - gender insensitivity. Research, projects, development of study materials, methodologies - gender perspective. Gender aspects of marriage and parenthood/sexual relationship education in schools.

| <b>Educational activities:</b><br><b>Type of activities:</b> lecture + seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 5  |  |
| <b>Recommended semester:</b> 1.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by examination, the weighting of the interim and final assessment is 50/50. As part of the interim assessment, students will create (25 points) and critically analyse (25 points) a reflective journal (can take the form of a concept map) focused on pedagogical situational (self)reflection (50 points in total). As part of the final assessment, they will develop (30 points) and defend in a colloquium discussion (20 points) a term paper - a conceptual proposal (with pedagogical analysis of a specific problem(s)) to address a selected educational problem(s) in a school or extra-curricular setting (50 points total). The aim is coherent pedagogical (self-)reflection, critique, identification of critical moments of education (and/or teaching) and presentation of students' forming pedagogical thinking, production of ideas for improving the personal progress of the educated and the teacher, anticipation of the development of educational reality (under the influence of current problems and theories). A minimum of 91 points is required for a final grade of A, a minimum of 81 points is required for a grade of B, a minimum of 73 points is required for a grade of C, a minimum of 66 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course you must obtain a minimum of 60% of the marks.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A (100-91%, excellent - outstanding results) - the student knows, understands and can apply (not only basic) relevant professional terminology in the outputs, can analyse, synthesise and assess (critically evaluate, develop, enrich with own ideas), is oriented in current scientific-pedagogical theories and can also critically analyse and evaluate them - in relation to the key stages of their |  |

development and their implications for practice. It can anticipate their further development, identify and propose solutions to problems in relation to the needs of practice,

B (90-81%, very good - above average standard) - the student knows, understands and can apply (not only basic) relevant professional terminology in the outputs, can critically evaluate, develop and enrich it with his/her own ideas, is familiar with current scientific and pedagogical theories and can also critically evaluate them - in relation to the key stages of their development and their implications for practice, but only in selected problems, not in a generalizing way,

C (80-73%, good - normal reliable work) - the student knows, understands and can apply at least the basic relevant professional terminology in the outputs, can apply it adequately, but lacks its development by own ideas, applies it in specific, concrete and not generalizing contexts, is oriented in current scientific-pedagogical theories, but lacks their critical and generalizing evaluation,

D (72-66%, satisfactory - acceptable results) - the student knows, understands and can apply at least the basic relevant professional terminology in the outputs, its correct application is limited and its development by own ideas is absent, the student applies it only in specific, concrete and not generalizing contexts, the orientation in current scientific-pedagogical theories is limited to specific areas, their critical evaluation is absent,

E (65-60%, sufficient - the results meet the minimum criteria) - the student has only a limited understanding and can apply the basic relevant professional terminology in the outputs, its application is limited in terms of correctness and accuracy, there is no critical analysis and development of their own ideas, the orientation in current scientific-pedagogical theories is limited to partial areas, there is no critical evaluation and generalization of them,

Fx (59-0%, insufficient - additional work is required) - student with significant limitations knows but cannot coherently apply (even basic) relevant professional terminology in the outputs, its application is incoherent, limited to limited contexts, orientation in current scientific-pedagogical theories is incoherent, limited to partial areas, their generalizing application is absent.

Scale of assessment (preliminary/final): 50/50

### **Learning outcomes:**

Learning outcomes: by completing the course, the student will be competent to implement analytical, synthesizing and evaluative processes within the framework of (scientifically relevant - practice-supported) theories of General educational theory, processes of personal-professional development on the basis of cognition and (self-)reflection, will know and be able to apply (in the specific outcomes of the course) the necessary resources, strategies and methods for this purpose. Transferable competences: the student will know and be able to apply resources, strategies and methods for the continuous development of intra and interpersonal communication, organizational, (self-)cognitive competences.

### **Class syllabus:**

Brief outline of the course: General educational theory explores educational reality in its breadth and complexity, helping teachers to orient themselves and gain the clearest possible picture of the complex spectrum of different determinants that shape it. It makes accessible the formation and nature of pedagogical thought and characterizes the whole process of constructing pedagogical knowledge. There is a present and necessary discourse in pedagogy about different conceptions and approaches to educational reality. Orientation in the contemporary scientific discourse of pedagogy initiates in student teachers the process of forming individual conceptions which, for their teaching practice, constitute the basic platform of their pedagogical thinking and action.

Lecture topics:

1. Pedagogy as a science. Social, gnoseological, psychological and logical foundations of the science of pedagogy; Scientific legitimacy of pedagogy; Subject of pedagogy; Use and significance of pedagogy in the present.

2. The development of pedagogical thinking in the 20th and 21st centuries. Basic paradigms in education and training; Paradigms of humanization and constructivism; subject and object of education and training.
3. Factors in the development of the human individual. Personality in relation to education; Functions of education; Education, education, teaching, teaching, learning (to); Selected methods of education.
4. Education as a subject of pedagogical science. The nature of education; Attributes of education; Education as deliberate purposeful action; Education and self-education.
5. Conceptual structure of education and training in Slovakia Determinants of selection of the content of education and training in Slovakia; Documents of educational policy; International and domestic documents of educational policy.
6. Education outside the classroom. Specific features, organisation and aims of education outside the classroom.
7. Principles, methods, forms and means of education and training for the meaningful development of the individual (teaching process). Educational problems in school and their optimal solution.
8. Teacher and educator. Status of teacher and educator; competencies, professionalism of teacher; educational styles; humanization of education. Pedagogical diagnostics and effectiveness of the educational process.
9. The phenomenon of teacher social competence. Basic concepts; Characteristic features, approaches and their meaning.
10. Alternative Education. Basic typology of alternative schools; History and development; Modern alternative approaches.
11. Scientific approaches in pedagogy. Basic concepts; Objectives, methods and conceptual bases of pedagogical research.

## COURSE DESCRIPTION

|   |   |
|---|---|
| <b>Academic year:</b> 2022/2023   |   |
| <b>University:</b> Comenius University Bratislava   |   |
| <b>Faculty:</b> Faculty of Education  |   |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde007/22  | <b>Course title:</b><br>General theory of instruction |
| <b>Educational activities:</b><br><b>Type of activities:</b> lecture + seminar<br><b>Number of hours:</b><br><b>per week: 3 per level/semester: 42</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 5   |   |
| <b>Recommended semester:</b> 4.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed with an examination. The weighting of the interim and final assessment is 50/50.<br>As part of the interim assessment, students will create (25 points) and critically analyse (25 points) a reflective journal (can take the form of a concept map) focused on pedagogical-didactic situational (self)reflection (50 points in total). As part of the final assessment, they will develop (30 points) and defend in a colloquial discussion (20 points) a term paper - a conceptual proposal (with a pedagogical-didactic analysis of a specific problem) for solving a selected teaching-learning problem in school. The aim is a coherent pedagogical-didactic (self-)reflection, critique, identification of critical moments of teaching and forming pedagogical thinking, production of ideas for improving the personal progress of learners and teachers, anticipation of the development of educational reality (under the influence of current problems and theories). A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. To pass the course you must obtain a minimum of 60% of the marks.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A (100-91%, excellent - outstanding results) - the student knows, understands and can apply (not only basic) relevant professional terminology in the outputs, can analyse, synthesise and assess (critically evaluate, develop, enrich with own ideas), is oriented in the current scientific-didactic theories and can also critically analyse and evaluate them - in relation to the key stages of their |   |

development and their implications for practice. It can anticipate their further development, identify and propose solutions to problems in relation to the needs of practice,

B (90-81%, very good - above average standard) - the student knows, understands and can apply (not only basic) relevant professional terminology in the outputs, can critically evaluate, develop and enrich it with his/her own ideas, but only in selected problems and not in a generalizing way, is oriented in current scientific-didactic theories and can also critically evaluate them - in relation to the key stages of their development and their implications for practice, but only in selected problems and not in a generalizing way.

C (80-73%, good - normal reliable work) - the student knows, understands and can apply at least the basic relevant professional terminology in the outputs, can apply it appropriately, but lacks its development by own ideas, applies it in specific, concrete and not generalizing contexts, is oriented in current scientific-didactic theories, but lacks their critical and generalizing evaluation,

D (72-66%, satisfactory - acceptable results) - the student knows, understands and can apply at least the basic relevant professional terminology in the outputs, its correct application is limited and its development by own ideas is absent, the student applies it only in specific, concrete and not generalizing contexts, the orientation in current scientific-didactic theories is limited to specific areas, their critical evaluation is absent,

E (65-60%, sufficient - the results meet the minimum criteria) - the student has only a limited understanding and can apply the basic relevant professional terminology in the outputs, its application is limited to defined contexts, critical analysis and development of own ideas is absent, orientation in the current scientific-didactic theories is limited to specific areas, their critical evaluation and generalization is absent,

Fx (59-0%, insufficient - additional work is required) - student with significant limitations knows, understands, but cannot coherently apply (even basic) relevant professional terminology in the outputs, its application is incoherent, limited to limited contexts, orientation in current scientific-didactic theories is incoherent, limited to specific areas, their generalizing application is absent.

Scale of assessment (preliminary/final): 50/50

### **Learning outcomes:**

Learning outcomes: by completing the course, the student will be competent to implement analytical, synthesizing and evaluative processes within the framework of (scientifically relevant - practice-supported) theories of didactics, processes of personal-professional development based on cognition and (self-)reflection, he/she will be familiar with and be able to apply (in the specific outcomes of the course) the necessary resources, strategies and methods for this purpose.

Transferable competences: the student will know and be able to apply resources, strategies and methods for the continuous development of intra and interpersonal communication, organizational, (self-)cognitive competences.

### **Class syllabus:**

Brief outline of the course: didactics explores the educational process in its breadth and complexity, helping teachers to orient themselves and to get the clearest possible picture of the complex range of different determinants that need to be taken into account in teaching. It makes accessible the formation and nature of teaching objectives, curriculum, as well as practical didactic principles in the teaching process. It characterizes the whole process of constructing a lesson (from the planning phase to evaluation and feedback). A discourse of different concepts and approaches to the teaching process is currently present and necessary in didactics. The orientation in teaching conceptions in student teachers initiates the process of developing individual conceptions, which for their practice represent the basic platform of their pedagogical thinking.

Topics of lectures/seminars:

1. Didactics as a science. Didactic ideas and views of some educators; Subject of didactics; brief development of theoretical foundations; division of didactics; Methods of didactic research.
2. The system and elements of the teaching process. Concept of the teaching process; Objectives of the teaching process; Social, gnoseological, psychological and logical foundations of the teaching process; Conditions of the teaching process; Phases of the teaching process; Teaching as a synthesis of education and upbringing; Models of the teaching process.
3. Educational content and curriculum. Definition of basic terms; Documents of educational policy in Slovakia after 1989; Planned curriculum; Decentralisation of curriculum; Two-level model of curriculum.
4. Teaching/educational objectives. Definition of basic terms; From general to specific learning objectives; Specific (sub) learning objectives; Key competences.
5. Teaching methods. Concept of teaching methods; Classification of teaching methods and their characteristics - logical learning procedures; Characteristics of selected methods, monological methods, dialogical methods, selected activating methods; Determinations of optimal selection of methods.
6. Selected teaching concepts. Introduction to the concepts of teaching; Verbal-narrative teaching; Problem-based teaching; Cooperative teaching; Constructivist concepts of teaching; Constructivism as a theory of cognition; Foundations of constructivism and socio-cognitive constructivism in the theories of J. Piaget and L. S. Vygotsky.
7. Transmission versus construction in the implementation of instruction. Basic features of two antagonistic approaches to teaching - Behaviorism vs. constructivism; Deductive, inductive and participatory approaches in teaching
8. Didactic principles/principles for a meaningful teaching process. Characteristics of didactic principles; Alternative approaches to support authentic/productive learning.
9. Teacher and pupil in teaching. Teaching styles of the teacher; Professional competences; Teacher self-reflection; Creativity in the teacher's work; Pupil in teaching; Communication between teacher and pupil.
10. Diagnostics and assessment in teaching. Control of teaching results; Roles and functions of control in teaching; Internal and external control of the school.
11. Material and didactic resources. Concept and classification of material didactic means; Classification of teaching aids and technical equipment; Functions of material didactic means in the teaching process.

| <b>Prerequisites:</b>  |  |
| <b>Recommended prerequisites:</b><br>none  |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>A student is entitled to an alternative date of continuous assessment (if he/she has not attended for medical or other compelling reasons) but is not entitled to a re-sit in-term date. Attendance (maximum of 3 excused absences) is a prerequisite for taking the final test.<br>Continuous assessment (100 percent):<br>Assessed practical activities (tasks, exercises) focused on the grammatical phenomena and structures covered by curriculum (20 percent)<br>Mid-term test (40 percent)<br>End-of-term test (40 percent)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX  |  |

A (excellent performance): The student is able to work independently with unfamiliar text, navigate grammatical structures, recognize them within a coherent text, analyse them correctly, and understand them in context without any help from the teacher. Independently and correctly identifies grammatical categories, understands the principles of word formation and independently applies grammatical rules to practical examples. Can find and correct errors in a text without teacher assistance and justify his/her claims at the appropriate C1 level.

B (very good performance): The student can work independently with an unfamiliar text, is familiar with grammatical structures, can recognise them within a coherent text with minimal assistance from the teacher or group, analyse them correctly and understand them in context. With minimal assistance, navigation by the teacher, correctly identifies grammatical categories, understands the principles of word formation, and independently applies grammatical rules to practical examples. With minimal help from the teacher, is able to find and correct errors in the text, justify his/her claims at the appropriate C1 language level, and makes only minimal errors in speech.

C (good performance): The student can work with an unfamiliar text, relying on the teacher's help and guidance, is familiar with grammatical structures, can recognise them within a coherent text with the teacher's or group's assistance, analyse them correctly and, with help, understand them in context. With the teacher's help and navigation, identifies grammatical categories, understands the principles of word formation and applies grammatical rules to practical examples. With the teacher's help, he/she can find and correct errors in the text, justify his/her claims at the appropriate language level C1, makes mistakes in speech.

D (satisfactory performance): The student can work with unfamiliar text, relies heavily on the teacher's help and guidance, is familiar with grammatical structures, can recognise them within a coherent text with the teacher's or group's assistance, makes minor errors when analysing them. With the teacher's help and guidance, identifies grammatical categories, understands the principles of word formation. Applies grammatical rules to practical examples with significant teacher assistance. Can correct errors in text.

E (satisfactory performance): The student can work with unfamiliar text, relies heavily on teacher prompting and guidance, has sufficient command of grammatical structures, can recognise them within a coherent text only with significant teacher or group help, makes errors when analysing them, identifies grammatical categories with the teacher's help and navigation, understands the basic principles of word formation. The student relies on examples from the classroom. He/she can correct errors in text, makes errors in speech that do not affect comprehension.

Scale of assessment (preliminary/final): Continuous assessment (100 percent): Assessed practical activities (tasks, exercises) focused on the grammatical phenomena and structures covered by curriculum (20 percent) Mid-term test (40 percent) End-of-term test (40 percent)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a graduate, this course aims for a student to develop the following knowledge, skills, and competences:

Knowledge:

The student will master the linguistic terminology relevant to pedagogical grammar, systematizing the knowledge of the functioning of English grammar acquired in previous grammar courses. The student will master the basic structural-functional characteristics, develop his/her declarative and procedural knowledge of grammar. The student will acquire the strategies necessary for the correct analysis of an authentic English text.

Skills:

The student develops comparative-linguistic thinking, uses the ability to analyse and synthesize when working with an unfamiliar English text on the basis of comparing selected phenomena of Slovak and English grammar, uses argumentation and presentation skills to declare the knowledge

and understanding acquired through self-study. She/he knows and uses grammatical and lexical structures at C1 level.

Competences:

The student can use self-study strategies effectively and takes responsibility for his/her own development. The student is able to communicate his/her knowledge effectively, presenting it in front of other students. The student is able to think in broader contexts, does not understand individual grammatical phenomena in isolation, synthesises and demonstrates metacognitive skills. He/she demonstrates the ability to think abstractly.

**Class syllabus:**

Course contents:

Main themes of the course: Systematization of knowledge about the functioning of English grammar, definition of key grammatical phenomena, work with grammatical text, selected grammatical tenses in English texts, regularities of English syntax and their occurrence in English texts, comparison of selected phenomena of Slovak and English syntax.

The student will systematize the knowledge about the functioning of English grammar acquired in the required courses focused on grammar and linguistics. During the course, the student will acquire the skills necessary for grammatical analysis of text, which he/she will be able to apply in practice, develop presentation and argumentation skills in English. They will be able to use them not only in independent work but also in cooperation with other students. Through the above content, the student is oriented in several levels of language, learns their structural-functional characteristics and acquires ways of their application in teaching practice. At the same time, the student is able not only to critically analyse but also to modify grammatical structures in an appropriate way. In the course of teaching, the student acquires methodological recommendations for teaching the grammatical phenomena being studied

| <b>Recommended semester:</b> 1.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed with a grade of: 100% of the intermediate grade.<br>The interim evaluation includes the following: <ul style="list-style-type: none"> <li>• Intermediate work: 40 points,</li> <li>• term paper: 60 points.</li> </ul> The rating is awarded on a scale: <ul style="list-style-type: none"> <li>A (100-91%, excellent - excellent results with only minimal errors),</li> <li>B (90-81%, very good - above average results with minor errors),</li> <li>C (80-73%, good - normal reliable work, average results),</li> <li>D (72-66%, satisfactory - acceptable results, but significant errors occur),</li> <li>E (65-60%, sufficient - results meet minimum criteria),</li> <li>Fx (59-0%, insufficient - extra work required).</li> </ul> For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |  |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

Students will acquire knowledge in the field of professional text production and will be able to work independently with professional text. They will be familiar with the specific genres of professional texts in pedagogy and the requirements for their content, form and language.

The student will be able to use the acquired knowledge and skills in the creation of his/her own professional text,

teaching resources, term and final papers.

The student will master access to material such as scientific and professional literature, statistical materials, empirical data, etc.; he/she will master the principles of using professional terminology, editing the linguistic and formal aspects of a professional text. Students will acquire the skills to write a professional text in pedagogy in compliance with the principles of professional text production in the sense of publishing ethics.

Transferable competences: the course develops students' analytical, critical, evaluative and creative thinking, reasoning in context and supports the development of their interpersonal skills, self-development and personal and professional growth.

### **Class syllabus:**

Brief outline of the course:

Definition of basic terms.

Study of professional texts, research, effective reading and documentation of what you have read.

Genres used in pedagogy, professional style and peculiarities of professional text structure.

Professional terminology and its use.

Linguistic and formal aspects of the professional text.

Content of professional texts.

Recommended models for the production of professional texts (IMRAD).

Working text, its revision, formal and linguistic adaptation.

The most common mistakes when writing professional texts.

Publication ethics, plagiarism and copyright infringement.

Selected software tools for creating professional texts in pedagogy.

Methods of in-text citation.

Bibliographic references

## COURSE DESCRIPTION

|  |  |
|--|--|
| <b>Academic year:</b> 2022/2023  |  |
| <b>University:</b> Comenius University Bratislava  |  |
| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde009/22   | <b>Course title:</b><br>Guidelines for writing professional texts in education |
| <b>Educational activities:</b><br><b>Type of activities:</b> lecture + seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 5  |  |
| <b>Recommended semester:</b> 2.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed with a grade of: 100% of the intermediate grade.<br>The interim evaluation includes the following: <ul style="list-style-type: none"> <li>• Intermediate work: 40 points,</li> <li>• term paper: 60 points.</li> </ul> The rating is awarded on a scale: <ul style="list-style-type: none"> <li>A (100-91%, excellent - excellent results with only minimal errors),</li> <li>B (90-81%, very good - above average results with minor errors),</li> <li>C (80-73%, good - normal reliable work, average results),</li> <li>D (72-66%, satisfactory - acceptable results, but significant errors occur),</li> <li>E (65-60%, sufficient - results meet minimum criteria),</li> <li>Fx (59-0%, insufficient - extra work required).</li> </ul> For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |  |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

Students will acquire knowledge in the field of professional text production and will be able to work independently with professional text. They will be familiar with the specific genres of professional texts in pedagogy and the requirements for their content, form and language.

The student will be able to use the acquired knowledge and skills in the creation of his/her own professional text,

teaching resources, term and final papers.

The student will master access to material such as scientific and professional literature, statistical materials, empirical data, etc.; he/she will master the principles of using professional terminology, editing the linguistic and formal aspects of a professional text. Students will acquire the skills to write a professional text in pedagogy in compliance with the principles of professional text production in the sense of publishing ethics.

Transferable competences: the course develops students' analytical, critical, evaluative and creative thinking, reasoning in context and supports the development of their interpersonal skills, self-development and personal and professional growth.

### **Class syllabus:**

Brief outline of the course:

Definition of basic terms.

Study of professional texts, research, effective reading and documentation of what you have read.

Genres used in pedagogy, professional style and peculiarities of professional text structure.

Professional terminology and its use.

Linguistic and formal aspects of the professional text.

Content of professional texts.

Recommended models for the production of professional texts (IMRAD).

Working text, its revision, formal and linguistic adaptation.

The most common mistakes when writing professional texts.

Publication ethics, plagiarism and copyright infringement.

Selected software tools for creating professional texts in pedagogy.

Methods of in-text citation.

| <b>Number of credits:</b> 3  |   |
| <b>Recommended semester:</b> 1., 3., 5.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed with an assessment, the midterm/final assessment ratio is 100/0, which includes a final test in the assessment week of the semester (100% of the assessment). A minimum of 60% of the total mark is required to pass the course.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required)<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in class during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing assignments using a model, above-average professional knowledge and application of that knowledge in problem solving assignments using tutorials, above-average problem orientation, above-average communication skills, responsibility and timely completion of assignments, and above-average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to prepare assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the teacher, good orientation in the subject, good communication skills, completion of the assigned tasks, average activity in the class during the semester at the invitation of the teacher.<br>A minimum of 66 points is required for a final grade of D. For this grade, the student should demonstrate: the ability to develop assignments using a given template and with the assistance of the |   |

instructor, average proficiency and application in problem solving in a group or with the assistance of the instructor, average orientation to the problem, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Completion of the course will provide students with a certain handle on orientation in the nowadays almost opaque tangle of diverse philosophical directions, movements, orientations and attitudes, will provide them with basic categorical-conceptual equipment and methodological instrumentation useful in other special sciences and disciplines (sociology, pedagogy, political science, psychology, etc.), which will help to bridge their particularism in favour of a global vision and solutions to the problems of the contemporary world. Knowledge of the approaches of different philosophical trends to certain problems will facilitate the students' professional and human orientation in the contemporary world, since many pedagogical, economic, social, legal and political concepts are based on these philosophical trends as their conceptual framework. The course also emphasizes the mapping of these overlaps of philosophy into other components of culture. The problem field thus delineated will help the students to reflect and specify their own position and provide arguments for the vindication of their own positions, thus contributing to better self-knowledge and self-identification. History of Philosophy provides students with the experience of encountering the "other", giving guidance and cultivating habits of coping with it, and thus teaching them tolerance and respect for other points of view. By completing the course, the student develops transferable competencies such as communication skills, analytical skills, abstract thinking skills, critical thinking skills, motivation and the ability to learn, and reasoning in context.

Learning objectives and transferable competences:

To familiarize students with the history of European philosophical thought and to provide them with a basic conceptual and methodological apparatus that they will be able to use in other special sciences such as pedagogy, political science, psychology, or sociology.

### **Class syllabus:**

Brief outline of the course:

History of Philosophy I focuses on the period from Antiquity to the French Enlightenment.

1. Introduction: philosophy and its importance for man; The study of the history of philosophy as an introduction to philosophy; Periodization of the history of philosophy.
2. Ancient Philosophy: the Pre-Socratics (Ionian Philosophy - School of Miletus, Xenophanes, Heraclitus; Philosophy in the West - Pythagoras, Parmenides, Zeno, Empedocles; Reaction of Ionian Philosophy - Anaxagoras, Democritus); Classical Greek Philosophy (Sophists, Socrates, Plato, Aristotle); Hellenistic Period (Stoicism, Epicureanism, Skepticism).
3. Medieval Philosophy: Patristics (Augustine); Early Scholasticism (Eriugena, Anselm of Canterbury, Abaelard); High Scholasticism (Albert the Great, Aquinas, Bonaventure, R. Bacon); Late Scholasticism (Occam, Scotus)
4. Renaissance philosophy: M. Kuzansky; Renaissance Platonism and Aristotelianism (Ficinus, Mirandola, Pompanazzi); Renaissance natural science (Copernicus, Kepler, Galilei)

Renaissance philosophy of nature (Telesio, Bruno); Renaissance social philosophy (Machiavelli, More, Campanella); Renaissance humanism (Erasmus of Rotterdam, Montaigne); Reformation (Luther, Calvin, Münzer, Zwingli)  
 5. Modern Philosophy: Origins of Modern Empiricism and Mechanistic Materialism (F. Bacon, Hobbes); Modern Rationalism (Descartes, Spinoza, Leibniz); Modern Empiricism (Locke, Berkley, Hume)  
 6. The Enlightenment in France (Montesquieu, Voltaire, Rousseau, the Encyclopedists, Materialists)

| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed with an assessment, the midterm/final assessment ratio is 100/0, which includes a final test in the assessment week of the semester (100% of the assessment). A minimum of 60% of the total mark is required to pass the course.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required)<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in class during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing assignments using a model, above-average professional knowledge and application of that knowledge in problem solving assignments using tutorials, above-average problem orientation, above-average communication skills, responsibility and timely completion of assignments, and above-average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to prepare assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the teacher, good orientation in the subject, good communication skills, completion of the assigned tasks, average activity in the class during the semester at the invitation of the teacher.<br>A minimum of 66 points is required for a final grade of D. For this grade, the student should demonstrate: the ability to develop assignments using a given template and with the assistance of the |   |

instructor, average proficiency and application in problem solving in a group or with the assistance of the instructor, average orientation to the problem, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Completion of the course will provide students with a certain handle on orientation in the nowadays almost opaque tangle of diverse philosophical directions, movements, orientations and attitudes, will provide them with basic categorical-conceptual equipment and methodological instrumentation useful in other special sciences and disciplines (sociology, pedagogy, political science, psychology, etc.), which will help to bridge their particularism in favour of a global vision and solutions to the problems of the contemporary world. Knowledge of the approaches of different philosophical trends to certain problems will facilitate the students' professional and human orientation in the contemporary world, since many pedagogical, economic, social, legal and political concepts are based on these philosophical trends as their conceptual framework. The course also emphasizes the mapping of these overlaps of philosophy into other components of culture. The problem field thus delineated will help the students to reflect and specify their own position and provide arguments for the vindication of their own positions, thus contributing to better self-knowledge and self-identification. History of Philosophy provides students with the experience of encountering the "other", giving guidance and cultivating habits of coping with it, and thus teaching them tolerance and respect for other points of view. By completing the course, the student develops transferable competencies such as communication skills, analytical skills, abstract thinking skills, critical thinking skills, motivation and the ability to learn, and reasoning in context.

Learning objectives and transferable competences:

To familiarize students with the history of European philosophical thought and to provide them with a basic conceptual and methodological apparatus that they will be able to use in other special sciences such as pedagogy, political science, psychology, or sociology.

### **Class syllabus:**

Brief outline of the course:

History of Philosophy I focuses on the period from Antiquity to the French Enlightenment.

1. Introduction: philosophy and its importance for man; The study of the history of philosophy as an introduction to philosophy; Periodization of the history of philosophy.
2. Ancient Philosophy: the Pre-Socratics (Ionian Philosophy - School of Miletus, Xenophanes, Heraclitus; Philosophy in the West - Pythagoras, Parmenides, Zeno, Empedocles; Reaction of Ionian Philosophy - Anaxagoras, Democritus); Classical Greek Philosophy (Sophists, Socrates, Plato, Aristotle); Hellenistic Period (Stoicism, Epicureanism, Skepticism).
3. Medieval Philosophy: Patristics (Augustine); Early Scholasticism (Eriugena, Anselm of Canterbury, Abaelard); High Scholasticism (Albert the Great, Aquinas, Bonaventure, R. Bacon); Late Scholasticism (Occam, Scotus)
4. Renaissance philosophy: M. Kuzansky; Renaissance Platonism and Aristotelianism (Ficinus, Mirandola, Pompanazzi); Renaissance natural science (Copernicus, Kepler, Galilei)

Renaissance philosophy of nature (Telesio, Bruno); Renaissance social philosophy (Machiavelli, More, Campanella); Renaissance humanism (Erasmus of Rotterdam, Montaigne); Reformation (Luther, Calvin, Münzer, Zwingli)  
 5. Modern Philosophy: Origins of Modern Empiricism and Mechanistic Materialism (F. Bacon, Hobbes); Modern Rationalism (Descartes, Spinoza, Leibniz); Modern Empiricism (Locke, Berkley, Hume)  
 6. The Enlightenment in France (Montesquieu, Voltaire, Rousseau, the Encyclopedists, Materialists)

| <b>Number of credits:</b> 5   |  |
| <b>Recommended semester:</b> 2.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed with an examination. The weighting of the interim and final assessment is 50/50.<br>Interim assessment (50%) consists of an assessment of 10 assignments completed by students. The solution of each task is assessed on a 2-0 point scale according to the specific criteria set for each task. The maximum possible number of points obtained in the interim assessment is 20.<br>The final grade (50%) consists of an assessment of the following knowledge and competencies demonstrated by the student in the oral examination: The student's ability to use professional terminology (assessed on a 2-0 point scale), to define the subject and describe the system of the history of education (2-0), to explain the context of the emergence and the main features of the historical currents of educational thought (4-0), to describe and compare the systems of education in different historical periods (6-0), to explain the views and characterize the work of significant figures in the history of education, to critically evaluate them and to identify their influence on education and education today (6-0). The maximum possible marks in the continuous assessment are 20.<br>For successful completion of the course it is necessary to obtain at least 60% of the points (24 points).<br>The overall grade is awarded on a grading scale:<br>A (40-37 points) - excellent (outstanding results),<br>B (36-33 points) - very good (above average standard),<br>C (32-30 points) - good (average results),<br>D (29-27 points) - satisfactory (acceptable results),<br>E (26-24 points) - sufficient (results meet the minimum criteria),<br>FX (23-0 points) - underperforming (unacceptable results).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation |  |

in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 50/50

#### **Learning outcomes:**

Learning outcomes:

Upon completion of the course, students will be able to use professional terminology, define the subject, and describe the system of the history of pedagogy. They are able to explain the context of the emergence and the main features of the historical currents of educational thought, describe and compare the systems of education and training in different historical periods, explain the views and characterize the work of important figures in the history of education and training, critically evaluate them and identify their influence on education and training today.

Transferable competences: working with original historical sources and their contemporary interpretations, students will be able to critically reflect and discuss ethical issues of education and education, the status and roles of the subjects of education and education. In solving, presenting and discussing the results of ongoing assignments, students will develop their analytical and critical thinking, communication, lecturing and metacognitive skills.

Students will be able to use the acquired knowledge and competences creatively in the study of other pedagogical disciplines and in their future pedagogical practice.

#### **Class syllabus:**

Brief outline of the course:

The subject, terminology and system of the history of pedagogy. Education and education in ancient and medieval times. Education and pedagogical ideas in the period of humanism and the Renaissance. Life, work and pedagogical views of J. A. Comenius. The development of education and pedagogical thinking in the works of selected representatives in the world (Lock. Rousseau, Pestalozzi, Herbart, Tolstoy) and in the territory of present-day Slovakia (Bel, Tešedík, Fándly, Lehocký) in the 17th-19th centuries. Pedagogical trends and schools of the 20th century in the world. Education in Slovakia in the 20th century. Contemporary trends in education.

| <b>Recommended prerequisites:</b><br>none  |  |
| <b>Course requirements:</b><br>Course completion requirements<br>Continuous assessment (40 points/percent):<br>Essay on the chosen topic (20 points)<br>Presentation of the chosen topic (10 points)<br>Quiz or didactic game related to the chosen topic (10 points)<br>Obtaining a minimum of 60% of the seminar (24 points) is a pre-requisite for the completion of the course.<br>Final assessment (60 points/percent):<br>Written exam (60 points)<br>Grading<br>100–95% A, 94–90% B, 89–85% C, 84–80% D, 79–75% E, 74–0% FX<br>A (excellent performance): The student is able to independently write an essay on the chosen topic, makes excellent use of terminology, explains relevant theoretical knowledge, the work is written   |  |

with no serious stylistic, spelling and grammatical mistake. The student is able to prepare and deliver a presentation on the chosen topic with maximal clarity and precision of language. The student can independently create and moderate meaningful quizzes for the purposes of education.

B (very good performance): The student is able to write an essay on the chosen topic, makes excellent use of terminology, explains relevant theoretical knowledge. The essay is written with no major (and with a few minor) mistakes of language and contents. The student is able to prepare and deliver a presentation on the chosen topic with minor errors in clarity and language. The student is able to create and moderate meaningful quizzes with minor intervention of the teacher.

C (good, reliable performance): The student is able to write an essay on the chosen topic with maximum two major mistakes, uses correct terminology with minimal inaccuracies. The essay is written in appropriate style and language with few errors in argument. The student is able to prepare and deliver a presentation on the chosen topic with a few errors of language (that do not disturb meaning). The student is able to create and moderate quizzes with the help of the teacher.

D (satisfactory performance): The student is able to write an essay on the chosen topic with 2-4 major mistakes, explains some fundamental theoretical context. The essay is written in an acceptable style and quality of language containing numerous mistakes. The student is able to create and deliver a presentation on the chosen topic with numerous errors of language and argument; the teacher needs to intervene often. The student is able to create and moderate quizzes only with significant intervention of the teacher.

E (sufficient performance): The student can write an essay on the chosen topic with minimal use of terminology and a large number of major mistakes in language use. The essay is written with minimal clarity and many errors of language use. The student is able to create and deliver a presentation on the chosen topic with numerous mistakes of language and minimal indication of cohesion. The student is able to create and moderate quizzes only with substantial help of the teacher.

FX (insufficient performance): The student cannot achieve the essay, is not aware of basic terminology. The paper is not comprehensible. The student is unable to create and present a presentation on the chosen topic, his/her oral delivery is not comprehensible and lacks sense and unity. The student fails to create quizzes.

Scale of assessment (preliminary/final): Continuous assessment (40 points/percent): Essay on the chosen topic (20 points) Presentation of the chosen topic (10 points) Quiz or didactic game related to the chosen topic (10 points) Obtaining a minimum of 60% of the seminar (24 points) is a pre-requisite for the completion of the course. Final assessment (60 points/percent): Written exam (60 points)

### **Learning outcomes:**

Objectives and learning outcomes

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge

- Upon completion of this course, the student will have a clear understanding of the history, geography, and culture of the United Kingdom and the United States, as well as an understanding of how particular events in history have influenced the formation of Anglophone societies and cultures.
- Students will understand how realia can be implemented in the teaching of the English language (through the creation of a quiz) and how intercultural awareness can be developed through such implementation.

Skills

- Students will develop and improve their foreign language skills at B2–C1 levels (CEFR) in all language skills by working with authentic texts in English, by writing an essay and presenting their work.

- Students will be able to use digital technologies in their presentation with the implementation of audio-visual devices.

#### Competences

- Students will be able to plan and organise their own learning, which will improve their ability to cope with authentic texts, to find relevant literature, to select relevant information, and to process this information into an essay and presentation.

- Students will be able to defend their opinions and positions as well as to support them with arguments based on scholarly literature, historical sources and the interpretation of the knowledge transmitted in the course.

### **Class syllabus:**

#### Course contents

Geography of the UK and the USA: outline map exercises will deepen students' knowledge of geography and topography. The comparison of geographical and demographic data will help students to work with different types of information, scholarly texts and digital technologies.

UK and US history: the reading and discussion of historical sources will help students to learn online search strategies and the analysis of historical sources. The discussion of related scholarly studies will enhance students' analytical skills and understanding the impact of historical events and transformations on societies and culture.

Holidays in the UK and the USA: by means of authentic textual and video materials, students will learn about traditional holidays in the UK and the USA, their history and related social and cultural practices and institutions; they will compare traditions with Slovak ones and explain the difference in terms of history and culture. Through the method of drama, they will illustrate certain holidays.

The educational system in the UK and the USA: students will brainstorm and discuss their own understanding of the current educational system in the UK and the USA, pointing out the differences between the Slovak and Anglo-American educational systems, discussing the positive and negative aspects of these educational systems.

Government in the UK and the USA: students will brainstorm and discuss their own understanding of the system of government in the UK and the USA. Based on the knowledge they have gained about the history of the UK and the USA, they will draw conclusions about how the system of government developed. Through selected speeches of British and US politicians, they will learn about the rhetoric of political speeches, and discuss them in terms of similarities and differences of language and argument. Students will create their own political speech.

Through the above course content and methods of education, students will acquire knowledge, develop their pedagogical skills and competences corresponding to the profile of a graduate of the bachelor's degree in the study programme Teaching of English Language and Literature in Combination.

| <b>Recommended semester:</b> 4., 6.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Recommended prerequisites:</b><br>none  |   |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (100%):<br>Creation of 3 PowerPoint games, each of the game focusing on a different age group of learners and a methodological description of these activities (25 points/percent)<br>Creation and presentation of a story in the chosen web portal/application (25 points/percent)<br>An essay on the topic of own student's experience of using ICT when learning English and their opinions about the impact of technology on learning English (25 points/percent)<br>Presentation of the latest trends in education and a review of recent research on the effectiveness of ICT use in education (14 points)<br>Creation and presentation of a digital portfolio (11 points/percent)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX                                |   |

A (excellent performance): The student can independently create three different types of games in PowerPoint focusing on three different age groups of learners, the student can independently create his/her own story for a selected age group, present the story as “storytelling”, can independently write an essay about his/her experience of using ICT when learning English, can make a presentation about the latest trends in the use of technology in education in presentation tools (e.g., PowerPoint) using a variety of advanced options. The student can independently create a digital portfolio.

B (very good performance): The student can create three different types of games in PowerPoint with minimal teacher’s assistance, focusing on different age groups of learners, can create his/her own story for a selected age group with minimal teacher’s assistance and present it as “storytelling” with minimal faults, can write an essay about his/her experience of using ICT when learning English, can make a presentation about the latest trends in the use of technology in education in presentation tools using a variety of advanced options, can create a digital portfolio with minimal teacher’s support.

C (good performance): The student can, with the teacher’s help, create three different types of games in PowerPoint focusing on three different age groups of learners, but with minor faults, the student can create his own story for a selected group of pupils and present it as a “storytelling”, but with several faults, can write an essay with minor errors about his experience in using ICT when learning English, can make a presentation about the latest trends in the use of technology in education in presentation tools (e.g., PowerPoint) using basic options, he/she can create a digital portfolio with the help of the teacher.

D (satisfactory performance): The student is able to create three different types of games in PowerPoint with intensive help from the teacher, focusing on three different age groups of learners, the student is able to create his/her own story for a selected group of learners, and is able to present it as “storytelling”, but with major faults, can write an essay about his/her experience of using ICT when learning English, but with major errors, can produce a presentation about the latest trends in the use of technology in education in presentation tools (e.g., PowerPoint) using basic options, but with minor faults, can create a digital portfolio in a basic form with intensive teacher’s support.

E (sufficient performance): The student can create three different types of games in PowerPoint with intensive help and support from the teacher, focusing on three different age groups of pupils, can create his/her own story for a selected group of pupils and present it, but without interaction with the audience, without elements of drama. The student can write an essay about his/her experience of using ICT when learning English, but with major errors, can make a presentation about the latest trends in the use of ICT in education in presentation tools (e.g., PowerPoint) using very basic options, can create a digital portfolio with intensive help and support from the teacher and only in a very basic form.

FX (insufficient performance): The student fails to create three different types of games in PowerPoint focusing on three different age groups of learners, fails to create a story or present it, fails to write an essay about his/her experience of using ICT when learning English, fails to make a presentation in presentation tools (e.g., PowerPoint), not even in the basic form and fails to create a digital portfolio.

Scale of assessment (preliminary/final): Continuous assessment (100%): Creation of 3 PowerPoint games, each of the game focusing on a different age group of learners and a methodological description of these activities (25 points/percent) Creation and presentation of a story in the chosen web portal/application (25 points/percent) An essay on the topic of own student’s experience of using ICT when learning English and their opinions about the impact of technology on learning English (25 points/percent) Presentation of the latest trends in education and a review of recent research on the effectiveness of ICT use in education (14 points) Creation and presentation of a digital portfolio (11 points/percent)

---

**Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

- The student will expand the knowledge acquired in the courses “Fundamentals of English language didactics” and “Learner-centred approach in teaching English”.
- The student will become aware of the development of cognitive, affective and personality characteristics of pupils in different stages of development and will be able to use ICT adequately in particular age groups.
- The student expands his/her knowledge of ICT, the principles and importance of its use in foreign language education.

Skills:

- The student is able to apply the knowledge of developmental psychology in the preparation of activities using ICT as well as digital technologies and expands his/her skills on how to use ICT in education.

Competences:

- The student is able to work with professional and scientific literature, to select relevant information, interpret it, to express his/her own opinions and attitudes, which he/she can justify and present.
- The student is able to implement elements of personalisation in the teaching process and thus contribute to the humanisation of teaching English at different levels of education.

### **Class syllabus:**

Course contents:

(1) Basic terminology, history of the use of ICT in education, how to implement ICT into teaching of English, theories of education and the use of ICT; Learning styles and individualization of education - through a brief explanation of the subject matter and videos, students will learn about the basic terminology and history of the use of ICT in education, through brainstorming and mind mapping, they will present their views on how to incorporate ICT in the classroom. In discussion, they will draw out what learning styles they distinguish and what possibilities ICT presents for individualising learning and, through their own introspection, they will evaluate their own learning styles and use of ICT when learning English.

(2) Communication through ICT, educational portals, working with information, blended learning, eTwinning - through a brief explanation of the subject matter and working with a professional text with the essence of blended learning and eTwinning, they will discuss the positive and negative aspects of this form of teaching, then they will suggest how they could use blended learning and eTwinning in teaching of English.

(3) ICT in English language teaching with a focus on teaching language means and developing language skills using the different tools available - through a short explanation of the subject matter, they will become familiar with the use of different tools in teaching different language means and skills and will try out selected tools when creating tasks for learners.

| <b>Number of credits:</b> 3   |   |
| <b>Recommended semester:</b> 3., 5.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Recommended prerequisites:</b><br>none   |   |
| <b>Course requirements:</b><br>Course requirements:<br>Continuous assessment (100 points/percent):<br>Presentation of a specific intercultural issue in context (30 points/percent)<br>Active participation in discussions on the assigned issues during class (10 points/percent)<br>Creation of a project/play on an intercultural topic (60 points/percent)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX<br>A (excellent performance): The student has an in-depth knowledge of the basic issues of contemporary intercultural research, is able to critically analyse social and cultural topics presented in the media independently, is able to argue convincingly for his/her humanistic position in a discussion, is able to present his/her media analysis and reflections on a specific intercultural topic in a group and in front of the class, is able to apply his/her insight and the current scientific background independently to the teaching of the English language through the creation of a project for a certain age group. |   |

B (very good performance): The student knows the basic issues of contemporary intercultural research, can critically analyse social and cultural issues presented in the media with minimal assistance, and is able to argue well for his/her humanistic position in a debate, is able to present his/her media analysis and reflections on a particular intercultural topic in a group and in front of the class, using the creation of a project for a certain age group, is able, after a very short consultation with the teacher, to apply his/her insight and contemporary scientific background to the teaching of English.

C (good performance): The student is familiar with partial issues in contemporary intercultural research, can critically analyse social and cultural themes presented in the media with little help, and is able to argue for his/her humanistic position in a discussion, with a little help, can present his/her media analysis and reflections on a specific intercultural topic in a group and in front of the class, by creating a project for a certain age group, can, after a short consultation with the teacher, apply his/her insight and the current scientific background to the teaching of English language.

D (satisfactory performance): The student is only familiar with certain topics in contemporary intercultural research, can critically analyse social and cultural issues presented in the media with great help, is able to argue for his/her humanistic position in a discussion, although less convincingly, with more help, he/she can present his/her media analysis and reflections on a particular intercultural topic in a group and in front of the class, by creating a project for a certain age group, he/she is able, after a longer consultation with the teacher, to apply his/her insight and current scientific background to the teaching of the English language.

E (sufficient performance): The student is familiar with only peripheral issues in contemporary intercultural research, can critically analyse social and cultural themes presented in the media only partially, is able to argue for his/her humanistic point of view in a discussion, although not convincingly, can present his/her media analysis and reflections on a particular intercultural topic to the group and to the class with great help, by creating a project for a certain age group, can, after extensive consultation with the teacher, apply his/her insight and current scientific background to the teaching of English.

Scale of assessment (preliminary/final): Continuous assessment (100 points/percent): Presentation of a specific intercultural issue in context (30 points/percent) Active participation in discussions on the assigned issues during class (10 points/percent) Creation of a project/play on an intercultural topic (60 points/percent)

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

Students are able to perceive and think critically about issues related to concepts of identity, intercultural thinking and globalised society, are able to think interculturally, think critically about the problems of contemporary society and present them through the prism of a specific situation that also concerns their lives.

Skills:

Students are proficient in finding and selecting relevant sources for an intercultural approach, are able to analyse media presentations and media materials in relation to instructional objectives, are able to apply an intercultural approach to the teaching of English in elementary and secondary schools, are able to discuss intercultural issues in depth and argue persuasively in pairs and large groups, are able to apply critical analysis in evaluating selected cultural, social, and political phenomena.

Competences:

Students are able to present their own, theoretically grounded position and to think critically about opposing views (also using the method of situation analysis), they are able to use the method of case studies in the teaching of English for different levels to become more familiar with a particular intercultural issue, they are able to develop a creative project on an intercultural topic and at the same time to apply it to the teaching of English, they have mastered strategies of self-knowledge leading to a deepening of metacognitive awareness.

**Class syllabus:**

Course contents:

Main themes of the course: Introduction to intercultural communication, what is culture, communication, individuality vs. collectivity, technology, economics, globalism, science, gender, race, encounters of intercultural thinking, use of intercultural thinking in the classroom.

Through the above-mentioned course content and using the mentioned methods of education, the student acquires knowledge, develops his/her didactic skills and competences corresponding to the profile of a graduate of the Bachelor's degree in the study programme of Teaching English Language and Literature in Combination.

| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KAJL/B-ANGde002/22   | <b>Course title:</b><br>Introduction to the Study of Anglophone Literature |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar / lecture<br><b>Number of hours:</b><br><b>per week:</b> 2 / 1 <b>per level/semester:</b> 28 / 14<br><b>Form of the course:</b> on-site learning   |  |
| <b>Type, volume, methods and workload of the student - additional information</b><br>Type of activities, scope (number of hours) and methods of educational activities:<br>Form of teaching: 1L+2S<br>Teaching mode: in-person, combined<br>Scope (number of hours): 3 per week, 33 per semester<br>Student workload: 100 hours in total<br>In-class teaching = 33 h, continuous home preparation = 22 h, preparation and participation in literary and literary-social discussion = 5 h, preparation for 2 progress tests during the semester = 10 h, preparation for the final written test = 30 h.<br>Teaching methods:<br>Lecture, dialogic methods (debate, discussion, colloquium), analysis of video recordings (film extracts or relevant social events), heuristic method, students' presentation of their own conclusions, guided self-study.   |  |
| <b>Number of credits:</b> 4   |  |
| <b>Recommended semester:</b> 1.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Recommended prerequisites:</b><br>None   |  |
| <b>Course requirements:</b><br>Course completion requirements: (100 points/percent):<br>Continuous assessment (40 points/percent):<br>Participation in the literary-cultural discussion and elaboration of the assigned questions (10 points/10%)<br>Progress test 1 (15 points/15%)<br>Progress test 2 (15 points/15%)<br>Participating in a literary-cultural discussion cultivates students' relationship to literature and reading, as well as critical reflection on specific topics, or literature in general, which they present in written form. Progress tests 1 and 2 during the semester are aimed at determining the level of students' theoretical knowledge and the ability to apply it practically to a text/literary work, as well as their ability to systematically analyse a literary text, evaluate it critically and form an attitude towards the topic. Alternatively, their ability to process the text creatively for pedagogical application is monitored. |  |

Final assessment (60 points/percent):

Written exam (60 points/60%) measures the level of students' theoretical knowledge of the subject (such as their awareness of literary terminology and its practical application to a literary text/work, for example).

Grading:

100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX

A (excellent results): The student masters the core knowledge of Anglophone literature and literary theory, as well as the relevant terminology. He/she can identify literary notions in a new text, is aware of the origin and development of literary trends, genres, representative works, the principles of literary criticism and the social and pedagogical contexts of Anglophone literature. He/she understands the context of the origin and development of literary movements and genres and is able to apply all studied terms to a new literary work and text).

B (very good): The student masters the core knowledge of Anglophone literature and literary theory, listed in (A) with less serious errors and inaccuracies, understands the substantial majority of contexts of the origin and development of literary movements and genres, can apply several terms to a new literary work and text).

C (good, reliable work): The student masters a substantial part of the cross-sectional key knowledge of the sub-discipline Anglophone literature and literary theory, with some errors and inaccuracies, understands most of the contexts of the origin and development of literary movements and genres, can apply some terms to a specific new literary work and text).

D (satisfactory results): The student masters a substantial part of core knowledge of Anglophone literature and literary theory, with several errors and inaccuracies, understands some of the contexts of the emergence and development of literary movements and genres. He/she cannot apply some terms to a familiar literary work and text.

E (sufficient performance): The student masters only some core knowledge of Anglophone literature and literary theory, with numerous errors and inaccuracies and partially understands the context of the origin and development of literary movements and genres. He/she can only apply some terms to a familiar literary work and text.

FX (insufficient performance; additional work is required): The student is not aware of the core knowledge of Anglophone literature and literary theory, or his/her knowledge is contextless, with excessive errors and inaccuracies, he/she does not understand the context of the origin and development of literary movements and genres, he/she cannot apply studied terms to a new or familiar literary work and text).

Scale of assessment (preliminary/final): Continuous assessment (40 points/percent): Participation in the literary-cultural discussion and elaboration of the assigned questions (10 points/10%)

Progress test 1 (15 points/15%) Progress test 2 (15 points/15%) Participating in a literary-cultural discussion cultivates students' relationship to literature and reading, as well as critical reflection on specific topics, or literature in general, which they present in written form. Progress tests 1 and 2 during the semester are aimed at determining the level of students' theoretical knowledge and the ability to apply it practically to a text/literary work, as well as their ability to systematically analyse a literary text, evaluate it critically and form an attitude towards the topic. Alternatively, their ability to process the text creatively for pedagogical application is monitored.

Final assessment (60 points/percent): Written exam (60 points/60%) measures the level of students' theoretical knowledge of the subject (such as their awareness of literary terminology and its practical application to a literary text/work, for example).

### **Learning outcomes:**

Objectives and learning outcomes:

This course focuses on the acquisition of the following knowledge, skills and competences, as stipulated in the graduate profile (part: goals of education):

### Knowledge:

The student...

- is aware of the core knowledge of the sub-discipline "Anglophone literature and literary theory", i.e. understands literary terminology and the context of the subject,
- has acquired overview of the history, literature, culture and cultural studies of countries where English is used as a mother tongue and is aware of their application in developing his/her intercultural literacy,
- understands the principles upon which the development of basic literary trends in Anglophone and world literature started, knows the cultural and ethnic diversity of Anglophone provenance,
- is aware of the attributes of literary and non-literary texts,
- recognizes the rhetorical characteristics of literary texts, artistic devices, tropes and figures,
- is aware of the development of literary genres of poetry, prose and drama in Anglophone literatures, and understands the diachronic and synchronic relations of genres,
- recognizes representative works of Anglophone literature,
- recognizes the principles of literary criticism,
- is aware of the pedagogical context of literature and implementation of literature to EFL teaching.

### Skills:

The student...

- is able to use artistic (primary) and academic (secondary) literary sources,
- is able to apply critical analysis when evaluating selected cultural-social and political phenomena depicted in literary works,
- can analyse the latest knowledge of the discipline, can apply analytical-critical and linguistic thinking, leading to creativity and empathy,
- is cultivating skills to communicate fluently on professional aspects of literature and culture in English at B2 level,
- has acquired digital skills, can search for relevant information in the digital space and work in the digital learning environment Moodle.

### Competences:

The student...

- can read and interpret literature (fiction and academic sources) in English,
- is able to argue, present and defend his/her opinions and positions, can communicate effectively in a group and solve professional problems as a part of team,
- knows how to plan and organize his/her education and how to use self-study strategies,
- is aware of self-knowledge strategies leading to deepening of his/her metacognitive awareness.
- has acquired literary and intercultural competences,
- has gained prerequisites for his/her active involvement in professional life.

### **Class syllabus:**

Course contents:

Epistemology and gnoseology of literature - attributes of the literary text. Linguistic, cultural, social and pedagogical effects of reading fiction. Characteristics of literature and formation of literary genres. Poetry (genre variants, analysis of poetic works). Acoustic attributes of the text – metric system. Tropes. Prose (novel and short story, its structure, characters, narrator, etc.). Drama (genre variants - comedy, tragedy, drama, etc., analysis of dramatic works). Analysis (explication, close reading) and interpretation of literary texts. Methods of writing about literature. Pedagogical implications of the discipline.

Through the aforementioned subject contents and via the aforementioned educational methods, students acquire knowledge, develop their didactic skills and competences corresponding to the bachelor profile of a graduate in the study program English language and literature teaching (combination).

A (excellent performance): The student has a rich theoretical knowledge of the introduction to the individual linguistic disciplines, can analyse a simple English sentence independently and without error, identify the individual grammatical categories, correctly uses specialist terminology, is familiar with the history of English, can make connections correctly and without the teacher's assistance, correctly understands the relationships between the linguistic disciplines and can name them using the newly learned terminology.

B (excellent performance): The student has a rich theoretical knowledge in the field of introduction to individual linguistic disciplines, can analyse a simple English sentence independently and without serious errors, identify individual grammatical categories, correctly uses specialist terminology, is familiar with the history of English, can correctly state connections, correctly understands the relationships between linguistic disciplines and can name them, using the newly learned terminology.

C (good performance): The student can demonstrate theoretical knowledge of the area of introduction to individual linguistic disciplines, can analyse a simple English sentence independently, makes minor errors in identifying grammatical categories that do not have a major impact on the overall analysis, is familiar with the history of English, makes errors in terminology - expresses himself more in descriptive terms, understands the relationships between individual linguistic disciplines with the help of the teacher.

D (satisfactory performance): The student has sufficient theoretical knowledge in the field of introduction to individual linguistic disciplines, with the help of the teacher can analyse a simple English sentence, identify individual grammatical categories, has mastered professional terminology, can define the basic milestones in the history of English, understands the relationships between linguistic disciplines, can name them and use the basic terminology learnt in the process.

E (sufficient performance): The student has sufficient basic theoretical knowledge in the field of introduction to individual linguistic disciplines, with the active help of the teacher can analyse a simple English sentence, identify basic grammatical categories, is familiar with the basics of the history of English, knows the basic terminology but only with the help of the teacher can find connections, understands the relationships between linguistic disciplines at a sufficient level.

Scale of assessment (preliminary/final): Continuous assessment (40 percent): In-term test focused on theoretical knowledge, solving practical tasks Final assessment (60 percent): Final test focused on theoretical knowledge, practical problem solving, simple grammatical analysis.

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a#graduate, this course aims for a student to develop the following knowledge, skills, and competences:

Knowledge:

During the course, the student will acquire new linguistic terminology, gain an overview of the different linguistic disciplines, plans and sub-plans of language and their characteristics. The student will understand the interplay and nature of relevant linguistic sub-disciplines, gain an overview of the different periods in the development of the English language and understand the focus and orientation of the various linguistic schools, and recognize trends in the development of the English language.

Skills:

The student will learn to work independently with a professional linguistic text. The student will be able to analyse individual linguistic units, using theoretical knowledge, he/she will be able to analyse a simple English sentence independently, he/she will be able to determine grammatical categories of nouns and verbs, he/she will learn how to work with words using examples from everyday communication - morphemic analysis, basic lexical characterisation, determination of

word types and sentence articles. They develop analytical-critical thinking as one of the basic characteristics of a future teacher.

**Competences:**

The student is able to work independently and in a group on grammatical analysis, at the same time he/she is able to present it to colleagues at the required linguistic level, he/she is able to defend and argue his/her claims, he/she develops argumentative competence. The students use interpersonal skills and develop communication skills when presenting their work. They think within the context of the subject, can correlate different linguistic systems and subsystems, do not understand them in a bounded way. They perceive language globally and demonstrate the overall view needed to its understanding.

**Class syllabus:**

**Course contents:**

Main thematic threads of the course: Definition of general linguistics, definition of language and linguistic sign, functional styles of language, history of English language, structure of English and American studies, standard and non-standard English, geographical varieties of English, phonetics and phonology, lexicology, semantics, pragmatics, grammar, grammatical categories, morphological processes, syntax

Through the above content, the student will become familiar with the supporting linguistic theories and concepts (system, naming unit, communication, sign), grammatical categories (gender, case, tense, aspect, etc.), and grammatical processes (morphological, syntactic). At the same time, the student will acquire basic facts about the different planes and sub-planes of the language and gain a basic understanding of the development of the English language. The student will deepen his/her ability to work with specialized text and to critically analyse information.

The student develops the ability to critically assess the information obtained with regard to its relevance and applicability in practice. The acquired theoretical knowledge is subsequently used in practical activities and by using the stated methods, the student actively works on improving and refining his/her argumentation skills with a view to future pedagogical practice. The student develops the skills of correlating theoretical knowledge, acquires argumentation skills.

| <b>Number of credits:</b> 3   |   |
| <b>Recommended semester:</b> 4.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Recommended prerequisites:</b><br>none   |   |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (100%):<br>Retelling the content of the video and explaining unfamiliar vocabulary (20%)<br>Reading and Use of English part 1, multiple choice (20%)<br>Vocabulary Test, based on vocabulary from video clips (10%)<br>Reading and Use of English parts 1–4 (multiple choice, filling in the correct expression in the text, word formation, paraphrasing by using the given word) (40%)<br>Listening, part 1 (multiple choice) (10%)<br>Grading:<br>100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX  |   |

The student is entitled to an alternative date for the final assessment (if he/she has not attended the assessment for medical or other serious reasons), but is not entitled to an alternative date for the Continuous assessment. Attendance in class (maximum of 3 excused absences or, depending on the seriousness of the situation) as well as passing the midterm assessment with any result is a prerequisite for taking the examination.

A (excellent performance): The student can independently and correctly perform the assigned tasks and solve assignments. The student can independently and correctly explain English vocabulary without hesitation and can fluently retell a listened or read text using B2-C1 level vocabulary. The student can respond quickly and accurately in the format of the Cambridge First/Advanced exam, can complete information correctly in the time allowed, select the correct information and paraphrase using the given word.

B (very good performance): The student is able to correctly perform the assigned tasks and solve assignments with minimal assistance from the teacher and schoolmates. The student can, with minimal help from the teacher and schoolmates, explain English vocabulary correctly with little hesitation and can fluently retell a listened to or read text using B2-C1 level vocabulary. The student can respond quickly and correctly in the format of the Cambridge First/Advanced exam, can fill in the information correctly in the time allowed, select the correct information and paraphrase using the given word.

C (good performance): The student is able, with the help of the teacher and the schoolmates, to carry out the assigned tasks and solve assignments with minor errors. With the help of the teacher and the schoolmates, the student is able to explain English vocabulary correctly with minor hesitations and is able to retell a listened or read text fluently but with excessive use of compensatory strategies (e.g. fillers) using vocabulary at B2-C1 level. The student can respond with hesitation but largely correctly in the Cambridge First/Advanced exam format, can fill in information in the time allowed with fewer errors, select the correct information and paraphrase using the given word.

D (satisfactory performance): The student can, with intensive help from the teacher and the schoolmates, correctly or with minor errors, perform the assigned tasks and solve assignments. The student can, with intensive help from the teacher and schoolmates, explain English vocabulary with minor errors and considerable hesitation, and can retell a listened to or read text using vocabulary at B2-C1 level with minor errors. The student can respond in the Cambridge First/Advanced exam format with intensive help and minor errors. In the time allowed, the student can fill in the information, select the correct information and paraphrase using the given word, but with making minor errors.

E (sufficient performance): The student can only partially perform the assigned tasks and solve assignments with the support and intensive help of the teacher and the schoolmates. With support and intensive help from the teacher and schoolmates, the student can partially and with considerable hesitation explain vocabulary in English and can retell a listened to or read text using B2-C1 level vocabulary with minor errors. The student can partially respond in the Cambridge First/Advanced exam format and only with support and intensive help can partially fill in the information, select the correct information and paraphrase using the given word in the time allowed.

Scale of assessment (preliminary/final): Continuous assessment (100%): Retelling the content of the video and explaining unfamiliar vocabulary (20%) Reading and Use of English part 1, multiple choice (20%) Vocabulary Test, based on vocabulary from video clips (10%) Reading and Use of English parts 1–4 (multiple choice, filling in the correct expression in the text, word formation, paraphrasing by using the given word) (40%) Listening, part 1 (multiple choice) (10%)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

**Knowledge:**

The student expands his/her vocabulary, will know grammatical and lexical structures at B2-C1 level. The student will know the differences and similarities in the structure and functions of the language means of the mother tongue (Slovak) and the target language (English). The student knows the structural and contextual differences between written and spoken discourse. The student knows language skills and compensatory strategies. The student knows the format of Cambridge examinations

**Skills:**

The student will be proficient in grammatical and lexical structures at B2-C1 level in spoken and written communication. The student will gain confidence and improve all key (receptive and productive) language skills. The student will be able to analyse an English text in terms of basic phonological, lexical and grammatical language means. The student will be able to describe and compare the main differences and similarities between the linguistic systems of the mother tongue (Slovak) and English. The student will be able to apply the above mentioned aspects in communication. The student will acquire the strategies necessary to pass the Cambridge First and Cambridge Advanced examinations.

**Competences:**

The student acquires communicative competence in English. The student is able to argue, present and defend his/her opinions and points of view. The student is able to understand a wide range of difficult long sentences and fully recognize their meaning. The student can express ideas in a coherent and spontaneous manner without much obvious searching for expressions. The student is able to use language effectively and flexibly for social, academic and professional purposes, and has developed metacognitive awareness. The student can produce clear, well-structured and detailed oral discourse on complex topics.

**Class syllabus:****Course contents:**

Main themes of the course: Complete Advanced, Lessons 1–7: Our People, Mastering Languages, All in the Mind, Just the job!, Dramatic events, Picture yourself, Leisure and entertainment. Cambridge Advanced Listening papers 1–4, Reading and Use of English papers 1–7, Speaking part 1–4.

Through the above content, the student is linguistically prepared to continue his/her studies in the field at Master's degree, having developed foreign language communication skills at the B2-C1 level. As a result of the applied activities in the course, the student is familiar with the complex theoretical background of traditional, activating, innovative and alternative methods of foreign language teaching. The student knows the individual levels of the English language system (phonetics, phonology, grammar, lexicology, stylistics), their structural-functional characteristics. The student is able to argue, present and defend his/her views and opinions.

**Recommended literature:****Compulsory readings:**

BROOK-HART, G. and HAINES, S. (2014). Complete Advanced. Cambridge University Press.

Reading and use of English parts 1–7, (55%)

Grading:

100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX

A (excellent performance): The student is able to work with the text independently and without errors at the level B2-C1, can apply the skills of speed reading to identify content, speed reading to obtain information, close reading to thoroughly understand the text, close reading to identify specific information. The student can correctly understand the text independently and within the time limit, and correctly perform the Cambridge exam format tasks without assistance. The student can retell a text using vocabulary at B2-C1 level independently and fluently.

B (very good performance): The student is able to work with the text at B2-C1 level with minimal help from the teacher without errors, can apply the skills of speed reading to identify content, speed reading to obtain information, close reading to thoroughly understand the text, close reading to identify specific information, and can correctly understand the text with minimal teacher/team assistance in the time allowed. The student is able to retell a text using vocabulary at B2-C1 level with minimal help and with minor hesitations.

C (good performance): The student is able to work with the text at B2-C1 level with the help of the teacher, minor errors are present. The student can apply the skills of speed reading to find out content, speed reading to get information, close reading to understand the text thoroughly, close reading to identify specific information and can, with the help of the teacher/team, understand the read text correctly or with minor errors in the time allowed. The student is able to retell a text using vocabulary at B2-C1 level with help and minor hesitations.

D (satisfactory performance): The student can work with the text at B2-C1 level with intensive help from the teacher, major errors are present. With intensive teacher/team support, the student can apply the skills of speed reading to identify content, speed reading to obtain information, close reading to thoroughly understand the text, close reading to identify specific information, and can, with intensive teacher/team support, comprehend the text read in the time allowed but with more significant errors. The student is able to retell a text using vocabulary at B2-C1 level with help and with some hesitation.

E (sufficient performance): The student is able to work with the text at B2-C1 level with intensive help from the teacher. With intensive teacher/team support, the student can partially apply the skills of speed reading to identify content, speed reading to obtain information, close reading to thoroughly understand the text, close reading to identify specific information and can partially understand the text read with intensive teacher/team support in the time allowed. The student can retell a text using B2-C1 level vocabulary with intensive help and with little hesitation.

Scale of assessment (preliminary/final): Continuous assessment (100%): Reading and use of English part 5, multiple choice (15%) Reading and use of English part 6, search for a correct missing paragraph (15%) Reading and use of English part 7, association of a paragraph with a speaker (15%) Reading and use of English parts 1–7, (55%)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a#graduate, this course aims for the student to develop the following knowledge, skills, and competences:

Knowledge:

Upon successful completion of this course, the student:

will be acquainted with the principles of working with text, will have mastered reading techniques (scanning, skimming, reading for gist, reading for detail), will have mastered vocabulary from texts; will have mastered the vocabulary necessary to successfully complete tasks to develop and test reading skills (means of cohesion, use of reference and linking expressions, etc.); will be acquainted with the basics of individual linguistic disciplines and will be able to further use or

deepen this knowledge in the second stage of higher education; knows the individual levels of the English language system (phonetics, phonology, grammar, lexicology, stylistics), understands their structural-functional characteristics, knows the ways of their application in English language teaching - specifically in reading comprehension.

**Skills:**

Upon successful completion of this course, the student will have developed the skill of reading a variety of texts, understanding them in both formal and informal styles; will be able to apply strategies for developing tasks to test reading comprehension skills according to the Cambridge format. In Cambridge format test tasks, the learner can select the correct one from the options, fill in the correct missing paragraph in a text and associate the part of the text to the speaker; will be able to understand more complex texts at B2-C1 level with the help of reading development strategies; will have developed foreign language communication skills at the B2-C1 level; will be able to analyse an English text in terms of basic phonological, lexical and grammatical linguistic resources, describe and compare the language systems of Slovak and English, and use digital technologies to support foreign language education - specifically in reading comprehension.

**Competences:**

Upon successful completion of this course, the student will have developed a high level of communicative competence and performance, will be able to understand, mentally process, retain and retell the content of the text; will be able to navigate in professional texts, can independently acquire and correlate knowledge; will be able to read and interpret literature (both fiction and non-fiction) in English; will have acquired competence in planning activities for the development of reading comprehension (including activation of mental schemata), carrying out tasks and evaluating activities for the development and testing of reading comprehension skills.

**Class syllabus:**

**Course contents:**

Main themes of the course: Reading comprehension, formal and informal style, vocabulary from texts, vocabulary - cohesion and linking expressions, identifying information from the context of a text, skills associated with the Reading Paper from the Cambridge Advanced Examination and from the Compact Advanced textbook, chapters 1 - 8. Latest news, travel and traditions, behaviour and social contact, selling and buying, health and sport, old and new culture, ecology, study and work. Through the above content, the student is prepared to continue their studies in this field at the 2nd cycle of higher education, has developed foreign language communication skills at the B2-C1 level, is oriented in the basics of individual linguistic disciplines and is able to further use or deepen this knowledge as needed in the 2nd cycle of higher education, is able to argue, present and defend his/her views and opinions. The student is acquainted with professional texts (linguistic, linguodidactic and other, as well as in ordinary texts), is able to independently acquire and interpret knowledge. The student acquires the ability to work practically with a text, applying reading techniques and is able to search for information and use it correctly.

Note: C1 level will be measured by the level of textbooks/materials used, English Profile and the Cambridge Advanced Learner's Dictionary |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 1., 3.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Recommended prerequisites:</b><br>none   |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>The student is entitled to an alternative date for the final assessment (if he/she has not attended the assessment for medical or other serious reasons), but is not entitled to a re-sit date for the Continuous assessment.<br>Class attendance (maximum of 3 excused absences or, depending on the seriousness of the situation) as well as passing the in-term assessment with any result are prerequisites for taking the examination.<br>Continuous assessment (100%):<br>Assignment 1 - Explain vocabulary and retell the video using the vocabulary (20%)<br>Assignment 2 - Short conversational debate activity (20%)  |  |

Assignment 3 - Cambridge Advanced, speaking, part 1 (introduction, introductory interview, answering examiner's questions) (20%)

Assignment 4 - Cambridge Advanced, speaking, part 2 (talking about a picture, answering questions in a partner's picture) (20%)

Assignment 5 - Cambridge Advanced, speaking, part 3 (3-minute paired interview) (20%)

Grading:

100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX

A (excellent performance): The student is able to work independently and without errors with a spoken text. He/she can independently prepare for the task (information gathering, data). The student can independently create an appropriate argument, comparison, express an opinion in spoken form (according to the type of monologue / dialogue). The student can work independently with grammatical and lexical structures at B2-C1 level. The student can synthesise ideas appropriately and use the correct means of cohesion in a spoken text.

B (very good performance): The student is able to work with spoken text with minimal assistance and without errors. With minimal assistance from the teacher and/or team, the student can prepare for the task (information gathering, data collection). With minimal help, the student can make an appropriate argument, comparison, express an opinion in spoken form (depending on the type of monologue/dialogue). The student works with grammatical and lexical structures at B2-C1 level with only minimal errors. The student can synthesise ideas appropriately and use the correct means of cohesion in a spoken text.

C (good performance): The student is able to work with spoken text with the help of the teacher and with only minor errors. He/she is able to prepare for the task (information gathering, data) with the help of the teacher and/or the team. The student can, with help, make an appropriate argument, comparison, express an opinion in spoken form (according to the type of monologue/dialogue). The student works with grammatical and lexical structures at B2-C1 level with only minimal errors. The student can synthesise ideas appropriately and mostly use correct means of cohesion in a spoken text.

D (satisfactory performance): The student can work with written and spoken text with intensive help from the teacher but with only minor errors. With intensive help from the teacher and/or team, the student can prepare for the task (information gathering, data collection). With intensive help, the student is able to make a mostly appropriate argument, comparison, express an opinion in spoken form (according to the type of monologue / dialogue). The student works with grammatical and lexical structures at the B2-C1 level, making even more serious errors. The student can mostly synthesise ideas appropriately and mostly use correct means of cohesion in spoken text.

E (sufficient performance): The student is able to work with spoken text with intensive help from the teacher but with more serious errors. He/she is able to prepare for the task (information gathering, data collection) with support and intensive help from the teacher and/or the team. The student can, with support and intensive help, make a mostly appropriate argument, comparison, express an opinion in spoken form (according to the type of monologue / dialogue). The student works with grammatical and lexical structures at the B2-C1 level, while making more serious errors. The student can mostly synthesise ideas appropriately, but makes more serious errors in the use of cohesion devices and phrases.

Scale of assessment (preliminary/final): Continuous assessment (100%): Assignment 1 - Explain vocabulary and retell the video using the vocabulary (20%) Assignment 2 - Short conversational debate activity (20%) Assignment 3 - Cambridge Advanced, speaking, part 1 (introduction, introductory interview, answering examiner's questions) (20%) Assignment 4 - Cambridge Advanced, speaking, part 2 (talking about a picture, answering questions in a partner's picture) (20%) Assignment 5 - Cambridge Advanced, speaking, part 3 (3-minute paired interview) (20%)

**Learning outcomes:**

Objectives and learning outcomes:

The general objective is to ensure the attainment of C1 level of communication according to the Common European Framework of Reference for Languages (CEFR).

Knowledge:

The student is oriented in the basics of individual linguistic disciplines and is able to further use or deepen this knowledge as needed in the second cycle of higher education, knows the individual levels of the English language system (phonetics, phonology, grammar lexicology, stylistics), understands their structural-functional characteristics, knows the ways of their application in learning and teaching the English language. The student learns the principles of successful conversation. The student will acquire knowledge of compensatory strategies, the student will acquire the vocabulary necessary to express even more difficult and complex topics in a formal and informal style. The student will expand his/her vocabulary, learn the correct pronunciation of individual words and groups of words in a sentence, learn the principles of linking consonant pronunciation and reduced pronunciation.

Skills:

The student has developed foreign language communication skills at the B2-C1 level, can analyse an English text in terms of basic sound, lexical and grammatical linguistic resources, can describe and compare the main differences and similarities between the language systems of the native (Slovak) and English languages, The student can retell the content of an authentic video recording using the vocabulary contained in the video recording. The student will develop the ability to understand authentic and adapted spoken text. The student will be able to apply compensatory mechanisms in communication. The student will be able to hold a fluent conversation using adequate vocabulary, even on more complex technical topics. The student can describe a picture, ask and answer questions using pictorial material in the format of the Cambridge Advanced exam. The student can lead a discussion that leads to a meaningful conclusion (debate type), and can actively use digital technologies to support foreign language education.

Competences:

The student is able to navigate in professional texts (linguistic, linguodidactic and others), is able to independently acquire and correlate knowledge, is able to argue, present and defend his/her views and opinions, is able to plan and organize his/her own learning, The student is able to understand a wide range of difficult, longer texts and to recognize their implicit meanings. Can express themselves fluently and spontaneously without too much overt search for expressions. Can use language flexibly and effectively for social, academic or professional purposes. Can produce clear, well-organised and detailed spoken text on complex topics, demonstrating command of compositional techniques, connective expressions and means of cohesion. The student has mastered strategies of self-discovery leading to deepening metacognitive awareness.

### **Class syllabus:**

Course contents:

Main themes of the course: Speaking - formal and informal style, vocabulary from written and spoken texts, vocabulary - cohesive expressions, skills associated with the Speaking Paper from the Cambridge Advanced Examination and from the Compact Advanced textbook, Units 1–8. Latest news, travel and traditions, manners and social contact, selling and buying, health and sport, old and new culture, ecology, study and work.

Through the above content, the student is prepared to continue studying this subject at the 2nd degree of the study programme. The student knows the different levels of the English language system (phonetics, phonology, grammar, lexicology, stylistics), their structural-functional characteristics, and the ways of their application in communication and in teaching practice. The student has developed foreign language communication skills at the B2-C1 level, is able to

argue, present and defend his/her views and opinions. The student has developed communication strategies, including compensatory mechanisms.

**Recommended literature:**

Compulsory readings:

MAY, P. (2014). Compact Advanced. Cambridge University Press.

McCARTHY, M. and O'DELL, F. (2017). English Vocabulary in Use Advanced. Cambridge University Press.

Recommended readings:

| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (100%):<br>Assignment 1: correct formulation of topic sentence and thesis statement (15%)<br>Assignment 2: writing a paragraph (25%)<br>Assignment 3: writing an essay on a given topic (60%)<br>Class attendance (maximum of 3 excused absences or depending on the situation) and completion of the continuous assessment tests with any score are prerequisites for the final continuous assessment. The student is allowed to ask for an extra date for the interim assessment tests (if he/she has not attended the assessment for medical or other serious reasons) but is not allowed to re-sit any of the tests.<br>Grading:   |   |

100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX

A (excellent performance): The student is able to work independently and without errors with the text (draft) and can independently prepare for the task (collecting information, data). The student can independently and without help create the individual parts of academic and essay writing (introduction, core, conclusion, topic sentence / thesis statement). The student can independently create an appropriate argument, comparison, express an opinion in writing (according to the type of essay). The student works independently with grammatical and lexical structures at the B2-C1 level. The student can appropriately synthesize ideas and use the correct means of cohesion in a written text.

B (very good performance): The student is able to work with the text (draft) with minimal help and without errors and can prepare for the assignment (gathering information, data) with minimal help from the teacher and/or team. With minimal help, the student produces the essentials of academic and essay writing (introduction, core, conclusion, topic sentence / thesis statement). The student can, with minimal help, create an appropriate argument, comparison, express an opinion in writing (depending on the type of essay). The student works with grammatical and lexical structures at the B2-C1 level with only minimal errors. The student is able to synthesize ideas appropriately and use the correct means of cohesion in a written text.

C (good performance): The student is able to work with the text (draft) with the help of the teacher and with only minor errors. With the help of the teacher and / or the team the student can prepare for the task (information gathering, data). The student can, with help, produce the essentials of academic and essay writing (introduction, core, conclusion, topic sentence / thesis statement with minor inaccuracies). The student is able to make an appropriate argument, comparison, express an opinion in writing with help (according to the type of essay). The student works with grammatical and lexical structures at the B2-C1 level with only minimal errors. The student can synthesise ideas appropriately and mostly use correct means of cohesion in a written text.

D (satisfactory performance): The student is able to work with the text (draft) with intensive help from the teacher but with only minor errors. With the intensive help of the teacher and/or the team, the student can prepare for the task (gathering information, data). With intensive help, the student can produce the elements of academic and essay writing (introduction, core, conclusion, topic sentence / thesis statement with minor inaccuracies). With intensive help, the student is able to produce a mostly appropriate argument, comparison, opinion in written form (according to the type of essay). The student works with grammatical and lexical structures at the B2-C1 level, while committing more serious errors. The student can mostly synthesise ideas appropriately and mostly use correct means of cohesion in written text.

E (sufficient performance): The student is able to work with the text (draft) with intensive help from the teacher but with more serious errors. With support and intensive help from the teacher and/or the team, the student is able to prepare for the task (information gathering, data collection). With the support and intensive help, he/she is able to produce the elements of academic and essay writing (introduction, core, conclusion, topic sentence / thesis statement with more serious inaccuracies). With support and intensive help, the student is able to produce a mostly appropriate argument, comparison, and opinion in writing (according to the type of essay). The student works with grammatical and lexical structures at B2-C1 level, making more serious errors. The student can mostly synthesise ideas appropriately but makes more serious errors in the use of cohesion devices and phrases.

Scale of assessment (preliminary/final): Continuous assessment (100%): Assignment 1: correct formulation of topic sentence a#thesis statement (15%) Assignment 2: writing a paragraph (25%) Assignment 3: writing an essay on a#given topic (60%)

**Learning outcomes:**

Learning objectives and outcomes:

From the learning objectives declared in the graduate's profile, this course aims to acquire the following knowledge, skills, and competences:

**Knowledge:**

The student is familiar with the basics of linguistic disciplines and is able to further use or deepen this knowledge in the 2nd level of higher education. The student knows the levels of the English language system (phonetics, phonology, grammar, lexicology, stylistics), understands their structural-functional characteristics, and knows how to apply them in English language teaching, specifically in writing. The student becomes familiar with the structure of the written text according to the Anglophone criteria of academic and essay writing. The student will acquire knowledge of the correct formation of the topic sentence and thesis statement, the core of the paragraph and the essay, as well as knowledge of the correct writing of the conclusion. The student will learn how to organize and work with ideas, how to express thought, opinion, compare and contrast in a written text (essay). The student will learn the correct linguistic devices for producing a text. In general, the student will become familiar with language structures at B2-C1 level.

**Skills:**

The student has developed foreign language communication skills at the B2-C1 level, can analyse an English text in terms of basic phonological, lexical and grammatical linguistic devices, can describe and compare the linguistic systems of the English and Slovak languages. The student is able to create a paragraph and an essay applying the English language rules for academic and essay writing. The student is able to correctly create the individual parts of a paragraph and essay (introduction, body, conclusion, topic sentence, thesis statement), The student is able to organize ideas, is able to express an opinion in the required form, is able to compare and contrast ideas and opinions. The student is able to produce a paragraph and a longer form of written text (essay) at B2-C1 level with the application of grammatical and lexical structures and with the correct use of cohesive expressions. The student will be able to produce a text with a high degree of synthesis. The student is able to actively use digital technologies to support foreign language education.

**Competences:**

The student is able to navigate in professional texts, is able to independently acquire and correlate knowledge, is able to read and interpret literature (both fiction and professional) in English, is able to argue, present and defend his/her opinions and points of view. The student will learn to produce a coherent text of a required length, applying the rules of English writing. The student will learn to critically evaluate a text and use self-correction. The student will be able to plan and organize his/her own learning. The student will learn to plan writing development tasks with an emphasis on information gathering. The student's digital literacy skills will be developed while gathering information. The student will be able to carry out high-level synthesis of text using the tools of cohesion. The student will independently make correct use of grammatical and lexical structures at the B2-C1 level, recognizing the more formal structures that are appropriate in written text. The student will be able to creatively apply the acquired information in pedagogical practice.

**Class syllabus:**

**Course contents:**

Main themes of the course: Task (writing) planning, selection and specification of the topic, paragraph structure, writing a descriptive paragraph, opinion paragraph, comparative paragraph, problem-solving paragraph, essay structure, coherence and cohesion, essay parts.

Using the above knowledge, students will significantly develop the skill of writing a foreign language (English-language) text which will also prepare them for higher, master's level studies. The student will become familiar with the different levels of the English language, especially those relevant to academic or creative writing. The student has developed foreign language communication skills at the B2-C1 level. The student knows how to use digital technologies appropriately in data collection and in the evaluation of writing tasks. The student is able to argue,

present and defend his/her views and opinions in an essay, and is able to independently gather and interpret knowledge. The student has developed elementary didactic skills, can analyse pedagogical situations and propose solutions with regard to teaching writing skills.

The final test is focused on acquired theoretical knowledge and its application to English language learning and teaching.

The final assessment reflects the level of students' comprehension of Learner-centred principles; level of their pedagogical-psychological-linguistic and analytical-critical thinking; skills to apply theoretical knowledge to the practice of foreign language teaching, to analyse and solve problems and suggest appropriate intervention.

Grading:

100–95% A, 94–90% B, 89–85% C, 84–80% D, 79–75% E, 74–0% FX

Scale of assessment (preliminary/final): Continuous assessment (60%): 2 seminar papers: topics adapted to the group and their level of educational-psychological thinking (2 x 20%) Final seminar paper: “My opinions on learner-centred English language teaching (possibilities and constraints in the Slovak educational context)” (20%) In the seminar papers learners present and justify their opinions underpinned by acquired theoretical knowledge and stimuli from guided discussions in the classroom, the critical analysis of experienced teaching approaches and the introspective analysis of their impact on the effectiveness of language learning. In addition, some suggestions for effective interventions are provided. To be allowed to write a final test, students have to achieve min 60% of the continuous assessment (=36%). Final assessment (40%): The final test is focused on acquired theoretical knowledge and its application to English language learning and teaching. The final assessment reflects the level of students' comprehension of Learner-centred principles; level of their pedagogical-psychological-linguistic and analytical-critical thinking; skills to apply theoretical knowledge to the practice of foreign language teaching, to analyse and solve problems and suggest appropriate intervention.

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a graduate, this course concentrates on the acquisition of the following knowledge, skills and competences:

Knowledge:

Students acquire knowledge of the theoretical foundations of traditional, humanistic, and activating methods of foreign language teaching.

They know the principles of the Learner-centred approach, understand their impact on effective English language learning and teaching.

They understand the determining effect of various intra psychical and social factors on language learning and the possibilities of their modification in an educational environment.

Skills:

Students develop basic methodological skills, can analyse pedagogical situations reflecting learners' emotions and behaviours, from the perspective of the effectiveness of language learning.

They can analyse everyday problems in English language teaching, suggest solutions and appropriate interventions.

Competences:

Students can present, justify, and defend their opinions and attitudes.

They can work with professional texts, select, consolidate, and interpret knowledge autonomously.

They develop metacognitive strategies and awareness.

### **Class syllabus:**

Course contents:

1. Humanisation of English language teaching, traditional and activating approaches – synthesizing and deepening knowledge students create the theoretical foundations of pedagogical skills and competences.

2. Principles of the Learner-centred approach:

2a. Active learning; meaningful, relevant, and personalized learning content – students activate and widen their knowledge; they introspectively analyse their learning experiences as well as the impact of (in)appropriate interventions; they discuss possible application of activating and motivating methods, tasks, and activities. They consider the determining impact of intra psychological components on language learning.

2b. Cognitive and affective domains, teacher – learners’ relations, classroom atmosphere, social climate - students activate and widen their knowledge; they introspectively analyse their learning experiences as well as the impact of (in)appropriate interventions. They consider the determining impact of social components on language learning as well as the need to respect learners’ individual and developmental differences.

2c. Teacher’s and learners’ roles – students acquire knowledge about humanistic teacher’s roles as a facilitator, partner, and coach as well as learners’ role of autonomous human beings responsible for their own learning. The critical analysis and comparison with traditional roles enable them to understand these roles as a base for the development of relevant skills and competences.

3. Possibilities and constraints on the applications of the Learner-centred approach in English language teaching in Slovakia – based on the synthesis of acquired knowledge, critical analysis, and comparison, students will contemplate the ways of effective application of the approach in English language teaching and of overcoming possible problems and constraints.

Teaching these topics using the methods above significantly contributes to achieving the set goals and learning outcomes listed in the profile of a graduate.

|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde023/22  | <b>Course title:</b><br>Leisure time education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 1., 3., 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course: 100% pass mark.<br>Assessment: consists of 2 intermediate assessments (40+60, total 100 points).<br>Interim assessment 1: consists of the preparation of a term paper and its oral presentation or practical application in class.<br>Semester work: consists of a creative assignment for 40b (20+20). It includes an electronic portfolio - a plan of experiential activities in the context of leisure education based on a set structure (20b) and its presentation or application of the created activities in the classroom (20b).<br>Intermediate assessment 2: consists of a test of the acquired knowledge, namely a knowledge test for 60p. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of continuous assignments, excellent professional knowledge and its application in problem solving, excellent orientation to leisure issues, excellent communication skills, responsibility and timely completion of assignments, and exceptional activity in the classroom during the semester.<br>A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach to developing ongoing assignments using a model, above average expertise and application of that expertise to problem solving assignments using consultation, above |  |

average orientation to leisure issues, above average communication skills, responsibility and timely completion of assignments, and above average activity in class during the semester.

For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop ongoing assignments using the assigned template, good professional knowledge and its application in problem solving in a group or with the assistance of the instructor, good orientation to leisure issues, good communication skills, completion of assignments, average activity in class during the semester as prompted by the instructor.

At least 66 points for a grade D. For this grade, the student is expected to demonstrate: the ability to develop ongoing assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to leisure issues, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal vocational knowledge, basic/minimal orientation to leisure issues, basic communication skills, completion of assignments.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the subject Leisure time in education, the student should:

- to know the content of leisure time pedagogy as a scientific discipline: functions, goals and requirements, areas of leisure time education,
- to know the subjects of leisure education and their importance in influencing the leisure time of an individual in society in a meaningful way,
- to be able to apply the acquired knowledge in the creation of leisure activities,
- to be able to create a plan for an activity of interest and to be able to apply it through practical tasks,
- be able to present their creative output to a group,
- be able to justify the appropriateness of the choice of didactic categories in the interest activity plan,
- understand the importance of leisure as a fundamental value in human life.

Transferable competences: the student strengthens soft skills such as communication skills through creative tasks on the course, digital skills - the student realizes the creation of a website as an e-portfolio with the use of feedback, interpersonal skills within the group - activation in the group, taking the initiative and responsibility.

### **Class syllabus:**

Brief outline of the course:

The Leisure time in education is intended to introduce students to the important sphere of leisure through leisure activities, which represent an important value for the individual and which are necessary in the targeted education of children, youth and adults. The Leisure time in education course clarifies the basic pedagogical categories in a direct link between theoretical and practical training. By completing the course, the student will gain knowledge of the basic concepts in the field of leisure pedagogy, of leisure organizations aimed at children, youth, adults, and of activating didactic methods or experiential learning for the creation of leisure activities.

Topics:

Basic concepts of leisure pedagogy. Objectives of leisure education. Didactic process of leisure education and the creation of a plan of activating leisure activities - mission, goals, tasks, principles, content, forms and methods. Educational areas of activity outside the classroom. Interests and

leisure-time education. Problems of education in leisure time. Field work (streetwork), prevention, volunteering. New approaches in leisure time pedagogy. Personality of the pedagogue, social assistant, animator in the processes of education and training in leisure time. Educator and education and training in the school. Institutions and facilities providing leisure and interest activities.

| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (100 points/percent):<br>Presentation of a specific work and its context (30 points/percent)<br>Active participation in class discussions (10 points/percent)<br>Written analysis of a selected pop culture topic (60 points/percent)<br>Grading:<br>100–95% A, 94–90% B, 89–85% C, 84–80% D, 79–75% E, 74–0% FX<br>A (excellent performance): The student has excellent knowledge of the basic development of pop culture and its specifics in a literary text, can independently analyse a short literary work against the background of cultural development, is able to find elements in the work related to the chosen art form, can apply his/her analysis and reasoning to a literary text and present it to the class, can interpret the work in writing in a broad context, has profound knowledge to use the literary text in English language teaching by using appropriate methods. |  |

B (very good performance): The student knows the basic development of pop culture and its specifics in a literary text, can analyse a short literary work with minimal help against the background of cultural development, is mostly able to find elements in the work related to the chosen art form, can apply his/her analysis and reasoning to a literary text and present it to the class, can interpret the work in writing in the chosen context, has the knowledge to apply the literary text to English language instruction using appropriate methods.

C (good performance): The student knows the basic features of the development of pop culture and its specifics in a literary text, is able to analyse a short literary work against the background of cultural development with more help, is largely able to find elements in the work related to the chosen art form, with some help, can apply his/her analysis and reasoning to a literary text and present it to the class, can interpret the work in writing in the chosen context with minor errors, has the basic knowledge to use a literary text in English language teaching using appropriate methods with some intervention from the teacher.

D (satisfactory performance): The student knows some features of the development of popular culture and its specifics in a literary text, can analyse a short literary work against the background of cultural development with substantial help, is able to find elements in the work related to the chosen art form to a small extent, can apply his/her analysis and reasoning to a literary text and present it to the class, can interpret the work in writing in the chosen context with major errors, has some knowledge to use a literary text in English language teaching with much intervention from the teacher.

E (sufficient performance): The student knows only partial features of the development of pop culture and its specifics in a literary text, can analyse a short literary work against the background of cultural development with significant teacher support, is able to narrowly locate elements in the work related to the chosen art form, can apply his/her analysis and reasoning to a literary text and present it to the class with a great deal of help, can interpret the work in writing in the chosen context with few errors, can use his/her knowledge to apply the literary text to English language teaching by using appropriate methods with intensive support from the teacher.

FX (insufficient performance): The student lacks minimal knowledge of the development of pop culture and its specifics in a literary text, is unable to locate texts in their cultural contexts, cannot identify elements of a chosen art form in a given text, cannot analyse a literary text according to given criteria, and fails to see and propose ways to apply a literary text to English language teaching.

Scale of assessment (preliminary/final): Continuous assessment (100 points/percent): Presentation of a specific work and its context (30 points/percent) Active participation in class discussions (10 points/percent) Written analysis of a selected pop culture topic (60 points/percent)

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

Students become familiar with thinking about the cultural context of popular literary texts and understand their specificities and development, because the contribution of contemporary themes to literary education not only develops interest in their study, but also makes education more attractive to students at the second level of primary education and throughout secondary education; through reading and analysis, students develop linguistic and reading literacy, gain knowledge of media and digital possibilities, learn about how to discuss literary texts in the classroom and how to use them in discussions based on real life issues and for the benefit of individual self-reflection.

Skills:

Students become familiar with influential works of popular culture, their media presentations and materials, can analyse and select them in relation to the teaching objectives. Students can

appropriately apply literary texts as an innovative method of learner-centred teaching to any lesson plan and relevant language level, using a variety of appropriate teaching tasks and organisational forms of teaching. Students develop analytical skills, are able to discuss independently, in pairs and in groups, and develop critical reflection on other students' presentations.

Competences:

Students are able to argue, present and defend their views and opinions, are able to critically approach written texts and think critically about basic psychological, social and cultural issues that translate not only into their own experience but also into their position as a competent, creative, culturally oriented and culturally responsive teacher of elementary and secondary education in Slovakia.

### **Class syllabus:**

Course contents:

Major themes of the course: Perceptions of pop culture, transformations of pop culture and its literary examples, pop culture in postmodernism, contemporary pop culture and the internet, new literary genres and pop culture, contemporary literature and music, contemporary literature and theatre/performance, contemporary literature and computer games, instapoetry, contemporary literature and fashion/design, contemporary literature and clubs/festivals.

Through the above course content and methods of education, students will acquire knowledge, develop their pedagogical skills and competences corresponding to the profile of a graduate of the bachelor's degree in the study programme Teaching of English Language and Literature in Combination.

| <b>Learning outcomes:</b><br>Learning outcomes:<br>Learning objectives and outcomes and transferable competences:<br>The thematic focus of the course introduces students to applied ethics and its disciplinary divisions, to defining the basic concepts of ethics, explaining morality as a social regulator, moral norms and the principles of creating ethical codes. It focuses on the professional ethics of the teaching profession   |  |

(teacher competences, ethical dilemmas in the teaching profession, etc.) and the importance of a code of ethics in this profession. The aim of the course is to highlight the importance of a favourable classroom and school climate and to work with the content of the Convention on the Rights of the Child. Using selected examples from other branches of applied ethics (bioethics, media ethics, etc.) to show the importance of the presence of a code of ethics in the professions, the possibility of using classical ethical concepts and also different alternatives in solving ethical dilemmas.

This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).

The course contributes to the gradual development of important professional competences of future teachers by its focus and methods of education.

### **Class syllabus:**

Brief outline of the course:

1. Introduction to the subject: defining the basic concepts: ethics and morality.

Ethics and professional ethics: definition of basic terms: applied ethics - sectoral division of applied ethics. Professional ethics as a part of applied ethics.

2. Professional tact and etiquette as a basis for the formation of the code of ethics of individual professions.

3. The teaching profession and the teacher's code of ethics. Status and role of the teacher. Resolving dilemmas in the teaching profession.

4. Positive climate in the classroom, relationships between school climate factors.

5. Convention on the Rights of the Child.

6. A closer definition of bioethics and its areas of interest on concrete examples, the issue of the code of ethics. Classical ethical theories and alternative methods in solving ethical dilemmas.

| <b>Recommended semester:</b> 5.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Recommended prerequisites:</b><br>none  |  |
| <b>Course requirements:</b><br>Course completion requirements:<br>Class attendance (maximum of 3 excused absences) is a prerequisite for being assigned the final grade.<br>Continuous assessment (50 percent):<br>Short written assignments (up to 500 words) on specified topics<br>Final assessment (50 percent):<br>Final written work on the assigned topic of approximately 500–700 words<br>Grading: 100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX<br>A (excellent performance): The student can perform the assigned tasks and elaborate the assignments independently and correctly. The student commands a rich vocabulary at the B2-C1 CEFR level and employs it creatively; can structure a text logically from paragraph to whole. The student cites sources, quotes and paraphrases correctly; writes a complete academic text on a given topic independently and correctly; can make a good use of a large variety of different devices typical |  |

of a professional text. The student formulates research objectives and research questions on a given topic without instructor's assistance.

B (very good performance): The student can perform the tasks and develop assignments independently, errors are scarce. The student commands a rich vocabulary at the B2-C1 CEFR level and employs it creatively; can structure a text logically from a paragraph to a whole. The student constructs a complete professional text on a given topic correctly and almost independently, cites sources, quotes and paraphrases correctly with minimal help from the teacher. The student can make suitable use of a large variety of devices of a professional text. The student formulates research objectives and research questions on a given topic with minimal assistance from the teacher

C (good performance): The student can perform the tasks and produce assignments almost independently, although with few errors. The student commands an average vocabulary at the B2-C1 CEFR level and can structure a text logically from the paragraph to the whole with the help of the teacher. The student makes minor errors in the structure of an academic text on a given topic, correctly cites sources used, quotes, paraphrases, but with teacher's help and formulates research objectives and research questions on a given topic with the teacher's assistance.

D (satisfactory performance): The student can perform the assigned tasks and produce assignments with errors that do not affect the overall understanding of the text. The student commands an average vocabulary at the B2-C1 CEFR level. The student is acquainted with the structure and logics of the sequencing of an academic English text, but only with the teacher's help can be this knowledge applied creatively in the production of their own text. The student makes mistakes in the structure of a professional text on a given topic and relies on teacher's help to cite, quote and paraphrase the sources. The student formulates research objectives and research questions on a given topic with the teacher's assistance.

E (sufficient performance): The student can perform the assigned tasks and produce assignments with errors that do not affect the overall understanding of the text. The student commands a sufficient vocabulary at B2-C1 CEFR level. The student is acquainted with theoretical knowledge of the structure and the logics of the sequencing of a professional English text, but only with teacher's help can the student apply this knowledge in the production of their own text. The student makes minor mistakes in citing sources, when quoting and paraphrasing, the student is reliant on teacher's assistance. Mistakes in the structure of a professional text on a given topic are present. The student can formulate research objectives and research questions on a given topic, relying on learned procedures.

Scale of assessment (preliminary/final): Continuous assessment (50 percent): Short written assignments (up to 500 words) on specified topics Final assessment (50 percent): Final written work on the assigned topic of approximately 500–700 words

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the objectives declared in the profile of a#graduate, this course aims for the student to develop the following knowledge, skills, and competences:

Knowledge:

Upon successful completion of this course, the student:

- knows the differences between formal and informal expression, understands the principles of formal expression in writing.
- knows, at the required level, the formal requirements of a professional text, can distinguish between a professional text and other types of written text, and knows what formal matters are necessary for this type of text.
- knows the formal differences between English and Slovak professional texts.

Skills:

Upon successful completion of this course, the student:

- will have actively learned the whole process of writing a professional text;
- will be able to analyse model professional texts and has actively learned key structures,
- will understand the nature of formal style and can distinguish between formal and informal modes of written expression;
- will have gradually developed skills from writing a paragraph to producing a logically structured cohesive whole;
- will be able to express themselves at the appropriate language level B2-C1 of the CEFR.

**Competences:**

Upon successful completion of this course, the student:

- will have improved their expressive skills, will be able to critically evaluate their own work;
- will emphasize their own critical thinking, will be able to analyse the implications of word choice, structures, and techniques used in the creation of a text;
- will be able to plan and logically structure a professional text, demonstrate argumentative skills in English and competence to collaborate and solve tasks in a team in the production of joint creative outputs.

**Class syllabus:**

Course contents:

Main themes of the course: The professional text: types, procedures, ethics, plagiarism. Synthesis and paraphrasing. Punctuation in professional text. Citation and citation of sources. Organisation of the text. Research objectives and research questions. Hypotheses. Theoretical framework of students' works. Abstract and introduction. Research and empirical part of the thesis. Discussion. Conclusion. Resume.

The student will develop the skill of formal and informal writing in English, focusing on mastering the characteristic features of English writing and realizing the negative transfer from the native language. By synthesising the rules for writing a professional work, they will gradually produce their own professional work at the required B2-C1 CEFR level, and will be able to plan and organise the procedures for producing professional work at that level independently. The student applies theoretical knowledge in the creative process of text production. The course combines a process approach to writing in which the student engages invention, comparison, editing with a pragmatic approach to teaching the fundamentals of writing (precise instruction in writing key sentences, statements).

## COURSE DESCRIPTION

|  |  |
|--|--|
| <b>Academic year:</b> 2022/2023  |  |
| <b>University:</b> Comenius University Bratislava  |  |
| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde008/22   | <b>Course title:</b><br>Methodology of research in educational science |
| <b>Educational activities:</b><br><b>Type of activities:</b> lecture + seminar<br><b>Number of hours:</b><br><b>per week: 3 per level/semester: 42</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 5  |  |
| <b>Recommended semester:</b> 4.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by examination, the ratio of midterm/final assessment is 50/50.<br>The interim evaluation includes the following:<br><ul style="list-style-type: none"> <li>• semester work in the form of a subject portfolio: proposal (design) of educational research of quantitative or qualitative nature - 50 points,</li> </ul> The final evaluation includes the following:<br><ul style="list-style-type: none"> <li>• assessment of knowledge and selected competences in the form of a written test - 50 points.</li> </ul> The rating is awarded on a scale:<br>A (100-94%, excellent - excellent results with only minimal errors),<br>B (93-86%, very good - above average results with minor errors),<br>C (85-76%, good - normal reliable work, average results),<br>D (75-68%, satisfactory - acceptable results, but significant errors occur),<br>E (67-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help |  |

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 50/50

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

Students will acquire knowledge of the basics of research in educational sciences, get acquainted with the basic concepts and theoretical-methodological knowledge necessary for designing (planning, conducting and evaluating) in the field of research... In the theoretical-empirical level in the framework of the analysis of individual quantitative and qualitative tools, methods and techniques, they will acquire the knowledge and acquire the competences necessary for planning, conducting and evaluating research in educational sciences of quantitative and qualitative nature. Students will acquire the competences to solve and resolve problems in the field of research in educational sciences.

Transferable competences: the course develops students' analytical, critical, evaluative, contextual and creative thinking and reasoning in context. In terms of self-reflection, the student is able to evaluate and assess his/her own availability to conduct research in educational sciences

### **Class syllabus:**

Brief outline of the course:

Science and research. Types of research. Validity, reliability and objectivity/objective truth. Subjectivity/subjective truth. Ethical aspects of research. Subjects in research in educational sciences and their specificities.

Quantitative and qualitative oriented research in educational sciences. Intentions, subjects and objects in research, principals in research, observed phenomena and conditions for the implementation of quantitative and qualitative oriented research in educational sciences.

Scientific hypotheses and variables for quantifying the phenomena under study. Operationalization of variables.

Questionnaire design, implementation and evaluation.

Assessment scales - typology, creation and evaluation.

The sociometry method and the measurement of social climate.

Interview design and use. Differences between quantitative and qualitative interviews.

Quantitative and qualitative observation in research..

Content analysis of documents from a quantitative and qualitative point of view.

Data processing, data analysis and interpretation. Statistical-mathematical procedures and triangulation processes. Dissemination of findings. Study design/design.

## COURSE DESCRIPTION

|   |   |
|---|---|
| <b>Academic year:</b> 2022/2023   |   |
| <b>University:</b> Comenius University Bratislava   |   |
| <b>Faculty:</b> Faculty of Education  |   |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde033/22  | <b>Course title:</b><br>Multicultural education |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 3   |   |
| <b>Recommended semester:</b> 2., 4., 6.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Course requirements:</b><br>Prerequisite subjects:<br>Prerequisites for successful completion of the course:<br>Weighting of interim and final assessment: 100/0, the course ends with an assessment.<br>Students will develop two interim activities/projects as part of the interim coursework assessed at 40% and 40%. Activity and preparation in seminars is assessed (20%). A total of 100% of the interim assessment.<br>Students will choose one of the activities, work it systematically and develop it into a comprehensive lesson preparation according to this structure:<br>a. Objectives of the activity (what skills and abilities it develops - students will choose an appropriate topic according to their apprenticeship, where they will be able to apply the activity as a cross-cutting theme).<br>b. Target group of the activity (for which pupils it could be used).<br>c. Time and space (how long it would take, any special space requirements).<br>d. Activity flow (a brief scenario of how the student would carry it out).<br>e. Evaluation of the activity (different ways of assessing pupils, self-assessment, etc.).<br>f. Theoretical perspective on the activity (interpretation of the activity based on at least three key words from multicultural education theory).<br>g. Literature used.<br>The evaluation will assess the fulfilment of the principles of multicultural education, the suitability of the activity for teaching within the cross-cutting theme of multicultural education, the systematic nature of the preparation and the interconnectedness of its components. Negative evaluations are given to projects that could reinforce stereotypes and prejudices among pupils or in which students present stereotypical views of other cultures.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results), students will produce an original project that is thought through as a coherent whole to develop intercultural understanding, all criteria are met at an excellent level.<br>B (90-81%, very good - above average standard), students creatively develop a project that will assist in developing intercultural understanding, Criteria are met at a very good level. |   |

C (80-73%, good - normal reliable work), students will produce a project that does not undermine the principles of multicultural education, Criteria are met at a good level.  
D (72-66%, satisfactory - acceptable results), students will develop a project that is not internally intertwined but does not violate the principles of multicultural education, the criteria are met satisfactorily.  
E (65-60%, sufficient - results meet minimum criteria), students will develop a project that marginally undermines the principles of multicultural education, Criteria are met sufficiently.  
Fx (59-0%, insufficient - extra work required), students will develop a project that promotes cultural stereotypes and biases. The project does not meet the minimum criteria.

**Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

Students understand the principles and practices of multicultural education. They know how to work with stereotypes and prejudices in the classroom. They can plan and design multicultural education and integrate it as a cross-curricular topic in the classroom. They develop intercultural understanding. They master the main didactical procedures for the implementation of multicultural education as a cross-cutting theme.

Learning objectives:

To provide students with the basic information needed to understand the principles of multicultural education as a cross-cutting theme in the national curriculum. To teach students how to work with the issue of stereotypes and prejudices, to teach them how to plan and design multicultural education in schools as a cross-cutting theme. To familiarize students with the basic didactic practices in the implementation of multicultural education in education.

**Class syllabus:**

Brief outline of the course:

The problem facing multicultural education - stereotypes and prejudices in us. Encountering another culture. Culture shock. How we get information about other cultures. How to cope with the arrival of foreigners. What we think about intercultural communication. Migration and values in multicultural education. How to proceed in multicultural education. Assessment in multicultural education.

| <b>Course ID:</b><br>PdF.KPg/B-PEDde017/22   | <b>Course title:</b><br>Pedagogy of children and adolescents with learning disabilities |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |   |
| <b>Number of credits:</b> 3  |   |
| <b>Recommended semester:</b> 2., 4., 6.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points).<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to prepare intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help |   |

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when called upon by the instructor. A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

The aim of the course Pedagogy of children and adolescents with learning disabilities is to provide students with a basic framework of knowledge in the field of education of pupils with specific developmental learning disabilities. The student will be able to define the concept of specific developmental learning disabilities, categorize the different types of specific learning disabilities. The student is oriented in the basic terminology of education of individuals with SEN. Understands the etiology of learning disabilities from a variety of theoretical perspectives. Is able to characterise the educational options for individuals with SEND. Can explain the implications of a learning disability to the educational process. Knows and understands the specifics of educating individuals with learning disabilities, particularly in relation to secondary school pupils. Can name and justify selected support measures in the education of pupils with SEND. Explain the importance of teacher collaboration with other educational and professional staff of the school and the school counselling centre in the care of pupils with SEN. Know the educational programmes for pupils with SEN.

Transferable competences developed during the students' work in the seminars: critical thinking skills, contextual reasoning, communication skills.

### **Class syllabus:**

Brief outline of the course:

Terminological definition of specific developmental learning disabilities (SDLD), their Characteristics, classification, etiology, symptomatology, predictors. Peculiarities of psychological development of an individual with SPDU. Diagnosis and documentation of SAD. Impacts of specific learning disabilities on the educational process. Supportive measures in the education of pupils with SEN and special-pedagogical care for pupils with SEN, re-education of individual types of disorders. Education of pupils with SEN, methods of teacher's work with pupils with SEN. Pupils with specific developmental learning disability in secondary schools. Educational programme for pupils with specific learning disability. Possibilities of teacher's cooperation with school counseling facilities.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

The aim of the course Pedagogy of Individuals with Special Educational Needs is to make available basic information about the specifics of educating individuals with special educational needs and to prepare the student for pedagogical work in the context of the diversity of the educated population. The student will be able to define the term special educational needs, categorize individuals with special educational needs (SEN) in relation to the current system of special education and in accordance with current legislation. Becomes familiar with basic terminology in special education. Is able to characterize the educational opportunities for individuals with SEN. Can explain the implications of a disability/impairment/threat and/or other SEN in the educational process. Knows and understands the specifics of educating individuals with SEND. Can name and justify selected support measures in the education of children and pupils with SEND. Explain the importance of the teacher's cooperation with other educational and professional staff of the school and the school counselling centre in the care of pupils with SEN included in mainstream education. Know the educational programmes for pupils with SEND and understand the Individual Education Programme document. The student is prepared to address the risks associated with the inclusion of a pupil with SEND in a classroom of able-bodied classmates.

Transferable competences developed during the students' work in the seminars: critical thinking skills, contextual reasoning, communication skills.

### **Class syllabus:**

Brief outline of the course:

General foundations and terminological definition of special education.

Definition of basic terms in special education.

Trends in education, current opportunities and legislative conditions in education of individuals with SEND (with a focus on inclusive education).

Specifics of education and support measures for children and pupils with SEN according to individual categories:

pupils with intellectual disabilities and cognitive impairment; pupils with autism spectrum disorder; pupils with physical disabilities, illnesses and disabilities; pupils with impaired communication skills; pupils with specific learning disabilities; pupils with behavioural disorders; pupils from socially disadvantaged backgrounds; gifted and exceptionally gifted pupils.

Educational programmes and individual educational programme for pupils with SEN.

The position of a pupil with SEN in a class group of intact classmates.

Cooperation of the teacher with other pedagogical and professional staff of the school and the school counselling centre in the care of SEN pupils (inclusive team).

| <b>Recommended semester:</b> 2., 4., 6.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b>   |  |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points).<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help |  |

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

The aim of the course Pedagogy of Individuals with Special Educational Needs is to make available basic information about the specifics of educating individuals with special educational needs and to prepare the student for pedagogical work in the context of the diversity of the educated population. The student will be able to define the term special educational needs, categorize individuals with special educational needs (SEN) in relation to the current system of special education and in accordance with current legislation. Becomes familiar with basic terminology in special education. Is able to characterize the educational opportunities for individuals with SEN. Can explain the implications of a disability/impairment/threat and/or other SEN in the educational process. Knows and understands the specifics of educating individuals with SEND. Can name and justify selected support measures in the education of children and pupils with SEND. Explain the importance of the teacher's cooperation with other educational and professional staff of the school and the school counselling centre in the care of pupils with SEN included in mainstream education. Know the educational programmes for pupils with SEND and understand the Individual Education Programme document. The student is prepared to address the risks associated with the inclusion of a pupil with SEND in a classroom of able-bodied classmates.

Transferable competences developed during the students' work in the seminars: critical thinking skills, contextual reasoning, communication skills.

### **Class syllabus:**

Brief outline of the course:

General foundations and terminological definition of special education.

Definition of basic terms in special education.

Trends in education, current opportunities and legislative conditions in education of individuals with SEND (with a focus on inclusive education).

Specifics of education and support measures for children and pupils with SEN according to individual categories:

pupils with intellectual disabilities and cognitive impairment; pupils with autism spectrum disorder; pupils with physical disabilities, illnesses and disabilities; pupils with impaired communication skills; pupils with specific learning disabilities; pupils with behavioural disorders; pupils from socially disadvantaged backgrounds; gifted and exceptionally gifted pupils.

Educational programmes and individual educational programme for pupils with SEN.

The position of a pupil with SEN in a class group of intact classmates.

Cooperation of the teacher with other pedagogical and professional staff of the school and the school counselling centre in the care of SEN pupils (inclusive team).

| <b>Prerequisites:</b> PdF.KAJL/B-ANGde001/22 - Introduction to the Study of the English Language   |   |
| <b>Recommended prerequisites:</b><br>B-ANGde001 Introduction to the Study of the English Language  |   |
| <b>Course requirements:</b><br>Course completion requirements:<br>The student is allowed to take part in Final assessment only if his/her attendance has been satisfactory (3 absences maximum; special cases of longer periods of absence will be dealt with individually), and only when he/she has done all Continuous tests and tasks, whatever the results. The student is entitled to an alternative date of the mid-term assessment (if he/she has not attended the assessment for medical or other serious reasons). The student is not entitled to a re-sit of the transcription of 20 English words, but has the option of submitting a re-recorded version 50 English words.<br>Attendance in class (maximum of 3 authorized absences, or depending on the situation) and taking part in the midterm assessment (with any result) are the requirements for taking the final exam.<br>Continuous assessment (40%):   |   |

Transcription of words (20%)  
Word pronunciation presentation (20 %)  
Final assessment (60%):  
Text pronunciation presentation (20%)  
Transcription of short sentences (15%)  
Theoretical test (25%)

Grading:

100–95% A, 94–90% B, 89–85% C, 84–80% D, 79–75% E, 74–0% FX

A (excellent performance): The student can correctly pronounce English speech sounds and words, student makes almost no mistakes while reading a familiar continuous text, student uses word stress and sentence stress correctly, correctly transcribes words and short sentences, his/her pronunciation is fully intelligible, student has acquired broad theoretical knowledge of phonetics and phonology.

B (very good performance): The student in most cases pronounces English speech sounds and words correctly, makes only minor pronunciation mistakes when reading a familiar continuous text, can use word and sentence stress correctly, transcribes words and short sentences with only minor errors, his/her pronunciation is fully intelligible, he/she has acquired the necessary knowledge of phonetics and phonology.

C (good, reliable performance): The student has sufficiently mastered the pronunciation of English speech sounds and words, when reading a familiar continuous text, he/she makes occasional pronunciation errors, in some cases cannot use word and sentence stress correctly, he/she transcribes words and short sentences with minor mistakes, his/her pronunciation is intelligible, but bears slight signs of a foreign accent, he has mastered the theoretical phonetic-phonological knowledge;

D (satisfactory performance): The student has satisfactorily mastered the pronunciation of English vowels and words, makes pronunciation errors when reading a familiar continuous text, cannot always use word and sentence accents correctly, transcribes words and short sentences with errors, his pronunciation is understandable, but he bears signs of a foreign accent, has sufficiently mastered the theoretical knowledge of phonetics and phonology.

E (sufficient performance): The student has sufficiently mastered the pronunciation of basic English speech sounds and words, makes pronunciation errors when reading a familiar continuous text, but these do not impede comprehension, sometimes he/she cannot use sentence stress correctly, transcribes words and short sentences with many errors, but can correct these errors with the help of a dictionary, the student's pronunciation is intelligible, but the he/she has a distracting foreign accent, has sufficient but basic theoretical knowledge of phonetics and phonology.

Scale of assessment (preliminary/final): Continuous assessment (40%): Transcription of words (20%) Word pronunciation presentation (20 %) Final assessment (60%): Text pronunciation presentation (20%) Transcription of short sentences (15%) Theoretical test (25%)

### **Learning outcomes:**

Objectives and learning outcomes:

Based on the learning objectives declared in the profile of a graduate, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

During the course the student will acquire new theoretical knowledge in the field of phonetics and phonology of the English language, learn the mechanisms and principles of the formation of speech sounds and their modified forms in continuous speech, understand the nature of suprasegmental phenomena of pronunciation, become familiar with the basic differences between the sound systems of the English and Slovak languages, and learn the theoretical foundations of phonological transcription of words and short sentences.

Skills:

The student will improve his/her pronunciation of English words (both individually and in sentences), increase the level of intelligibility of his/her speech, be able to detect pronunciation errors and deficiencies in the speech of his/her classmates, and be able to identify basic differences between English and Slovak pronunciation, can effectively transcribe English words and short sentences, learn to use dictionaries and audio-visual technology to correct his/her English pronunciation, apply theoretical knowledge to practical situations, be able to read and critically analyse academic literature, learn strategies for practising correct pronunciation.

Competences:

The student will learn to work independently and in a team to solve phonetic and phonological problems and tasks, be able to communicate on topics related to speech sound production and correct English pronunciation, be able to find and use resources and aids for his/her further self-development and pronunciation correction, will develop the ability to analyse and synthesize linguistic material, is able to link the acquired theoretical knowledge with the terminological apparatus of other linguistic disciplines, can independently and appropriately apply the acquired phonetic-phonological knowledge in the development of his/her communicative competence in the English language.

**Class syllabus:**

Course contents:

Main themes of the course: Sound level of language, definition of phonetics and phonology, transcription, physiological acoustic and auditory aspects of speech, classification of speech sounds: monophthongs, diphthongs, triphthongs and consonants, pronunciation of suffixes, syllable and syllabic consonants, elision and assimilation, linking, stress, strong and weak forms of English words, suprasegmental phenomena in English and Slovak.

By means of the above content, the student will become familiar with the knowledge of the sound level of the English language, its structural-functional characteristics, learn the ways of applying theoretical knowledge through practicing of English pronunciation, develop his/her foreign language (especially pronunciation, transcription, and listening) skills at the B2-C1 level, can read academic literature in English, learns to work independently and in a team to solve phonetic and phonological questions and problems, can analyse and correct his/her own pronunciation and the pronunciation of his peers.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to prepare continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation in the subject matter, basic communication skills, completion of the assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the course is to present knowledge related to the processes of learning and teaching in a psychological context. Upon successful completion of the course, students will acquire scientific knowledge of the concept of psychodidactics. They will be able to use critical thinking to justify the importance of didactic influence and knowledge formation in the teaching process. Students will have adequately developed the competence to design the teaching process based on the specificities of psychodidactics.

Transferable competences: by analysing, implementing and discussing seminar assignments, students are able to communicate their conclusions, think critically and think in context.

### **Class syllabus:**

Brief outline of the course:

1. Psychodidactics as a scientific discipline.
2. Neurophysiological bases of memory.
3. Neurophysiological bases of learning. Epistemological foundations of child/pupil learning.
4. Pupils' learning styles in relation to specifics from a psychodidactic perspective.
5. Teacher's teaching style. Epistemological foundations of teacher's teaching.
6. Children's naive theories, preconceptions, and misconceptions in relation to students' internal knowledge systems and to pedagogical constructivism.
7. The use of psychodidactic knowledge in learning and teaching.
8. School and scientific knowledge: the relationship between individualized knowledge (as a compromise with reality) and knowledge acceptable to contemporary society. The relationship between everyday knowledge, school knowledge and scientific knowledge.
9. Micro-approaches of male and female students/presentations of model situations.

Students are required to complete a 40-point midterm paper (micro-exit/presentation of model situations) and a 60-point midterm test, for a total of 100 points. The successful completion of the course is subject to obtaining at least 60% of the maximum possible course grade.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |   |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to prepare continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation in the subject matter, basic communication skills, completion of the assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the course is to present knowledge related to the processes of learning and teaching in a psychological context. Upon successful completion of the course, students will acquire scientific knowledge of the concept of psychodidactics. They will be able to use critical thinking to justify the importance of didactic influence and knowledge formation in the teaching process. Students will have adequately developed the competence to design the teaching process based on the specificities of psychodidactics.

Transferable competences: by analysing, implementing and discussing seminar assignments, students are able to communicate their conclusions, think critically and think in context.

### **Class syllabus:**

Brief outline of the course:

1. Psychodidactics as a scientific discipline.
2. Neurophysiological bases of memory.
3. Neurophysiological bases of learning. Epistemological foundations of child/pupil learning.
4. Pupils' learning styles in relation to specifics from a psychodidactic perspective.
5. Teacher's teaching style. Epistemological foundations of teacher's teaching.
6. Children's naive theories, preconceptions, and misconceptions in relation to students' internal knowledge systems and to pedagogical constructivism.
7. The use of psychodidactic knowledge in learning and teaching.
8. School and scientific knowledge: the relationship between individualized knowledge (as a compromise with reality) and knowledge acceptable to contemporary society. The relationship between everyday knowledge, school knowledge and scientific knowledge.
9. Micro-approaches of male and female students/presentations of model situations.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 50/50

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim is to familiarize students with the basic classification and manifestations of developmental, behavioral and learning disorders in childhood and adolescence and their impact on the child's school functioning. Students will gain a basic understanding of the most common developmental disorders and behavioral and learning disorders occurring in childhood and adolescence. The ability to navigate the subject matter is essential in an inclusive school environment in both primary and secondary schools where future teachers of education may work in combination with a second subject endorsement. In this subject, students will not only acquire theoretical knowledge, but will also acquire sufficient competences to work with other professionals involved in dealing with developmental, learning and behavioural disorders. A good understanding of the subject is a prerequisite for an individualised teacher-pupil relationship with a developmental, learning and behavioural disorder. Such a relationship not only requires empathy, but must also be underpinned by acquired skills. An important goal is to prepare students to participate in the implementation of individual education plans for children with developmental, learning and behavioural disabilities. Most children with developmental, learning and behavioural disorders (with few exceptions) are pupils in mainstream primary schools and it is therefore important that students are able to work competently with the inclusion team, but also with specialists from other disciplines, such as a neurologist, psychologist, paediatrician or child psychiatrist. Transferable competences: critical thinking skills, communication skills.

### **Class syllabus:**

Brief outline of the course:

1. Introduction to developmental disorders - definition of developmental disorders, precursors of developmental disorders, classification of developmental disorders in children and adolescents. Issues of norm and pathology in development.
2. Etiology of developmental disorders - pathogenic factors and the complexity of their action, risks in the pre-, peri- and post-natal period, early diagnosis, intervention, stimulation, deprivation.
3. Psychomotor retardation (general developmental delay) and mental retardation/intellectual disability - aetiology, classification, options and limitations, interventions.
4. Psychogenic conditioned disorders in the somatic area- enuresis, encopresis, tics. Manifestations, forms, possibilities of intervention.

5. Psychogenic conditioned communication disorders - barking and mutism - definition, classification, intervention options.
6. Pervasive developmental disorders or autism spectrum disorders - autism, Asperger's syndrome, Rett's syndrome. Etiology, clinical picture, organization of care.
7. The problem of organicity in child psychology - cerebral palsy (CP) - etiology, clinical picture. Developmental disorder of motor functions.
8. Hyperkinetic syndrome (ADD and ADHD). The most significant factors in working with children with ADHD, ADD.
9. Specific learning disabilities - diagnosis and differential diagnosis, remedial programmes in work with children with specific learning disabilities.
10. Emotional disorders in childhood - anxiety disorders, phobias and depression in childhood and adolescence. Obsessive-compulsive disorder. Post-traumatic stress disorder.
11. Behaviour and conduct disorders - classification, manifestations and intervention options. Self-harm and suicide in childhood and adolescence - incidence, etiology, prevention.
12. Eating disorders- classification, manifestations and intervention options.
13. Mental disorders caused by psychoactive substances. Pathological gambling and other forms of addiction

| <b>Educational activities:</b><br><b>Type of activities:</b> seminar / lecture<br><b>Number of hours:</b><br><b>per week:</b> 2 / 2 <b>per level/semester:</b> 28 / 28<br><b>Form of the course:</b> on-site learning  |   |
| <b>Number of credits:</b> 4  |   |
| <b>Recommended semester:</b> 1., 3.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by examination, the weight of the interim and final assessment is 50/50<br>50% Intermediate assessment: includes a seminar paper (10 points), an intermediate test (40 points).<br>50% Final assessment: includes a reflective essay (5 points) and a final test (45 points). The student must score at least 50% on each test.<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For a grade of A, the student must be consistently outstanding, capable of independent study, and able to critically compare professional texts in psychology. The student is able to navigate a variety of literary sources, is proficient in the fundamentals of general and developmental psychology, understands the thinking, decision-making and emotional responses of children and adults, and can reflect critically on psychological knowledge.<br>A grade of B indicates that the student has performed above average throughout the semester, has been able to study independently, has mastered basic information related to general and developmental psychology, understands how children and adults think, make decisions, and react emotionally, and reflects on psychological knowledge.<br>A grade of C means that the student has performed standardly well during the semester, his/her theoretical knowledge of the subject is at a good level, but the ability to apply this knowledge or critically evaluate and compare individual psychological findings is lacking.<br>A grade of D means that the student has been less prepared during the semester, has slight deficiencies in theoretical knowledge related to the subject of education and has more problems in independent implementation work, cannot critically analyze information. |   |

A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyze and compare multiple pieces of knowledge, and fails in critical thinking and application of theoretical knowledge to practice as well as theoretical knowledge.

Scale of assessment (preliminary/final): 50/50

**Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

The aim of Psychology for Teachers 1 is to make available basic information about the general laws of human experience and behaviour so that they can form a platform for understanding the workings of the human psyche and to synthesize psychological knowledge, facts, theories, research approaches into a coherent view of the individual's psyche for the purposes of creative professional application in pedagogical practice. The student after completing the course

- knows the basic concepts of general, cognitive and developmental psychology, basic models and theories of developmental psychology, knows how to differentiate and classify them into individual categories,
- can apply knowledge of general, cognitive and developmental psychology in an educational context,
- knows the laws of psychic development, especially with regard to the needs of lower and upper secondary education,
- knows the laws of development of cognitive processes and their application in the educational process
- can read and understand professional text and psychological research, understand tables and graphs
- finds logical connections in opinions and thoughts

**Class syllabus:**

Brief outline of the course:

Part of general and cognitive psychology:

1. Introduction to psychology: a brief history of psychology, psychology as a science, the subject of psychological inquiry, the formation of psychological knowledge and psychological methodology. Psychological processes and states.
2. Sensory processes. Perception - characteristics of the process, laws of perception and types of perception.
3. Imagination and attention. Fantasy and memory imagery. Types of ideas and their comparison. Illusions and hallucinations. Types and characteristics of attention.
4. Memory and learning. Theories of memory. Types of memory. Memory processes and information (remembering, retention, reproduction, retrieval). Forgetting, extremes and pathology in memory performance. Characteristics and some theories of learning, types, conditions and principles of learning
5. Thinking, intelligence and speech. Thought operations and forms of thought. Types of thinking. Thinking as problem solving. Thinking and intelligence. Relationship between thinking and language.
6. Dynamics of the psyche: motivation and emotions. Emotional states and feelings. Physiological bases of emotionality. Classification and characteristics of feelings and emotions. Stress, frustration and the experience of conflict. Characteristics and functions of motivation, principles of motivation, energetic basis of the organism, instincts, drives, needs, values, attitudes, aspirations, frustration, volition.

Part of developmental psychology:

7. The subject of investigation and methods of developmental psychology. Subject, aims of developmental psychology; interdisciplinary relations. Assessment of psychological development - basic methods of diagnosing developmental level, developmental screening and scales, psychological tests.

8. Mental development in general - developmental changes and laws, factors of development. Developmental changes and their classification, basic developmental processes. Factors of development - conditions of psychic development, external and internal factors of psychic development and their interrelations; maturation and learning, development and education. Developmental laws.

9. Theoretical models and concepts of psychological development. Periodization of development. Problems of unified classification of psychological development, classification systems. Critical or sensitive developmental stages, developmental crisis. Basic psychological characteristics of developmental phases.

10. The most important theoretical models of psychological development and their critical evaluation - psychoanalytic, humanistic, biodimensional model, Piaget's school, Vygotsky and the Russian school ai... Theoretical concepts of determination of psychological development - nativism and endogenistic theories, empiricism and exogenistic theories, interaction theoretical models.

11. Developmental roles of the different periods - prenatal development, newborn, infant, toddler, pre-school age, younger school age, adolescence, adulthood and old age.

| <b>Course requirements:</b><br>Prerequisites: B-VUZde003 / Psychology for teachers 1<br>Prerequisites for successful completion of the course:<br>The course is completed with an assessment, 100% of the continuous assessment, which includes continuous work - completion of a self-awareness test (15% of the assessment) and a seminar paper (20% of the assessment), completion of a continuous test in personality psychology (30% of the assessment), a reflective essay (5% of the assessment), and a final test (30% of the assessment).<br>Credit will not be awarded to a student who scores less than 50% on any of the four written examinations.<br>To pass the course, you must obtain a minimum of 60 % of the marks.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required)<br>For an A grade, the student must have excellent theoretical knowledge, be able to evaluate and critically analyse it, and use the knowledge flexibly in practically set tasks.<br>For a grade of B, the student must have excellent theoretical knowledge, be able to evaluate and critically analyze it, and have slight deficiencies in the use of knowledge in practically set tasks.<br>For a grade of C, the student must have excellent theoretical knowledge, moderate deficiencies in its evaluation and critical analysis, moderate deficiencies in the use of knowledge in practically set tasks.<br>For a grade D, the student must have basic theoretical knowledge, moderate deficiencies in their evaluation and critical analysis, moderate deficiencies in the use of knowledge in practically set tasks).<br>For an E grade, the student must have basic theoretical knowledge, moderate deficiencies in their evaluation and critical analysis, and major deficiencies in the use of knowledge in practically set tasks. |   |

Scale of assessment (preliminary/final): 100/0

**Learning outcomes:**

Learning objectives and outcomes and transferable competences:

The aim is

- Know the principles of personality formation and use them to develop the cognitive, affective and competence of pupils and students;
- to build and develop the individual components of the educational process in the context of the personalities of the pupils in the classroom;
- in accordance with the personality of the pupils and students, choose an empathetic approach and encourage self-actualizing tendencies;
- apply social and emotional competencies to promote their own psychological well-being;
- to know the basic psychological problems of education and to be able to work effectively with them in the educational process,
- be able to actively acquire information and use it to solve practical tasks in the field.

**Class syllabus:**

Brief outline of the course:

Psychology of personality

1. Basic definition and concepts of personality psychology - structure, dynamics.
2. Concepts of the psychoanalytic approach - the structure of personality according to S. Freud, defence mechanisms of A. Freud and their relationship to psychological difficulties in the educational environment (burnout syndrome, depression, etc.).
3. Concepts of individual and analytical psychology - the need for power A. Adler, the need for power in pupils in the educational environment; archetypes of C. Jung, the acceptance of archetypal tendencies and their relation to the educational process.
4. Behaviorism and neobehaviorism - the concept of behaviorism E. Thorndike, J. Watson, operant conditioning B. Skinner in teacher-pupil relationship, social learning of A. Bandura - teacher as a role model.
5. Humanistic psychology - concepts of A. Maslow, V. Frankl, C. Rogers, self-actualization and the promotion of the self-actualizing instinct as the goal of the educational process.

Educational psychology

6. Basic definition and concepts of educational psychology.
7. Approach to pupils with special educational needs (specific focus on the intellectually gifted, pupils with Asperger's syndrome, ADHD).
8. Psychohygiene of teachers in educational settings - stress management, attitudes, assertiveness and assertive techniques, teachers' attitudes and biases.
9. Psychological problems in pupils and students - perfectionism, hypersensitivity, stress and anxiety.
10. Psychological aspects of education - intrinsic and extrinsic motivation of pupils, assessment.
11. Psychological aspects of working with gifted individuals in the classroom.

| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 3  |  |
| <b>Recommended semester:</b> 3., 5.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b> PdF.KPg/B-VUZde005/22 - Communication in education   |  |
| <b>Course requirements:</b><br>Prerequisites: B-VUZde005 / Communication in education<br>Prerequisites for successful completion of the course: the course is completed with an evaluation, 100% of the continuous evaluation.<br>Assessment: consists of 2 intermediate assessments (60+40, total 100 points).<br>Interim assessment 1: consists of the development of a semester cooperative work and its oral presentation or practical application in class. This is a prepared micro-team output: the creation of a student conference.<br>Semester work: consists of a creative assignment for 60p (30+30). It includes the preparation of a group simulation of a student conference (30b) together with a professional paper on a selected topic (30b) for approximately 45 minutes.<br>Intermediate assessment 2: consists of the creation of documents for the student conference (40b): poster, invitation, programme, etc. in an electronic environment (web development).<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above |  |

average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the Rhetoric and Communication course, the student should:

- be able to select information, identify relevant sources on the selected topic,
- be able to justify the choice of specialist sources for the semester thesis,
- understand the importance of selection and analysis of information and information sources,
- be able to work in a team, organise activities to accomplish sub-tasks,
- be able to present intermediate tasks to the group,
- be able to justify and discuss in a group various social topics related to education and training,
- acquire presentation and communication skills and be able to apply them through creative activities in the classroom,
- Know methods for Developing of critical thinking and good reasoning,
- should be able to identify manipulative behaviour.

Transferable competences: the student strengthens soft skills such as communication skills, analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and their application in discussion, interpersonal skills within the group - activation and taking initiative and responsibility, also creative work with e-portfolio (ability to create an interesting website) through creative tasks in the course.

### **Class syllabus:**

Brief outline of the course:

The aim of the course is the practical application of knowledge about effective communication through practicing rhetorical outcomes and teamwork, i.e. through cooperative methods and interactive activities. Using various activating methods and problem-based tasks, students will actively participate in the learning process and create their own course content, in which they will use their own potential and develop the intra and interpersonal aspects of their own personality. An important part of this is a semester-long group project through which students will learn how to organize major events, while developing proper communication and rhetorical skills.

Topics:

Rhetoric - types of speech, practicing presentation skills through micro performances. Content/form/communication skills (verbal and non-verbal) of oral presentation and analysis of speakers.  
Presentation - structure and organization of speech/speech/lecture. Evaluating information and

finding relevant sources. Simulating a debate. Organisation of time and group cooperation. Visualisation and generating interest in the listener. Argumentation - types of arguments and logical fallacies. Manipulation and manipulation techniques, assertiveness. Types of conversation, discussion - how to conduct a conversation, structuring a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection. Creating a website and e-portfolio with student outputs. Implementation of student conference - simulation/workshop.

## COURSE DESCRIPTION

|  |  |
|--|--|
| <b>Academic year:</b> 2022/2023  |  |
| <b>University:</b> Comenius University Bratislava  |  |
| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde034/22   | <b>Course title:</b><br>Rhetoric and communication |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 3  |  |
| <b>Recommended semester:</b> 2., 4., 6.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b> PdF.KPg/B-VUZde005/22 - Communication in education   |  |
| <b>Course requirements:</b><br>Prerequisites: B-VUZde005 / Communication in education<br>Prerequisites for successful completion of the course: the course is completed with an evaluation, 100% of the continuous evaluation.<br>Assessment: consists of 2 intermediate assessments (60+40, total 100 points).<br>Interim assessment 1: consists of the development of a semester cooperative work and its oral presentation or practical application in class. This is a prepared micro-team output: the creation of a student conference.<br>Semester work: consists of a creative assignment for 60p (30+30). It includes the preparation of a group simulation of a student conference (30b) together with a professional paper on a selected topic (30b) for approximately 45 minutes.<br>Intermediate assessment 2: consists of the creation of documents for the student conference (40b): poster, invitation, programme, etc. in an electronic environment (web development).<br>Prerequisites:<br>The rating shall be awarded on a scale of<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above |  |

average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the Rhetoric and Communication course, the student should:

- be able to select information, identify relevant sources on the selected topic,
- be able to justify the choice of specialist sources for the semester thesis,
- understand the importance of selection and analysis of information and information sources,
- be able to work in a team, organise activities to accomplish sub-tasks,
- be able to present intermediate tasks to the group,
- be able to justify and discuss in a group various social topics related to education and training,
- acquire presentation and communication skills and be able to apply them through creative activities in the classroom,
- Know methods for Developing of critical thinking and good reasoning,
- should be able to identify manipulative behaviour.

Transferable competences: the student strengthens soft skills such as communication skills, analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and their application in discussion, interpersonal skills within the group - activation and taking initiative and responsibility, also creative work with e-portfolio (ability to create an interesting website) through creative tasks in the course.

### **Class syllabus:**

Brief outline of the course:

The aim of the course is the practical application of knowledge about effective communication through practicing rhetorical outcomes and teamwork, i.e. through cooperative methods and interactive activities. Using various activating methods and problem-based tasks, students will actively participate in the learning process and create their own course content, in which they will use their own potential and develop the intra and interpersonal aspects of their own personality. An important part of this is a semester-long group project through which students will learn how to organize major events, while developing proper communication and rhetorical skills.

Topics:

Rhetoric - types of speech, practicing presentation skills through micro performances. Content/form/communication skills (verbal and non-verbal) of oral presentation and analysis of speakers.  
Presentation - structure and organization of speech/speech/lecture. Evaluating information and

finding relevant sources. Simulating a debate. Organisation of time and group cooperation. Visualisation and generating interest in the listener. Argumentation - types of arguments and logical fallacies. Manipulation and manipulation techniques, assertiveness. Types of conversation, discussion - how to conduct a conversation, structuring a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection. Creating a website and e-portfolio with student outputs. Implementation of student conference - simulation/workshop.

| <b>Prerequisites:</b>  |   |
| <b>Recommended prerequisites:</b><br>none  |   |
| <b>Course requirements:</b><br>Course completion requirements:<br>Continuous assessment (40 points/percent):<br>Designing a lesson plan (20 points)<br>Microteaching (10 points)<br>Analysis of video recordings of selected English teaching methods (10 points)<br>The essential condition for taking a final test is obtaining at least 60% of the continuous assessment (24 points).<br>Final assessment (60 points/percent):<br>Written exam<br>Grading:<br>100–95% A, 94–90% B, 89–85% C, 84–80% D, 79–75% E, 74–0% FX   |   |

A (excellent performance): The student is able to independently create and teach a part of his/her own English-language lesson plan by applying innovative student-centred teaching methods for any selected ISCED and the relevant language level according to CEFR, he/she is familiar with the complex theoretical background of methods and theories of foreign language teaching with regard to the characteristics of the students and the use of a variety of appropriate teaching tasks and organisational forms of work in teaching.

B (very good performance): The student, with minimal assistance from the teacher, is able to create and teach a part of his/her own English-language lesson plan by applying innovative student-centred teaching methods for any selected ISCED and the relevant language level according to CEFR, is familiar with several theoretical backgrounds of methods and theories of foreign language teaching with regard to the characteristics of the students and the use of a variety of appropriate teaching tasks and a variety of organisational forms of work in teaching.

C (good performance): The student can create, with the help of the teacher and with minor errors, and teach a part of his/her English-language lesson plan by applying innovative methods of student-centred teaching for any selected ISCED and the relevant language level according to CEFR, knows the basic theoretical background of methods and theories of foreign language teaching with regard to students and the use of the most commonly used teaching tasks and some organisational forms of work in teaching.

D (satisfactory performance): The student can create, only with the intensive help of the teacher, an English-language lesson plan for any selected ISCED and the relevant language level according to CEFR, part of which can be taught with a larger number of deficiencies, partial knowledge of the theoretical background of methods and theories of foreign language teaching, partial knowledge of the basic characteristics of the students and the basic types of teaching tasks and organizational forms of work in teaching.

E (sufficient performance): The student can partially create, only with support and intensive help from the teacher, an English-language lesson plan for any selected ISCED and the relevant language level according to CEFR, part of which he/she can only teach with support from the teacher and with a larger number of deficiencies, partially knows only some theoretical background of methods and theories of foreign language teaching, partially knows some basic characteristics of the students and some basic types of teaching tasks and basic organisational forms of work in teaching.

Scale of assessment (preliminary/final): Continuous assessment (40 points/percent): Designing a lesson plan (20 points) Microteaching (10 points) Analysis of video recordings of selected English teaching methods (10 points) The essential condition for taking a final test is obtaining at least 60% of the continuous assessment (24 points). Final assessment (60 points/percent): Written exam

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

Students know the social scientific and legislative context of institutional education, they know the theoretical principles of planning and organizing teaching in primary, lower and upper secondary education (ISCED 1 – ISCED3); they know, they can analyse and compare the complex theoretical background of traditional, humanising, activating, innovative and alternative methods of English language teaching and the possibilities of their application in the current educational context in Slovakia; they know the basics of English didactics and the principles of the learner-centred approach; students understand their importance for the effectiveness of English language teaching and learning at the A1 – B2 levels according to the Common European Framework of Reference (CEFR).

Skills:

Students are familiar with pedagogical documentation and school legislation related to English as a foreign language (EFL) teaching; they are able to analyse and reflect on individual components of foreign language education; they can apply basic pedagogical-psychological theoretical knowledge to educational practice; students have developed elementary didactic skills, can analyse pedagogical situations and propose solutions to common problems in EFL teaching and suggestions for appropriate intervention; students are familiar with relevant didactic publications and materials, can analyse and select them in relation to teaching objectives; students can create an English lesson plan by applying innovative student-centred teaching methods for any selected ISCED and the relevant language level (A1 – B2) according to CEFR by using a variety of appropriate organisational forms of teaching; students can teach a part of their own lesson plan (microteaching); students can actively use digital technologies to support and make foreign language education more effective.

Competences:

Students are familiar with professional linguodidactic texts, are able to independently acquire and correlate knowledge; students have developed the foundations of didactic competences and personal prerequisites leading to the humanization of EFL teaching in primary, lower and upper secondary education; students are able to argue, present and defend their opinions and positions and have developed the prerequisites for active involvement in professional life in the field of foreign language education in the public and private institutional sectors.

### **Class syllabus:**

Course contents:

Main themes of the course: Basic didactic terminology in comparative English – Slovak language; designing and planning of EFL lesson plans (organizational forms of work, material and technical provision of foreign language teaching); institutional and socio-cultural context of EFL teaching in Slovakia; learner variables; intrinsic and extrinsic motivation in the process of EFL acquisition; the process of learning and teaching English; roles of the teacher; characteristics of theories of English language learning with regard to their psycholinguistic aspects; learning tasks in foreign language teaching; traditional, humanising, activating, innovative and alternative methods of English language teaching (Grammar-Translation Method, Direct Method, AudioLingual Method, Natural Approach, Suggestopedia, TPR, CLIL, Communicative Approach, Post-Communicative Period in Foreign Language Teaching).

Through the above course content and the use of the above methods of education, the student acquires knowledge, develops his/her didactic skills and competences corresponding to the profile of a graduate of the Bachelor degree in the study programme of Teaching English Language and Literature in Combination.

For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.<br>A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students. |   |

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

For successful completion of the course it is necessary to obtain at least 60% of the points.

Scale of assessment (preliminary/final): 50/50

### **Learning outcomes:**

Learning objectives and outcomes:

By completing the course on school systems and school legislation for teachers, the student should:

- to know the content of school management as a scientific discipline: the system of school management in the Slovak Republic and the system of internal school management in the context of managerial functions,

- be familiar with the basic legal documents and be able to correctly interpret the meanings given in these legal documents, which regulate the activities of kindergarten, primary school and secondary school, with an emphasis on the needs of the work of the teaching staff,

- be able to apply the acquired knowledge and knowledge from other disciplines in the focus area: school image, culture and climate, in the area of cooperation with the school management and legal representatives of children/pupils in solving standard, specific and problematic tasks and situations and in the framework of school development,

- be able to creatively use the acquired knowledge and competences in the study of other pedagogical disciplines and in their future school practice.

Transferable competences: the student strengthens soft skills such as communication skills, organizational skills, interpersonal skills within a group - group activation, taking initiative and responsibility, creativity and imagination, critical thinking, analytical skills, problem-solving skills, and others through the creation of a semester project in the course.

### **Class syllabus:**

Brief outline of the course:

- Basic terminology, options for studying school management, sources of study. Schools and concepts of management. Specifics of school management. The system of school management in the Slovak Republic and the system of internal school management in the context of managerial functions. Legal and pedagogical-organisational regulations applied in the school system and their significance. Interpretation of the constitution in terms of application in education. The legislation governing the activities of kindergartens, primary and secondary schools (laws, decrees, working regulations, pedagogical-organisational instructions, guidelines and regulations), with an emphasis on the needs of the work of the teaching staff. The personality of the head of teaching staff - legal and personality requirements. School image, school culture. School climate.

### **Recommended literature:**

Required reading:

Current legislative norms concerning the establishment and activities of primary and secondary schools in the Slovak Republic.

**Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

Students know, can analyse and compare the complex theoretical background of traditional, humanizing, activating, innovative and alternative methods of foreign language teaching and the possibilities of their application in the current educational context in Slovakia (ISCED 1 – ISCED3); they know the basics of English didactics and the principles of the learner-centred approach and they understand their importance for the effectiveness of English language teaching and learning at the A1 – B2 levels according to the Common European Framework of Reference (CEFR).

Skills:

Students have developed basic didactic skills, they can analyse pedagogical situations and propose solutions to common problems in EFL teaching, they are able to give suggestions for appropriate intervention; students are familiar with relevant didactic materials, can analyse and select them in relation to teaching aims and objectives; students can actively use digital technologies to present professional issues, to give relevant arguments in order to deal with and support foreign language education.

Competences:

Students are familiar with professional linguodidactic texts, are able to independently acquire and correlate knowledge with regard to critical thinking and critical reading; students have developed the foundations of didactic competences leading to the humanization of EFL teaching; students are able to argue, present and defend their opinions and positions and have developed the prerequisites for active involvement in professional life in the field of foreign language education in the public and private institutional sectors.

**Class syllabus:**

Course contents:

(1) The position of grammar and vocabulary in Task-Based Language Teaching (TBLT) – Suggestopedia – Direct Method – Total Physical Response (TPR) – Communicative Language Teaching (CLT)

(2) The role of drills within the Audio-Lingual Method; Post-Communicative Period – analyses and critical reappraisals

(3) The role of teacher and learner in the context of the Post-Communicative Approach, principled eclecticism

(4) Innovative methods of teaching English to young learners (Helen Doron, Hocus Lotus, Wattsenglish, Jolly Phonics)

Within the individual presentation of a selected issue, a student will demonstrate knowledge as well as his/her presentation and argumentation skills. In the seminar paper, the student will demonstrate the level of his/her pedagogical-psychological thinking, competences and ability to critically analyse the selected issue. At the same time, s/he will propose suggestions for possible applications in the context of contemporary foreign language teaching and learning in Slovakia.

Through the above course content and the use of the above methods of education, the student acquires knowledge, develops his/her didactic skills and competences corresponding to the profile of a graduate of the Bachelor degree in the study programme of Teaching English Language and Literature in Combination.

For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |   |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

**Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

Students will gain knowledge and understanding of the educational process and its determinants in a social context with emphasis on current trends and perspectives in the field of education.

Students will deepen their knowledge of education, the educational process in its diversity with a focus on the determinants of education in a broader social context. On a theoretical-practical level, through analysis and discussion, students will become familiar with the specific factors determining the educational process. On the basis of the complexity of the knowledge of the determinants of educational action, they will understand the specificity and diversity of the mission of education in the formation of personality.

Transferable competences: the course develops students' analytical, critical, evaluative and creative thinking, reasoning in context and supports the development of their interpersonal skills, self-development and personal and professional growth.

**Class syllabus:**

Brief outline of the course:

Education and the educational process. Theoretical bases and determinants of education.

The relationship between education and society. Conception and bases of education, genesis of education.

Education and personality of the child, categorization of factors of personality formation, social determination of personality development and education.

Educational environment, its typology and importance for a person. Social environment as a determinant of the child's personality.

Rights of the child. Convention on the Rights of the Child. Legal education, its importance and application in practice.

The environment of family upbringing and its importance in terms of the formation of the child's personality. Typology and functions of the family. Conditions and importance of the educational influence of the family on the formation of personality. Educational styles in the family. Negative tendencies in family upbringing.

Social conditions of the school environment. Relationship between school and society, negative phenomena in the school environment and their prevention.

Teacher's personality and its influence on the educational process. The climate of the school environment and interpersonal relationships between teachers and pupils.

The significance and specifics of the influence of peer groups on personality formation.

Education in a multicultural environment and social diversity.

Information society and mass media as a determinant of child upbringing in terms of current tendencies.

The educational impact of the out-of-school learning environment.

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

The aim of the Social Pedagogy for Teachers course is to provide basic information about social pedagogy as a scientific discipline and the importance of different types of social and educational environment for human beings. After successful completion of the course, the student will know the basic conceptual apparatus of social pedagogy. The student understands the place of social pedagogy in the system of educational sciences. He/she categorizes the typology of the environment and can explain the effects of a stimulus-unfriendly environment on a child. Can identify the socio-cultural context of child/pupil development. Describes and interprets the specifics of raising a child in a foster family and institutional setting. Understands the socio-pedagogical aspects of the school as an educational institution.

The student is able to assess the social environment of an individual and identify risk factors in it and choose appropriate methods of prevention and intervention in cooperation with other pedagogical and professional staff.

Transferable competences developed during students' work in seminars: by analysing, solving and discussing problems from seminar assignments, the student is able to communicate his/her conclusions, think critically and think in context.

### **Class syllabus:**

Brief outline of the course:

Basic conceptual apparatus of social pedagogy. Social pedagogy as a scientific discipline (origin and development). The subject of social pedagogy. Relationship of social pedagogy to other sciences and scientific disciplines.

Environment, its typology and importance for humans.

The family as a natural environment of upbringing. Socio-pedagogical cognition of the family environment, cognition of socio-cultural specifics of the family environment. Socio-pedagogical intervention in the family. Socially-disadvantaging environment of the family.

The environment of foster family and institutional education - a family with a child in foster care and the environment of social-legal protection of children and social curatorship institutions (Centre for Children and Family).

Environment of special educational institutions - diagnostic centre, re-education centre, medical-educational sanatorium.

The school environment from the perspective of social pedagogy. Social competences of the teacher in pedagogical situations. Teacher's cooperation with the social pedagogue as a professional school employee and with other pedagogical and professional school employees.

## COURSE DESCRIPTION

|  |  |
|--|--|
| <b>Academic year:</b> 2022/2023  |  |
| <b>University:</b> Comenius University Bratislava  |  |
| <b>Faculty:</b> Faculty of Education   |  |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde015/22   | <b>Course title:</b><br>Social pedagogy for teachers |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning  |  |
| <b>Number of credits:</b> 3  |  |
| <b>Recommended semester:</b> 2., 4., 6.  |  |
| <b>Educational level:</b> I.   |  |
| <b>Prerequisites:</b>  |  |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible number of points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points).<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help |  |

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

The aim of the Social Pedagogy for Teachers course is to provide basic information about social pedagogy as a scientific discipline and the importance of different types of social and educational environment for human beings. After successful completion of the course, the student will know the basic conceptual apparatus of social pedagogy. The student understands the place of social pedagogy in the system of educational sciences. He/she categorizes the typology of the environment and can explain the effects of a stimulus-unfriendly environment on a child. Can identify the socio-cultural context of child/pupil development. Describes and interprets the specifics of raising a child in a foster family and institutional setting. Understands the socio-pedagogical aspects of the school as an educational institution.

The student is able to assess the social environment of an individual and identify risk factors in it and choose appropriate methods of prevention and intervention in cooperation with other pedagogical and professional staff.

Transferable competences developed during students' work in seminars: by analysing, solving and discussing problems from seminar assignments, the student is able to communicate his/her conclusions, think critically and think in context.

### **Class syllabus:**

Brief outline of the course:

Basic conceptual apparatus of social pedagogy. Social pedagogy as a scientific discipline (origin and development). The subject of social pedagogy. Relationship of social pedagogy to other sciences and scientific disciplines.

Environment, its typology and importance for humans.

The family as a natural environment of upbringing. Socio-pedagogical cognition of the family environment, cognition of socio-cultural specifics of the family environment. Socio-pedagogical intervention in the family. Socially-disadvantaging environment of the family.

The environment of foster family and institutional education - a family with a child in foster care and the environment of social-legal protection of children and social curatorship institutions (Centre for Children and Family).

Environment of special educational institutions - diagnostic centre, re-education centre, medical-educational sanatorium.

The school environment from the perspective of social pedagogy. Social competences of the teacher in pedagogical situations. Teacher's cooperation with the social pedagogue as a professional school employee and with other pedagogical and professional school employees.

## COURSE DESCRIPTION

|   |  |
|---|--|
| <b>Academic year:</b> 2022/2023   |  |
| <b>University:</b> Comenius University Bratislava   |  |
| <b>Faculty:</b> Faculty of Education  |  |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde019/22  | <b>Course title:</b><br>Social psychology for teachers |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |  |
| <b>Number of credits:</b> 3   |  |
| <b>Recommended semester:</b> 3., 5.   |  |
| <b>Educational level:</b> I.  |  |
| <b>Prerequisites:</b> PdF.KPg/B-VUZde003/22 - Psychology for teachers 1   |  |
| <b>Course requirements:</b><br>Prerequisites: B-VUZde003 Psychology for teachers 1<br>Prerequisites for successful completion of the course:<br>100% of the interim assessment. For successful completion of the course it is necessary to obtain at least 60% of the points.<br>Seminar paper (40% of points) - students work in class with pre-prepared record sheets that contain assignments reflecting on a textbook text or a text of research studies focused on the role of the teacher in an interpersonal context. After completing the worksheets, they discuss the authors' responses in small groups with classmates. Students are evaluated at the end of the seminar for the worksheets they have developed and turned in.<br>Test (60% of points) - the test reflects the knowledge acquired from the teacher's brief explanation, which will always take place before working with the record sheets. The test consists of open questions or also questions (A/B/C).<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For an A grade, students need to continuously submit outstanding performance throughout the semester. Record sheets indicate a high ability of students to reflect on social psychology knowledge in dealing with interpersonal situations in the classroom. They also reflect at a high level on their own attitudes, strengths and weaknesses of their own persona in a hypothetical school group interaction. The knowledge demonstrated in the student's test demonstrates their excellent mastery of theoretical introductions to seminars across a variety of social psychology topics.<br>A grade of B means that students performed very well continuously throughout the semester. The record sheets reflect well on social psychology knowledge in dealing with interpersonal situations in the classroom. They also reflect at a very good level on their own attitudes, strengths and weaknesses of their own persona in a hypothetical school group interaction. The knowledge |  |

demonstrated in the student's test shows a very good mastery of the theoretical introductions to seminars in the vast majority of social psychology topics.

A grade of C means that the students performed well during the semester, their theoretical knowledge of various educational situations in the school environment and their solutions is at a good level, but there are also shortcomings in the ability to apply this knowledge. The knowledge demonstrated in the student's test shows a good grasp of the theoretical introductions with few errors.

A grade of D indicates that students underperformed during the semester. The record sheets show little motivation to think critically about different social situations and are filled in as if "just out of obligation". One's own attitudes, strengths and weaknesses of one's own persona in a hypothetical school group interaction are only minimally reflected upon. The knowledge demonstrated in the students' test shows a sufficient mastery of the theoretical introductions to the seminars.

A grade of E indicates that students performed minimally during the semester. The record sheets do not show an ability to think critically about various social situations and are filled out only sternly, which limits the student's ability to engage in quality group discussion. The student's own attitudes, strengths and weaknesses are not reflected in the hypothetical school group interaction. The knowledge demonstrated in the test is minimal.

A grade of FX indicates that the student has not sufficiently completed the course requirements and extra work is required.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

The goal of the Social Psychology for Teachers course is to (1) introduce students to the issues of social dynamics and social group interaction, specifically in the school classroom; (2) help students identify social psychological phenomena and mechanisms in concrete examples from the school setting.

By critically reflecting on interpersonal situations from the school environment, the student deepens and actively thinks about (a) solutions to these situations and (b) the application of social psychology knowledge in practice. The student may also reflect on how he or she would address the social needs of students, using communication or intervention practices in the school classroom to achieve desired student behavior. The primary goal of the course is to supplement the student's ability to plan and design instruction with an awareness of the social aspects of the classroom, but also to deepen the student's self-awareness of his/her own functioning (strengths/weaknesses) in interpersonal model situations.

The student after completing the course:

- Knows the process of social group formation and its dynamics.
- Can explain the relationship between group phenomena and pupil behaviour in the classroom.
- Can apply the knowledge of social psychology to the process of school classroom management.

### **Class syllabus:**

Brief outline of the course:

1. The pupil in the interaction of social environment and education.
2. Social cognition, the process of forming an impression.
3. Social groups, classification of social groups, group development. group dynamics
4. Social role and social status, role identification and role conflict.
5. Process and types of communication. Teacher-pupil communication.
6. Social behaviour in the school classroom. Social interaction in informal groups.
7. Group norms. Leadership and power.

8. Social impact.
9. Aggressiveness, assertiveness, altruism.
10. Social attitudes.
11. Conflicts and possibilities of their resolution.
12. The use of social psychology knowledge in education and training.

## COURSE DESCRIPTION

|   |   |
|---|---|
| <b>Academic year:</b> 2022/2023   |   |
| <b>University:</b> Comenius University Bratislava   |   |
| <b>Faculty:</b> Faculty of Education  |   |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde021/22  | <b>Course title:</b><br>Socio-educational training for teachers |
| <b>Educational activities:</b><br><b>Type of activities:</b> practicals<br><b>Number of hours:</b><br><b>per week: per level/semester:</b> 24s<br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 2   |   |
| <b>Recommended semester:</b> 3., 5.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b> PdF.KPg/B-VUZde003/22 - Psychology for teachers 1   |   |
| <b>Course requirements:</b><br>100% of continuous assessment<br>Continuous assessment includes the evaluation of the performance of continuous tasks and assignments, which are carried out in an individual or group form in the pre-, during and post-training phase. Before the training, the mid-term evaluation consists of three tasks (reflective essay on expectations related to the self-discovery training = 10%; work with tests and questionnaires = 10%; individual preparation for the role-play = 10%), which are further worked on during the training. In the course of the training, activities and exercises are carried out to facilitate, in particular, a wide range of social-psychological competences: the development of intrapersonal (20%), interpersonal (20%) and social-inclusive competences (20%) of the students (dating activities, role-playing games, cooperative games, trust games, etc.). After the training, the continuous evaluation consists of structured feedback on the events in the training group (10%).<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required)<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>For an A grade, the student is actively involved in individual activities and shows interest and effort to develop his/her competencies, seeks original and creative solutions to the tasks set, reflects on the emerging changes that training brings, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.<br>B grade means that the student is actively involved in individual activities and shows interest and effort to develop his/her competences, to a lesser extent looks for original and creative solutions to the tasks set, reflects the emerging changes that the training brings, but needs more time and space for their verbalization, manifests himself/herself as a full member of the training group and actively expresses his/her own opinion. |   |

A C grade is awarded if the student is usually actively involved in individual activities, shows interest and effort to develop his/her competences, but only in some topics and areas, makes little use of his/her personality in finding original and creative solutions to the tasks set, reflects to some extent the emerging changes brought by the training, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.

The grade D means that the student is involved to a limited extent in individual activities and shows only sporadic interest and effort to develop his/her competencies, often with external help looking for original and creative solutions to the tasks, cannot adequately reflect the emerging changes that the training brings, is more passive and more like a marginal member of the training group, although he/she actively expresses his/her own opinion.

Grade E is awarded to a student who behaves passively and minimally participates in individual activities, does not show interest and effort to develop his/her competencies, relies on the group for original and creative solutions to the tasks set, cannot adequately reflect the emerging changes that the training brings, cannot find his/her place in the training group, expresses his/her own opinion sporadically and not always in an appropriate way.

The grade of Fx is given on an exceptional basis, most often due to non-attendance and failure to complete assigned midterm assignments, non-cooperation, refusal to take a stand on required topics and to express one's own opinion.

Scale of assessment (preliminary/final): 100/0

#### **Learning outcomes:**

The aim of the Social Psychological Training for Teachers course is to motivate and develop self-knowledge and self-reflection in teacher education students of different study programmes.

The student after completing the course:

- is aware of the importance of self-knowledge, reflection and personal development in teaching practice,
- can define their strengths and weaknesses as well as challenges and pitfalls in their own self-development,
- can name and identify the most general errors in social perception and apply them to teaching practice,
- identifies with the teacher's role, profession and its specifics,
- Through experiential activities, gain experience of active social and experiential learning.

#### **Class syllabus:**

The course is implemented through experiential activities and exercises aimed mainly at:

1. The sphere of the external world in the process of self-discovery (the individual's membership in various social groups, the teacher's role in the school classroom and the teacher's team).
2. The area of the inner world in the process of self-knowledge (experiencing, thinking, decision-making, the ways in which our emotions or our body affect us, what hidden beliefs influence our thinking, etc.).
3. The area of the transition zone of self-knowledge (behaviour, communication, etc.).
4. Increasing sensitivity to one's own experience and to the experience and emotions of others.
5. Building a positive self-image in the context of pro-teacher identification.

| <b>Academic year:</b> 2022/2023   |   |
| <b>University:</b> Comenius University Bratislava   |   |
| <b>Faculty:</b> Faculty of Education  |   |
| <b>Course ID:</b><br>PdF.KPg/B-PEDde026/22  | <b>Course title:</b><br>Socio-pathological phenomena in schools prevention and intervention |
| <b>Educational activities:</b><br><b>Type of activities:</b> seminar<br><b>Number of hours:</b><br><b>per week: 2 per level/semester: 28</b><br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 3   |   |
| <b>Recommended semester:</b> 1., 3., 5.   |   |
| <b>Educational level:</b> I.  |   |
| <b>Prerequisites:</b>   |   |
| <b>Course requirements:</b><br>Prerequisites for successful completion of the course:<br>The course is completed with an assessment, the ratio of the midterm and final assessment is 100/0. The task of the students is to prepare a midterm paper for 40 points and to pass a midterm test for 60 points, a total of 100 points. A minimum of 60% of the maximum possible course grade is required for successful completion of the course.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |   |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the course is to provide basic knowledge on the issue of socio-pathological phenomena in school. The course pays special attention to the issues of clarification of terminology in the field of social pathology. Students will be able to identify the internal and external causes of social pathological phenomena, describe and distinguish the manifestations of individual phenomena, indicate and propose specific forms of their prevention in school practice. Students will also acquire the prerequisites to be able to use the acquired knowledge in solving specific problem situations.

Transferable competencies: students and learners will develop communication skills using professional terminology in the field of social pathology. They will improve their skills in working with professional literature and producing professional texts. Students will be able to apply knowledge creatively in problem-based tasks.

### **Class syllabus:**

Brief outline of the course:

1. Basic terminology (social pathology, normality, delinquency, deviance, prevention, intervention, etc.).
2. Causes of the emergence of socio-pathological phenomena.
3. Characteristics of selected socio-pathological phenomena.
4. Specifics of socio-pathological phenomena in the school environment.
5. Violence in schools, bullying and cyberbullying.
7. 4. Truancy of pupils.
8. Pupils using alcohol and drugs.
9. Lying, running, wandering, stealing.
10. Children at risk in the environment (CAN syndrome).
11. Self-harm and suicidal actions in children.
12. Prejudice, xenophobia and racism.
13. Prevention programmes and activities in schools.
14. 13. Intervention strategies in the occurrence of socio-pathological phenomena in school.

For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor. |   |

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

The aim of the course is to provide basic knowledge on the issue of socio-pathological phenomena in school. The course pays special attention to the issues of clarification of terminology in the field of social pathology. Students will be able to identify the internal and external causes of social pathological phenomena, describe and distinguish the manifestations of individual phenomena, indicate and propose specific forms of their prevention in school practice. Students will also acquire the prerequisites to be able to use the acquired knowledge in solving specific problem situations.

Transferable competencies: students and learners will develop communication skills using professional terminology in the field of social pathology. They will improve their skills in working with professional literature and producing professional texts. Students will be able to apply knowledge creatively in problem-based tasks.

### **Class syllabus:**

Brief outline of the course:

1. Basic terminology (social pathology, normality, delinquency, deviance, prevention, intervention, etc.).
2. Causes of the emergence of socio-pathological phenomena.
3. Characteristics of selected socio-pathological phenomena.
4. Specifics of socio-pathological phenomena in the school environment.
5. Violence in schools, bullying and cyberbullying.
7. 4. Truancy of pupils.
8. Pupils using alcohol and drugs.
9. Lying, running, wandering, stealing.
10. Children at risk in the environment (CAN syndrome).
11. Self-harm and suicidal actions in children.
12. Prejudice, xenophobia and racism.
13. Prevention programmes and activities in schools.
14. 13. Intervention strategies in the occurrence of socio-pathological phenomena in school.

representative works, and the social and pedagogical contexts of American and, to some extent, Anglophone literature of the period. The student understands the context and significance of literary movements and genres, can apply all terms to unfamiliar literary works. In the term tests, the student is knowledgeable in the interpretation of texts. In the oral exam, the student demonstrates the ability to creatively interpret, analyse, compare, and synthesize individual works in their theoretical contexts.

B (very good performance): The student is mostly aware of knowledge of the subdiscipline of American Literature listed in (A) with minor errors and inaccuracies, understands the vast majority of literary movements and genres of the period. In the term tests, the student is able to interpret the texts discussed with some minor mistakes. In the oral exam, the student demonstrates the ability to interpret, analyse, compare and synthesize individual works with occasional confusions or mistakes in language.

C (good performance): The student is reliably aware of the core knowledge of the sub-discipline of American literature with several errors and inaccuracies, understands most of the literary movements and genres of the period in question, can apply some terms to some unfamiliar literary works. In the term tests, the student is able to interpret the texts discussed with some major confusions and mistakes in language. In the oral exam, the student demonstrates the ability to partially interpret, analyse, compare, and synthesize most works with some major mistakes.

D (satisfactory performance): The student has some elementary command of the core knowledge of the subdiscipline of American literature with numerous errors and inaccuracies, understands some of the literary movements and genres of the period in question, cannot apply some terms to a familiar literary work, text. In the term tests, the student demonstrates some essential knowledge and its application, with numerous errors. In the oral exam, the student demonstrates the ability to partially interpret, analyse and compare most works.

E (sufficient performance): The student demonstrates some knowledge of the subdiscipline of American literature with numerous errors and inaccuracies, understands only some of the literary movements and genres, cannot apply terms to a familiar literary work. In the term tests, the student demonstrates minimal ability to interpret the texts discussed. In the oral exam, the student demonstrates the ability to partially interpret, analyse and compare some works.

FX (insufficient; additional work is required): The student does not have sufficient core knowledge of the sub-discipline of American Literature, or their knowledge is uncontextualized, with multiple errors and inaccuracies, does not understand the significance and impact of literary movements and genres of the period in question, and cannot apply the terms discussed to any familiar or unfamiliar literary work. In the term tests, the student fails to interpret the texts discussed. In the oral exam, the student fails to demonstrate the ability to interpret, analyse and compare works.

Scale of assessment (preliminary/final): Continuous assessment (40 points/percent): Mid-term test (20 points/percent) End-of-term test (20 points/per cent) The term tests assess students' ability to cope with literary texts, that is, their ability to systematically analyse a literary text, critically evaluate and contextualize it, or creatively elaborate the text for pedagogical application. Final assessment (60 points/percent): Written exam, which assesses students' theoretical knowledge of the subject, e.g. literary terminology, their practical application to a literary text, and broader context.

### **Learning outcomes:**

Objectives and learning outcomes

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

- The student is oriented to the sub-discipline of American Literature, i.e., understands the literary terminology and contextual background of the course.

- The student has acquired nuanced knowledge of the history, literature and culture of countries where English is used as a first language and knows its application potential in developing intercultural literacy.
- The student understands the significance and impact of the major literary movements in American and more broadly, Anglophone literature during the period in question.
- The student learns about the development of literary genres of poetry, prose, and drama in American and Anglophone literature, and the diachronic and synchronic relations of genres.
- The student is familiar with representative works of American literature.
- The student recognizes the prosodic features of text, imagery, tropes, and figures.
- The student is oriented to the pedagogical contexts of literature and the teaching of American literature of the pre-modern period.
- The student is familiar with the basic methodology of the use of literary text in the pedagogical process.

**Skills:**

- The student is able to work with fiction (primary) and nonfiction (secondary) literature.
- The student is able to critically analyse the cultural, social and political phenomena represented in literary works.
- The student can apply the principles of literary criticism.
- The student can understand and interpret the latest findings of the discipline, apply analytical-critical and linguistic thinking, leading to creativity and empathy.
- The student has developed the skills to communicate fluently about professional aspects of literature and culture in English at B2 level.
- The student acquires presentation and digital skills, can search for relevant information in digital environments and work in the digital learning environment Moodle.
- The student is familiar with the pedagogical potentials of working with literary texts in English language teaching.

**Competences:**

- The student is able to read and interpret literature (fiction and non-fiction) in English.
- The student is able to argue, present and defend his/her views and opinions.
- The student can plan and organise own learning, use self-study strategies,
- The student learns self-discovery strategies leading to deepening metacognitive awareness.
- The student acquires interpersonal skills, e.g. they can communicate effectively in a group and solve professional problems as a#team.
- The student acquires literary and intercultural competences.
- The student develops the prerequisites for active involvement in professional life.

**Class syllabus:**

Course contents:

Main themes of the course: Colonial beginnings, the early and late colonial periods, 18th-century political rhetoric, New England Renaissance, Transcendentalism, Romantic prose, Romantic poetry, the Gilded Age, experimentation with various forms of the novel, turn-of-the-century naturalism, psychological realism, emergence of modernism.

Through the above course content and methods of education, students will acquire knowledge, develop their pedagogical skills and competences corresponding to the profile of a graduate of the bachelor's degree in the study programme Teaching of English Language and Literature in Combination.

**Recommended literature:**

Compulsory readings:

Primary sources according to the course requirements: B. Franklin: Autobiography, selected passages from Poor Richard's Almanach, Puritan writings from the 17th century, The Declaration of Independence, selected poems by E. Dickinson, W. Whitman and E. A. Poe (The Raven, Anabelle Lee), short stories by Poe (Tell-Tale Heart, The Cask of Amontillado), M. Twain: Adventures of T. Sawyer, Adventures of H. Finn, selected works of turn-of-the-century literature  
 JAVORČÍKOVÁ, J. (2017). A#Compendium of American Literature. Bratislava : Z-F LINGUA.  
 GREY, R. (2011). Brief History of American Literature. London: Wiley-Blackwell.

Recommended readings:

BRADBURY, M. and RULAND, R. (1992). From Puritanism to Postmodernism: A History of American Literature. London: Penguin Books.

implications of Anglophone literature of the period in question. The student understands the significance and impact of literary movements, is aware of fundamental genres, and can apply all the terms studied also to new literary works. The student demonstrates systemic knowledge and its application in the tests. In the oral exam, the student demonstrates comprehensive and systematic knowledge, the ability to independently analyse, interpret, compare and synthesize works.

B (very good performance): The student masters the knowledge of the sub-discipline of English Literature, listed in (A) with minor errors and inaccuracies, understands the vast majority of the significance and impact of literary movements and genres of the period in question. The student demonstrates systemic knowledge and its application, with minor errors, in the term tests. In the oral exam, the student proves complex and systematic knowledge, ability to analyse, interpret, compare and synthesize works independently.

C (good and reliable performance): The student masters a substantial part of the knowledge of the sub-discipline of English literature, with several errors and inaccuracies, understands most of the significance and impacts of literary movements and genres of the period in question, can apply some terms to specific unfamiliar literary works. The student demonstrates substantial knowledge in the term tests, with several errors. In the oral exam the student demonstrates extensive knowledge and the ability to adequately analyse, interpret, compare, and synthesize most works.

D (satisfactory performance): The student masters a substantial part of the knowledge of the sub-discipline of English literature, with numerous errors and inaccuracies, understands some of the significance and impacts of literary movements and genres of the period in question, cannot apply some terms to well-known literary works. In the term tests the student demonstrates some essential knowledge and its application, with numerous errors. In the oral exam the student demonstrates complex and systematic knowledge and a partial ability to analyse, interpret, compare and synthesize some works.

E (sufficient performance): The student has minimal knowledge of the subdiscipline of English literature, with numerous errors and inaccuracies, understands only some of the significance and impact of literary movements and genres, cannot apply the terms to well-known literary works. The student does not demonstrate substantial knowledge and application of knowledge in the term tests. In the oral exam the student demonstrates unsystematic knowledge, minimal ability to analyse, interpret, compare and partially synthesize some works.

FX (insufficient performance; additional work is required): The student does not know basics of the sub-discipline of English literature, or their knowledge is without context, with numerous errors and inaccuracies, does not understand the significance and impact of literary movements and genres of the period in question, cannot apply the studied terms to any literary work. In the term tests, the student fails to demonstrate essential knowledge and its application. In the oral exam, the student fails to demonstrate systematic knowledge, the ability to analyse, interpret, compare and synthesize works.

Scale of assessment (preliminary/final): Continuous assessment (40 points/percent): Presentation (40 points/40%) or weekly term tests during the semester (10 tests in total, 40 points/per cent) Students write weekly tests on the material covered. The tests assess students' ability to cope with literary texts, that is, their ability to systematically analyse a literary text, to critically evaluate and contextualize it and to creatively elaborate the text for pedagogical application. Final assessment (60 points/percent): Final oral exam, which assesses the theoretical knowledge of students, e.g. literary terminology and its application to a literary text, awareness of the broader context.

### **Learning outcomes:**

Objectives and learning outcomes

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

- The student is oriented in the sub-discipline of "English Literature", i.e. he/she understands the literary terminology and the contextual background of the course.
- The student acquires nuanced knowledge of the history, literature, culture and realities of countries where English is used as a mother tongue and knows their application potential in developing intercultural literacy.
- The student understands the significance and impact of the main literary movements in English (more broadly speaking, Anglophone) literature in the period in question.
- The student learns about the development of literary genres of poetry, prose and drama in English (Anglophone) literature, as well as the diachronic and synchronic relations of genre.
- The student becomes familiar with representative works of English literature of the period in question.
- The student recognises the prosodic features of texts, visual devices, tropes and figures.
- The student becomes familiar with the pedagogical contexts of literature and the educational potentials of teaching English literature.

#### Skills:

- The student critically evaluates cultural, social and political phenomena portrayed in literary works.
- The student is able to work with fiction (primary) and non-fiction (secondary) literature, and learns about the principles of literary criticism.
- The student can analyse the latest findings of the discipline, apply analytical-critical and linguistic thinking, leading to creativity and empathy.
- The student develops the skills to communicate fluently on professional aspects of literature and culture in English at B2 level.
- The student acquires presentation and digital skills, is able to search for relevant information in the digital environment and to work in the digital learning environment Moodle.
- The student learns how to work with literary texts in English language teaching.

#### Competences:

- The student is able to read and interpret literature (fiction and non-fiction) in English.
- The student is able to argue, present and defend his/her views and opinions, communicate effectively in a group and solve professional problems as a#team.
- The student can plan and organise his/her own learning, use self-study strategies.
- The student masters self-knowledge strategies leading to deepening metacognitive awareness.
- The student gains intercultural competences.
- The student develops the prerequisites for active involvement in professional life.

#### **Class syllabus:**

##### Course contents:

Main themes of the course: Literature of the Old and Middle English periods, English Renaissance literature, 17th- century literature and the Enlightenment, the origins and rise of the novel, major representatives of the 18th-century novel, Romanticism in poetry and fiction, the Victorian period and realist fiction. The fin de siècle and the origins of modernism.

Through the above course content and methods of education, students will acquire knowledge, develop their pedagogical skills and competences corresponding to the profile of a graduate of the bachelor's degree in the study programme Teaching of English Language and Literature in Combination.

## COURSE DESCRIPTION

|  |   |
|--|---|
| <b>Academic year:</b> 2022/2023  |   |
| <b>University:</b> Comenius University Bratislava  |   |
| <b>Faculty:</b> Faculty of Education   |   |
| <b>Course ID:</b><br>PdF.KPg/B-VUZde009/22   | <b>Course title:</b><br>Teaching practice (A) |
| <b>Educational activities:</b><br><b>Type of activities:</b> practice<br><b>Number of hours:</b><br><b>per week: per level/semester:</b> 1t<br><b>Form of the course:</b> on-site learning   |   |
| <b>Number of credits:</b> 2  |   |
| <b>Recommended semester:</b> 3., 5.  |   |
| <b>Educational level:</b> I.   |   |
| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by assessment (100% of the interim assessment).<br>The student completes an introductory practice seminar with the practice methodologist and a hospitality in a primary or secondary school according to the subject/subject specialization of the practice in the range of 10 - 20 hours. The student will keep a practice portfolio of the hours of hospitalisation, which he/she will submit to the practice methodologist for evaluation in print or electronic form (as agreed with the practice methodologist). The final assessment takes the form of a colloquium. To pass the course, a minimum score of 60% is required.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).<br>A - excellent results: the student is able to apply procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. The student is able to work effectively with professional sources. The student can critically, factually assess and evaluate the presented solutions of others, can evaluate the quality of his/her own work.<br>B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. Above-average orientation in the problems of general didactics, above-average communication skills, completion of assigned tasks. Critical evaluation is at borderline level. |   |

C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.

D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.

E - the results meet the minimum criteria: the student can define and define basic didactic concepts and elements, but cannot define them in educational contexts. Critical assessment and evaluation are absent. Sufficient level of practical skills and professional knowledge.

FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes and transferable competences:

The goal of the Teaching Practicum (A) is to initiate the professional vision of male and female student teachers, particularly in terms of descriptive and identification. After completing the course, the student knows and can navigate in school documentation, can process the record of the educational unit hospitalization, can describe educational phenomena (elements of communication in the learning group, individual differences of pupils, phenomena of the dynamics of the learning group), can identify the individual educational goals, methods, forms, principles and content elements of education. The aim of the course is also to observe and analyse the manifestations of the teacher's personality and the classroom environment. The student will be able to distinguish and evaluate the application of positive and negative evaluation in teaching, be able to identify non-standard educational situations and evaluate the effectiveness of their solution.

### **Class syllabus:**

Brief outline of the course:

Hospitalization activity:

Preparatory phase of the hospitalization - pre-praxis meeting: defining the objectives, methods and focus of the hospitalization.

The implementation phase of hospitalization - own observation of the educational process and processing of the hospitalization portfolio with emphasis on aspects of Communication in education, elements of communication, individual differences of pupils, phenomena of the dynamics of the learning group, educational goals, methods, forms, principles and content elements of education, manifestations of the teacher's personality and the classroom environment, positive and negative evaluations in teaching, non-standard educational situations.

The final phase of the hospitalization - post-hospitalization colloquium: analysis of the practice portfolio, reflection and interpretation of the observed educational phenomena. Familiarisation with the school documentation: state and school curriculum, electronic class book, online student book, Edupage information system. Educational standards, individual education plans, etc.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes and transferable competences:

The goal of Teaching Practice B is to initiate students' professional vision at the level of descriptive and identification. After completing the pedagogical practice B, the student knows and can work with pedagogical documentation, can process the record of the teaching unit hospitalization. Identifies the main objectives, methods, forms and phases of the teaching process. Can describe the elements of communication and classroom dynamics.

### **Class syllabus:**

Brief outline of the course:

The aim of teaching practice B is to enable students to observe the teaching process from the perspective of a future teacher. During the practicum, students observe the teaching process of the practicing teachers and, on the basis of theoretical knowledge of general didactics, analyse the teaching process in its entirety and, in the final reflection, formulate a characterisation of the observed teaching, the working atmosphere, evaluate the pedagogical competence of the practicing teachers, point out the positives and negatives, propose their own solutions and describe suggestions for change, and give their own reflections on the profession of teaching, where they are in relation to the observed teaching process.

Preparatory phase for the practice: pre-practicum seminar, definition of requirements for the implementation of the practice, preparation and study of hospitality sheets, study of didactic literature, pre-hospitalization interview with the trainee teacher.

The implementation phase of the practice: self-observation of the teaching process, processing of hospitality sheets with emphasis on aspects of objectives, methods, Communication in education, teacher and pupils' activities, identification of teaching phases, cognitive functions, pupils' activity and activation, and a comprehensive record of the teaching process.

Evaluation phase of practice: interpretation of observed educational phenomena, analysis of the hospital portfolio, reflection on the pedagogical practice B.

The student will keep a personal portfolio of teaching practice from the hours of hospitalization. The personal portfolio is an indicator of the student's personal commitment and responsibility. The portfolio may be in print or electronic format. The portfolio is submitted by the student to the Practice Methodologist for evaluation, and at the end of the portfolio the student will attend a colloquium to evaluate and reflect on the teaching practice.<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - outstanding results),<br>B (90-81%, very good - above average standard),<br>C (80-73%, well - normal reliable work),<br>D (72-66%, satisfactory - acceptable results),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A - excellent results: the student is able to apply procedures in the processes of formulating objectives according to different taxonomies of objectives. The student can analyze and classify methods and forms and other didactic categories in practice. The student is able to work effectively with professional sources. The student can critically, factually assess and evaluate the presented solutions of others, can evaluate the quality of his/her own work.<br>B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. Above-average orientation in the problems of general didactics, above-average communication skills, completion of assigned tasks. Critical evaluation is at borderline level. |   |

C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.

D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.

E - the results meet the minimum criteria: the student can define and define basic didactic concepts and elements, but cannot define them in educational contexts. Critical assessment and evaluation are absent. Sufficient level of practical skills and professional knowledge.

FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes and transferable competences:

The goal of Teaching Practice B is to initiate students' professional vision at the level of descriptive and identification. After completing the pedagogical practice B, the student knows and can work with pedagogical documentation, can process the record of the teaching unit hospitalization. Identifies the main objectives, methods, forms and phases of the teaching process. Can describe the elements of communication and classroom dynamics.

### **Class syllabus:**

Brief outline of the course:

The aim of teaching practice B is to enable students to observe the teaching process from the perspective of a future teacher. During the practicum, students observe the teaching process of the practicing teachers and, on the basis of theoretical knowledge of general didactics, analyse the teaching process in its entirety and, in the final reflection, formulate a characterisation of the observed teaching, the working atmosphere, evaluate the pedagogical competence of the practicing teachers, point out the positives and negatives, propose their own solutions and describe suggestions for change, and give their own reflections on the profession of teaching, where they are in relation to the observed teaching process.

Preparatory phase for the practice: pre-practicum seminar, definition of requirements for the implementation of the practice, preparation and study of hospitality sheets, study of didactic literature, pre-hospitalization interview with the trainee teacher.

The implementation phase of the practice: self-observation of the teaching process, processing of hospitality sheets with emphasis on aspects of objectives, methods, Communication in education, teacher and pupils' activities, identification of teaching phases, cognitive functions, pupils' activity and activation, and a comprehensive record of the teaching process.

Evaluation phase of practice: interpretation of observed educational phenomena, analysis of the hospital portfolio, reflection on the pedagogical practice B.

- An interview with a contemporary Canadian, Australian or South African artist or scholar of cultural studies
- Reflection on how the course has contributed to a better understanding of English-speaking cultures
- Exploration of the cultural relations between Slovakia and a selected English-speaking country, focusing on the presence of the culture of the selected country in Slovakia
- Preparation of a proposal for a Canadian/Australian/South African Culture Day to be held at Comenius University with a detailed description of the program and a rationale for the choice of program (or the same at the high school)

Grading:

100–95% A, 94–89% B, 88–83% C, 82–77% D, 76–70% E, 69–0% FX

A (excellent performance): The student has profound knowledge of themes and works related to the cultural heritage of English-speaking countries, understands the complex relationships between majority and minority cultures, can independently analyse and present selected texts in their contexts, reflects critically on classroom discussions, has an excellent ability to use cultural phenomena of English-speaking countries in the context of teaching and cultural mediation.

B (very good performance): The student has a solid understanding of themes and works related to the cultural heritage of English-speaking countries, understands the relationship between majority and minority cultures, can independently analyse and present selected texts in their contexts with minor interpretive errors, is able deduce important conclusions from class discussions, has a good ability to use cultural phenomena of English-speaking countries in the context of teaching and cultural mediation.

C (good performance): The student has a good understanding of themes and works related to the cultural heritage of English-speaking countries, mostly understands the relationship between majority and minority cultures, can analyse and present selected texts in their contexts to some extent, selectively understands the main conclusions of class discussions, has some ability to use cultural phenomena of English-speaking countries in the context of teaching and cultural mediation, three of the four portfolio assignments are acceptable.

D (satisfactory performance): The student has sufficient knowledge of themes and works related to the cultural heritage of English-speaking countries, has a limited understanding of the relationship between majority and minority cultures, and analyses and presents selected texts in their contexts without adequate critical reflection and clarity, can understand only a few ideas raised in class discussions, has minimal ability to use cultural phenomena of English-speaking countries in the context of teaching and cultural mediation, two of the four portfolio assignments are acceptable.

E (sufficient performance): The student has minimal knowledge of themes and works related to the cultural heritage of English-speaking countries, has a reduced understanding of majority and minority cultures, presents selected texts without analysis, summarizes class discussions superficially without due arguments, is unable to elaborate on the use of culture in teaching or cultural mediation, only one of the four portfolio assignments is acceptable.

FX (insufficient performance; extra work is required): The student presents inadequate or no research on the chosen topic, the quality of the written work is inadequate or not presented, the results do not meet the criteria specified for Grades A, B, C, D, and E.

Scale of assessment (preliminary/final): Continuous assessment (100%): Online quizzes – not graded A minimum score of 70% on the quizzes is required for the completion of the course.

Students have an unlimited number of attempts before the actual class. Presentation of a topic

from the culture of English-speaking countries (30 points/percent) Active participation in class

discussions (10 points/percent) Portfolio (60 points/percent): Submission of a portfolio containing

four of the following assignments: - A summary of two class discussions - A review of one

scholarly study related to any aspect of the course - An essay on the pedagogical application of any topic or work related to the class topic - A critical review of an iconic film related to Canadian, Australian or South African culture, - An interview with a contemporary Canadian, Australian or South African artist or scholar of cultural studies - Reflection on how the course has contributed to a better understanding of English-speaking cultures - Exploration of the cultural relations between Slovakia and a selected English-speaking country, focusing on the presence of the culture of the selected country in Slovakia - Preparation of a proposal for a Canadian/Australian/South African Culture Day to be held at Comenius University with a detailed description of the program and a rationale for the choice of program (or the same at the high school)

### **Learning outcomes:**

Objectives and learning outcomes:

From the learning objectives declared in the graduate profile, this course focuses on the acquisition of the following knowledge, skills and competences:

Knowledge:

- Students gain knowledge of the cultural heritage of English-speaking countries with a particular focus on Australia, New Zealand, Canada and South Africa.
- Students become aware of the legacy of indigenous cultures in these countries and the interactions between minority (indigenous) and majority cultures.
- Students learn about current significant cultural achievements and trends in lesser-known regions of the Anglophone world, and will be familiar with the cultural and ethnic diversity of Anglophone provenance.
- Students will be able to apply the topics presented to their teaching (create a lesson based on a cultural studies theme, teaching the language in interaction with the culture of Canada and North America).

Skills:

- Students will be able to work with scholarly text, critically analyse and present selected texts in their broader cultural contexts.
- Students develop presentation and argumentation skills.
- Students can analyse the latest findings of the discipline, apply analytical-critical and linguistic thinking to selected cultural phenomena, leading to creativity and empathy.
- Students develop foreign language skills to communicate fluently about professional aspects of culture and the teaching of culture in English at B2 level.
- Students acquire presentation and digital skills, can search for relevant information in the digital environment and work in the digital learning environment Moodle; they also acquire presentation and project development skills.

Competences:

- Students identify arguments in debates and are able to take a position and defend their views.
- Students are able to critically approach and present a written text and its wider cultural context.
- Students are able to apply the cultural legacy of English-speaking countries as competent and culturally knowledgeable teachers in primary and secondary education in Slovakia and in any other situation of cultural mediation.
- Students are able to apply critical analysis in the evaluation of selected cultural, social and political phenomena.
- Students can effectively use self-study strategies.
- Students can read scholarly literature in a foreign language.
- Students acquire intercultural competences and competences for intercultural approach in language education.
- Students obtain the prerequisites for active participation in professional life.

**Class syllabus:**

Course contents:

1. General knowledge of the spread of the English language and culture in the world: The British Empire, the US and the Cold War, globalization, different English-speaking societies in the world
2. Travelling in the English-speaking world: natural and cultural sites and monuments, iconic landscapes, people's adaptation to the landscape
3. Colonial background and post-colonial heritage of Canada, Australia, New Zealand and South Africa
4. Minority cultures in Canada, Australia, New Zealand and South Africa, interactions between minority and non-indigenous cultures
5. Contemporary cultural achievements and trends in Canada, Australia and South Africa, iconic visual depictions and films of the respective countries

Through the above course content and methods of education, students will acquire knowledge, develop their pedagogical skills and competences corresponding to the profile of a graduate of the bachelor's degree in the study programme Teaching of English Language and Literature in Combination.

| <b>Prerequisites:</b>  |   |
| <b>Course requirements:</b><br>Prerequisite subjects: none<br>Prerequisites for successful completion of the course:<br>The course is completed by examination, 50% of the interim and 50% of the final assessment.<br>The interim evaluation includes the following:<br>- continuous work during the semester focused on current issues of education, defining educational goals, concretizing educational principles, identifying educational methods, etc. - 15 points,<br>- term paper focused on a selected area of education - 35 points.<br>The final evaluation includes the following:<br>- final written examination - 50 points.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>For successful completion of the course it is necessary to obtain at least 60% of the points.<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good |   |

professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 50/50

### **Learning outcomes:**

Learning outcomes:

Learning objectives and outcomes:

Students will gain knowledge and understanding of the educational and self-educational process in a social context with emphasis on the application of the principles of creative-humanistic education and the presentation of new approaches and perspectives in the development of modern educational theory. On a theoretical-empirical level, students are able to implement a variety of educational activities and activities that can be applied within the profession of teacher/educator/teaching assistant and have the competence to solve basic problem situations in educational practice in collaboration with other professionals.

Transferable competences: the course develops students' analytical, critical, evaluative and creative thinking, reasoning in context and supports the development of their interpersonal skills, self-development and personal and professional growth

### **Class syllabus:**

Brief outline of the course:

1. An introduction to the discipline of educational theory. Theoretical foundations and determinants of education. Creative-humanistic education.
2. Views on education. Education in different historical periods.
3. School documents and legislation with a focus on education. Educational programme.
4. Goals of education and their determination.
5. The concept of education and self-education, functions, conditions and factors of education. The process of education/self-education and its phases.
6. Educational methods and new trends.
7. Characteristics and classification of educational principles.
8. Concretization of the content of educational action: moral education, pro-social education, intellectual education, aesthetic education, work education, physical education, ecological and environmental education, multicultural education, etc.
9. Organizational forms and means of education.
10. The personality of the teacher/educator/teaching assistant in the educational process. Educational styles and requirements for the personality of the teacher/educator/teaching assistant. Code of ethics of the teaching profession.
11. The personality of the child in the educational process. Categorization of factors of personality formation, bio-psycho-social determination of personality development and education.
12. Educational environment and its importance for a person.

13. Family and family education. Educational styles in the family. Negative tendencies in family upbringing.
14. Educational conditions of the school environment. Negative phenomena in the school environment and their prevention.
15. Education outside the classroom and its specifics

Final colloquial assessment 41 points.<br>A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. To pass the course, a minimum of 60% of the marks must be obtained.<br>The rating is awarded on a scale:<br>A (100-91%, excellent - excellent results with only minimal errors),<br>B (90-81%, very good - above average results with minor errors),<br>C (80-73%, good - normal reliable work, average results),<br>D (72-66%, satisfactory - acceptable results, but significant errors occur),<br>E (65-60%, sufficient - results meet minimum criteria),<br>Fx (59-0%, insufficient - extra work required).<br>A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.<br>A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.<br>A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help |   |

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Scale of assessment (preliminary/final): 100/0

### **Learning outcomes:**

Learning outcomes:

- Graduates of the course understand the principles of group dynamics
- The course graduate is well versed/learned and able to critically evaluate group events at the classroom level.
- He approaches the assigned tasks in a complex way, using both the process of analysis and synthesis in the search for solutions. In making decisions, he/she uses thinking strategies based on critical evaluation, which is based on facts and clearly formulated information from reliable information sources.
- On teaching methods aimed at fostering autonomy, cooperation and group work of pupils' creativity as one possible approach and as a source of inspiration for their future teaching practice.
- The graduate can use the acquired knowledge and skills in solving (problem-based) tasks, cooperative and group teaching. He/she is able to analyze the problem and synthesize new solutions. They are able to formulate clear conclusions and their justifications, which they can present to both the professional community and the general public.
- Graduates of the course are encouraged to adopt a growth-oriented mind-set and lifelong learning. Transferable competences on which the course reflects: development of communication, organisational and digital skills. Fostering analytical, critical, creative and growth-oriented thinking; developing skills related to facilitation and mentoring. Promoting the development of reflective, self-reflective skills and the perception of one's own responsibility for personal decisions.

### **Class syllabus:**

Brief outline of the course:

1. Group dynamics in the classroom
2. Elements of group dynamics
  - Group atmosphere and climate
  - Objectives of the group
  - Cooperation and competition
  - Tension and cohesion
  - Determination of group standards
  - Power and subgroup formation
  - Group structure and identity
  - Leadership and working with leadership
3. Factors promoting group dynamics
  - Group Membership
  - Experimenting

- Group culture
- Communication in a group
- 4. Control versus support for individual and group autonomy
- 5. Managing problem behaviour
- 6. Resolving conflicts in the classroom with the win-win method

Intermediate tasks: after each teaching block, students will make a structured reflection on the events during the training (three reflections in total).

Distance task: after all learning blocks are completed, students work in small groups on one distance task (micro-analysis of group events in the classroom - a model situation from the video).

Final evaluation: after completing the entire training and handing in the interim assignments and the distance assignment, students who have fulfilled the requirements of the interim evaluation will undergo a colloquial final evaluation.
