

Course descriptions

TABLE OF CONTENTS

1. N-DSSZ-412/22 Abstract of a contribution from a domestic or an international conference (originally AFG, AFK, AFH, AFL).....	3
2. N-DSSZ-505/22 Bachelor's thesis reviewer.....	4
3. N-DSSZ-504/22 Bachelor's thesis supervisor.....	5
4. N-DGLG-010/22 Clay Minerals as Indicators of Geological Processes.....	6
5. N-DSSZ-414/22 Completing a long-term ERASMUS+ internship (minimum 60 days).....	8
6. N-DSSZ-415/22 Completion of SAIA/NŠP internship program or other equivalent (minimum 30 days).....	9
7. N-DSSZ-416/22 Completion of a short-term foreign internship (15-30 days, and related to the topic of the PhD thesis).....	10
8. PriF-DSSZ-001/22 Dissertation 1.....	11
9. PriF-DSSZ-002/22 Dissertation 2.....	13
10. PriF-DSSZ-003/22 Dissertation 3.....	15
11. PriF-DSSZ-004/22 Dissertation 4.....	17
12. PriF-DSSZ-005/22 Dissertation 5.....	19
13. PriF-DSSZ-006/22 Dissertation 6.....	21
14. PriF-DSSZ-007/22 Dissertation 7.....	22
15. PriF-DSSZ-024/22 Dissertation 8.....	23
16. PriF-DSSZ-025/22 Dissertation 9.....	24
17. PriF-DSSZ-400/22 Dissertation exam (state exam).....	25
18. N-DSSZ-303/22 Doctoral's Thesis Defence (state exam).....	27
19. N-DGLG-001/22 Economic Geology 1.....	28
20. N-DGLG-006/22 Environmental Economic Geology.....	30
21. N-DGLG-009/22 GIS and Software Modeling in Economic and Environmental Economic Geology.....	32
22. N-DGML-005/22 Genetic Mineralogy.....	34
23. N-DSSZ-400/22 Grant CU or Grant SAS or equivalent grant.....	36
24. N-DSSZ-413/22 Intellectual Property Rights Document (originally AGJ).....	37
25. N-DGLG-011/22 Management of Projects and Research Funding.....	38
26. N-DGLG-007/22 Methods of Research in Economic Geology.....	40
27. N-DGLG-008/22 Methods of Research in Environmental Economic Geology.....	42
28. N-DSSZ-508/22 Other activities.....	44
29. N-DSSZ-501/22 P1 Pedagogical output as a whole (originally ACA, ACB, BCI, BCB).....	45
30. N-DSSZ-503/22 P2 Pedagogical output as a part (originally BCK).....	46
31. N-DSSZ-502/22 P2 Pedagogical output as part (originally ACC, ACD).....	47
32. N-DSSZ-507/22 Pedagogical activity (4 hours/WS and 4 hours/SS) or alternative pedagogical work.....	48
33. N-DSSZ-026/22 Professional English 1.....	49
34. N-DSSZ-027/22 Professional English 2.....	51
35. N-DSSZ-500/22 Selected topics from university pedagogy for non-teachers.....	53
36. N-DGML-004/22 Seminar for PhD students.....	54
37. N-DSSZ-022/22 Slovak for Foreign Doctoral Students 1.....	56
38. N-DSSZ-023/22 Slovak for Foreign Doctoral Students 2.....	58
39. N-DSSZ-024/22 Slovak for Foreign Doctoral Students 3.....	60
40. N-DSSZ-028/22 Slovak for Foreign Doctoral Students 4.....	62
41. N-DSSZ-506/22 Supervisor of the SSC contribution.....	64

42. N-DSSZ-404/22 V1 Scientific output as a whole - ESB monograph (originally AAA, ABA), individual authorship less than 3 AH.....	65
43. N-DSSZ-401/22 V1 Scientific output as a whole – ESB monograph (originally AAA, ABA), individual authorship share ≥ 3 AH.....	66
44. N-DSSZ-405/22 V2 Scientific output as part - study in ESB or collection (originally AAB, ABA, ABB), individual authorship less than 3 AH.....	67
45. N-DSSZ-402/22 V2 Scientific output as part - study in ESB or collection (originally AAB, ABA, ABB), individual authorship share ≥ 3 AH.....	68
46. N-DSSZ-411/22 V2 Scientific output as part of ESB, collection - contribution in peer reviewed scientific collection, monograph (originally AEC, AFA, AFC, AED).....	69
47. N-DSSZ-406/22 V3 Scientific output as a part - study in a journal (originally AAB, ABA, ABB), individual authorship less than 3 AH.....	70
48. N-DSSZ-403/22 V3 Scientific output as a part - study in a journal (originally AAB, ABA, ABB), individual authorship ≥ 3 AH.....	71
49. N-DSSZ-410/22 V3 Scientific output in a journal outside the index databases (originally ADE, ADF).....	72
50. N-DSSZ-407/22 V3 Scientific output in a journal registered by CCC, WOS, SCOPUS - JCR/ Q1 – Q2 (originally ADC, ADD, ADM, ADN), first or corresponding author.....	73
51. N-DSSZ-408/22 V3 Scientific output in a journal registered by CCC, WOS, SCOPUS - JCR/ Q3- Q4 (originally ADC, ADD, ADM, ADN), first or corresponding author.....	74
52. N-DSSZ-409/22 V3 Scientific output in the journal registered by CCC, WOS, SCOPUS - JCR/ Q1 – Q2 – Q3 - Q4 (originally ADC, ADD, ADM, ADN), co-author.....	75

COURSE DESCRIPTION

Academic year: 2022/2023							
University: Comenius University Bratislava							
Faculty: Faculty of Natural Sciences							
Course ID: PriF/N-DSSZ-412/22			Course title: Abstract of a contribution from a domestic or an international conference (originally AFG, AFK, AFH, AFL)				
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning							
Number of credits: 4							
Recommended semester:							
Educational level: III.							
Prerequisites:							
Course requirements:							
Learning outcomes:

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGLG-010/22	Course title: Clay Minerals as Indicators of Geological Processes
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of study: Lecture, exercise, individual study of recommended literature Number of contact hours: Per week: 2 Per level/semester: 26 Method of study: in class / distant learning (distant just in specific situations – e.g. pandemic)	
Number of credits: 3	
Recommended semester: 1., 2., 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: Active presence at lectures, exercises and at consultations. The evaluation of the course takes place in the form of an oral exam, the successful completion of which reflects the student's sufficient orientation in the issue. Final evaluation will be “passed“ if the student has a minimum performance corresponding to 51% of the maximum performance.	
Learning outcomes: Gaining of theoretical and practical skills in the use of clay minerals as indicators of several geological processes.	
Class syllabus: -Structure and basic properties of clay minerals. Classification of layered silicates. Clay minerals as a product of weathering. Effect of hypergenic process on clay minerals. Possibilities of palaeoenvironment and paleoclimate reconstruction based on the distribution of clay minerals. Illitization of smectite during diagenesis. Correct I-S identification. Illit-smectite (I-S) geothermometer vs. organic matter conversion. Illitization and isotopic composition of I-S. Particle size measurement. The mechanism of formation of clay minerals vs. particle size. Mudmaster - a program for measuring the size and distribution of particles. Illite crystallinity. Illite polytypes. Ammonium illites. Tobelite, paragonite and mixed-layered illite (muscovite)-paragonite as indicators of anchimetamorphism. Chlorite and mixed layered chlorite-smectite in diagenesis and low-grade metamorphism. Clays in the pore space of sedimentary rocks. Position of clays in hydrothermal environment. Low sulphidation and high sulphidation systems. Influence of formation temperature on dehydroxylation temperature of illite. Pyrophyllite - an index mineral of anchimetamorphism and its position in the hydrothermal environment.	
Recommended literature:	

Šucha V. 2001: Clays in geological processes. Acta Geologica Univ. Com. Séria Monografie, Bratislava, 159 p. (in Slovak); Weaver, C., 1989: Clays, Muds, and Shales. Developments in Sedimentology 44, Elsevier, 819 p.; Frey M., Robinson D., 1999: Low-Grade Metamorphism. Blackwell Science, 313 p.

Languages necessary to complete the course:

Slovak language in combination with English (study literature is mainly in English).

Notes:

Optional course

Past grade distribution

Total number of evaluated students: 0

ABS	NEABS

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/PriF-DSSZ-001/22	Course title: Dissertation 1
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: Conditions for passing the course: Course evaluation will be conducted individually based on the doctoral student's individual study plan, as well as on the basis of an agreement between the academic supervisor and doctoral student. Evaluation is standard and shall reflect a sufficient orientation of the student in the presented subject matter for successful course completion according to the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: By passing this subject, the student will achieve sufficient orientation in the project issue of the dissertation thesis based on specific individual topics. This set task of knowledge is essential for a firmly established theoretical readiness of the course graduate in terms of his/her awareness, and equally supports his/her potential in a wide field of applied practice. Undoubtedly, the outcomes of his/her education will also be reflected in the student's overview in terms of methodological approaches in the subject matter.	
Class syllabus: Brief outline of the course: The subject Dissertation Thesis is a compulsory part of the doctoral student's study activities. The student requires a supremely individual character with regard to the specifics of the individual topics of the dissertation thesis. The basic syllabus should already be evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the solution to the topic of the dissertation thesis with emphasis on self-study and consultation with the academic supervisor and a wide spectrum of consultants, who will take part in creating the professional potential of the doctoral student for the next (scientific) stage of his/her studies.	
Recommended literature: Recommended literature:	

No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.	
Languages necessary to complete the course: Required language for successful course completion: Slovak language in combination with English (study literature in English)	
Notes:	
Past grade distribution Total number of evaluated students: 6

University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/PriF-DSSZ-400/22	Course title: Dissertation exam
Number of credits: 15	
Educational level: III.	
Course requirements: Conditions for passing the course: Course evaluation takes place as a part of the State examination in accordance to the Study regulations of the Faculty of Natural Sciences UK in Bratislava, as well as submission of the written part of the dissertation thesis within the set deadline. The subjects of the state examination include a discussion about the written work of the dissertation examination (prepared by the doctoral student), as well as other subjects of the oral examination (ad hoc) approved by the Dean. Assessment is standard and reflects the student's sufficient orientation in the issue. The conditions for successful course completion are in accordance with the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: The objective of the course is to gain basic habits and cultural-ethical aspects of working with scientific literature, evaluation, and systemization of the studied knowledge. The doctoral student needs to successfully pass the dissertation examination according to the act on Universities and Study Regulations of the Faculty of Natural Sciences of Comenius University in Bratislava.	
Class syllabus: Brief outline of the course: Based on the description of the starting points, principles, and conclusions from the published results of the studied issues, the aim is to teach the doctoral student how to process critical research. A further objective is to understand the principles of scientific work and its legal, physical, and social attributes. The main output is the elaboration of the written work for the dissertation examination and its successful completion in accordance with the Study Regulations of the Faculty of Natural Sciences UK. The form and content of the work is regulated by article 34, paragraph 4 of the Study Regulations of the Faculty of Natural Sciences UK. The dissertation examination consists of a part consisting of a discussion of the written work for the dissertation examination, as well as a part in which the doctoral student needs to demonstrate theoretical knowledge according to the focus of the dissertation topic. The composition of the Examination Committee, the determination of the Opponent (expert examiner) and the general course of the dissertation examination are governed by the current Study Regulations of the Faculty of Natural Sciences UK.	
State exam syllabus:	
Recommended literature: Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.	

Languages necessary to complete the course:
Required language for successful course completion: Slovak language in combination with English (study literature in English)

STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DSSZ-303/22	Course title: Doctoral's Thesis Defence
Number of credits: 30	
Educational level: III.	
Course requirements: Conditions for passing the course: Course evaluation takes place as a part of the State examination in accordance to the Study regulations of the Faculty of Natural Sciences UK in Bratislava upon submission of the written part of the dissertation thesis (as final work). Assessment is standard and reflects the student's sufficient orientation in the issue. The conditions for successful course completion are in accordance with the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: The aim of the course is to capitalise on theoretical, methodological and applied knowledge of doctoral studies in the elaboration and subsequent defence of the dissertation thesis, and thus the successful completion of doctoral studies.	
Class syllabus: Brief outline of the course: The student's dissertation thesis will demonstrate his/her ability and readiness for independent scientific and creative activities in the area of research or development or for independent theoretical and creative artistic creativity. It should be characterised by a high degree of analysis and synthesis of knowledge, as well as a sufficient overview of existing literature. The work must be original and created by the author in compliance with the rules of working with information sources. The academic work must not appear to be plagiarised, nor infringe the copyrights of other authors. The author is required to thoroughly cite the information sources used, list the specific results of other authors or team of authors by citing the source, accurately describe the methods and working procedures of other authors or teams of authors, and document the laboratory results and field research of other authors or teams of authors. Style of citation is governed by the practice in the given scientific field, respecting the relevant norms and standards.	
State exam syllabus:	
Recommended literature: Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.	
Languages necessary to complete the course: Required language for successful course completion: Slovak language in combination with English (study literature in English)

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGLG-001/22	Course title: Economic Geology 1
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of study: Individual study of recommended literature and consultations Number of contact hours: daily Method of study: in class / distant learning (distant just in specific situations – e.g. pandemic)	
Number of credits: 5	
Recommended semester: 1., 2..	
Educational level: III.	
Prerequisites:	
Course requirements: Active presence at consultations. The evaluation of the course takes place in the form of an oral exam, the successful completion of which reflects the student's sufficient orientation in the issue. Final evaluation will be “passed“ if the student has a minimum performance corresponding to 51% of the maximum performance.	
Learning outcomes: Supplementation and extension of theoretical knowledge from selected parts of economic geology, related to the topic of the dissertation. He will also gain related additional knowledge from other related geological fields, especially regional geology, mineralogy, petrology and geochemistry.	
Class syllabus: The course is focused on the active study of the theoretical basis of economic geology, especially in topics close to the content of the dissertation. Based on the supervisor's proposal, the content of the study of this course is focused according to the topic of the dissertation, especially on ore and non-ore economic geology, economic geology of fossil fuels (caustobiolites) or mineral resources evaluation. The study of professional literature is carried out in such a way that in the given specialized area the doctoral student acquires deep systematic knowledge about the geological setting, ore-forming processes and genetic models of the given category of mineral deposits. He/she will also gain comprehensive knowledge about the properties of a given group of minerals, forecasting and recovery of their resources, as well as local and global geopolitical aspects related to their extraction and distribution.	
Recommended literature:	

The literature is presented in the individual study plan prepared by the supervisor of the doctoral student. This includes mainly scientific articles, monographs and scientific reports according to the specific focus of the dissertation.

Languages necessary to complete the course:

Slovak language in combination with English (study literature in mainly in English).

Notes:

Compulsory optional course

Past grade distribution

Total number of evaluated students: 1

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGLG-006/22	Course title: Environmental Economic Geology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of study: Individual study of recommended literature and consultations Number of contact hours: daily Method of study: in class / distant learning (distant just in specific situations – e.g. pandemic)	
Number of credits: 5	
Recommended semester: 1., 2..	
Educational level: III.	
Prerequisites:	
Course requirements: Active presence at consultations. The evaluation of the course takes place in the form of an oral exam, the successful completion of which reflects the student's sufficient orientation in the issue. Final evaluation will be “passed“ if the student has a minimum performance corresponding to 51% of the maximum performance.	
Learning outcomes: Supplementation and extension of theoretical knowledge from selected parts of environmental economic geology, related to the topic of the dissertation. The student will gain comprehensive knowledge about current research of environmental burdens after mining of raw materials (eventually other types of pollution), assessment of environmental and health risks caused by environmental burdens, as well as procedures for remediation and ecultivation of the affected areas. Simultaneously, he will also gain related additional knowledge from other related geological fields.	
Class syllabus: The course is focused on the active study of the theoretical basis of environmental economic geology and related fields, especially in topics close to the content of the dissertation thesis. Based on the supervisor's proposal, the content of the study of this course is focused according to the topic of the dissertation, especially on the mineralogical and geochemical characterization of mining waste, processes of mobilization, transport and accumulation of potentially toxic elements in individual components of the environment, innovative remediation technologies usable for remediation of soils, waters and river sediments. The course can also include related geological fields, such as the study of theoretical principles of special geochemical or geophysical research methods (including geochemical modelling).	
Recommended literature:	

The literature is presented in the individual study plan prepared by the supervisor of the doctoral student. This includes mainly scientific articles, monographs and scientific reports according to the specific focus of the dissertation.

Languages necessary to complete the course:

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGLG-009/22	Course title: GIS and Software Modeling in Economic and Environmental Economic Geology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of study: Individual study of recommended literature, exercises and consultations Number of contact hours: Per week: 2 Per level/semester: 26 Method of study: in class / distant learning (distant just in specific situations – e.g. pandemic)	
Number of credits: 3	
Recommended semester: 1., 2., 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: Active presence at exercises and at consultations. The evaluation of the course takes place in the form of an oral exam, the successful completion of which reflects the student's sufficient orientation in the issue. Final evaluation will be “passed“ if the student has a minimum performance corresponding to 51% of the maximum performance.	
Learning outcomes: Gaining advanced knowledge and skills in working with GIS and 3D geological software, mastering the methodology of modeling of the combination of exploration data with the results of detailed research of deposits and the environment. Gaining practical experience in creating visualizations and interpretation of results from GIS and 3D modeling	
Class syllabus: Introduction to modeling in GIS and 3D geological software. Preparation and statistical analysis of data. Visualization of exploration and research data in GIS and 3D geological software. Methods of explicit and implicit modeling. Creation of 3D conceptual models with the focus on economic geology and environmental geology. Creation of visualizations with the focus on the interpretation of results of combined models - outputs from 3D modeling, their storage and export into other output and exchange formats.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGML-005/22	Course title: Genetic Mineralogy
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Study design: Seminar, 2 hours weekly, 26 hours per semester. Individual study of recommended literature. Method of study: full time, part-time, combined	
Number of credits: 3	
Recommended semester: 1., 2., 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: Grading policy: Active participation in the seminar, elaboration of seminar work (essay) and examination - the condition of completion must be demonstrated by at least 60% of the required knowledge. The completion of the course is evaluated by the classification degrees completed or not completed.	
Learning outcomes: Course objectives: The aim of the course is to provide a comprehensive characteristic of selected processes of mineral origin and evolution, based on recent trends and the modern methods in mineralogy, at the level of knowledge of PhD. students. The course is focused on genetic problems of various mineralization types using detailed investigation of chemical and isotopic composition of minerals, knowledge of their fluid inclusions, detailed study of internal zoning (texture) and structural state of crystals, their alterations and relationships to texture, chemical composition, age and geological and tectonic evolution of their parental rocks. Consequently, the students understand principles of such comprehensive approach to solution of mineral and rock genesis.	
Class syllabus: Syllabus: Character and goals of genetic mineralogy in recent state of knowledge. The role of modern, highly precise analytical methods in mineralogical research. Variations of chemical and isotopic composition of minerals as genetic indicators. Fluid inclusions in minerals: sensitive tracers of genetic environment. Significance of minerals as indicators of temperature, pressure, oxygen and sulphur fugacity. Examples of mineral origin and evolution in various geotectonic processes	

(e.g., plutonic, volcanic environments, low to ultrahigh metamorphism, hydrothermal conditions, sedimentary environments, biomineralization, weathering).	
Recommended literature: Suggested readings: Deer W.A., Howie R.A., Zussman J. (1997/2011): Rock-forming minerals 15. The Geological Society, London. Klein C. (2006): Mineralogy. Oikos-Lumon, Bratislava. Broska I., Petrik I., Uher P. (2012): Accessory minerals in granitic rocks of the Western Carpathians. Veda, Bratislava.	
Languages necessary to complete the course: Slovak language in combination with English (study literature in mainly in English).

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGLG-011/22	Course title: Management of Projects and Research Funding
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of study: Lecture, seminar, individual study of recommended literature Number of contact hours: Per week: 2 Per level/semester: 26 Method of study: in class / distant learning (distant just in specific situations – e.g. pandemic)	
Number of credits: 3	
Recommended semester: 1., 2., 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: Active participation and elaboration of a real project application (e.g. UK grant). Final evaluation will be “passed“ if the student has a minimum performance corresponding to 51% of the maximum performance.	
Learning outcomes: The course aims to inform students about the form of financing of science in the Slovak Republic and in the EU, to present various forms of projects for financing science and education in state and private organizations in the Slovak Republic and in the EU. Structure of projects and practical writing of projects.	
Class syllabus: Financing of university education and science in the Slovak Republic. How to write and submit projects. Where to seek help. Structure of scientific projects. Form and structure of specific projects: UK, VEGA, APVV grants. EU funding of university education and science. Support of the development of European research, especially raw materials: European Research Area (ERA), Joint Research Center (JRC), European Institute of Innovation and Technology (EIT). Other sources of funding of science.	
Recommended literature: Current documents for real projects.	
Languages necessary to complete the course: Slovak language in combination with English (study literature in mainly in English).

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGLG-007/22	Course title: Methods of Research in Economic Geology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of study: Individual study of recommended literature, laboratory and field research works, consultations. Number of contact hours: daily Method of study: in class / distant learning (distant just in specific situations – e.g. pandemic)	
Number of credits: 5	
Recommended semester: 1., 2., 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: Active presence at laboratory and field research works and at consultations. The evaluation of the course takes place in the form of an oral exam, the successful completion of which reflects the student's sufficient orientation in the issue. Final evaluation will be “passed“ if the student has a minimum performance corresponding to 51% of the maximum performance.	
Learning outcomes: Gaining theoretical knowledge and practical skills in the use of advanced research methods in economic geology, as well as other related geological fields, which are necessary to master the doctoral topic.	
Class syllabus: Active study of the theoretical basis of selected advanced laboratory and field research methods used in economic geology. The selection will be made on the basis of the doctoral student's dissertation, for example from the following methods: electron-optical methods (WDS, EDS, CL), transmission and scanning electron microscopy, X-ray diffraction methods, spectroscopic methods (UV-VIS, infrared spectroscopy, Raman spectroscopy) , LA ICPMS), methods of research of fluid inclusions, methods of research of stable and radioactive isotopes, methods of mineral geothermobarometry, methods of analytical chemistry, measurement of surface properties of matters, experimental laboratory methods and syntheses, field research methods in economic geology and related fields (e.g. qualified sampling, field documentation and mapping, drill core logging, structural measurements, geophysical measurements). As a part of the laboratory work, the doctoral student will gain experiences and skills with the preparation of samples and practical application of methods - if possible, especially on his/her own samples. The department also sends doctoral students to external domestic and foreign laboratories to master methods not available at	

the home faculty. During the consultations, discussions take place on the theoretical basis of the methods and interpretation of results of the analyzes.	
Recommended literature: The literature is presented in the individual study plan prepared by the supervisor of the doctoral student. This includes mainly scientific articles, monographs and scientific reports according to the specific focus of the dissertation.	
Languages necessary to complete the course: Slovak language in combination with English (study literature in mainly in English).	
Notes: Compulsory optional course replaces the earlier optional course Mineralogical, geochemical a other methods of research in economic geology (N-DGLG-003)

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KJ/N-DSSZ-026/22	Course title: Professional English 1
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1., 3.	
Educational level: III.	
Prerequisites:	
Course requirements: Each course participant is required to achieve proficient knowledge and usage of the English grammar, professional vocabulary, reading and listening comprehension, writing professional texts and oral presentations. Credits will be awarded to students who will demonstrate active participation and deliver all set tasks and assignments successfully. The course participants will be awarded a pass or a fail upon course completion.	
Learning outcomes: Upon completion of the course, PhD students will effectively use the English language for professional purposes. They will proficiently comprehend targeted written and audio texts and present their viewpoints in required forms.	
Class syllabus: Theoretical and practical skills in professional written communication include appropriate structure of formal written texts (emails, application forms, personal statements, cover letters, abstracts, scientific articles, paraphrasing, using citations, citing sources, etc.) The course also focuses on theoretical explanation of correct delivery of oral texts, professional presentations and discussions. The course primary target is to facilitate PhD students with proficient usage of all the aspects of written and oral communication in various settings.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KJ/N-DSSZ-027/22	Course title: Professional English 2
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: Each course participant is required to achieve proficient knowledge and usage of the English grammar, professional vocabulary, reading and listening comprehension, writing professional texts and oral presentations. Credits will be awarded to students who will demonstrate active participation during seminars and deliver all prior set tasks and assignments successfully. The course participants will be awarded a pass or a fail upon course completion	
Learning outcomes: Doctoral students who successfully pass the examination in Professional English 2 will be enabled to use the English language for specific purposes in all its forms effectively and sufficiently. They will thoroughly comprehend professional texts in written and/or audio form, acquire professional vocabulary and actively participate in various oral communication settings.	
Class syllabus: Theoretical and practical skills in professional writing communication in the English language as a follow up to prior gained knowledge in the previous semester encompass writing professional résumés, summaries, lay summaries, responses to job interview questions, professional CVs, comparing and contrasting in scientific articles, etc. Professional oral communication focusses on research-based scientific presentations and effectively led discussions.	
Recommended literature: Armer, T.: Cambridge English for Scientists CD ROM Writing Professional English Team of authors: Test your Listening Skills: A Handbook for Science Doctoral students Team of authors: Test your Reading Skills: A Handbook for Science Doctoral students	
Languages necessary to complete the course: English	
Notes: B1 level in English is required in order to pass this course. Seminars are held in summer semester. Number of students in one course is limited to twenty.	

Students can choose from four offered time slots.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KMPLG/N-DGML-004/22	Course title: Seminar for PhD students
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of study: seminar Number of contact hours: Per week: 2 Per level/semester: 26 Method of study: in class / distant learning (distant just in specific situations – e.g. pandemic)	
Number of credits: 3	
Recommended semester: 1., 2., 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: Active participation in seminars, presentation of the topic and partial results of PhD thesis. Final evaluation will be “passed“ if the student has a minimum performance corresponding to 51% of the maximum performance.	
Learning outcomes: The PhD student will be able to formulate, present and discuss partial results, interpretations and conclusions of his/her PhD research. The aim of the seminar is to teach the student to process, critically evaluate and interpret results of various types of laboratory analyses and field methods of research.	
Class syllabus: State of the development and planning of work on the PhD thesis project. Discussion on chapters of the thesis based on its goals. Evaluation of the PhD thesis from the supervisor and reviewer points of view. Formal and scientific problems of the thesis. Presentation and evaluation of the PhD research results with a discussion in the presence of the department staff and other PhD students.	
Recommended literature: The literature is presented in the individual study plan prepared by the supervisor of the doctoral student. This includes mainly scientific articles, monographs and scientific reports according to the specific focus of the dissertation.	
Languages necessary to complete the course: English	
Notes:	

Optional course, vyučuje sa spoločne so PhD študijným programom Mineralógia a petrológia v rámci Katedry mineralógie, petrológie a ložiskovej geológie.
