COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KRoJL/M-ROMde015/22	Course title: Applied Linguistics for Romance Languages Teachers
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Type and extent of teaching: 2 hours per week seminar; total per semester 22 hours Study method: combined (primary attendance) Student workload: 75 hours 11 x 2 hours of in-person teaching = 22 hours of in-person teaching 11 x 2 continuous home preparation for lessons, self-study, critical analysis of selected articles and chapters from recommended literature, designing mini research within the applied linguistics (research proposal and methodology, processing and analysis of language data) = 22 hours 1 x 15.5 preparation of the presentation based on analyzed language data and studied literature 1 x 15.5 preparation of seminar work based on presentation Teaching methods: short presentations of teachers and students, brainstorming, interview, case studies, group discussion	
Number of credits: 3	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Interim evaluation: Students will prepare for each seminar by studying selected articles and chapters of recommended literature so that they can actively participate in discussions and group work and develop a mini research project during the first part of the semester. Their work on individual seminars will be assessed on the basis of self-reflection and self-evaluation through the diary of the learner, who will be submitted after each seminar via an online form, feedback from the instructor (33 % of the evaluation). During the semester, students carry out their research project (analyze a sample of language data, develop a theoretical and methodological background of the project) and present it in colloquial form (33 % of the evaluation) and in the form of seminar work (33 % of the evaluation). The evaluation shall be awarded on a scale of: A (100-95 %, excellent – excellent results), B (94-85 %, very good — above average standard), C (84-77 %, good – normal reliable work), D (76-70 %, satisfactory — acceptable results), E (69-60 %, sufficient — the results meet the minimum criteria), Fx (59-0%, underperforming – extra work is required).	

The final evaluation reflects the level of vision of the graduate in selected topics of applied linguistics, with a primary focus on research on teaching and learning of Romance languages; the level of analytical and critical thinking and reasoning; the ability to apply theoretical knowledge to their professional experience; competence to use knowledge for their personal and professional development.

Excellent: the student is oriented at an excellent level in selected topics of applied linguistics. He/she critically analyses selected studies on language learning and learning from a methodological and theoretical point of view, compares their results, interprets their didactic implications and their importance for the teaching of Romance languages. In discussions, he/she can argue clearly and logically, support its arguments with the knowledge gained during the seminar and use the relevant conceptual apparatus. He/she is able to design a research project that is characterized by a high degree of theoretical and methodological consistency, analyze language data based on methodologies of applied linguistics and present its research in colloquial and written form.

Very good: the student focuses on a very good level in selected topics of applied linguistics. It critically analyses selected studies on language learning and learning from a methodological and theoretical point of view, compares their results, interprets their didactic implications and their importance for the teaching of Romance languages. In discussions, it is usually able to argue clearly and logically. He/she can explain any ambiguities, and he connects his/her arguments with the knowledge gathered during the seminar. He/she is able to design a research project that is characterized by theoretical and methodological consistency, analyze language data based on the methodologies of applied linguistics and present its research in both colloquial and written form.

Good: the student focuses on selected topics of applied linguistics. He/she analyzes selected studies on learning and learning languages from a methodological and theoretical point of view, compares their results, can mostly interpret their didactic implications and their importance for the teaching of Romance languages. In discussions, he/she is usually able to argue clearly and logically. He/she can explain any ambiguities, although not always and uses the relevant conceptual apparatus. He/she can design a sufficient high-quality research project, anchored in a well-defined theoretical and methodological framework, even if it presents minor shortcomings, especially at the formal level. He/she can analyze language data based on methodologies of applied linguistics and present its research in colloquial and written form.

Satisfactory: the student focuses on selected topics of applied linguistics. He/she participates less actively in discussions, his/her arguments are partly based on general knowledge and his own experience, to a satisfactory extent they are linked to the knowledge gained during the seminar. He/she can design a research project anchored in the theoretical and methodological apparatus of applied linguistics, even if it contains shortcomings at a formal or logical level. He/she can analyze language data based on methodologies of applied linguistics, although the presentation of research has formal shortcomings.

Sufficient: the student focuses on selected topics of applied linguistics. He/she is less active in discussions, his/her arguments are mostly based on general knowledge and his own experience, their connection with the knowledge gained during the seminar is not always clear. He/she can design a research project anchored in the theoretical and methodological apparatus of applied linguistics, even if it contains shortcomings at a formal or logical level. The presentation of research has formal shortcomings.

Learning outcomes:

Objectives and outputs of education:

Educational objectives: to develop graduates' knowledge of selected topics of applied linguistics, in particular with a focus on research on teaching and learning Romance languages (e.g. theory in the examination of language acquisition such as universal grammar, functionalistic approach, conceptually oriented approach, usage-based approach, input processing, declarative

and procedural model, processability theory, sociocultural theory, etc.), to provide an overview of selected methods of applied linguistics (e.g. different methods of interlanguage analysis, etc.). By analysing and comparing selected research with different theoretical and methodological approaches, develop a professional perspective on the process of teaching and learning languages. Use this knowledge in practice by designing and carrying out mini research on applied linguistics, which is oriented to topics relevant to Romance language teachers (e.g. interlanguage analysis, analysis of written expression, analysis of linguistic engagement, etc.).

Educational outputs: The graduate of the course acquires knowledge of selected studies of applied linguistics and methodological procedures in research of crosslanguage, language competence and linguistic engagement. Based on this knowledge, the graduate is able to scientifically examine the development of interlanguage and language competence among learners, develop theoretically and methodologically anchored methods for examining the results of his/her own teaching process.

Class syllabus:

Block 1: theoretical approaches for exploring language learning (universal grammar and language acquisition, fiscalist approach, declarative and procedural model, workability theory, sociocultural theory, complex system theory).

Block 2: methodological approaches to the examination of interlanguage and linguistic competence (qualitative and quantitative methods, longitudinal and trasversal studies, learner corpora, obligatory occasion analysis, frequency analysis, analysis of the function of language forms and structures, analysis of complexity and correctness, sociocultural methods).

Block 3: analysis of selected research, design and development of own research project, analysis of language data, presentation and discussion of student research projects.

Learning outcomes:

Students have acquired theoretical knowledge about national measurements of pupils' knowledge and skills in Slovak language and literature, about the Slovak language and literature Olympiad, about recitation competitions and about the creation of the school magazine and school radio broadcast. They are able to analyse and create test tasks and assignments, analyse and evaluate pupils' written and oral speeches on the basis of set assessment criteria, prepare reciters for artistic recitation and organise the work of the school magazine and radio programme. They are prepared not only to systematise and deepen pupils' knowledge and skills, but also to encourage and develop their talent and interest in the Slovak language and literature. As a result of the analysis and solution of practical problem-formulated tasks, the ability to perceive the broader context of professional issues in relation to school practice is developed, while the ability to think analytically and critically is deepened. The acquired theoretical knowledge and practical skills can be used and creatively

applied in the position of a teacher of lower and upper secondary education, not only during the teaching of Slovak language and literature, but also within the framework of pupils' leisure activities.

Class syllabus:

1. National measurements of pupils' knowledge and skills in Slovak language and literature. Testing 5 and Testing 9. Analysis of test tasks and test results.
2. Maturita examination in Slovak language and literature. Analysis of test tasks and results of the external part of the matriculation examination.
3. The written form of the internal part of the maturita examination in Slovak language and literature. Criteria for evaluation of essays, proofreading marks.
4. Analysis of the evaluation of specific essays. Self-assessment of the submitted essay work.
5. Developing pupils' interest and talents in the field of Slovak language and literature. Olympiad in Slovak language and literature. Analysis of competition assignments.
6. Evaluation of competition assignments in the Slovak Language and Literature Olympiad. Own creation of competition assignments.
7. Recitation competitions. Preparation of reciters for recitation.
8. Criteria for evaluation of recitation. Self-assessment of the pupil's recitation.
9. School magazine and radio. Organisation of work in the school magazine and radio.
10. Analysis of the concept and structure of the school magazine or school radio broadcast.
11. Final discussion and evaluation of the contribution of the course to teaching practice, summarising and reflecting on new knowledge and experience.

The course will enable the linking of theoretical and practical training of students of Slovak language and literature teaching with the current needs and requirements of school practice. Students will learn about the current methods of nationwide assessment of pupils' educational results in the subject of Slovak language and literature after their transition from primary to lower secondary education (Testing 5) and at their exit from lower secondary education (Testing 9) and upper secondary education (matriculation examination in Slovak language and literature), the specification of standardized tests in terms of their form and content, as well as the conclusions of analyses of pupils' achievements in national measurements in recent years. Through the identification and analysis of problematic types of test tasks, they will learn how the teaching of Slovak language and literature can be strengthened in those areas where pupils do not achieve the desired results in the tests. They will learn the criteria and correction marks used in correcting and evaluating essays in the written form of the internal part of the final school-leaving examination in Slovak language and literature, oral and written linguistic expressions of pupils in the Slovak Language and Literature Olympiad, as well as the criteria used in evaluating artistic performances in recitation competitions, and they will learn how to apply them in analysing and evaluating specific linguistic expressions. Students will be able to use and apply the acquired theoretical knowledge and practical experience in the teaching of Slovak language and literature in accordance with the current needs of school practice, in the creation of their own test tasks and competition assignments. The course will lead students to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop their skills to analyse and evaluate, formulate and defend arguments and solve professional problems and current problems of school practice. As future teachers of Slovak language and literature, students will also be prepared to work in the sphere of pupils' leisure activities aimed at developing their knowledge, skills and talents in the field of Slovak language and literature, in the field of artistic recitation and in the creation of a school magazine or school radio broadcast.

Course requirements: Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of 2 practical linguistic analyses of the text after the 6th and 11th topics (2 x 50 points = 100 points), which will be focused on the application of the acquired knowledge and the identification of linguistic phenomena. The course is completed with an assessment resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (1. practical analysis: less than 30 points; 2. practical analysis: less than 30 points). The rating is awarded on a scale: A (100 - 93 %, excellent - outstanding): excellent performance: The student has an excellent knowledge of complex linguistic analysis in the required scope, logically arranges the facts presented, can critically and independently evaluate the acquired knowledge convincingly, creatively and at an excellent level apply and adapt it in complex linguistic analysis of texts in school and language practice, has the ability to creatively and independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has well-developed skills for further independent education;	

B (92 - 85 %, very good - above average standard): very good performance: The student has a very good knowledge of complex linguistic analysis to the required extent, logically arranges the facts presented, takes a partially critical attitude to the acquired knowledge and can apply and adapt it very well to complex linguistic analysis of texts in school and language practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed skills for independent further self-study;

C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of complex linguistic analysis to the required extent, organises the facts presented appropriately, can reliably apply and adapt the knowledge acquired in complex linguistic analysis of texts in school and language practice, solves individual tasks and assignments reliably, has well-developed skills for independent further self-study;

D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of complex linguistic analysis to the required extent, demonstrates some deficiencies in the organisation of facts, can apply the acquired knowledge satisfactorily in school and language practice, solves individual tasks and assignments satisfactorily, has acceptably developed the skills necessary for self-study;

E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of complex linguistic analysis to the required extent and deficiencies in the organisation of facts, can minimally apply the acquired knowledge in school and language practice, solves individual tasks and assignments at a sufficient level, has the minimum skills necessary for self-study;

Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of complex linguistic analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge in school and language practice, cannot solve individual tasks and assignments, cannot self-study further.

Learning outcomes:

The theoretical knowledge about the language system and its individual levels, as well as about the orthographic aspect of the language, which the student has acquired during his/her previous studies, and consequently the knowledge about complex linguistic analysis also in school practice, its theory, pages, concept and methodology can be applied by the student both in practical linguistic analyses of coherent texts of different functional styles of written Slovak, and in practical complex linguistic analyses as they are understood and used in school practice. As a result, they acquire important practical skills in assessing linguistic phenomena in terms of their sound, lexical-semantic, word-formation, morphematic, morphological, syntactic, stylistic and orthographic aspects, which they are able to use creatively and independently in complex linguistic analyses of texts, in solving problem tasks and in synthesising new solutions in the field, while they are able to actively acquire and communicate the necessary information and facts and to formulate and defend relevant professional arguments appropriately. He/she has developed his/her analytical skills as well as abstract and critical thinking skills, is able to think in context and has developed the ability to expand his/her knowledge independently. The acquired theoretical knowledge and practical skills can be applied and creatively applied primarily in the future practice of a teacher of Slovak language and literature at the level of lower and upper secondary education when comprehensively assessing, analysing and evaluating linguistic analyses, as well as linguistic expressions of pupils and students and subsequent independent analysis of the problem in the given area at the level of the language, or also for the needs of the publishing environment when correcting linguistic expressions, because he/she is able to look at linguistic phenomena in the broadest linguistic contexts. The student is also able to convey complex information about linguistic phenomena to the general public and to offer conclusions and linguistic justifications to lay audiences. As a result of this training, the students'

professional level as well as their linguistic culture is increased, which also appears to be very necessary in terms of the students' future practice.

Class syllabus:

1. Theory, aspects and concept of comprehensive language analysis also with regard to school practice.
2. Methodology of comprehensive language analysis.
3. Full (complete) and incomplete (selective/partial) comprehensive language analysis.
4. Phonological analysis. Word analysis into syllables and syllables. Orthoepic analysis. Pronunciation of vowels and vowel groups, bound pronunciation of words and other sound phenomena, suprasegmental phenomena.
5. Lexical-semantic analysis. Analysis of lexical meaning and paradigmatic relations of lexemes.
6. Word-formation analysis. Analysis of the ways of forming words, determination of base and derived words and the word-formation structure of derived words.
7. Morphematic analysis. Determination of individual types of morphemes within words.
8. Morphological analysis. Determination of word types and grammatical and lexico-grammatical categories.
9. Syntactic analysis. Analysis of simple sentences and clauses. Determination of sentence articles and individual types of constructions.
10. Stylistic analysis. Analysis of stylistic devices in the sentence and in the text with regard to the specific model structure of the text.
11. Orthographic analysis. Analysis and justification of individual orthographic phenomena.

On the basis of the use of the acquired theoretical knowledge about the language system, its individual levels, as well as about the orthographic aspect of the language, which on the one hand will build on the knowledge acquired in the given field during secondary school, but especially during bachelor studies, and on the other hand will further enable the deepening and systematic development of its knowledge into a complex form, the student will acquire practical skills that he will be able to apply in the assessment and complex analysis of linguistic phenomena. The student will acquire theoretical knowledge of complex linguistic analysis, its theory, aspects, concept and methodology. The student will become familiar with the essence of phonic, orthoepic, lexico-semantic, word-formation, morphematic, morphological, syntactic, stylistic and orthographic analyses. On the basis of the use of the given knowledge, as well as relevant theoretical knowledge about the language system, its individual levels and the orthographic aspect of the language, which the student has acquired during his/her studies, he/she will acquire practical skills applied in the assessment and analysis of linguistic phenomena, which will be reflected in the student's use of the acquired theoretical knowledge in practical complex linguistic analyses of texts, in the independent solving of problematic linguistic tasks and in the synthesis of their new and creative solutions. In doing so, the student will be guided to actively acquire information in the field, use digital technologies and resources, effectively use the acquired knowledge, adequately formulate and defend arguments and, on their basis, solve professional problems in the field, using appropriate methods of the discipline. They will also develop their communication competences, the ability to interpret facts correctly, to take responsibility for the quality of their work, to follow the principles of authorial ethics, the ability to plan and be actively responsible for their own independent learning. They will also learn to look at the acquired knowledge base from the perspective of school practice. The acquired knowledge and skills will be necessary for the student primarily in the future practice of a teacher of Slovak language and literature at the level of lower and upper secondary education in the comprehensive assessment, analysis and evaluation of linguistic analyses, as well as of pupils' and students' speeches, and subsequent independent analysis of a possible problem in a given area at the level of the language, in correcting linguistic speeches, because it will enable him to view linguistic phenomena in the broadest linguistic context. The emphasis on raising the

student's professional level and linguistic culture will be equally important in adequately conveying information about linguistic phenomena to the general public, as well as in offering relevant conclusions, linguistic explanations and justifications to lay audiences.

Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of 2 practical linguistic analyses of the text after the 6th and 11th topics (2 x 50 points = 100 points), which will be focused on the application of the acquired knowledge and the identification of linguistic phenomena. The course is completed with an assessment resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (1. practical analysis: less than 30 points; 2. practical analysis: less than 30 points). The rating is awarded on a scale: A (100 - 93 %, excellent - outstanding): excellent performance: The student has an excellent knowledge of complex linguistic analysis in the required scope, logically arranges the facts presented, can critically and independently evaluate the acquired knowledge convincingly, creatively and at an excellent level apply and adapt it in complex linguistic analysis of texts in school and language practice, has the ability to creatively and independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has well-developed skills for further independent education;	

B (92 - 85 %, very good - above average standard): very good performance: The student has a very good knowledge of complex linguistic analysis to the required extent, logically arranges the facts presented, takes a partially critical attitude to the acquired knowledge and can apply and adapt it very well to complex linguistic analysis of texts in school and language practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed skills for independent further self-study;

C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of complex linguistic analysis to the required extent, organises the facts presented appropriately, can reliably apply and adapt the knowledge acquired in complex linguistic analysis of texts in school and language practice, solves individual tasks and assignments reliably, has well-developed skills for independent further self-study;

D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of complex linguistic analysis to the required extent, demonstrates some deficiencies in the organisation of facts, can apply the acquired knowledge satisfactorily in school and language practice, solves individual tasks and assignments satisfactorily, has acceptably developed the skills necessary for self-study;

E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of complex linguistic analysis to the required extent and deficiencies in the organisation of facts, can minimally apply the acquired knowledge in school and language practice, solves individual tasks and assignments at a sufficient level, has the minimum skills necessary for self-study;

Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of complex linguistic analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge in school and language practice, cannot solve individual tasks and assignments, cannot self-study further.

Learning outcomes:

The theoretical knowledge about the language system and its individual levels, as well as about the orthographic aspect of the language, which the student has acquired during his/her previous studies, and consequently the knowledge about complex linguistic analysis also in school practice, its theory, pages, concept and methodology can be applied by the student both in practical linguistic analyses of coherent texts of different functional styles of written Slovak, and in practical complex linguistic analyses as they are understood and used in school practice. As a result, they acquire important practical skills in assessing linguistic phenomena in terms of their sound, lexical-semantic, word-formation, morphematic, morphological, syntactic, stylistic and orthographic aspects, which they are able to use creatively and independently in complex linguistic analyses of texts, in solving problem tasks and in synthesising new solutions in the field, while they are able to actively acquire and communicate the necessary information and facts and to formulate and defend relevant professional arguments appropriately. He/she has developed his/her analytical skills as well as abstract and critical thinking skills, is able to think in context and has developed the ability to expand his/her knowledge independently. The acquired theoretical knowledge and practical skills can be applied and creatively applied primarily in the future practice of a teacher of Slovak language and literature at the level of lower and upper secondary education when comprehensively assessing, analysing and evaluating linguistic analyses, as well as linguistic expressions of pupils and students and subsequent independent analysis of the problem in the given area at the level of the language, or also for the needs of the publishing environment when correcting linguistic expressions, because he/she is able to look at linguistic phenomena in the broadest linguistic contexts. The student is also able to convey complex information about linguistic phenomena to the general public and to offer conclusions and linguistic justifications to lay audiences. As a result of this training, the students'

professional level as well as their linguistic culture is increased, which also appears to be very necessary in terms of the students' future practice.

Class syllabus:

1. Theory, aspects and concept of comprehensive language analysis also with regard to school practice.
2. Methodology of comprehensive language analysis.
3. Full (complete) and incomplete (selective/partial) comprehensive language analysis.
4. Phonological analysis. Word analysis into syllables and syllables. Orthoepic analysis. Pronunciation of vowels and vowel groups, bound pronunciation of words and other sound phenomena, suprasegmental phenomena.
5. Lexical-semantic analysis. Analysis of lexical meaning and paradigmatic relations of lexemes.
6. Word-formation analysis. Analysis of the ways of forming words, determination of base and derived words and the word-formation structure of derived words.
7. Morphematic analysis. Determination of individual types of morphemes within words.
8. Morphological analysis. Determination of word types and grammatical and lexico-grammatical categories.
9. Syntactic analysis. Analysis of simple sentences and clauses. Determination of sentence articles and individual types of constructions.
10. Stylistic analysis. Analysis of stylistic devices in the sentence and in the text with regard to the specific model structure of the text.
11. Orthographic analysis. Analysis and justification of individual orthographic phenomena.

On the basis of the use of the acquired theoretical knowledge about the language system, its individual levels, as well as about the orthographic aspect of the language, which on the one hand will build on the knowledge acquired in the given field during secondary school, but especially during bachelor studies, and on the other hand will further enable the deepening and systematic development of its knowledge into a complex form, the student will acquire practical skills that he will be able to apply in the assessment and complex analysis of linguistic phenomena. The student will acquire theoretical knowledge of complex linguistic analysis, its theory, aspects, concept and methodology. The student will become familiar with the essence of phonic, orthoepic, lexico-semantic, word-formation, morphematic, morphological, syntactic, stylistic and orthographic analyses. On the basis of the use of the given knowledge, as well as relevant theoretical knowledge about the language system, its individual levels and the orthographic aspect of the language, which the student has acquired during his/her studies, he/she will acquire practical skills applied in the assessment and analysis of linguistic phenomena, which will be reflected in the student's use of the acquired theoretical knowledge in practical complex linguistic analyses of texts, in the independent solving of problematic linguistic tasks and in the synthesis of their new and creative solutions. In doing so, the student will be guided to actively acquire information in the field, use digital technologies and resources, effectively use the acquired knowledge, adequately formulate and defend arguments and, on their basis, solve professional problems in the field, using appropriate methods of the discipline. They will also develop their communication competences, the ability to interpret facts correctly, to take responsibility for the quality of their work, to follow the principles of authorial ethics, the ability to plan and be actively responsible for their own independent learning. They will also learn to look at the acquired knowledge base from the perspective of school practice. The acquired knowledge and skills will be necessary for the student primarily in the future practice of a teacher of Slovak language and literature at the level of lower and upper secondary education in the comprehensive assessment, analysis and evaluation of linguistic analyses, as well as of pupils' and students' speeches, and subsequent independent analysis of a possible problem in a given area at the level of the language, in correcting linguistic speeches, because it will enable him to view linguistic phenomena in the broadest linguistic context. The emphasis on raising the

student's professional level and linguistic culture will be equally important in adequately conveying information about linguistic phenomena to the general public, as well as in offering relevant conclusions, linguistic explanations and justifications to lay audiences.

Learning outcomes:

The student has a basic knowledge of the earlier stages of the development and dialectal stratification of the Slovak language. The student has knowledge of the main developmental and linguistic-integrative phenomena in the Slovak national language, which have been applied in its written form. He has developed the skills to synthesise the knowledge he has acquired in the study of the contemporary Slovak language and can apply it in the creative recognition of the main developmental changes in the Slovak language and in the recognition of their functioning in the linguistic system of the Slovak language. On the basis of the knowledge from dialectology, the student is able to analyse and systematise the main features of the dialect system of the Slovak national language.

The student is able to apply the acquired knowledge in describing the linguistic contexts related to the development and dialectal structure of the Slovak national language and in identifying selected dialectal and developmental phenomena in written monuments. This is transferable knowledge that is applicable in everyday practice, especially as analytical and interpretive skills that will enable the person thus profiled to combine knowledge of contemporary language and culture with thinking

about the history, culture and development of Slovak society. The student can use and creatively apply the knowledge, insights and skills in the school environment as a teacher of lower and upper secondary education. On the basis of problem-solving tasks, the student has acquired the skills to actively acquire information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. The student has also acquired a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Proto-Slavic origin of Slovak.
2. Slovak in the family of Slavic languages in the context of theories of its origin.
3. Old Slavonic and Church Slavonic.
4. The main changes in the Proto-Slavic basis of Slovak (sound and morphological level).
5. The main features in the development of the Slovak vocabulary. The lexis inherited from the Proto-Slavic.
6. Adoptions from non-Slavic languages.
7. Slovak dialectology and methods of its research.
8. Basic features of Slovak dialect macroareals and their subdivision.
9. Characteristics of cultural variants of Slovak in the context of the older Slovak written culture.
10. Reflection of the linguistic development of Slovak in the contemporary written language.
11. Dialectology and research of Slovak in relation to Slavic and non-Slavic languages (Slavic Language Atlas, Pan-Carpathian Dialectological Atlas, Atlas of the Slovak Language, projects and international research).

The thematic structuring of the course according to the individual headings will allow the student to gradually gain a basic overview of the development and dialectal stratification of the national language. It will provide the necessary body of knowledge that will support the formation of creative and synthesising skills, which will be essential especially in terms of profiling a graduate who will be able to orientate himself in the issues of the development of the national language, history and culture. The course will create the space for the complementarity of approaches necessary for the formation of the graduate's personality according to the profile and with skills that extend into the fields of history and culture of society. At the same time, the student will acquire the prerequisites and motivation to develop the acquired skills in further self-study and critical thinking.

The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, modifying his/her knowledge in the process and creatively using appropriate and adequate methods of the discipline. The student will consolidate and develop communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and pluralistic civic attitudes.

Prerequisites:	
Course requirements: The condition for successful completion of the course is active participation in lessons, the fulfilment of continuous written tasks during the semester and the final examination of theory and practical use of language. <ul style="list-style-type: none"> • The interim evaluation is 25 %: active participation in classroom activities; elaboration of continuous written tasks on individual topics 10%; elaboration of an individual task according to the assignment 5 %. Fulfilment of the conditions for interim evaluation is a condition for participation in the examination. • During the semester, the student will demonstrate the ability to analyze language phenomena, discuss problematic aspects and to use the acquired knowledge of the Spanish language in assignments requiring individual work (exercises, independent verification of information in professional sources), as well as the ability to process the selected language phenomenon in the form of didactic material. • The final test represents 75 % of the evaluation. The examination consists of an oral theoretical part (25 %) and a written practical part (50 %). The student must obtain at least 60% from both parts. • At the final exam, the student will demonstrate the extension and deepening of the knowledge about Spanish acquired at the first stage of study, their understanding, integration and ability to apply them in the analysis of language phenomena. In order to successfully complete the subject, the student will demonstrate the ability to logically and comprehensibly explain selected language phenomena, apply knowledge to clarify specific examples, as well as the ability to assess and 	

evaluate the spelling and grammatical correctness of sentences and short texts and to propose corrections. At the same time, he/she will demonstrate an adequate linguistic competence: in the oral part of the exam the correct pronunciation and in the written part the spelling, punctuation and grammar control.

At least 60% of the total scoring must be obtained for successful completion of the course.

The evaluation shall be awarded on a scale of:

A (100-95%, excellent – excellent results),

B (94-85 %, very good — above average standard),

C (84-77 %, good – normal reliable work),

D (76-70 %, satisfactory — acceptable results),

E (69-60 %, sufficient — the results meet the minimum criteria),

FX (59-0%, underperforming – extra work required)

A: The student, in both interim tasks and in the final exam, demonstrates knowledge of the Spanish phonetics, phonology and grammar at an excellent level; on the oral part of the exam he/she answers independently, in a logical sequence, uses the correct terminology and demonstrates a deeper understanding of phenomena and contexts, is able to present information about Spanish in a contrasting perspective with Slovak, being able to go into detail, being able to support theoretical claims with appropriate examples; has a high level of Spanish language competence in both oral and written language, has an excellent command of grammar and spelling.

B: The student in continuous tasks and in the final exam demonstrates above-average knowledge of the Spanish phonetics, phonology and grammar; responds to the oral part of the examination alone or only with less guidance from the examiner, uses the correct terminology and demonstrates a very good understanding of phenomena and contexts; can point to the main differences between Spanish and Slovak and can support theoretical claims with appropriate examples; has a very good level of Spanish language competence in both oral and written language, speaks grammar and spelling, shortcomings are rare and minor serious.

C: The student in continuous tasks and in the final exam demonstrates good knowledge of phonetics, phonology and grammar of Spanish; on the oral part of the test, it responds largely independently, responds adequately to the investigator's guidance, uses the correct terminology; can point to the main differences between Spanish and Slovak and is able to support most theoretical claims with appropriate examples; he/she has a good level of Spanish language competence in both oral and written language, has occasional shortcomings in his mastery of grammar and spelling, but is able to compensate them adequately for most of the time.

D: The student in both ongoing tasks and in the final examination demonstrates satisfactory knowledge of the phonetics, phonology and grammar of Spanish, does not respond to the oral part of the exam quite independently, but responds well to the investigator's guidance, using mostly the correct terminology; most theoretical claims can be supported by examples, but the ability to link phenomena and clearly describe the differences between Spanish and Slovak is lower; has an average level of Spanish language competence in both oral and written language, there are also shortcomings in the mastery of grammar and spelling, but communicative competence is at a good level.

E: The student demonstrates sufficient knowledge of the Spanish phonetics, phonology and grammar in both interim tasks and the final exam; does not respond independently to the oral part of the examination and there is also a terminological uncertainty, but the answer meets the minimum criteria following the investigator's guidance; to a relatively small extent can explain the differences between Spanish and Slovak; has a standard level of Spanish language competence, both oral and written, there are several shortcomings in the mastery of grammar or spelling or pronunciation, but communicative competence is acceptable.

FX: The student does not continuously and/or in the final examination demonstrates knowledge of the Spanish phonetics, phonology and grammar at the level of the minimum criteria and does not reach the necessary number of points from any part of the exam; he/she does not respond to the oral part of the examination on its own or after the investigator's instructions, does not sufficient control the content or terminology, the information cannot explain or does not show sufficient control of grammar and spelling in the written part.

Their work on individual seminars will be assessed on the basis of self-reflection and self-evaluation through the diary of the learner, who will be submitted after each seminar via an online form, feedback from the instructor (33 % of the evaluation). During the semester, students carry out their seminar project (they analyze a selected part of the professional literature, develop the theoretical and methodological background of the project) and present it in colloquial form (33 % of the evaluation) and in the form of seminar work (33 % of the evaluation). The evaluation shall be awarded on a scale of: A (100-95%, excellent – excellent results), B (94-85 %, very good — above average standard), C (84-77 %, good – normal reliable work), D (76-70 %, satisfactory — acceptable results), E (69-60 %, sufficient — the results meet the minimum criteria),

In discussions, he/she can argue clearly and logically, support its arguments with knowledge gained during the seminar and use the relevant conceptual apparatus. He/she is able to design a seminar project, which is characterized by a high degree of theoretical and methodological consistency, analyze the selected issue on the basis of methodologies of contemporary linguistics and present its research in colloquial and written form.

Very good: The student focuses on a very good level in selected topics of contemporary linguistics. He/she critically analyzes selected topics from a methodological and theoretical point of view, can compare them with each other, interprets their didactic implications and their importance for the teaching of Romance languages. In discussions, he/she is usually able to argue clearly and logically. He/she can explain any ambiguities, and he connects his arguments with the knowledge gathered during the seminar. Good: The student focuses on selected topics of contemporary linguistics. He/she analyzes selected topics from a methodological and theoretical point of view, compares them with each other, can mostly interpret their didactic implications and their importance for the teaching of Romance languages. In discussions, he/she is usually able to argue clearly and logically. It can explain any ambiguities, although not always and uses the relevant conceptual apparatus. He/she participates less actively in discussions, his arguments are partly based on general knowledge and his own experience, to a satisfactory extent they are linked to the knowledge gained during the seminar. He/she can design a seminar project anchored in the theoretical and methodological apparatus of contemporary linguistics, even if there are shortcomings at a formal or logical level. He/she is able to analyse language data on the basis of methodologies of contemporary linguistics, although the presentation of the seminar project has formal shortcomings.

The presentation of the seminar work has formal shortcomings.

Learning outcomes:

Educational objectives:

Develop graduates' knowledge of selected topics of contemporary linguistics, taking into account theory and research on general and applied problems in relation to Romance languages (e.g. current trends in Francophone, Hispanophone and Italophone linguistics; theoretical and applied aspects of quantitative linguistics, mathematical modelling in linguistics, frequency in language,

computer linguistics, corpus language, modelling, experiments, stochastic and rule methods, theory of information, analysis of valence properties in relation to theories of formal and classical logic. On the basis of analysis and comparison of selected research with different theoretical and methodological approaches, develop a professional view of basic and applied research in contemporary linguistics. Use this knowledge in practice by designing and carrying out seminar work that is oriented to topics of contemporary linguistics relevant to Romance language teachers (e.g. use of knowledge of corpus linguistics, automatic software tools of language analysis, syntax theory, grammar, general-linguistic overlaps of contrasting language exploration, etc.).

Educational outcomes:

Acquisition of a basic overview of modern trends in discipline with particular regard to contemporary Romance linguistics and computer linguistics. By deepening theoretical linguistic training, it allows the student to orientate better in practice. The future foreign language teacher is able to take advantage of individual trends in language science and the latest developments in the discipline in linguistic research in individual Romance languages.

Prerequisites:	
Course requirements: Interim evaluation: Students will prepare for each seminar by studying selected topics of recommended literature so that they can actively participate in discussions and group work and develop a mini seminar project during the first part of the semester. Their work on individual seminars will be assessed on the basis of self-reflection and self-evaluation through the diary of the learner, who will be submitted after each seminar via an online form, feedback from the instructor (33 % of the evaluation). During the semester, students carry out their seminar project (they analyze a selected part of the professional literature, develop the theoretical and methodological background of the project) and present it in colloquial form (33 % of the evaluation) and in the form of seminar work (33 % of the evaluation). The evaluation shall be awarded on a scale of: A (100-95%, excellent – excellent results), B (94-85 %, very good — above average standard), C (84-77 %, good – normal reliable work), D (76-70 %, satisfactory — acceptable results), E (69-60 %, sufficient — the results meet the minimum criteria),	

Fx (59-0%, underperforming – extra work is required).

The final evaluation reflects the level of visual insight of the graduate in selected topics of contemporary linguistics, with a primary focus on the current state of research in linguistics in general and specifically in linguistically focused on Romance languages; the level of analytical and critical thinking and reasoning; the ability to apply theoretical knowledge to their professional experience; competence to use knowledge for their personal and professional development.

Excellent: The student is oriented at an excellent level in selected topics of contemporary linguistics. Critically analyzes selected topics from a methodological and theoretical point of view, compares various thesis, interprets their didactic implications and their importance for the teaching of Romance languages. In discussions, he/she can argue clearly and logically, support its arguments with knowledge gained during the seminar and use the relevant conceptual apparatus. He/she is able to design a seminar project, which is characterized by a high degree of theoretical and methodological consistency, analyze the selected issue on the basis of methodologies of contemporary linguistics and present its research in colloquial and written form.

Very good: The student focuses on a very good level in selected topics of contemporary linguistics. He/she critically analyzes selected topics from a methodological and theoretical point of view, can compare them with each other, interprets their didactic implications and their importance for the teaching of Romance languages. In discussions, he/she is usually able to argue clearly and logically. He/she can explain any ambiguities, and he connects his arguments with the knowledge gathered during the seminar. He/she can design a seminar project, which is characterized by rigorous processing, analyze the selected issue based on methodologies of contemporary linguistics and present his/her seminar project in colloquial and written form.

Good: The student focuses on selected topics of contemporary linguistics. He/she analyzes selected topics from a methodological and theoretical point of view, compares them with each other, can mostly interpret their didactic implications and their importance for the teaching of Romance languages. In discussions, he/she is usually able to argue clearly and logically. It can explain any ambiguities, although not always and uses the relevant conceptual apparatus. He/she is able to design a sufficient high-quality seminar project, anchored in a well-defined theoretical and methodological framework, even if he/she presents minor shortcomings, especially at the formal level. He/she is able to present his/her seminar project in both colloquial and written form.

Satisfactory: The student focuses on selected topics of contemporary linguistics. He/she participates less actively in discussions, his arguments are partly based on general knowledge and his own experience, to a satisfactory extent they are linked to the knowledge gained during the seminar. He/she can design a seminar project anchored in the theoretical and methodological apparatus of contemporary linguistics, even if there are shortcomings at a formal or logical level. He/she is able to analyse language data on the basis of methodologies of contemporary linguistics, although the presentation of the seminar project has formal shortcomings.

Sufficient: The student focuses on selected topics of contemporary linguistics. He/she is less active in discussions, his/her arguments are mostly based on general knowledge and his/her own experience, their connection with the knowledge acquired during the seminar is not always clear. He/she can design a research project anchored in the theoretical and methodological apparatus of contemporary linguistics, even if it presents shortcomings at a formal or logical level. The presentation of the seminar work has formal shortcomings.

Learning outcomes:

Educational objectives:

Develop graduates' knowledge of selected topics of contemporary linguistics, taking into account theory and research on general and applied problems in relation to Romance languages (e.g. current trends in Francophone, Hispanophone and Italophone linguistics; theoretical and applied aspects of quantitative linguistics, mathematical modelling in linguistics, frequency in language,

computer linguistics, corpus language, modelling, experiments, stochastic and rule methods, theory of information, analysis of valence properties in relation to theories of formal and classical logic. On the basis of analysis and comparison of selected research with different theoretical and methodological approaches, develop a professional view of basic and applied research in contemporary linguistics. Use this knowledge in practice by designing and carrying out seminar work that is oriented to topics of contemporary linguistics relevant to Romance language teachers (e.g. use of knowledge of corpus linguistics, automatic software tools of language analysis, syntax theory, grammar, general-linguistic overlaps of contrasting language exploration, etc.).

Educational outcomes:

Acquisition of a basic overview of modern trends in discipline with particular regard to contemporary Romance linguistics and computer linguistics. By deepening theoretical linguistic training, it allows the student to orientate better in practice. The future foreign language teacher is able to take advantage of individual trends in language science and the latest developments in the discipline in linguistic research in individual Romance languages.

Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Prerequisite subjects: none Prerequisites: 100% of the continuous assessment, the course is completed by assessment. During the semester, students will prepare a seminar paper (max. 30 points), present the seminar paper (max. 10 points) and pass an intermediate didactic test (max. 60 points). The didactic test contains tasks of varying cognitive difficulty, so it stratifies students not only according to the extent of knowledge acquired. The test and the seminar paper are designed to verify the learning outcomes. The rating is awarded on a scale: A (100-91%, excellent - outstanding results), B (90-81%, very good - above average standard), C (80-73%, well - normal reliable work), D (72-66%, satisfactory - acceptable results), E (65-60%, sufficient - results meet minimum criteria), Fx (59-0%, insufficient - extra work required) For successful completion of the course it is necessary to obtain at least 60% of the points from all partial tasks. For an A grade, students need to perform excellently throughout the semester and be capable of independent study. Students are able to navigate through a variety of literature sources, are able to select relevant sources for their studies, are able to navigate the issues of childhood developmental, learning and behavioural disorders, i.e. have basic information on their aetiopathogenesis, epidemiology, diagnosis and differential diagnosis, as well as on possible forms of intervention. A grade of B means that students performed above average throughout the semester, were able to study independently, are proficient in basic information related to childhood developmental disorders, behavioral and learning disorders, and are able to navigate the literature. A grade of C means that the students performed well during the semester, their theoretical knowledge of the subject is at a good level, but their ability to apply this knowledge, critically evaluate and compare individual literary sources and psychological knowledge is lacking. A grade of D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to the subject of education and greater problems	

in independent implementation work, they are unable to critically analyze information and have problems applying knowledge to practice.

A grade of E means that students fail more than one of the assignments, lack the ability to analyze and compare multiple pieces of knowledge, and fail to think critically, but have mastered most of the theoretical knowledge in the course.

Learning outcomes:

The goal is to familiarize students with the basic classification and manifestations of developmental, behavioral, and learning disorders in childhood and their impact on a child's school functioning. Students will gain a basic understanding of the most General developmental disorders, behavioral and learning disorders occurring primarily in the school-aged child. The ability to navigate the subject matter is essential for future subject specialty teachers at the lower and upper secondary levels, especially in the context of pro-inclusive school policies. They will not only acquire theoretical knowledge, but will also acquire sufficient competence to work with other professionals involved in dealing with developmental, learning and behavioural disorders. It is anticipated that teachers will be confronted with an increasing number of different images of developmental disorders in the years to come, and it is therefore essential to acquire not only the knowledge but also the competences for possible cooperation. Students are familiarised with the issue of normality in child psychology, with the risks of developmental disorders and with international classifications, which will enable them to better understand the origins and manifestations of individual disorders. A good understanding of the subject is a prerequisite for an individualised teacher-pupil relationship with a developmental, learning and behavioural disorder. Such a relationship requires not only empathy, but must also be underpinned by acquired skills. An important goal is to prepare students to participate in the implementation of individual education plans for children with developmental, learning and behavioural disabilities. Most children with developmental, learning and behavioural disorders (with few exceptions) are pupils in mainstream primary schools and it is therefore important that students are able to work competently with the inclusion team, but also with specialists in other fields such as a neurologist, psychologist, speech and language therapist and paediatrician.

Course requirements: Prerequisites for successful completion of the course: Weighting of interim and final assessment: 50/50 - the course is completed by examination. During the semester there will be three colloquial midterm evaluations of 10 points each and four midterm assignments of 5b will be worked on. The final exam will be graded 50pts. The rating is awarded on a scale: A (100-91%, excellent - excellent results with only minimal errors), B (90-81%, very good - above average results with minor errors), C (80-73%, good - normal reliable work, average results), D (72-66%, satisfactory - acceptable results, but significant errors occur), E (65-60%, sufficient - results meet minimum criteria), Fx (59-0%, insufficient - extra work required). A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester. A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester. A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.	

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.

A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to prepare continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation in the subject matter, basic communication skills, completion of the assigned tasks.

Scale of assessment (preliminary/final): 50/50

Learning outcomes:

Learning objectives and outcomes:

- The graduate of the course can react originally, flexibly and fluently to situations that may arise in the teaching process. He/she is able to realistically set the goals and processes of pedagogical diagnosis, while being able to adapt them on the basis of reflection to the educational needs of the pupils.

- It takes a comprehensive approach to pedagogical diagnostics, using both the process of analysis and synthesis in the search for solutions. It uses thinking strategies based on critical appraisal in its decision-making, which relies on facts and clearly formulated information from reliable sources of information.

- He/she is aware of his/her own responsibility and the social and ethical impact of his/her decisions in the process of pedagogical diagnostics. Can make decisions with incomplete information and in the new situations that the teaching process and the current times bring. Is aware of the interdisciplinary scope of pedagogical diagnostics not only in relation to teaching but also in relation to the current needs of society.

- The graduate is able to carry out his/her own microanalysis - reflection of the lesson and take the necessary decisions related to it. He/she is able to carry out action research in the context of teaching.

- The graduate is able to use the acquired knowledge and skills in solving (problem) tasks creatively. He/she can analyse the problem and synthesise new solutions. Actively and flexibly brings new solutions to the assigned task. Can formulate clear conclusions and justifications that can be presented to both the professional community and the general public.

- Graduates of the course are encouraged to adopt a growth-oriented mind-set and lifelong learning. Transferable competences on which the course reflects: development of communication, organisational and digital skills. Fostering analytical, critical, creative and growth-oriented thinking; developing skills related to facilitation and mentoring. Promoting the development of reflective skills, self-reflection and the perception of self-responsibility with personal decisions.

Class syllabus:

Brief outline of the course:

1. Introduction to educational diagnostics:

- Understanding the purpose and goals of pedagogical diagnosis in the context of effective teaching.

- Opportunities for self-discovery and the importance of teacher self-reflection.

- Basic mind-sets (fixed and growth-oriented) in the context of controlling versus autonomous teaching.

- Pedagogical diagnosis in critical motivational moments of the teaching process.

2. The diagnostic process:

- Diagnostic cycle

- Stages of diagnosis
 - Edumetric vs. casuistic approach
 - Implicit and explicit diagnosis
 - Individual, group diagnosis and diagnosis in relation to the norm.
 - Principles of effective pedagogical diagnostics
 - Grades, verbal evaluation and feedback
3. Three units in one: the personality of the pupil in pedagogical diagnostics.
- Perception of the personality of the pupil through three interrelated parts: cognitive, affective and (volitional) behavioural.
 - Cognitive domain: differentiation of cognitive functions and processes, metacognition and executive functions. Working with the possible contents and contexts of the concepts: knowledge, ability, skill, competence and competence.
 - Affective domain: differentiation of affective functions and processes in experiencing (differentiation of emotions and feelings). Working with possible contents and contexts of concepts: attitudes, values, motivational factors.
 - Conative area: manifestations of experiencing and thinking in the pupil's behaviour, volitional processes. Work with possible contents and contexts of the concepts: relationship, action, behaviour, group dynamics.
4. Pedagogical diagnostics and the cognitive area of the pupil's personality.
- Overview of basic methods and forms of diagnosis of knowledge and skills.
 - Principles of didactic test construction (written versus didactic test and adaptive didactic test).
 - Verbal rehearsal versus diagnostic presentation skills.
 - Effective feedback versus verbal evaluation.
 - Pupil self-assessment
 - A global and analytical approach to diagnosis in the cognitive domain.
5. Pedagogical diagnostics and the affective area of the pupil's personality.
- An overview of basic methods and forms of diagnosing student attitudes, values and motivators in school.
 - Possibilities of diagnosing attitudinal and value preferences.
 - Methods of recognizing the motivating factors (interests, passions, internal goal setting) of the learner.
 - Diagnosis of the pupil's learning needs (individual learning preferences).
6. Pedagogical diagnosis and pupil behaviour.
- An overview of basic methods and forms of diagnosing relationships and group dynamics in the classroom.
 - Every student-human being has his/her own reasons why he/she behaves the way he/she does (subconscious or conscious)
 - Setting and assessing the motivational potential of the activity/task.
 - Setting and assessing pupil engagement in relationships with the teacher and in relationships with classmates.
 - Working with conflict in the classroom (teacher as a conflict actor and as a facilitator).
 - Group dynamics of the classroom and its atmosphere, climate and environment.
7. Thinking strategies and key communication skills of the teacher.
- Rules for effective individual and group observation
 - Rules for effective (facilitative) individual and group conversation with pupils.
 - Principles of effective conversation with the parent(s) of the pupil.
 - Basic teacher thinking strategies needed for effective observation and interviewing.
- Colloquial midterm assessment and distance assignments: the student will develop four midterm assignments during the semester (e.g., microanalysis of four different events (video) from the

lesson, didactic test model). They present and discuss their interim assignment in a small group (3-4 students), followed by a class discussion across groups (colloquial interim assessment). Final evaluation: after each lecture and seminar (including the colloquial mid-term evaluation) the student will make a short reflection (what I found interesting, what I learned, what hindered me, what I need to convey differently) in a simple portfolio. The final assessment is done individually through a short conversation between the teacher and the student, focusing on the student's entries in the portfolio. The student's final evaluation is the result of the student's self-evaluation and feedback from the instructor.

Learning outcomes:

Learning outcomes are manifested in the actualizing application of knowledge in school practice and in its application in comprehensive education. The acquired knowledge forms a logical picture of the history and development of the national language, its application in literary communication and its functioning as a modern written means of expression. The graduate is able to evaluate in his/her working practice the individual historical stages of the development of the written Slovak language with regard to the productivity or unproductivity of certain rules and elements of the language. On the basis of the acquired knowledge, skills and competences, the student is able to logically interpret the established knowledge and contexts of the historical development of written Slovak in the educational process and in the context of cultural communication. On the basis of logically justified historical contexts about the history of the language, the student can analyse and critically evaluate new and comparatively acquired knowledge, apply it in the educational process and can transfer it to other areas of critical thinking about the history of the Slovak language and Slovak culture.

Knowledge, skills, competences can be creatively applied in the school environment in the position of a teacher of lower and higher secondary education. On the basis of problem-solving tasks, the student has acquired the skills to actively acquire information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. He/she also has a number of transferable skills, e.g. analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, metacognitive skills, etc.

Class syllabus:

1. Periodization of the history of written Slovak. Current interdisciplinary approaches to research on the history of Slovak.
2. Prehistoric period: pre-Great Moravian, Great Moravian and post-Great Moravian period of the history of the national language and the extinction of the Great Moravian tradition.
3. The pre-writing period. The emergence and development of Slovak nationality and Slovak writing, the use of the vernacular language, Latin, Church Slavonic, Czech, German in Slovak writing.
4. Formation of cultural pre-writing formations of the national language, the use of cultivated forms of Slovak, the language of the Church and the literary language of the Slovaks.
5. The Camaldolese Bible and the spread of the West Slovak variant. Orthography principles in the pre-writing period of the development of Slovak.
6. Bernolák's period. Orthography principles.
7. Štúr's codification. Orthography principles.
8. Reform, matrix and Martin period. Personalities of linguistics and main orthography principles.
9. The interwar period, a new stage in language policy. Personalities of linguistics.
10. History of Slovak language and personalities of Slovak linguistics after 1945. Socio-political contexts and written Slovak after 1968 and after 1993. Codification of the written language and codification manuals.

11. Characteristic features of language policy in the present: areas of practical use of knowledge from the history of Slovak language in the present in professional, popular and educational contexts. The educational objective of the course will be to present a basic summary of the latest knowledge about the periodization stages and key moments in the history of the Slovak language. By completing the course, the student will gain an overview, acquire and remember the logical sequence of knowledge about the main historical-periodization stages in which Slovak was used in oral and written communication in the pre-writing and writing periods. Emphasis will be placed on the formation of cultural pre-writing formations of the national language, the emergence and use of a national, cultivated and codified form of Slovak as the existential form of the national language. The historical fate of the Slovak language from the founding Bernolák and Štúrovo codification to the current modern period will be brought to the fore. On the basis of the acquired knowledge, the student will be able to synoptically and systematically interpret the most important milestones in the historical development of the Slovak language and will be able to apply this knowledge in specific current culturally and socially determined situations, as well as in the educational process. The stratification of the topics of the course will enable the student to gradually acquire a basic overview of the history of Slovak language and the participation of dialect stratification in the cultivation and formation of the national linguistic awareness of Slovaks. The set of topics will provide the student with the necessary set of knowledge, supporting the formation of creative and synthesizing skills, which are necessary especially in terms of graduate profiling. Successful completion of the course will give the student the competence to orient himself/herself in the issues of the history of the national language and to think critically about the individual historical stages of Slovak linguistic thought. The course will create a space for a complementary and interdisciplinary approach necessary for the formation and development of a comprehensively prepared personality of the graduate, who, according to the profile, will possess skills focused on the history of research on the subject of his/her professional profile, with overlaps also into the areas of the development of the Slovak language, the history of written and literary culture and the history of linguistic thought. The student will acquire the prerequisites and motivation to develop the skills necessary for further self-study and critical thinking about the irreplaceable contribution of Slovaks in shaping the history of thinking about the national language also in the context of European cultural unity based on the diversity of languages and cultures.

The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge about the history of written Slovak. It will consolidate and develop the student's skills of formulation and argumentation. It will stimulate the ability to design and implement innovative solutions to professional problems on the basis of argumentative foundations, to modify one's knowledge in doing so, and to use creatively the appropriate and appropriate methods of the discipline. The student will also consolidate and develop communicative competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and pluralistic civic attitudes.

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/M-VUZde014/22	Course title: Inclusive education
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Prerequisites for successful completion of the course: The course ends with an assessment, weighting of the interim and final assessment 100/0 - participation in class or active involvement in discussions (30 points); - group presentation of a selection of topics (30 points) The individual groups will be divided according to the following topics: 1) Inclusive education and the Dalton Plan; 2) Inclusive education and Maria Montessori's Pedagogy; 3) Inclusive education and Susan Kovalik's Integrated Thematic Teaching; 4) Inclusive education and another alternative pedagogical approach of their choice. Each group has to present in an engaging way a general description of the chosen pedagogical approach; present several concrete examples of pedagogical or didactic activities from this approach; demonstrate at least one activity (relevant for the 2nd grade of primary or secondary school) in the classroom; evaluate the usefulness and relevance of this approach for Inclusive education; provide basic information about schools in Slovakia that apply these pedagogical approaches in practice. - group seminar paper on the topic of the presentation (40 points) The seminar paper will be co-authored by all members of the group who will present on the topic. The assignment is to present (approx. 10 standard pages) the pedagogical approach about which the group presented in class and analytically and critically evaluate its usefulness in pedagogical practice in relation to Inclusive education with a focus on the second level of primary and/or secondary schools in the Slovak Republic, or to discuss its advantages, disadvantages and limitations. It is to be a seminar paper based on a critical analysis of the literature. It should therefore not be exclusively descriptive work, but also analytical. The aim is to critically and argumentatively evaluate the usefulness of the approach in relation to Inclusive education. One of the criteria of the thesis is coherence, i.e. the unity of the thesis as a whole. The rating is awarded on a scale: A 100 - 91% (excellent - outstanding results), B 90 - 81% (very good - above average standard), C 80 - 73% (good - normal reliable operation), D 72 - 66% (satisfactory - acceptable results), E 65 - 60% (sufficient - results meet minimum criteria),	

Fx 59% or less (insufficient).

A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. To pass the course, a minimum of 60% of the marks must be obtained.

For a grade of A, the student needs to produce consistently excellent results, be capable of independent study, and be able to reflect on the problems presented. The student can critically evaluate the information presented, identify problems and propose original solutions, can select relevant sources for his/her studies, can analyse and select professional or scientific information, is familiar with theoretical and empirical knowledge in the field of Inclusive education and can apply it in his/her pedagogical practice. At the same time, students are able to work in a team and collaborate on assignments.

A grade of B means that the student achieved above average results throughout the semester, was able to study independently, knows basic information about Inclusive education, can navigate the literature, and can apply the knowledge gained to practice in working with children and students, but there are also shortcomings in his critical and creative thinking. At the same time, students are able to work in a team and collaborate on assignments.

A grade of C means that the student has performed standardly well during the semester, his or her theoretical knowledge of the subject is at a good level, but the ability to apply this knowledge, critically evaluate and compare individual literary sources is lacking. There are more weaknesses in critical and inductive thinking as well as in group work.

The grade D means that the student was less prepared during the semester, has slight deficiencies in theoretical knowledge related to the subject of education and has more problems in independent implementation work, as well as in group work, cannot critically analyze information and has problems applying knowledge to practice.

A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyze and compare multiple pieces of knowledge, and fails to think critically and apply theoretical knowledge to practice, but is proficient in most of the theoretical knowledge in the course.

The aim of the training is for students to understand the differences between school integration and inclusion and to acquire relevant theoretical knowledge and practical skills related to the concept of Inclusive education for children with disabilities or with any social, cultural, linguistic, health and other disadvantages in mainstream education. The graduate will gain insight into the sociological critique of special pedagogy and the potential for using the knowledge of special pedagogy and various other pedagogical approaches in Inclusive education and be able to critically evaluate their usefulness or, conversely, their risks. The student will also be briefly acquainted with the specifics of education (with regard to individual disabilities or disadvantages) in the mainstream school system. They will also be able to assess, analyse and compare information, be able to think critically and evaluate individual examples of good practice and generalise knowledge.

Class syllabus:

2. Disability and ethnicity as social constructs;
3. The difference between inclusion and integration;
4. The relationship of Inclusive education to special education;

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/M-VUZde014/22	Course title: Inclusive education
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Course requirements: Prerequisites for successful completion of the course: The course ends with an assessment, weighting of the interim and final assessment 100/0 - participation in class or active involvement in discussions (30 points); - group presentation of a selection of topics (30 points) The individual groups will be divided according to the following topics: 1) Inclusive education and the Dalton Plan; 2) Inclusive education and Maria Montessori's Pedagogy; 3) Inclusive education and Susan Kovalik's Integrated Thematic Teaching; 4) Inclusive education and another alternative pedagogical approach of their choice. Each group has to present in an engaging way a general description of the chosen pedagogical approach; present several concrete examples of pedagogical or didactic activities from this approach; demonstrate at least one activity (relevant for the 2nd grade of primary or secondary school) in the classroom; evaluate the usefulness and relevance of this approach for Inclusive education; provide basic information about schools in Slovakia that apply these pedagogical approaches in practice. - group seminar paper on the topic of the presentation (40 points) The seminar paper will be co-authored by all members of the group who will present on the topic. The assignment is to present (approx. 10 standard pages) the pedagogical approach about which the group presented in class and analytically and critically evaluate its usefulness in pedagogical practice in relation to Inclusive education with a focus on the second level of primary and/or secondary schools in the Slovak Republic, or to discuss its advantages, disadvantages and limitations. It is to be a seminar paper based on a critical analysis of the literature. It should therefore not be exclusively descriptive work, but also analytical. The aim is to critically and argumentatively evaluate the usefulness of the approach in relation to Inclusive education. One of the criteria of the thesis is coherence, i.e. the unity of the thesis as a whole. The rating is awarded on a scale: A 100 - 91% (excellent - outstanding results), B 90 - 81% (very good - above average standard), C 80 - 73% (good - normal reliable operation), D 72 - 66% (satisfactory - acceptable results), E 65 - 60% (sufficient - results meet minimum criteria),	

Fx 59% or less (insufficient).

A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. To pass the course, a minimum of 60% of the marks must be obtained.

For a grade of A, the student needs to produce consistently excellent results, be capable of independent study, and be able to reflect on the problems presented. The student can critically evaluate the information presented, identify problems and propose original solutions, can select relevant sources for his/her studies, can analyse and select professional or scientific information, is familiar with theoretical and empirical knowledge in the field of Inclusive education and can apply it in his/her pedagogical practice. At the same time, students are able to work in a team and collaborate on assignments.

A grade of B means that the student achieved above average results throughout the semester, was able to study independently, knows basic information about Inclusive education, can navigate the literature, and can apply the knowledge gained to practice in working with children and students, but there are also shortcomings in his critical and creative thinking. At the same time, students are able to work in a team and collaborate on assignments.

A grade of C means that the student has performed standardly well during the semester, his or her theoretical knowledge of the subject is at a good level, but the ability to apply this knowledge, critically evaluate and compare individual literary sources is lacking. There are more weaknesses in critical and inductive thinking as well as in group work.

The grade D means that the student was less prepared during the semester, has slight deficiencies in theoretical knowledge related to the subject of education and has more problems in independent implementation work, as well as in group work, cannot critically analyze information and has problems applying knowledge to practice.

A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyze and compare multiple pieces of knowledge, and fails to think critically and apply theoretical knowledge to practice, but is proficient in most of the theoretical knowledge in the course.

Scale of assessment (preliminary/final): 100/0

Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Type and scope of teaching: 2 hours per week seminar; total per semester 22 hours Study method: combined (primary attendance) Student workload: 75 hours 11 x 2 hours of in-person teaching = 22 hours 11 x 2 continuous home preparation for lessons, self-study, critical analysis of selected articles and chapters from recommended literature, design of topics and methodological practices for model teaching = 22 hours 1 x 15.5 preparation of model teaching 1 x 15.5 preparation of seminar work based on modelling Teaching methods: short presentations of teachers and students, brainstorming, interview, case studies, group discussion	
Number of credits: 3	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Interim evaluation: Students will prepare for each seminar by studying selected articles and chapters of recommended literature so that they can actively participate in discussions and group works and develop a concept of model teaching during the first part of the semester (topic, inclusion in the syllabus, target group, teaching methods, etc.). Their work on individual seminars will be assessed on the basis of self-reflection and self-evaluation through the diary of the learner, who will be submitted after each seminar via an online form, and feedback from the teacher (33 % of the evaluation). During the semester, students carry out modelling, i.e. a short teaching unit, which allows them to test the knowledge and skills acquired during the seminar in practice (33 % of the evaluation) and analyse their experience in the seminar work (33 % of the evaluation). The evaluation shall be awarded on a scale of: A (100-95 %, excellent – excellent results), B (94-85 %, very good — above average standard), C (84-77 %, good – normal reliable work), D (76-70 %, satisfactory — acceptable results), E (69-60 %, sufficient — the results meet the minimum criteria),	

Fx (59-0%, underperforming – extra work is required).

The final evaluation reflects the level of insight of the graduate in innovative approaches in the didactics of Romance languages; the level of analytical and critical thinking and reasoning; the ability to apply theoretical knowledge to their professional experience.

Excellent: The student is oriented at an excellent level in selected innovative approaches in didactics of languages. He/she can adapt the didactic implications of international research to the teaching of Romance languages in Slovakia. In discussions, he/she will demonstrate the ability to argue on the basis of studied literature and integrate this knowledge with his own experience and previous knowledge.

Very good: The student focuses on selected innovative approaches in the didactics of languages. He/she is able to adapt the didactic implications of international research to the teaching of Romance languages in Slovakia, although in model teaching he/she is mainly inspired by existing procedures. In discussions, he/she usually demonstrates the ability to argue on the basis of studied literature and integrate this knowledge with his own experience and previous knowledge.

Good: The student focuses on selected innovative approaches in the didactics of languages. In modelling, he/she is inspired primarily by existing procedures and demonstrates a lesser degree of autonomy and critical thinking. He/she is less active in discussions, but mostly demonstrates the ability to argue on the basis of studied literature and integrate this knowledge with his own experience and previous knowledge.

Satisfactory: The student is orientated to a satisfactory extent in selected innovative approaches in didactics of languages. In modelling, he/she is inspired primarily by existing procedures and demonstrates a lesser degree of autonomy and critical thinking. In discussions, he/she is less active, sometimes arguing on the basis of his own experience and general knowledge, which are not always revised on the basis of studied literature.

Sufficient: The student is sufficient oriented in selected innovative approaches in didactics of languages. In modelling, he/she is inspired primarily by existing procedures and demonstrates a lesser degree of autonomy and critical thinking. In discussions, he/she is little active, often arguing on the basis of his own experience and general knowledge, which are not always revised on the basis of studied literature.

Learning outcomes:

Educational objectives: To develop graduates' knowledge of selected innovative approaches in language didactics, to critically analyze selected studies and their didactic implications, to problematise their contribution and usability in the teaching of Romance languages in Slovakia, to develop the ability of students to identify and critically analyze the didactic implications of international studies and to integrate them into practice.

Educational outputs: The graduate of the course has a deep knowledge of selected innovative approaches in the didactics of languages, is able to critically analyze their contribution and usability in the teaching of Romance languages in Slovakia, identify and critically analyze the didactic implications of international studies and integrate them into practice.

As part of the midterm assessment, students will develop and present a midterm paper - a conceptual design of a teaching unit using the chosen teaching concept - in a micro-exercise. The final thesis is assessed for 30 points. At the end of the semester, students will complete a colloquial assessment aimed at analysing, evaluating and critically assessing current didactic learning theories and teaching concepts. The final colloquium is assessed for 50 points. Interim, semester and final grades are included in the course grade. The rating is awarded on a scale: A (100-94%, excellent - outstanding results), B (93-86%, very good - above average standard), C (85-76%, well - normal reliable work), D (75-68%, satisfactory - acceptable results), E (67-60%, sufficient - results meet minimum criteria), Fx (59-0%, insufficient - extra work required) The condition for successful completion of the course is obtaining at least 60 % of the maximum possible course grade. Characteristics of student performance: A (100-91%, excellent - outstanding results) - the student knows, understands and can apply (not only basic) relevant professional terminology in the outputs, can analyze, synthesize and assess it (critically evaluate, develop, enrich with own ideas), is oriented in current learning theories and teaching concepts, can critically analyze and evaluate them. The student is able to critically, factually assess and evaluate solutions presented by others. B (90-81%, very good - above average standard) - the student knows, understands and can apply (not only basic) relevant professional terminology in the outputs, can critically evaluate, develop and enrich it with his/her own ideas, but only in specifically selected problems and not in a generalized	

way, is oriented in current learning theories and teaching concepts, can critically analyze and evaluate them.

C (80-73%, good - normal reliable work) - the student knows, understands and can apply at least the basic relevant professional terminology in the outputs, can apply it appropriately, but lacks development of his/her own ideas, applies it in specific, concrete and not generalizing contexts, is oriented in current learning theories and teaching concepts, but lacks critical evaluation.

D (72-66%, satisfactory - acceptable results) - the student knows, understands and can apply at least the basic relevant professional terminology in the outputs, its correct application is limited and its development with own ideas is absent, the student applies it only in specific, concrete and not generalizing contexts, orientation in the current learning theories and teaching concepts, critical assessment and evaluation is completely absent.

E (65-60%, sufficient - results meet the minimum criteria) - the student has only a limited understanding and can apply the basic relevant professional terminology in the outputs, its application is limited to defined contexts in terms of correctness, there is no critical analysis and development of own ideas, orientation in current learning theories and teaching concepts is limited to specific areas, there is no critical evaluation and generalization.

Fx (59-0%, insufficient - additional work required) - student with significant limitations knows, understands, but cannot coherently apply (even basic) relevant professional terminology in the outcomes, its application is incoherent, limited to limited contexts, orientation in current learning theories and teaching concepts is incoherent, limited to specific areas, their generalizing application is absent.

Scale of assessment (preliminary/final): 50/50

Learning outcomes:

Learning objectives and outcomes:

By completing the course, students will acquire knowledge about pedagogical theories, concepts of learning (to learn). Students will be able to use their knowledge of learning theories in planning and conducting a teaching unit. By completing the course, the student will be competent to carry out analytical, synthesizing and evaluative processes within the framework of (scientifically relevant - practice-supported) theories of didactics, processes of personal-professional development based on cognition and (self-)reflection, will know and be able to apply (in specific micro-course outcomes) the theories, concepts, resources, strategies and methods necessary for this.

Transferable competences:

In solving, presenting and discussing the results of the continuous and semester assignments, students will develop their analytical and critical thinking, communication, lecturing and metacognitive skills. Students will be able to use the acquired knowledge and competences creatively in the study of other pedagogical disciplines and in their future pedagogical practice. Students will know and be able to apply theories, concepts, strategies and methods for the continuous development of intra and interpersonal communicative, organizational, (self-)cognitive competences.

Class syllabus:

Brief outline of the course:

The contents of the course are theories of learning, which can be understood as the basis for the design of teaching in which learning will take place. After an introduction to the learning process, students will be introduced to associative learning theory, behavioural theories of learning, constructivist theories and social learning theories. For each theory, the focus will be on the actual application of knowledge to the planning and delivery of instruction. Students will understand the basic principles and be able to identify and analyse different theories in terms of school and didactic practice.

In addition to traditional theories of learning and concepts of teaching, students will also become familiar with current and alternative theories of the 20th and 21st centuries, which can be classified as modern approaches in education in the theoretical background of Slovak and foreign authors.

Topics:

1. An introduction to learning theories and concepts of teaching. Basic concepts, terminology. Overview of all learning theories.
2. Selected teaching concepts. Introduction to the concepts of teaching; Verbal-narrative teaching; Problem-based teaching; Cooperative teaching; Constructivist and constructionist concepts of teaching; Constructivism and constructionism as a theory of cognition; Foundations of constructivism/constructionism and socio-cognitive constructivism/constructionism in the theories of J. Piaget and L. S. Vygotsky, K.R. Popper. Didactic application in teaching.
3. Transmission versus construction in the implementation of instruction. Basic features of two antagonistic approaches to teaching - Behaviorism vs. constructivism; Deductive, inductive and participatory approaches in teaching.
4. Modern approaches in education - strategies and methods The concept of activating teaching methods; Classification of teaching methods and their characteristics - logical learning procedures; Characteristics of selected methods, Determination of the optimal choice of methods.
5. A review of current and alternative learning theories.

STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KRoJL/M-ESPšt007/22	Course title: Linguistics of Spanish Language
Number of credits: 2	
Educational level: II.	
<p>Recommended prerequisites: The conditions for applying for the state examination are regulated by the study code of the Faculty of Education of the Comenius University in Bratislava currently valid in the academic year in which the student finishes his/her studies.</p>	
<p>Course requirements: The state examination, its conditions and procedural aspects are treated by the Internal Regulation No. 1/2020 Study Regulations of the PdF UK, as well as the Internal Regulation No. 5/2021 Study Regulations of the Comenius University. The student is assessed on the basis of a colloquial state examination in the field of theoretical knowledge of the field of study in the subject specialization of Spanish language and literature. The state examination in the field of Spanish linguistics is carried out in front of the examination committee according to the study code of the Faculty of Education of the Comenius University in Bratislava currently valid in the academic year in which the student ends his/her studies. The evaluation shall be awarded on a scale of: A (excellent – excellent results), B (very well – above average standard), C (well – normal reliable work), D (satisfactory — acceptable results), E (sufficient – the results meet the minimum criteria), FX (insufficient – extra work required) A: The student demonstrates extensive knowledge of Spanish language linguistics, is able to answer independently, his/her interpretation is logical and arranged, proceeds from general to specific, uses an accurate terminological apparatus. He/she can illustrate theoretical aspects on suitably chosen examples and can also present didactic use of knowledge. He/she responds promptly to the Commission's supplementary questions, developing expert discussion at a very good level. He/she demonstrates a high level of communicative competence, possible deficiencies are rare, with the student using communication strategies for compensation and able to repair himself/ herself. B: The student demonstrates an above-standard level of knowledge of Spanish language linguistics in terms of scope and depth. He/she responds independently, the interpretation is logical and orderly, in some parts of the answer the commission's guidance is needed. He/she uses professional terminology correctly. He/she can illustrate theoretical aspects on well-chosen examples and can also outline possible didactic use of knowledge. The student responds to supplementary questions and develops expert discussion at a very good level. He/she demonstrates a high level of communicative competence, with rare deficiencies that it can compensate for and independently correct or reformulate after the commission's warning. C: The student demonstrates the standard level of knowledge of Spanish language linguistics in terms of scope and depth. He/she speaks independently to questions in the exam, the interpretation</p>	

is arranged, in some parts of the answer there is a need for guidance from the Commission, there may be occasional terminological inaccuracy. Theoretical aspects can be illustrated on suitably chosen examples. The student responds to supplementary questions and develops expert discussion at a good level. He/she demonstrates by default a high level of communicative competence, with occasional deficiencies, which it can usually independently correct or reformulate after the commission's warning.

D: The answer is satisfactory. The student demonstrates sufficient knowledge of Spanish language linguistics, but is able to put the information in a broader context to a small extent. He/she responds largely on its own, although the interpretation is poorly organised or does not reach adequate scope and depth and requires guidance from the Commission. The student responds to supplementary questions and answers satisfactory, develops the topic briefly, at an acceptable professional level. The level of communicative competence is standard, there are deficiencies that the student can usually independently correct or reformulate after the commission's warning, it applies compensation strategies accordingly.

E: The answer meets the minimum criteria. The student demonstrates sufficient knowledge of Spanish language linguistics, but cannot put the information in a broader context. He/she does not respond independently, or the answer is poorly arranged, does not progress from general to specific. He/she responds to supplementary questions and answers satisfactory, but he/she does not develop topics and only to a small extent demonstrates a deeper understanding of the issue, respectively the level of communicative competence is average, there are more frequent errors in pronunciation, grammar or lexicons, the student cannot always correct himself or apply an appropriate compensation strategy.

FX: The answer does not meet the minimum criteria. The student does not demonstrate knowledge of Spanish language linguistics at the level of the second stage of study. He/she does not respond independently, He/she answers the commission's auxiliary questions in a sketchy manner, he/she only demonstrates knowledge of basic concepts, terminological inaccuracy appears, he/she cannot explain the information, he/she does not show an understanding of the phenomena presented, or the level of communicative competence is unsatisfactory, there are errors in pronunciation, grammar or lexicons, or other shortcomings that the student cannot correct on his own, or even with the help of the commission's guidelines.

Learning outcomes:

The state examination verifies the achievement of the educational objectives declared in the graduate profile, namely the acquisition of solid theoretical and methodological knowledge from linguistic disciplines, the ability to integrate knowledge from different disciplines and the acquired knowledge to use.

Student on the state exam

- demonstrates extensive professional theoretical and methodological knowledge of the Spanish language, knowledge of the conceptual apparatus of linguistics and the ability to integrate and link knowledge of linguistic disciplines with an emphasis on phonetics, phonology and morphosyntax of Spanish language,

- proves that he/she can anticipate possible problems in the acquisition of correct pronunciation and grammatical structures in Spanish in learners with native language of Slovak, he/she can apply knowledge in the design of solutions,
- demonstrates the ability of critical thinking, analysis and synthesis, developed learning skills, as well as the ability to organise their learning and developed learning capacity by self-study,

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/M-VUZde017/22	Course title: Personal and social development
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 24s Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Course requirements: Prerequisite subjects: none Prerequisites for successful completion of the course: 100% of the continuous assessment, the course is completed by assessment. Continuous assessment includes the evaluation of the performance of continuous tasks and assignments, which are carried out individually or in groups at different stages of the course implementation. Individual assignments focus on the preparation of materials and the development of assignments on which direct teaching will be based. This involves working with various questionnaires and tests, information sources (publications aimed at developing pupils' social-psychological competences) and official school documents (30% of the assessment). Within the group work, space is devoted to specific exercises and simulation of experiential learning in teachers' work (30%) and to the analysis of the objectives, meaning, methods of the cross-cutting theme of Personal and Social Development and its integration into selected educational areas (30%). A reflective essay concludes the continuous assessment (10% of the assessment). The rating is awarded on a scale: A (100-91%, excellent - outstanding results), B (90-81%, very good - above average standard), C (80-73%, good - normal reliable work), D (72-66%, satisfactory - acceptable results), E (65-60%, satisfactory - results meet minimum criteria), Fx (59-0%, inadequate - extra work required). For successful completion of the course it is necessary to obtain at least 60% of the points. A grade A is awarded if the student has acquired knowledge related to the content of the cross-cutting theme, is familiar with methods, techniques and other specifics related to the field of experiential and active social learning, actively engages in individual activities and shows interest and effort to develop his/her competences in the identified key areas, seeks original and creative solutions to the tasks set, reflects the emerging changes that experiential learning brings, manifests himself/herself as a full member of the group and actively expresses his/her own opinion. A B grade is awarded if the student has acquired knowledge related to the content of the cross-cutting theme, is familiar with the methods, techniques and other specifics related to the field of	

experiential and active social learning, actively engages in individual activities and shows interest and effort to develop his/her competences in the identified key areas, to a lesser extent, seeks original and creative solutions to the tasks set, reflects the emerging changes that experiential learning brings but needs more time and space to verbalise them, shows himself as a full member of the group and actively expresses his own opinion.

Grade C will be awarded to a student who has acquired the knowledge related to the content of the cross-cutting topic at an average level, is familiar with the methods, techniques and other specifics related to the field of experiential and active social learning, is usually actively involved in individual activities, shows interest and effort to develop his/her competences, only in some topics and areas, makes little use of his/her personal qualities in finding original and creative solutions to the tasks set, reflects only to some extent the emerging changes brought about by experiential learning, shows himself/herself to be a full member of the group and actively expresses his/her own opinion.

A grade D is awarded if the student has acquired basic knowledge related to the content of the cross-cutting theme, is generally familiar with the methods, techniques and other specifics related to the field of experiential and active social learning, engages to a limited extent in individual activities, and shows only sporadic interest and effort to develop his/her competencies, often only with external help, seeks original and creative solutions to the tasks set, cannot adequately reflect the emerging changes brought about by experiential learning, is more passive and more like a marginal member of the group, even though he or she actively expresses his or her own opinion.

A student receives a grade of E if the student has mastered the basic knowledge related to the content of the cross-cutting topic and is at least partially oriented in the methods, techniques and other specifics related to the field of experiential and active social learning, behaves passively and minimally participates in individual activities, does not show interest and effort to develop his/her competences, relies on the group for original and creative solutions to the tasks set, cannot adequately reflect the emerging changes brought about by experiential learning, cannot find his/her place in the group, expresses his/her own opinion sporadically and not always in an appropriate way. The grade of Fx requires extra work, extra study; this grade is given exceptionally, most often because of non-participation in class and failure to complete the assigned interim assignments, refusal to cooperate in any way, refusal to take a stand on required topics and to express one's own opinion.

Scale of assessment (preliminary/final): 100/0

Learning outcomes: Learning objectives and outcomes and transferable competences:	

The aim of the course is to convey a wide range of views on man as philosophy has grasped him through its means in different historical periods and cultural contexts. In the course, students will learn not only the basic images, views and concepts of man in their historical-philosophical, but also in their ethical-axiological framework. They will learn about the mutual inspirations and intersections between philosophical and special-scientific conceptions of man. They will become familiar with the motives and arguments of philosophical critiques of scientific conceptions of man. The mission of the course is for students to learn to identify the value background of philosophical thematizations of man and to infer possible axiological implications arising from the acceptance of relevant scientific conceptions of man.

Class syllabus:

Brief outline of the course:

Possibilities of conceptualizing anthropological issues in the sciences and in philosophy. Limits of the scientific way of affirmation of the anthropological problematic. Basic conceptual and methodological problems associated with the thematization of man in philosophy. Typology of philosophical reflections of man according to different expert points of view. Substantial and non-substantial approaches to man and their worldview and pedagogical implications. Philosophical reflection on the relational relations in which man finds himself in the world: man and nature, man and society, man and technology, man and the sphere of the transcendent. Mapping the demarcation lines between the animal and the human, between the human and the posthuman. Philosophical critique of some concepts of normality and ideas about the ideal status of man, which have been entrenched in educational theory and practice. The axiological dimension of human existence. The importance of human knowledge for educational sciences. Education for humanism and respect for human dignity as the most essential mission of education.

B (90-81%, very good - above average standard), the student has mastered the theoretical knowledge of statistical data processing and can interpret it correctly and clearly with minor shortcomings, has acquired key competences, can respond promptly during lectures to the teacher's	

challenges, the student is self-initiative and asks questions in the context of the problem addressed. His/her written expression in the term paper is correct, grammatically sound and creative. He brings his own experiences and insights from practice to the teaching. The results of his activities are of good quality, with minor shortcomings.

C (80-73%, good - normal reliable work), the student knows the theoretical knowledge of statistical data processing and can interpret them at an average, i.e. good level, has acquired theoretical knowledge and skills using MS EXCEL and JASP software in solving problems, can respond to the teacher's challenges. He/she does not take initiative himself/herself, does not ask questions in the context of the problem being solved. His communication style is not disruptive, but he is unsure of his answer and his speech does not have significant disruptive elements. He transfers experience from practice with problems. His, grammatical speech is of lesser quality.

D (72-66%, Satisfactory-Acceptable performance), the student has mastered the material at a satisfactory level. He/she knows the theory with minor gaps, but cannot apply it to the solution of practical experiences, he/she needs help in interpreting the obtained statistical data. He is not very active during teaching, does not bring new solutions, takes the role of a passive observer. Memorisation rather than critical thinking prevails in the student. Analysis from practice is less constructive. His/her written expression has some inaccuracies to serious deficiencies.

E (65-60%, sufficient - the results meet the minimum criteria), the student has a low level of theoretical knowledge of statistical data processing, responds to the teacher's instructions and prompts with considerable inaccuracies; the student himself is not proactive and does not ask questions in the context of the problem addressed. Applies theoretical knowledge with considerable problems; in practical terms, does not have recommendations for correct solution options. The student is rather in the position of a passive recipient of knowledge and is not active in the seminars. The student is not creative, he relies on numerous quotations without his own opinion. His grammatical expression is not error-free and stylistically correct.

Fx (59-0%, Insufficient - extra work required) this grade will be given if the student fails to meet any of the required minimum criteria and is not allowed to take the final test. This means that the student has not mastered the knowledge and skills to a degree that would enable him/her to meet at least the minimum criteria for a passing grade.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/M-VUZde018/22	Course title: Psychological analysis of school educational situations
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 2	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Course requirements: Prerequisite subjects: none Prerequisites for passing the course: 100% of continuous assessment Continuous assessment includes the evaluation of the completion of continuous tasks and assignments, which are carried out in an individual or group form. These are mainly experiential activities and exercises aimed at solving school educational situations. Using role-play and cooperative games, the student practises various strategies and techniques for coping with pupils' inappropriate behaviour (max. 30 points). In small groups during class, they develop a proposal for a prevention or intervention program aimed at eliminating or addressing inappropriate school situations (max. 20 points), which they then present (max. 10 points). The student individually produces a seminar paper (on a specific educational problem situation in school) in which he/she proposes a possible solution (max. 30 points). The student will present the seminar paper continuously according to the timetable (max. 10 points). The rating is awarded on a scale: A (100-91%, excellent - outstanding results), B (90-81%, very good - above average standard), C (80-73%, well - normal reliable work), D (72-66%, satisfactory - acceptable results), E (65-60%, sufficient - results meet minimum criteria), Fx (59-0%, insufficient - extra work required). For successful completion of the course it is necessary to obtain at least 60% of the points. For a grade of A, students need to produce excellent results continuously throughout the semester, be able to study independently, be able to navigate a variety of literary sources, and critically select relevant sources for their studies. Students have knowledge of a variety of educational situations in the school environment and how to address them, and are able to apply their knowledge in meaningful ways to create assignments. A grade of B means that the students achieved above average results throughout the semester, were able to study independently, are able to navigate through various literary sources and critically select relevant sources for their studies, have knowledge of various educational situations in the school	

environment and their solutions, and are able to apply their knowledge appropriately to the creation of assignments.

A grade of C means that the students performed well during the semester, their theoretical knowledge of various educational situations in the school environment and their solutions is at a good level, but they have deficiencies in their ability to apply this knowledge, they have deficiencies in the critical evaluation and comparison of literary sources and psychological knowledge.

A grade of D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to various educational situations in the school environment and their solutions. They have considerable difficulties in independent work, they cannot critically analyse information.

A grade of E means that students fail in more than one of the assignments, lack the ability to analyze and compare multiple pieces of knowledge, but have mastered most of the theoretical knowledge in the course.

A grade of FX indicates that the student has not sufficiently completed the course requirements and extra work is required.

Scale of assessment (preliminary/final): 100/0

Learning outcomes:

3. The influence of family environment and sibling constellation on children's inappropriate behavior at school.

4. The impact of different types of parenting styles in the family and school environment on child behavior.
5. Dreikurs' theory of mistaken behavioral goals (attention, power, revenge, failure avoidance).
6. Intervention techniques appropriate for addressing particular types of inappropriate behavior.

Course requirements: The student will be evaluated on the basis of an interim evaluation. Interim evaluation: Students prepare continuously during the semester by studying for the subject. In order to support the completion of the semester evaluated mini project, they study selected parts of the texts of recommended literature during the semester, so that they can actively participate in discussions and group works and develop a mini project during the semester. They are actively involved in the work of seminars on lessons. Their work is evaluated on the basis of active participation in thematic discussions and group work in the classroom (33 % of the evaluation). During the semester, students carry out their mini project (they process the selected topic in connection with the use of sociolinguistic research methods in relation to language learning focused generally on Romance languages and specifically Spanish) and present it in colloquial form (33 % of the evaluation) and by handing over a mini project (33 % of the evaluation). The student will understand the circumstances of the waning Romanticism and will get to know the epigonic work of Ľ. Kubáni and G. K. Zechenter-Laskomerský. The student will be able to communicate and analyse the structure of texts on a given topic, highlight their artistic and aesthetic value, take a critical stance and be able to discuss the topic in a broader cultural and social context. The acquired knowledge and skills will be able to be further developed in pedagogical practice. On the basis of these skills, the student will acquire the competence to apply them in activities aimed at developing literary-critical analysis of literary texts and also in the educational process and school practice. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialized knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, modifying his/her knowledge and creatively using appropriate and adequate methods of the discipline. At the theoretical and practical level, the student thoroughly masters the orthographic standard of written Slovak. He/she has a comprehensive view of Slovak orthography, has knowledge of its principles and orthography rules applied in written communication in written Slovak language and can look at the knowledge base from the perspective of school practice. The student is particularly familiar with problematic phenomena in Slovak orthography and is able to apply the acquired theoretical knowledge to practical examples, can justify individual orthography phenomena and analyse written expressions of written Slovak from the orthographic point of view. They can comprehensively analyse orthography phenomena and orthography problems, solve them independently, look for their synthesis and offer new and creative solutions. The student possesses important practical skills in assessing orthography phenomena, which he/she can creatively and independently apply in solving problem solving tasks in the field, while being able to actively obtain and communicate the necessary information and facts, and adequately formulate and defend relevant professional arguments. He/she has developed analytical skills as well as abstract and critical thinking skills, is able to think in context and has developed the ability to expand his/her knowledge independently. The acquired theoretical knowledge and practical skills can be applied and creatively applied by the student primarily in the future practice of a teacher of Slovak language and literature at the lower and upper secondary education level when assessing, analysing and evaluating the orthographic aspect of pupils' and students' language expressions, and subsequent independent analysis of the problem in the given area at the language level, as well as when

correcting language expressions for the needs of the publishing or editorial environment, because they enable him/her to look at linguistic phenomena in the broadest linguistic contexts. The student is also able to convey information about orthography phenomena to the general public and to offer conclusions and orthography justifications to lay audiences. The student is thoroughly acquainted with the Slovak Orthography Rules as a practical guide in the context of written communication and his/her professional level as well as linguistic culture is at a high level, which also appears to be very necessary in terms of the student's future practice.

Class syllabus:

1. Language and writing, alphabet, orthography. Principles of Slovak orthography.
2. History of the Slovak Orthography Rules.
3. Punctuation and its functions. Punctuation marks.

8. Problematic phenomena in the spelling of *i/í* and *y/ý* for individual word types, especially nouns, adjectives, numerals, pronouns, verbs and adverbs. Review and practise declension and conjugation of words.
9. Problematic phenomena in writing words separately and conjugated. Practising the problem.
10. Correct division of words at morpheme boundaries and syllable boundaries. Practising the problem.
11. Writing capital letters. Practising and justifying the correct use of capital letters at the beginning of proprias and within multi-word proprias, at the beginning of sentences, in abbreviations and established marks, in poetry at the beginning of verses, to express respect.

On the basis of the use of the acquired theoretical knowledge of Slovak orthography, which on the one hand will build on the knowledge acquired in the given area in secondary school, but especially in bachelor's studies, and on the other hand will further enable the deepening and systematic development of his/her knowledge into a complex form, the student will acquire practical skills that he/she will be able to apply in the assessment and analysis of orthography phenomena. The student will acquire theoretical knowledge of Slovak orthography. The student will acquire knowledge about the principles of Slovak orthography, the history of the Slovak Orthography Rules as a orthography codification manual, as well as the basic orthography rules applied in written communication within the written Slovak language, with particular attention to problematic phenomena in Slovak orthography. In this sense, the student will acquire relevant knowledge of the application of punctuation and its functions in written expressions of written Slovak with regard to the correct use of individual punctuation marks, learn the correct orthography of the *iota* and *ypsilon* in domestic words and in words of foreign origin, become familiar with the problems of writing words separately and skillfully and the division of words, and acquire knowledge of the correct spelling of capital letters in the Slovak language. In relation to Slovak orthography, the student will also deepen and consolidate the basic theoretical knowledge of Slovak declension and conjugation. This will lead to the student's thorough acquisition and mastery of the orthographic standard of written Slovak, both in theory and in practice. Of particular importance will also be the acquisition of practical skills applied in the assessment and analysis of orthographic phenomena, which will lead the student to apply the acquired theoretical knowledge in practical orthographic analyses and exercises, and especially in the independent solution of problem orthographic tasks and

the synthesis of their new and creative solutions. In doing so, the student will be guided to actively acquire information in the field of Slovak orthography, to use digital technologies and resources, to use the acquired knowledge effectively, to formulate and defend arguments appropriately and on their basis to solve professional problems in the field, using the appropriate methods of the discipline. They will also develop their communication competences, the ability to interpret facts correctly, to take responsibility for the quality of their work, to follow the principles of authorial ethics, the ability to plan and be actively responsible for their own independent learning. They will also learn to look at the acquired knowledge base from the perspective of school practice. The acquired knowledge and skills in the field of Slovak orthography will be necessary for the student primarily in the future practice of a teacher of Slovak language and literature at the level of lower and upper secondary education in the comprehensive assessment, analysis and evaluation of the orthography aspect of pupils' and students' language expressions, and subsequent independent analysis of the problem in the given area at the level of the language, and possibly also for the needs of publishing or publishing, respectively. In the editorial environment, when correcting language expressions, i.e. wherever it is necessary to apply the ability to persuasively assess, analyse and evaluate the orthography of written language expressions. Emphasis on raising the student's professional level and linguistic culture will prove to be equally important in adequately conveying information about orthographic phenomena to the general public, as well as in offering relevant conclusions, orthographic explanations and justifications to lay audiences.

The acquired knowledge and skills in the field of Slovak orthography will be necessary for the student primarily in the future practice of a teacher of Slovak language and literature at the level of lower and upper secondary education in the comprehensive assessment, analysis and evaluation of the orthography aspect of pupils' and students' language expressions, and subsequent independent analysis of the problem in the given area at the level of the language, and possibly also for the needs of publishing or publishing, respectively. In the editorial environment, when correcting language expressions, i.e. wherever it is necessary to apply the ability to persuasively assess, analyse and evaluate the orthography of written language expressions. Emphasis on raising the student's professional level and linguistic culture will prove to be equally important in adequately conveying information about orthographic phenomena to the general public, as well as in offering relevant conclusions, orthographic explanations and justifications to lay audiences.
