

Course descriptions

TABLE OF CONTENTS

1. N-DSSZ-412/22 Abstract of a contribution from a domestic or an international conference (originally AFG, AFK, AFH, AFL).....	3
2. N-DPEF-003/22 Application of Physical, Chemical and Microbiological Methods in Soil Science.....	4
3. N-DSSZ-505/22 Bachelor's thesis reviewer.....	6
4. N-DSSZ-504/22 Bachelor's thesis supervisor.....	7
5. N-DSSZ-414/22 Completing an long-term ERASMUS+ internship (minimum 60 days).....	8
6. N-DSSZ-415/22 Completion of SAIA/NŠP internship program or other equivalent (minimum 30 days).....	9
7. N-DSSZ-416/22 Completion of a short-term foreign internship (15-30 days, and related to the topic of the PhD thesis).....	10
8. PriF-DSSZ-001/22 Dissertation 1.....	11
9. PriF-DSSZ-002/22 Dissertation 2.....	12
10. PriF-DSSZ-003/22 Dissertation 3.....	14
11. PriF-DSSZ-004/22 Dissertation 4.....	16
12. PriF-DSSZ-005/22 Dissertation 5.....	18
13. PriF-DSSZ-006/22 Dissertation 6.....	20
14. PriF-DSSZ-007/22 Dissertation 7.....	22
15. PriF-DSSZ-024/22 Dissertation 8.....	24
16. PriF-DSSZ-025/22 Dissertation 9.....	26
17. N-DEPD-400/22 Dissertation exam (state exam).....	28
18. N-DPEF-005/22 Environmental Functions and Properties of Soils.....	29
19. N-DSSZ-400/22 Grant CU or Grant SAS or equivalent grant.....	31
20. N-DSSZ-413/22 Intellectual Property Rights Document (originally AGJ).....	32
21. PriF-DSSZ-302/22 Oral defence of dissertation thesis (state exam).....	33
22. N-DSSZ-508/22 Other activities.....	34
23. N-DSSZ-501/22 P1 Pedagogical output as a whole (originally ACA, ACB, BCI, BCB).....	35
24. N-DSSZ-503/22 P2 Pedagogical output as a part (originally BCK).....	36
25. N-DSSZ-502/22 P2 Pedagogical output as part (originally ACC, ACD).....	37
26. N-DSSZ-507/22 Pedagogical activity (4 hours/WS and 4 hours/SS) or alternative pedagogical work.....	38
27. N-DPEF-004/22 Phytoindication of Changes in Soil Ecosystems.....	39
28. N-DSSZ-026/22 Professional English 1.....	41
29. N-DSSZ-027/22 Professional English 2.....	43
30. N-DSSZ-500/22 Selected topics from university pedagogy for non-teachers.....	45
31. N-DSSZ-022/22 Slovak for Foreign Doctoral Students 1.....	46
32. N-DSSZ-023/22 Slovak for Foreign Doctoral Students 2.....	48
33. N-DSSZ-024/22 Slovak for Foreign Doctoral Students 3.....	50
34. N-DSSZ-028/22 Slovak for Foreign Doctoral Students 4.....	52
35. N-DPEF-002/22 Soil Ecophysiology.....	54
36. N-DPEF-001/22 Soil Science.....	56
37. N-DSSZ-506/22 Supervisor of the SSC contribution.....	58
38. N-DSSZ-404/22 V1 Scientific output as a whole - ESB monograph (originally AAA, ABA), individual authorship less than 3 AH.....	59
39. N-DSSZ-401/22 V1 Scientific output as a whole – ESB monograph (originally AAA, ABA), individual authorship share ≥ 3 AH.....	60

40. N-DSSZ-405/22 V2 Scientific output as part - study in ESB or collection (originally AAB, ABA, ABB), individual authorship less than 3 AH.....	61
41. N-DSSZ-402/22 V2 Scientific output as part - study in ESB or collection (originally AAB, ABA, ABB), individual authorship share ≥ 3 AH.....	62
42. N-DSSZ-411/22 V2 Scientific output as part of ESB, collection - contribution in peer reviewed scientific collection, monograph (originally AEC, AFA, AFC, AED).....	63
43. N-DSSZ-406/22 V3 Scientific output as a part - study in a journal (originally AAB, ABA, ABB), individual authorship less than 3 AH.....	64
44. N-DSSZ-403/22 V3 Scientific output as a part - study in a journal (originally AAB, ABA, ABB), individual authorship ≥ 3 AH.....	65
45. N-DSSZ-410/22 V3 Scientific output in a journal outside the index databases (originally ADE, ADF).....	66
46. N-DSSZ-407/22 V3 Scientific output in a journal registered by CCC, WOS, SCOPUS - JCR/ Q1 – Q2 (originally ADC, ADD, ADM, ADN), first or corresponding author.....	67
47. N-DSSZ-408/22 V3 Scientific output in a journal registered by CCC, WOS, SCOPUS - JCR/ Q3- Q4 (originally ADC, ADD, ADM, ADN), first or corresponding author.....	68
48. N-DSSZ-409/22 V3 Scientific output in the journal registered by CCC, WOS, SCOPUS - JCR/ Q1 – Q2 – Q3 - Q4 (originally ADC, ADD, ADM, ADN), co-author.....	69

COURSE DESCRIPTION

Academic year: 2022/2023							
University: Comenius University Bratislava							
Faculty: Faculty of Natural Sciences							
Course ID: PriF/N-DSSZ-412/22			Course title: Abstract of a contribution from a domestic or an international conference (originally AFG, AFK, AFH, AFL)				
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning							
Number of credits: 4							
Recommended semester:							
Educational level: III.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/N-DPEF-003/22	Course title: Application of Physical, Chemical and Microbiological Methods in Soil Science
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of education: lectures Recommended range of teaching (in hours):26 Weekly: 2 hrs For the period of study:13 weeks Form of study:combined	
Number of credits: 3	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: The final evaluation will be made on the basis of an oral exam. The final evaluation will be completed if the student gives a minimum performance corresponding to 60% of the maximum performance (with manifestations of original thinking, with the ability to analyze, synthesize and interpret). The final evaluation will not be passed if the student submits an unacceptably poor performance corresponding to less than 60% of the maximum performance, which indicates a lack of knowledge and misunderstanding of the basic components of the course.	
Learning outcomes: The course builds on the previous knowledge of students and expands these with special methods used in soil research. The course is focused not only on explaining the principles of individual methods, but great emphasis is placed on various ways of evaluation and interpretation of the obtained results. Upon successful completion of this course, students will be able to use the most modern methods in their own research, will know the possibilities of their use and will be able to use the results for synthesis and interpretation in a comprehensive assessment of processes affecting soils and the environment.	
Class syllabus: 1. Introduction to special soil analyzes. 2. Characteristics of soil pore environment. 3. Methods of determination and modeling of water-conducting properties of soil. 4. Determination and modeling of saturated and unsaturated hydraulic conductivity of soils. 5. Analysis of structural properties of soil and stability of soil aggregates. 6. Analysis and modeling of precipitation and dissolution equilibria in soils. 7. Determination and significance of variable charge of soil colloids. 8. Methods of determination and significance of specific sorption in soils. 9. Use of methods of instrumental chemical analysis in solid phase research. 10. Bioindication methods for determining the degree	

of influence of changes in anthropogenic and ecological characteristics on the composition of soil microbiocenosis. 11. Methods for determination of carbon content in microbial soil biomass. 12. Polymerase Chain Reaction (PCR) and the use of specific properties of nucleic acids, in determining the species of microorganisms in the soil.

Recommended literature:

Klute, A. (Ed.), 1986: Methods of Soil Analysis 1: Physical and Mineralogical Methods, 2nd Ed., American Society of Agronomy, Madison

Sparks, D.L. (Ed.), 1996: Methods of Soil Analysis. Part 3. Chemical Methods. Soil Science Society of America, Madison

van Elsas, J.D., Jansson, J.K., Trevors, J.T., 2006. Modern Soil Microbiology, CRC Press, 672 s.

Languages necessary to complete the course:

Slovak and English (the literature in English)

Notes:

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/PriF-DSSZ-001/22	Course title: Dissertation 1
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: The evaluation of the subject takes place individually according to the student's study plan. The final evaluation will be completed if the student submits a minimum performance corresponding to 60% of the maximum performance. The final evaluation will not be passed if the student submits an unacceptably poor performance corresponding to less than 60% of the maximum performance.	
Learning outcomes: The student acquires a sufficient orientation in the issues of the dissertation in accordance with the specifics of individual topics. This knowledge is important for the graduate's theoretical abilities, but also supports the development of his potential in a wide range of applied practice. Undoubtedly, the results of education will also be reflected in the student's overview at the level of methodological approaches in the given issue.	
Class syllabus:	
Recommended literature: No specification due to the nature of the specific topic of the dissertation. The recommended literature is a part of the student's study plan.	
Languages necessary to complete the course: Slovak and English (the literature in English)	
Notes:	
Past grade distribution Total number of evaluated students: 2	
ABS	NEABS
100,0	0,0
Lecturers: doc. Mgr. Ivan Šimkovic, PhD.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/PriF-DSSZ-002/22	Course title: Dissertation 2
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information No specification with regard to the doctoral degree (choice of methods - full-time, distance, combined).	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: The evaluation of the subject takes place individually according to the student's study plan. The final evaluation will be completed if the student submits a minimum performance corresponding to 60% of the maximum performance. The final evaluation will not be passed if the student submits an unacceptably poor performance corresponding to less than 60% of the maximum performance.	
Learning outcomes: The student acquires a sufficient orientation in the issues of the dissertation in accordance with the specifics of individual topics. This knowledge is important for the graduate's theoretical abilities, but also supports the development of his potential in a wide range of applied practice. Undoubtedly, the results of education will also be reflected in the student's overview at the level of methodological approaches in the given issue.	
Class syllabus: The subject Dissertation is a compulsory part of the doctoral student's study activities. It acquires a supremely individual character with regard to the specifics of individual topics of the dissertation. Its basic syllabus is already evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the topic of the dissertation with emphasis on self-study and consultation with the supervisor and a wide range of consultants. He participates in creating the professional potential of a doctoral student in the next (scientific) stage of his studies.	
Recommended literature: No specification due to the nature of the specific topic of the dissertation. The recommended literature is a part of the student's study plan.

Course ID: PriF.KPI/PriF-DSSZ-024/22	Course title: Dissertation 8
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information No specification with regard to the doctoral degree (choice of methods - full-time, distance, combined).	
Number of credits: 5	
Recommended semester: 8.	
Educational level: III.	
Prerequisites:	
Course requirements: The evaluation of the subject takes place individually according to the student's study plan. The final evaluation will be completed if the student submits a minimum performance corresponding to 60% of the maximum performance. The final evaluation will not be passed if the student submits an unacceptably poor performance corresponding to less than 60% of the maximum performance.	
Learning outcomes: The student acquires a sufficient orientation in the issues of the dissertation in accordance with the specifics of individual topics. This knowledge is important for the graduate's theoretical abilities, but also supports the development of his potential in a wide range of applied practice. Undoubtedly, the results of education will also be reflected in the student's overview at the level of methodological approaches in the given issue.	
Class syllabus: The subject Dissertation is a compulsory part of the doctoral student's study activities. It acquires a supremely individual character with regard to the specifics of individual topics of the dissertation. Its basic syllabus is already evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the topic of the dissertation with emphasis on self-study and consultation with the supervisor and a wide range of consultants. He participates in creating the professional potential of a doctoral student in the next (scientific) stage of his studies.	
Recommended literature: No specification due to the nature of the specific topic of the dissertation. The recommended literature is a part of the student's study plan.	
Languages necessary to complete the course: Slovak and English (the literature in English)

STATE EXAM DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/N-DEPD-400/22	Course title: Dissertation exam
Number of credits: 15	
Educational level: III.	
Recommended prerequisites: Compulsory and other compulsory optional subjects according to the accreditation and the individual study plan of the doctoral student.	
Course requirements: The evaluation takes place within the state examination in accordance with the Study Regulations of the FNS CU in Bratislava and after the submission of the written work for the dissertation examination within the set deadline. The subjects of the state examination include a discussion of the written work for the dissertation examination (prepared by the doctoral student) and other subjects of the oral examination approved by the dean. The assessment is standard and reflects the sufficient orientation of the student in the issue. The conditions for successful completion of the course are in accordance with the Study Regulations of the FNS CU.	
Learning outcomes: The aim is to acquire basic skills and cultural-ethical aspects of working with scientific literature, evaluation and systematization of studied knowledge. The doctoral student must successfully pass the dissertation examination according to the Act on Higher Education Institutions and the Study Regulations of the FNS CU.	
Class syllabus: Based on the description of the starting points, principles and conclusions from the published results of the studied issues, the doctoral student should prepare a critical review. Another goal is to understand the principles of scientific work and its attributes of ethical legal, philosophical and social. The main output is the elaboration of a written work for the dissertation exam. The dissertation examination consists of a part consisting of a discussion of the written work for the dissertation examination and a part in which the doctoral student has to demonstrate theoretical knowledge in accordance with the focus of his work. The composition of the examination committee, the appointment of the opponent and the course of the dissertation exam are governed by the current Study Regulations of the FNS CU.	
State exam syllabus:	
Recommended literature: No specification due to the nature of the specific topic of the dissertation. The recommended literature is a part of the student's study plan.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/N-DPEF-005/22	Course title: Environmental Functions and Properties of Soils
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of education: lectures Recommended range of teaching (in hours): 26 Weekly: 2 hrs For the period of study: 13 weeks Form of study: combined	
Number of credits: 3	
Recommended semester: 3.	
Educational level: III.	
Prerequisites:	
Course requirements: The final evaluation will be made on the basis of an oral exam. The final evaluation will be completed if the student gives a minimum performance corresponding to 60% of the maximum performance (with manifestations of original thinking, with the ability to analyze, synthesize and interpret). The final evaluation will not be passed if the student submits an unacceptably poor performance corresponding to less than 60% of the maximum performance, which indicates a lack of knowledge and misunderstanding of the basic components of the course.	
Learning outcomes: The course builds on previous knowledge of students, expands this to the issue of non-productive functions of soils. The course defines the environmental properties of soils and introduces students to the environmental functions of soils. Upon successful completion of this course, students will be able to evaluate and interpret not only partial soil properties obtained using standard methods of soil research, but also emphasis will be placed on the synthesis of existing knowledge in the form of a more comprehensive assessment of environmental functions of soils.	
Class syllabus: 1. Introduction to special soil analyzes. 2. Characteristics of soil pore environment. 3. Methods of determination and modeling of water-conducting properties of soil. 4. Determination and modeling of saturated and unsaturated hydraulic conductivity of soils. 5. Analysis of structural properties of soil and stability of soil aggregates. 6. Analysis and modeling of precipitation and dissolution equilibria in soils. 7. Determination and significance of variable charge of soil colloids. 8. Methods of determination and significance of specific sorption in soils. 9. Use of methods of instrumental chemical analysis in solid phase research. 10. Bioindication methods for determining the degree of influence of changes in anthropogenic and ecological characteristics on the composition of soil microbiocenosis. 11. Methods for determination of carbon content in microbial soil biomass. 12.	

Polymerase Chain Reaction (PCR) and the use of specific properties of nucleic acids, in determining the species of microorganisms in the soil.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/N-DPEF-004/22	Course title: Phytoindication of Changes in Soil Ecosystems
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of education:lectures Recommended range of teaching (in hours):26 Weekly: 2 hrs For the period of study:13 weeks Form of study:combined	
Number of credits: 3	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: Successful completion of the course is conditioned by passing an oral exam on a selected issue at least 60%. Credits will not be awarded to a student who receives less than 60%. The structure and content of the course in case of distant form will be the same, but it will be presented by distant way.	
Learning outcomes: Thecourse should provide an extended knowledge about changes in soil ecosystems that mostly appear on the plant level. These knowledges exceed those that are offered to students in the master's degree. The aim of the course is also to prepare students for their dissertation state exams. Obtained knowledge should be later used by students during preparation of their dissertation theses and after the successful graduation in future scientific research.	
Class syllabus: The course is apart of educational part of Individual education programof each PhD.student. It focuses on actual findings and recent knowledge how to evaluatemodified edaphic factors that greatly affect plants, especially changes in soil abiotic and biotic factors that considerably influence plant growth and development. The course also providesa training in specific methods of ecophysiological research in the laboratory experiments.	
Recommended literature: Keddy P. 2017. Plant Ecology: Origins, Processes, Consequences. 2ndEd. Cambridge University Press, 624 pp. Shukla V, Kumar V, Kumar N. 2017. Plant Adaptation Strategies in Changing Environment. Springer Singapore, 427 pp.

Course ID: PriF.KJ/N-DSSZ-026/22	Course title: Professional English 1
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1., 3.	
Educational level: III.	
Prerequisites:	
Course requirements: Each course participant is required to achieve proficient knowledge and usage of the English grammar, professional vocabulary, reading and listening comprehension, writing professional texts and oral presentations. Credits will be awarded to students who will demonstrate active participation and deliver all set tasks and assignments successfully. The course participants will be awarded a pass or a fail upon course completion.	
Learning outcomes: Upon completion of the course, PhD students will effectively use the English language for professional purposes. They will proficiently comprehend targeted written and audio texts and present their viewpoints in required forms.	
Class syllabus: Theoretical and practical skills in professional written communication include appropriate structure of formal written texts (emails, application forms, personal statements, cover letters, abstracts, scientific articles, paraphrasing, using citations, citing sources, etc.) The course also focuses on theoretical explanation of correct delivery of oral texts, professional presentations and discussions. The course primary target is to facilitate PhD students with proficient usage of all the aspects of written and oral communication in various settings.

Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 2	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Type, extent and method of academic activities: 2 hours (at 60 min. per hour) of weekly lessons in the form of seminars. All academic activities will take place during the lessons. Number of credits: 3 credits Recommended semester/trimester of study: from 1st to 8th semester Level of study: third Subject conditions: Slovak for Foreign Doctoral Students 2 Requirements for course completion: active participation during lessons, ongoing work on the assignments. There will be a final examination at the end of the semester. Scale of assessment (preliminary/final): Credits will not be awarded to students who receive less than 60% on the final examination.	
Learning outcomes: The objective of the course is to acquire the basics of Slovak in a communicative way, to develop individual language skills (listening, reading, writing and speaking) based on the Common European Framework of Reference for Languages (CEFR) for the levels A1 – A2. Intended for levels A1-A2, beginner to pre-intermediate	
Class syllabus: The lessons contain the basics of Slovak grammar which are relevant to the specifics of Slovak as a foreign language. Selected grammatical phenomena, conjugation and declination are practised. Vocabulary is focused on real-life communication needs.	
Recommended literature: Kamenárová, R. a kol.: Krížom-krážom, Slovenčina A1, A2 Kamenárová, R. a kol.: Krížom-krážom, Slovenčina A1+A2, workbook Audio program: https://uniba.sk/krizom-krazom Worksheets are prepared by the course instructor. Portal: https://slovakie.eu/sk	
Languages necessary to complete the course: Slovak in combination with English (the study literature is in both Slovak and English)	

Notes:

It is possible to register for the course just once. Students may begin in either the Summer or Winter semester.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KJ/N-DSSZ-028/22	Course title: Slovak for Foreign Doctoral Students 4
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 2	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Grading (Assessment/Evaluation): Active participation during lessons, ongoing work on the assignments. There will be a final examination at the end of the semester. Credits will be awarded to students who receive more than 60% on the final examination. The course participants will be awarded a pass or a fail upon course completion.	
Learning outcomes: Objectives and outcomes: The objective of the course is to acquire the basics of Slovak in a communicative way, to develop individual language skills (listening, reading, writing and speaking) based on the Common European Framework of Reference for Languages (CEFR) for the levels A1 – A2, pre-intermediate level. Based on the completion of the course, the participants are able to understand the common situations and they are able to have a discussion and comment basic daily scenarios.	
Class syllabus: Brief outline of the course: The lessons contain the basics of Slovak grammar which are relevant to the specifics of Slovak as a foreign language. Selected grammatical aspects (verb - conjugation/next conjugation classes, possessive pronouns, I like/enjoy doing something, I like something, comparison of adjectives and adverbs, conditional) are practised. Vocabulary is focused on real-life communication needs.	
Recommended literature: Recommended literature: Kamenárová, R. a kol.: Krížom-krážom, Slovenčina A1. UK v Bratislave, 2012. Kamenárová, R. a kol.: Krížom-krážom, Slovenčina A2. (Lekcia 1-4). UK v Bratislave, 2012. Kamenárová, R. a kol.: Krížom-krážom, Slovenčina A1+A2, cvičebnica Audio program: https://uniba.sk/krizom-krazom Worksheets, website: https://slovake.eu/sk

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/N-DPEF-002/22	Course title: Soil Ecophysiology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of education: lectures Recommended range of teaching (in hours):52 Weekly: 4 hrs For the period of study:13 weeks Form of study:combined	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: Successful completion of the course is conditioned by passing an oral exam on a selected issue at least 60%. Credits will not be awarded to a student who receives less than 60%. The structure and content of the course in case of distant form will be the same, but it will be presented by distant way.	
Learning outcomes: The course should provide an extended and updated knowledge about specific areas of soil ecophysiology. These knowledges exceed those that are offered to students in the master's degree. The aim of the course is also to prepare students for their dissertation state exams. Obtained knowledge should be later used by students during preparation of their dissertation theses and after the successful graduation in future scientific research.	
Class syllabus: The course is apart of educational part of Individual education program of each PhD. student. It focuses on actual findings and recent knowledge about evaluation of phytoavailability of mineral elements from the soil solution and their uptake by plants. The course also provides a knowledge how these elements are being translocated and where are deposited in plant tissues. The detailed knowledge of interactions in plant-soil system is also provided. The course also provides a training in specific methods of ecophysiological research in the laboratory experiments.

COURSE DESCRIPTION

Academic year: 2022/2023	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KPI/N-DPEF-001/22	Course title: Soil Science
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of education:lectures Recommended range of teaching (in hours):52 Weekly: 2 hrs For the period of study:13 weeks Form of study:combined	
Number of credits: 5	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: The final evaluation will be made on the basis of an oral exam. The final evaluation will be completed if the student gives a minimum performance corresponding to 60% of the maximum performance (with manifestations of original thinking, with the ability to analyze, synthesize and interpret). The final evaluation will not be passed if the student submits an unacceptably poor performance corresponding to less than 60% of the maximum performance, which indicates a lack of knowledge and misunderstanding of the basic components of the course.	
Learning outcomes: The course is a theoretical preparation for the dissertation exam and students will therefore deepen the knowledge they have acquired at lower levels of study. In addition, however, the lectures are focused on modern approaches in soil science, in which students get acquainted with a process-oriented view of the soil system, which characterizes the soil as a dynamic system, whose properties cannot be reduced to partial soil processes. The course therefore follows up on other lectures in the field of physical, chemical or biological processes and seeks to link this partial knowledge into a comprehensive view of the soil system.	
Class syllabus: Introduction to a process-oriented soil science. Characteristic properties of soil dynamic system. Soil processes in different time scales. Thermodynamics and kinetics of soil processes. Soil as a chemical reactor. Soil processes at regional and global scales. Carbon sequestration and climate change. Waste, pollution and soil health. Interaction of soil processes with other components of the environment. Paleopedology and pedoarcheology.	
Recommended literature:
