| <b>Course requirements:</b><br>Ongoing evaluation (40%):<br>Active participation in teaching - presentation of your research project (at least once a semester) - max 20 points<br>Active participation in teaching – studying the documents of colleagues, expressing interest and commenting, proposals to research projects of colleagues (study the materials for the meeting, actively engage in discussions, give feedback, respond to others, follow the rules, send feedback in writing) - max 20 points<br>Final evaluation (60%): Written work - Research project - max 60 points<br>Rating: A: 91-100 points; B: 81-90 points; C: 73-80 points; D: 66-72 points; E: 60-65 points; Fx: 0-59 points |                                                               |
| <b>Learning outcomes:</b><br>In this course, postgraduate students can experience the research team's context, practice communication, presentation skills, and develop emotional intelligence skills in the team and other doctoral students. The course is implemented through experiential team learning and working on your research project, modeling the research team's work.<br>The course aims to provide doctoral students with their functioning as members of the research team using feedback on their research dissertation project from other participants and the course leader. In model situations, students improve in individual team skills, communication, and presentation skills.    |                                                               |
| <b>Class syllabus:</b><br>Ethics in research<br>2. Research projects, their preparation, writing, and implementation<br>3. Searching for literature and working with literature<br>4. Theoretical overview of the literature on the given topic<br>5. Detailed summary of research studies and findings from the researched area<br>6. Problem formulation, Research hypotheses/research questions<br>7. Detailed characteristics of methods, measuring tools<br>8. Detailed features of data collection                                                                                                                                                                                                     |                                                               |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |      |      |      |       |      |     |       |

| <b>Course requirements:</b><br>Ongoing evaluation (40%):<br>Active participation in teaching - presentation of your research project (at least once a semester) - max 20 points<br>Active participation in teaching – studying the documents of colleagues, expressing interest and commenting, proposals to research projects of colleagues (study the materials for the meeting, actively engage in discussions, give feedback, respond to others, follow the rules, send feedback in writing) - max 20 points<br>Final evaluation (60%): Written work - Research project - max 60 points<br>Rating: A: 91-100 points; B: 81-90 points; C: 73-80 points; D: 66-72 points; E: 60-65 points; Fx: 0-59 points |                                                                |
| <b>Learning outcomes:</b><br>In this course, postgraduate students can experience the research team's context, practice communication, presentation skills, and develop emotional intelligence skills in the team and other doctoral students. The course is implemented through experiential team learning and working on your research project, modeling the research team's work.<br>The course aims to provide doctoral students with their functioning as members of the research team using feedback on their research dissertation project from other participants and the course leader. In model situations, students improve in individual team skills, communication, and presentation skills.    |                                                                |
| <b>Class syllabus:</b><br>Ethics in research<br>2. Research projects, their preparation, writing, and implementation<br>3. Searching for literature and working with literature<br>4. Theoretical overview of the literature on the given topic<br>5. Detailed summary of research studies and findings from the researched area<br>6. Problem formulation, Research hypotheses/research questions<br>7. Detailed characteristics of methods, measuring tools<br>8. Detailed features of data collection                                                                                                                                                                                                     |                                                                |

9. Detailed features of data analysis
10. Research management - personnel, financial, and time
11. The process of publishing and reviewing scientific work
12. Presentation of scientific work and giving feedback

| <b>Learning outcomes:</b><br>Students get an overview of some advanced quantitative data analysis methods in the social sciences at the end of the course.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                       |
| <b>Class syllabus:</b><br>1. Basics of statistics: Classical and robust statistics - Why use accurate (robust) methods?<br>2. Verification of assumptions of quantitative analysis: Classical and robust verification of hypotheses, work with data<br>3. Robust statistics: Robust ANOVA (comparison of several groups) and experimental (split-plot) designs<br>4. Factor analyzes and psychometric analysis of questionnaires<br>5. Multilevel statistical models                                                                                                                                                                                                                                                                                                                        |                                                       |
