Educational activities: Type of activities: fieldwork Number of hours: per week: per level/semester: 6d Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Students will personally participate in field exercises lasting 6 days. Active participation and submission of documentation from field research in written form (possibly supplemented by photo documentation) is required to grant the credits. Final oral examination of knowledge gained during field exercises. Rating in %: A <100%, 92%>, B (92%, 84%>, C (84%, 76%>, D (76%, 68%>, E (68%, 60%>, Fx less than 60% points. Learning outcomes: By completing the course, the student should acquire the ability to practically implement the field stage of detailed pedogeographical and biogeographical research and mapping.	
Class syllabus: The exercises deepen and strengthen theoretical knowledge of the methods of biogeographical and pedogeographical research and mapping. They are focused on standard data collection - practical identification of selected representatives of flora and fauna, plant communities and biotopes, collection of dendrochronological samples and their evaluation; pedological survey, description of soil units through soil probes, sample extraction, their analysis and evaluation (in-field and laboratory), subsequent creation of vegetation and soil maps of the model area as part of solving tasks in geoinformatics.
