Course descriptions

TABLE OF CONTENTS

1. B-VUZde027/22 Abuse prevention.... 4
2. B-VUZde027/22 Abuse prevention.... 7
3. B-PSYde002/22 Anatomy and physiology of the nervous system.... 10
4. B-VUZde008/22 Bachelor thesis seminar.... 13
5. B-VUZde008/22 Bachelor thesis seminar.... 15
6. B-VUZšt011/15 Bachelor's thesis defence **(state exam)**.... 17
7. B-HISde007/22 Basics of Modern Didactics of History#Teaching.... 20
8. B-PSYde034/16 Basics of applied behaviour analysis.... 23
9. B-PSYde034/16 Basics of applied behaviour analysis.... 24
10. B-PSYde031/16 Basics of art therapy.... 25
11. B-PSYde031/16 Basics of art therapy.... 26
12. B-PSYde032/16 Basics of drama therapy.... 27
13. B-PSYde032/16 Basics of drama therapy.... 28
14. B-PSYde033/16 Basics of play therapy.... 29
15. B-PSYde033/16 Basics of play therapy.... 30
16. B-PSYde029/22 Basics of psychiatry.... 31
17. B-PSYde020/22 Basics of sociology.... 34
18. B-PSYde026/22 Basics of speech therapy.... 37
19. B-VUZde029/22 Basics of the first aid.... 40
20. B-VUZde029/22 Basics of the first aid.... 43
21. B-VUZde031/22 Child biological development and school hygiene.... 46
22. B-VUZde031/22 Child biological development and school hygiene.... 50
23. B-VUZde005/22 Communication in education.... 54
24. B-VUZde005/22 Communication in education.... 57
25. B-VUZde025/15 Constructivism in education.... 60
26. B-VUZde025/15 Constructivism in education.... 61
27. B-VUZde035/22 Developing critical thinking.... 62
28. B-VUZde035/22 Developing critical thinking.... 64
29. B-PSYde015/22 Developmental disorders.... 66
30. B-PSYde005/22 Developmental psychology.... 70
31. B-HISde035/22 Didactics of non-formal History Education.... 75
32. B-VUZde002/22 Digital technologies 1.... 78
33. B-VUZde002/22 Digital technologies 1.... 87
34. B-VUZde012/22 Digital technologies 2.... 96
35. B-VUZde012/22 Digital technologies 2.... 104
36. B-VUZde013/22 Digital technologies 3.... 112
37. B-VUZde013/22 Digital technologies 3.... 113
38. B-VUZde037/22 Educational counselling.... 114
39. B-VUZde037/22 Educational counselling.... 117
40. B-PSYde011/22 Educational psychology.... 120
41. B-HISde032/20 Empirical Research.... 123
42. B-VUZde030/22 Environmetal education.... 124
43. B-VUZde030/22 Environmetal education.... 127
44. B-PSYde021/22 Ethical Propaedeutics.... 130
45. B-VUZde016/22 Ethics and professional ethics.... 133
46. B-VUZde016/22 Ethics and professional ethics.... 136
47. B-HISde031/20 Excursion.... 139

48. B-HISde027/16 Excursion I....140
49. B-VUZde024/22 Family education....141
50. B-VUZde024/22 Family education....144
51. B-VUZde018/22 Gender aspects of education....147
52. B-VUZde018/22 Gender aspects of education....150
53. B-HISde010/22 General history I....153
54. B-HISde002/22 General history II....156
55. B-HISde004/22 General history III....159
56. B-HISde006/22 General history IV....162
57. B-HISde009/22 General history V....165
58. B-VUZde004/22 General didactics....168
59. B-VUZde004/22 General didactics....172
60. B-PSYde010/22 General pathopsychology....176
61. B-PSYde001/22 General psychology....179
62. B-HISde034/22 Historic proseminar....183
63. B-HISde019/22 Historical geography....185
64. B-HISde029/20 History Olympiad....188
65. B-HISde001/22 History of Slovakia I....189
66. B-HISde003/22 History of Slovakia II....192
67. B-HISde005/22 History of Slovakia III....195
68. B-HISde008/22 History of Slovakia IV....198
69. B-VUZde022/22 History of education....201
70. B-VUZde022/22 History of education....203
71. B-VUZde014/22 History of philosophy 1....205
72. B-VUZde014/22 History of philosophy 1....208
73. B-VUZde015/15 History of philosophy 2....211
74. B-VUZde015/15 History of philosophy 2....212
75. B-PSYde004/22 History of psychology....213
76. B-PSYde022/22 Intercultural psychology....216
77. B-VUZde017/15 Introduction to gender studies....219
78. B-VUZde017/15 Introduction to gender studies....220
79. B-HISde011/22 Introduction to the study of history....221
80. B-PSYde016/22 Introduction to the studying of psychology....223
81. B-PSYde009/22 Introduction to the teaching of psychology....226
82. B-HISde015/22 Latin for History Teachers....230
83. B-HISde015/22 Latin for History Teachers....232
84. B-VUZde023/22 Leisure time education....234
85. B-VUZde023/22 Leisure time education....237
86. B-VUZde032/22 Medial education....240
87. B-VUZde032/22 Medial education....243
88. B-HISde013/22 Methodology of Writing a Professional Text in the History....246
89. B-PSYde013/22 Methodology of academic writing in psychology....248
90. B-PSYde006/22 Methodology of psychological research....251
91. B-VUZde033/22 Multicultural education....254
92. B-VUZde033/22 Multicultural education....257
93. B-VUZde028/22 Pedagogy of individuals with special educational needs....260
94. B-VUZde028/22 Pedagogy of individuals with special educational needs....264
95. B-PSYde008/22 Personality psychology....268
96. B-PSYde019/22 Philosophical conceptions of man....271

97. B-PSYde017/22 Philosophy of education.....274
98. B-HISde028/16 Practice in cultural institution.....277
99. B-HISde030/20 Project Activities.....278
100. B-PSYde014/22 Psychology of creativity.....279
101. B-PSYde027/22 Psychology of individuals with hearing impairment.....282
102. B-PSYde024/22 Psychology of individuals with intellectual disability.....285
103. B-PSYde028/22 Psychology of individuals with physical disability and chronic illness.....288
104. B-PSYde025/22 Psychology of individuals with visual impairment.....291
105. B-HISde012/22 Regional history of Slovakia.....294
106. B-VUZde034/22 Rhetoric and communication.....297
107. B-VUZde034/22 Rhetoric and communication.....300
108. B-VUZde036/22 School management.....303
109. B-VUZde036/22 School management.....306
110. B-HISde014/22 Seminar on General History I.....309
111. B-HISde017/22 Seminar on General History II.....311
112. B-HISde021/22 Seminar on General History III.....314
113. B-HISde023/22 Seminar on General History IV.....317
114. B-HISde026/22 Seminar on General History V.....320
115. B-HISde016/22 Seminar on History of Slovakia I.....323
116. B-HISde020/22 Seminar on History of Slovakia II.....326
117. B-HISde022/22 Seminar on History of Slovakia III.....329
118. B-HISde025/22 Seminar on History of Slovakia IV.....332
119. B-HISde024/22 Seminar on the Basics of Modern Didactics of History Teaching.....335
120. B-PSYde030/22 Social pathology.....339
121. B-PSYde007/22 Social psychology.....342
122. B-VUZde026/22 Social skills of teachers training.....346
123. B-VUZde026/22 Social skills of teachers training.....347
124. B-PSYde003/22 Social-psychological training I.....348
125. B-PSYde035/22 Social-psychological training II.....351
126. B-PSYde035/22 Social-psychological training II.....352
127. B-VUZde038/22 Specialised foreign language.....353
128. B-VUZde038/22 Specialised foreign language.....354
129. B-PSYde012/22 Statistical methods and techniques.....355

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde027/22	Abuse prevention

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2., 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course: The course is completed with an assessment, the ratio of the midterm and final assessment is 100/0. The task of the students is to prepare a midterm paper for 40 points and to pass a midterm test for 60 points, a total of 100 points. A minimum of 60% of the maximum possible course grade is required for successful completion of the course.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes and transferable competences:
The aim of the course is to provide basic knowledge about the problems of drug consumption, their effects, the etiology of drug addiction. The course pays special attention to the issues of the drug scene, drug policy development and criminal sanctions, or drug crime. Students will be able to identify the internal and external causes of addiction, summarize the manifestations of different types of addiction, indicate and propose specific forms of addiction prevention. They will deepen their knowledge and competences in working with people with addiction, they will learn to apply preventive practices through examples and concrete activities in school practice.
Students and learners will develop communication skills using professional terminology in the field of substance and non-substance addictions. They will improve their skills in working with professional literature and producing professional texts. Students will be able to apply knowledge creatively to problem-based assignments.

Class syllabus:
Brief outline of the course:
1. Basic terminology (social pathology, drug, addiction, abstinence, codependence, prevention, etc.).
2. Classification and characteristics of selected groups of psychotropic substances.
3. Specifics and classification of substance addictions.
4. Causes and factors of drug use.
5. The emergence of addiction and its symptoms.
6. Non-substance addictions (classification, characteristics).
7. Prevention of addiction and its forms.
8. Options for help in the field of addiction (basic psychotherapeutic approaches in addiction treatment, pharmacotherapeutic help, family accompaniment).
9. National Drug Control Programme. The roles of the Departments of Education, Culture, Health, Justice, Home Affairs and Labour, Social Affairs and Family.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPsPp/B-PSYde002/22	**Course title:** Anatomy and physiology of the nervous system
Educational activities: **Type of activities:** lecture **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Type, volume, methods and workload of the student - additional information Scope, type/method of teaching and organizational form: 2 hour lecture; 22 hours total per semester, combined (mostly personal attendance) Student workload: 11 x 2 hours of direct teaching = 22 hours; preparation of seminar work and presentation (18 hours), preparation for the mid-term test (30 hours), preparation for the final examination (30 hours). 100 hours in total. Teaching methods: lecture, heuristic method, work with professional text and information sources.	
Number of credits: 4	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: 50% of the interim evaluation + 50% of the final evaluation The interim assessment includes an interim test (30 points) and a seminar paper on the assigned topic and Power Point presentation (20 points). The final assessment will consist of a final exam in the form of a written test (50 points). For successful completion of the course, it is necessary to obtain a minimum of 60% of the points. The grade is awarded on a scale: A (100-94%, excellent - outstanding), B (93-86%, very good - above average standard), C (85-76%, good - normal reliable work), D (75-68%, satisfactory - acceptable results), E (67-60%, satisfactory - results meet minimum criteria), Fx (59-0%, inadequate - additional work required. For a grade of A, students need to perform outstandingly well continuously throughout the semester and be capable of independent study. Students are able to navigate through a patchwork of different literary sources, select relevant sources for their study, are able to understand the anatomy and physiology of the nervous system, and are able to use their knowledge to compare the functions of different parts of the brain and cerebral cortex.	

A grade of B means that students have performed above average throughout the semester, have been able to study independently, have mastered basic information regarding the anatomy and physiology of the nervous system, and are able to navigate the literature study correctly.
A grade of C means that students performed well throughout the semester, their theoretical knowledge of anatomy and physiology of the nervous system is at a good level, but they lack the ability to apply this knowledge correctly, to critically evaluate and compare literature sources.
A grade of D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to anatomy and physiology of the nervous system. They have considerable difficulties in working independently, they cannot critically analyse information on their own.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge correctly, but have mastered most of the necessary theoretical knowledge from the course.
A grade of Fx indicates that the student needs extra study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim evaluation + 50% of the final evaluation.

Learning outcomes:
The aim of the course is to be familiar with the anatomy and physiology of the nervous system and to know the functions of the nervous system (in general) and the individual parts of the brain. By completing the course, the student will learn basic anatomical and physiological terminology. The student will acquire knowledge of the structure, functions of the nervous system (in general), individual parts of the brain, cerebral cortex, central and peripheral nervous system. Acquire basic information about the structure and functional manifestations of neurons and nervous tissue. The knowledge will be the basis for the study of related psychological disciplines.

Class syllabus:
Course outcomes of subject (content):
1. Introduction to the study: functional systems of the human brain, CNS and PNS, nervous excitement.
2. Nervous tissue. Neuron. Synapse. Mechanisms and modes of signalling in neurons and in the nervous
system.
3. Spinal cord. Extended spinal cord.
4. Brain. Midbrain. Forebrain.
5. Hind brain. Cerebellum. Bridge.
6. Nerves. Cranial nerves. Spinal nerves. Vegetative nerves.
7. Pyramidal pathway.
8. Cerebral cortex. Neurons of the cerebral cortex.
9. Sympathetic and parasympathetic functions.
10. Reflexes and instincts.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KP/B-VUZde008/22	Bachelor thesis seminar

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The student's task is to solve the assignments given continuously during the semester and to hand in the final thesis project at the end of the midterm evaluation. The student actively participates in presenting and discussing solutions to the interim assignments in seminars, for which he/she receives points (20%). The solution of each interim assignment that is handed in on the due date is evaluated with points (40%). The student receives points (40%) for the final thesis project at the end of the interim assessment. All points will be added together at the end of the interim assessment.
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results), the student actively works on continuous assignments, participates in the presentation and discussion of the assignments in seminars. Reflects both critically and creatively on interim assignments. He/she is able to produce a final thesis project at an excellent level.
B (90-81%, very good - above average standard), the student actively works adequately on the continuous assignments, participates in the presentation and discussion of the given assignments in seminars. He/she reflects adequately on the intermediate assignments and is able to produce a final thesis project at a very good level.
C (80-73%, good - normal reliable work), the student has performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge. The final thesis project is done at a good level.
D (72-66%, satisfactory - acceptable results), the student was less prepared during the semester, has slight deficiencies in theoretical knowledge. Cannot critically analyze information. He/she prepared the final thesis project at a satisfactory level.
E (66-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge. Intermediate tasks meet the minimum criteria, as well as the development of the final thesis project.

Fx (59-0%, insufficient - extra work required).

Learning outcomes:

Learning outcomes:
Learning objectives and outcomes and transferable competences:
The aim of the course is to familiarize students theoretically and practically with the principles and procedures that need to be mastered for the successful preparation of a bachelor's thesis.
The student is able to define the topic of his/her own bachelor thesis, is able to correctly determine the methods of its processing, acquires the ability to work selectively and correctly with the professional literature on the chosen topic. He/she knows the individual parts of the final thesis. Is able to prepare and present the results of the thesis and is able to respond to questions on the thesis in discussion.

Class syllabus:

Brief outline of the course:
Types of bachelor theses. The timetable of thesis processing. Definition of the topic and goal of the thesis. Study of literature. Excerpting of material. Theoretical and methodological conception of the thesis. Methodology of problem processing. Methodology of elaboration of the thesis. Formal-compositional requisites of the final thesis. How to prepare for the defence of the thesis.

STATE EXAM DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZšt011/15	**Course title:** Bachelor's thesis defence
Number of credits: 12	
Educational level: I.	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The state examination of the defence of the thesis, its conditions and procedural aspects are regulated by the Internal Regulation No.1/2020 Study Regulations of the Faculty of Arts of Charles University, as well as by the Internal Regulation No. 5/2021 Study Regulations of the Charles University.

A student may take the state examination a) after obtaining at least such number of credits that after obtaining credits for successful completion of the last state examination he/she achieves the necessary number of credits for proper completion of studies and b) after successful completion of compulsory courses, compulsory elective courses and elective courses in the composition determined by the study programme except for the state examination and c) no disciplinary proceedings are conducted against him/her.

In the bachelor's degree, the student receives 12 credits for the successful defence of the bachelor's thesis (credits included in the UZ study plan).

According to the VP 23/2021 Internal Quality Assurance System for Higher Education of the Charles University in Bratislava, the student is evaluated in particular:

- Demonstration of the student's ability to collect and interpret relevant data (facts), usually within the field of study in which the student has completed the programme of study, with the possibility of interdisciplinary overlap into other fields if necessary;
- Demonstrate the ability to make informed decisions that also take into account social, scientific and ethical considerations;
- Ability to communicate information, concepts, problems and solutions to both professional and lay audiences.
- the ability to think and work creatively in the field of study in which they have completed their degree programme.
- knowledge and understanding of the problem/issue addressed.
- Applying their skills in collecting, interpreting and processing basic literature, which may include its application in practice, or solving a sub-task related to the student's future field of study/ assignment.

The rating is awarded on a scale:

A 100 - 91% (excellent - outstanding results),
B 90 - 81% (very good - above average standard),
C 80 - 73% (good - normal reliable operation),
D 72 - 66% (satisfactory - acceptable results),
E 65 - 60% (sufficient - results meet minimum criteria),
Fx 59% or less (insufficient).

A student is evaluated with the FX grade if he/she has fulfilled the requirements for the grade only at a level not exceeding 60% of the total highest possible level of fulfilment of the requirements for the completion of the subject of the state examination - the defence of the bachelor thesis. In the same way, a student shall be assessed with an FX grade if he/she has submitted a thesis in violation of paragraph 7 of Article 56 of the UK Internal Regulation 23/2021 or has submitted a thesis that does not substantially meet the requirements under paragraph 1(d), paragraph 2(d) or paragraph 3(d) of Article 56 of the UK Internal Regulation 23/2021 Internal Quality Assurance System for Higher Education at the University of Bratislava.
The details and specifications of the requirements of the final theses for the individual teacher study programmes in combination (approbation) will be specified in the respective Study Programme Descriptions.

Learning outcomes:

Learning outcomes:
The learning outcome is in accordance with the Long-Term Plan of the Charles University/PdF, the mission and strategic goals of the Charles University/PdF, in accordance with the description of the field of study, in accordance with the NKR/SKR/DD, in accordance with the profile of the graduate, in accordance with the learning objectives and learning outcomes in the individual subjects of the study programme curriculum, and other relevant documents.
The student is able to demonstrate his/her ability to work creatively in the field of study in which he/she has completed the study programme when conceiving his/her bachelor thesis. The student is able to demonstrate adequate knowledge of the subject matter and to apply his/her skills in collecting, interpreting and processing the basic literature, or its application in practice, or is able to solve a sub-task related to the focus of the student's bachelor's thesis.

Class syllabus:

Brief outline of the course:
1. Contribution of the thesis to the field of study. The evaluation of the bachelor thesis assesses whether the student has adequately demonstrated the ability to work creatively in the field of study in which he/she has completed the study programme, reflects the degree of demonstration of knowledge and knowledge of the issue, assesses the skills applied in collecting, interpreting and processing the basic literature, or the extent to which the student has mastered the application of theoretical assumptions in practice or how he/she is able to solve a subtask that is related to the focus of the student's bachelor thesis;
2. Originality of the thesis (the thesis must not be plagiarized, must not infringe the copyrights of other authors), the documentation for the defence of the thesis as a subject of the state examination includes originality protocols: from the Central Register and Theses, the results of which are commented on by the supervisor and the opponent in their opinions;
3. Correctness and correctness of citation of used information sources, research results of other authors and author teams, correctness of description of methods and working procedures of other authors or author teams;
4. Compliance of the structure of the thesis with the prescribed structure defined by the Internal Regulation No. 2/2018 Directive of the Rector of Charles University in Bratislava;
5. Respecting the recommended scope of the final thesis (the recommended scope of a bachelor's thesis is usually 30 - 40 standard pages - 54 000 to 72 000 characters including spaces), the adequacy of the scope of the thesis is assessed by the supervisor of the thesis;
6. Linguistic and stylistic level of the work and formal editing;
7. The manner and form of defending the thesis and the student's ability to respond adequately to the comments and questions in the supervisor's and opponent's evaluations.

8. In the study programme focused on the teaching of art-educational subjects, the presentation of artistic outputs and performances may be part of the final thesis and its defence.

State exam syllabus:

Recommended literature:
Recommended reading:
according to the focus of the bachelor thesis topic

Languages necessary to complete the course:
Slovak language, in the case of language approbations also the language of the respective subject approbation

Notes:
Examination committee approved by the Scientific Council of PdF UK. State examination: the defence of the bachelor thesis is carried out only from one approbation. Credits are counted towards "UZ".

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KH/B-HISde007/22	**Course title:** Basics of Modern Didactics of History#Teaching
Educational activities: **Type of activities:** lecture + seminar **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Type, volume, methods and workload of the student - additional information 1-hour lecture + 1-hour seminar/week; 22 hours total per semester, combined; (primarily full-time) Student workload: 2PS (3 credits): 11 x 2 hours of direct instruction = 22 hours; 48 hours of portfolio development and reflection on lecture topics; 15 hours of preparation for midterm discussion; 15 hours of practice for the final colloquium. Total 90 hours of student work. Educational methods: E-U-R (evocation-awareness-reflection); analysis of texts, iconic texts, and educational materials; explanation; discussion/colloquium on the subject; problem-solving on the theoretical and practical level of school history; evaluation by SWOT analysis	
Number of credits: 3	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Course requirements: 100% of the continuous verbal and written assessment. During the semester, the student analyses, reflects and elaborates in writing the content of the lectured and discussed topics and formulates his/her solutions to the presented problems (applies the E-U-R method). Students are evaluated continuously by discussion/colloquium and defence of written reflection on the lectured topics. SWOT analysis is applied in the overall assessment. The quality of the student outcomes is assessed by SWOT analysis. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D and a minimum of 60 points for a grade of E. Credit will not be awarded to students who score less than 15 points on any of the four written examinations. A score of at least 60% is required to pass the course. The grade is awarded on a scale: A (100-91%, excellent - excellent results, the student has a broad, compact knowledge in the specialised field of the discipline and can apply it in theoretical and practical contexts, is oriented in the current state of knowledge of borderline scientific disciplines, thinks conceptually, can actively acquire information and creatively apply it in solving problems, actively expands his knowledge and critically reviews it and considers the suitability of its application for pedagogical and historical practice), B (90-81%, very good - above average standard, the student is oriented in the issue, knows it, can independently acquire new knowledge, and solve professional tasks, but his critical, constructive	

thinking is borderline when analysing and assessing the planes of normative and reflective didactics),
C (80-73%, good - normal reliable work, although the student can orient himself in the problem, independently search and analyse information, can learn, but he cannot think critically and constructively enough, evaluate the issues solved, and apply the acquired knowledge creatively and conceptually in broader theoretical and practical contexts),
D (72-66%, satisfactory - acceptable results, the student is able to orientate himself in the problem at a basic level, his knowledge is fragmented and incomplete, and at a lower level of satisfaction, he also applies transferable understanding of the field and related disciplines, in the area of factual, conceptual, procedural and metacognitive knowledge he shows more serious deficiencies),
E (65-60%, sufficient - the results meet the minimum criteria, the student is able to orient himself in the problem only with great difficulty, he knows only the most basic knowledge, he does not demonstrate the ability to think critically and does not apply the acquired knowledge in a systematic way to the solution of practical tasks),
Fx (59-0%, insufficient - additional work is required, the student is unable to orient himself/herself in the problem, does not master the most basic knowledge, does not demonstrate the ability to argue and think critically)

Learning outcomes:
The student will gain theoretical knowledge of modern didactics of history, European trends, and recommendations for contemporary history by completing the course. The student will gain an overview of the modernisation of history teaching in Slovakia and the functionality of the didactic system of history. Analyse partial problems of modern history didactics and the results of empirical research in contemporary school practice. He is also oriented in the creation of teaching media and the process of critical assessment of educational materials and programmes.

Class syllabus:
Students will become familiar with selected problems of modern didactics of History Teaching, identify the requirements placed on teacher education and gain knowledge about the application of methods and strategies recommended for teaching and learning pupils in primary and secondary schools. They will gain an overview of the modernisation of history teaching in Slovakia and the requirements for the functionality of the didactic system in educational practice.
The content focus of the course concentrates on the following key topics:
- Basic concepts of didactics: "modern" didactics of History Teaching, methodology, historical consciousness, historical culture, historical knowledge, historical education, historical awareness, historical memory, functional literacy, and the functionality of factuality.
- The relationship between historical science and history, their interconnectedness and autonomous position, popularisation of historical knowledge, and specifics of the work of historians and history teachers.
- Designing (conceptualisation) history as a school subject, visions and perspectives, requirements, and recommendations of RE and expert commissions for teaching history in the 21st century, updating the selection of history curriculum in the educational field: Human and society.
- Didactic system, its components and functionality. The formula of functioning of the didactic system in History Teaching.
- The role of History Teaching Didactics in contemporary modern teaching, application of the three essential functions of history.
- Goals and tasks of history. Taxonomies of goals and tasks, "operationalisation" of objectives in contemporary history teaching and learning. What is the theory, and what is practice?
- The processual aspect of history teaching, conclusions of empirical research on the state of school history practice.

- Modern (activating) methods and techniques of teaching and learning, the importance of "neurodidactics" in the educational process.
- Diversity of educational media and their functionality in history education, history textbooks as the most widespread type of historical literature, functions, and practical applicability of their structural components.
- History in a more entertaining form (didactic games, comics, cartoons, collages, graphic schemes, etc.).

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde029/22	Basics of psychiatry

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
2 hours seminar/week; 22 hours total per semester, combined (mostly attendance)
Student workload:
11 x 2 hours of direct teaching = 22 hours; preparation of seminar paper and presentation (18 hours), preparation for the mid-term test (20 hours). 60 hours in total.
Teaching methods:
active group work, heuristic method, case study, work with professional text and information sources.

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde008/22 - Personality psychology

Recommended prerequisites:
B-PSYde008 Personality psychology

Course requirements:
100% of the interim evaluation
Interim assessment (100%) includes the creation and presentation of a seminar paper in PowerPoint (60% of the assessment) and a midterm exam (40%).
For successful completion of the course, it is necessary to obtain a minimum of 60% of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, students need to perform outstandingly well continuously throughout the semester and be capable of independent study. Students are able to navigate through a patchwork of different literary sources, select relevant sources for their study, are able to understand the theoretical foundations of psychiatry.
A grade of B means that students have performed above average throughout the semester, have been able to study independently, have mastered basic information regarding the manifestations of mental disorders, and are able to navigate the literature correctly.

A grade of C means that students performed well throughout the semester, their theoretical knowledge of psychiatry is at a good level, but they lack the ability to apply this knowledge correctly, to critically evaluate and compare literature sources.
A grade of D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to psychiatry. They have considerable difficulties in working independently, they cannot critically analyse information on their own.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge correctly, but have mastered most of the necessary theoretical knowledge from the course.
A grade of Fx indicates that the student needs extra study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is to learn the theoretical foundations of psychiatry and to gain a basic overview of the manifestations of mental disorders.
Upon completion of the course, the student will master the basic concepts of psychiatry. The student will gain a basic overview and information about the classification of mental disorders, treatment methods used in psychiatry.
After completing the course, students must:
grasp:
- the theoretical foundations of psychiatry
- the basic directions of psychiatry
- the basic methods of psychiatry
understand:
- key concepts of psychiatry
- the epidemiology, aetiology and pathogenesis of mental disorders
- the structure of psychopathological syndromes in adults and children
be able to:
- work with knowledge in the field of psychiatry
- critically analyse psychopathological clinical manifestations in adults and children
- apply knowledge in practice.

Class syllabus:
1. Introduction to the study of psychiatry: the subject, roles, directions and history of psychiatry.
2. Epidemiology, aetiology and pathogenesis of mental disorders. The biopsychosocial model.
3. Classification of mental disorders. Classification systems ICD-10, DSM-V.
4. Syndromology: psychopathological symptom, syndrome, nosological diagnosis.
5. Psychopathology: disorders of perception, thinking, attention, intellect, emotionality, instincts, consciousness.
6. Psychotic disorders: epidemiology, causes, classification, clinical manifestations. Schizophrenia: clinical forms, courses and manifestations.
7. Affective disorders: epidemiology, aetiology, classification, clinical manifestations.
8. Organic psychiatric disorders. Epilepsy: clinical forms, courses and manifestations.
9. Personality disorders: epidemiology, causes, classification, clinical manifestations.
10. Anxiety disorders: epidemiology, aetiology, classification, clinical manifestations.
11. Substance and non-substance addictions. Alcoholism: epidemiology, clinical forms and manifestations.
12. Sexual pathology. Sexual dysfunctions. Sexual deviations (paraphilias).
13. Child psychiatry. Disorders characteristic of children.
14. Overview of therapeutic methods used in psychiatry.

15. Organisation of psychiatric care in Slovakia.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde020/22	Basics of sociology

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar per week, total 22 hours per semester, combined form (primarily full-time)
Student workload:
11 x 2 hours of direct teaching = 22 hours, preparation for midterm test 15 hours, preparation of midterm assignments 23 hours, total 60 hours
Teaching methods:
lecture combined with discussion, work with professional text, guided self-study (e-learning, solving tasks and assignments).

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% of continuous assessment.
Intermediate assessment includes: 2x midterm test (50%) and completion of assignments (50%). Students will use an e-learning environment for their studies. A minimum of 60% of the course grade is required for successful completion of the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).
A grade of A will be awarded if students have performed excellently, their theoretical knowledge of the foundations of sociology is at an excellent level, they have a standard ability to apply knowledge, critically evaluate and compare literary sources in sociology, and they hand in continuous assignments on time.
A grade of B is awarded if students perform very well, their theoretical knowledge of the foundations of sociology is at a very good level, they have a good ability to apply knowledge, critically evaluate and compare literary sources at a very good level, and they usually hand in intermediate assignments on time.

A grade of C will be awarded to students who perform at an average standard, their theoretical knowledge of the foundations of sociology is at a good level, but they lack the ability to apply this knowledge, critically evaluate and compare literary sources and knowledge of sociology.
A grade of D will be given if students were less prepared during the semester, turning in midterm assignments after the assignment due date. They are slightly deficient in basic sociology theory. They cannot process information analytically.
A grade of E will be given to students who were less prepared during the semester, turning in assignments after the assignment due date. They have major deficiencies in the theory of the foundations of sociology, cannot process information analytically and critically.
A grade of Fx requires extra work and study.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The aim of the education is to provide students with a basic overview of the sociological view of society, its structure and changes. Students will be introduced to the subject and focus of sociology and to the foundations of sociological cognition, the key concepts of sociology. They will be able to identify social inequalities in society, issues of people and society, social change and the structure of society. They can navigate research reports, statistical concepts and tables of sociological research.

Class syllabus:
Course outcomes of subject (content):
1. Sociological imagination.
2. The individual and the social world in which he/she lives and which he/she shapes.
3. Basic theoretical approaches and theoretical dilemmas in sociology.
4. Types of societies. Culture. Socialization. Social control.
5. Social interactions and social groups.
6. Social inequalities and stratification of society.
7. Institutions (family, school, media).
8. Social change.
9. Transformation of society and social problems.
10. Methods of sociological research.

Recommended literature:
Compulsory/Recommended readings:

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde026/22	Basics of speech therapy

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week; total of 22 hours per semester, combined form (primarily full-time
Student workload:
22 hours of teaching, 14 hours of preparation of seminar papers, 16 hours of preparation for the knowledge test. Total 50 hours of student work.
Teaching methods: Teaching with a continuous application of the theoretical knowledge on practical examples and video demonstrations followed by a discussion on the topic, graphic processing of the studied subject.

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
During the term, the student will prepare Seminar paper 1 (preparation of a leaflet on one NKS, 20%), Seminar paper 2 (study preparation, 20%) and pass a knowledge test (60%). To pass the knowledge test, a minimum of 60% of the score is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, marginal performance - results fulfil the minimum criteria),
Fx (59-0%, inadequate - additional work required).
A mark is achieved if the student correctly and actively reflects critically and creatively on speech therapy concepts, including its meaningful integration with knowledge from psychology.
B mark is achieved if the student reflects appropriately both critically and creatively on speech therapy concepts, including its meaningful integration with knowledge from psychology.
For a C mark, the student reflects more or less critically on speech therapy concepts and knows the interdisciplinary context.
For a D mark, the student reflects critically on speech therapy concepts to a limited extent, is moderately critical, and has a partial understanding of interdisciplinary contexts.

E mark will be given if the student meets the minimum criteria, reflects only to a limited extent on speech therapy concepts, and interdisciplinary connections are insufficient.
Fx mark indicates that the student needs further study in the subject matter and additional work is required.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The aim of the course is to acquire the basic theoretical knowledge concerning the different types of impaired communication skills and the basic terminological apparatus.
The student will acquire basic information in the field of speech therapy as a discipline and profession. The student will learn the basic terminology of speech therapy. Upon successful completion, the student will have an overview of the processes in speech production and comprehension, become familiar with the stages in speech development, and gain information about the aetiology, classification, and symptomatology of the most common types of impaired communicative ability in both child and adult speech therapy patients. The acquired knowledge is crucial for effective cooperation between psychologists and speech therapists in practice.

Class syllabus:
1. Speech therapy as a discipline and profession
2. Impaired communication ability
3. Speech development in early childhood, preschool and younger school age
4. Specifics of speech development in bilingual population
5. Developmental language disorder
6. Articulatory and phonological disorder
7. Dyslexia (specific learning disability)
8. Fluency disorders (stuttering and babbling)
9. Voice disorders
10. Disorders of motor speech production
11. Acquired disorders of speech production and comprehension (aphasia, cognitive-communication deficits)

Recommended literature:

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZde029/22	**Course title:** Basics of the first aid
Educational activities: **Type of activities:** practicals **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Number of credits: 2	
Recommended semester: 2., 4., 6.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisites for successful completion of the course:
The course is completed by assessment, 100% of the interim assessment:
(a) a continuous written assessment with a maximum of 80 points aimed at testing knowledge and understanding of general first aid principles as well as basic first aid principles for life-threatening conditions (cessation of breathing, blood circulation), serious injuries (bleeding, burning, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices) and minor injuries
(b) by developing an activity on the chosen first aid topic in the form of a simulation of the health problem mentioned above as well as an active performance of a drill on the basic principles of first aid with a maximum of 20 points.
A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. Credit will not be awarded to a student who scores less than 40 points on the written midterm and fails to prepare for the activity. A minimum score of 60% is required to pass the course.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results), excellent performance, the student has excellent knowledge of theoretical knowledge of medical procedures in cases of health threat, can simulate a case of health threat based on the theoretical knowledge and solve the situation when providing first aid in practice
B (90-81%, very good - above average standard), excellent performance, the student knows the theoretical knowledge of medical procedures in cases of health threat very well, can simulate a case of health threat only partially on the basis of the theoretical knowledge, but can deal with the situation when providing first aid in practice
C (80-73%, good - normal reliable work), good performance, although the student has a good knowledge of theoretical knowledge of medical procedures in cases of health hazards, but cannot simulate a case of a health hazard on their basis, but can partially solve the situation when providing first aid in practice

D (72-66%, satisfactory - acceptable results), satisfactory performance, the student partially knows the theoretical knowledge of health procedures in cases of health threats, but is unable to simulate a case of a health threat and is only partially able to apply the theory to practice
E (65-60%, sufficient - results meet the minimum criteria), satisfactory performance, the student has only minimal knowledge of the theoretical knowledge of health procedures in cases of health threats, is unable to simulate a case of a health threat and is able to apply the theory to practice only partially
Fx (59-0%, insufficient - extra work required), insufficient performance, student does not have sufficient knowledge of basic health procedures in health emergencies, nor is he/she able to simulate a health emergency and apply the theory to practice
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes and transferable competences:
The aim of the course is to teach students the basics of first aid, cardiopulmonary resuscitation, as well as the management of serious medical conditions. Upon completion of the course, the student will gain theoretical knowledge of medical procedures in cases of health threats to children and adolescents. At the same time, the student will strengthen his/her communication and organizational skills in dealing with serious health emergencies through simulated situations.

Class syllabus:
Brief outline of the course:
1. General principles of first aid (the student acquires basic knowledge and knowledge of the general principles of first aid, can recognize basic first aid from rapid medical and technical assistance, can assess the situation without endangering his/her own life, assess the health condition of the affected - the severity and extent, take urgent measures to save life and knows the correct procedure for calling the ambulance service)
2. Positioning and displacement. (the student is familiarized with the basic positions in providing first aid and possible methods of removal, so that the health of the affected person does not further endanger)
3. First aid for life-threatening conditions (respiratory arrest, circulatory arrest) (the student will be able to recognize the signs of respiratory arrest and circulatory arrest and subsequently provide cardiopulmonary resuscitation in both adults and children in the correct way).
4. First aid for serious injuries (bleeding, burns, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices). (the student is able to recognise the risks to health in different degrees of bleeding, burning, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices, to administer appropriate basic first aid in relation to the extent of the injury and consequently to recognise the signs of shock and to provide the correct anti-shock measures)
5. First aid for minor injuries (the student can recognise minor injuries and provide appropriate first aid)

PdF.KPg/B-VUZde031/22	Child biological development and school hygiene

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 1., 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The subject is finished:
(a) a continuous written assessment with a maximum score of 80 points aimed at reviewing knowledge and knowledge of the child's developmental characteristics and the factors that affect the child's biological physiological development and which may be the causes of pathological growth and at the same time the consequences of a lower level of the child's ability to cope with the educational process of school education; reviewing the knowledge and use of methods that assess and diagnose physiologically healthy , resp. pathological biological growth and development of the child and, ultimately, on the issue of prevention and protection of the child's health in all its components of the bio-psycho-social nature of the child's development
b) by developing protocols for the assessment and diagnosis of biological development with a maximum score of 20 points as a form of the ability to apply theoretical knowledge about physiologically healthy or pathological biological development of the child to pedagogical practice
A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E.
Credit will not be awarded to a student who scores less than 40 points on the written midterm review and fails to complete a protocol for assessing and diagnosing the child's biological development. A minimum score of 60% is required to pass the course.
The rating is awarded on a scale:
A (100-91%, proficient - outstanding), excellent performance, the student has an excellent command of the knowledge of physiologically healthy biological development of the child and has an excellent understanding of the environmental factors that cause pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critically assesses the adequacy of the demands of the educational process on the physical and psychological performance of the child, the student can apply the methods of assessment and

diagnosis of biological development on practical examples and can apply them in the education and training of children
B (90-81%, very good - above average standard), excellent performance, the student has a very good command of the knowledge of the physiologically healthy biological development of the child, knows very well which of the environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is borderline, but the student can apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children
C (80-73%, good - normal reliable work), good performance, although the student has a good command of the knowledge of the physiologically healthy biological development of the child, he/she knows well which environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the area of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is absent, but can partially apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children
D (72-66%, Satisfactory-Acceptable performance), Satisfactory performance, the student partially knows the knowledge of physiologically healthy biological development of the child and partially knows which environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the child's physical and psychological performance is absent but he/she is able to apply the methods of evaluation and diagnosis of biological development in the form of practical examples and apply them in the education of children only partially
E (65-60%, satisfactory - results meet minimum criteria), satisfactory performance, the student has only minimal knowledge of the physiologically healthy biological development of the child, and similarly minimal knowledge of the environmental factors that cause pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the child's physical and psychological performance is absent, and is able to apply methods of evaluation and diagnosis of biological development in the form of practical examples and apply them in the education and training of children only partially
Fx (59-0%, insufficient - extra work required), inadequate performance, student does not sufficiently master the basic knowledge of physiologically healthy biological development of the child, at the same time does not sufficiently know which of the environmental factors are the causes of the emergence of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, is neither able to critically evaluate the adequacy of the demands of the educational process on the child's physical and psychological performance, nor is he or she able to apply methods of assessing and diagnosing biological development in the form of practical examples and apply them in the education and training of children

Learning outcomes:
Learning outcomes:
Learning objectives and outcomes and transferable competences:
Upon completion of the course, students should have knowledge and understanding of the biological laws of growth and development and the factors that determine them. They will acquire knowledge of the bio-psycho-social integration of the human organism. Understand the spatio-temporal sequence and interdependence of changes in the structure and function of the human organism.

They will become familiar with critical developmental periods and risk factors interfering with physiological growth and development. They will understand the principles of regulation and adaptation of the organism in the context of environmental influences. At the same time, students will strengthen their mathematical skills and analytical abilities in the development of protocols for the assessment of child biological development. Ultimately, the course will provide students with the ability to evaluate the appropriateness of the demands of the educational process on a child's physical and psychological performance in relation to the child's level of biological maturation

Class syllabus:

Brief outline of the course:

1.Defining ontogeny. Progressive and regressive changes with age. Biological explanation of the concepts of growth and development. The laws of growth and development. Typical and atypical growth and development. (The student can distinguish between physiologically healthy and pathological biological development of a child for the purpose of applying knowledge in the education of children, in the form of effective collaboration with special educators, psychologists, and other practitioners)

2.Factors determining growth and development: genetic, neurohormonal, environmental factors. Genetic factors: heredity, mutations - gene, chromosomal aberrations. Mutagens and teratogens. Mutations. Chromosomal aberrations. (The student knows and understands the endogenous endogenous environmental factors that determine the hereditary predisposition of the child to cope with the demands of the educational process on the psychological and physical load of the organism)

3.Environmental factors. Definition of environment, external, internal environment. Neurohormonal regulation. Importance of neural and hormonal regulation as a mechanism of biological adaptation. Determination of growth and developmental processes by environmental factors. Nutrition. Maternal factors. Climatic and geographical factors. Socio-economic level. Morbidity. (The student knows which of the factors act on the biological development of the child and which may be the consequences of the child's lower ability to cope with the educational process of the student's schooling)

4.Ontogenetic development. The division of ontogeny: the biological definition of the different periods. Prenatal, perinatal, postnatal periods. Prenatal period -formation and development of the embryo (gestation), importance of the placenta. Environmental risk factors threatening prenatal development. Perinatal period. Childbirth, newborn at risk. Postnatal period- characteristics of the neonatal, infant, toddler, preschool, junior and senior school age periods in terms of somatic changes (growth, motor development) and risks of developmental disruption. Brief overview of anatomy and physiology of organ systems. (the student distinguishes the age-specific characteristics of the individual systems in the different periods of ontogenesis and is able to use and apply these characteristics in the practice of school education)

5.Methods of assessment of physical growth and development, determination of biological maturity. Adequacy of the demands of the educational process on the child's physical and psychological performance - Biological rhythms. Dynamic stereotype. Fatigue and resumption of work activity. (The student can diagnose the level of development of children of preschool and younger school age, critically evaluate the adequacy of the demands of the educational process on the physical and psychological performance of the child and on the basis of the diagnosis to design and implement an appropriate intervention)

6.Pathologically altered growth and development. Prevention of disorders of somatic development - primary, secondary, tertiary. (the student knows how to prevent pathologically altered growth and development in its beginnings, and knows the basics of prevention and protection of the child's health in all components of the bio-psycho-social nature of the child's development)

7. Principles of the organisation of teaching in terms of physical and mental hygiene. Hygiene of the school environment and conditions for educational activities of pupils. (the student knows the

basic principles of the organisation of teaching and the correct hygiene of the school environment in terms of the physical and mental hygiene of the pupil)

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZde031/22	**Course title:** Child biological development and school hygiene
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Number of credits: 3	
Recommended semester: 2., 4., 6.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The course is completed by assessment (100% of the interim assessment).

The subject is finished:

(a) a continuous written assessment with a maximum score of 80 points aimed at reviewing knowledge and knowledge of the child's developmental characteristics and the factors that affect the child's biological physiological development and which may be the causes of pathological growth and at the same time the consequences of a lower level of the child's ability to cope with the educational process of school education; reviewing the knowledge and use of methods that assess and diagnose physiologically healthy , resp. pathological biological growth and development of the child and, ultimately, on the issue of prevention and protection of the child's health in all its components of the bio-psycho-social nature of the child's development

b) by developing protocols for the assessment and diagnosis of biological development with a maximum score of 20 points as a form of the ability to apply theoretical knowledge about physiologically healthy or pathological biological development of the child to pedagogical practice

A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E.

Credit will not be awarded to a student who scores less than 40 points on the written midterm review and fails to complete a protocol for assessing and diagnosing the child's biological development. A minimum score of 60% is required to pass the course.

The rating is awarded on a scale:

A (100-91%, proficient - outstanding), excellent performance, the student has an excellent command of the knowledge of physiologically healthy biological development of the child and has an excellent understanding of the environmental factors that cause pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critically assesses the adequacy of the demands of the educational process on the physical and psychological performance of the child, the student can apply the methods of assessment and

diagnosis of biological development on practical examples and can apply them in the education and training of children
B (90-81%, very good - above average standard), excellent performance, the student has a very good command of the knowledge of the physiologically healthy biological development of the child, knows very well which of the environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is borderline, but the student can apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children
C (80-73%, good - normal reliable work), good performance, although the student has a good command of the knowledge of the physiologically healthy biological development of the child, he/she knows well which environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the area of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is absent, but can partially apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde005/22	Communication in education

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2., 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course: 100% pass mark.
Assessment: consists of 2 intermediate assessments (40+60, total 100 points).
Interim assessment 1: consists of the preparation of a term paper and its oral presentation or practical application in class. This is a prepared micro-performance (alone or in pairs).
Semester work for interim assessment 1: consists of a creative assignment for 40b (20+20). This includes preparation of an oral micro-presentation for 10-15 minutes and feedback (20b) and preparation of a visual presentation in a graphics program (20b).
Intermediate assessment 2: consists of a review of the knowledge acquired, i.e. a test for 60p. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
For a grade of D at least 66 points. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.
At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes:
By completing the Communication in education course, the student should:
- Be able to compare student-centered and teacher-centered approaches in communication,
- be able to justify the choice and appropriateness of the communication approaches used in teaching,
- be able to create a presentation with high quality content and visually interesting,
- be able to apply theoretical knowledge in the creation of oral micro output,
- be able to present a micro performance in front of a group and be able to give or receive feedback,
- be able to argue correctly and be able to make a factually correct argument,
- understand the importance of selection and analysis of information and information sources,
- know methods for Developing of critical thinking,
- acquire presentation and communication skills and be able to apply them in practical tasks.

Transferable competences: the student strengthens soft skills such as communication skills through creative tasks in the course, furthermore analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and through their application in discussion, strengthens interpersonal skills within the group - activation and taking initiative and responsibility.

Class syllabus:
Brief outline of the course:
The aim of the course is the practical use of theoretical knowledge about effective communication in the educational process through training and micro-performances. The course is designed to prepare students for the future teaching profession in the field of critical and independent thinking, communication and rhetorical skills, collaboration, creative activity, self-assessment, feedback, etc. Using various activating methods and problem-based tasks, students will actively participate in the teaching and create the content of the course themselves, in which they will use their own potential and develop the inter and intra personal aspects of their own personality.
Topics:
Communication in education in theory - definition of communication, types of communication, information theory and its components. Communication in education - its functions, levels, basic rules, organizational forms. Interaction styles of the teacher. Extralinguistic means of communication, paralinguistic aspects of speech. Verbal communication - monologue, dialogue,

conversation, questioning, argumentation. Organizational forms and space in communication. Types of teaching according to the number of participants. Classroom layout.
Communication in education in practice - teachers' inappropriate approaches in Communication in education. Appropriate communication approaches and strategies in teacher work - learner centred approach, humanism, non-directivity. Presentation - structure and arrangement of speech/speech/ lecture. Selection and appropriateness of information within an oral presentation. Analysis of speakers. Visualisation and arousal of interest. Organisation of time. Argumentation - composition of argument, types of argument. Logic and errors in argumentation. Types of interviews. Debate - how to conduct a conversation, the structure of a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection, giving and receiving criticism. Critical thinking and methods to develop critical thinking.

Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
For a grade of D at least 66 points. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.
At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes:
By completing the Communication in education course, the student should:
- Be able to compare student-centered and teacher-centered approaches in communication,
- be able to justify the choice and appropriateness of the communication approaches used in teaching,
- be able to create a presentation with high quality content and visually interesting,
- be able to apply theoretical knowledge in the creation of oral micro output,
- be able to present a micro performance in front of a group and be able to give or receive feedback,
- be able to argue correctly and be able to make a factually correct argument,
- understand the importance of selection and analysis of information and information sources,
- know methods for Developing of critical thinking,
- acquire presentation and communication skills and be able to apply them in practical tasks.

Transferable competences: the student strengthens soft skills such as communication skills through creative tasks in the course, furthermore analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and through their application in discussion, strengthens interpersonal skills within the group - activation and taking initiative and responsibility.

Class syllabus:
Brief outline of the course:
The aim of the course is the practical use of theoretical knowledge about effective communication in the educational process through training and micro-performances. The course is designed to prepare students for the future teaching profession in the field of critical and independent thinking, communication and rhetorical skills, collaboration, creative activity, self-assessment, feedback, etc. Using various activating methods and problem-based tasks, students will actively participate in the teaching and create the content of the course themselves, in which they will use their own potential and develop the inter and intra personal aspects of their own personality.
Topics:
Communication in education in theory - definition of communication, types of communication, information theory and its components. Communication in education - its functions, levels, basic rules, organizational forms. Interaction styles of the teacher. Extralinguistic means of communication, paralinguistic aspects of speech. Verbal communication - monologue, dialogue,

conversation, questioning, argumentation. Organizational forms and space in communication. Types of teaching according to the number of participants. Classroom layout.
Communication in education in practice - teachers' inappropriate approaches in Communication in education. Appropriate communication approaches and strategies in teacher work - learner centred approach, humanism, non-directivity. Presentation - structure and arrangement of speech/speech/ lecture. Selection and appropriateness of information within an oral presentation. Analysis of speakers. Visualisation and arousal of interest. Organisation of time. Argumentation - composition of argument, types of argument. Logic and errors in argumentation. Types of interviews. Debate - how to conduct a conversation, the structure of a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection, giving and receiving criticism. Critical thinking and methods to develop critical thinking.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZde035/22	**Course title:** Developing critical thinking
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Number of credits: 3	
Recommended semester: 2., 4., 6.	
Educational level: I.	
Prerequisites:	
Course requirements: Prerequisite subjects: Prerequisites for successful completion of the course: The course is completed with an assessment, weighted interim/final assessment 100/0. 100% of the continuous assessment includes: approximately 5 assignments (50%) will be given during the semester, 2 midterm tests during the semester (for a total of 30%), and active participation in seminars, engaging in discussions (20%). Students will use the e-learning environment moodle for their studies. For successful completion of the course it is necessary to obtain at least 60% of the points. The rating is awarded on a scale: A (100-91%, excellent - outstanding results), the student actively participated in seminar discussions, completed the midterm tests at an excellent level, and completed the midterm assignments excellently. B (90-81%, very good - above average standard),), the student actively participated in seminar discussions, completed midterm tests and assignments at a very good level C (80-73%, good - normal reliable work), the student was less actively involved in seminar discussions, he/she completed the midterm tests and assignments at a good level with slight shortcomings D (72-66%, satisfactory - acceptable results), the student did not actively participate in seminar discussions, he/she completed midterm tests and assignments at a satisfactory level E (65-60%, sufficient - results meet the minimum criteria), the student did not actively participate in discussions in seminars, midterm tests and midterm assignments were done at the minimum level Fx (59-0%, insufficient - extra work required)	
Learning outcomes: Learning outcomes: Learning objectives and outcomes and transferable competences: Students are familiar with the principles of critical thinking, they can prepare their own activities on the basis of universal scenarios on the subject aimed at the Development critical thinking. They	

can assess students' critical thinking, recognize hoaxes and identify relevant facts and ideas. They can apply a variety of methods to develop pupils' critical thinking.
Educational Objectives:
The aim of the seminar is for students to acquire knowledge and skills that will enable them to prepare methodological materials aimed at developing students' critical thinking skills. To familiarize students with universal scenarios of educational activities and the possibilities of assessing critical thinking in education.

Class syllabus:
Brief outline of the course:
Principles of critical thinking, critical arguing, critical debating, critical writing, organizing knowledge. Basic characteristics of hoaxes. Identifying relevant facts and ideas. Methods of Development critical thinking in pupils, universal scenarios of educational activities, preparation of methodological materials. Evaluation of critical thinking.

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde015/22	Developmental disorders

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
1 hour lecture + 1 hour seminar/week; 22 hours in total, combined form (primarily full-time).
Student workload:
11 x 2 hours of direct teaching = 22 hours; intermediate preparation (14 hours); preparation for the intermediate test (20); preparation for the seminar paper and presentation (24 hours); preparation for the final examination (40 hours), 120 hours in total.
Teaching methods:
lecture, group discussion - problem solving of assigned tasks, work in small groups, elaboration of a project proposal on topical issues, guided discussion of the topic covered, heuristic method, guided self-study, and work with the text.

Number of credits: 4

Recommended semester: 5.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde005/22 - Developmental psychology

Recommended prerequisites:
B-PSYde005 Developmental psychology

Course requirements:
50% of the interim evaluation + 50% of the final evaluation
During the semester, students will prepare a term paper (max. 20 points) and present the term paper (max. 10 points), take a midterm test (max. 30 points) and a final exam (max. 40 points). The final examination will consist of a written test. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, students need to perform excellently throughout the semester and be capable of independent study. Students are able to navigate through the various literature sources of information, are able to select relevant sources of information for their studies, are able to navigate the issues of childhood developmental disorders, i.e., have basic information about their

etiopathogenesis, epidemiology, diagnosis, and differential diagnosis, as well as about possible forms of intervention.
A grade of B means that the students performed above average throughout the semester, were able to study independently, have a basic knowledge of child development disorders, and are able to navigate the information in the literature very well.
A grade of C means that students performed at a standard level during the semester, their theoretical knowledge of the subject is at a good level, but they lack the ability to apply this knowledge quite correctly, to critically evaluate and compare individual literary sources and psychological knowledge.
The grade D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to the subject of education and greater problems in independent implementation work, they cannot critically analyze information and they have problems applying knowledge to practice.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge, and are more likely to fail in critical thinking, but have mastered most of the theoretical knowledge of the subject.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim evaluation + 50% of the final evaluation

Learning outcomes:
The goal of the course - which is an important complement in the pro-inclusive orientation of graduates of the psychology teaching field already at the bachelor's degree - is to familiarize students with the basic classification and manifestations of developmental disorders in childhood and their impact on the child's school functioning. Students will acquire basic information about the most common developmental disorders occurring mainly in preschool and school-age children. The ability to navigate the subject matter is essential for future teaching assistants and specialist assistants with advanced degrees, especially in the context of pro-inclusive school policies. They will not only acquire theoretical knowledge but will also gain sufficient competence to work with other professionals involved in dealing with developmental disorders. It is anticipated that teachers will be increasingly confronted with different images of developmental disorders in the years to come and it is therefore essential to acquire not only knowledge but also competences for possible collaboration. The students are introduced to the issue of normality in child psychology, to the risks of developmental disorders and to international classifications, which will enable them to better understand the origins and manifestations of the various disorders. A good orientation in the given issue is a prerequisite for an individualized teacher-pupil/student, pedagogical assistant-pupil/student with a developmental disorder relationship. Such a relationship requires not only empathy but must also be supported by acquired skills. An important goal is to prepare students for participation in the implementation of individual education plans for children with developmental disorders. Most children with developmental disorders (with few exceptions) are pupils/students in mainstream primary/grammar schools and it is therefore important that students are able to work competently with the inclusion team, but also with specialists in other fields such as neurologist, psychologist, speech therapist, paediatrician.

Class syllabus:
1. Introduction to developmental disorders /definition of developmental disorders, precursors of developmental disorders, classifications of developmental disorders.
2. Aetiology of developmental disorders /pathogenic factors and the complexity of their action, risks in the pre-, peri- and post-natal period, early diagnosis, intervention, stimulation, deprivation/.

3. Psychomotor retardation /general developmental delay/ and mental retardation /intellectual disability, aetiology, classification, possibilities, and limitations of intervention.
4. Communication disorders - delayed and impaired speech development, social/pragmatic/ speech disorder.
5. Primary psychogenic communication disorders - stuttering and mutism /definition, classification, possibilities of intervention/.
6. Pervasive developmental disorders or autism spectrum disorders /autism, Asperger's syndrome, Rett syndrome, aetiology, clinical picture, organization of care.
7. The problem of organicity in child psychology. Cerebral palsy - aetiology, clinical picture. Developmental disorder of motor functions.
8. Mild cerebral dysfunction, present - hyperkinetic syndrome, respectively ADHD. The most significant factors in working with children with ADHD, ADD.
9. Specific learning disabilities - diagnosis and differential diagnosis, remedial programs in work with children with specific learning disabilities.
10. Emotional disorders in childhood - anxiety disorders and depression in childhood and adolescence.
11. Enuresis, encopresis, tics - psychogenic conditioned disorders in somatic area. Manifestations, forms, possibilities of intervention.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde005/22	Developmental psychology

Educational activities:
Type of activities: seminar / lecture
Number of hours:
per week: 2 / 2 **per level/semester:** 26 / 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Type, scope and method of educational activities:
Scope, type/method of teaching and organisational form:
2 hours lecture + 2 hours seminar = 4 hours /week, total 44 hours /semester, combined form (primarily full-time)
Student workload:
44 (11 x (2 + 2)) hours of direct teaching; 16 hours of preparation of the seminar thesis presentation and its written completion; 12 hours of preparation for the mid-term test; 12 hours of preparation for the final test; 20 hours of preparation for the oral examination. 104 hours in total.
Teaching methods:
Lecture: lecture combined with discussion of the topic (concept); examples of application of knowledge about psychological development and research findings in this field in practice, specific topics for critical reflection on knowledge (development of knowledge, diversity of argumentation, current problems and open questions, etc.), convergent and divergent, closed and open questions, questions for further reflection and independent study (also with regard to the seminar, oral exam), etc. are given.
Seminar: discussion, e-learning, critical reflection on relevant video recordings, critical reflection on current basic and applied research on psychological development in the Slovak Republic and worldwide (monographs, journals, databases of scientific knowledge, case studies, etc.), work in small groups (pairs/triplets, etc.) on the assignment of solving a specific problem or application of knowledge from developmental psychology in practice (e.g. with regard to the developmental stage or scientifically up-to-date concept of developmental psychology, simulated examples of practice, case studies); cooperative, resp. group evaluation of inter-disciplinary (transdisciplinary) aspects of knowledge (perspectives of scientific development, innovations and their application, e.g. digitalization, robotization, convergent technologies and psychological ontogenesis, etc.); presentation of the output (seminar paper) in a study group; written reflection on personal life path (psychological development) on the basis of the studied developmental psychological knowledge (recommended to continuously elaborate towards oneself, life path, experiences and environment, including the educational environment, i.e. other people, pupils, students).

Number of credits: 4

Recommended semester: 2.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde001/22 - General psychology

Recommended prerequisites:
B-PSYde001 General Psychology

Course requirements:
50% of continuous assessment + 50% of final assessment
The interim assessment includes an interim test (20% of the assessment), a presentation of the seminar work in the study group at the seminar and its written completion (30% of the assessment). The final assessment includes a final test (25% of the mark) and an oral examination (25% of the mark). To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
A (100-94%, excellent - outstanding performance; students correctly and actively reflect critically and creatively on both the knowledge and frameworks for further development of the discipline, including its meaningful integration with knowledge from other disciplines and its critical and creative application in assessing or even influencing psychological development in general, and specifically in themselves, students, or other learners);
B (93-86%, very good - above average standard; students critically reflect appropriately on both the knowledge and frameworks for further development of the discipline, including its meaningful integration with knowledge from other disciplines and its critical application in assessing and influencing psychological development in general, and specifically in themselves, pupils, or students);
C (85-76%, good - routinely reliable work; students are more or less good at critically reflecting on knowledge and current developments in the discipline, are aware of interdisciplinary contexts, and are able to apply knowledge in a fundamentally sound way to evaluate and influence psychological development in general, and specifically in themselves, pupils, or students);
D (75-68%, satisfactory - acceptable results; students are limited and/or moderately critical of knowledge and current developments in the discipline, know interdisciplinary contexts, and are broadly acceptable in their ability to apply knowledge in assessing psychological development in general, and in themselves, pupils, or students in particular);
E (67-60%, sufficient - results meet the minimum criteria, students only to a limited extent critically reflect independently on the knowledge and current development of the discipline, they are aware of interdisciplinary contexts, however, at least on the basis of the discussion, they are able to apply the knowledge correctly enough in the assessment of psychological development in general, as well as in themselves, prospectively in pupils or students);
Fx (59-0%, insufficient - further work, extra study required).
Scale of assessment (preliminary/final): 50% of continuous assessment + 50% of final assessment

Learning outcomes:
The aim of the course Developmental Psychology (which as a basic psychological discipline is an integral part of the systemic core knowledge framework of the study field of psychology teaching in combination) is to provide graduates with a fundamental and up-to-date scientific and empirical framework of knowledge from the contemporary developmental psychology on the basis of its successful completion. They are thus prepared for the study of other psychological or other relevant disciplines of their study programme, in addition to further developing their psychological literacy (the ability to assess psychological development, including in themselves) and thus preparing

themselves for the profession of psychology teacher (as recommended, among others, by the documents of the Slovak Association for the Teaching of Psychology (SAUP) and the European Federation of Psychology Teachers' Associations (EFTPA)).
By successfully completing the course, students will have critically mastered (to the extent indicated in the grading scale above) the following current theoretical and empirical areas of knowledge in developmental psychology (the subject and methods of research in developmental psychology, the conceptual system of developmental psychology, inter- and transdisciplinary relationships, and the possibilities of application; theories and models of psychological development, laws of psychological development; conditions and characteristics of the course of developmental changes of individual psychological functions, personality and social competence in the context of lifelong human development; basic psychological methods and techniques of developmental level assessment; current areas of research and development in developmental psychology and their results).
After successful completion of the course, students of psychology teaching should use the knowledge and skills acquired not only in further studies (as mentioned above), but also fundamentally in planning methodology or research in their final undergraduate thesis; in practice, prospectively at the level of assistive participation in the teaching of psychology and in preventive counselling and educational activities in the school system (towards the assessment and optimisation of the developmental conditions of specific pupils or students and the solution of potential developmental problems, in this respect also by co-working with other school staff and parents, etc.).
In addition, the specific educational methods (mentioned above) will contribute to the further development of their functional literacy in coexistence with the growth of other areas of psychological literacy, especially interactive and critical literacy, also for the sake of further higher education opportunities (meta-cognitive, critical thinking, convergent and divergent thinking, creativity, and other transferable competences) and gradual preparation for successful practice in line with the profile of graduates of the bachelor's degree in psychology teachers (i.e. thinking in contexts, including systemic ones, self-knowledge and self-management, increased motivation to learn, improved study skills, digital, organisational skills, etc.).
The course contributes directly to the gradual development of disciplinary and subject competence, implicitly to the development of disciplinary-didactic and educational competence, as well as personal, communicative, and relational competence, which are part of the professional competences of teachers, through its content and methods of education.

Class syllabus:
(1) The subject, methods of research in developmental psychology and its relation to related disciplines, further development (transdisciplinary relations). (2) General characteristics of psychological development: classification of developmental changes and processes, factors of psychological development, developmental norm, issues of periodization of psychological development and critical analysis, and current and prospective development of knowledge (incl. limits). (3) Theoretical models of psychological development in the context of the development of the discipline and new trends in research and its results: endogenistic, exogenistic and interactionist models of psychological development, their merits, and limits. (4) Motor development and its significance in overall psychological development: the laws and course of development of gross and fine motor skills, their relationship to overall psychological development. Play and drawing and its place in psychological development (development and characteristics of play and drawing in the context of motor, cognitive and social development). (5) Cognitive development: the development of cognitive psychological functions, also in relation to basic theoretical concepts (perception, attention, memory, imagination, thinking, speech, and its relevance to overall psychological development, human action, and the regulation of behaviour). (6) Personality development:

the formation of self and psychological identity (self-image, self-concept, self-esteem), needs, values, and interests and their formative factors (family, school, peer group, friends, culture) and the cognitive contribution of the major theories of personality development. Interpersonal bonding (relational bonding/attachment): theory and empirical findings. Emotion development: stages and factors of emotion development in the context of socialization (differentiation of emotions and their expression, emotional intelligence, emotional regulation with respect to stages of development). Psychosexual development: the physical and psychological components of human sexuality and its development (psychosexual orientation, gender, gender role, the concept of gender and psychosocial development). (7) Social development: the development of the social self, social understanding and social relationships and the socialization of the individual (processes of socialization in the context of development and the critical social group - family, school, play/peer group, collective with respect to current socio-cultural challenges). Moral development: psychological conceptions of moral development (conditions and developmental stages, moral judgement and moral action /prosocial behaviour, moral character, moral values, moral sentiments, and moral identity; self-discipline and empathy). (8) Methods of psychological developmental assessment: developmental screenings and scales and their diagnostic possibilities, aspects of school maturity. Characteristics of psychological developmental attainment at different ages of lifelong development (from conception to old age): developmental tasks, changes, and traits physical (growth and maturation of the organism), psychological and social (perception, imagination, thought and speech, personality and emotionality, motivation, values, interests, moral development, individuation, social interaction, social cognition).
Note: In particular, thematic units 4 - 8 explicitly and specifically implicitly develop psychological literacy to varying degrees and promote the coexistence of multiple competencies of prospective psychology teachers at the undergraduate level, including the use of particular methods of teaching and learning (especially in seminar activities, seminar work, and written critical reflection of knowledge by the student), as mentioned above, in accordance with the profile of the graduate.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde035/22	Didactics of non-formal History Education

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week; 22 hours total per semester, combined; (primarily full-time)
Student workload:
2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 40 hours producing seminar papers and reflections on the topics covered; 15 hours preparing for the presentation of papers and discussion. A total of 77 hours of student work.
Educational methods: E-U-R (evocation-awareness-reflection); knowledge competitions, quizzes; brainwriting; dramatisation; didactic games and other interest activities of historical education; discussion/colloquium on the subject matter; problem-solving exercises; SWOT analysis

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
100 % of the intermediate verbal and scored marks. During the semester, the student solves assignments focused on the application of the three functions of history education (cognitive, educational, and entertaining) in an informal environment, reflects through creative work on the content of the topics, applies several methods of work and presents them to the team and the application of SWOT analysis. A final discussion/colloquium and a summation of the points obtained conclude the overall assessment. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D and a minimum of 60 points for a grade of E. Credit will not be awarded to students who obtain less than 15 points in any of the four written examinations. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-91%, excellent - outstanding performance, the student has a comprehensive knowledge of the possibilities of applying game principles to history education, has a broad knowledge in a specialised area of the discipline and has motivational tendencies to learn and popularise history through a variety of methods, strategies. He/she is oriented in the current state of knowledge of borderline disciplines, conceptually thinks about the creation of motivational challenges, can actively acquire information and creatively apply it in solving problems-solving tasks, actively expands his/her knowledge and critically reviews it and considers the suitability of its application for pedagogical and history practice),

B (90-81%, very good - above average standard, the student is oriented in the issue, knows it, can independently acquire new knowledge, and solve professional tasks, but his critical, constructive thinking is borderline when analysing and assessing the planes of normative and reflective didactics),
C (80-73%, good - normal reliable work, although the student can orient himself in the problem, independently search and analyse information, can learn, but he cannot think critically and constructively enough, evaluate the solved problems, and apply the acquired knowledge creatively and conceptually in broader theoretical and practical contexts),
D (72-66%, satisfactory - acceptable results, the student is able to orientate himself in the problem at a basic level, his knowledge is fragmented and incomplete, and at a lower level of satisfaction, he also applies transferable knowledge of the field and related disciplines, he shows more severe deficiencies in the area of factual, conceptual, procedural and metacognitive knowledge),
E (65-60%, sufficient - the results meet the minimum criteria, the student is able to orient himself in the problem only with great difficulty, he knows only the most basic knowledge, he does not demonstrate the ability to think critically and does not apply the acquired knowledge in a systematic way to the solution of practical tasks),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the problem, does not master the most basic knowledge, does not demonstrate the ability to argue and think critically)

Learning outcomes:
By completing the course, the student will gain theoretical and practical knowledge of modern history teaching and the equal status of its three functions (cognitive, educational, and deleterious). The student will be able to analyse the needs of contemporary school practice in an individual approach to pupils. He is also versed in the creation of teaching media and the process of critical assessment of educational materials and programmes.

Class syllabus:
We see informal history education as an increase in each student's capacity throughout their educational career. Emphasis is placed on the compatibility of knowledge, so that teacher education is academically challenging but consistently relevant to the individual's motivation and the education system's practical needs.
The course content focuses on the following focal themes:
- History itself and the subject of History from the perspective of pupil motivation. About the past for the future?
- The teacher as an essential element of motivation.
- Examples of motivational strategies.
- Motivational challenges. Types of topics for non-formal learning in school and out-of-school settings. Talent and creative representation of historical artefacts.
- Principles of creating attractive tasks.
- Is educational play a full-fledged teaching method and (historical) education?
- What kinds of games are recommended to be practised in primary and secondary school?
- What can we accomplish by dramatising a historical theme or by the LARP method? (Example scenario: What is the story of Libra?).
- Advantages of teamwork.
- Learning to debate (aspects of constructive discussion).
- History for the public (Public history), the work of the young historian at the stations.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde002/22	Digital technologies 1

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2., 4.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course
The course is completed by assessment, the weighting of the interim and final assessment is 100/0.
active participation in seminars conducted by both face-to-face and distance learning methods;
processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;
development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Present an original and visually impressive presentation of the educational content of the selected teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at Charles University; The structure of the presentation should be based on one of the templates from the library of customizable templates supported by Prezi Present; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defense of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments,

excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
The aim of the educational discipline Digital Technologies 1 is to develop digital skills of students of teacher-oriented study programmes at the Faculty of Education of the Charles University (hereinafter referred to as the Faculty of Education of the Charles University) to be able to effectively use an appropriate range of didactic software applications in the context of the concept of design and creation of interactive educational activities, knowledge quizzes and assignments, electronic portfolios, impressive didactic presentations, new interactive forms of teaching material and other pedagogical/school documentation usable in the intent of their future teaching profession at different levels of regional education in the Slovak Republic.
By completing the educational discipline Digital Technologies 1, the student has the competences and digital skills to effectively use the tools of the SMART Notebook software application and the SMART Lumio cloud environment by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.
By completing the educational discipline, the student also has the competences and digital skills in the field of design and creation of mind maps through the tools of the Mindomo software application (or FreeMind, XMind) applicable in educational activities implemented in schools and educational institutions for the target group of intact pupils, as well as pupils with special educational needs in order to improve their communication skills and critical thinking.
By completing the educational discipline Digital Technologies 1, the student acquires professional digital competencies in the concept of design and creation of impressive non-linear presentations and interactive presentations of educational content implemented through the Prezi Present cloud

platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline Digital Technologies 1, the student has, last but not least, the competences and digital skills to effectively use the cloud platform Microsoft 365 with an emphasis on software applications Sway, Word and Excel by creating supplementary teaching materials for the needs of school teaching and maintaining the relevant pedagogical documentation.
The student masters the basic possibilities of using the online communication platform Microsoft Teams applicable in the implementation of distance learning at the level of regional education

Class syllabus:

The content of the educational discipline Digital Technologies 1 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.
Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.
Application of SMART Notebook software application and SMART Lumio cloud environment in the educational process
We develop professional digital competences by the ability to effectively use the tools of the SMART Notebook desktop application and the SMART Lumio cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in the lesson in the school classroom or in the home environment in the case of distance/hybrid education;
We acquire digital skills in working with the SMART response 2 tool supported by the SMART Notebook desktop application and the SMART Lumio cloud environment in the context of creating knowledge questions - selecting one correct answer from multiple answer alternatives, selecting multiple correct answers from multiple answer alternatives, selecting Yes/No answers, free-form questions - in test sessions designed to test the knowledge of pupils of regional education in the Slovak Republic;
We are mastering the methodology of applying knowledge tests communicated to students through SMART response 2 in the SMART Notebook desktop application and gamification activities supported by the cloud environment SMART Lumio to the process of school teaching of subjects at the lower/upper secondary level of education;
We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the SMART Board interactive whiteboard.
Topics:
Basic functions and calibration of the SMART Board interactive touchscreen/tablet; Symptoms, causes and solutions to some of the problems encountered when using the SMART Board interactive touchscreen/tablet; Installing and updating the SMART Notebook desktop application; Creating a teacher's virtual classroom in the SMART platform;
Creating and editing objects in the SMART Notebook environment; Using basic tools to support the presentation of processed content; Working with multimedia content from the SMART Gallery; Sharing your own content on the SMART Exchange website; Adding links to external educational resources; Adding sound to objects, Animating objects; Using and sharing your own content; Applying graphic content from other software applications - importing and editing objects;

Applying objects from the Lesson Activity Toolkit 2.0; Creating gamification activities in SMART Lab; SMART Response 2 - creating and administering knowledge tests/quizzes;
Principles of Gamification; Gamification Elements in Educational Content; Some Results of Exact Studies on the Application of Gamification in Education; Application of Gamification in Education in Primary and Secondary Schools; Examples of Gamification Activities Used in the Teaching of Science, Social Studies, Art, Education and Vocational Education.
Teacher/student login to SMART Lumio cloud platform account; Managing the library of learning activities; Creating gamification activities in SMART Lumio - SMART Lesson Activity Builder (Lab); Editing activities in edit mode; Making activities available to students - delivery mode; Sharing options for gamification activities;
Setting up and converting a lesson page to a Handout or Workspace activity; Working with predefined graphical activity templates for use in activating student learning, inquiring about student knowledge, or reflecting; Sharing lessons with the created educational materials with students in SMART Lumio.
Within the distance assignment, the student will create a set of interactive learning/quiz activities and digital presentation material for the target group of learners with effective use of the widest possible range of tools, objects, pre-prepared templates, advanced functions, settings and features supported by the SMART Notebook authoring environment in a range of at least 10 presentation pages/activities. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.notebook format, the student shall indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the distance assignment, the student will create a set of 10 gamification educational/quiz activities for the target group of students with effective use of pre-made templates and tools of the SMART Lumio cloud environment. The condition is that each type of gamification activity should only occur once in the created set of activities. In the accompanying document (a separate file of *.docx format) to the created gamification educational/quiz activities saved by the student, the student shall indicate the methodology of their application in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a 3-page set of pre-prepared content convertible to Handout format activities and a 3-page set of pre-prepared content convertible to Workspace format activities. In the accompanying document (a separate *.docx file) for the created Handout and Workspace activities stored in the SMART Lumio cloud, the student will indicate the methodology of their application to the educational activities of the target group of students.
Creating and using mind maps in the educational process with the support of digital solutions
We develop professional digital competences by competence in the design and creation of mind maps through the tools of the software application Mindomo (or FreeMind/XMind), usable in our own educational activities implemented in schools and school facilities for the target group of intact pupils, as well as pupils with special educational needs in order to improve communication skills and critical thinking;
We are mastering the methodology of applying mind maps communicated to students through Mindomo (or FreeMind/XMind) to the process of school teaching of the subjects of their approbation at primary school / high school;
Topics:
Explanation of terminology in the field of mind/concept mapping; Desktop/cloud software applications for creating mind maps in the educational process at primary/ secondary schools; Functions and types of mind maps; Principles and principles of creating mind maps; Possibilities of using mind maps in the process of preparation for teaching and directly in the classroom;

Familiarization with the user environment of the Mindomo software application (or FreeMind/ XMind);
Structuring a mind map; Inserting, editing and formatting nodes; Creating and formatting branches; Encrypted node; Editing multi-line nodes; Creating image nodes; Moving/copying nodes and groups of nodes in the map; Inserting annotations to nodes; Linking nodes with local links - independent linking of ideas; Hypertext linking of nodes to external information sources - links in nodes leading to external sources (web) or to local files on the local disk of the computer; Importing content into the mind map; Exporting the map to the output of different formats; Text search in the subnetwork of the current node; Mind maps and their use when working with pupils with SEN.
As part of the distance assignment, the student will design and create one mind map from any thematic area of school subject teaching in primary/elementary school. The focus of the mind map should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school/SHS in the intent of the approbation subjects that the student studies in the teacher education programmes at the Faculty of Education at the Charles University. In the mind map, tools and functions of the Mindomo (or FreeMind/XMind) application environment will be applied in the intent of the complexity of the explained issue. The student will justify in a brief written form the choice of the processed content/topic in the form of a mind map, their functionality and use in his/her educational activities.
Creation of non-linear presentations of educational content through the Prezi presentation platform supporting teacher's interpretation and systematization of students' knowledge
We acquire professional digital competencies in the concept of design and creation of impressive non-linear presentations of educational content realized through the Prezi Present cloud platform Prezi applicable to our own pedagogical activities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Prezi Present to the process of school teaching of subjects of their approbation at primary school / high school;
Topics:
Introduction of the software tool Prezi Present as a presentation platform - creation of trendy, effective presentations; Explanation and clarification of the terms used in the field of creating didactic presentations in the environment of Prezi Present; Possibilities of using the presentation application Prezi Present in the preparation and creation of supporting educational materials effectively usable in the teaching of their own subject; Presentation of examples of presentations used in teaching science, social science, art-educational and vocational educational disciplines; Illustrative comparison of differences between classical (Microsoft PowerPoint) and dynamic (Prezi Present) presentations;
Theoretical background of presentation preparation and the system of selection of presented information; Basic steps of the procedure for creating didactic presentations in Prezi Present; Functionality of the online presentation tool Prezi Present; Creating dynamic presentations in Prezi Present - working with text and graphic objects; Creating topic/subtopic structures, changing the order of topics/subtopics, Creating depth and rotation effects; Inserting additional graphic visuals into a presentation in Prezi Present; Working in edit mode for main topics, subtopics and other presentation content; Creating visual effects and animations of presentation objects;
Use of templates - change the design - colors, background, fonts; Inserting audio tracks on the background of individual topics/subtopics, the whole presentation; 3D presentations; Importing and editing PowerPoint presentations in Prezi Present; Sharing presentations with other users, sharing on social networks, on web portals; Exporting presentations to *.pdf and Portable Prezi (for off-line presentation); Export options and presentation size; Working with Prezi Present in off-line mode.
Within the distance assignment, the student will use the Prezi Present presentation tool to create an original didactic and visually engaging presentation of the educational content for the target group

of students. The focus of the presentation should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at the primary school / secondary school in the intent of the approbation subjects that the student is studying in the study programmes of teaching at the Faculty of Education of the Charles University. The presentation will be at least 30 presentation views (= topics at the highest hierarchical level, subtopics at lower hierarchical levels and stack structure pages) to a minimum hierarchical nesting depth of three.
Use of Microsoft 365 platform in teacher's pedagogical activity
We develop professional digital competencies in the concept of design and creation of responsive presentations with educational content and emphasis on the cloud solution Microsoft Sway usable in educational activities implemented in schools or school facilities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Microsoft Sway to the process of school teaching of subjects of their approbation at primary school / secondary school;
We hone professional digital skills to include the ability to effectively use a range of form content controls and ActiveX elements of Microsoft Word in the creation of interactive worksheets, tests and supplementary learning materials for pupils or other classroom agenda documents usable in the context of pedagogical activity;
We are mastering the methodology of applying interactive worksheets communicated to pupils through Microsoft Word to the process of school teaching of subjects of their area of specialization at primary school / high school;
Develop professional digital skills in the creation of large documents (such as letters, invitations, labels) through a mass correspondence tool usable in the maintenance of relevant pedagogical documentation;
We develop professional digital skills in the creation of statistical calculations, compound expressions using functions for finding conditional frequency, sum, or arithmetic mean and techniques for addressing continuous and discontinuous areas in expressions/functions usable in the tabular processing of classroom data (student evaluations in knowledge or sports activities) supported by Microsoft Excel;
We hone professional competencies to include the ability to effectively apply advanced conditions and techniques for conditional formatting of table records using functions;
We extend digital skills to include the ability to effectively apply an advanced filtering tool to large tabular data by defining compound logical conditions (AND/OR), wildcards (*, ?), and a Subtotal function usable in maintaining appropriate pedagogical documentation;
Develop professional digital skills in creating cumulative graphical visualizations of tabulated data in the context of changing attributes of individual chart elements;
We apply other selected tools of the Microsoft 365 cloud platform, with an emphasis on the Microsoft Teams software application for teachers to use in conducting online learning activities.
Topics:
A basic theoretical introduction to Microsoft cloud solutions;
Sway presentation platform - creation of interactive school materials (portfolios), impressive presentations of educational content; Other possibilities of practical use of Microsoft Sway in educational activities; Concept of creating multimedia responsive presentations; Creating a new Sway, creating a Sway by importing an existing file/presentation, creating a Sway based on a template; Articulating presentation content; Options for inserting and formatting supported visuals via tabs; Grouping multimedia content; Influencing the appearance of a presentation; Changing the layout of content; Adapting specific elements to the style of a presentation; Exporting a presentation in *.pdf/*.docx; Additional options for setting up the presentation in Sway; Share Sway output from a personal Microsoft account; Share Sway output from an account assigned by the educational organization;

Editing large text documents in the Microsoft Word environment - standard settings; Using tabs; Text blocks; Columns; Objects in text - equation editor; Tables in text; Editing a document using a style; Creating your own style and editing an existing style. Document Revision. Definition of the terms section and reference and possibilities of their use; Document revision and its use in writing term papers and qualification papers; Document structuring - dividing a document into sections, types of section breaks, page settings in sections, creating a header and footer in a document divided into sections; Possibilities of using a structured document within the agenda of a teaching staff member; Creating references - automatic content creation, content setup, content formatting, numbering figures and tables, creating a list of tables and figures, footnotes and endnotes, cross-references, citations and list of references used, creating a document index; Creating templates - the importance of a template type document. Electronic forms - what are form elements and what is their difference from ActiveX elements, settings of form elements, ActiveX element and its settings, Form security; Application of the acquired experience and skills of working with Microsoft Word text editor in creating documents useful in own pedagogical activities; Creation of large documents - letters, invitations, labels - by means of the tool of mass correspondence useful in the framework of keeping the relevant pedagogical documentation.
Working with tabular data in Microsoft Excel; Inserting data into cells; Predefined and custom data format; Working with cells - moving, cutting, copying; Bulk filling of data and creating expressions/patterns; Applying elementary functions; Modifying function parameters; Modifying table appearance; Sorting tabular data; Data lists - creating custom lists; Increasing values. Rounding; Absolute and relative cell addressing; Hiding table values; Notes in cells; Working with large data - automatic and extended data filter, Subtotal function; Operations between sheets; Conditional formatting of table data; More advanced functions - If, Count, CountIf, SumIf, SumIfS, AverageIfS; Contingency table; Search functions; Creating forms.
We get familiar with the Microsoft Teams online communication platform environment; Creating teams; Creating a pure team in MS Teams; Creating teams from an existing team and basic team customization; Creating a team from an Office 365 Group; Setting up and managing teams; Managing team members; Managing teams in bulk; Guest in a Team Class; Invitation from MS Teams; Channels; Cards; Creating your first online lesson; Creating a link to a lesson; Connecting students to an online lesson; Running a lesson with MS Teams; Preparing a lesson outline; Presenting in MS Teams; Tools available during the implementation of an online lesson on the student's/teacher's side (e.g. Conversation panel; Reporting for a word; Downloading a list of participants, etc.); Course notes - notepad; Uploading files with educational content; Creating a shared file for pupils/students in the virtual classroom; Creating a quiz; Quiz evaluation, Quiz setup.
Within the distance task, the student will design and create a document in the form of an electronic workbook in Microsoft Word using a template and applying content controls and ActiveX elements - text field, drop-down field, drop-down list, comma field, option button, command button - usable in the context of teaching subjects of his/her area of specialization at primary school / high school.
Within the distance task, the student will create a table of fictitious evaluation of pupils in the framework of knowledge or sports activities implemented in schools or school facilities in the range of at least 20 rows and 10 columns, where the functions of the Microsoft Excel spreadsheet application will be used in the context of the complexity of the explained issue.
In a distance task, the student formats a table of fictitious assessment of pupils in knowledge/sport activities, applying various conditions and techniques of conditional formatting of the table entries in the intent of the difficulty of the explained problem.
In the distance task, the student will create three different graphical visualisations of the data from the table of the previous distance task, in which he/she has processed the assessments achieved in the knowledge/sport activities implemented in schools or school facilities. They will add to the

graphical visualisation the title of the graph, the axis names as well as other parameters of the graph as they wish in the context of the readability of the graph.
In the distance task, the student applies an extended filter to the table from the previous distance task to display the student's name and grade attained in the context of the knowledge/sport activities carried out in the school or school facilities and filters to another location within the same worksheet/ workbook when defining specific filter conditions (e.g. grade attained below/above a set value, etc.). Within the framework of the distance task, the student will create through the Microsoft Sway application an original, dynamic and visually impressive presentation of the learning issue for the target group of pupils according to his/her own discretion in the intent of school teaching of the subjects of his/her apprenticeship at primary school/elementary school. The aim of the presentation to be realized by the student is to make it multimedia and at the same time attractive for the target group of pupils in terms of content. The scope of the presentation in Microsoft Sway must consist of at least 25 presentation views - cards with the subject content. To organize the presentation, the student should use its layout into sections, subsections and layers in order to increase the clarity of the presented topic for the student

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde002/22	Digital technologies 1

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 1., 3.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course
The course is completed by assessment, the weighting of the interim and final assessment is 100/0.
active participation in seminars conducted by both face-to-face and distance learning methods;
processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;
development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Present an original and visually impressive presentation of the educational content of the selected teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at Charles University; The structure of the presentation should be based on one of the templates from the library of customizable templates supported by Prezi Present; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defense of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments,

excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
The aim of the educational discipline Digital Technologies 1 is to develop digital skills of students of teacher-oriented study programmes at the Faculty of Education of the Charles University (hereinafter referred to as the Faculty of Education of the Charles University) to be able to effectively use an appropriate range of didactic software applications in the context of the concept of design and creation of interactive educational activities, knowledge quizzes and assignments, electronic portfolios, impressive didactic presentations, new interactive forms of teaching material and other pedagogical/school documentation usable in the intent of their future teaching profession at different levels of regional education in the Slovak Republic.
By completing the educational discipline Digital Technologies 1, the student has the competences and digital skills to effectively use the tools of the SMART Notebook software application and the SMART Lumio cloud environment by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.
By completing the educational discipline, the student also has the competences and digital skills in the field of design and creation of mind maps through the tools of the Mindomo software application (or FreeMind, XMind) applicable in educational activities implemented in schools and educational institutions for the target group of intact pupils, as well as pupils with special educational needs in order to improve their communication skills and critical thinking.
By completing the educational discipline Digital Technologies 1, the student acquires professional digital competencies in the concept of design and creation of impressive non-linear presentations and interactive presentations of educational content implemented through the Prezi Present cloud

platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline Digital Technologies 1, the student has, last but not least, the competences and digital skills to effectively use the cloud platform Microsoft 365 with an emphasis on software applications Sway, Word and Excel by creating supplementary teaching materials for the needs of school teaching and maintaining the relevant pedagogical documentation.
The student masters the basic possibilities of using the online communication platform Microsoft Teams applicable in the implementation of distance learning at the level of regional education

Class syllabus:

The content of the educational discipline Digital Technologies 1 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.
Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.
Application of SMART Notebook software application and SMART Lumio cloud environment in the educational process
We develop professional digital competences by the ability to effectively use the tools of the SMART Notebook desktop application and the SMART Lumio cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in the lesson in the school classroom or in the home environment in the case of distance/hybrid education;
We acquire digital skills in working with the SMART response 2 tool supported by the SMART Notebook desktop application and the SMART Lumio cloud environment in the context of creating knowledge questions - selecting one correct answer from multiple answer alternatives, selecting multiple correct answers from multiple answer alternatives, selecting Yes/No answers, free-form questions - in test sessions designed to test the knowledge of pupils of regional education in the Slovak Republic;
We are mastering the methodology of applying knowledge tests communicated to students through SMART response 2 in the SMART Notebook desktop application and gamification activities supported by the cloud environment SMART Lumio to the process of school teaching of subjects at the lower/upper secondary level of education;
We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the SMART Board interactive whiteboard.
Topics:
Basic functions and calibration of the SMART Board interactive touchscreen/tablet; Symptoms, causes and solutions to some of the problems encountered when using the SMART Board interactive touchscreen/tablet; Installing and updating the SMART Notebook desktop application; Creating a teacher's virtual classroom in the SMART platform;
Creating and editing objects in the SMART Notebook environment; Using basic tools to support the presentation of processed content; Working with multimedia content from the SMART Gallery; Sharing your own content on the SMART Exchange website; Adding links to external educational resources; Adding sound to objects, Animating objects; Using and sharing your own content; Applying graphic content from other software applications - importing and editing objects;

Applying objects from the Lesson Activity Toolkit 2.0; Creating gamification activities in SMART Lab; SMART Response 2 - creating and administering knowledge tests/quizzes;
Principles of Gamification; Gamification Elements in Educational Content; Some Results of Exact Studies on the Application of Gamification in Education; Application of Gamification in Education in Primary and Secondary Schools; Examples of Gamification Activities Used in the Teaching of Science, Social Studies, Art, Education and Vocational Education.
Teacher/student login to SMART Lumio cloud platform account; Managing the library of learning activities; Creating gamification activities in SMART Lumio - SMART Lesson Activity Builder (Lab); Editing activities in edit mode; Making activities available to students - delivery mode; Sharing options for gamification activities;
Setting up and converting a lesson page to a Handout or Workspace activity; Working with predefined graphical activity templates for use in activating student learning, inquiring about student knowledge, or reflecting; Sharing lessons with the created educational materials with students in SMART Lumio.
Within the distance assignment, the student will create a set of interactive learning/quiz activities and digital presentation material for the target group of learners with effective use of the widest possible range of tools, objects, pre-prepared templates, advanced functions, settings and features supported by the SMART Notebook authoring environment in a range of at least 10 presentation pages/activities. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.notebook format, the student shall indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the distance assignment, the student will create a set of 10 gamification educational/quiz activities for the target group of students with effective use of pre-made templates and tools of the SMART Lumio cloud environment. The condition is that each type of gamification activity should only occur once in the created set of activities. In the accompanying document (a separate file of *.docx format) to the created gamification educational/quiz activities saved by the student, the student shall indicate the methodology of their application in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a 3-page set of pre-prepared content convertible to Handout format activities and a 3-page set of pre-prepared content convertible to Workspace format activities. In the accompanying document (a separate *.docx file) for the created Handout and Workspace activities stored in the SMART Lumio cloud, the student will indicate the methodology of their application to the educational activities of the target group of students.
Creating and using mind maps in the educational process with the support of digital solutions
We develop professional digital competences by competence in the design and creation of mind maps through the tools of the software application Mindomo (or FreeMind/XMind), usable in our own educational activities implemented in schools and school facilities for the target group of intact pupils, as well as pupils with special educational needs in order to improve communication skills and critical thinking;
We are mastering the methodology of applying mind maps communicated to students through Mindomo (or FreeMind/XMind) to the process of school teaching of the subjects of their approbation at primary school / high school;
Topics:
Explanation of terminology in the field of mind/concept mapping; Desktop/cloud software applications for creating mind maps in the educational process at primary/ secondary schools; Functions and types of mind maps; Principles and principles of creating mind maps; Possibilities of using mind maps in the process of preparation for teaching and directly in the classroom;

Familiarization with the user environment of the Mindomo software application (or FreeMind/ XMind);
Structuring a mind map; Inserting, editing and formatting nodes; Creating and formatting branches; Encrypted node; Editing multi-line nodes; Creating image nodes; Moving/copying nodes and groups of nodes in the map; Inserting annotations to nodes; Linking nodes with local links - independent linking of ideas; Hypertext linking of nodes to external information sources - links in nodes leading to external sources (web) or to local files on the local disk of the computer; Importing content into the mind map; Exporting the map to the output of different formats; Text search in the subnetwork of the current node; Mind maps and their use when working with pupils with SEN.
As part of the distance assignment, the student will design and create one mind map from any thematic area of school subject teaching in primary/elementary school. The focus of the mind map should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school/SHS in the intent of the approbation subjects that the student studies in the teacher education programmes at the Faculty of Education at the Charles University. In the mind map, tools and functions of the Mindomo (or FreeMind/XMind) application environment will be applied in the intent of the complexity of the explained issue. The student will justify in a brief written form the choice of the processed content/topic in the form of a mind map, their functionality and use in his/her educational activities.
Creation of non-linear presentations of educational content through the Prezi presentation platform supporting teacher's interpretation and systematization of students' knowledge
We acquire professional digital competencies in the concept of design and creation of impressive non-linear presentations of educational content realized through the Prezi Present cloud platform Prezi applicable to our own pedagogical activities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Prezi Present to the process of school teaching of subjects of their approbation at primary school / high school;
Topics:
Introduction of the software tool Prezi Present as a presentation platform - creation of trendy, effective presentations; Explanation and clarification of the terms used in the field of creating didactic presentations in the environment of Prezi Present; Possibilities of using the presentation application Prezi Present in the preparation and creation of supporting educational materials effectively usable in the teaching of their own subject; Presentation of examples of presentations used in teaching science, social science, art-educational and vocational educational disciplines; Illustrative comparison of differences between classical (Microsoft PowerPoint) and dynamic (Prezi Present) presentations;
Theoretical background of presentation preparation and the system of selection of presented information; Basic steps of the procedure for creating didactic presentations in Prezi Present; Functionality of the online presentation tool Prezi Present; Creating dynamic presentations in Prezi Present - working with text and graphic objects; Creating topic/subtopic structures, changing the order of topics/subtopics, Creating depth and rotation effects; Inserting additional graphic visuals into a presentation in Prezi Present; Working in edit mode for main topics, subtopics and other presentation content; Creating visual effects and animations of presentation objects;
Use of templates - change the design - colors, background, fonts; Inserting audio tracks on the background of individual topics/subtopics, the whole presentation; 3D presentations; Importing and editing PowerPoint presentations in Prezi Present; Sharing presentations with other users, sharing on social networks, on web portals; Exporting presentations to *.pdf and Portable Prezi (for off-line presentation); Export options and presentation size; Working with Prezi Present in off-line mode.
Within the distance assignment, the student will use the Prezi Present presentation tool to create an original didactic and visually engaging presentation of the educational content for the target group

of students. The focus of the presentation should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at the primary school / secondary school in the intent of the approbation subjects that the student is studying in the study programmes of teaching at the Faculty of Education of the Charles University. The presentation will be at least 30 presentation views (= topics at the highest hierarchical level, subtopics at lower hierarchical levels and stack structure pages) to a minimum hierarchical nesting depth of three.
Use of Microsoft 365 platform in teacher's pedagogical activity
We develop professional digital competencies in the concept of design and creation of responsive presentations with educational content and emphasis on the cloud solution Microsoft Sway usable in educational activities implemented in schools or school facilities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Microsoft Sway to the process of school teaching of subjects of their approbation at primary school / secondary school;
We hone professional digital skills to include the ability to effectively use a range of form content controls and ActiveX elements of Microsoft Word in the creation of interactive worksheets, tests and supplementary learning materials for pupils or other classroom agenda documents usable in the context of pedagogical activity;
We are mastering the methodology of applying interactive worksheets communicated to pupils through Microsoft Word to the process of school teaching of subjects of their area of specialization at primary school / high school;
Develop professional digital skills in the creation of large documents (such as letters, invitations, labels) through a mass correspondence tool usable in the maintenance of relevant pedagogical documentation;
We develop professional digital skills in the creation of statistical calculations, compound expressions using functions for finding conditional frequency, sum, or arithmetic mean and techniques for addressing continuous and discontinuous areas in expressions/functions usable in the tabular processing of classroom data (student evaluations in knowledge or sports activities) supported by Microsoft Excel;
We hone professional competencies to include the ability to effectively apply advanced conditions and techniques for conditional formatting of table records using functions;
We extend digital skills to include the ability to effectively apply an advanced filtering tool to large tabular data by defining compound logical conditions (AND/OR), wildcards (*, ?), and a Subtotal function usable in maintaining appropriate pedagogical documentation;
Develop professional digital skills in creating cumulative graphical visualizations of tabulated data in the context of changing attributes of individual chart elements;
We apply other selected tools of the Microsoft 365 cloud platform, with an emphasis on the Microsoft Teams software application for teachers to use in conducting online learning activities.
Topics:
A basic theoretical introduction to Microsoft cloud solutions;
Sway presentation platform - creation of interactive school materials (portfolios), impressive presentations of educational content; Other possibilities of practical use of Microsoft Sway in educational activities; Concept of creating multimedia responsive presentations; Creating a new Sway, creating a Sway by importing an existing file/presentation, creating a Sway based on a template; Articulating presentation content; Options for inserting and formatting supported visuals via tabs; Grouping multimedia content; Influencing the appearance of a presentation; Changing the layout of content; Adapting specific elements to the style of a presentation; Exporting a presentation in *.pdf/*.docx; Additional options for setting up the presentation in Sway; Share Sway output from a personal Microsoft account; Share Sway output from an account assigned by the educational organization;

Editing large text documents in the Microsoft Word environment - standard settings; Using tabs; Text blocks; Columns; Objects in text - equation editor; Tables in text; Editing a document using a style; Creating your own style and editing an existing style. Document Revision. Definition of the terms section and reference and possibilities of their use; Document revision and its use in writing term papers and qualification papers; Document structuring - dividing a document into sections, types of section breaks, page settings in sections, creating a header and footer in a document divided into sections; Possibilities of using a structured document within the agenda of a teaching staff member; Creating references - automatic content creation, content setup, content formatting, numbering figures and tables, creating a list of tables and figures, footnotes and endnotes, cross-references, citations and list of references used, creating a document index; Creating templates - the importance of a template type document. Electronic forms - what are form elements and what is their difference from ActiveX elements, settings of form elements, ActiveX element and its settings, Form security; Application of the acquired experience and skills of working with Microsoft Word text editor in creating documents useful in own pedagogical activities; Creation of large documents - letters, invitations, labels - by means of the tool of mass correspondence useful in the framework of keeping the relevant pedagogical documentation.
Working with tabular data in Microsoft Excel; Inserting data into cells; Predefined and custom data format; Working with cells - moving, cutting, copying; Bulk filling of data and creating expressions/patterns; Applying elementary functions; Modifying function parameters; Modifying table appearance; Sorting tabular data; Data lists - creating custom lists; Increasing values. Rounding; Absolute and relative cell addressing; Hiding table values; Notes in cells; Working with large data - automatic and extended data filter, Subtotal function; Operations between sheets; Conditional formatting of table data; More advanced functions - If, Count, CountIf, SumIf, SumIfS, AverageIfS; Contingency table; Search functions; Creating forms.
We get familiar with the Microsoft Teams online communication platform environment; Creating teams; Creating a pure team in MS Teams; Creating teams from an existing team and basic team customization; Creating a team from an Office 365 Group; Setting up and managing teams; Managing team members; Managing teams in bulk; Guest in a Team Class; Invitation from MS Teams; Channels; Cards; Creating your first online lesson; Creating a link to a lesson; Connecting students to an online lesson; Running a lesson with MS Teams; Preparing a lesson outline; Presenting in MS Teams; Tools available during the implementation of an online lesson on the student's/teacher's side (e.g. Conversation panel; Reporting for a word; Downloading a list of participants, etc.); Course notes - notepad; Uploading files with educational content; Creating a shared file for pupils/students in the virtual classroom; Creating a quiz; Quiz evaluation, Quiz setup.
Within the distance task, the student will design and create a document in the form of an electronic workbook in Microsoft Word using a template and applying content controls and ActiveX elements - text field, drop-down field, drop-down list, comma field, option button, command button - usable in the context of teaching subjects of his/her area of specialization at primary school / high school.
Within the distance task, the student will create a table of fictitious evaluation of pupils in the framework of knowledge or sports activities implemented in schools or school facilities in the range of at least 20 rows and 10 columns, where the functions of the Microsoft Excel spreadsheet application will be used in the context of the complexity of the explained issue.
In a distance task, the student formats a table of fictitious assessment of pupils in knowledge/sport activities, applying various conditions and techniques of conditional formatting of the table entries in the intent of the difficulty of the explained problem.
In the distance task, the student will create three different graphical visualisations of the data from the table of the previous distance task, in which he/she has processed the assessments achieved in the knowledge/sport activities implemented in schools or school facilities. They will add to the

graphical visualisation the title of the graph, the axis names as well as other parameters of the graph as they wish in the context of the readability of the graph.
In the distance task, the student applies an extended filter to the table from the previous distance task to display the student's name and grade attained in the context of the knowledge/sport activities carried out in the school or school facilities and filters to another location within the same worksheet/ workbook when defining specific filter conditions (e.g. grade attained below/above a set value, etc.). Within the framework of the distance task, the student will create through the Microsoft Sway application an original, dynamic and visually impressive presentation of the learning issue for the target group of pupils according to his/her own discretion in the intent of school teaching of the subjects of his/her apprenticeship at primary school/elementary school. The aim of the presentation to be realized by the student is to make it multimedia and at the same time attractive for the target group of pupils in terms of content. The scope of the presentation in Microsoft Sway must consist of at least 25 presentation views - cards with the subject content. To organize the presentation, the student should use its layout into sections, subsections and layers in order to increase the clarity of the presented topic for the student

The rating shall be awarded on a scale of
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation

in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.
Scale of assessment (preliminary/final): 70/30

Learning outcomes:
Learning outcomes and transferable competences:
The aim of the educational discipline Digital Technologies 2 is to develop digital skills in the field of work with selected software (desktop and cloud) didactic applications and to be able to apply them effectively in the context of their future teaching profession.
By completing the educational discipline Digital Technologies 2, the student has the competences and advanced digital skills to effectively use the tools of the software application ActivInspire and the cloud environment ClassFlow by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.
By completing the educational discipline Digital Technologies 2, the student acquires advanced professional digital competences in the concept of design and creation of interactive video presentations of educational content implemented through Prezi Present and Prezi Video cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline, the student acquires competence and advanced digital skills in the concept of design, creation and administration of (gamification) quiz and educational activities and knowledge games with dynamic elements created through the cloud tool Socrative 2.0, Kahoot!, Wizer.me and Google Forms usable in own educational activities implemented in schools and school facilities for the target group of intact pupils as well as pupils with special educational needs.
By completing the educational discipline Digital Technologies 2, the student has, last but not least, competencies and advanced digital skills in the field of vector graphic creation in the environment of the cloud application Prezi Design in the implementation of the work activities of a pedagogical employee of regional education or his/her own professional development.

Class syllabus:

Brief outline of the course

The content of the educational discipline Digital Technologies 2 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.content structure of the discipline can be adapted to the current requirements of practice and students.

Application of ActivInspire software application and ClassFlow cloud environment in the educational process

We master the principle and methodology of working with selected (Promethean World Ltd) digital didactic resources designed to support interactive teaching of subjects of its approbation in primary and secondary schools;

We develop professional digital competences by the ability to effectively use the software tools of the ActivInspire desktop application and the ClassFlow cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in a lesson in the school classroom or in home conditions in the case of distance/hybrid education; In the context of the above activity, the trainee is also expected to learn the methodology for applying the activities developed in the school classroom;

We gain knowledge about desktop digital voting solutions and (trendy) cloud-based applications for creating knowledge tests/quizzes currently available on the market as an interactive didactic means of teaching, advantages and disadvantages of their deployment in the teaching process in the field of regional education;

We acquire digital skills in creating, editing and administering knowledge tests through voting sessions and supported by the ActivInspire software application and ActivExpression2 digital voting device to stimulate pupil activation and attention in the classroom; We use the ExpressPoll voting session; we use the question creation wizard to create test activities in the teacher stimulation; we implement the work with the question set wizard for processing at the pupil's own pace (voting session in the pupil stimulation) in the teaching of the subjects of his/her apprenticeship;

We are mastering the methodology of applying the knowledge tests communicated to pupils through the ActivInspire application and the ActivExpression2 digital voting device to the process of school teaching of the subjects of their approbation in primary/ secondary schools;

Develop skills in statistically processing the results of whole group voting activities into the ActivInspire demonstration workbook, as well as exporting them to Microsoft Excel;

We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the ActivBoard interactive whiteboard.

Topics:

Design of demonstration workbooks - options for setting up and customizing the ActivInspire work environment; Main toolbar - demonstration for familiarizing yourself with the most commonly used tools - ideas for their use in the creation of interactive educational content; Annotation mode on the desktop; Browsers in ActivInspire; Export/Import (*.flipchart) of demonstration workbooks; Teacher-student collaboration on the whiteboard - dual user mode;

Adding additional graphical content to the ActivInspire demonstration workbook; Importing and exporting asset packages; Defining object properties; Using layers and layering: Blind Map, Magic Tunnel, Magic Ink - ideas for using them when designing educational activities aimed at the target

group of students; Adding and removing links to linked external files/internet resources; Creating and using grid features when designing educational activities; Creating interactive demonstration workbooks - creating containers; Working with actions; Suggestions for their use of selected actions in the creation of interactive materials usable in the educational process; Benefits of using profiles; Annotating the desktop; Using desktop tools; Working in dual user mode; Using mathematical and design tools; Demonstrations of the use of mathematical and design tools in the creation of interactive materials usable in the educational process;
We extend professional digital competencies with the ability to effectively apply gamification educational activities through predefined templates - Sorting into categories, Crossword, Learning Cards, Assigning and Sorting items and other templates supported by the cloud-based ClassFlow application;
Current trends in the application of digital voting solutions for education; Technological principle of digital voting systems; Possibilities of using digital voting systems in school teaching in primary schools / elementary schools ; Methodology of working with digital voting systems; Digital voting solutions - effective support of group cooperation in classrooms stimulating the learning process;
We use the ActivExpression2 digital voting system in the classroom; Components of an intelligent digital voting solution; Registration of ActivExpression2 voting devices in ActivInspire; Voting Browser; Types of voting sessions and test questions supported by the ActivInspire software application and ActivExpression2 voting device; Working with voting session results in ActivInspire - viewing results in different formats; Exporting results from ExpressPoll from prepared questions and from a set of self-paced questions to Microsoft Excel; Suggestions for educational activities and games using ActivExpression2 voting devices to promote student activation and attention in the classroom.
Within the framework of the distance assignment, the student in the ActivInspire environment will develop a set of engaging learning activities, knowledge games, engaging presentations of educational content as new interactive forms of learning material supporting the activation and attention of students in the classroom. In conceptualising the design and development of the task, the learner will make use of as wide a range of available tools, functions, actions and features as possible. Within a developed demonstration workbook of at least 6 pages, the student will be expected to primarily use the container activity, magic ink, magic tunnel, set actions and constraints on objects, and apply the presentation tools of the ActivInspire environment. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.flipchart format, the student will indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the distance assignment, the student will create a set of 10 gamification educational activities for the target group of students with the effective use of pre-prepared templates and tools of the ClassFlow cloud environment. In the accompanying document (a separate file of *.docx format) to the created gamification activities, the student will include the methodology of their integration into the educational activities of the target group of pupils.
Within the framework of the distance task, the student will create, through the ClassFlow cloud environment, a test activity conceived from 20 test questions of supported types with the potential possibility of its use in the teaching of the subjects of his/her apprenticeship to pupils at primary school / secondary school.
We create video presentations of educational content through the cloud application Prezi Video
We develop professional digital competencies in the design and creation of compelling non-linear video presentations of educational content realized through Prezi Present and Prezi Video cloud platform Prezi by expressing visual ideas applicable to our own pedagogical activities;

We are mastering the methodology of applying video presentation of educational content communicated to pupils through Prezi Video to the process of school teaching of subjects of its approbation at primary school / high school;
We innovate didactic approaches to educational activities implemented in schools or educational institutions through immersive non-linear video presentations created in the cloud platform Prezi.
Topics:
We create a video presentation in the Prezi Video online editor environment from scratch using the Quick record tool - selecting a suitable template, inserting text content and other graphic visuals; supplementing the video presentation with a recording of your own image and sound;
We create a video presentation in the Prezi Video online editor environment by offering reusable videos recorded by other Prezi Video users;
Creating a video presentation based on a Prezi Present; Adding an accompanying commentary; Adding a video with accompanying commentary.
Within the distance assignment, the student will create an original didactic and visually engaging video presentation of educational content of his/her choice for the target group of pupils, using the Prezi cloud platform (Prezi Present and Prezi Video), in a range of at least 20 presentation views, usable in teaching the subjects of his/her specialisation at primary school/junior high school.
We use selected Web 2.0 software tools to obtain feedback from students participating in the school teaching process, in the case of students enrolled in distance (online) learning;
We are expanding the knowledge framework in the field of application of gamification (game-based learning) as one of the innovative and activating methods applied in the educational process at the primary school level;
We are expanding digital skills to include the ability to effectively use Socrative 2.0, a cloud-based application designed to create and manage knowledge/quiz activities in order to get immediate feedback from students participating in a lesson in the classroom or at home in the case of distance/ hybrid learning;
We are mastering the methodology of applying knowledge/quiz activities communicated to students through Socrative 2.0 to the process of school teaching of subjects of their area of interest in primary schools;
We extend professional digital competences with the ability to create gamification quiz activities and knowledge games through the online platform Kahoot! into the school learning process in a fun and playful way - transforming traditional knowledge testing through quizzes in an activating form using digital means;
We acquire competencies in the application of the application methodology, in the Kahoot! author-prepared, gamified educational and quiz activities to the process of school teaching of subjects of their approbation in primary school / secondary school;
We develop digital competences by the ability to effectively use the cloud tool Wizer.me for creating multimedia online worksheets with educational content for the target group of primary school pupils;
We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Wizer.me to the process of school teaching of subjects of their approbation in primary school / secondary school;
We master the principle and methodology of working with the cloud application Google Forms designed for the creation of online knowledge tests and research tools usable in the context of pedagogical activities;
Topics:
Socratvive.com - a web-based tool for online testing of student knowledge; Free registration vs. benefits of paid registration for teachers; Creating a teacher/student account; Test administration panel in Socrative 2.0 - Creating a new test - question types for creating your own tests - multiple

choice, yes/no and short open answer; Managing teacher-created tests; Creating a copy of a test - a variant for a parallel group with slightly different questions; Deleting a test; Downloading a test to a document in *.pdf; Editing the created test; Importing a test from another teacher - sharing tests between teachers; Access to the results of all (already) completed tests; Modes of making the test available to pupils - immediate feedback: Instatnt Feedback; Teacher-controlled test; Selecting the ways of displaying the results; Defining the appearance of the test results - a general overview of all pupils with statistics of pupil's success and questions; Separate *.Separate pdf files for each pupil; Success statistics for each test question; Practical examples of administered tests in the Socrative 2.0 environment for different educational disciplines and learning topics;
For the sake of brevity, the thematic focus of Kahoot! is analogous in content to the Socrative 2.0 application;
Cloud Computing; Google Drive; Viewing Google Docs options; Description of the Google Forms environment - Questions tab; Creating a form; Editing the appearance of the form; Setting up the form as a quiz; Evaluating the data obtained from the form administration - Answers tab; Sending the form to respondents; Setting up Google Form sharing - in Google Drive and in the Google Forms editor; Setting up Google Form sharing for a user with an un-created Google account.
As part of the distance task, the student will create a knowledge test with ten multiple choice questions, ten yes/no questions and ten short free-form questions using the online software application Socrative. The focus of the knowledge test should be situated in a curricular issue of the student's choice falling within the educational content of the subject taught at primary/ secondary school, in the context of the subjects of interest that the student is studying in the teacher education programmes at PdF UK. The knowledge test defined in this way will be implemented by the student among his/her classmates in his/her educational group. As part of the distance assignment, the student will create a software application Kahoot! test activity made up of 20 knowledge questions of supported types. The focus of the test activity should be situated in a teaching issue of his/her own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student studies in the study programs of teaching at the Faculty of Education of the Charles University. The test activity defined in this way will be implemented by the student among the classmates of his/her educational group.
Within the distance assignment, the student will design and create an engaging multimedia worksheet with educational content for the target group of pupils in primary school / secondary school in the environment of the cloud tool Wizer.me; To the created digital graphic output (in a separate file format *.docx), the student will provide a methodology for its inclusion in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a knowledge quiz activity with a minimum of 15 questions of supported types via the Google Forms cloud application. The focus of the knowledge quiz should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at PdF UK. The knowledge quiz defined in this way will be implemented by the student among the classmates of his/her educational group.
Creation of digital graphic outputs in the environment of selected cloud applications
Acquire digital competences by the ability to effectively use the Prezi Design cloud tool of the Prezi cloud platform to create multimedia posters with educational content intended for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;
We develop digital competences by the ability to effectively use the cloud tool Glogster (edu.Glogster.com) for digital storytelling - creating engaging multimedia posters with educational content - designed for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;

We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Prezi Design and Glogster to the school teaching of subjects that the student studies in the study programs of teaching at the Faculty of Education at Charles University.
Topics:
Prezi Design as a comprehensive graphic design and data visualization tool; Template library; Creating and editing content by adding multimedia items in the editor; Adding, moving and layering objects; Using *.ppt, *.pdf and *.doc in Prezi Design; Implementing animated elements into the graphic content you create; Creating visual effects to images by applying masks and filters; Adding links to text objects, graphics and shapes; Multi-page design; Linking text, images, icons and shapes to pages and sections; Sharing content created in Prezi Design with your audience on social media using private or public links; Collaborating in the Prezi Design environment; Adding/removing collaborators; Adding an entire team of collaborators; Collaborating in real time;
Creating and editing engaging data visualizations using maps; Creating a social post - adding and editing content, adding animation to the content of the post being created; Downloading and sharing the created content for publishing purposes;
Creating infographics for visual representation of information and data, Adding and editing content; Creating gif and mp4 videos in the Prezi Design environment; Embedding videos from Prezi Video into Prezi Design; Adding videos to Prezi Design and editing settings; Media integrations in Prezi Design - adding content from Prezi Video to projects.
Within the distance task, the student will design and create in the cloud tool Prezi Design an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects, which the student studies in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.
Within the distance task, the student will design and create in the cloud tool edu.Glogster an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde012/22	Digital technologies 2

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 3., 5.

Educational level: I.

Prerequisites: PdF.KPg/B-VUZde002/22 - Digital technologies 1

Course requirements:
Prerequisites: B-VUZde002 / Digital technologies 1
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
active participation in seminars conducted by both face-to-face and distance learning methods;
processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;
development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Video an original and visually impressive video presentation of the educational content of the selected teaching subject at primary school / secondary school in the context of the subjects that the student studies in the study programs of teaching at the Faculty of Education of Charles University; The structure of the video presentation should be based on the presentation created in the Prezi Present software application; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defence of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.
The rating shall be awarded on a scale of
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation

in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.
Scale of assessment (preliminary/final): 70/30

Learning outcomes:
Learning outcomes and transferable competences:
The aim of the educational discipline Digital Technologies 2 is to develop digital skills in the field of work with selected software (desktop and cloud) didactic applications and to be able to apply them effectively in the context of their future teaching profession.
By completing the educational discipline Digital Technologies 2, the student has the competences and advanced digital skills to effectively use the tools of the software application ActivInspire and the cloud environment ClassFlow by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom or in home conditions in the case of distance/hybrid education.
By completing the educational discipline Digital Technologies 2, the student acquires advanced professional digital competences in the concept of design and creation of interactive video presentations of educational content implemented through Prezi Present and Prezi Video cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline, the student acquires competence and advanced digital skills in the concept of design, creation and administration of (gamification) quiz and educational activities and knowledge games with dynamic elements created through the cloud tool Socrative 2.0, Kahoot!, Wizer.me and Google Forms usable in own educational activities implemented in schools and school facilities for the target group of intact pupils as well as pupils with special educational needs.
By completing the educational discipline Digital Technologies 2, the student has, last but not least, competencies and advanced digital skills in the field of vector graphic creation in the environment of the cloud application Prezi Design in the implementation of the work activities of a pedagogical employee of regional education or his/her own professional development.

Class syllabus:

Brief outline of the course

The content of the educational discipline Digital Technologies 2 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.content structure of the discipline can be adapted to the current requirements of practice and students.

Application of ActivInspire software application and ClassFlow cloud environment in the educational process

We master the principle and methodology of working with selected (Promethean World Ltd) digital didactic resources designed to support interactive teaching of subjects of its approbation in primary and secondary schools;

We develop professional digital competences by the ability to effectively use the software tools of the ActivInspire desktop application and the ClassFlow cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in a lesson in the school classroom or in home conditions in the case of distance/hybrid education; In the context of the above activity, the trainee is also expected to learn the methodology for applying the activities developed in the school classroom;

We gain knowledge about desktop digital voting solutions and (trendy) cloud-based applications for creating knowledge tests/quizzes currently available on the market as an interactive didactic means of teaching, advantages and disadvantages of their deployment in the teaching process in the field of regional education;

We acquire digital skills in creating, editing and administering knowledge tests through voting sessions and supported by the ActivInspire software application and ActivExpression2 digital voting device to stimulate pupil activation and attention in the classroom; We use the ExpressPoll voting session; we use the question creation wizard to create test activities in the teacher stimulation; we implement the work with the question set wizard for processing at the pupil's own pace (voting session in the pupil stimulation) in the teaching of the subjects of his/her apprenticeship;

We are mastering the methodology of applying the knowledge tests communicated to pupils through the ActivInspire application and the ActivExpression2 digital voting device to the process of school teaching of the subjects of their approbation in primary/ secondary schools;

Develop skills in statistically processing the results of whole group voting activities into the ActivInspire demonstration workbook, as well as exporting them to Microsoft Excel;

We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the ActivBoard interactive whiteboard.

Topics:

Design of demonstration workbooks - options for setting up and customizing the ActivInspire work environment; Main toolbar - demonstration for familiarizing yourself with the most commonly used tools - ideas for their use in the creation of interactive educational content; Annotation mode on the desktop; Browsers in ActivInspire; Export/Import (*.flipchart) of demonstration workbooks; Teacher-student collaboration on the whiteboard - dual user mode;

Adding additional graphical content to the ActivInspire demonstration workbook; Importing and exporting asset packages; Defining object properties; Using layers and layering: Blind Map, Magic Tunnel, Magic Ink - ideas for using them when designing educational activities aimed at the target

group of students; Adding and removing links to linked external files/internet resources; Creating and using grid features when designing educational activities; Creating interactive demonstration workbooks - creating containers; Working with actions; Suggestions for their use of selected actions in the creation of interactive materials usable in the educational process; Benefits of using profiles; Annotating the desktop; Using desktop tools; Working in dual user mode; Using mathematical and design tools; Demonstrations of the use of mathematical and design tools in the creation of interactive materials usable in the educational process;
We extend professional digital competencies with the ability to effectively apply gamification educational activities through predefined templates - Sorting into categories, Crossword, Learning Cards, Assigning and Sorting items and other templates supported by the cloud-based ClassFlow application;
Current trends in the application of digital voting solutions for education; Technological principle of digital voting systems; Possibilities of using digital voting systems in school teaching in primary schools / elementary schools ; Methodology of working with digital voting systems; Digital voting solutions - effective support of group cooperation in classrooms stimulating the learning process;
We use the ActivExpression2 digital voting system in the classroom; Components of an intelligent digital voting solution; Registration of ActivExpression2 voting devices in ActivInspire; Voting Browser; Types of voting sessions and test questions supported by the ActivInspire software application and ActivExpression2 voting device; Working with voting session results in ActivInspire - viewing results in different formats; Exporting results from ExpressPoll from prepared questions and from a set of self-paced questions to Microsoft Excel; Suggestions for educational activities and games using ActivExpression2 voting devices to promote student activation and attention in the classroom.
Within the framework of the distance assignment, the student in the ActivInspire environment will develop a set of engaging learning activities, knowledge games, engaging presentations of educational content as new interactive forms of learning material supporting the activation and attention of students in the classroom. In conceptualising the design and development of the task, the learner will make use of as wide a range of available tools, functions, actions and features as possible. Within a developed demonstration workbook of at least 6 pages, the student will be expected to primarily use the container activity, magic ink, magic tunnel, set actions and constraints on objects, and apply the presentation tools of the ActivInspire environment. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.flipchart format, the student will indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the distance assignment, the student will create a set of 10 gamification educational activities for the target group of students with the effective use of pre-prepared templates and tools of the ClassFlow cloud environment. In the accompanying document (a separate file of *.docx format) to the created gamification activities, the student will include the methodology of their integration into the educational activities of the target group of pupils.
Within the framework of the distance task, the student will create, through the ClassFlow cloud environment, a test activity conceived from 20 test questions of supported types with the potential possibility of its use in the teaching of the subjects of his/her apprenticeship to pupils at primary school / secondary school.
We create video presentations of educational content through the cloud application Prezi Video
We develop professional digital competencies in the design and creation of compelling non-linear video presentations of educational content realized through Prezi Present and Prezi Video cloud platform Prezi by expressing visual ideas applicable to our own pedagogical activities;

We are mastering the methodology of applying video presentation of educational content communicated to pupils through Prezi Video to the process of school teaching of subjects of its approbation at primary school / high school;
We innovate didactic approaches to educational activities implemented in schools or educational institutions through immersive non-linear video presentations created in the cloud platform Prezi.
Topics:
We create a video presentation in the Prezi Video online editor environment from scratch using the Quick record tool - selecting a suitable template, inserting text content and other graphic visuals; supplementing the video presentation with a recording of your own image and sound;
We create a video presentation in the Prezi Video online editor environment by offering reusable videos recorded by other Prezi Video users;
Creating a video presentation based on a Prezi Present; Adding an accompanying commentary; Adding a video with accompanying commentary.
Within the distance assignment, the student will create an original didactic and visually engaging video presentation of educational content of his/her choice for the target group of pupils, using the Prezi cloud platform (Prezi Present and Prezi Video), in a range of at least 20 presentation views, usable in teaching the subjects of his/her specialisation at primary school/junior high school.
We use selected Web 2.0 software tools to obtain feedback from students participating in the school teaching process, in the case of students enrolled in distance (online) learning;
We are expanding the knowledge framework in the field of application of gamification (game-based learning) as one of the innovative and activating methods applied in the educational process at the primary school level;
We are expanding digital skills to include the ability to effectively use Socrative 2.0, a cloud-based application designed to create and manage knowledge/quiz activities in order to get immediate feedback from students participating in a lesson in the classroom or at home in the case of distance/ hybrid learning;
We are mastering the methodology of applying knowledge/quiz activities communicated to students through Socrative 2.0 to the process of school teaching of subjects of their area of interest in primary schools;
We extend professional digital competences with the ability to create gamification quiz activities and knowledge games through the online platform Kahoot! into the school learning process in a fun and playful way - transforming traditional knowledge testing through quizzes in an activating form using digital means;
We acquire competencies in the application of the application methodology, in the Kahoot! author-prepared, gamified educational and quiz activities to the process of school teaching of subjects of their approbation in primary school / secondary school;
We develop digital competences by the ability to effectively use the cloud tool Wizer.me for creating multimedia online worksheets with educational content for the target group of primary school pupils;
We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Wizer.me to the process of school teaching of subjects of their approbation in primary school / secondary school;
We master the principle and methodology of working with the cloud application Google Forms designed for the creation of online knowledge tests and research tools usable in the context of pedagogical activities;
Topics:
Socratvive.com - a web-based tool for online testing of student knowledge; Free registration vs. benefits of paid registration for teachers; Creating a teacher/student account; Test administration panel in Socrative 2.0 - Creating a new test - question types for creating your own tests - multiple

choice, yes/no and short open answer; Managing teacher-created tests; Creating a copy of a test - a variant for a parallel group with slightly different questions; Deleting a test; Downloading a test to a document in *.pdf; Editing the created test; Importing a test from another teacher - sharing tests between teachers; Access to the results of all (already) completed tests; Modes of making the test available to pupils - immediate feedback: Instatnt Feedback; Teacher-controlled test; Selecting the ways of displaying the results; Defining the appearance of the test results - a general overview of all pupils with statistics of pupil's success and questions; Separate *.Separate pdf files for each pupil; Success statistics for each test question; Practical examples of administered tests in the Socrative 2.0 environment for different educational disciplines and learning topics;
For the sake of brevity, the thematic focus of Kahoot! is analogous in content to the Socrative 2.0 application;
Cloud Computing; Google Drive; Viewing Google Docs options; Description of the Google Forms environment - Questions tab; Creating a form; Editing the appearance of the form; Setting up the form as a quiz; Evaluating the data obtained from the form administration - Answers tab; Sending the form to respondents; Setting up Google Form sharing - in Google Drive and in the Google Forms editor; Setting up Google Form sharing for a user with an un-created Google account.
As part of the distance task, the student will create a knowledge test with ten multiple choice questions, ten yes/no questions and ten short free-form questions using the online software application Socrative. The focus of the knowledge test should be situated in a curricular issue of the student's choice falling within the educational content of the subject taught at primary/ secondary school, in the context of the subjects of interest that the student is studying in the teacher education programmes at PdF UK. The knowledge test defined in this way will be implemented by the student among his/her classmates in his/her educational group. As part of the distance assignment, the student will create a software application Kahoot! test activity made up of 20 knowledge questions of supported types. The focus of the test activity should be situated in a teaching issue of his/her own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student studies in the study programs of teaching at the Faculty of Education of the Charles University. The test activity defined in this way will be implemented by the student among the classmates of his/her educational group.
Within the distance assignment, the student will design and create an engaging multimedia worksheet with educational content for the target group of pupils in primary school / secondary school in the environment of the cloud tool Wizer.me; To the created digital graphic output (in a separate file format *.docx), the student will provide a methodology for its inclusion in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a knowledge quiz activity with a minimum of 15 questions of supported types via the Google Forms cloud application. The focus of the knowledge quiz should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at PdF UK. The knowledge quiz defined in this way will be implemented by the student among the classmates of his/her educational group.
Creation of digital graphic outputs in the environment of selected cloud applications
Acquire digital competences by the ability to effectively use the Prezi Design cloud tool of the Prezi cloud platform to create multimedia posters with educational content intended for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;
We develop digital competences by the ability to effectively use the cloud tool Glogster (edu.Glogster.com) for digital storytelling - creating engaging multimedia posters with educational content - designed for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;

We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Prezi Design and Glogster to the school teaching of subjects that the student studies in the study programs of teaching at the Faculty of Education at Charles University.
Topics:
Prezi Design as a comprehensive graphic design and data visualization tool; Template library; Creating and editing content by adding multimedia items in the editor; Adding, moving and layering objects; Using *.ppt, *.pdf and *.doc in Prezi Design; Implementing animated elements into the graphic content you create; Creating visual effects to images by applying masks and filters; Adding links to text objects, graphics and shapes; Multi-page design; Linking text, images, icons and shapes to pages and sections; Sharing content created in Prezi Design with your audience on social media using private or public links; Collaborating in the Prezi Design environment; Adding/removing collaborators; Adding an entire team of collaborators; Collaborating in real time;
Creating and editing engaging data visualizations using maps; Creating a social post - adding and editing content, adding animation to the content of the post being created; Downloading and sharing the created content for publishing purposes;
Creating infographics for visual representation of information and data, Adding and editing content; Creating gif and mp4 videos in the Prezi Design environment; Embedding videos from Prezi Video into Prezi Design; Adding videos to Prezi Design and editing settings; Media integrations in Prezi Design - adding content from Prezi Video to projects.
Within the distance task, the student will design and create in the cloud tool Prezi Design an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects, which the student studies in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.
Within the distance task, the student will design and create in the cloud tool edu.Glogster an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course:
The course is completed by assessment, 100% of the interim assessment. Students are required to complete a midterm paper for 40 points and a midterm test for 60 points, for a total of 100 points. The condition for successful completion of the course is obtaining at least 60% of the maximum possible grade for the course. The grade is awarded on a scale:
The rating is awarded on a scale:
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes and transferable competences:
The aim of the course Educational Counselling is to provide students with an initial framework of knowledge in the field of the educational counselling system. Upon successful completion of the course, students will be able to navigate the school counseling system. They understand the place and role of the guidance counselor in the guidance system and master the prerequisites for the position of guidance counselor. Know the differences in the responsibilities of the class teacher, guidance counsellor or school counsellor in providing guidance on educational issues. They know the methods of educational counselling. They know strategies for the prevention of problem behaviour and understand their importance. They are able to apply the acquired knowledge in solving specific problem situations in educational practice. They are oriented in school career guidance. They are able to describe and interpret the importance of school cooperation with educational guidance and prevention institutions, social and legal protection bodies and others.
Transferable competences: by analysing, solving and discussing seminar assignments, students will be able to communicate their conclusions, think critically and think in context.

Class syllabus:
1. School guidance system.
2.Framework for the work of the educational advisor, professional and personal qualifications of the educational advisor, education of the educational advisor.
3. The class teacher and his/her role in counselling pupils and legal representatives in education and training.
4. Methods of work in educational counselling.
5. Strategies to prevent problem behaviour of pupils.
6. Addressing the educational difficulties of pupils.
7. Methods and possibilities of intervention of problem behaviour of pupils.
8. Career counselling.
9. Educational counselling in the field of care for gifted pupils.
10. Cooperation of the school with other institutions, family. Social and legal protection of children and youth.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde011/22	Educational psychology

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: 4 **per level/semester:** 52
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form:
2 hours lecture + 2 hours seminar/week; 44 hours total per semester, combined form (primarily full-time).
Student workload:
11 x 4 hours of direct teaching = 44 hours; continuous preparation (15 hours); preparation for the midterm test (20 hours); preparation of the seminar paper - output in video format (15 hours); preparation for the final examination (26 hours). 120 hours in total.

Number of credits: 4

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde005/22 - Developmental psychology

Recommended prerequisites:
B-PSYde005 Developmental psychology

Course requirements:
50% of the interim evaluation + 50% of the final evaluation
There will be one written examination during the semester with the possibility to get 30 points, students and present a seminar paper of max. 20 minutes + 10 minutes discussion or make the output interactive in the way of PepTalk/TedTalk, or as a video presentation (of students' choice) (max. 15 points), the level of giving feedback in the group (5 points). The exam will consist of a written part (30 points) and an oral part (20 points). Credit will not be awarded to a student who scores less than 50% on any of the assignments. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, the student needs to produce consistently excellent results, be able to study independently, and be able to reflect on the problems presented. The student is able to navigate a variety of literary sources of information and is able to select relevant sources for his/her study, is able to analyze and select professional or scientific information and to present to a group, is

proficient in the basics of educational psychology and is able to apply this information in practice. They are also able to self-reflect, receive feedback, and give feedback to others.
A grade of B means that the student achieved above average results throughout the semester, was capable of independent study, knows basic information related to educational psychology, can navigate the literature study, can apply the acquired knowledge to practice in educational work with children and pupils, is capable of self-reflection, accepting feedback and providing feedback to others, there are moderate deficiencies in his/her creative and critical thinking.
A grade of C means that the student has performed well during the semester, his/her theoretical knowledge of the subject matter is at a good level, but the ability to apply this knowledge quite correctly, to critically evaluate and compare individual literary sources and psychological knowledge is lacking. Minor shortcomings are evident in the ability to work with feedback and in the area of self-reflection.
A grade D means that the student has been less prepared during the semester, has slight deficiencies in theoretical knowledge related to the subject of education and has more problems in independent implementation work as well as in group work, cannot critically analyse information independently and has problems in correctly applying knowledge to practice, presentation skills and the ability to give feedback are at a weaker level.
A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyse and collate multiple pieces of knowledge, and more often fails to think critically and apply theoretical knowledge to practice, but knows most of the theoretical knowledge in the course and presentation skills and the ability to give feedback are at a borderline level of proficiency.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim evaluation + 50% of the final evaluation

Learning outcomes:
The aim of the course - which is another supporting component in the core of basic psychological disciplines, important in the profile of graduates of the field of psychology teacher education combined already at the bachelor's degree - is to make graduates know how to navigate the basic theoretical and empirically research-based knowledge of educational psychology. Students will be able to use this knowledge in their further studies and later in educational practice. They will be able to take a creative and active approach to working with children and pupils/students in school, know their motivation, learning styles and be able to select the right way of learning in individual conditions when working with a child/student, distinguish between different educational styles and educational situations, understand pupils' failure to thrive and know how to motivate them. They will also be able to assess, analyse and compare information, be able to think critically and evaluate different models of learning and working with children/students. In addition, they will further develop (transferable competences) their presentation skills, working with modern technologies, the ability to self-evaluate and give feedback.

Class syllabus:
1. System and methods of educational psychology. Determinants of individual psyche formation in the context of education and teaching/learning.
2. Psychological issues of learning. The concept of learning in terms of psychological theories of learning, types of learning, laws of learning, control of learning processes, motivation, and its influence on learning.
3. Cognitive and learning styles.
4. Social-psychological cognition in the pedagogical space (impression formation, distorting mechanisms in assessing performance or learning success, attitudes, stereotypes).

5. Communication in the pedagogical process - verbal and non-verbal communication, conflict situations and their resolution.
6. Teacher's strategies in classroom management, teacher's social-psychological competences.
7. Psychological analysis of success and failure of pupils or students in school. Psychological aspects of the personality of the teacher/person working with the child. Performance of pupils/ students and teachers.
8. Psychological issues in education, logical implications.
9. Individual characteristics of pupils/students with giftedness and behavioural disorders.
10. Individual characteristics of pupils/students with learning disabilities.
11. Individual characteristics of pupils/students and working with them. Multiculturalism, culture of poverty.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde030/22	Environmetal education

Educational activities:
Type of activities: lecture
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 1., 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The student will be evaluated on an ongoing basis:
a) defending a term paper with the content of current environmental problems on the territory of the Slovak Republic as well as environmental problems that are solved globally with a maximum value of 20 points
b) its elaboration in the form of analysis and critical evaluation of the chosen environmental issue, in the form of creating reflections from each presented environmental topic and application of the chosen topic to the education of pupils with a maximum value of 80 points.
A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. Credit will not be awarded to a student who obtains less than 40 points in a seminar paper and fails to defend the paper. To pass the course, a minimum score of 60% is required.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results), excellent performance, the student can work well with professional literature dealing with the issue of current environmental problems not only in the Slovak Republic but also at the global level, can critically evaluate environmental problems in society and create appropriate activating methods for the environmental problem usable in pedagogical practice
B (90-81%, very good - above average standard), excellent performance, the student can work with the literature dealing with the issues of current environmental problems not only in the Slovak Republic but also at the global level very well, but critical thinking in the field of environmental science is borderline, but can create appropriate activating methods for the environmental problem usable in pedagogical practice
C (80-73%, good - normal reliable work), good performance, the student can work well with literature dealing with current environmental problems not only in the Slovak Republic but also at the global level, but critical thinking in the field of environmental science is partially absent, but can create appropriate activating methods for the environmental problem usable in pedagogical practice

D (72-66%, satisfactory - acceptable results), satisfactory performance, the student can only partially work with professional literature dealing with current environmental problems not only in the Slovak Republic but also at the global level, critical thinking in the field of environmental science is partially absent and only partially knows how to apply environmental theory in the form of the creation of activating methods in pedagogical practice
E (65-60%, sufficient - the results meet the minimum criteria), sufficient performance, the student can work with the literature dealing with current environmental problems not only in the Slovak Republic but also at the global level at a minimum level, critical thinking in the field of environmental science is absent and his ability to apply environmental theory in the form of creating activating methods in pedagogical practice is minimal
Fx (59-0%, insufficient - additional work required), insufficient performance, student is unable to work with literature dealing with current environmental issues not only in the Slovak Republic but also on a global level, nor critically evaluate environmental issues and is unable to apply environmental theory in the form of creating activating methods to pedagogical practice
Scale of assessment (preliminary/final): 100/0

Learning outcomes:

Learning outcomes and transferable competences:
Upon completion of the course, the student will gain basic information on nature conservation, quality of life assurance and remediation options, which will subsequently enable him/her to solve problems in environmental issues. He will be able to apply all this knowledge to teaching practice; he will strengthen his digital skills in searching for literature on environmental issues on appropriate professional domestic and foreign Internet portals, as well as his communication skills, critical thinking and evaluation of environmental problems in society.

Class syllabus:

Brief outline of the course:
1. Ecology. (the student can distinguish between the concepts of ecology and environmental science, knows the relationships of organisms in the environment and how endogenous and exogenous factors affect the environment)
2. Stability and biodiversity of ecosystems. Protected areas. Regulation of trophic chains. Anthropocentrism, biocentrism and ecocentrism. (the student will learn to perceive the interconnectedness of relationships in nature, the sensitivity of ecosystem stability, how this stability is affected by man himself and ultimately be able to take a stance on the protection of individual ecosystems for the need to maintain balance in nature)
3. Waste management. (the student will get acquainted with the issues of waste management, the creation and regulation of the amount of waste in society, the problem of black dumps but also with the process of recycling as an option for environmental protection)
4. Transport and the greenhouse effect. (the student is able to assess the negative impact of transport use on the environment and is able to adopt the right attitude to dealing with the issue in terms of protecting the environment in which he/she lives)
5. Environmental education in primary schools. Environmental projects of the Slovak Republic. (The student knows how to incorporate environmental education as a cross-cutting theme in the state educational programme, knows how environmental education contributes to the development of the pupil's personality by acquiring the ability to understand, analyse and evaluate the relationships between man and his environment on the basis of knowledge of the laws governing life on Earth, to know and understand the connections between the development of human population and the relationship to the environment in different areas of the world, to understand the connections between local and global problems and their own responsibility in relation to the environment, ultimately the student will also become familiar with the current environmental projects of the

Slovak Republic that support this education at primary school and will be able to bring the environmental problems to the student's mental level by appropriate activating methods)

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde021/22	Ethical Propaedeutics

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
2 hours seminar/week; total 22 hours per semester, combined (primarily full-time)
Student workload:
11 x 2 hours of teaching = 22 hours; 33 hours of class preparation (including written preparation); 2 hours of preparation for the paper. Total 57
Teaching methods:
In the self-study, it is mainly a work with the text (selected passages of works of important authors relevant to the topic under discussion, scientific articles) or a critical reflection on other material (film); during seminars, the individual study of the assigned text (material) - which determines the main topic of the lesson - is followed mainly by dialogical methods such as discussion, interview, Socratic method, which are complemented by monological methods of interpretation, explanation, or lecturing.

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100% of the continuous assessment, which includes: 20% class preparation, 40% class activity, 40% report.
1. Preparation for each lesson, which consists of reading and reviewing the assigned text and handing in the outline by the beginning of the lesson.
2. Active participation in class - engaging in discussion.
3. Prepare and present a paper on the chosen topic.
For successful completion of the course, it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good - above average standard),
C (85-76%, well - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).

For grade A, the students performed excellently during the semester, they were always thoroughly prepared for classes, actively participated in the teaching and showed interest in the subject matter, their theoretical knowledge in the field of ethics is at a high level, they are able to apply the acquired knowledge without any problems, critically assess and compare individual ethical concepts and knowledge.
For grade B, students performed very well during the semester, they were prepared for the classes, they participated in the teaching, their theoretical knowledge in the field of ethics is at a very good level, they are able to apply the acquired knowledge, they can critically assess and compare individual ethical concepts and knowledge.
For a grade of C, students performed well throughout the semester, their theoretical knowledge of ethics is at a good level, but they lack the ability to apply this knowledge, critically evaluate and compare individual ethical concepts and knowledge.
For a grade of D, students were less prepared during the semester; they have slight deficiencies in theoretical knowledge related to ethics; they have difficulty working independently; they are unable to critically analyze information.
For a grade of E, students were only minimally prepared during the semester, were only minimally engaged in the course of instruction, have significant deficiencies in theoretical knowledge related to ethics; have significant difficulty working independently, and cannot critically analyze information.
For the Fx assessment, students were unprepared for class during the semester, did not engage in the course and were unable to respond to questions posed, unable to work independently, and had significant deficiencies in theoretical knowledge in the area of ethics.
Scale of assessment (preliminary/final): 100% of the continuous assessment, which includes: 20% class preparation, 40% class activity, 40% report.

Learning outcomes:
The aim is to be able to orientate oneself in the issue of social pathological phenomena, to know the cause of their occurrence, the consequences for the individual and to be able to implement preventive measures to eliminate them.
After completing the course, the student can: define the subject of ethics and the basic concepts of ethics, give an overview of the most important ethical concepts, understand the development of morality and ethical concepts in a historical context, understand the psychology of moral development, highlight the alternative and equivalence of ethical concepts, distinguish the ethical from the non-ethical sphere, help navigate ethical issues, recognize the value aspect of ethical categories, clarify the basic categories of ethics, find intrinsic motivational sources of behaviour, cultivate and develop empathy and the good in us. By completing the course, the student develops the following transferable competencies: communication skills, analytical skills, interpersonal skills, creativity and the ability to think abstractly, critical thinking skills, motivation and the ability to learn, reasoning in context.

Class syllabus:
1. Introduction to ethics as a philosophical discipline; definition of the subject of ethics and the basic concepts of ethics, morality, etiquette; basic forms of ethics.
2. Introduction of basic ethical concepts (virtue ethics, hedonism, deontological ethics, utilitarianism).
3. Selected forms of psychological ethics (Freud, Fromm, Frankl).
4. Psychology and the Problem of Evil (Zimbardo, Milgram).
5. The psychology of morality (Piaget, Kohlberg).

Recommended literature:
Compulsory readings:

Aristoteles (2011). Etika Nikomachova. Kalligram (Kniha druhá, kap. 1-6).
Epikuros (2014). O šťastnom živote l. Thetis, (List Menoikeovi).

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde016/22	Ethics and professional ethics

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 1., 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
100% of the interim grade, which includes 30% class activity (30 points) and 70% project (70 points).
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results), the student reflects correctly and actively both critically and creatively
knowledge, including its meaningful integration into the realities of life and pedagogical practice.
B (93-86%, very good - above average standard), the student reflects critically on knowledge appropriately,
including their meaningful integration into the realities of life and pedagogical practice.
C (85-76%, good - routine reliable work), students performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge.
D (75-68%, satisfactory - acceptable results), students were less prepared during the semester, they have slight deficiencies in theoretical knowledge. They cannot critically analyze information.
E (67-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge.
Fx (59-0%, insufficient - extra work required).
Learning outcomes:
Learning objectives and outcomes and transferable competences:
The thematic focus of the course introduces students to applied ethics and its disciplinary divisions, to
defining the basic concepts of ethics, explaining morality as a social regulator, moral norms and the principles of creating ethical codes. It focuses on the professional ethics of the teaching profession (teacher competences, ethical dilemmas in the teaching profession, etc.) and the importance of a code of ethics in this profession. The aim of the course is to highlight the importance of a favourable

classroom and school climate and to work with the content of the Convention on the Rights of the Child. Using selected examples from other branches of applied ethics (bioethics, media ethics, etc.) to show the importance of the presence of a code of ethics in the professions, the possibility of using classical ethical concepts and also different alternatives in solving ethical dilemmas.
This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).
The course contributes to the gradual development of important professional competences of future teachers by its focus and methods of education.
Scale of assessment (preliminary/final): 100/0

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde016/22	Ethics and professional ethics

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2., 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
100% of the interim grade, which includes 30% class activity (30 points) and 70% project (70 points).
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results), the student reflects correctly and actively both critically and creatively
knowledge, including its meaningful integration into the realities of life and pedagogical practice.
B (93-86%, very good - above average standard), the student reflects critically on knowledge appropriately,
including their meaningful integration into the realities of life and pedagogical practice.
C (85-76%, good - routine reliable work), students performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge.
D (75-68%, satisfactory - acceptable results), students were less prepared during the semester, they have slight deficiencies in theoretical knowledge. They cannot critically analyze information.
E (67-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge.
Fx (59-0%, insufficient - extra work required).
Learning outcomes:
Learning objectives and outcomes and transferable competences:
The thematic focus of the course introduces students to applied ethics and its disciplinary divisions, to
defining the basic concepts of ethics, explaining morality as a social regulator, moral norms and the principles of creating ethical codes. It focuses on the professional ethics of the teaching profession (teacher competences, ethical dilemmas in the teaching profession, etc.) and the importance of a code of ethics in this profession. The aim of the course is to highlight the importance of a favourable

classroom and school climate and to work with the content of the Convention on the Rights of the Child. Using selected examples from other branches of applied ethics (bioethics, media ethics, etc.) to show the importance of the presence of a code of ethics in the professions, the possibility of using classical ethical concepts and also different alternatives in solving ethical dilemmas.
This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).
The course contributes to the gradual development of important professional competences of future teachers by its focus and methods of education.
Scale of assessment (preliminary/final): 100/0

Class syllabus:
Brief outline of the course:
1. Introduction to the subject: defining the basic concepts: ethics and morality.
Ethics and professional ethics: definition of basic terms: applied ethics - sectoral division of applied ethics. Professional ethics as a part of applied ethics.
2. Professional tact and etiquette as a basis for the formation of the code of ethics of individual professions.
3. The teaching profession and the teacher's code of ethics. Status and role of the teacher. Resolving dilemmas in the teaching profession.
4. Positive climate in the classroom, relationships between school climate factors.
5. Convention on the Rights of the Child.
6. A closer definition of bioethics and its areas of interest on concrete examples, the issue of the code of ethics. Classical ethical theories and alternative methods in solving ethical dilemmas.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZde024/22	**Course title:** Family education
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Number of credits: 3	
Recommended semester: 1., 3., 5.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points).

The rating is awarded on a scale:

A (100-91%, excellent - excellent results with only minimal errors),

B (90-81%, very good - above average results with minor errors),

C (80-73%, good - normal reliable work, average results),

D (72-66%, satisfactory - acceptable results, but significant errors occur),

E (65-60%, sufficient - results meet minimum criteria),

Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).

A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, and above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes:
Learning objectives and outcomes:
The aim of the Family Education course is to convey basic information about the family as an educational institution and about the possible impact of the specifics of family life and family education on the educational process in school. The student is able to define the family as an educational institution, remembers its functions, knows the typology of families. The student can explain the transformations of the family in a historical context and the transformations of the family within its life cycle. The student knows and understands the educational goals, content, methods and means of family education. The student is able to critically evaluate and articulate the specifics of family education in alternative forms of partnership cohabitation. The student is able to categorize styles of family education. Describe and interpret inappropriate approaches in family education and predict their possible effects on student performance in school. The student is able to apply the acquired knowledge in solving educational difficulties of the pupil resulting from the specifics of family life and family education.
Transferable competences: by analysing, proposing solutions and discussing problem problems assigned during seminars, the student is able to communicate his/her conclusions, think critically, think in context.

Class syllabus:
Brief outline of the course:
1. Definition of family (traditional vs. newer concept of family), family typology and functions.
2. Basic demographic changes of the family in historical context (from traditional to postmodern family).
3. Family life cycle. Marriage as an institution. Education for marriage and parenthood.
4. The (un)stable family - the contemporary family and the issue of divorce. Inappropriate approaches in family upbringing in the period of divorce. Pupil in school in the period of parents' divorce process.
5. Alternative forms of cohabitation (cohabitation, mingle, single, "patchwork", homosexual partnerships...) - specifics of family education in alternative forms of cohabitation.
6. Pedagogy of the family. Theory of family education. Objectives, content, methods and means of family education. Styles of family education.
7. Relational attachment as a key prerequisite for harmonious personality development. Pupil's manifestations at school with regard to the type of relational attachment.
8. Alternative family education. Specifics of raising a child in foster care.
9. Different forms of violence in the family and their negative impact on the child's personality.

10. Specifics of family education in families with children with disabilities.

Prerequisites for successful completion of the course:
The course is completed with an assessment, weighted interim/final assessment 100/0.
100% of the continuous assessment includes: during the semester there will be approximately 6 - 8 assignments: focused on working with a professional text and its application in an example and the interpretation of the example processed on the basis of the professional text, the analysis of stereotypes in educational texts, the processing of professional literature into an annotation with questions on the read text. Students will use the e-learning environment moodle for their studies.
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes:
Learning objectives and outcomes and transferable competences:
Students know the mechanisms to prevent the violation of equal opportunities for women and men (girls and boys) in education; they can identify gender stereotypes and their negative consequences in the educational process. They use methods to deepen gender democracy in school; They perceive the educational process from a gender perspective. They can name and find connections between gender-sensitive education and the cross-cutting theme of education for marriage and parenthood (sex education); apply the gender perspective in relational sex education.
Learning objectives:
Students will acquire knowledge and skills that will enable them to prevent violations of equal opportunities for women and men (girls and boys), eliminate gender stereotypes and their negative consequences in the educational process, deepen gender democracy at school, and perceive the educational process from a gender perspective.

Class syllabus:
Brief outline of the course:
Definition of the terms: gender, sex, gender stereotypes, gender sensitive education, direct and indirect discrimination. Education and training from a gender perspective - theories of gender socialisation, feminist pedagogy, models of gender-sensitive pedagogy. Gender in the pedagogical process. Inequalities in school from a gender perspective. Language - gender insensitivity. Research, projects, development of study materials, methodologies - gender perspective. Gender aspects of marriage and parenthood/sexual relationship education in schools.

Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours lecture + 1-hour seminar/week, 33 hours total per semester, combined; (primarily full-time); 2P+1S (2 credits): 11 x 3 hours of direct instruction = 33 hours; 27 hours of exam preparation; a total of 60 hours of student work; discussion of the topic covered; incident method; experiential methods; e-learning; monologue methods;

Number of credits: 3

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
80 % of the final exam grade is in the form of a test. 20% of the mark for active participation in discussions throughout the semester, which the student will receive if he/she participates in at least one-third of the discussions. The student will take the test at the end of the semester. A minimum of 91% is required for a final grade of A, a minimum of 81% for a grade of B, a minimum of 73% for a grade of C, a minimum of 66% for a grade of D, and a minimum of 60% for a grade of E. To pass the course, a minimum of 60% of the grade is required.
The grade is awarded on a scale:
A (100-91%, excellent - outstanding results, the student is knowledgeable and proficient in the subject matter, demonstrates creativity and critical thinking),
B (90-81%, very good - above average standard, the student is knowledgeable about the issues, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the issue, has learned, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can orient himself/herself in the problem only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically)

Learning outcomes:

In the course World History I, the student acquires key facts from the prehistoric and ancient history of the world and Slovak provenance with emphasis on the historical development of European civilisation. The student develops historical thinking skills and evaluation of historical and cultural phenomena and contexts in the past with implications for the present. The student is able to analyse ancient civilisations, the causes of their flourishing and decline, and orientates himself/herself to significant personalities. Synthesises information and can update the acquired knowledge about the historical significance of ancient cultures and civilisations. The course is taught to prepare future teachers for their future profession.

Class syllabus:

The course focuses on deepening the knowledge of the development of prehistoric and ancient civilisations, emphasising the development of European society and Slovak provenance. The student will become familiar with the history of prehistory and antiquity through analysing the emergence and decline of individual cultures in the context of their natural conditions or environment. As a future teacher, the student can communicate the acquired knowledge to pupils. The course will concentrate on the following key topics:

- Introduction to the study of the history of prehistory and antiquity. The subject, division, historical sources, and methods of historical research.
- History of prehistory. Basic anthropogenesis. Chronology of the European prehistory, characteristics and periodisation of particular development periods (Paleolithic, Mesolithic, Neolithic, Eneolithic, Bronze Age, Iron Age) and cultures occurring on the territory of Slovakia.
- Characteristics of ancient Mesopotamia. Development of the civilisations of Sumer, Akkad, Babylonia, and Assyria.
- Ancient Near East. Characteristics of the development of ancient Israel, Persian and Elamite empires. A basic chronology and the most important rulers.
- Egypt and its neighbours in the Old, Middle, New and Late Empires. Characteristics of the specific features of Egyptian development. The Hittite and Mitanni empires. The struggle for hegemony in Asia Minor and the Near East. A basic chronology and the most important rulers.
- The Hittites and Mitanni. The struggle for hegemony in Asia Minor and the Near East. A basic chronology, and most important rulers.
- Aegean region - Minoan and Mycenaean civilisation. Homeric epics as a source of knowledge of the "dark period" of Greece, the archaic period of Greece, and the characteristics of conditions in Sparta and Athens.
- The peak of ancient Greek civilisation and the disputes in the Aegean. The Greco-Persian Wars, the Athenian Naval Society, Athenian society in the age of Pericles, characteristics of Sparta and its allies. Causes and periodisation of the Peloponnesian War.
- Theban hegemony, Greece under the domination of Macedonia. The reforms of Philip II and the time of Alexander of Macedon. The Diadochi and the division of the empire after Alexander's death. The emergence of the Hellenistic states and their struggle with Rome. Characteristics of conditions and historical development.
- The area of the western Mediterranean between 800 and 265 BC. Carthage, the Etruscans, the origins and beginnings of Rome, the early period of the Roman Republic, Greek colonisation in the western Mediterranean, and the conquest of Italy by the Romans.
- Emergence of the Roman Empire (264 - 30 BC). Punic wars and conquest of Hellenistic states, crisis and demise of the Republic, reforms of the Gracchus brothers, Marius' reform, Sulla. First and second triumvirate.
- The Roman Empire under the Principate (to 284 A.D.). The rise to power of Rome, barbarian Europe in this period, emphasised the territory of present-day Slovakia.
- Late Roman period (284-395). Characteristics of the Dominate and the whole of that period, up to the division of the Roman Empire. The decline of the Western Roman Empire and the emergence of

the barbarian kingdoms (395-476), migration of peoples, Slavs in the neighbourhood of the Roman Empire.

Course ID:	**Course title:**
PdF.KH/B-HISde002/22	General history II.

Educational activities:
Type of activities: lecture
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Two hours lecture/week; total per semester 22 hours, combined; (primarily full-time).
Student workload:
2P (3 credits): 11x 2 hours of direct instruction # 22 hours; 20 hours of preparation for midterm assessment; 35 hours of exam preparation. Total 77 hours of student work.
Learning methods: lecture, discussion of the topic, heuristic method, situation analysis method, e-learning.

Number of credits: 3

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
50% of the interim and 50% of the final assessment. The continuous assessment will consist of a written test in the last lecture, from which the student can obtain a maximum of 40 points, which is 40% of the total grade. 10% of the continuous assessment can be obtained for an active approach during the semester, consisting of asking questions in the discussion after each lecture. The student will take an oral examination during the examination period. In the oral examination, the student will draw two questions, the first on a broad historical issue and the second on a specific problem. The maximum score for both parts of the exam is 50 + 50 points. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. To pass the course, you must obtain a minimum of 60% of the marks.
The grade is awarded on a scale:
A (100-91%, excellent - outstanding results, the student is familiar with the subject matter, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the issues, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the subject, has learned the issue, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),

E (65-60%, sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically).

Learning outcomes:
The course aims to introduce the essential characteristics of the medieval world and its specificities from the end of the Western Roman Empire (476) to the discovery of America (1492). Based on the knowledge acquired, students will be able to analyse the basic categories of medieval society and its thought. They will learn about and be able to navigate the complex history of the Middle Ages. They will be able to analyse medieval European society and evaluate its historical and cultural significance for the present. Particular emphasis will be placed on acquiring knowledge in the development of Christianity and Islam. Adequate attention will also be paid to the history of Islam and non-European civilisations.

Class syllabus:
- The demise of the Western Roman Empire. Huns. Vandals. Visigoths. Ostrogoths. Longobards. Burgundians. Avars. Gepids. Bavarians.
- Early Middle Ages to the division of the Carolingian Empire. Treaty of Verdun (843). The emergence of the European "great nations".
- The Byzantine Empire. The Orthodox Church.
- Slavs in the early Middle Ages in the light of the sources. The emergence of Slavic states. The Norman expansion.
- Medieval Christianity. Religious orders - their importance and position in medieval society. The struggle for investiture. Bishoprics. Medieval education. Universities.
- Crusades. The Avignon captivity of the popes and the great schism.
- Mohammed and the rise of the Arab Empire. Life and culture in the Umayyad and Abbasid empires. Umayyad rule in the Iberian Peninsula.
- Political concepts in medieval Europe. History of England, France and the Holy Roman Empire. Hierarchical organisation of medieval society Individual and society. The Mongol Empire.
- Renaissance, humanism. A view of political events in the Apennine Peninsula.
- Extra-European civilisations. Overseas discoveries from 1415 to 1492.
- Economic history of the Middle Ages. Everyday life in the historical process.

Type, volume, methods and workload of the student - additional information
Type, scope and methods of educational activities: 2 hours lecture/week, a total of 24 hours per semester, attendance method
Student workload:
2P (3 credits): 13x2 hours of direct instruction # 26 hours; 20 hours of preparation for midterm assessment; 30 hours of practice for the exam. Total 76 hours of student work.
Learning methods: lecture, discussion of the topic covered, situation analysis method, fixation of the lectured information through a mid-term test (after the 7th topic), e-learning.

Number of credits: 3

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
40% of the interim and 60% of the final assessment - test and oral examination. The student will take the test after the seventh topic and the oral examination in the examination period. The written test assesses the knowledge acquired in the first seven lectures. In the midterm evaluation, the test will account for 30%, and 10% will be awarded to the student for active participation in the lectures. This dynamic approach will ask the lecturer at least one question from the ongoing teaching. In the oral exam, the student will pull two questions. One will be on a historical issue, and the other will focus on a figure from early modern history. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. Credit will not be awarded to a student who accumulates less than 59 points.
A (100-91%, excellent - outstanding performance, the student is knowledgeable and proficient in the subject matter, demonstrates creativity and critical thinking skills). Can actively gather information and creatively apply it to solve problems.
B (90-81%, very good - above average standard, above average standard, the student is oriented to the issue, has mastery of it, but his/her critical, constructive thinking is weaker when analysing and evaluating historical events).
C (80-73%, good-normal reliable work, normal dedicated work, the student knows how to navigate the issues, has learned the material, but cannot evaluate the knowledge gained critically and constructively).

D (72-66%), satisfactory - acceptable performance, the student can navigate the issues at only a basic level, the student's knowledge is fragmented, and the student does not demonstrate the ability to think critically. He/she has a weak cross-cutting understanding).
E (65-60%, adequate - results meet minimum criteria, the student can navigate the issue with great difficulty, has only the most basic knowledge, and does not demonstrate the ability to think critically. Does not have cross-cutting knowledge).
Fx (59-0%, insufficient - extra work required, student cannot navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically).

Learning outcomes:
The course aims to familiarise students with the period of the Modern Age (1492-1789). The student will acquire knowledge and be able to orientate himself/herself in the issues of the fundamental change of society from the Middle Ages to the modern period and in the modern society itself. The student will be able to analyse and categorise the principles of the functioning of society and its cultural and economic developments. Gain new knowledge of overseas discoveries, the price revolution and changes in modern society's economic and social life. The student will be able to navigate the complex religious situation during and after the Reformation (confessionalisation, disciplinisation). The student will become familiar with the causes and historical place of the phenomenon of absolutism in the history of the early modern period.

Class syllabus:
- How to teach about modernity in schools.
- Early modernism. Explanation of the concept. Chronology.
- Overseas discoveries. The formation of the Spanish colonial dominion. The four voyages of Christopher Columbus. Fernao Magalhaes. The origins of the English and French colonial conquests. The economic and social consequences of overseas discoveries. The price revolution.
- The origins of the Reformation. Martin Luther. The Second Reformation. Ulrich Zwingli. John Calvin.
- Recatholization. Counter-Reformation. Council of Trent. Confessionalization. Disciplinization.
- The Habsburgs in the 16th and 17th centuries. England in the 16th century. France in the 16th century.
- Expansion of the Ottoman Empire in the 16th and 17th centuries.
- Eastern Europe in the 16th and 17th centuries. The emergence of the Polish-Lithuanian Commonwealth. Russia in the 16th and 17th centuries.
- Political, economic and cultural conditions in Europe in the late 16th and early 17th centuries.
- The Thirty Years' War. The English Revolution. The absolutism of Louis XIV.
- Russia under Peter I. Great and Catherine II. Europe 1714 - 1748 (alliance system), the emergence and development of Prussia.
- Colonial expansion in the 17th and 18th centuries. The American Revolution.
- Political, economic and cultural conditions in Europe in the second half of the 17th and 18th centuries. The daily life of people in the modern period.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde006/22	General history IV.

Educational activities:
Type of activities: lecture
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours lecture/week, 22 hours total per semester, combined form; (primarily in person)
Student workload:
2P (3 credits): 11 x 2 hours of direct instruction = 22 hours; 18 hours of preparation for mid-term evaluation; 50 hours of exam preparation; 90 hours of student work in total.
Educational methods: monological method, problem-solving exercises; discussion of the subject; discussion of the topic; e-learning

Number of credits: 3

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
40% of the interim and 60% of the final evaluation. The student takes the test in the middle of Semester, from which he/she may obtain a maximum of 30 points. This represents 30 % of the grade. 10 %. The student will receive a grade for an active approach in lectures, which will consist of the student asking the teacher at least one question from the material covered during the semester. In the examination period, the student will take an oral examination. As part of the oral examination, the student takes one major question focusing on the focal topic and answers five minor questions focusing on a general overview of the period.
The rating is awarded on a scale:
A (excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C (good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the knowledge gained to practice),
D (satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),

Fx (insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic understanding, and does not demonstrate the ability to think critically).

Learning outcomes:

The student acquires the necessary knowledge and understanding of the political, economic and social development of the European and non-European world between 1789 and 1914. After successful completion, the student should be able to navigate the fundamental issues of general modern history. The course is intended to introduce students to general history from the late 18th century, from the Great French Revolution of 1789-1799, to the beginning of World War I. War, to provide a plastic picture of the transformation of the society during the long 19th century. Student Gain in-depth knowledge and understanding of the 19th century period in world history. They will master information that will enable them to think critically and evaluate this period objectively in the context of the history of individual European states. They will be able to navigate through more complex. The student will be able to deal with more complex problems and master the basic historical concepts of political development. History of the 19th century special emphasis on the study of history because it is in this period that social phenomena and processes have directly influenced society's development up to the present day. Student By taking this course, the student can evaluate the significance of this period for more recent history.

Class syllabus:

Introduction to 19th century history
The Industrial Revolution
The Great French Revolution of 1789-1799
The Napoleonic period in France and Europe, Congress of Vienna
The European system 1815-1848 and its defence
Revolutionary events in Europe in the 1820s, 1830s and 1848-1849
The emergence of nation-states (Italy and Germany)
Great Britain and France in the 19th century
Currents of thought and political trends in the 19th century
The USA in the 19th century, the Civil War
Russian Empire to World War I
Eastern Question to World War I
Fundamental trends in the development of European colonialism in the 19th century
Europe on the road to the First World War

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde009/22	General history V.

Educational activities:
Type of activities: lecture
Number of hours:
per week: 4 **per level/semester:** 52
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
4 hours of lecture per week/ 44 hours per semester, combined method primarily face-to-face dialogic form of lecture; use of feedback to verify the functionality of the form of transmitted information, fixation of lectured information through continuous evaluation (test after 7 lectures)

Number of credits: 6

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course:
30% of the interim and 70% of the final assessment. The student takes a test during the semester and an oral exam during the exam period. At least 91 points are required to obtain a final grade of A, at least 81 points to obtain a B grade, at least 73 points for a C grade, at least 66 points for a D grade, and at least 60 points for an E grade. Credits will not be granted to a student who does not obtain the prescribed number of points in any part of both conditions. To successfully complete the subject, it is necessary to obtain at least 60% of the point evaluation.
A (100-91%, excellent – excellent, outstanding results - the student fully orients himself in the issue, while at the same time he is aware of the basic relevance and degree of objectivity of the acquired historical knowledge and, in basic principles, the ways of transferring them into the (teaching) practice of history
B (90-81%, very good - above average standard - the student is able to orientate himself in the relevant historical issue, his ability to analyse and apply the acquired knowledge to the current conditions of his world and transfer them to teaching practice is, however, gapped and limited
C (80-73%, good – conventional reliable work, the student is able to orientate himself in the historical issues he has just learned, but he is unable to transpose the acquired knowledge entirely on his own to other desirable levels of historical (teacher) education
D (72-66%, satisfactory - acceptable results, the student satisfactorily reproduces basic historical knowledge, but in the light of the overall context of the issue, his knowledge is fragmentary, while he does not demonstrate the ability to generalise the learned knowledge
E (65-60%, sufficient – the results meet the minimum criteria, the student reproduces basic historical factography only with great difficulty, he only masters its most essential material, he cannot summarise or apply the knowledge gained in practice,

Fx (59-0%, insufficient – additional work is required, the student does not know how to navigate the issue, does not master basic factography, not even demonstrates the ability to think independently

Learning outcomes:

The lectures' cross-sectional form reflects teachers' goals in teaching History at the bachelor's level of education. This means that the students of the course will get a basic overview of the essential features, trends and periodisation milestones of the 20th Century Modern History. At the end of the course, they will be able to interpret the main features of the causes of different evaluations of their phenomena or relevant historical processes in various current academic historical schools. They will become more familiar with the mutual ties of the social, economic and political history of the 20th century, and they will be specifically drawn to the European and notice the Central European context of general history, all of which is always mentioned with a reminder of the particularities of the interpretations of these ties in School HistoryTeaching.

Class syllabus:

Cross-sectional analysis of essential features, trends and periodisation milestones of the 20th century modern history:

- basic theoretical problems of 20th century History. (History of the 20th century as so-called "short history" and other perspectives, key historical terminology used in the interpretation of the history of the 20th century and its meaning)
- recapitulation of the war conflict 1914-1918 and the Revolutions in Russia
- the world after the First World War: the Versailles system and its influence on the development of international political and economic relations, the interests of the Powers versus the problems of small states, the rise of large non-European countries, the birth of communist socialism and the German question between the two wars, issues of democracy
- totalitarian states on the path of aggression: Germany and the USSR and the causes of the (European) war, Japan and the war outside Europe
- the end of old Europe - the development, outcome and balance of the Second World War
- the interwar period through the eyes of interdisciplinary research: a view of the interwar society with the help of historical sociology, demography, cultural studies
- the world after the Second World War: from the final negotiations of the Allies to the origin and course of the Cold War, the formation of the Soviet bloc and the practice of communist socialism, the possibilities of the welfare state presented in Western European development, Western European integration and the basic trends and consequences of globalisation.
- the economic boom of European and non-European countries, the disintegration of colonial ideology and the "third world" on the international scene
- from the "golden sixties" to the first economic and cultural upheavals of developed countries and a new stage of military-political confrontation between the West and the East, the results of the Brezhnev USSR and the countries of Central and Eastern Europe during the period of validity of The Brezhnev Doctrine, attempts to reform the Soviet system, the collapse of the USSR, the results of the Chinese communist model and the collapse of the international communist movement
- the end of the Cold War on the international scene and question marks over models of global stability: who were the winners?

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde004/22	General didactics

Educational activities:
Type of activities: seminar / lecture
Number of hours:
per week: 2 / 1 **per level/semester:** 26 / 13
Form of the course: on-site learning

Number of credits: 4

Recommended semester: 2., 4.

Educational level: I.

Prerequisites:

Course requirements:
Recommended semester: 1st - 4th semester
Level of study: 1st degree
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by examination, the weighting of the interim and final assessment is 50/50. Students work on continuous work during the semester (setting objectives, taxonomy of objectives, creation of material aids, creation of didactic test, ...). Intermediate works are evaluated for 20 points. At the end of the intermediate teaching they hand in the semester work - methodical preparation for the teaching unit. The semester work is evaluated for 30 points. During the examination period, they take an oral final examination. The final assessment is worth 50 points. The successful completion of the course is subject to obtaining at least 60 % of the maximum possible grade for the course.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good - above average standard),
C (85-76%, well - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
Characteristics of student performance:
A - excellent results: the student is able to apply procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify the methods and forms presented in school documents. The student is able to create a portfolio of his/her own outcomes according to the intermediate assignments in accordance with the acquired knowledge and the required criteria. The student can critically, factually assess and evaluate the solutions presented by others, and can evaluate the quality of his/her own work.
B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify the methods and forms outlined in school documents. Above-average orientation in general didactics, above-

average communication skills, completion of assigned tasks. Critical evaluation is at borderline level.
C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.
D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.
E - the results meet the minimum criteria: the student can define and define basic didactic concepts and elements, but cannot define them in educational contexts. The student is able to develop intermediate tasks only with the help of the teacher. Critical assessment and evaluation are absent.
FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.
Scale of assessment (preliminary/final): 50/50

Learning outcomes:

Learning outcomes:
Learning objectives and outcomes:
The student will acquire knowledge of the importance of general didactics and its essence for successful functioning in the practice of the teaching profession. The student will be able to define the subject and methodological profile of didactics, develop knowledge, competences and attitudes associated with the teaching profession, knowledge and competences of planning and organizing pupils' learning activities. The student is able to define general didactics in the system of pedagogical sciences, list and characterise its functions and significance. Characterise the personality of the pupil and the teacher in educational contexts. Characterise and analyse basic school documents and explain their interrelation, compare their structure. Analyse the curriculum from a didactic point of view, defend and present their solution. Apply procedures in the processes of formulating specific objectives according to different taxonomies of objectives. Recognise the nature and importance of the application of didactic principles in the teaching process. Orient themselves in the theories and concepts of teaching. Can characterise different approaches to the classification of methods and organisational forms of the teaching process. Analyse and classify the methods and forms presented in school documents. Create a portfolio of own outcomes in general didactics in accordance with the acquired knowledge. Be able to critically and factually assess and evaluate the outputs of others.
Transferable competences:
By discussing, solving and presenting the results of continuously assigned tasks, students will develop their analytical and critical thinking, communication skills, interpersonal skills, organizational skills, digital skills, lecturing and metacognitive skills. Students will be able to use the acquired knowledge and competences creatively in the study of other pedagogical disciplines and in their future pedagogical practice.

Class syllabus:

Brief outline of the course:
General didactics as a basic pedagogical discipline studies the educational process in all its complexity. Didactics helps students to develop and become aware of basic pedagogical knowledge, to understand didactic interrelationships in teaching. It emphasizes the basic concepts and theories of teaching, for the formation of students' individual conceptions of teaching. Makes accessible the formation and essence of basic didactic principles, pedagogical documents and objectives in the teaching process. It leads students to confront theory with practice, to understand a concept in relation to a specific educational activity, to the specific work of the teacher, but above all in relation

to the pupil. It characterises the whole process of preparing a teaching unit, through the interaction of teacher and pupils, i.e. through methods, organisational forms and material means.
Topics:
Historical and contemporary conceptions of general didactics. General didactics as a basic pedagogical discipline and its relation to other sciences. The personality of the pupil and the teacher. Basic pedagogical documents. Didactic principles. Pupils' learning styles and teachers' teaching styles. Didactical analysis of the curriculum. Educational objectives, taxonomies of objectives. Theories and concepts of education. Traditional and activating teaching methods. System of organizational forms. Teaching process, its stages and their analysis. Material teaching means - teaching aids, didactic technology and their importance. Assessment, screening, classification.

The semester work is evaluated for 30 points. During the examination period, they take an oral final examination. The final assessment is worth 50 points. The successful completion of the course is subject to obtaining at least 60 % of the maximum possible grade for the course.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good - above average standard),
C (85-76%, well - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
Characteristics of student performance:
A - excellent results: the student is able to apply procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify the methods and forms presented in school documents. The student is able to create a portfolio of his/her own outcomes according to the intermediate assignments in accordance with the acquired knowledge and the required criteria. The student can critically, factually assess and evaluate the solutions presented by others, and can evaluate the quality of his/her own work.
B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify the methods and forms outlined in school documents. Above-average orientation in general didactics, above-

average communication skills, completion of assigned tasks. Critical evaluation is at borderline level.
C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.
D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.
E - the results meet the minimum criteria: the student can define and define basic didactic concepts and elements, but cannot define them in educational contexts. The student is able to develop intermediate tasks only with the help of the teacher. Critical assessment and evaluation are absent.
FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.
Scale of assessment (preliminary/final): 50/50

Learning outcomes:

Learning outcomes:
Learning objectives and outcomes:
The student will acquire knowledge of the importance of general didactics and its essence for successful functioning in the practice of the teaching profession. The student will be able to define the subject and methodological profile of didactics, develop knowledge, competences and attitudes associated with the teaching profession, knowledge and competences of planning and organizing pupils' learning activities. The student is able to define general didactics in the system of pedagogical sciences, list and characterise its functions and significance. Characterise the personality of the pupil and the teacher in educational contexts. Characterise and analyse basic school documents and explain their interrelation, compare their structure. Analyse the curriculum from a didactic point of view, defend and present their solution. Apply procedures in the processes of formulating specific objectives according to different taxonomies of objectives. Recognise the nature and importance of the application of didactic principles in the teaching process. Orient themselves in the theories and concepts of teaching. Can characterise different approaches to the classification of methods and organisational forms of the teaching process. Analyse and classify the methods and forms presented in school documents. Create a portfolio of own outcomes in general didactics in accordance with the acquired knowledge. Be able to critically and factually assess and evaluate the outputs of others.
Transferable competences:
By discussing, solving and presenting the results of continuously assigned tasks, students will develop their analytical and critical thinking, communication skills, interpersonal skills, organizational skills, digital skills, lecturing and metacognitive skills. Students will be able to use the acquired knowledge and competences creatively in the study of other pedagogical disciplines and in their future pedagogical practice.

Class syllabus:

Brief outline of the course:
General didactics as a basic pedagogical discipline studies the educational process in all its complexity. Didactics helps students to develop and become aware of basic pedagogical knowledge, to understand didactic interrelationships in teaching. It emphasizes the basic concepts and theories of teaching, for the formation of students' individual conceptions of teaching. Makes accessible the formation and essence of basic didactic principles, pedagogical documents and objectives in the teaching process. It leads students to confront theory with practice, to understand a concept in relation to a specific educational activity, to the specific work of the teacher, but above all in relation

to the pupil. It characterises the whole process of preparing a teaching unit, through the interaction of teacher and pupils, i.e. through methods, organisational forms and material means.
Topics:
Historical and contemporary conceptions of general didactics. General didactics as a basic pedagogical discipline and its relation to other sciences. The personality of the pupil and the teacher. Basic pedagogical documents. Didactic principles. Pupils' learning styles and teachers' teaching styles. Didactical analysis of the curriculum. Educational objectives, taxonomies of objectives. Theories and concepts of education. Traditional and activating teaching methods. System of organizational forms. Teaching process, its stages and their analysis. Material teaching means - teaching aids, didactic technology and their importance. Assessment, screening, classification.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPsPp/B-PSYde010/22	**Course title:** General pathopsychology
Educational activities: **Type of activities:** lecture **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Type, volume, methods and workload of the student - additional information Type of activities, scope (number of hours) and methods of educational activities: Scope, type/method of teaching and organizational form: 1 hour lecture + 1 hour seminar; 22 hours total per semester, combined (mostly attendance) Student workload: 11 x 2 hours of direct teaching = 22 hours; preparation of seminar paper and presentation (28 hours), preparation for the mid-term test (30 hours), preparation for the final examination (40 hours). 120 hours in total. Teaching methods: lecture, heuristic method, work with professional text and information sources	
Number of credits: 4	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: PdF.KPsPp/B-PSYde005/22 - Developmental psychology	
Recommended prerequisites: B-PSYde005 Developmental psychology	
Course requirements: 50% of the interim evaluation + 50% of the final evaluation The interim assessment includes an interim test (30 points) and a seminar paper on the assigned topic and Power Point presentation (20 points). The final assessment will consist of a final exam in the form of a written test (50 points). For successful completion of the course, it is necessary to obtain a minimum of 60% of the points. The grade is awarded on a scale: A (100-94%, excellent - outstanding), B (93-86%, very good - above average standard), C (85-76%, good - normal reliable work), D (75-68%, satisfactory - acceptable results), E (67-60%, satisfactory - results meet minimum criteria), Fx (59-0%, inadequate - additional work required). For a grade of A, students need to submit outstanding work and results continuously throughout the semester and are capable of independent study. Students are able to select relevant sources for their study, understand the general patterns of psyche formation under disability conditions, and	

the specific features of the psyche of individuals with different types of disability and are able to apply their knowledge in practice.
A grade of B means that students performed above average throughout the semester, were able to study independently, have a basic understanding of general pathopsychology, they are able to navigate the information in the literature very well.
A grade of C means that students performed at a standard level throughout the semester, their theoretical knowledge of general pathopsychology is at a good level, but they lack the ability to use this knowledge without to apply this knowledge in practice.
A grade of D indicates that students were less prepared during the semester, having slight deficiencies in theoretical knowledge related to general pathopsychology. They have considerable difficulties in independent work, they cannot critically analyse information.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyze and compare multiple pieces of knowledge, but have mastery of most of the theoretical knowledge in the course.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim evaluation + 50% of the final evaluation

Learning outcomes:
The aim of the course - which represents a pro-inclusive approach in psychological and related sciences and is also an essential element in the progressive comprehensive preparation of graduated psychology teachers in combination already at the bachelor's level – to be able to orient themselves correctly in the knowledge of general pathopsychology and to know the laws of the formation of the psyche in the conditions of disability and the peculiarities of the psyche of individuals with disabilities. After completing the course, the student will acquire the basic concepts of general pathopsychology. The student will acquire a basic overview of the theory and related knowledge of general pathopsychology, also necessary for working with children, adolescents, and adults with disabilities in the context of lifelong development and education. Understands the general patterns of psychological formation in conditions of disability and the specific features of the psyche of individuals with disabilities. It should be able to identify the specific features of the psychological processes of individuals with disabilities and know the basic methods of pathopsychological diagnostics. Apply the knowledge acquired in further studies and in practice in the approach and care of individuals with disabilities. Graduates are able to work critically with knowledge in general pathopsychology and apply knowledge in theory and practice.
1. Introduction to the study of general pathopsychology: subject, methods, and history in pathopsychology. Development of pathopsychology in Slovakia.
2. Basic concepts of general pathopsychology and related disciplines.
3. Normality - abnormality in relation to pathopsychology. Normality and disability.
4. Pathopsychological research of psychological processes. Methodology of pathopsychological research on children and adolescents.
5. Peculiarities of the psychological development of individuals with disabilities.
6. Social-psychological aspects of disability. Attitudes of society towards the disabled people. Issues of the family of disabled individual.
7. Personality of individuals with disabilities.
8. Psychological problems of integration and inclusion of the people with disability into society. Psychological aspects of school integration/inclusion.

Class syllabus:
1. Introduction to the study of general pathopsychology: subject, methods, and history in pathopsychology. Development of pathopsychology in Slovakia.

2. Basic concepts of general pathopsychology and related disciplines.
3. Normality - abnormality in relation to pathopsychology. Normality and disability.
4. Pathopsychological research of psychological processes. Methodology of pathopsychological research on children and adolescents.
5. Peculiarities of the psychological development of individuals with disabilities.
6. Social-psychological aspects of disability. Attitudes of society towards the disabled people. Issues of the family of disabled individual.
7. Personality of individuals with disabilities.
8. Psychological problems of integration and inclusion of the people with disability into society. Psychological aspects of school integration/inclusion.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde001/22	General psychology

Educational activities:
Type of activities: seminar / lecture
Number of hours:
per week: 2 / 2 **per level/semester:** 26 / 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
2 hours lecture + 2 hours seminar = 4 hours/week, 44 hours total for the semester,
combined method (mostly full-time)
Student workload:
11x4 hours of direct instruction = 44 hours; ongoing preparation for classes (15 hours), preparation of a seminar paper presentation in an attractive interactive format related to modern research in general psychology and its written completion of 5-7 pages (10 hours); preparation for the mid-term test (15 hours); final essay on the most interesting areas of general psychology and its use in teaching practice (6 hours); preparation for the final test (20 hours); preparation for the oral examination (10 hours). 120 hours in total.
Teaching methods:
Lecture: lecture using heuristic methods, group discussion, group work, analysis of videos and real situations, analysis of problem situations, guided self-study, and work with a professional text.
Seminar: group work, analysis of videos, independent work with professional text, work with authentic text, work with samples of psychological questionnaires and other psychological tests, heuristic methods: problem-based interpretation and brainstorming, concept mapping, critical analysis of psychological research, free association method, work with digital resources (textual and audiovisual), game test activities.

Number of credits: 4

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
50% of continuous assessment + 50% of final assessment
During the semester there will be two written examinations with the possibility to obtain a maximum of 15 points each (15 closed questions, 1 question = 1 point), students will prepare a seminar paper on the topic of an interesting psychological experiment from history or the present of the discipline, which they will present in an interactive way in a study group (also using various online applications) in the scope of about 10 minutes (20 points). The exam will consist of a written part (15 open and closed questions) (30 points) and an oral part (20 points). Credit will not be awarded to a student who scores less than 50% on any of the tasks. In order to pass the course, the student must obtain a minimum of 50% on each assignment and a minimum of 60% overall.

The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).
For a grade of A, the student needs to produce consistently excellent results, be able to study independently, and be able to reflect on the problems presented. The student is able to navigate through a variety of professional information, can select relevant sources for his/her studies, can analyse and select professional or scientific information, is proficient in theoretical and empirically derived knowledge of general psychology, and understands the scientific way of thinking and hypothesis formation. He/she is also able to self-reflect, to receive feedback in the process of evaluating his/her studies and outcomes, and to provide feedback to others.
A grade of B means that the student has performed above average throughout the semester, has been able to study independently, has a very good command of all the important knowledge of general psychology, can navigate the literature study very well, understands the scientific way of thinking, but has slight deficiencies in creative and critical thinking.
A grade of C means that the student has performed standardly well during the semester, has engaged in activities, his/her theoretical knowledge of the subject matter is at a good level, but lacks the ability to apply this knowledge quite correctly, to critically evaluate and compare the various literary sources and psychological knowledge. He is not able to reflect and evaluate more complex or problematic situations (psychological theories, experiments, etc.) adequately; he needs help in creative and critical thinking tasks.
A grade of D means that the student has been less well prepared during the semester, has moderate deficiencies in theoretical knowledge related to the subject of education and has greater problems in independent implementation work as well as in group work, cannot critically analyse information quite well and has problems applying more complex knowledge to practice.
A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyse and compare multiple pieces of knowledge correctly on his/her own, and fails more often in critical thinking and in applying more complex theoretical knowledge to practice, but has mastered most of the basic and necessary theoretical knowledge of the subject.
A grade of Fx indicates that the student needs further study or extra work on assignments to acquire the necessary knowledge at the required standard level (60%).
Scale of assessment (preliminary/final): 50% of continuous assessment + 50% of final assessment

Learning outcomes:
The aim of education in the subject of general psychology - which is a fundamental conceptual-methodological basic discipline in the system of psychological sciences - is to provide graduates of this subject as future teachers, in addition to this basic system of theoretical knowledge related to the necessary overview of the knowledge and terminology of general psychology, with the ability to compare and critically evaluate professional and scientific information and related various information sources. After successful completion of the course, students are also able to correctly reproduce and clarify professional knowledge, including the graphs and tables used, to apply the acquired knowledge in the study of other related psychological disciplines and also in real-life situations; they are also able to find logical connections and differentiate individual findings in opinions and ideas, to evaluate them, and then to present and clarify them. They are able to compare, evaluate and analyse research and apply the findings to practice (in the sense of a sound scientific understanding of psychological functions, personality, and behaviour in the context of the psychological sciences system as well as in the context of education and training). They

also develop further organisational and digital skills (transferable competences) by completing the course, including, for example, working with modern information technology, improving their self-assessment and social communication skills, and providing feedback in a more effective way.

Class syllabus:

1. Historical foundations of psychology, basic psychological trends.
2. Methods of research in psychology.
3. Biological processes, central nervous system, complex organization of the nervous system, the contribution of genetic processes in psychological functions manifestations and behavior.
4. Sensory processes; sensation and perception, consciousness and mental states.
5. Memory, types or divisions of memory and memory processes, implicit/explicit and other types of memory, memory enhancement.
6. Learning and conditioning - theoretical approaches to learning in psychology, classical and instrumental conditioning, other types of learning, learning and cognition.
7. Attention - the concept of attention in psychology, classification of types of attention, attention and other cognitive mental functions. Imagination - the concept of imagination in psychology, classification of types of imagination and their relationship to other psychological functions and personality.
8. Thinking and intelligence - their conceptualization in psychology; reasoning, heuristic and analytical thinking, problem solving, assessment of intellectual abilities and their limits, modern theories of intelligence, heredity, and intelligence, fixed and growth mind-set.
9. Language and speech, language and communication in psychology, concepts and categorization of communication, language acquisition/speech development.
10. Motivation and emotions - concept of homeostasis in psychology, drives, needs, intrinsic and extrinsic motives; concept of emotion in psychology, components of emotion, cognitive appraisal and emotion, bodily changes and emotion, complex reactions to emotion and emotion regulation.
11. Personality - Concept of personality in psychology, personality typologies, personality and inter-individual differences, different approaches to theories of personality in psychology, hereditary aspects of personality.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde034/22	Historic proseminar

Educational activities:
Type of activities: seminar
Number of hours:
per week: 3 **per level/semester:** 39
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
3 hours lecture/week, 33 hours total per semester, combined form; (primarily in person)
Student workload:
11x 3 hours of direct instruction = 33 hours; 42 hours of preparation for midterm evaluation; Total of 75 hours of student work.
Educational methods: discussion of the topic; small group work; problem-solving tasks, e-learning

Number of credits: 3

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
100% of the intermediate assessment. Seminar paper on a selected topic - processed according to the assignment, which is handed in before the beginning of the examination period. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D and a minimum of 60 points for a grade of E. Credit will not be awarded to students who obtain less than 15 points in any of the four written examinations. To pass the course, a minimum score of 60% is required.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the issue, has learned, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can orient himself/herself in the problem only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically)

Learning outcomes:

The student will learn to work practically with professional historical literature and sources and apply a historian's work methods within the course. The course will enable the student to acquire basic knowledge in the field of bibliography, work with historical sources and literature, and the method of citation, which will be used during their studies when writing seminar and thesis papers in future pedagogical and professional work. They will acquire the ability to combine theoretical knowledge with practical skills.

Class syllabus:

The course will focus on the following key topics:
- 1. Libraries and their use for the student of history
- 2. Introduction to archives and their functioning
- 3. Definition of the topic of the term paper
- 4. Professional literature and how it differs from popular literature
- 5. Historical periodicals
- 6. Working with bibliographies
- 7. Working with online library catalogues
- 8. Use of digitised historical press and literature
- 9. Working with specialist literature - extracts, card catalogue
- 10. Bibliographic reference and citation
- 11. The writing process
- 12. Ethics of a historian's work

Course ID:	**Course title:**
PdF.KH/B-HISde019/22	Historical geography

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Two hours seminar/week, 22 hours total per semester, combined; (primarily full-time); 2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 38 hours of exam preparation; a total of 60 hours of student work; discussion of the topic covered; incident method; experiential methods; e-learning; monologue methods.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
80% of the final exam grade is in the form of a test. 20% of the grade for active participation in discussions throughout the semester, which the student will receive if he/she participates in at least one-third of the discussions. The student will take the test at the end of the semester. A minimum of 91% is required for a final grade of A, a minimum of 81% for a grade of B, a minimum of 73% for a grade of C, a minimum of 66% for a grade of D, and a minimum of 60% for a grade of E. You must earn a minimum grade of 60% to pass the course.
The grade is awarded on a scale:
A (100-91%, excellent - outstanding results, the student is knowledgeable and proficient in the subject matter, demonstrates creativity and critical thinking),
B (90-81%, very good - above average standard, the student is familiar with the issues, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the issue, has learned, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can orientate himself/herself in the problem only with great difficulty, he/she knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically)

Learning outcomes:

In the course Historical Geography, the student learns key facts from the historical development of geography in the broadest sense of the word. The student develops critical and historical thinking skills. The student is able to work with historical maps and knows the historical development of historical territories related to the history of Central Europe. Physically orientates oneself in the landscape (environment) by being able to define individual elements and human-geographical relics of the landscape. The student knows the basic orientation of the discipline and its focal problems. The course is taught in the context of preparing future teachers for their profession so that the student can use both historical and contemporary maps in the educational process.

Class syllabus:

The course aims to deepen the knowledge of the cartographic development of prehistory, ancient civilisations, the Middle Ages, modern times and the modern history of European civilisation. It also emphasises the history of the cartography of Slovak provenance. The course includes an introductory survey of the problems of the environmental history of the globalised world. As a future teacher, the student will also be able to communicate the acquired knowledge to pupils - e.g. when working with electronic databases containing historical maps. The course will concentrate on the following key topics:

- What is historical geography; definitions, methods and sources
- Physical-geographical and human-geographical relics of the landscape
- Environmental history - historical development and current trends
- Cartography and the historical development of the earliest maps I (prehistoric and ancient Greece)
- Historical development of maps II (ancient Rome, medieval and modern times)
- History of the cartographic development of the territory of Slovakia from the Middle Ages to the 20th century
- Working with maps of the so-called military mapping
- Development and changes in the geographic-political boundaries of Slovakia
- Historical territories of Central and South-Eastern Europe
- Excursion
- Historical geography in the training of history teachers
- Use of historical geography in practice

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde001/22	History of Slovakia I.

Educational activities:
Type of activities: lecture
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours lecture /week, a total of 22 hours per semester, combined form; (primarily full-time)
Student workload: 2L (4 credits): 11x 2 hours of direct teaching # 22 hours; 30 hours preparation for mid-term evaluation; 50 hours exam preparation. Total 102 hours of student work.
Learning methods: lecture, discussion of the topic covered; situation analysis method; e-learning.

Number of credits: 4

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
50% of the interim and 50% of the final evaluation. The continuous assessment will consist of a written test in the last lecture, from which the student can obtain a maximum of 40 points, which is 40% of the total grade. 10% of the continuous assessment can be obtained for an active approach during the semester, which will consist, for example, of asking questions in the discussion after each lecture. The student will take an oral examination during the examination period. In the oral examination, the student will draw two questions, the first on a broad historical issue and the second on a specific problem. The maximum score for both parts of the exam is 50 + 50 points. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. To pass the course, you must obtain a minimum of 60% of the marks.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is familiar with the issues, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the subject, has learned the issue, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),

Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically).

Learning outcomes:
The course aims to introduce the essential characteristics of the medieval history of Slovakia. Students will learn about the epoch from the arrival of the Slavs to the Battle of Mohács in 1526. Based on the acquired knowledge, they will be able to analyse the basic categories of medieval society in Slovakia and its composition. They will learn to orientate themselves in political, economic, social, ecclesiastical and cultural issues and to link them by analogy with the present. They will acquire the ability to think critically and evaluate the past objectively. They will be able to analyse this historical period, compare it with developments in other periods and reach synthesising conclusions. Emphasis is placed on orientation to the more complex problems of history. Due attention will also be paid to historical interpretations of individual events, their differentiation, and the acquisition of the ability to think in broader contexts.

Class syllabus:
- Chronology of the development of the Middle Ages in Slovakia.
- The question of the origin of the Slavs and their occurrence on our territory.
- The Empire of Samo. The Principality of Nitra.
- Great Moravia. Personalities of Great Moravia. The Byzantine mission.
- The question of the demise of Great Moravia and the establishment of the Kingdom of Hungary.
- Hungary (especially today's Slovakia) during the reign of the Árpad dynasty.
- Hungary (especially today's Slovakia) during the reign of the Anjou dynasty.
- Louis I, the ideal of a knight king.
- Sigismund of Luxembourg and Matthias Corvinus on the Hungarian throne.
- The Jagiellonian dynasty and the Battle of Mohács.
- Medieval culture in Hungary (especially in today's Slovakia).

PdF.KH/B-HISde003/22	History of Slovakia II.

Educational activities:
Type of activities: lecture
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours lecture/week, 22 hours total per semester, combined form; (primarily in person)
Student workload:
2P (2 credits): 11 x 2 hours of direct instruction = 22 hours; 10 hours preparation for discussions, 68 hours exam preparation. 100 hours of student work in total.
Educational methods: monological method, problem-solving exercises; discussion of the subject; e-learning

Number of credits: 4

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
40% of the interim and 60% of the final evaluation. The student takes the test in the middle of the semester, from which he/she may obtain a maximum of 30 points. The test will focus on the material covered. In the midterm evaluation, the test will account for 30%, and 10% will be given for the active approach in lectures. This active approach will consist of asking the lecturer at least one question from the ongoing teaching. In the examination period, the student will take an oral examination. In the framework of the oral examination, the student will draw two questions. One question is a review "big" question. The other question focuses on specific personalities and events. The rating is awarded on a scale:
A (100-91%, excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C (80-72%, good - normal reliable work, the student does know his/her way around the subject, has learned the issue, but cannot apply the knowledge gained to practice),
D (71-65%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),

Fx (less than 59%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically).

Learning outcomes:

The student acquires the necessary knowledge and understanding of Slovakia's political, economic and social development and its inhabitants in modern Hungary between 1526 and 1780. The aim is to acquaint students with the history of Slovakia from the Battle of Mohács to the end of the reign of Maria Theresa, to provide a plastic picture of the transformation of the society during two centuries, the changes in the social structure of the population on the territory of today's Slovakia, to give the influence of European events on the national consciousness process of the Slovak ethnic group, the causes leading to the national revival. The student acquires in-depth knowledge and knowledge about the period of the modern age in Slovak history. The student will receive information based on which he/she will be able to think critically and objectively evaluate this period in the context of Hungarian history. They will be able to navigate more complex problems and historical interpretations and reach synthesising conclusions. The student will consolidate the communication skills necessary for presenting his/her work results.

Class syllabus:

- The Habsburgs and their policy in Hungary in the 16th century (from Ferdinand I to the end of the reign of Rudolf II): The struggles of Ferdinand I and Jan Zápolský for the Hungarian throne - The reforms of Ferdinand I. and Maximilian I - Revolt of Stefan Bockaj - Dispute of Rudolf II. with his brother Matthias.
- Turkish expansion in Hungary: the Battle of Mohács - Turkish expansion in the first half of the 16th century - The conquests in the second half of the 16th century - The Fifteen Years' War - From the Peace of Zittau to the
the beginning of the invasion in the 1760s - The defeat of the Turks at Vienna and their gradual expulsion from Hungary.
- Reformation and Counter-Reformation in Slovakia in the 16th and 17th centuries: Penetration of the Reformation into the territory of Hungary - The form of the Reformation doctrine and churches - Counter-Reformation /the consequences of the Council of Trent and the Jesuit Order in Hungary/ - The organisation of the Evangelical Church - The sharpening of the Recatholization during the reign of Leopold I.
- Hungarian Estates Revolts (from Gabriel Bethlen's Revolt to the Revolt of Francis II Rakoci): Causes of the Estate‘s Revolts - Revolts as part of the Thirty Years' War (Gabriel Bethlen and George I Rakoci) - Conspiracy of Francis Veseleni - Resistance of Imrich Tököli - Revolt of Francis II Rakoci - Revolt of George II Rakoci - Revolt of Francis II Rakoci.
- Political developments in Hungary after the Peace of Satmar – the reign of Emperor Charles VI and Queen Maria Theresa (1711 - 1780): Reforms of Charles VI - Wars for the Austrian inheritance (Silesian Wars) and the Seven Years' War - Maria Theresa's Enlightenment reforms, foreign policy.
-Economic development in Hungary in the 16th-18th centuries: The development of the feudal economic system - The beginnings of capitalist relations in business and production - Mining and metallurgy in Slovakia - Artisan guilds - The origins of industrial manufactures - Trade and mercantilist politics.
- The population of Hungary and Slovakia - Its ethnic form and social structure - Wallachian colonisation and the migration of Slovaks to the southern regions of Hungary - The status of Slovak ethnicity in Hungary in the 16th-18th centuries.
- Spiritual and thought movements in the 16th-18th centuries: Humanism and reformist religious teachings -The most important Hungarian Renaissance and Baroque writers and thinkers - Reformation and Catholic education

- Science in Slovakia in the 16th-18th centuries - Fine arts and architecture of the Hungarian Renaissance and Baroque, development of Slovak ethnicity, Slovak consciousness in the 16th-18th centuries.

The rating is awarded on a scale:
A (100-91%, excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the gained knowledge in practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically).

Learning outcomes:
The course enables the student to gain comprehensive knowledge of Slovak history of the long 19th century (1780 - 1918). The student learns to orient himself to social, cultural, national and political problems and to link them analogically with the present. Acquire the ability to think critically and evaluate the recent past objectively. They will be able to analyse and assess this historical period, compare it with developments in other countries and reach synthesising conclusions. They will be able to navigate complex issues and historical interpretations, distinguish between them and think in context.

Class syllabus:
Students will learn about the history of Slovakia from the end of the 18th to the beginning of the 20th century in a cross-sectional way. It focuses on the key issues of the long 19th-century national history. It combines interpretations of the breakthrough periods, helps uncover taboo topics, and gets to know contemporary society and its personalities. It concentrates on these focal themes:
- The Habsburg Monarchy and the Kingdom of Hungary at the end of the 18th and the first half of the 19th century. The reigns of Joseph II, Leopold II, Francis I and Ferdinand V. The Napoleonic Wars. Metternich's absolutism. Relaxation of feudal relations, the redemption of serfs from serfdom. The beginnings of industrial development. Hungarian reform movement.
- Modernisation of the Slovak nation. The Bernolák's and evangelical conceptions. Personalities.
- The second generation of Slovak revivalists in the 1820s and 1830s. Unification of the Catholic and Evangelical camps. Social activity. The most influential personalities.
- Completion of the Slovak national political programme in the 1840s. Unification of the Štúr's and the youngest Bernolák's generation. Adoption of a unified written language and cultural institutions.
- The 1848/49 revolution in the Habsburg monarchy and the Slovak political programme. The March Revolution. The Slavonic Congress. Slovak volunteer expeditions. Efforts to create a Slovak Crown Land.
- The period of neoabsolutism in the 1850s. Centralism and Germanism. The issue of the written language. The Old Slovaks and the Young Slovaks.
- Political development of the Habsburg monarchy in the Provisional period. The Austro-Hungarian Compromise. Economic development of the monarchy and Hungary after the compromise.
- Slovak politics in the 1860s and 1870s. Memorandum, the Slovak Matica and Slovak grammar schools. Nationality Act. Old and New Slovak School. Prominent personalities.
- Period of political passivity. Efforts of the Hungarian governments to transform the Kingdom of Hungary into a mono-national Hungarian state. Turčiansky Svätý Martin and the Slovak National Party. Czech-Slovak cooperation. Russophilism and Pan-Slavism.
- Differentiation of Slovak political currents at the turn of the 19th and 20th centuries. The Industrial Revolution in the Kingdom of Hungary, Hungarian liberalism, the development of the workers' and social democratic movements. Cooperation of non-Hungarian people in Hungary. The Slovak National Party. Slovak People's Party. The young generation grouped around the magazine Hlas and Prúdy. Agrarian current. Slovak Social Democratic Party.
- Slovaks and the First World War, the establishment of the Czechoslovak Republic. The internationalisation of the Slovak question before the First World War. The main centres of Slovak politics during the First World War. American Slovaks. Czechoslovak cooperation, Czechoslovakia and the legions.

Prerequisites:

Course requirements:
50% of the interim and 50% of the final evaluation. The student takes a written test during the semester and an oral examination during the examination period. Interim assessment - student passes a written test at the end of the semester and an oral examination during the examination period. The written test assesses the knowledge acquired about historical figures and events in the form of completing the correct answer by adding or circling.
Final assessment: The student will choose two questions in the oral exam. The first focuses on a specific historical issue or event, and the second focuses on a historical figure. To receive a final grade of A, a minimum of 91 points is required, and a minimum of 81 points is required for a grade of B, for a grade C at least 73 points, for a grade D at least 66 points, and for a grade E at least 60 points. Credit will not be awarded to students who fail any of the four written examinations and receive less than 15 points. Successful course completion requires a minimum of 60% of the grade. The grade is awarded on a scale:
A (100-91%, excellent - excellent results, the student is familiar with the subject matter, he/she has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the subject mastery, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student can orient himself in the problem, he has learned, but he cannot apply the acquired knowledge to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),

E (65-60%, sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically).

Learning outcomes:
The course enables the student to acquire comprehensive knowledge of the 20th century Slovak history, specifically the period 1918-1992. The student will learn to navigate social, cultural, national and political issues and to relate them analogically to the present. Acquire the ability to think critically and evaluate the recent past objectively. They will be able to analyse and evaluate this historical period, compare it with developments in other countries and reach synthesising conclusions. They will be able to navigate complex issues and historical interpretations, distinguish between them and think in context.

Class syllabus:
Students will learn about the history of Slovakia in the 20th century. It focuses on the key issues of the national history of the 20th century. It brings closer the interpretations of the turning points, helps uncover taboo topics together, and gets to know contemporary society and its personalities. It concentrates on these central themes:
- The 1st Czechoslovak Republic, its origins, place and significance in the history
- Autonomism versus centralism
- The flowering of culture after 1918
- The personalities of the 1st Czechoslovak Republic
- The Slovak state 1939 – 1945, its origins and place in history
- Forms of collaboration in Slovakia
- Persecutions (political opponents, Jews, Gypsies)
- Foreign resistance, domestic resistance and its personalities
- Slovak National Uprising
- Transitional period 1945 – 1948
- The founding period of the communist regime 1948 – 1953
- Persecutions (political trials, forced collectivisation)
- Socialist society
- The attempt at 'socialism with a human face' in 1968
- Normalisation
- Third Resistance
- The Velvet Revolution and the first steps in democracy

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde022/22	History of education

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 1., 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The students' task is to solve 10 continuously assigned problems during the semester and to participate in the presentation and discussion of their solutions in seminars. The solution of each problem is evaluated on a 3-0 point scale according to specific criteria set for each problem. The maximum number of points possible is 30.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good - above average standard),
C (85-76%, well - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points. A minimum of 28 points is required for a final grade of A (excellent - outstanding results), a minimum of 25 points is required for a grade of B (very good - above average standard), a minimum of 22 points is required for a grade of C (good - normal reliable work), a minimum of 20 points is required for a grade of D (satisfactory - acceptable results), and a minimum of 18 points is required for a grade of E (satisfactory - results meet the minimum criteria). A grade of FX (Inadequate - extra work required) will be awarded to students scoring 17 points or less.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
Upon completion of the course, students will be able to use professional terminology, define the subject, and describe the system of the History of education. They are able to explain the context of the emergence and the main features of the historical currents of educational thought, describe and compare the systems of education and training in different historical periods, explain the views

and characterize the work of important figures in the history of education and training, critically evaluate them and identify their influence on education and training today.
Working with original historical sources and their contemporary interpretations, students will be able to critically reflect and discuss ethical issues of education and education, the position and roles of the subjects of education and education. In solving, presenting and discussing the results of ongoing assignments, students will develop their analytical and critical thinking, communication, lecturing and metacognitive skills.
Students will be able to use the acquired knowledge and skills creatively in the study of other pedagogical disciplines and in their future pedagogical practice.

Class syllabus:
Brief outline of the course:
The subject, terminology and system of the History of education. Education and education in ancient and medieval times. Education and pedagogical ideas in the period of humanism and the Renaissance. Life, work and pedagogical views of J. A. Comenius. The development of education and pedagogical thinking in the works of selected representatives in the world (Lock. Rousseau, Pestalozzi, Herbart, Tolstoy) and in the territory of present-day Slovakia (Bel, Tešedík, Fándly, Lehocký) in the 17th-19th centuries. Pedagogical trends and schools of the 20th century in the world. Education in Slovakia in the 20th century. Contemporary trends in education.

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde014/22	History of philosophy 1

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2., 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed with an assessment, the midterm/final assessment ratio is 100/0, which includes a final test in the assessment week of the semester (100% of the assessment). A minimum of 60% of the total mark is required to pass the course.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in class during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing assignments using a model, above-average professional knowledge and application of that knowledge in problem solving assignments using tutorials, above-average problem orientation, above-average communication skills, responsibility and timely completion of assignments, and above-average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to prepare assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the teacher, good orientation in the subject, good communication skills, completion of the assigned tasks, average activity in the class during the semester at the invitation of the teacher.
A minimum of 66 points is required for a final grade of D. For this grade, the student should demonstrate: the ability to develop assignments using a given template and with the assistance of the

instructor, average proficiency and application in problem solving in a group or with the assistance of the instructor, average orientation to the problem, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes:
Completion of the course will provide students with a certain handle on orientation in the nowadays almost opaque tangle of diverse philosophical directions, movements, orientations and attitudes, will provide them with basic categorical-conceptual equipment and methodological instrumentation useful in other special sciences and disciplines (sociology, pedagogy, political science, psychology, etc.), which will help to bridge their particularism in favour of a global vision and solutions to the problems of the contemporary world. Knowledge of the approaches of different philosophical trends to certain problems will facilitate the students' professional and human orientation in the contemporary world, since many pedagogical, economic, social, legal and political concepts are based on these philosophical trends as their conceptual framework. The course also emphasizes the mapping of these overlaps of philosophy into other components of culture. The problem field thus delineated will help the students to reflect and specify their own position and provide arguments for the vindication of their own positions, thus contributing to better self-knowledge and self-identification. History of Philosophy provides students with the experience of encountering the "other", giving guidance and cultivating habits of coping with it, and thus teaching them tolerance and respect for other points of view. By completing the course, the student develops transferable competencies such as communication skills, analytical skills, abstract thinking skills, critical thinking skills, motivation and the ability to learn, and reasoning in context.
Learning objectives and transferable competences:
To familiarize students with the history of European philosophical thought and to provide them with a basic conceptual and methodological apparatus that they will be able to use in other special sciences such as pedagogy, political science, psychology, or sociology.

Class syllabus:
Brief outline of the course:
History of Philosophy I focuses on the period from Antiquity to the French Enlightenment.
1. Introduction: philosophy and its importance for man; The study of the history of philosophy as an introduction to philosophy; Periodization of the history of philosophy.
2. Ancient Philosophy: the Pre-Socratics (Ionian Philosophy - School of Miletus, Xenophanes, Heracleitos; Philosophy in the West - Pythagoras, Parmenides, Zeno, Empedocles; Reaction of Ionian Philosophy - Anaxagoras, Democritus); Classical Greek Philosophy (Sophists, Socrates, Plato, Aristotle); Hellenistic Period (Stoicism, Epicureanism, Skepticism).
3. Medieval Philosophy: Patristics (Augustine); Early Scholasticism (Eriugena, Anselm of Canterbury, Abaelard); High Scholasticism (Albert the Great, Aquinas, Bonaventure, R. Bacon); Late Scholasticism (Occam, Scotus)
4. Renaissance philosophy: M. Kuzansky; Renaissance Platonism and Aristotelianism (Ficinus, Mirandola, Pompanazzi); Renaissance natural science (Copernicus, Kepler, Galilei)

Renaissance philosophy of nature (Telesio, Bruno); Renaissance social philosophy (Machiavelli, More, Campanella); Renaissance humanism (Erasmus of Rotterdam, Montaigne); Reformation (Luther, Calvin, Münzer, Zwingli)
5. Modern Philosophy: Origins of Modern Empiricism and Mechanistic Materialism (F. Bacon, Hobbes); Modern Rationalism (Descartes, Spinoza, Leibniz); Modern Empiricism (Locke, Berkley, Hume)
6. The Enlightenment in France (Montesquieu, Voltaire, Rousseau, the Encyclopedists, Materialists)

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde004/22	History of psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
2 hours seminar/week; 22 hours total per semester, combined (primarily full-time).
Student workload:
11 x 2 hours of direct teaching = 22 hours; preparation for the seminar paper and its presentation (14 hours); preparation for the midterm test (20 hours), total 56 hours.
Teaching methods:
Group discussion, guided discussion of the topic covered, heuristic method, guided self-study, and work with the text.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% of continuous assessment
Over the course of the semester, students will complete a term paper (analyze the main ideas from major psychologists - authored monographs that have influenced basic directions in psychology, max. 30 points), present the term paper (on schedule, max. 10 points), and successfully complete a midterm test (max. 60 points). To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, students need to perform excellently throughout the semester and be capable of independent study. Students are able to navigate through the tangle of information in various literary sources, select relevant sources of information for their study, are knowledgeable about the history of psychology, the various psychological science trends, and are able to compare the various modern psychological trends based on their knowledge.

A grade of B means that students performed above average throughout the semester, were able to study independently, have a very good command of basic information related to the history of psychology, and are able to navigate the information in the literature very well.
A grade of C means that students performed well throughout the semester, their theoretical knowledge of the history of psychology is at a good level, but they sometimes lack the ability to apply this knowledge in deeper study, to critically evaluate and compare the various literary sources of information and contemporary psychological trends.
A grade of D indicates that students were less well prepared during the semester, with moderate deficiencies in theoretical knowledge related to the history of psychology. They have considerable difficulty in working independently; they are not able to critically analyze information quite correctly on their own.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyze and compare multiple pieces of knowledge, but have mastery of most of the theoretical knowledge in the course.
A grade of Fx indicates that the student needs extra study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The aim of successful completion of the course is to be able to orient oneself correctly in the knowledge of the history of psychology, to know the psychological trends and the main founders of scientific psychology itself. Students will be able to think in context and orient themselves in the different psychological trends and currents (form psychology, behaviourism, psychodynamic psychology, existential and humanistic psychology, cognitive and transpersonal psychology), which will help them in the further education process. They will be able to compare the various modern psychological trends on the basis of their acquired knowledge. At the same time, they are able to assess, analyse and compare the findings of different psychological trends, think critically and evaluate monographs written by eminent psychologists who have influenced the basic trends in psychology. They develop their analytical thinking while working with professional monographs written by representatives of the most important psychological trends. They also learn about the development of psychology in Slovakia and important personalities in the field of psychology and pathopsychology.

Class syllabus:
1. Founders of independent psychology as a science.
2. The main psychological trends and currents.
3. Shape psychologists.
4. Behaviorism and neobehaviorism.
5. Representatives of psychodynamic psychology.
6. Existential and humanistic psychology.
7. Cognitive psychology.
8. Transpersonal psychology.
9. Postmodern psychology.
10. Development of psychology and pathopsychology in Slovakia.

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde022/22	Intercultural psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form:
2 hours seminar/week; total of 22 hours per semester, combined form (primarily by attendance).
Student workload:
Attendance (22 hours), independent work on assignments (12 hours), group work (26 hours), total 60 hours of work.
Teaching methods:
Dialogical and discussion methods, work with tests and questionnaires, work with authentic text, work with information sources, case study, case study, psychological games, brainstorming, problem-based interpretation.

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde007/22 - Social psychology

Recommended prerequisites:
B-PSYde007 Social psychology

Course requirements:
100% pass mark
The continuous assessment includes assignments and tasks for independent (40%) and group work (60% of the assessment). Independent work includes a case study (10%), a critical analysis of psychological theory (20%) and a reflective essay (10%). Group work in randomly formed subgroups consists of the creation of a case study (20%) and a proposal for a project to develop the target group's intercultural competence (40%), in which the subgroup will use knowledge from their study combination.
To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale of:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).

For a grade of A, the student correctly explains and identifies knowledge and phenomena that are part of intercultural psychology and is able to integrate them meaningfully with knowledge from other disciplines. Critically and creatively applies the information learned to school and everyday practice using a variety of tools, methods, and techniques. Can design strategies leading to change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
For a grade of B, the student can explain and identify, at an appropriate level, the knowledge and phenomena that are part of intercultural psychology and can integrate them into the knowledge of other disciplines. Critically and creatively applies the information learned to school and everyday practice using a variety of tools, methods, and techniques. Can design strategies leading to change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
A grade of C is awarded if the student can generally explain and identify knowledge and phenomena that are part of intercultural psychology and can integrate them with knowledge from other disciplines. He/she is able to apply the information acquired in school and in everyday practice using the tools, methods and techniques selected. In most cases, he/she can correctly propose strategies leading to a change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
A grade of D will be awarded if the student can explain the basic knowledge and phenomena involved in intercultural psychology and knows the interdisciplinary context. He/she can apply the acquired information with greater guidance in school and everyday practice using the selected tools, methods and techniques. In most cases, he/she will correctly propose strategies leading to a change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
For grade E, the student can only to a limited extent explain the basic knowledge and phenomena that are part of intercultural psychology and knows the interdisciplinary contexts. At a minimal level, the student is able to apply the acquired information in school and everyday practice using selected tools, methods and techniques. At least in some cases, correctly suggests strategies leading to a change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
A grade of Fx indicates that the student needs additional study to gain the necessary knowledge.
Scale of assessment (preliminary/final): 100% pass mark

Learning outcomes:
The aim of the course is to introduce the status, history of the emergence and basic terminology of intercultural psychology as well as the possibilities of developing and diagnosing intercultural competences.
Intercultural psychology is now a recognized theoretical and research field due to globalization and the intermingling of different cultures.
Upon completion of the course, the student:
- can delineate areas of inquiry in intercultural psychology and define key terms, e.g., culture, acculturation, culture shock, etc.,
- can identify universal and culturally specific aspects of the psyche,
- recognises the reactions and phenomena that arise when different cultures meet and when people move from culture to culture,
- knows the tools, methods and techniques that can be used to diagnose and develop intercultural competences,
- applies the knowledge of intercultural psychology to school practice and specifically to the teaching of psychology.

Class syllabus:
1. Definition and history of intercultural psychology (ethnology, sociology, cultural anthropology).

2. Basic terminology and areas of inquiry (culture, assimilation, ethnicity, ethnicity, ethnic consciousness, nation, nationality, ethnic minority, race, racism).
3. Stereotypes, prejudices and attitudes towards other cultures in children and adults.
4. Culture as a key concept.
5. Intercultural competences, their diagnosis and development (cognitive, affective and behavioural competences).
6. Application of intercultural psychology in school practice and psychology teaching.
7. Intercultural training and its specifics.

PdF.KH/B-HISde011/22	Introduction to the study of history

Educational activities:
Type of activities: lecture
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours lecture/week, 22 hours total per semester, combined form; (primarily in person)
Student workload:
2P (2 credits): 11 x 2 hours of direct instruction = 22 hours; 38 hours of exam preparation; 60 hours of student work in total.
Educational methods: problem-solving exercises; discussion of the subject; e-learning

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
10 % of the interim and 90 % of the final evaluation. The student takes the test in the middle of the semester, from which the student may obtain a maximum of 20 points. In the examination period, the student takes an oral examination. In the oral examination, the student will draw two questions. The rating is awarded on a scale:
A (excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C (good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the knowledge gained to practice),
D (satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic understanding, and does not demonstrate the ability to think critically).

Learning outcomes:
The course focuses on understanding the key concepts of history, its current relevance, acquiring basic knowledge of bibliography, working with historical sources and literature, and citation methods that students will use in their studies when writing Seminar and diploma theses in their

future pedagogical and professional work. By completing the course, the student will acquire the basic concepts and methods of the historian's work and the prerequisites for their practical use. The student will develop the ability to combine theoretical knowledge with practical skills.

Class syllabus:

- The subject and mission of history
- Procedures and stages of historical research
- Bibliographies
- Study of historical literature
- Writing and documentation
- Classification of historical sources
- Unwritten sources
- Written sources
- Archives and archival aids
- Methods of historical research
- Written processing of research results

PdF.KPsPp/B-PSYde016/22	Introduction to the studying of psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
Scope, type/method of teaching and organizational form:
2 hours seminar/week; total 22 hours per semester, combined form (primarily full-time).
Student workload:
Presentation teaching (22 hours); continuous preparation for class (11 hours), preparation and implementation of the seminar paper and PPT presentation (15 hours); preparation for the midterm test (12 hours), 60 hours in total.
Teaching methods:
group discussion interview, guided discussion, active group work, heuristic method, didactic games, mind mapping, guided self-study, and work with text

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
Throughout the semester, students will complete a term paper (35 points), present the term paper in a study group (20 points), demonstrate their activity in the study group (10 points), and successfully complete a midterm test (35 points).
Credit will not be awarded to a student who scores less than 50% on any of the assignments.
A minimum score of 60% is required to pass the course.
Grades are awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, the student needs to produce excellent results continuously throughout the semester, be capable of independent study, and be able to critically compare professional psychology texts. The student is able to navigate through the tangle of information in various literary sources and is able to select relevant sources for his or her study, has a basic understanding

of psychology as a science, and is able to compare and contrast the various modern schools of psychology on the basis of his or her knowledge.
A grade of B means that the student has performed above average throughout the semester, has been able to study independently, has mastered basic information related to psychology as a science, can navigate information in the literature very well, and has moderate deficiencies in creative and critical thinking.
A grade of C means that the student performed at a standard level during the semester, the theoretical knowledge of the subject matter is at a good level, but the ability to apply this knowledge quite correctly, to critically evaluate and compare the various literary sources and psychological knowledge is lacking.
A grade of D means that the student was less prepared during the semester, has moderate deficiencies in theoretical knowledge related to the subject of education and has more problems in independent implementation work as well as in group work, more often cannot critically analyse information or has problems applying knowledge to practice.
A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyse and compare multiple pieces of knowledge, and fails to think critically and apply theoretical knowledge to practice.
A grade of Fx indicates that the student is not achieving the necessary standard and further study and extra work is required.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The aim of the course is to orient students in the history of psychology as a science as well as in the current areas of modern psychology. The student distinguishes between psychological institutions, is familiar with their activities, develops analytical and active, critical thinking when working with an assigned professional text, is able to compare and evaluate information, plan his/her activities or activities in a group (group work). Knows where and how to search for professional and relevant bibliographic resources in the field of psychology and psychology teaching and actively uses digital technologies for his/her further education and to develop his/her competences in the study of psychology teaching at the bachelor's degree level. He/she also knows his/her future career options after completing the bachelor's degree.

Class syllabus:
1. A brief history of psychology
2. The formation of psychology as a science
3. The object of psychological investigation
4. The formation of contemporary psychological knowledge
5. Modern psychology in the world and in Slovakia and its areas of research
6. Professional psychologists and their activities
7. Psychological institutions and workplaces in Slovakia
8. Classical and electronic information on psychology
9. How to study effectively
10. Slovak Association of Teachers of Psychology (SPTA) and its activities and EFPTA in the EU
11. Employment opportunities for psychology teachers in Slovakia and abroad

Type of activities, scope (number of hours) and methods of educational activities:
Scope, type/method of teaching, and organizational form:
2 hours seminar /week, a total of 22 hours per semester, combined form (primarily full-time).
Student workload:
11 x 2 hours of teaching = 22 hours; continuous preparation for class (12 hours); production of 2 x sets of teaching materials (20 hours), 54 hours in total.
Teaching methods:
Interpretation, group discussion, interview, guided discussion, active group work, problem-solving, heuristic method, experiential methods, creation of concept maps, guided self-study, work with didactic text and information sources, and critical analysis of psychology textbooks.

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde001/22 - General psychology

Recommended prerequisites:
B-PSYde001 General psychology

Course requirements:
100% of the interim assessment
Interim evaluation includes the performance of interim tasks according to the assignment: creation and presentation of 2 x sets of teaching materials for primary and secondary schools on a selected topic, i.e. 1 x psychological topic according to the content of the subject civics for 7. year. Elementary school, 1 x psychological topic from the selected textbook of psychology for secondary schools (50% + 50% of the evaluation). Each developed set of teaching materials includes a worksheet on the topic for class work (10% of the evaluation), a concept map on the selected topic (10% of the evaluation), an experiential activity for class work to develop the selected topic (10% of the evaluation), a critical analysis of the textbook with which the students worked (10% of the evaluation), adherence to the topic, originality, formal and professional correctness of its processing and presentation (10% of the evaluation).
A minimum of 60% of the total score is required to pass the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good – above-average standard),

C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
A - the student continuously produces excellent results during the semester, is capable of independent study and critical comparison of professional texts in the teaching of psychology, is proficient in the fundamentals of teaching psychology as a scientific discipline, including their meaningful integration with the knowledge of other disciplines, is able to practically apply theoretical knowledge on the basis of his/her knowledge to the elaboration of the assigned tasks;
B - the student has achieved above-average results during the semester, is capable of independent study and adequate critical comparison of professional texts from the teaching of psychology, and knows the basics of teaching psychology as a scientific discipline, including their appropriate integration with the knowledge of other disciplines, is able on the basis of their knowledge to practically apply theoretical knowledge to the development of the assigned tasks;
C - during the semester, the student performed standardly well, the ability of independent study and critical comparison of professional texts from the teaching of psychology is average, the theoretical knowledge of the subject matter is at a good level, and the ability to practically apply theoretical knowledge to the development of the assigned tasks is average;
D - the student's ability of independent study and critical comparison of professional texts from the teaching of psychology is at a weaker level, the theoretical knowledge of the subject matter is moderately deficient, and the ability to practically apply theoretical knowledge to the development of the assigned tasks is a problem for the student;
E - the student fails in more than one of the assignments, lacks the ability of independent study and critical comparison of professional texts from the teaching of psychology, has deficiencies in the theoretical knowledge, and fails in the practical application of theoretical knowledge to the development of the assigned tasks.
FX - the student has not sufficiently fulfilled the requirements for passing the course and extra work is required.
Scale of assessment (preliminary/final): 100% of the interim assessment

Learning outcomes:
The aim of the course (as a key component of the gradual practical preparation for a profession in the field of psychology teaching in combination at the bachelor's degree) is to gain an overview of the tradition, concepts, objectives, and content of psychology teaching in Slovakia and abroad (documents and recommendations of SAUP and EFPTA), to realize the importance of psychological education in the context of the general objectives of education and professional training for a profession.
Student after completing the course:
- knows the specifics of teaching psychology as a secondary school subject,
- is able to navigate in the pedagogical documentation of the subject of psychology and critically analyze it,
- knows the basic principles and bases for the development of psychological thinking and psychological literacy in the subject of psychology,
- knows the theoretical foundations of the didactics of psychology,
- understands the psychodidactic aspects of teaching psychology,
- can creatively apply the acquired theoretical knowledge to the preparation of selected teaching materials,
- can critically assess the suitability of the developed teaching materials and provide constructive feedback.

Class syllabus:

1. History and concept of teaching psychology in secondary and tertiary education in Slovakia and abroad.
2. The status of the subject of psychology in the curricula of grammar schools and secondary vocational schools.
3. General aims of psychology education in higher secondary education.
4. Analysis of content and performance standards of the subject of psychology at different types of schools, basic pedagogical documentation.
5. Development of key competencies and personal and social development in the subject of psychology.
6. Specifics of teaching psychology: motivation and expectations of male and female students in teaching psychology.
7. Psychological literacy and psychological thinking - concepts and methods of their research and development.
8. Theoretical foundations of didactics of psychology.
9. Psychodidactic aspects of teaching psychology.
10. - 11. Teaching psychology in interdisciplinary contexts and inter-subject relations. Social-psychological training and subjects of personal and social development.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde015/22	Latin for History Teachers

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week, the total for the semester 22 hours, combined form; (primarily present)
Student workload:
2S (2 credits): 11 x 2 hours of direct teaching = 22 hours; 9 hours - preparation for individual seminars; 7 hours - preparation for mid-term evaluation (test); 5 hours - preparation of individual assignments; 9 hours - preparation for final evaluation (test). Total 52 hours of student work.
Learning methods: teaching Latin grammar, translation of Latin texts and sources of historical nature, work with editions, problem-solving exercises; discussion on the subject; e-learning, heuristic method

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
There will be two written examinations of 25 points each during the semester. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. Credit will not be awarded to a student who accumulates less than 59 points.
The grade shall be awarded on a scale:
A (100-91%, excellent - excellent results, the student learns the basics of Latin grammar, writes both papers for at least 45 points in total and has an excellent command of Latin sources.
B (90-81%, very good - above average standard, the student is knowledgeable about the subject matter, masters the basics of Latin grammar, writes the papers for a minimum of 41 points, and masters the work with Latin sources.
C (80-73%, good - normal reliable work, the student can navigate the issues, has learned, but the papers showed deficiencies as he/she scored less than 40 points cumulatively.
D (72-66%, satisfactory - acceptable performance, the student can orient himself to the problem at a basic level, his knowledge is fragmented. He scored less than 35 points on the papers.
E (65-60%, satisfactory - results meet the minimum criteria, the student can orient himself/herself to the problem only with great difficulty, he/she has only the most basic knowledge. He/she scored less than 29 points in the written examinations.
FX (59-0%, insufficient - extra work is required, the student is unable to navigate the subject, does not know the most basic knowledge.

Learning outcomes:
The student will acquire the basics of Latin grammar by completing the course. The student will acquire basic knowledge of the Latin language, the inflexion of nouns and pronouns and the tense of verbs in the present, past and future tenses. After completing the course, the student will be able to translate simpler texts from Latin into Slovak. The student will learn to work with Latin historical sources and editions.

Class syllabus:
The course focuses on vocabulary, the basics of Latin grammar and working with Latin historical sources.
- An introduction to the study of the Latin language.
- I. Declension. The early age of Roman literature.
- Declension II. The literature of the imperial period.
- I. and II. conjugation. Medieval Latin sources.
- Reinforcement of the syllabus. Editions of medieval documents.
- Conjugations III and IV. Latin sources on the history of medieval and early modern Slovakia.
- The verb esse and its compounds. Latin sources on the history of towns in Slovakia.
- Pronouns. Latin sources for the ecclesiastical history of Slovakia.
- Imperfect verbs of I - IV conjugation. Latin modern sources.
- III. declension. Particípium prézenta. Futurum of verbs of I. and II. conjugation.
- Repetition, reading of simple texts.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde023/22	Leisure time education

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2., 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course: 100% pass mark.
Assessment: consists of 2 intermediate assessments (40+60, total 100 points).
Interim assessment 1: consists of the preparation of a term paper and its oral presentation or practical application in class.
Semester work: consists of a creative assignment for 40b (20+20). It includes an electronic portfolio - a plan of experiential activities in the context of leisure education based on a set structure (20b) and its presentation or application of the created activities in the classroom (20b).
Intermediate assessment 2: consists of a test of the acquired knowledge, namely a knowledge test for 60p. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of continuous assignments, excellent professional knowledge and its application in problem solving, excellent orientation to leisure issues, excellent communication skills, responsibility and timely completion of assignments, and exceptional activity in the classroom during the semester.
A minimum of 81 points is required to obtain a B grade. For this grade, the student should demonstrate: a creative approach to developing ongoing assignments using a model, above average expertise and application of that expertise to problem solving assignments using consultation, above

average orientation to leisure issues, above average communication skills, responsibility and timely completion of assignments, and above average activity in class during the semester.
For a grade of C at least 73 points. For this grade, the student should demonstrate: the ability to develop ongoing assignments using the assigned template, good professional knowledge and its application in problem solving in a group or with the assistance of the instructor, good orientation to leisure issues, good communication skills, completion of assignments, average activity in class during the semester as prompted by the instructor.
At least 66 points for a grade D. For this grade, the student is expected to demonstrate: the ability to develop ongoing assignments using the assigned template and with the assistance of the instructor, average proficiency and application of knowledge in problem solving in a group setting or with the assistance of the instructor, average orientation to leisure issues, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
At least 60 points for an E grade. For this assessment, the student should demonstrate: the ability to develop ongoing assignments and with the assistance of the instructor, basic/minimal vocational knowledge, basic/minimal orientation to leisure issues, basic communication skills, completion of assignments.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes:
By completing the subject Leisure time in education, the student should:
- to know the content of leisure time pedagogy as a scientific discipline: functions, goals and requirements, areas of leisure time education,
- to know the subjects of leisure education and their importance in influencing the leisure time of an individual in society in a meaningful way,
- to be able to apply the acquired knowledge in the creation of leisure activities,
- to be able to create a plan for an activity of interest and to be able to apply it through practical tasks,
- be able to present their creative output to a group,
- be able to justify the appropriateness of the choice of didactic categories in the interest activity plan,
- understand the importance of leisure as a fundamental value in human life.
Transferable competences: the student strengthens soft skills such as communication skills through creative tasks on the course, digital skills - the student realizes the creation of a website as an e-portfolio with the use of feedback, interpersonal skills within the group - activation in the group, taking the initiative and responsibility.

Class syllabus:
Brief outline of the course:
The Leisure time in educationis intended to introduce students to the important sphere of leisure through leisure activities, which represent an important value for the individual and which are necessary in the targeted education of children, youth and adults. The Leisure time in educationcourse clarifies the basic pedagogical categories in a direct link between theoretical and practical training. By completing the course, the student will gain knowledge of the basic concepts in the field of leisure pedagogy, of leisure organizations aimed at children, youth, adults, and of activating didactic methods or experiential learning for the creation of leisure activities.
Topics:
Basic concepts of leisure pedagogy. Objectives of leisure education. Didactic process of leisure education and the creation of a plan of activating leisure activities - mission, goals, tasks, principles, content, forms and methods. Educational areas of activity outside the classroom. Interests and

leisure-time education. Problems of education in leisure time. Field work (streetwork), prevention, volunteering. New approaches in leisure time pedagogy. Personality of the pedagogue, social assistant, animator in the processes of education and training in leisure time. Educator and education and training in the school. Institutions and facilities providing leisure and interest activities.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde032/22	Medial education

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 1., 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
100% of the interim grade, which includes 30% class activity (30 points) and 70% project (70 points).
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results), the student reflects correctly and actively both critically and creatively
knowledge, including its meaningful integration into the realities of life and pedagogical practice.
B (93-86%, very good - above average standard), the student reflects critically on knowledge appropriately,
including their meaningful integration into the realities of life and pedagogical practice.
C (85-76%, good - routine reliable work), students performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge.
D (75-68%, satisfactory - acceptable results), students were less prepared during the semester, they have slight deficiencies in theoretical knowledge. They cannot critically analyze information.
E (67-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge.
Fx (59-0%, insufficient - extra work required).

Learning outcomes:
Learning outcomes:
Learning objectives and outcomes and transferable competences:
The thematic focus of the course introduces students to applied ethics and its disciplinary divisions, to
defining the basic concepts of ethics, explaining morality as a social regulator, moral norms and the principles of creating ethical codes. It focuses on the professional ethics of the teaching profession

(teacher competences, ethical dilemmas in the teaching profession, etc.) and the importance of a code of ethics in this profession. The aim of the course is to highlight the importance of a favourable classroom and school climate and to work with the content of the Convention on the Rights of the Child. Using selected examples from other branches of applied ethics (bioethics, media ethics, etc.) to show the importance of the presence of a code of ethics in the professions, the possibility of using classical ethical concepts and also different alternatives in solving ethical dilemmas.
This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).
The course contributes to the gradual development of important professional competences of future teachers by its focus and methods of education.

Class syllabus:
Brief outline of the course:
1. Introduction to the subject: defining the basic concepts: ethics and morality.
Ethics and professional ethics: definition of basic terms: applied ethics - sectoral division of applied ethics. Professional ethics as a part of applied ethics.
2. Professional tact and etiquette as a basis for the formation of the code of ethics of individual professions.
3. The teaching profession and the teacher's code of ethics. Status and role of the teacher. Resolving dilemmas in the teaching profession.
4. Positive climate in the classroom, relationships between school climate factors.
5. Convention on the Rights of the Child.
6. A closer definition of bioethics and its areas of interest on concrete examples, the issue of the code of ethics. Classical ethical theories and alternative methods in solving ethical dilemmas.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde013/22	Methodology of Writing a Professional Text in the History

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours lecture/week, 22 hours total per semester, combined form; (primarily in person)
Student workload:
2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 20 hours preparation of a seminar paper, 5 hours preparing individual assignments for each lesson, 3 hours preparing the presentation; 50 hours of student work in total.
Educational methods: monological method, problem-solving exercises; discussion of the subject; e-learning; heuristic method, analysis of the sources

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100 % of the interim evaluation. The student submits a term paper at the end of the semester - prepare a professional text according to the assignment. For each lesson, he prepares individual work individual assignments. To obtain the final grade, it is necessary to work actively in each lesson, complete the prescribed assignments, and hand in and present the seminar work.
The rating is awarded on a scale:
A 100-91% (excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B 90-81% (very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C 80-73% (good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the knowledge gained to practice),
D 72-66% (satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E 65-60% (sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx less than 59% (insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically).

Learning outcomes:

The course aims to develop information literacy and professional, methodological and expressive skills of male and female students. After completing the course, the student will:
- Knows and can navigate primary and secondary professional and scientific sources. The student can identify and understand the primary and secondary sources in his/her field of study.
- The student knows and can apply the principles of authorial ethics.
- Can critically evaluate the scholarly quality of online resources.
- Can apply the principles of professional writing.
- Can structure a professional text by the conventions of the discipline.
- Knows how to prepare a presentation, develops communication skills

Class syllabus:
- Basic requirements for the processing of professional work in history:
- Aim and subject of the thesis
- Heuristics for historical work - bibliographies, historical literature, sources
- Critical study of information sources and their documentation
- Preparation of the thesis project, creation of the thesis structure
- Preparation and implementation of the professional work
- Preparation and implementation of research for the thesis
- Processing the results of the thesis research, their analysis, interpretation and synthesis
- Final linguistic and formal editing of the thesis

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde013/22	Methodology of academic writing in psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
2 hours of seminar per week; a total of 22 hours per semester, combined form (primarily on-site).
Student workload:
11 x 2 hours of direct teaching = 22 hours; 8 hours of seminar work editing and revising professional texts; 20 hours of final seminar work. Total 50 hours of work.
Teaching methods:
lecture with multimedia support, group discussions on edited texts, demonstration of analysis of the stylistics of a scientific text, demonstration of the creation and improvement of the content goal of a scientific text and subsequent simulation of the process, systematic reflective editing of processed texts

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde006/22 - Methodology of psychological research

Recommended prerequisites:
B-PSYde006 Methodology of psychological research

Course requirements:
100% of the interim evaluation
Seminar work - elaboration of a professional text according to the assignment 50% of the mark. The remaining assessment consists of in-class sub-assignments using reflective writing techniques - students assess each other's completed texts and then incorporate changes for improvement identified by the team. Students receive 10 points for each improvement and editing of the text in class before handing in the final text. A minimum score of 60% is required to pass the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required.
Grade A: the student is able to analyse and produce texts with a psychological orientation in an excellent manner. The texts produced, make use of, and synthesise modern sources from psychology

and relevant disciplines and answer predetermined professional questions in an interesting way. The student is also able to edit mistakes in other professional texts to a high standard and suggest modifications to improve the quality of the texts stylistically and in terms of content.
Grade B: the student is able to analyse and produce texts with a psychological orientation reasonably well. The texts produced, use and synthesise relevant sources in the field of psychology and answer predetermined questions. The student is able to systematically edit out errors in foreign professional texts and suggest modifications to improve the quality of the texts stylistically and in terms of content.
A grade of C is awarded if the student is moderately able to analyse and produce texts with psychological orientation. The texts produced, make use of relevant sources in the field of psychology, and answer predetermined questions. The student is able to edit mistakes in foreign professional texts and suggest modifications to improve the quality of the texts stylistically.
A grade of D is awarded if the student is able to analyse and produce texts with a psychological orientation to a satisfactory degree. The texts produced, make use of local psychological sources of older date and quality. Stylistic and grammatical errors appear more frequently in the text.
A grade of E is awarded if the student is at least minimally able to produce texts with psychological orientation. However, the student misses basic content and stylistic errors when editing texts. Errors often occur in authored texts, and the student also uses sources that are not relevant and without a broader synthesis of multiple authors.
A grade of Fx indicates that the student needs additional study to gain the necessary knowledge.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is for the student to master the procedures of producing a professional text with emphasis on standards in psychology, such as IMRaD, APA7 Publication manual, etc., and to be able to qualitatively distinguish between the level of academic and research text. Upon successful completion of the course, the student is not only able to critically evaluate the quality of available psychological scholarly resources but is also able to author his/her own psychology-oriented text (to the extent indicated in the assessment above). In the process of learning, the student will learn to critically edit texts as well as to evaluate the quality of scholarly sources. The course also aims (transferable competencies) to develop students' information literacy, and professional, methodological, and expressive skills. Emphasis is placed on working with modern information technologies in order to search the literature and then synthesize it into original texts. Regarding the development of critical thinking, students are developed in synthesizing and comparing scientific knowledge from multiple authors.

Class syllabus:
1. Origin and formulation of scientific problems, peer-review, APA JARS.
2. Argumentation and evidence in a scholarly text. APA7 model term paper template. Proper wording and stylistics of paragraphs.
3. Citation. A literature search in databases and free repositories. Synthesizing literature. Features of a professional text.
4. The most common mistakes in academic writing. Ethics in writing and plagiarism. Ethics of writing a professional text.
5. Reflective writing method in improving professional text in psychology.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde006/22	Methodology of psychological research

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
1-hour lecture + 1-hour seminar per week; a total of 22 hours per semester in a combined form (primarily on-site).
Student workload:
11 x 2 hours of direct teaching = 22 hours; 25 hours of preparation for the mid-term test; 15 hours of preparation for the seminar paper, and 35 hours of preparation for the final test and oral examination. 97 hours of work in total.
Teaching methods:
Lecture and lecture with multimedia support, dialogical and discussion methods, demonstration of analysis of a scientific text, and critical analysis of the methodological aspect of a scientific study.

Number of credits: 4

Recommended semester: 2.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde001/22 - General psychology

Recommended prerequisites:
B-PSYde001 General Psychology

Course requirements:
50% of the interim assessment + 50% of the final assessment.
The interim assessment includes a midterm test (30% of the assessment) and group work (critical analysis and presentation of the methodological framework of the assigned psychological research, 20% of the assessment). The final assessment includes a final test (30% of the mark) and an oral examination (20% of the mark). The oral examination is conducted in smaller groups and takes the form of an analysis of the methodological framework of the selected research study or questions focusing on methodology and research in the field of psychology. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale of:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required.

Grade A: the student has an excellent understanding and reflection of the basic methodological frameworks used in the design of psychological research. The student has a very good understanding of the content and structure of these frameworks and can clearly identify their different parts in selected psychological studies.
Grade B: the student adequately understands and reflects on the basic methodological frameworks used in the design of psychological research. The student has a good understanding of the content and structure of these frameworks and can identify the vast majority of the individual parts in selected psychological studies.
A grade of C is awarded if the student predominantly understands and reflects on the basic methodological frameworks used in the design of psychological research. The student is familiar with the content and structure of these frameworks and can identify the most crucial individual parts in selected psychological studies.
Grade D is earned if the student has an average understanding and reflection of the basic methodological frameworks used in the design of psychological research. The student is familiar with the content and structure of these frameworks and can identify only some of the individual parts in selected psychological studies.
Grade E: the student has only a limited understanding and reflection of the basic methodological frameworks used in the design of psychological research. The student is familiar with the content and structure of these frameworks but finds it difficult to identify their individual parts in selected psychological studies without help.
A grade of Fx indicates that the student needs additional study to gain the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim assessment + 50% of the final assessment

Learning outcomes:
The student will gain an overview of the knowledge of the methodology of psychology, learn the standard framework of scientific text processing in psychology (IMRaD), and adopts the ability to critically analyse the methodology of psychological studies when working independently with scientific texts. Additional knowledge includes: how knowledge is constructed in the social sciences; theoretical information about the design of psychological research projects; and the functions and types of research. The student should also learn to understand the social embeddedness of science and the ethical issues of research; critically evaluate the methodological framework of research studies; navigate information in scientific studies and the scientific literature correctly. The student is able to identify relevant literature that may be enriching to his/her teaching practice and is able to critically evaluate it based on the qualitative level of its methodological framework.

Class syllabus:
1. The emergence of research problems. Objectives of scientific investigation. The language of science. Paradigm, theory, research, methodology, method. History of psychological research. Research as a scientific method of knowledge.
2. IMRaD. Research preparation. Research project: theoretical, methodological, and implementation part.
3. Ethics in research.
4. The relationship between theory and empirics in research. Psychological research: specifics and definition. Basic types of research. 20th century - crisis in research, current challenges in the 21st century.
5. Research structure and strategies. Quantitative and qualitative approaches.
6. Basic data collection techniques: observation, experiment, interview, focus groups, questionnaire, psychological test, case study, document study/analysis, semantic differential.

7. Outcomes in psychological research: evaluation and interpretation of quantitative and qualitative data. Secondary data analysis and meta-analysis.
8. Discussion in research, peer-review, publication of results, and new trends in research methodology.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde033/22	Multicultural education

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 2., 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects:
Prerequisites for successful completion of the course:
Weighting of interim and final assessment: 100/0, the course ends with an assessment.
Students will develop two interim activities/projects as part of the interim coursework assessed at 40% and 40%. Activity and preparation in seminars is assessed (20%). A total of 100% of the interim assessment.
Students will choose one of the activities, work it systematically and develop it into a comprehensive lesson preparation according to this structure:
a. Objectives of the activity (what skills and abilities it develops - students will choose an appropriate topic according to their apprenticeship, where they will be able to apply the activity as a cross-cutting theme).
b. Target group of the activity (for which pupils it could be used).
c. Time and space (how long it would take, any special space requirements).
d. Activity flow (a brief scenario of how the student would carry it out).
e. Evaluation of the activity (different ways of assessing pupils, self-assessment, etc.).
f. Theoretical perspective on the activity (interpretation of the activity based on at least three key words from multicultural education theory).
g. Literature used.
The evaluation will assess the fulfilment of the principles of multicultural education, the suitability of the activity for teaching within the cross-cutting theme of multicultural education, the systematic nature of the preparation and the interconnectedness of its components. Negative evaluations are given to projects that could reinforce stereotypes and prejudices among pupils or in which students present stereotypical views of other cultures.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results), students will produce an original project that is thought through as a coherent whole to develop intercultural understanding, all criteria are met at an excellent level.
B (90-81%, very good - above average standard), students creatively develop a project that will assist in developing intercultural understanding, Criteria are met at a very good level.

C (80-73%, good - normal reliable work), students will produce a project that does not undermine the principles of multicultural education, Criteria are met at a good level.
D (72-66%, satisfactory - acceptable results), students will develop a project that is not internally intertwined but does not violate the principles of multicultural education, the criteria are met satisfactorily.
E (65-60%, sufficient - results meet minimum criteria), students will develop a project that marginally undermines the principles of multicultural education, Criteria are met sufficiently.
Fx (59-0%, insufficient - extra work required), students will develop a project that promotes cultural stereotypes and biases. The project does not meet the minimum criteria.

Learning outcomes:

Learning outcomes:
Learning objectives and outcomes and transferable competences:
Students understand the principles and practices of multicultural education. They know how to work with stereotypes and prejudices in the classroom. They can plan and design multicultural education and integrate it as a cross-curricular topic in the classroom. They develop intercultural understanding. They master the main didactical procedures for the implementation of multicultural education as a cross-cutting theme.
Learning objectives:
To provide students with the basic information needed to understand the principles of multicultural education as a cross-cutting theme in the national curriculum. To teach students how to work with the issue of stereotypes and prejudices, to teach them how to plan and design multicultural education in schools as a cross-cutting theme. To familiarize students with the basic didactic practices in the implementation of multicultural education in education.

Class syllabus:

Brief outline of the course:
The problem facing multicultural education - stereotypes and prejudices in us. Encountering another culture. Culture shock. How we get information about other cultures. How to cope with the arrival of foreigners. What we think about intercultural communication. Migration and values in multicultural education. How to proceed in multicultural education. Assessment in multicultural education.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZde028/22	**Course title:** Pedagogy of individuals with special educational needs
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Number of credits: 3	
Recommended semester: 1., 3., 5.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points).

The rating is awarded on a scale:

A (100-91%, excellent - excellent results with only minimal errors),

B (90-81%, very good - above average results with minor errors),

C (80-73%, good - normal reliable work, average results),

D (72-66%, satisfactory - acceptable results, but significant errors occur),

E (65-60%, sufficient - results meet minimum criteria),

Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).

A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes:
Learning objectives and outcomes and transferable competences:
The aim of the course Pedagogy of Individuals with Special Educational Needs is to make available basic information about the specifics of educating individuals with special educational needs and to prepare the student for pedagogical work in the context of the diversity of the educated population. The student will be able to define the term special educational needs, categorize individuals with special educational needs (SEN) in relation to the current system of special education and in accordance with current legislation. Becomes familiar with basic terminology in special education. Is able to characterize the educational opportunities for individuals with SEN. Can explain the implications of a disability/impairment/threat and/or other SEN in the educational process. Knows and understands the specifics of educating individuals with SEND. Can name and justify selected support measures in the education of children and pupils with SEND. Explain the importance of the teacher's cooperation with other educational and professional staff of the school and the school counselling centre in the care of pupils with SEN included in mainstream education. Know the educational programmes for pupils with SEND and understand the Individual Education Programme document. The student is prepared to address the risks associated with the inclusion of a pupil with SEND in a classroom of able-bodied classmates.
Transferable competences developed during the students' work in the seminars: critical thinking skills, contextual reasoning, communication skills.

Class syllabus:
Brief outline of the course:
General foundations and terminological definition of special education.
Definition of basic terms in special education.
Trends in education, current opportunities and legislative conditions in education of individuals with SEND (with a focus on inclusive education).
Specifics of education and support measures for children and pupils with SEN according to individual categories:
pupils with intellectual disabilities and cognitive impairment; pupils with autism spectrum disorder; pupils with physical disabilities, illnesses and disabilities; pupils with impaired communication skills; pupils with specific learning disabilities; pupils with behavioural disorders; pupils from socially disadvantaged backgrounds; gifted and exceptionally gifted pupils.
Educational programmes and individual educational programme for pupils with SEN.
The position of a pupil with SEN in a class group of intact classmates.

Cooperation of the teacher with other pedagogical and professional staff of the school and the school counselling centre in the care of SEN pupils (inclusive team).

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde008/22	Personality psychology

Educational activities:
Type of activities: seminar / lecture
Number of hours:
per week: 2 / 2 **per level/semester:** 26 / 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
2 hours lecture + 2 hours seminar/week; 44 hours total per semester, combined method (mostly by attendance).
Student workload:
11 x 4 hours of direct teaching = 44 hours of teaching, 16 hours of seminar paper preparation, 30 hours of exam preparation, total 90 hours of work.
Teaching methods:
lecturing, instruction, discussion on a selected topic, case studies, brainstorming, work with professional text and information sources.

Number of credits: 4

Recommended semester: 3.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde005/22 - Developmental psychology

Recommended prerequisites:
PSYde005 Developmental psychology

Course requirements:
50% of the interim assessment and 50% of the final assessment
Interim assessment is 50% of the grade, the student will prepare a seminar paper. The final assessment consists of a written knowledge test (30%) and an oral examination (20%). To pass the course, a minimum of 60% marks is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
For grade A, the student produces excellent results continuously throughout the semester, is capable of independent study and critical comparison of professional texts in personality psychology, is proficient in the fundamentals of personality psychology as a scientific discipline, including their meaningful integration with the knowledge of other disciplines, is able to practically apply theoretical knowledge on the basis of his/her knowledge to the elaboration of the assigned tasks.

For a grade of B, the student achieves above-average results during the semester, is capable of independent study and adequate critical comparison of professional texts in personality psychology, is proficient in the fundamentals of personality psychology as a scientific discipline, including their reasonable integration with the knowledge of other disciplines, is able to apply theoretical knowledge practically on the basis of his/her knowledge to the elaboration of the assigned tasks.
For a grade of C, the student performs standardly well during the semester, is average in independent study and critical comparison of professional texts in the psychology of personality, achieves an average level of theoretical knowledge of the subject matter and the ability to practically apply theoretical knowledge to the development of the assigned tasks.
For grade D, the student is capable of a weaker level of independent study and critical comparison of professional texts in the psychology of personality, he/she has moderate deficiencies in the theoretical knowledge of the subject matter, the ability to practically apply theoretical knowledge to the elaboration of the assigned tasks is a problem for the student.
For grade E the student fails in some of the assigned tasks, lacks the ability to study independently and critically compare professional texts in the psychology of personality, has deficiencies in theoretical knowledge, fails in the practical application of theoretical knowledge to the development of the assigned tasks.
A grade of Fx means that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim assessment and 50% of the final assessment

Learning outcomes:
The aim is to know the psychological theoretical foundations of personality formation and to get a basic overview of the directions and approaches in personality psychology.
After completing the course, students must correctly
know:
• the basic components of personality
• the theoretical foundations of personality psychology
• the basic theories of personality
• methods of personality research
understand:
• the basic principles of personality formation
• the structure of personality
• the basic peculiarities of personality development in norm and pathology.
be able to:
• use the psychological principles of personality formation to develop the cognitive, affective qualities and abilities of pupils and students
• integrate different psychological approaches into a holistic understanding of personality
• develop the different components of the educational process in the context of the personalities of pupils in the classroom
• to use an empathetic approach and to promote pupils' and students' self-actualising tendencies
• critically analyse and compare information in the literature.

Class syllabus:
1. Basic definition and concepts of personality psychology - structure and dynamics of personality.
2. Concepts of the psychoanalytic approach - the structure of personality according to S. Freud, defence mechanisms of A. Freud and their relation to psychological difficulties in the educational environment (burnout syndrome, depression, etc.).

3. Individual and analytical psychology - the desire for power according to A. Adler, the need for power in pupils in the educational environment; C. G. Jung's archetypes, the acceptance of archetypal tendencies and their relation to the educational process.
4. Humanistic psychoanalysis of E. Fromm and K. Horney.
5. Behaviorism and neobehaviorism - the concept of behaviourism of E. L. Thorndike, J. B. Watson, operant conditioning B. F. Skinner and its significance in teacher-student interaction, social learning of A. Bandura - the teacher as a role model, M. E. P. Seligman's theory of learned helplessness, N. E. Miller and J. Dollard's synthesis of behaviourism and psychoanalysis.
6. Humanistic psychology - concepts of A. H. Maslow, V. E. Frankl, C. Rogers, self-actualization, and the promotion of the self-actualizing instinct as the goal of the educational process.
7. Trait approaches of R. Cattell, H. J. Eysenck, G. W. Allport.
8. Cognitive approach to understanding personality according to G. A. Kelly, K. Lewin.
9. Psychological methods of cognition of personality.
10. Psychological approaches and their significance in pedagogy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde019/22	Philosophical conceptions of man

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
2 hours seminar/week; 22 hours total for the semester, combined form (primarily attendance)
Student workload:
22 hours – direct teaching, 16 hours – preparation for interim test, 12 hours elaboration of interim tasks, 10 hours self-study. Total: 60 hours.
Teaching methods:
problem-based interpretation, application of methodological scepticism in relation to established anthropological concepts (the aim is to provoke students to criticize them and object to their underlying assumptions), documented cases of misuse of knowledge coming from the arsenal of anthropology will be discussed and students will be invited to suggest measures that could prevent such failures.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
Interim assessment includes the completion of assigned intermediate tasks (40% of the assessment) and an intermediate didactic test (60% of the assessment). The score or percentage of the interim assignments reflects the degree of compliance of the student's interim assignment with the criteria published in the assignment for each assignment. The didactic test contains tasks of varying cognitive difficulty, so it stratifies students not only according to the amount of knowledge they have acquired. Both the test and the intermediate tasks are designed to verify the specified . A minimum score of 60% is required to pass the course.
The grade is awarded on a scale:
A (100-94%, excellent – outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good – normal reliable work),
D (75-68%, satisfactory – acceptable results),
E (67-60%, sufficient – results meet minimum criteria),
Fx (59-0%, insufficient – additional work required.

In the didactic test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to an A grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a B grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a C grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a D grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a E grade.
Fx – The student has not met the required thresholds for passing the course.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The aim of the course will be to extend the knowledge of human beings acquired in other courses to include the socio-cultural and spiritual dimensions as they are reflected especially in the environment of philosophy.
Within its framework, one also acquires the ability to approach man as a kind of holistic and multidimensional being. The students can distinguish between philosophical and scientific approaches to the conceptualization of anthropological issues and know their strengths and weaknesses. The students become familiar with the motives and arguments of philosophical criticism of scientific concepts of man, learn methodological approaches of philosophical provenance that have proven productive in the relevant human sciences. Its main purpose is to equip students cognitively and argumentatively so that they can defend the interests of man, his dignity and humanity against possible dehumanizing influences. The student will also be guided to infer the human-legal implications arising from certain anthropological concepts and research on human beings. The aim of continuously assigned tasks is for the student to be able to search for relevant information sources, to take qualified opinions on them, to work creatively with them and to take evaluative attitudes towards them.

Class syllabus:
1. Differences in the thematizations of anthropological issues in myth, religion, ideology, philosophy, and science.
2. A typology of philosophical views on man according to relevant philosophical disciplines, philosophical trends, authors and traditions,
3. Programme theses, categorical and methodological apparatus of selected philosophical conceptions of man.
4. Mutual inspirations and intersections between philosophical and special-scientific conceptions of man. Philosophy as an advocate of the idea of the wholeness of man, his dignity and humanity.
5. Humanism, Transhumanism and Posthumanism.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde017/22	Philosophy of education

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
2 hours seminar/week, total 22 hours per semester, combined form (primarily full-time)
Student workload:
11x2 hours of teaching = 22 hours; 10 hours of preparation for the seminar – studying the required literature, 28 hours of work on the project and its presentation. Total 60 hours of work.
Teaching methods:
Seminar: lecture combined with discussion of the topic; examples are given of how educational practice has been a topic of reflection for philosophers and a subject of philosophical inquiry since antiquity. Critical reflection and awareness of the possibilities of applying this knowledge in the present day is essential. Also, a reflection on the importance of values guidance in the school environment through the figure of the teacher and the different subjects of instruction.
Emphasis on discussion, e-learning, critical reflection on relevant materials. (monographs, journals, databases of scientific knowledge, videos, etc.), collaboration. Presentation of the project output by a group of students (work on the project in a group of 2-3 students) in a study group, defending the project.

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
100% of the interim grade, which includes 30% classroom activity and 70% project and its defence.
For successful completion of the course, it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent – outstanding results),
B (93-86%, very good – above average standard),
C (85-76%, well – normal reliable work),
D (75-68%, satisfactory – acceptable results),
E (67-60%, sufficient – results meet minimum criteria),
Fx (59-0%, insufficient – extra work required).
For an A grade, the student correctly and actively reflects critically and creatively on both knowledge and frameworks for further development of the discipline, including their meaningful integration into pedagogical practice.

For a grade of B, the student reflects appropriately critically on both the knowledge and frameworks for further development of the discipline, including their meaningful integration into pedagogical practice.
For a grade of C, the students performed well during the semester, his theoretical knowledge of the philosophy of education is at a good level, but he lacks the ability to apply this knowledge, to critically evaluate its relevance for today‘s times.
A grade of D will be given to a student who has been underprepared during the semester, has slight deficiencies in theoretical knowledge regarding the intersections between philosophy and education, the student cannot critically analyze information.
For a grade of E, the student meets the minimum criteria, reflects critically on knowledge and current developments in the discipline only to a limited extent, knows the interdisciplinary connections between philosophy and education, and is at least minimally able to apply the knowledge.
The Fx assessment requires extra work and study.
Scale of assessment (preliminary/final): 100% of the interim grade, which includes 30% classroom activity and 70% project and its defence. For successful completion of the course, it is necessary to obtain at least 60% of the points.

Learning outcomes:
The aim of the course is to make graduates properly aware of the possibilities of using the thought bases, conceptual apparatus and scientific methodology coming from philosophy in educational theory and practice. The thematic focus of the course leads students to think critically and to look for intersections between philosophy and education, to realize how the thought bases, conceptual apparatus and scientific methodologies derived from philosophy have been and can be applied in educational theory and practice. Students will be able to critically consider the contribution of particular concepts and their applicability today. They will gain an understanding of how educational practice (from antiquity to the present) has been a topic of reflection for philosophers and a subject of inquiry for philosophy. They are further encouraged to reflect on educational issues such as the highly topical subject of values and education.
This knowledge can be used in further study, as well as in planning the thesis research methodology, and then in practice. The chosen educational methods will contribute to the further development of their competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).
The course contributes to the gradual development of subject and subject competence as well as to the development of important professional competences of future teachers.

Class syllabus:
1. How does philosophy enter into thinking about education? Finding the intersections between philosophy and education.
2. A primer for pedagogical concepts – from antiquity to the present.
3. Specific forms of influence of philosophical concepts on pedagogy – 20th century:
1. A hermeneutic approach to pedagogy (W. Dilthey, H.-G. Gadamer).
2. Phenomenological approach to pedagogy (J. Patočka, R. Palouš). Existentialist-influenced concepts (R. C. Rogers, V. E. Frankl).
3. Personalism (M. Scheler, M. Buber, E. Levinas, S. Freud, R. C. Rogers). Positivism, scientism in pedagogy (W. Brezinka).
4. Pragmatism in pedagogy (J. Dewey). Marxism and neo-Marxism (J. Habermas, P. Freire, H. Giroux).
4. Contemporary educational theories, their structural elements and theoretical underpinnings.
5. Philosophy of Education through reflection on the problems of education – Values and Education.

The themes focus on the intersection between philosophy and education, on the use of knowledge, thought bases, conceptual apparatus and scientific methodology coming from the field of philosophy in educational theory and practice.
The course develops several competences in line with the profile of the graduate of the psychology teaching field in combination.

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde014/22	Psychology of creativity

Educational activities:
Type of activities: practicals
Number of hours:
per week: **per level/semester:** 26s
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
22 hours (2 hours per week), combined form (mostly full-time)
Student workload: 22 hours of direct teaching; 12 hours preparing the implementation of methods of creativity development; 2 hours dedicated to14 hours of self-study on the subject. Total 50 hours of work.
Teaching methods: group discussion, guided discussion of the topic covered, heuristic method, actual solved problems and open questions, guided self-study, and work with the text.

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde005/22 - Developmental psychology

Recommended prerequisites:
B-PSYde005 Developmental Psychology

Course requirements:
100% of continuous assessment.
During the semester, students will carry out a seminar paper (analyze the main problems psychology of creativity by psychologists + present a lesson proposal developing students' originality and flexibility. max. 30 points), verbally evaluate the presented seminar work(max. 10 points) and pass the midterm test (max. 60 points). For successful completion a minimum of 60% of the points is required for passing the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
For a grade of A, students need to actively show interest and report continuously throughout the semester and are capable of independent study. Students are able to navigate in the literature study, understand the theoretical background, and know methods for developing creativity. Demonstrate an ability in the design of creativity development programmes in the classroom at an excellent level.

A grade of B indicates that students have performed above average throughout the semester, have been capable of independent study, have a basic understanding of the psychology of creativity, are able to navigate the literature study, and know methods for developing creativity. Demonstrate the ability to compile creativity development programmes in the classroom at a very good level.
A grade of C indicates that students performed at a standard level during the semester, their theoretical knowledge of the psychology of creativity is at an average level, but they lack the ability to apply this knowledge correctly, critically evaluate and compare the various literary sources and psychological knowledge, know methods for developing creativity at an average level.
A grade of D indicates that students were less prepared during the semester, have moderate deficiencies in theoretical knowledge related to the psychology of creativity. They have considerable difficulties in independent work, often unable to critically analyse information correctly.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge quite correctly, but have at least an adequate command of most of the theoretical knowledge in the course. A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
The aim of the Psychology of Creativity course - as an important theoretical and practical component of the structure of psychological disciplines in the field of psychology teacher education - is to familiarize students with the theoretical foundations of the psychology of creativity. After completing of the course, students will have mastered psychological creative techniques, will be familiar with some creativity training and they will learn how to develop creativity in groups and how to set up creativity programs for their study field.
Criteria and basic features of creativity. Creative activity, creative product, creative process, creative attitude. Skills and rational operations in the creative process. Systems of creative problem solving. Obstacles to the creative approach (in thinking, practical activity, etc.) and ways of overcoming them. Basic characteristics of the creative personality. Creative techniques and their application in practice. Development creativity, creative task. Training and development of individual components of creativity. Development of the creative thinking in group cooperation. Creativity development programmes in the classroom.
Scale of assessment (preliminary/final): 100% of continuous assessment.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde027/22	Psychology of individuals with hearing impairment

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
2 hours seminar/week; total 22 hours per semester, combined form (primarily full-time).
Student workload:
11 x 2 hours of direct teaching = 22 hours; preparation for seminar work and presentation
Preparation for the seminar work (8 hours); preparation for the mid-term test (25 hours), 55 hours in total.
Teaching methods:
interpretation and discussion of individual topics, guided discussion of the topic, heuristic method, discussion, analysis of research findings, problem solving, self-study and work with literature.

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde010/22 - General pathopsychology

Recommended prerequisites:
B-PSYde010 - General pathopsychology

Course requirements:
100% of the interim evaluation. Interim assessment includes a seminar paper (40% of the assessment) and two written interim tests (60% of the assessment).
For successful completion of the course, it is necessary to obtain at least 60% of the points grade.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).
A (excellent - excellent results, the student has mastered the knowledge of the subject at an excellent level, the student is able to relate the acquired knowledge to the profiling subjects of the study programme at an excellent level psychology teaching, in particular to understand the acquired knowledge in the context of the general psychological laws of the human psyche and developmental laws),

B (very good - above average standard, the student has mastered the knowledge of psychology of people with hearing impairment, at an above-average level, is able to link the acquired knowledge with profiling subjects, can interpret the knowledge in the context of psychological theories, theories of psychological development in particular),
C (good - routine reliable work, student has mastered the knowledge of the subject at an average level, at an average level, is able to link the acquired knowledge with the profiling subjects of the study programme, at a solid level, understands the specifics of the formation of psychological functions and personality in conditions of hearing impairment),
D (satisfactory - acceptable results, the student has mastered the knowledge of the subject at a satisfactory level, at a satisfactory level he/she can link the acquired knowledge with the profiling subjects of the study programme, understands the specifics of psychological functions and the specifics of personality formation in people with hearing impairment),
E (sufficient - the results meet the minimum criteria, the student understands only at a sufficient level the issues of the formation of psychological functions and personality in the conditions of hearing impairment),
Fx (insufficiently, the student has not gained enough insight into the psychology of people with hearing impairment, he/she is not able to link the knowledge with the knowledge gained from the study of general, developmental and social psychology).
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is to understand the specifics of the development of psychological functions in individuals with hearing impairment, to differentiate the impact of prelingual and post-lingual hearing loss, to increase sensitivity to the problems people with hearing impairment.
Upon successful completion of the course, the student will understand the impact of hearing impairment on the formation of psychological functions, personality of the individual with hearing impairment, understand different perspectives on deafness: the clinical and cultural-anthropological model of deafness, the role of psychology in care and post-lingual hearing impairment, can relate the acquired knowledge to knowledge of general psychology, developmental and social psychology, can apply the acquired knowledge of the psychology of individuals with hearing impairment to the education and training of pupils/students with hearing impairment, can apply knowledge in the teaching of pupils/students with hearing impairment educated in integrated/inclusive educational settings, can critically identify and evaluate attitudes and misconceptions towards people with hearing impairment, expands awareness of cultural and linguistic values of deaf people, participates in educational and social problems of individuals with hearing impairment, can critically evaluate solutions based on and arguing from the knowledge of psychology.

Class syllabus:
1. The subject of the psychology of the hearing impaired.
2. Clinical and cultural-anthropological interpretation of deafness- impact on the psychology of people with hearing impairment.
3. Organization of psychological functions in prelingually deaf people - comparison with hearing people, organization of mental functions and cochlear implantation.
4. Compensatory mechanisms and compensatory potential of individuals with hearing impairment.
5. Development of cognitive functions in prelingually deaf people.
6. Language, speech and deafness. Communication modus and relationship to cognitive development.
7. Deaf people as a cultural and linguistic community.
8. Personality of individuals with hearing impairment. Prelingual deafness and personality formation.

9. Participation of people with hearing impairment, quality of life of individuals with prelingual deafness, and post-lingual hearing impairment.
10. Psychological characteristics of the hearing impaired learner and inclusive education.
11. Cochlear implantation. Impacts on the psychosocial and cognitive development of the individual.

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde024/22	Psychology of individuals with intellectual disability

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
2 hours seminar/week, total 22 hours per semester, combined form (primarily full-time)
Student workload:
11 x 2 hours of teaching = 22 hours; continuous preparation for class (7 hours), preparation of the seminar paper in the form of a PowerPoint (10 hours), and preparation for the midterm exam (15 hours). Total 54 hours.
Teaching methods:
Interpretation, interview, guided discussion, problem-solving, heuristic method, guided self-study, work with professional text and information sources.

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde010/22 - General pathopsychology

Recommended prerequisites:
B-PSYde010 – General pathopsychology

Course requirements:
100% of intermediate assessment
The interim evaluation includes the following interim tasks:
- creating and presenting a seminar paper in PowerPoint on a given topic related to the development of a selected cognitive process or personality in a person with intellectual disabilities, taking into account the specifics of intellectual disabilities (40% of the assessment),
- a mid-term paper (60% of the mark).
To pass the course, a minimum score of 60% is required.
Ratings are given on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
A - the student continuously produces excellent results during the semester, is capable of independent study and critical comparison of professional texts focused on the psychology of

people with intellectual disabilities, knows the basics of the psychology of people with intellectual disabilities as a scientific discipline, and is able to meaningfully integrate this knowledge with the knowledge of other psychological disciplines, is able to apply the theoretical knowledge on the basis of his/her knowledge to the elaboration of the assigned tasks,
B - the student achieved above-average results during the semester, is capable of independent study and adequate critical comparison of professional texts focused on the psychology of people with intellectual disabilities, knows the basics of the psychology of people with intellectual disabilities as a scientific discipline and is able to integrate this knowledge with the knowledge of other psychological disciplines in a meaningful way, is able to practically apply theoretical knowledge on the basis of his/her knowledge to the development of the assigned tasks,
C - the student has the ability to study independently, the critical comparison of professional texts focused on the psychology of people with intellectual disabilities is average, the knowledge of the scientific discipline is at a good level, and the ability to practically apply theoretical knowledge to the development of the assigned tasks is average, during the semester he/she performed standard good performance,
D - the student's ability of independent study and critical comparison of professional texts on the psychology of people with intellectual disabilities is at a weaker level, he/she has moderate deficiencies in the theoretical knowledge of the subject, the ability to practically apply theoretical knowledge to the development of the assigned tasks is a problem for the student,
E - the student fails in more than one of the assignments, lacks the ability to independently study and critically compare professional texts focused on the psychology of people with intellectual disabilities, has major deficiencies in theoretical knowledge, and fails in the practical application of theoretical knowledge to the development of the assigned tasks,
FX - the student has not sufficiently fulfilled the course requirements and extra work is required.
Scale of assessment (preliminary/final): 100% of intermediate assessment

Learning outcomes:
The aim is to understand the basic terminology of the psychology of mental/intellectual disability (MD/ID), the specific features of cognitive processes, and the personality of people with intellectual disabilities.
Upon completion of the course, the student:
- knows the basic terminology of the psychology of mental disability
- knows the specific features of cognitive processes of people with MD
- understands the impact of the cognitive processes of people with MD on different types of learning about their specificities
- understands the specific features of personality formation of people with MD
- understands the problems of integration and inclusion of people with MD, especially about the educational environment
- can design activities to develop the cognitive processes and personality of people with MD about their specific needs and personalities
- acquires and consolidates his/her skills in the field of communication competencies about communication with a person with MD
- critically analyses information from the literature, compares it, and can think in context

Class syllabus:
1. The subject of the psychology of people with mental disabilities. Research methods in the psychology of people with mental disabilities.
2. Definition of the term mental disability. Classification of mental disability. Causes of mental disability.

3. Psychological diagnosis in people with mental disabilities. Problems of diagnosis in people with mental disabilities.
4. Psychological development about mental disability.
5. Specific features of cognitive processes in people with mental disabilities - perception, and imagination.
6. Specificities of cognitive processes in people with mental disabilities - thinking and speech, attention. Communication with people with mental disabilities.
7. Specific features of memory and learning in people with mental disabilities. Opportunities to improve performance in learning.
8. The personality of people with mental disabilities. Factors influencing self-evaluation in people with mental disabilities. Motivation, interests, emotional experience, volitional action, creativity, and moral development in people with mental disabilities.
9. Legal awareness of people with mental disabilities. Vocational orientation and career choice of people with mental disabilities.
10. Specifics of the socialization process of people with mental disabilities. Integration and inclusion of people with mental disabilities and their possible problems in the school environment.
11. The family with a child with mental disabilities.

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde028/22	Psychology of individuals with physical disability and chronic illness

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
2 hours seminar/week; 22 hours total per semester, combined (mostly attendance)
Student workload:
11 x 2 hours of direct teaching = 22 hours; preparation of seminar paper and presentation (18 hours), preparation for the mid-term test (20 hours). 60 hours in total.
Teaching methods:
active group work, heuristic method, case study, video analysis, work with professional text and information sources.

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde010/22 - General pathopsychology

Recommended prerequisites:
B-PSYde010 General pathopsychology

Course requirements:
100% of the interim evaluation
Interim assessment (100%) includes the creation and presentation of a seminar paper in PowerPoint (40% of the assessment) and a midterm exam (60%).
For successful completion of the course, it is necessary to obtain a minimum of 60% of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
A - the student correctly and actively reflects critically and creatively on both the knowledge and frameworks for further development of the discipline, including their meaningful integration with the knowledge of other disciplines and the critical and creative application of the methods of the psychology of people with physical disabilities and chronic illness.

B - The student reflects appropriately critically on both the findings and frameworks for further development of the discipline, including their meaningful integration with the findings of other disciplines.
C - the student reflects more or less critically on the knowledge and current development of the discipline, is aware of interdisciplinary contexts, and is able to apply knowledge from the psychology of people with physical disabilities and chronic illness in a fundamentally sound manner.
D - the student reflects critically on knowledge and current developments in the discipline to a limited extent, knows interdisciplinary contexts, is able to apply knowledge from the psychology of people with physical disabilities and chronic illness.
E - the student reflects critically only to a limited extent the knowledge and current development of the discipline, knows the interdisciplinary context, is at least minimally able to apply knowledge from the psychology of people with physical disabilities and chronic illness.
Fx - 59-0%, insufficient - additional work, additional study required.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim of successful completion of the course is that the student is able to orient himself/herself in the specifics of the psychological processes and personality of people with physical disabilities and chronic diseases. Students will gain an understanding of the basic terminology of the psychology of people with physical disabilities and chronic illness.
Upon completion of the course, students must:
acquire/grasp
- the theoretical foundations of the psychology of people with physical disabilities and chronic illness,
- the basic terminology of the psychology of people with disabilities and chronic illness,
- the personality characteristics of people with physical disabilities and chronic illness,
understand:
- the specificity of the formation of psyche in the conditions of physical disability,
- the specific features of the behaviour of people with physical disabilities and chronic illness,
- the specific features of psychological processes in people with physical disabilities and chronic illness,
be able to:
- work critically with knowledge in the field of psychology of people with physical disabilities and chronic illness,
- apply knowledge in the care of individuals with physical disabilities,
- critically analyse and compare information in the literature.

Class syllabus:
1. Introduction to the study of the psychology of people with physical disabilities and chronic illness: subject, tasks, methods.
2. Basic concepts in the psychology of people with physical disabilities and chronic illness and related fields.
3. Normality - abnormality in relation to the psychology of people with physical disabilities and chronic illness.
4. Specific features of the development of individuals with physical disabilities and chronic illness.
5. Peculiarities of psychological processes in people with physical disabilities and chronic illness.
6. Pathopsychological research of psychological processes in people with physical disabilities and chronic illness.
7. Personality of individuals with physical disabilities and chronic illness.

8. Social-psychological aspects of physical disability. Attitudes of society towards people with physical disabilities or chronic illness.
9. Family issues of individuals with physical disabilities and chronic illness.
10. Psychological problems of socialization and integration/inclusion of people with physical disabilities in society.

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde025/22	Psychology of individuals with visual impairment

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
2 hours seminar; total 22 hours per semester, combined method (mostly by attendance)
Student workload:
11 x 2 hours of direct teaching = 22 hours, 13 hours preparation of a seminar paper in the form of a Power Point based on the assigned topic, 20 hours exam preparation. Total 55 hours of work.
Teaching methods:
lecture, instruction, discussion on a selected topic, structured role-play, case studies, brainstorming.

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde010/22 - General pathopsychology

Recommended prerequisites:
B-PSYde010 – General pathopsychology

Course requirements:
100% of the interim evaluation
The interim assessment consists of a seminar paper and a written knowledge test. For successful completion of the course, it is necessary to obtain at least 60 % of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
For an A grade, the student must have excellent theoretical knowledge, be able to evaluate and critically analyse it, and use the knowledge flexibly in practically set tasks.
For a grade B, the student must have very good theoretical knowledge, be able to evaluate and critically analyse it, have moderate weaknesses in the use of knowledge in practically set tasks.
For a grade C, the student must have good theoretical knowledge, moderate deficiencies in evaluating and critically analysing it, moderate deficiencies in using the knowledge in practically set tasks.

For a grade D, the student must have basic theoretical knowledge, moderate deficiencies in their evaluation and critical analysis, moderate deficiencies in the use of knowledge in practically set tasks).
For an E grade, the student must have basic theoretical knowledge, moderate deficiencies in their evaluation and critical analysis, major deficiencies in the use of knowledge in practically set tasks.
FX - the student has not sufficiently met the requirements for the course and extra work is required.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is to understand the patterns of cognitive, emotional and social development of individuals with visual impairment.
Graduate:
- applies pedagogical and psychological interventions in accordance with knowledge of the cognitive and psychosocial development of individuals with visual impairments,
- differentiates the appropriate form of educational environment for a specific person with visual impairment,
- has acquired basic interpersonal and communication competences for persons with visual impairment,
- can understand, name and analyse the development of an individual with a visual impairment on the basis of anamnestic data,
- knows and is able to use appropriate psychological methods for research purposes and psychodiagnostics of persons with visual impairment,
- can critically evaluate research and studies in the field,
- applies his/her empathy as a tool for pedagogical and psychological support,
- acts in the pedagogical and psychological process without positive and negative prejudices.

Class syllabus:
1. Definition of basic terms - typology of visual impairment.
2. Attitudes and prejudices.
3. Cognitive processes (cognitive development, moral development, imagination, memory, emotional experience, attention, motivation.
4. Family background and its impact on the individual with visual impairment.
5. Diagnostic and research methods.
6. Communication and its specifics in persons with visual impairment.
7. Assisting persons with visual impairment.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde012/22	Regional history of Slovakia

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week; 22 hours total per semester, combined; (primarily full-time)
Student workload:
2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 20 hours of continuous seminar work on the topics covered; 10 hours of class preparation and field learning; 10 hours of discussion; 15 hours of final presentation and defense of a thesis (project) on a free topic in regional history. A total of 77 hours of student work.
Educational methods: E-U-R (evocation-awareness-reflection); analysis of historical sources; walk; group work; role-play method; structured staging; project method; discussion/colloquium on the subject; SWOT analysis

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100 % of the intermediate verbal and scored marks. During the semester, the student analyses and reflects verbally, in writing and in pictures the content of the course's thematic focus. The student applies the E-U-R method, discussion, and group work in solving the tasks assigned on an ongoing basis (also in the field during field trips). The output of the final seminar work is presented to a team and is verbally evaluated. The overall assessment is concluded with a discussion/colloquium, a summary of the scores obtained and the application of SWOT analysis. At least 91 points are required for a final grade of A, at least 81 points for a grade of B, at least 73 points for a grade of C, at least 66 points for a grade of D, and at least 60 points for a grade of E. Credit will not be awarded to students who obtain less than 15 points in any of the four written examinations. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-91%, excellent - excellent results, the student demonstrates the required results in the application of transferable knowledge in the field of the discipline and related sciences, can apply them in theoretical and practical contexts and in the contexts of local, national, and Central European history. He/she is oriented in the current state of knowledge of borderline scientific disciplines, thinks conceptually, can decipher historical sources, actively obtain information and creatively apply it in solving problem tasks, actively expands his/her knowledge and critically evaluates it and considers the suitability of its application for pedagogical and historical practice),

B (90-81%, very good - above average standard, the student is oriented in the issue, knows it, can independently acquire new knowledge, and solve professional tasks, but his critical, constructive thinking is borderline when analysing and assessing the planes of normative and reflective didactics),
C (80-73%, good - normal reliable work, although the student can orient himself in the problem, independently search and analyse information, can learn, but he cannot think critically and constructively enough, evaluate the solved problems, and apply the acquired knowledge creatively and conceptually in broader theoretical and practical contexts),
D (72-66%, satisfactory - acceptable results, the student is able to orientate himself in the problem at a basic level, his knowledge is fragmented and incomplete, and at a lower level of satisfaction, he also applies transferable knowledge of the field and related disciplines, in the area of factual, conceptual, procedural and metacognitive knowledge he shows more serious deficiencies),
E (65-60%, sufficient - the results meet the minimum criteria, the student is able to orient himself in the problem only with great difficulty, he knows only the most basic knowledge, he does not demonstrate the ability to think critically and does not apply the acquired knowledge in a systematic way to the solution of practical tasks),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the problem, does not master the most basic knowledge, and does not demonstrate the ability to argue and think critically).

Learning outcomes:
The graduate of the course can work with any material of regional "microhistory", understands the necessity of linking local and national history in the study of history, as well as interdisciplinary connections, and can reflect on the importance of regional research - whether historical, ethnographic, sociological, which provides contextual links to the teaching of history. Demonstrates basic skills in processing regional source material and knows the methodology of creating didactic, educational aids for popularising regional history. In addition to applying the cognitive function of history, he/she can also use the educational and deleterious function.

Class syllabus:
The student will become familiar with selected problems of teaching regional history, identify the requirements placed on the education of teachers and pupils in the field of cultural and natural heritage, acquiring knowledge about the application of methods and strategies recommended for learning the "timeless" values of (not only) local history. He/she will experience implementing teamwork in the so-called "revival" of history.
The course content focuses on the following core themes:
- History outdoors - deciphering history in the field in Spatio-temporal coordinates.
- "Reviving" history textbooks in the city of Bratislava. Three walks with a map and a timeline in hand. The importance of object didactics in educational practice.
- Model situations (frameworks) of historical and procedural cognition. Model examples of processing selected topics of regional history.
- Cognition of historical regions of Slovakia, specifics of their development and perspectives.
- Historical and symbolic paths through the regions of Slovakia, regional history in the context of national and Central European history.
- Active perception of interdisciplinary connections in transferable topics of regional history.
- Places of memory; what do the preserved monuments commemorate?
- The place of regional history in the preparation of future history teachers.
- Creation of projects popularising artefacts of regional (local) history.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde034/22	Rhetoric and communication

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 3

Recommended semester: 3., 5.

Educational level: I.

Prerequisites: PdF.KPg/B-VUZde005/22 - Communication in education

Course requirements:
Prerequisites: B-VUZde005 / Communication in education
Prerequisites for successful completion of the course: the course is completed with an evaluation, 100% of the continuous evaluation.
Assessment: consists of 2 intermediate assessments (60+40, total 100 points).
Interim assessment 1: consists of the development of a semester cooperative work and its oral presentation or practical application in class. This is a prepared micro-team output: the creation of a student conference.
Semester work: consists of a creative assignment for 60p (30+30). It includes the preparation of a group simulation of a student conference (30b) together with a professional paper on a selected topic (30b) for approximately 45 minutes.
Intermediate assessment 2: consists of the creation of documents for the student conference (40b): poster, invitation, programme, etc. in an electronic environment (web development).
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above

average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Learning outcomes:

Learning objectives and outcomes:
By completing the Rhetoric and Communication course, the student should:
- be able to select information, identify relevant sources on the selected topic,
- be able to justify the choice of specialist sources for the semester thesis,
- understand the importance of selection and analysis of information and information sources,
- be able to work in a team, organise activities to accomplish sub-tasks,
- be able to present intermediate tasks to the group,
- be able to justify and discuss in a group various social topics related to education and training,
- acquire presentation and communication skills and be able to apply them through creative activities in the classroom,
- Know methods for Developing of critical thinking and good reasoning,
- should be able to identify manipulative behaviour.

Transferable competences: the student strengthens soft skills such as communication skills, analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and their application in discussion, interpersonal skills within the group - activation and taking initiative and responsibility, also creative work with e-portfolio (ability to create an interesting website) through creative tasks in the course.

Class syllabus:

Brief outline of the course:
The aim of the course is the practical application of knowledge about effective communication through practicing rhetorical outcomes and teamwork, i.e. through cooperative methods and interactive activities. Using various activating methods and problem-based tasks, students will actively participate in the learning process and create their own course content, in which they will use their own potential and develop the intra and interpersonal aspects of their own personality. An important part of this is a semester-long group project through which students will learn how to organize major events, while developing proper communication and rhetorical skills.
Topics:
Rhetoric - types of speech, practicing presentation skills through micro performances. Content/ form/communication skills (verbal and non-verbal) of oral presentation and analysis of speakers. Presentation - structure and organization of speech/speech/lecture. Evaluating information and

finding relevant sources. Simulating a debate. Organisation of time and group cooperation. Visualisation and generating interest in the listener. Argumentation - types of arguments and logical fallacies. Manipulation and manipulation techniques, assertiveness. Types of conversation, discussion - how to conduct a conversation, structuring a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection. Creating a website and e-portfolio with student outputs. Implementation of student conference - simulation/workshop.

Form of the course: on-site learning

Number of credits: 3

Recommended semester: 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
100% of continuous assessment
Assessment: consists of an interim and a final assessment (30+40, 70 points in total).
Interim assessment: consists of a 30-item knowledge test to be given in week 6 of the interim course. A written examination/test, consisting of theoretical preparation for the teaching of the individual topics of the teaching units, which will be carried out by the 6th week of continuous teaching and the study of the literature.
The final assessment consists of: the semester project and its oral presentation.
The semester project consists of: the creation of a project according to a set structure for 40b. It includes idea/problem creation, project planning, project implementation, evaluation and self-reflection of the project = its oral presentation by students (creators of the semester project) in the 11th week of continuous teaching.
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),

E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 64 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 57 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above

average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 51 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 46 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 42 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
- to know the content of school management as a scientific discipline: the essence of school management in the Slovak Republic at all levels of school management with an emphasis on internal school management and in the context of managerial functions
- be familiar with the basic legal documents and be able to correctly interpret the meanings given in these legal documents that regulate the activities of primary and secondary schools, with an emphasis on the needs of the work of the teaching staff,
- be able to apply the acquired knowledge and knowledge from other disciplines in the focus area: school image, culture and climate, in the area of cooperation with the school management and legal representatives of children/pupils in solving standard, specific and problematic tasks and situations and in the framework of school development,
- be able to creatively use the acquired knowledge and competences in the study of other pedagogical disciplines and in their future school practice.
Transferable competences: the student strengthens soft skills such as communication skills, organizational skills, interpersonal skills within a group - group activation, taking initiative and responsibility, creativity and imagination, critical thinking, analytical skills, problem-solving skills, and others through the creation of a semester project in the course.

Class syllabus:
Basic terminology, options for studying school management, sources of study. Schools and concepts of management. Specifics of school management. The system of school management in the Slovak Republic and the system of internal school management in the context of managerial functions. Legal regulations governing the activities of primary and secondary schools (laws, decrees, working regulations, pedagogical-organisational guidelines). Personality of the head of teaching staff - legal and personality requirements. School image, school culture. School climate.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde014/22	Seminar on General History I.

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Two hours seminar/week, 22 hours total per semester, combined; (primarily full-time); 2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 19 hours of preparation for the midterm evaluation + 19 hours of preparation for the seminar paper; 60 hours of student work in total; discussion of the topic; problem-solving exercises; e-learning; small group work, didactic games.

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
100 % of continuous assessment. The student will hand in the seminar paper in the examination period, from which he/she can obtain 70% of the total grade. During the semester, he/she also presents a selected topic (30% of the total grade), on which he/she is continuously working, in front of his/her classmates and the lecturer. He/she will provoke a discussion and prepare a didactic game. A final grade of A requires a score of at least 91%, a grade of B requires a score of at least 81%, a grade of C requires a score of at least 73%, a grade of D requires a score of at least 66%, and a grade of E requires a score of at least 60%. A minimum of 60% of the marks must be obtained to pass the course.
The grade is awarded on a scale:
A (100-91%, excellent - outstanding results, the student is familiar with the subject matter, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can orient himself/herself in the problem only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically)

Learning outcomes:
In the course, the student will thoroughly master the methods of working with contemporary historical sources from the history of antiquity in the years 2000 BC - 476 AD. and their possible use in the pedagogical process at primary or secondary school. The student will be able to deal professionally with written historical sources of different natures (epics, scribes, contemporary historiographical writings, etc.) and will deepen his/her knowledge by analysing contemporary historical sources. They will be able to evaluate the meaning of sources, interpret them and compare them with other sources. In addition, they will learn to think critically, argue more independently and discuss issues.

Class syllabus:
Kurz sa zameriava na prehĺbenie poznania a dôkladnejšie poznanie pramennej bázy starovekých dejín. Študent/-ka sa oboznámi s vývojom v období staroveku prostredníctvom analýzy historických prameňov. Študent/-ka ako budúci pedagóg/-ička tak získa schopnosť sprostredkovať nadobudnuté vedomosti žiakom. Kurz sa sústredí sa na tieto ťažiskové témy:
- epos o Gilgamešovi
- Chammurapiho zákonník
- Chetitský zákonník
- Starogrécke báje
- Gortýnske zákony
- Ilias a Odysea
- Herodotove dejiny
- Zákony XII tabúľ
- Zápisky o vojne v Galii
- a i.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde017/22	Seminar on General History II.

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar /week, total per semester
22 hours, combined form; (primarily full-time).
Student workload: 2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 3 hours of preparation for a paper; 20 hours preparation of a seminar paper; 15 hours preparation of individual assignments for each hour. Total 60 hours of student work.
Learning methods: problem-solving; analysis of medieval sources;
discussion of the subject; e-learning, heuristic method, work with text; guided discussion.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100 % of the continuous assessment. In each seminar, students are assigned different assignments. Medieval sources will be read and interpreted. For example, the Chronicle of the Franks, Gregory of Tours, and Einhard's Vita Caroli Magni (Biography of Charlemagne). In addition to various sub-assignments, the most important output will be the students' term papers. At the beginning of the semester, each student will choose the topic of his/her seminar paper. From the fifth two-hour period, students will gradually present the topics of their seminar papers in the form of papers. The papers will be verbally evaluated not only by the teacher but also by other students in discussion. Then the student will complete the seminar paper, which must be a minimum of 15 pages. It must include notes and a list of references used and sources. A minimum of 91 points is required for a final grade of A. a minimum of 81 points for a B grade, a minimum of 73 points for a C grade, and a minimum of 73 points for a grade D, at least 66 points and for grade E at least 60 points. No credits will be awarded to students who obtain less than 15 points in any of the four written examinations. For passing the course, a minimum score of 60% is required. The grade is awarded on a scale:
A (100-91%, excellent - excellent results, the student is knowledgeable and proficient in the subject matter and demonstrates a creative approach and the ability to think critically. The student is able to acquire information actively and creatively apply it in solving problem tasks, actively expands his/her knowledge and critically reviews it and considers the appropriateness of its application for pedagogical and history practice. He/she has prepared the seminar work at an excellent level),
B (90-81%, very good - above average standard. The student is oriented in the issue, knows it, and can independently solve professional tasks. His/her seminar paper is written at a very good level).

C (80-73%, good - normal reliable work, the student is safe in reproducing the acquired knowledge, however, he/she applies and synthesises the acquired knowledge only with difficulty. His/her term paper is written at a reasonable level).
D (72-66%, satisfactory - acceptable results, the student can orientate himself in the problem only at a basic level, his knowledge is fragmental, he does not demonstrate the ability to think critically, and he cannot apply the acquired knowledge in practice.
E (65-60%, satisfactory - the results meet the minimum criteria, the student can orient himself/herself to the problem only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice. His/her seminar work meets only the minimum criteria.
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically. His/her seminar work is not at the required level).

Learning outcomes:
The student will be able to work with medieval written sources such as chronicles, annals, documents, charters, etc. The student can analyse them. In the seminar, these sources will not only be read but also interpreted. The information from the sources will also be confronted with the data in the professional literature and discussed. Students will also be introduced to working with editions of sources and with medievalist specialist literature.

Class syllabus:
Familiarisation with the focus of the seminar. Students will be asked to think about the topics of their seminar papers. At each subsequent seminar, two students will inform the topics of their seminar papers.
- Working with medieval chronicles. Gregory of Tours: Historia Francorum.
- Readings from the Chronicle of Gregory of Tours - Book 2 - from the accession of Chlodovicus I.
- Interpretation of the information obtained from the Chronicle of Gregory of Tours.
- Einhard: Vita Caroli Magni. Interpretation of the biography of Charlemagne.
- Work with medievalist literature.
- Working with editions of sources.
- Marco Polo's travelogue The Million. Interpretation.
- Medieval documents.
- Electronic medievalist information resources.
- Colloquium term papers.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde021/22	Seminar on General History III.

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar /week, a total of 22 hours per semester, combined form; (primarily full-time)
Student workload: 2S (2 credits): 11x 2 hours of direct teaching # 22 hours; 20 hours preparation for mid-term evaluation; 18 hours preparation for seminar paper presentation. Total 60 hours of student work.
Learning methods: lecture, discussion of the topic covered; situation analysis method; problem-solving tasks; e-learning.

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100% of the intermediate assessment. The seminar work will be presented during the lecture period at the colloquium in the form of a paper and then handed in writing. The professional quality of the seminar paper will be evaluated, and the student may receive 70 points, representing 70% of the total grade. 30 points may be awarded for presenting the topic and generating discussion. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. To pass the course, you must obtain a minimum of 60% of the marks.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is familiar with the issues, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),

Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically).

Learning outcomes:
The seminar aims to learn the methods of working with historical sources from the general history of the early modern period (16th to 18th centuries). Based on the acquired knowledge, students will be able to deal professionally with contemporary sources of different natures and deepen their understanding through their analysis. They will become familiar with and be able to navigate the complex history of the early modern period. They will be able to evaluate the significance of individual historical events, interpret and compare them, and confront them with specialised literature. Particular emphasis is placed on the acquisition of critical thinking and professional argumentation. Adequate attention will be paid to the mutual discussion of selected issues and their contribution to contemporary knowledge.

Class syllabus:
- Work with modern historical sources and the methodology of their research.
- Editions of modern historical documents.
- Humanism and Renaissance in the light of sources.
- Sources to the discovery of America, the origins of colonisation and the defense of the rights of the natives.
- Analysis of sources on the history of the Reformation in the German lands. Martin Luther.
- Sources on the Reformation in other countries. Calvinists and Anglicans.
- The Thirty Years' War (1618–1648) in the light of historical sources.
- Characteristics of absolutism in the light of historical sources.
- Analysis of sources on the history of France in the early modern period.
- Sources on the history of Russia in the early modern period and their interpretation.
- Sources on the American Revolution (1765–1783).
- Colloquium of seminar papers 1.
- Colloquium of seminar papers 2.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KH/B-HISde023/22	**Course title:** Seminar on General History IV.
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** 2 **per level/semester:** 26 **Form of the course:** on-site learning	
Type, volume, methods and workload of the student - additional information 2 hours lecture/week, 22 hours total per semester, combined form; (primarily in person) Student workload: 2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 3 hours preparation for the paper; 10 hours preparing a review; 15 hours preparing individual assignments for each class; 50 hours of student work in total. Educational methods: problem-solving exercises; discussion of the subject; e-learning; heuristic method, work with text, didactic games (make-up games, quizzes, blind maps), application of theoretical knowledge to practical examples	
Number of credits: 2	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Course requirements: 100 % of the interim evaluation. At the end of the semester, the student will submit a review of the selected scientific publication. The student will prepare and present a paper on the chosen topic during the semester. The student will prepare individual working materials for each class. The student's active participation in each class is required to complete the course successfully. The rating is awarded on a scale: A (excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically), B (very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline), C (good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the knowledge gained to practice), D (satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice), E (sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice), Fx (insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically).	

Learning outcomes:
The student acquires the necessary knowledge and understanding of political, economic and social developments of the European and non-European world between 1789 and 1914. The student should be able to navigate the fundamental issues of general modern history after successfully completing it. The course is intended to introduce students to general history from the late 18th century, from the Great French Revolution of 1789-1799, to the beginning of World War I. War, to provide a plastic picture of the transformation of the society during the long 19th century. Student Gain in-depth knowledge and understanding of the modern period in world history. Student Gain the communication skills necessary to present his/her work results. The history of The 19th century is given special emphasis in the study of history because it is in this period that the social phenomena and processes have directly influenced the development of society up to the present times. The student will learn to work with sources on the general history between 1789 and 1914, learn how to analyse and interpret historical sources and reconstruct based on these historical events.

Class syllabus:
The course focuses on working with sources on the history of the Long 19th century. The course will concentrate on the following focal topics:
The Enlightenment
The Industrial Revolution
The Great French Revolution
The Napoleonic period in France and Europe, the Congress of Vienna
The European system 1815-1848 and its defence
Revolutionary events in Europe in the 1820s, 1830s and 1848-1849
The emergence of nation-states (Italy and Germany)
Great Britain and France in the 19th century
Currents of thought and political trends in the 19th century
The USA in the 19th century, the Civil War
Russian Empire to World War I
Eastern Question to World War I
Fundamental trends in the development of European colonialism in the 19th century
Europe on the road to the First World War

Recommended literature:
Source editions (correspondence) and contemporary press will be assigned in individual classes.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde026/22	Seminar on General History V.

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week, total per semester 22 hours, attendance method
2S (2 credits): 11x 2 hours of direct teaching = 22 hours; 38 hours of preparing for continuous assessment and seminar work. A total of 60 hours of student work.
moderated discussion on the subject; ongoing individual and team solutions to partial seminar topics, ongoing outputs in the form of presentations and simulation procedures for solving model situations

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
100% of the interim assessment. The seminar paper will be delivered during the examination period. At least 91 points are required to obtain a final grade of A, at least 81 points to obtain a B grade, at least 73 points for a C grade, at least 66 points for a D grade, and at least 60 points for an E grade. To successfully complete the subject, it is necessary to obtain at least 60% of the point evaluation. The rating is awarded on a scale:
A (100-91%, excellent – excellent, outstanding results, the student fully orients himself in the issues of individual topics while argumentatively and confidently synthesising his knowledge and conclusions from model situations so that their application can be considered generally usable and demonstrable),
B (90-81%, very good - above average standard, the student demonstrates that he is fully oriented in the issues of all partial topics, his solution of model situations shows certain non-negligible limits),
C (80-73%, good – normal reliable work, the student moves safely in the area of reproducing the information obtained, but only with difficulties applies and synthesises the acquired knowledge when solving model situations),
D (72-66%, satisfactory - acceptable results, the student is oriented only on the fundamental causal issue of the influence of ideological doctrines on individual spheres of the political, economic and social life of modern societies, does not demonstrate the ability to apply the acquired knowledge convincingly enough),
E (65-60%, sufficient - the results meet the minimum criteria, the student navigates the issue of the influence of ideological doctrines on the daily life of modern societies only with great difficulty and rigidly, so he cannot present separate clear conclusions for practice),

Fx (59-0%, insufficient – additional work is required, the student does not know how to navigate the issue, does not master the most basic knowledge, and does not demonstrate the ability to think critically

Learning outcomes:
The course aims to develop and deepen the information about the important trends of modern history obtained at the lectures by learning the contradictory optics used by (contemporary and from the relevant time) mutually competing ideologies when evaluating these trends. The graduate can recognise their essential criteria in their evaluation of the past and present. By analysing their respective signs (manifestations), he can independently characterise and evaluate them. In this way, he is prepared for a possible future confrontation between his and the student's attitudes, i.e., for his pedagogical work in the diverse student body of contemporary Slovak society by developing communication skills.

Class syllabus:
Moderated discussion analyses of ideologies and political doctrines that arose and developed during the so-called modern history; analysis of the modifications of these doctrines on specific historical material and with the help of essential theoretical works on the relevant problem:
- „culture - science - ideology": defining ideological currents of the 19th and 20th centuries, their mutual connection, continuity and modifications
- "fraternity - equality - liberty": contradictory principles of the French (and American) revolution
- liberalism in the 19th and liberalism in the 20th century - similarities and changes
- radical social ideologies in the 19th century and their prominent representatives
- social ideologies in the 20th century and the reality of their implementation
- conservatism in the 19th and conservatism in the 20th century
- great churches in modern history: the secularisation of life in the 19th and 20th Centuries and the role of science
- totalitarian ideologies in the 20th Century and their influence

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde016/22	Seminar on History of Slovakia I.

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar /week, a total of 22 hours per semester, combined form; (primarily full-time)
Student workload: 2S (2 credits): 11x 2 hours of direct teaching # 22 hours; 20 hours preparation for mid-term evaluation; 18 hours preparation for seminar paper presentation. Total 60 hours of student work.
Learning methods: lecture, discussion of the topic covered; situation analysis method; problem-solving tasks; e-learning

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% of the intermediate assessment. The seminar work will be presented during the lecture period at the colloquium in the form of a paper and then handed in writing. The professional quality of the seminar paper will be evaluated, and the student may receive 70 points, representing 70% of the total grade. 30 points may be awarded for presenting the topic and generating discussion. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. To pass the course, you must obtain a minimum of 60% of the marks.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is familiar with the issues, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the subject, has learned the subject, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can navigate the issue only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),

Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, and does not demonstrate the ability to think critically).

Learning outcomes:
The seminar aims to learn the methods of working with historical sources on the history of Slovakia in the Middle Ages (until 1526). Based on the acquired knowledge, students will be able to professionally handle contemporary sources of various natures (documents, legends, chronicles, annals, etc.) and deepen their understanding through their analysis. They will become familiar with and be able to navigate the complex history of the Middle Ages. They will be able to evaluate the significance of individual historical events, interpret and compare them, and confront them with specialised literature. Particular emphasis is placed on the acquisition of critical thinking and professional argumentation. Adequate attention will be paid to the mutual discussion of the problems of Slovakia in the medieval period.

Class syllabus:
- Chronology of the development of the Middle Ages in Slovakia.
- The question of the origin of the Slavs and their occurrence on our territory.
- The Empire of Samo. The Principality of Nitra.
- Great Moravia. Personalities of Great Moravia. The Byzantine mission.
- The question of the demise of Great Moravia and the establishment of the Kingdom of Hungary.
- Hungary (especially today's Slovakia) during the reign of the Árpad dynasty.
- Hungary (especially today's Slovakia) during the reign of the Anjou dynasty.
- Louis I, the ideal of a knight king.
- Sigismund of Luxembourg and Matthias Corvinus on the Hungarian throne.
- The Jagiellonian dynasty and the Battle of Mohács.
- Medieval culture in Hungary (especially in today's Slovakia).
- Colloquium of seminar papers 1.
- Colloquium of seminar papers 2.

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week, 22 hours total per semester, combined form; (primarily in person)
Student workload:
11x 2 hours of direct instruction = 22 hours; 8 hours preparation of a report; 20 hours preparation of a seminar paper. Total 50 hours of student work.
Educational methods: discussion of the topic; small group work; problem-solving by students, e-learning

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100% of the intermediate assessment. Seminar paper on a selected topic - processed according to the assignment, which is handed in before the beginning of the examination period. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D and a minimum of 60 points for a grade of E. Credit will not be awarded to students who obtain less than 15 points in any of the four written examinations. To pass the course, a minimum score of 60% is required.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results, the student is oriented in the issue, has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the subject matter, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the issue, has learned, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his/her knowledge is fragmented, he/she does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can orient himself/herself in the problem only with great difficulty, knows only the most basic knowledge, does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the issues, does not master the most basic knowledge, does not demonstrate the ability to think critically)

Learning outcomes:

Within the course, the student will thoroughly master the methods of working with historical sources from the history of Slovakia in the years 1526 - 1780 and their possible use in the pedagogical process at primary or secondary school. The student will deepen his/her knowledge by analysing contemporary historical sources. The student will be able to evaluate the significance of the sources, interpret them and compare them with other sources. At the same time, the student will broaden his/her perception of history by adding the dimension of everyday life. In addition, they will learn to think critically, argue more independently and debate issues.

Class syllabus:

The course focuses on deepening knowledge and a more thorough understanding of the source base of the history of Slovakia from the 16th to the 18th century, as well as the history of everyday life. The student will get acquainted with the history of Slovakia in the modern period through the analysis of historical sources, but also with daily life in that period in the processing of specific topics and their presentations. As a future teacher, the student will thus be able to convey the acquired knowledge to pupils. The course will concentrate on the following main topics:

- principles of working with historical sources of Slovak provenance in the modern period
- analysis of sources on the Battle of Mohács in 1526
- working with sources relating to the first rulers of the Habsburg dynasty
- sources on the history of Ottoman expansion
- sources on the history of Bratislava as a coronation city
- sources on the Estates' uprisings in Hungary and Slovakia
- sources on the history of the development of education
- the Janosik tradition in sources
- Maria Theresa and her son Joseph II in historical sources
- Slovak defence writings in the 18th century (J. B. Magin, S. Timon and others)
- hygiene and health care
- catering
- woman (family and society)
- children (family and school)
- social stratification
- religious question and confessionalism
- transport
- literature and theatre

Course ID:	**Course title:**
PdF.KH/B-HISde025/22	Seminar on History of Slovakia IV.

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week, total per semester
22 hours, combined; (primarily full-time)
Student workload: 2S (2 credits): 11x 2 hours of direct instruction = 22 hours; 28 hours seminar paper preparation, 10 hours presentation preparation; Total 60 hours of student work. Learning methods: discussion of the topic; problem-solving exercises, e-learning; small group work

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
100% of the intermediate assessment. Seminar work will be handed in during the examination period. It is based on relevant literature (at least ten sources) and possibly archival sources. It contains a didactic-historical dimension. The final grade of A is a minimum of 91 points, a minimum of 81 points for a B grade and a minimum of 81 points for a grade C at least 73 points, grade D at least 66 points and grade E at least 60 points. Credit will not be awarded to a student who fails any of the four written in any of the four written examinations. To pass the course, obtaining a minimum of 60% of the grade is necessary.
The grade is awarded on a scale:
A (100-91%, excellent - excellent results, the student is familiar with the subject matter, he/she has mastered it, demonstrates a creative approach and the ability to think critically),
B (90-81%, very good - above average standard, the student is knowledgeable about the subject mastery, but critical thinking is borderline),
C (80-73%, good - normal reliable work, the student does know his/her way around the issue, learns, but cannot apply the knowledge gained to practice),
D (72-66%, satisfactory - acceptable results, the student can orient himself/herself to the problem only at a basic level, his knowledge is fragmental, he does not demonstrate the ability to think critically and cannot apply the acquired knowledge to practice),
E (65-60%, sufficient - the results meet the minimum criteria, the student can orient only with great difficulty, knows only the most basic knowledge, does not demonstrate
ability to think critically and cannot apply the acquired knowledge to practice),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the problem, does not know the most basic knowledge, does not demonstrate the ability to think critically)

Learning outcomes:
During the course, the student will thoroughly master the methods of working with contemporary historical sources from the history of Slovakia in the years 1918 - 1989 and their possible use in the pedagogical process in primary or secondary school. The student will be able to professionally handle historical sources of different natures (written, audio, video) and deepen his knowledge through analysing contemporary historical sources. The student will be able to evaluate the significance of sources, interpret them and compare them with other sources. In addition, they will learn to think, argue and discuss issues more independently.

Class syllabus:
The course aims to deepen knowledge thoroughly and to a more profound understanding of the source base of the history of Slovakia in the 20th century. The student will become familiar with the history of Slovakia in the 20th century through analysing historical sources. As a future educator, the student will thus be able to convey the acquired knowledge to the pupils. The course will focus on the following key topics:
- Sources on the founding of the Czechoslovak Republic
- Interwar cultural life in the light of historical documents
- Sources on the personalities of the First Czechoslovak Republic
- Analysis of sources on autonomism and centralism
- The establishment of the Slovak state in the light of sources
- Society in the Slovak state (sources on education, culture and social history)
- Personalities of the Slovak State
- Sources on persecutions (political opponents, Jews, Gypsies)
- Sources on the Second Resistance, searching for connections between foreign and domestic resistance
- The transitional years 1945-1948, in the light of historical sources
- Analysis of sources on the persecutions (political trials, forced collectivisation)
- Socialist society and propaganda
- Sources on 1968
- Analysis of sources on normalisation
- Sources on the Third Resistance
- The events of November 1989, in the light of the sources

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KH/B-HISde024/22	Seminar on the Basics of Modern Didactics of History Teaching

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week; 22 hours total per semester, combined; (primarily full-time)
Student workload:
2S (2 credits): 11 x 2 hours of direct instruction = 22 hours; 40 hours of seminar paper production;15 hours of discussion, argumentation, and constructive evaluation of students' interim outcomes. Total 77 hours of student work.
Educational methods: instruction; E-U-R (evocation-awareness-reflection); analysis of texts, iconic texts and educational materials; brainstorming; creation of educational aids, e.g. mind maps, construction projects; discussion of the presented seminar work; SWOT analysis

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
100 % of the intermediate verbal and scored marks. During the semester, the student analyses and reflects on thematic assignments, solve problems, and regularly presents and verifies the outputs in discussions at individual seminar sessions. The quality of the outcomes is assessed collectively and by applying SWOT analysis. The student's ability to use the E-U-R method, skill, and ability to evaluate, create and apply theoretical, practical, emotional and metacognitive levels of knowledge are included in the interim and overall assessment. The conclusion of the continuous assessment is done transparently by discussing and summarising the scores obtained. A minimum of 91 points is required for a final grade of A, a minimum of 81 points for a grade of B, a minimum of 73 points for a grade of C, a minimum of 66 points for a grade of D, and a minimum of 60 points for a grade of E. Credit will not be awarded to students who obtain less than 15 points in any of the four written examinations. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-91%, excellent - excellent results, the student has a broad, compact knowledge in the specialised field of the discipline and can apply it in theoretical and practical contexts, is oriented in the current state of knowledge of borderline scientific disciplines, thinks conceptually, can actively acquire information and creatively apply it in solving problem tasks, actively expands his/her knowledge and critically reviews it and considers the suitability of its application for pedagogical and historical practice),

B (90-81%, very good - above average standard, the student is oriented in the issue, knows it, can independently acquire new knowledge, and solve professional tasks, but his critical, constructive thinking is borderline when analysing and assessing the planes of normative and reflective didactics),
C (80-73%, good - normal reliable work, although the student can orient himself in the problem, independently search and analyse information, can learn, but he cannot think critically and constructively enough, evaluate the issues solved, and apply the acquired knowledge creatively and conceptually in broader theoretical and practical contexts),
D (72-66%, satisfactory - acceptable results, the student is able to orientate himself in the problem at a basic level, his knowledge is fragmented and incomplete, and at a lower level of satisfaction, he also applies transferable knowledge of the field and related disciplines, he shows more severe deficiencies in the area of factual, conceptual, procedural and metacognitive knowledge),
E (65-60%, sufficient - the results meet the minimum criteria, the student is able to orient himself in the problem only with great difficulty, he knows only the most basic knowledge, he does not demonstrate the ability to think critically and does not apply the acquired knowledge in a systematic way to the solution of practical tasks),
Fx (59-0%, insufficient - extra work is required, the student is unable to navigate the problem, does not master the most basic knowledge, does not demonstrate the ability to argue and think critically)

Learning outcomes:
By completing the course, the student will gain an overview of the European dimension of the modernisation of history teaching in Slovakia and the functionality of the current didactic system of history, and he/she will be able to analyse the partial problems of modern didactics and the results of empirical research in contemporary school practice. He is also oriented in the creation of teaching media and the process of critical assessment and design of educational materials and programmes.

Class syllabus:
Students will become familiar with selected problems of modern didactics of history, identify the requirements for teacher education and gain knowledge about the application of methods and strategies recommended for teaching and learning of pupils in primary and secondary schools. Through the creative activity, they will gain experience and insight into the process of modernising history teaching in educational practice.
The content focus of the course concentrates on the following focal themes and activities:
- Presentation of the understanding and application of key concepts of history didactics: "modern" history didactics, methodology, historical consciousness, historical culture, historical knowledge, historical education, historical awareness, historical memory, functional literacy, functional factuality.
- Provide examples of the 'tense' relationship between historical scholarship and history and forms/ methods of popularising historical knowledge (e.g., the 'public history' method).
- Designing (conceptualising) history as a school subject, visions and perspectives, requirements and recommendations of RE and expert commissions for teaching history in the 21st century, updating the selection of history curriculum in the educational field: Human and society - critical analysis and evaluation of educational programmes and recommendations, making own proposals on the topic.
- Guided discussion (or panel discussion) on the functioning didactic system of history education.
- Creation of examples on applying the 3 essential functions of history.
- Apply the "operationalisation" of goals and objectives within an arbitrary selection of history curriculum. What is the theory, and what is the practice?
- Analyse the results of selected empirical research on the state of school history practice.

- Discussion and briefing on the topic: why pay attention to the function of "neurodidactics" in the educational process? What types of tasks and techniques to select in this context for pupils in the teaching and learning process?
- Recognising the practical applicability of the structural elements of the textbook within the classroom.
- Brainstorming the usefulness and application of resources for the implementation of history in a more entertaining way (didactic games, comics, cartoons, collages, graphic diagrams, etc.).

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde030/22	Social pathology

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
2 hours seminar/week; total of 22 hours per semester, combined form (mostly face-to-face education)
Student workload: 11 x 2 hours of live teaching = 22 hours; 16 hours preparation of seminar paper and ppt presentation; 22 hours preparation for mid-term assessment. Total 60 hours of student work.
Teaching methods:
lecture, group discussion, conversation, guided discussion of the topic, guided self-study and work with the text.

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
Students are required to complete a mid-term paper and present the paper to their classmates (40 points) and pass a mid-term test (60 points) for a total of 100 points. The prerequisite for successful completion of the course is obtaining a minimum of 60% of the maximum possible course grade.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, marginal performance - results fulfil the minimum criteria),
Fx (59-0%, inadequate - additional work required)
For a grade of A, the student is required to demonstrate excellent accuracy and active critical and creative reflection on the knowledge of the field of social pathology, including its meaningful integration with the knowledge of their field of study as well as other disciplines. Demonstrate the ability to have a good understanding of the principles, guidelines, and methods of therapeutic-educational support. Also, in identifying client needs and resources as well as means of assistance.
A grade of B indicates that the student reflects critically on the knowledge of the field of social pathology, including its meaningful integration with the knowledge of their field of study as well as other disciplines, in a reasonably good manner. Demonstrates the ability to be very knowledgeable about the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as means of assistance.

A grade of C will be awarded if the student is able to critically reflect well on the knowledge of the field of social pathology, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student has demonstrated the ability to be well versed in the principles, guidelines, and methods of therapeutic educational assistance, identification of client needs and resources as well as means of assistance.
A grade of D indicates that the student has limited, moderately critical reflection on the knowledge of the field of social pathology, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student demonstrates the ability to satisfactorily navigate the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as the means of assistance.
A grade of E will be given if the student reflects critically on the knowledge of the field of social pathology to a limited extent. The student has difficulty understanding and navigating the principles, guidelines, and methods of therapeutic-educational assistance, identification of client needs and resources, and means of assistance.
The Fx evaluation requires further study and work by the student.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The aim is to be able to orientate oneself in the issue of social pathological phenomena, to know their causes, and their consequences on the individual and to be able to implement preventive measures to eliminate them.
After successful completion of the course, students will gain an overview of basic theoretical knowledge about selected negative social phenomena, their prevalence in the population, causes, consequences, prevention, correction and also the links between them. They will be able to analyse socio-pathological phenomena, acquire competence for professional intervention in the field and be able to implement preventive measures to eliminate socio-pathological phenomena in society. Furthermore, students will develop analytical and active thinking when working with an assigned professional text, they will be able to compare and evaluate information.

Class syllabus:
1. Social pathology - definition of basic terms.
2. Pathology of the family
3. CAN syndrome
4. Crime and delinquency
5. Drugs and drug addiction
6. Non-substance addictions- pathological gambling, internet, computer and the others
7. Eating disorders
8. Bullying, cyberbullying, cybergrooming
9. Prostitution
10. Self-harm - suicidality
11. Victims and perpetrators of violence - human trafficking, domestic violence, stalking, workplace violence, etc.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde007/22	Social psychology

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
1 hour lecture + 1 hour seminar per week; a total of 22 hours per semester in combined form (primarily full-time).
Student workload:
11 x 2 hours of direct teaching = 22 hours; 15 hours of preparation for the midterm test; 25 hours of preparation for the midterm assessment (group work + reflective diary), 10 hours of preparation for the tasks carried out in the seminars, 28 hours of preparation for the final test and oral examination. Total 100 hours of work.
Teaching methods: lecture with multimedia support, dialogical and discussion methods, psychological games, demonstration, critical analysis of psychological theory, methods of working with text (work with information sources) analysis of case studies, reflective diary.

Number of credits: 4

Recommended semester: 2.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde001/22 - General psychology

Recommended prerequisites:
B-PSYde001 General psychology

Course requirements:
50% of continuous assessment + 50% of final assessment
The interim assessment includes a midterm test (30% of the grade), group work (elaboration and presentation of assigned social psychological research in a study group, 15% of the grade) and its reflection (5%). The final assessment includes a final test (30% of the mark) and an oral examination (20% of the mark). The oral examination is conducted in smaller groups and takes the form of an analysis of case studies or questions focusing on the field of social psychology. Credit will not be awarded to a student who scores less than 50% on any of the assignments. A minimum score of 60% is required to pass the course.
Grades are awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),

Fx (59-0%, inadequate - additional work required).
At grade A, the student knows and reflects on both the knowledge and key frameworks of social psychology, including their integration with knowledge from other related disciplines, is well versed in current developments in the discipline, and applies the knowledge gained meaningfully, critically, and creatively in evaluating and influencing group events from the perspective of the individual and the group, as well as specifically in relation to the future target group (the school classroom).
At grade B, the student knows and reflects on the knowledge and frameworks of social psychology, including their integration with the knowledge of other related disciplines, is very well oriented in the current development of the discipline, almost always meaningfully and creatively applies the acquired knowledge in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (the school class).
A grade of C is awarded if the student predominantly knows and reflects on both the knowledge and key frameworks of social psychology, understands the interdisciplinary contexts, and can apply them correctly in most cases in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (school class).
A grade of D will be awarded if the student knows both the knowledge and key frameworks of social psychology at an average level, understands the interdisciplinary contexts, and applies the acquired knowledge with greater guidance in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (school classroom).
In assessment E, the student has a relatively limited but sufficient knowledge and understanding of social psychology, at least partially understands the interdisciplinary context, can apply the knowledge at least at a minimal level in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (school class).
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of continuous assessment + 50% of final assessment

Learning outcomes:
The aim of the course is to enable students to gain a basic overview of theories and knowledge in social psychology (which is part of the core disciplines of psychology) and to acquire the ability to work critically with knowledge from this field. It is also an important foundation for further study and success in the teaching profession.
Upon completion of the course, the student will be able to:
- define and explain basic social-psychological mechanisms and phenomena as well as basic social-psychological experiments and their aspects,
- identify social-psychological mechanisms and phenomena in their everyday life and in their functioning in different social groups as well as in the school classroom from the perspective of educational practice,
- critically assess the impact of the cultural and social environment on the individual (or group),
- recommend practices leading to changes in areas such as social perceptions, attitudes, modes of communication or group phenomena,
- give practical examples of these phenomena in the school environment, but also in the family environment or in related disciplines (health, management, marketing, etc.).

Class syllabus:
1. Introduction to the study of social psychology: the subject, methods, and history of social psychology.
2. Socio-cultural determination of the psyche: man, society and culture.

3. Socialization of the individual: definition and nature of socialization, means and methods of socialization, theories of socialization.
4. Social cognition: perception of others, interpersonal attraction, determinants influencing impression formation, attribution theories.
5. Social communication: definition, communication process, nonverbal communication (gestures, facial expressions, spatial location, movements, touching, paralinguistics), verbal communication, lying or manipulating reality as part of communication.
6. Attitudes: definition, functions and structure of attitudes, formation and change of attitudes, measurement of attitudes.
7. Social groups: classification and characteristics of social groups, group influence, group structure and development, group dynamics, group performance, the school classroom as a social group.
8. Social interaction: social facilitation and idleness, conformity, obedience, group processes (group polarization, communication, thinking), competence, cooperation, leadership.
9. Social behaviour: social norm, prosocial behaviour, aggressive behaviour, mob behaviour, conflict.
10. Practical application of social psychology: application of social psychology, social psychological personality problems of male and female teachers, social psychological training, social psychology, and mental health.

PdF.KPsPp/B-PSYde003/22	Social-psychological training I.

Educational activities:
Type of activities: practicals
Number of hours:
per week: **per level/semester:** 26s
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
Scope, type/method of teaching and organizational form:
Practical training, 22 hours per semester, combined form (primarily full-time)
Student workload:
22 hours of direct teaching; 12 hours of preparation before the training; 2 hours devoted to reflection on the events of the training after its completion; 14 hours of self-study on the subject. 50 hours of work in total.
Teaching methods:
The methodological framework consists of active social and experiential learning (dialogical and discussion methods, didactic, psychological, and cooperative games, self-discovery techniques, staging methods, reflective essay).

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
100% pass mark
The continuous assessment includes the evaluation of the completion of ongoing tasks and assignments, which are carried out in individual or group form in the pre-, during and post-training phases. Before the training, the interim assessment consists of three assignments (reflective essay on the expectations associated with the self-awareness training = 10%; work with tests and questionnaires = 10%; self-awareness development exercise = 10%), which are further worked on during the training. In the course of the training, activities and exercises are carried out to enable, in particular, the development of the intrapersonal (20%), interpersonal (20%) and social-inclusive competences (20%) of the students (dating activities, role-plays, cooperative games, trust games, etc.). After the training, the continuous evaluation consists of structured feedback on the events in the training group (10%).
To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),

D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For an A grade, the student is very actively involved in the activities and shows interest and effort to develop his/her competences, seeks original and creative solutions to the tasks set, reflects on the emerging changes that the training brings, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.
B grade means that the student is very well actively involved in the individual activities and shows interest and effort to develop his/her competences, to a lesser extent looks for original and creative solutions to the tasks set, reflects the emerging changes that the training brings, but needs more time and space for their verbalization, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.
A C grade is awarded if the student is generally actively involved in the activities, shows interest and effort to develop his/her competences, but only in some topics and areas, makes little use of his/her personality in finding original and creative solutions to the tasks set, reflects the emerging changes brought by the training only to a certain extent, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.
Grade D means that the student is involved in individual activities to a limited but at the same time still acceptable extent and shows only sporadic interest and effort to develop his/her competences, often only with external help looking for original and creative solutions to the tasks set, he/she cannot adequately reflect the emerging changes that the training brings, he/she is more passive and more like a marginal member of the training group although actively expressing his/her own opinion.
The grade E is given to a student who behaves passively and is minimally involved in individual activities, does not show interest and effort to develop his/her competences, relies on the group to find original and creative solutions to the set tasks, cannot adequately reflect the emerging changes that the training brings, cannot find his/her place in the training group, expresses his/her own opinion sporadically and not always in an appropriate way.
The Fx grade is given exceptionally, most often due to non-participation in the training and failure to complete the set intermediate tasks, non-cooperation, refusal to take a position on the required topics and to express his/her own opinion.
Scale of assessment (preliminary/final): 100% pass mark

Learning outcomes:
The aim of the course Social-psychological training I. is to motivate and practically develop self-knowledge and self-reflection of psychology teacher of education of students. It is based on the model of social-psychological competencies (essential for success in the teaching profession in general), in which competencies are developed in three dimensions - knowledge and awareness (the expertise that an individual possesses in a given area and the meaning that he/she attaches to this knowledge), attitudes and beliefs (influencing responses in specific educational situations), and skill (specific ways of behaving).
Upon completion of the course, the student:
- recognizes the importance of self-knowledge and personal development in teaching practice,
- is able to evaluate his/her strengths and weaknesses (level of his/her competences), their impact on the practice of the future profession and motivate himself/herself for further growth,
- can identify his/her priorities and name the areas/persons/things that he/she perceives as personally important,
- is aware of key moments in his/her life so far and name expectations in relation to the future profession,
- gains experience of active social and experiential learning through experiential activities,

- can apply specific techniques and activities in group work.

Class syllabus:
1. Basic characteristics and introduction of social-psychological training as a method of personality development.
2. Definition of the concept of self-knowledge (process, methods, impacts and problems).
3. Intrapersonal competences of an individual (self-knowledge, self-assessment, self-reflection, self-
acceptance).
4. Interpersonal competences of the individual (social perception, active listening, verbal and non-verbal communication skills, conflict resolution).
5. Socially inclusive competences of the individual (sensitivity to otherness, empathy, acceptance, adaptation).
6. The place of self-knowledge and reflection in teaching.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde012/22	Statistical methods and techniques

Educational activities:
Type of activities: practicals
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
2 hours of classes per week; a total of 22 hours per semester, combined form (primarily on-site).
Student workload:
11 x 2 hours of direct teaching = 22 hours; 16 hours of preparation for the midterm test; 12 hours of individual work on statistical assignments. Total 50 hours of work.
Teaching methods:
lecture with multimedia support, dialogical and discussion methods, demonstration of analysis of a scientific text with a focus on statistical methods, simulation of the process of producing a statistical output, and instruction on basic statistical procedures and tests.

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYde006/22 - Methodology of psychological research

Recommended prerequisites:
B-PSYde006 Methodology of Psychological Research

Course requirements:
100% of the interim assessment
The interim assessment includes a knowledge test (60% of the assessment) and a seminar paper (40% of the assessment). To pass the course, a minimum score of 60% is required. The seminar work consists of the submission of four seminar assignments (4 x10 points) consisting of the application of the acquired knowledge to a data set (description, inference, correlation, substantive significance). The test consists of a theoretical part focusing on basic statistical concepts and an application part working with a basic dataset.
The assessment is given on a scale:
A (100-94%, excellent - excellent results),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required
Grade A: the student has an excellent understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a high degree

when working independently with a statistical program and also to perform basic operations of descriptive statistics on a basic data set as well as simple operations of inferential statistics and correlation without errors.
Grade B: the student has an adequate understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a sufficient extent in independent work with a statistical program and also to perform basic operations of descriptive statistics and correlation on a basic data set without errors.
A grade of C is awarded if the student has a predominant understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a sufficient extent in independent work with a statistical program and also to perform basic operations of descriptive statistics and correlation on a basic data set without serious errors.
A grade of D is earned if the student has an average understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a sufficient extent in independent work with a statistical program and also to perform basic operations of descriptive statistics without serious errors. The student understands theoretically the principles of correlation and inferential statistics without being able to calculate them correctly in a statistical program.
Grade E: the student has only a limited understanding of the terminology and principles of data collection and evaluation in psychology. The student can apply the knowledge in independent work with a statistical program only to a small extent and only at the level of descriptive statistics.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of the interim assessment

Learning outcomes:
The main aim of the training is that during the exercises the students will practically master the basic methods of analysis and interpretation of quantitative data in the field of psychological research. They will also use them in the study of other disciplines, possibly in research for their bachelor thesis. The students will master the skill of working with a selected statistical data processing program. The students will learn how to store collected data, carry out their description, and name key outcomes relevant also for pedagogical practice using empirical procedures of analysis and comparison with respect to the defined research problem. The students will understand the benefits of applying statistical procedures in pedagogical practice and gain the ability to interpret and critically evaluate relevant data.

Class syllabus:
1. Research problem, operationalization, research/theoretical hypotheses, research designs.
2. Introduction to SPSS, data description (mean, median, variability, etc.).
3. Correlation versus causality, introduction to working with and sorting data.
4. Tests of normality and data distribution, basic data visualization.
5. Inferential tests, null hypothesis, between-subjects, and within-subjects designs.
6. Substantial significance, Bonferroni correction.
7. Validity and reliability of tests.
8. Moderator, mediator, correlation, regression.

Recommended literature:
Compulsory readings:
Guráň, P., Fero, P., & Ritomský, A. (2018). Základy spracovania sociologických dát pomocou SPSS.
Recommended readings:
Field, A. (2013). Discovering statistics using IBM SPSS statistics. Sage.
Goss-Sampson, M. A. (2019). Statistical Analysis in JASP: A Guide for Students.

Harris, P. (2008). Designing and reporting experiments in psychology. McGraw-Hill Education.
Somorčík, J., & Teplička, I. (2015). Štatistika zrozumiteľne. ENIGMA Publishing.
Terek, M. (2017). Interpretácia štatistiky a dát. 5.vyd. Equilibria.

Languages necessary to complete the course:
Slovak and English language

Notes:
It is necessary to have the latest version of IBM-SPSS installed, or a similar free software alternative such as JASP or Jamovi.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde009/22	Teaching practice (A)

Educational activities:
Type of activities: practice
Number of hours:
per week: **per level/semester:** 1t
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 2., 4.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The student completes an introductory practice seminar with the practice methodologist and a hospitality in a primary or secondary school according to the subject/subject specialization of the practice in the range of 10 - 20 hours. The student will keep a practice portfolio of the hours of hospitalisation, which he/she will submit to the practice methodologist for evaluation in print or electronic form (as agreed with the practice methodologist). The final assessment takes the form of a colloquium. To pass the course, a minimum score of 60% is required.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).
A - excellent results: the student is able to apply procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. The student is able to work effectively with professional sources. The student can critically, factually assess and evaluate the presented solutions of others, can evaluate the quality of his/her own work.
B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. Above-average orientation in the problems of general didactics, above-average communication skills, completion of assigned tasks. Critical evaluation is at borderline level.

C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.
D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.
E - the results meet the minimum criteria: the student can define and define basic didactic concepts and elements, but cannot define them in educational contexts. Critical assessment and evaluation are absent. Sufficient level of practical skills and professional knowledge.
FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes:
Learning objectives and outcomes and transferable competences:
The goal of the Teaching Practicum (A) is to initiate the professional vision of male and female student teachers, particularly in terms of descriptive and identification. After completing the course, the student knows and can navigate in school documentation, can process the record of the educational unit hospitalization, can describe educational phenomena (elements of communication in the learning group, individual differences of pupils, phenomena of the dynamics of the learning group), can identify the individual educational goals, methods, forms, principles and content elements of education. The aim of the course is also to observe and analyse the manifestations of the teacher's personality and the classroom environment. The student will be able to distinguish and evaluate the application of positive and negative evaluation in teaching, be able to identify non-standard educational situations and evaluate the effectiveness of their solution.

Class syllabus:
Brief outline of the course:
Hospitalization activity:
Preparatory phase of the hospitalization - pre-praxis meeting: defining the objectives, methods and focus of the hospitalization.
The implementation phase of hospitalization - own observation of the educational process and processing of the hospitalization portfolio with emphasis on aspects of Communication in education, elements of communication, individual differences of pupils, phenomena of the dynamics of the learning group, educational goals, methods, forms, principles and content elements of education, manifestations of the teacher's personality and the classroom environment, positive and negative evaluations in teaching, non-standard educational situations.
The final phase of the hospitalization - post-hospitalization colloquium: analysis of the practice portfolio, reflection and interpretation of the observed educational phenomena. Familiarisation with the school documentation: state and school curriculum, electronic class book, online student book, Edupage information system. Educational standards, individual education plans, etc.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde010/22	Teaching practice (B)

Educational activities:
Type of activities: practice
Number of hours:
per week: **per level/semester:** 1t
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The student will attend a pre-practise seminar with the practice methodologist, and will complete at least 10 hours of hospitalization at a primary or secondary school according to the subject/content specialization. The student will keep a personal portfolio of teaching practice from the hours of hospitalization. The personal portfolio is an indicator of the student's personal commitment and responsibility. The portfolio may be in print or electronic format. The portfolio is submitted by the student to the Practice Methodologist for evaluation, and at the end of the portfolio the student will attend a colloquium to evaluate and reflect on the teaching practice.
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
A - excellent results: the student is able to apply procedures in the processes of formulating objectives according to different taxonomies of objectives. The student can analyze and classify methods and forms and other didactic categories in practice. The student is able to work effectively with professional sources. The student can critically, factually assess and evaluate the presented solutions of others, can evaluate the quality of his/her own work.
B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. Above-average orientation in the problems of general didactics, above-average communication skills, completion of assigned tasks. Critical evaluation is at borderline level.

C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.
D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.

FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
The goal of Teaching Practice B is to initiate students' professional vision at the level of descriptive and identification. After completing the pedagogical practice B, the student knows and can work with pedagogical documentation, can process the record of the teaching unit hospitalization. Identifies the main objectives, methods, forms and phases of the teaching process. Can describe the elements of communication and classroom dynamics.

Class syllabus:
Brief outline of the course:
The aim of teaching practice B is to enable students to observe the teaching process from the perspective of a future teacher. During the practicum, students observe the teaching process of the practicing teachers and, on the basis of theoretical knowledge of general didactics, analyse the teaching process in its entirety and, in the final reflection, formulate a characterisation of the observed teaching, the working atmosphere, evaluate the pedagogical competence of the practicing teachers, point out the positives and negatives, propose their own solutions and describe suggestions for change, and give their own reflections on the profession of teaching, where they are in relation to the observed teaching process.
Preparatory phase for the practice: pre-practicum seminar, definition of requirements for the implementation of the practice, preparation and study of hospitality sheets, study of didactic literature, pre-hospitalization interview with the trainee teacher.
The implementation phase of the practice: self-observation of the teaching process, processing of hospitality sheets with emphasis on aspects of objectives, methods, Communication in education, teacher and pupils' activities, identification of teaching phases, cognitive functions, pupils' activity and activation, and a comprehensive record of the teaching process.
Evaluation phase of practice: interpretation of observed educational phenomena, analysis of the hospital portfolio, reflection on the pedagogical practice B.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde010/22	Teaching practice (B)

Educational activities:
Type of activities: practice
Number of hours:
per week: **per level/semester:** 1t
Form of the course: on-site learning

Number of credits: 2

Recommended semester: 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The student will attend a pre-practise seminar with the practice methodologist, and will complete at least 10 hours of hospitalization at a primary or secondary school according to the subject/content specialization. The student will keep a personal portfolio of teaching practice from the hours of hospitalization. The personal portfolio is an indicator of the student's personal commitment and responsibility. The portfolio may be in print or electronic format. The portfolio is submitted by the student to the Practice Methodologist for evaluation, and at the end of the portfolio the student will attend a colloquium to evaluate and reflect on the teaching practice.
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
A - excellent results: the student is able to apply procedures in the processes of formulating objectives according to different taxonomies of objectives. The student can analyze and classify methods and forms and other didactic categories in practice. The student is able to work effectively with professional sources. The student can critically, factually assess and evaluate the presented solutions of others, can evaluate the quality of his/her own work.
B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. Above-average orientation in the problems of general didactics, above-average communication skills, completion of assigned tasks. Critical evaluation is at borderline level.

C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.
D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.
E - the results meet the minimum criteria: the student can define and define basic didactic concepts and elements, but cannot define them in educational contexts. Critical assessment and evaluation are absent. Sufficient level of practical skills and professional knowledge.
FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
The goal of Teaching Practice B is to initiate students' professional vision at the level of descriptive and identification. After completing the pedagogical practice B, the student knows and can work with pedagogical documentation, can process the record of the teaching unit hospitalization. Identifies the main objectives, methods, forms and phases of the teaching process. Can describe the elements of communication and classroom dynamics.

Class syllabus:
Brief outline of the course:
The aim of teaching practice B is to enable students to observe the teaching process from the perspective of a future teacher. During the practicum, students observe the teaching process of the practicing teachers and, on the basis of theoretical knowledge of general didactics, analyse the teaching process in its entirety and, in the final reflection, formulate a characterisation of the observed teaching, the working atmosphere, evaluate the pedagogical competence of the practicing teachers, point out the positives and negatives, propose their own solutions and describe suggestions for change, and give their own reflections on the profession of teaching, where they are in relation to the observed teaching process.
Preparatory phase for the practice: pre-practicum seminar, definition of requirements for the implementation of the practice, preparation and study of hospitality sheets, study of didactic literature, pre-hospitalization interview with the trainee teacher.
The implementation phase of the practice: self-observation of the teaching process, processing of hospitality sheets with emphasis on aspects of objectives, methods, Communication in education, teacher and pupils' activities, identification of teaching phases, cognitive functions, pupils' activity and activation, and a comprehensive record of the teaching process.
Evaluation phase of practice: interpretation of observed educational phenomena, analysis of the hospital portfolio, reflection on the pedagogical practice B.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZde001/22	Theoretical basics of education

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Number of credits: 4

Recommended semester: 1., 3.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by examination, 50% of the interim and 50% of the final assessment
The interim evaluation includes the following:
- continuous work during the semester focused on current issues of education, defining educational goals, concretizing educational principles, identifying educational methods, etc. - 15 points,
- term paper focused on a selected area of education - 35 points.
The final evaluation includes the following:
- final examination in written form - 50 points.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good

professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to prepare continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation in the subject matter, basic communication skills, completion of the assigned tasks.
Scale of assessment (preliminary/final): 50/50

Learning outcomes:

Learning outcomes:
Learning objectives and outcomes:
Students will gain knowledge and understanding of the educational and self-educational process in a social context with emphasis on the application of the principles of creative-humanistic education and the presentation of new approaches and perspectives in the development of modern educational theory. On a theoretical-empirical level, students are able to implement a variety of educational activities and activities that can be applied within the profession of teacher/educator/teaching assistant and have the competence to solve basic problem situations in educational practice in collaboration with other professionals.
Transferable competences: the course develops students' analytical, critical, evaluative and creative thinking, reasoning in context and supports the development of their interpersonal skills, self-development and personal and professional growth.

Class syllabus:

Brief outline of the course:
An introduction to the discipline of educational theory. Theoretical foundations and determinants of education. Creative-humanistic education.
Views on education. Education in different historical periods.
School documents and legislation with a focus on education. Educational programme.
Goals of education and their determination.
The concept of education and self-education, functions, conditions and factors of education. The process of education/self-education and its phases.
Educational methods and new trends.
Characteristics and classification of educational principles.
Concretization of the content of educational action: moral education, pro-social education, intellectual education, aesthetic education, work education, physical education, ecological and environmental education, multicultural education, etc.
Organizational forms and means of education.
The personality of the teacher/educator/teaching assistant in the educational process. Educational styles and requirements for the personality of the teacher/educator/teaching assistant. Code of ethics of the teaching profession.
The personality of the child in the educational process. Categorization of factors of personality formation, bio-psycho-social determination of personality development and education.
Educational environment and its importance for a person.

Family and family education. Educational styles in the family. Negative tendencies in family upbringing.
Educational conditions of the school environment. Negative phenomena in the school environment and their prevention.
Education outside the classroom and its specifics.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde023/22	Therapeutic Pedagogy for the Helping Professions

Educational activities:
Type of activities: seminar
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
2 hours seminar/week; total 22 hours per semester, combined form (primarily full-time)
Student workload: 11 x 2 hours of teaching = 22 hours; 14 hours of preparation for the midterm test; 20 hours of case study and design of a therapeutic-pedagogical intervention (set of exercises, programme); 4 hours of preparation of the presentation of the case study and the programme. Total 60 hours.
Teaching methods:
Seminar: lecture in connection with the discussion on the topic, e-learning, critical reflection of relevant videos in the field of application of therapeutic-pedagogical therapies in practice, critical reflection of current basic and applied research in the field of therapeutic-pedagogical intervention in the Slovak Republic and in the world (monographs, journals, databases of scientific knowledge, case studies, etc.), work in small groups (pairs/threes, etc.), work in small groups (pairs/threes, etc.) on the assignment of solving a specific problem or application of knowledge from therapeutic pedagogy in practice (e.g. methods applicable in therapeutic-educational intervention with an individual or a family, simulated examples of practice/case studies); cooperative or group evaluation and sharing of knowledge; presentation of the output (case studies and therapeutic-pedagogical proposal of intervention) in a study group.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
The continuous assessment includes a mid-term test (30% of the grade), the completion of two assignments (20% of the grade), the completion and oral presentation of a short case study of a client in a difficult life situation and the proposal of a therapeutic-pedagogical intervention (program) (50% of the grade).
To pass the course, a minimum of 60% of the total score is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good - normal reliable work),

D (75-68%, satisfactory - acceptable results),
E (67-60%, marginal performance - results fulfil the minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, the student is required to demonstrate excellent accuracy and active critical and creative reflection on the knowledge of the field of therapeutic pedagogy, including its meaningful integration with the knowledge of their field of study as well as other disciplines. Demonstrate the ability to have a good understanding of the principles, guidelines, and methods of therapeutic-educational support. Also, in identifying client needs and resources as well as means of assistance.
A grade of B indicates that the student reflects critically on the knowledge of the field of therapeutic pedagogy, including its meaningful integration with the knowledge of their field of study as well as other disciplines, in a reasonably good manner. Demonstrates the ability to be very knowledgeable about the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as means of assistance.
A grade of C will be awarded if the student is able to critically reflect well on the knowledge of the field of therapeutic pedagogy, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student has demonstrated the ability to be well versed in the principles, guidelines, and methods of therapeutic educational assistance, identification of client needs and resources as well as means of assistance.
A grade of D indicates that the student has limited, moderately critical reflection on the knowledge of the field of therapeutic pedagogy, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student demonstrates the ability to satisfactorily navigate the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as the means of assistance.
A grade of E will be given if the student reflects critically on the knowledge of the field of therapeutic pedagogy to a limited extent. The student has difficulty understanding and navigating the principles, guidelines, and methods of therapeutic-educational assistance, identification of client needs and resources, and means of assistance.
The Fx evaluation requires further study and work by the student.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The goal of the Therapeutic Pedagogy for the Helping Professions course is for students to acquire knowledge related to the holistic being of the person in the context of their development, environment and relationships, learning, emotional experience, agency, and health, with a focus on personal assistance, inclusion, and promoting the participation of the individual at every age. The course Therapeutic Pedagogy for the Helping Professions is an integral part of the systemic knowledge framework of the combined Psychology Teacher Education degree, in line with the mission and strategic goals of the PdF UK, as well as the graduate profile itself.
By successful graduation, students will have critically mastered (to the extent as indicated in the grading scale above) the current theoretical and empirical knowledge of the field of therapeutic pedagogy - principles, principles and specifics of the integration of educational and therapeutic efforts, the roles and competencies of the therapeutic educator in the levels of diagnosis, prevention, counselling, therapeutic education, accompaniment and therapeutic-educational intervention). They will be able to have a deeper orientation in the person's difficult situation, in the meaning and possibilities of early help, as well as help from the recipient's relational persons. They will demonstrate (regarding the scope of the course) an adequate orientation in the methods of therapeutic-pedagogical assistance and the specifics of therapeutic-pedagogical therapies: art therapy, bibliotherapy, drama therapy, occupational therapy, music therapy, psychomotor therapy, and play therapy.

Students of psychology teaching should use the acquired knowledge and skills in the study of other subjects of their study programme, but especially in practice, in preventive counselling and educational activities in the school system (towards optimisation of developmental conditions of specific pupils/students and solving potential developmental problems, in this direction also by cooperation with other school staff and parents, etc.).

Class syllabus:

1. Theoretical background of the field of Therapeutic Pedagogy (subject, principles, guidelines) - specifics of the integration of educational and therapeutic efforts.
2. The image of a person - a provider and a recipient of help. A holistic approach to the person (pupil, client, patient) in education and therapy. Orientation in the life situation of the recipient.
3. Roles and competences of the therapeutic educator (diagnosis, prevention, counselling, therapeutic education, accompaniment, therapy).
4. Inclusive potential of therapeutic-educational intervention.
5. Orientation in the person's situation, early help, help to the family (contact, helping relationship). Types and specifics of validation in communication with the recipient of help and their guardians (close relational persons). Methods of therapeutic-pedagogical assistance.
6. Therapeutic-educational exercises and programs in therapeutic-educational care.
7. Therapeutic-educational disciplines in therapeutic-pedagogy: art therapy, bibliotherapy, drama therapy, occupational therapy, music therapy, psychomotor therapy, play therapy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYde018/22	Training of communication competences

Educational activities:
Type of activities: practicals
Number of hours:
per week: 2 **per level/semester:** 26
Form of the course: on-site learning

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
2 hours of practice/week, total of 22 hours per semester, combined form (primarily full-time)
Student workload:
11 x 2 hours of teaching = 22 hours; continuous preparation for class (14 hours); work on the preparation of assignments (14 hours), total of 50 hours
Teaching methods:
Dialogical and discussion methods, experiential and activating methods (staging methods, psychological games, situational and case methods), active group work, work with tests and questionnaires, heuristic and problem-based methods, reflective essay, guided self-study, work with text and information sources.

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
100% of intermediate assessment
Interim assessment includes the work of students in completing interim tasks and assignments, which are realized by individual preparation by the student (total 30% of the assessment), as well as by his/her active participation in activities during the hours of implementation of the course (total 70% of the assessment). To pass the course, a minimum score of 60% is required.
Individual assignments are focused on finding a text with a communication sample (in the range of about A4 format) and its analysis according to the teacher's instructions (10%) and elaboration of an assignment on the topic of the strengths and weaknesses of the student's communication (10%). The student will continue to work with the developed material in class. At the end of the semester, the student will produce a reflective essay providing feedback on the course and the student's opinion of his/her communication competence (10% of the grade).
Within the course teaching during the semester, space is devoted to specific activities and simulations of dealing with different communicative situations in which the student actively participates, on the topics of verbal (10%), non-verbal (10%), assertive (10%) and negative (10%) communication, communication in conflict situations (10%), active listening (10%) and effective feedback (10%).
Ratings are given on a scale:

A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, the student needs to be actively involved in solving the techniques and activities presented in class continuously throughout the semester, actively solve the assigned individual tasks, master the techniques to develop the communication areas, and try to develop his/her communication competences, try to solve the tasks creatively, actively express his/her own opinion.
B grade means that the student is actively involved in solving techniques and activities presented in class, solves individual tasks, has mastered techniques for developing communication areas, has made efforts to develop his/her communication competencies, to a lesser extent seeks original solutions to the tasks set, actively expresses his/her own opinion.
C grade means that the student is usually actively involved in solving the techniques and activities presented in class during the semester, actively solves only some of the set tasks, masters the techniques for developing communication areas, and tries to develop their communication competencies only in some areas, uses creativity in solving the set tasks to a lesser extent, actively expresses his/her own opinion.
Grade D means that the student's activity during the semester in solving the activities presented in class is at a weaker level, the solutions to the tasks are slightly deficient, the student is deficient in the mastery of techniques for developing communication areas, interest in developing his/her communication competences is sporadic, he/she often solves the tasks set only with external help, he/she is more passive in expressing his/her own opinions.
Grade E means that the student is passive during the semester in solving the activities presented in class, is minimally involved in the activities and solving the set tasks, mastery of techniques for developing communication areas is minimal, and shows no interest in developing his/her communication competences, relies more on the group than on himself/herself in solving the tasks, expresses his/her opinions only minimally.
A grade of FX indicates that the student has not sufficiently met the course requirements and extra work is required.
Scale of assessment (preliminary/final): 100% of intermediate assessment

Learning outcomes:
The aim of the course is to gain an overview of communication techniques and to acquire skills in the field of communication competences regarding the specifics of communication in an educational environment.
By completing the course, a student:
- understands the basic theories of communication
- has knowledge of verbal and non-verbal communication
- gains an overview of techniques for the development of communication
- is able to use feedback effectively in social communication
- is familiar with the specifics of communication in the school environment
- is aware of the importance of effective communication in the teaching profession
- becomes proficient in the use of a variety of techniques and activities to develop communication
- can evaluate the strengths and weaknesses of their communication competences
- develops and consolidates his/her skills in the area of communication competencies.

Class syllabus:

1. Communication as the basis of social interaction. The function and components of communication, motivation to communicate, and communication context. Intercultural differences in communication.
2. Basic theories of communication.
3. Social perception as part of human communication.
4. Verbal communication and techniques for its development.
5. Non-verbal communication (haptics, proxemics, paralinguistics, posturing, gestures, mimicry, kinesics) and techniques for its development.
6. Active and empathic listening as an important part of communication.
7. Assertive communication and techniques for its development and training.
8. Feedback in communicative interactions.
9. Communication in conflict situations and conflict management in speech.
10. Negative communication and manipulation in communication.
11. Specifics of communication in educational settings. Errors in teacher-pupil communication.
