COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZex027/22	**Course title:** Abuse prevention
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** **per level/semester:** 5s **Form of the course:** combined	
Number of credits: 3	
Recommended semester: 1., 3., 5., 7.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The course is completed with an assessment, the ratio of the midterm and final assessment is 100/0. The task of the students is to prepare a midterm paper for 40 points and to pass a midterm test for 60 points, a total of 100 points. A minimum of 60% of the maximum possible course grade is required for successful completion of the course.

The rating is awarded on a scale:

A (100-91%, excellent - excellent results with only minimal errors),

B (90-81%, very good - above average results with minor errors),

C (80-73%, good - normal reliable work, average results),

D (72-66%, satisfactory - acceptable results, but significant errors occur),

E (65-60%, sufficient - results meet minimum criteria),

Fx (59-0%, insufficient - extra work required).

A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:

Learning outcomes and transferable competences:
Learning objectives and outcomes:
The aim of the course is to provide basic knowledge about the problems of drug consumption, their effects, the etiology of drug addiction. The course pays special attention to the issues of the drug scene, drug policy development and criminal sanctions, or drug crime. Students will be able to identify the internal and distance learning causes of addiction, summarize the manifestations of different types of addiction, indicate and propose specific forms of addiction prevention. They will deepen their knowledge and competences in working with people with addiction, they will learn to apply preventive practices through examples and concrete activities in school practice.
Students and learners will develop communication skills using professional terminology in the field of substance and non-substance addictions. They will improve their skills in working with professional literature and producing professional texts. Students will be able to apply knowledge creatively to problem-based assignments.

Class syllabus:

Brief outline of the course:
1. Basic terminology (social pathology, drug, addiction, abstinence, codependence, prevention, etc.).
2. Classification and characteristics of selected groups of psychotropic substances.
3. Specifics and classification of substance addictions.
4. Causes and factors of drug use.
3. The emergence of addiction and its symptoms.
4. Non-substance addictions (classification, characteristics).
7. Prevention of addiction and its forms.
8. Options for help in the field of addiction (basic psychotherapeutic approaches in addiction treatment, pharmacotherapeutic help, family accompaniment).
8. National Drug Control Programme. The roles of the Departments of Education, Culture, Health, Justice, Home Affairs and Labour, Social Affairs and Family.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSJL/B-SLOex003/22	**Course title:** Academic text writing in Slovak language and literature

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 10 hours include preparation for seminars and self-study of literature on individual topics; 10 hours of preparation for oral presentation of a paper and 27 hours of preparation for written elaboration of the presented paper. A total of 60 hours of student work.
Teaching methods: explanation, demonstration, work with text, colloquium, discussion, presentation, guided self-study, e-learning

Number of credits: 2

Recommended semester: 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will receive a grade based on an orally presented and word-processed paper in the form of a seminar paper according to the topic of the assignment and observing all citation rules and principles (presentation of the paper 25 points, written seminar paper 75 points). The course is completed with a grade resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D, and a minimum of 60 points of the total number of points for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (e.g. presentation: less than 15 points, seminar paper: less than 45 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has excellent knowledge of creating, conceiving, working with information sources, critical study and correct use and citation of sources to the required extent, logically arranges the facts presented, the acquired knowledge in the field focused on the creation of a professional text can be excellently applied and adapted to the working procedures in the creation of a professional text in school practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;

B (92 - 85%, very good - above average standard): very good performance: The student is very good at creating, conceiving, working with information sources, critical study and correct use and citation of sources within the required range, logically organizes the facts presented, the acquired knowledge in the field focused on the creation of a professional text can be well applied, adapted and can design working procedures in the creation of a professional text in school practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his speech is very good, has very well developed skills to learn;
C (84 - 77%, good - normal reliable work): good performance: The student has a good knowledge of creating, conceiving, working with information sources, critical study and correct use and citation of sources in the required scope, logically organizes the presented facts, can reliably apply and adapt the acquired knowledge and working procedures in the creation of a professional text in the school practice in the school practice, reliably solves individual tasks and assignments, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of creating, conceiving, working with information sources, critical study and correct use and citation of sources to the required extent, logically arranges the facts presented, can satisfactorily apply the acquired knowledge and existing working practices aimed at the creation of a professional text in school practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge in the field focused on the production of a professional text, has deficiencies in the arrangement of facts, can minimally apply the acquired knowledge and existing working procedures in the production of a professional text in school practice, solves individual tasks and assignments at a sufficient level, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge in the area of the production of a professional text to the required extent, does not know the facts and their logical connections, cannot apply the knowledge of the work and production of a professional text in practice, cannot solve individual tasks and assignments, has insufficient skills to continue learning.

Learning outcomes:
The student has acquired basic knowledge in the field of production of professional or scientific text, has knowledge of working with information sources, the methodology of professional and scientific work, critical work with the source base and literature, excerpting sources and the main principles of citing them. The student has developed information and methodological literacy, methodological and expressive skills in the field of study.
The student has acquired the skills to correctly navigate in primary and secondary professional and scientific sources in the field of study, has acquired knowledge of the observance of the principles of authorial ethics, of the critical approach and evaluation of the professional dimension of print and online sources, of the application of the principles of writing a professional text, and of the observance of the main points in the structure and terminological construction of a professional text according to the current rules of the field and the principles of citation.
The student has acquired the skills to promptly perceive, apply and develop the principles of professional text production, critical use of sources and correct citation of literature following in the subsequent years of his/her studies. He/she is prepared to deepen and develop this knowledge and skills in further Bachelor and then Master studies, and is able to apply them creatively in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey the essential knowledge of professional text production, critical use of sources and legal citation of literature to the general public and lay readers. By solving problem-based tasks, the student has acquired the

skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures. The student has the skills to communicate facts and concepts and to formulate and defend his/her views in an argumentative manner. The student has the competence to independently extend his/her knowledge and appreciate the broader context of issues in the production of a professional text. They have also developed a number of transferable skills, e.g. analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, metacognitive skills, etc.

Class syllabus:

1. Background, assumptions and requirements for the preparation and writing of a professional text.
2. Formal and substantive aspects of the professional text.
3. Research on the topic of the professional text, compilation of bibliography.
4. Background, requirements and conditions for the application of methodological procedures.
5. Work with information sources and critical study.
6. The use of research results and excerpts in the development of the abstract and the project of a professional text.
7. The process of creating a professional text within the scope of a professional text project.
8. Creation of the professional text and preparation of relevant documentation.
9. Principles of proper citation of scientific sources, sources, scientific and professional literature.
10. Forms of referencing cited sources. Writing a micro-chapter for a draft professional text.
11. Linguistic and formal editing of a professional text, appraisal and proofreading of the text.

The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field.

The thematic stratification of the course will provide a basic overview of the production of a professional text with an emphasis on the acquisition and development of skills in the production of a professional text, especially in terms of its content and form. The student will gain an overview of the rules that unify the academic practice of writing a professional text, especially focusing on the seminar paper, the report and the undergraduate thesis. The student will acquire knowledge and skills in publishing ethics, copyright law and will acquire knowledge and skills related to the principles of proper citation and working with bibliographic information and sources.

The student will be prepared not only to deepen and develop the acquired theoretical knowledge and practical skills in further bachelor and subsequently master studies, but will be able to use and creatively apply them in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment in the position of a proofreader.

The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, modifying his/her knowledge in the process and creatively using the appropriate and appropriate methods of the discipline. In particular, the student will consolidate and develop communication competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of author's ethics, to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and pluralistic attitudes. Be competent in the use of digital technologies in the classroom.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex003/22	Academic text writing in Slovak language and literature

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 10 hours include preparation for seminars and self-study of literature on individual topics; 10 hours of preparation for oral presentation of a paper and 27 hours of preparation for written elaboration of the presented paper. A total of 60 hours of student work.
Teaching methods: explanation, demonstration, work with text, colloquium, discussion, presentation, guided self-study, e-learning

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will receive a grade based on an orally presented and word-processed paper in the form of a seminar paper according to the topic of the assignment and observing all citation rules and principles (presentation of the paper 25 points, written seminar paper 75 points). The course is completed with a grade resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D, and a minimum of 60 points of the total number of points for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (e.g. presentation: less than 15 points, seminar paper: less than 45 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has excellent knowledge of creating, conceiving, working with information sources, critical study and correct use and citation of sources to the required extent, logically arranges the facts presented, the acquired knowledge in the field focused on the creation of a professional text can be excellently applied and adapted to the working procedures in the creation of a professional text in school practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;

B (92 - 85%, very good - above average standard): very good performance: The student is very good at creating, conceiving, working with information sources, critical study and correct use and citation of sources within the required range, logically organizes the facts presented, the acquired knowledge in the field focused on the creation of a professional text can be well applied, adapted and can design working procedures in the creation of a professional text in school practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his speech is very good, has very well developed skills to learn;
C (84 - 77%, good - normal reliable work): good performance: The student has a good knowledge of creating, conceiving, working with information sources, critical study and correct use and citation of sources in the required scope, logically organizes the presented facts, can reliably apply and adapt the acquired knowledge and working procedures in the creation of a professional text in the school practice in the school practice, reliably solves individual tasks and assignments, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of creating, conceiving, working with information sources, critical study and correct use and citation of sources to the required extent, logically arranges the facts presented, can satisfactorily apply the acquired knowledge and existing working practices aimed at the creation of a professional text in school practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge in the field focused on the production of a professional text, has deficiencies in the arrangement of facts, can minimally apply the acquired knowledge and existing working procedures in the production of a professional text in school practice, solves individual tasks and assignments at a sufficient level, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge in the area of the production of a professional text to the required extent, does not know the facts and their logical connections, cannot apply the knowledge of the work and production of a professional text in practice, cannot solve individual tasks and assignments, has insufficient skills to continue learning.

Learning outcomes:
The student has acquired basic knowledge in the field of production of professional or scientific text, has knowledge of working with information sources, the methodology of professional and scientific work, critical work with the source base and literature, excerpting sources and the main principles of citing them. The student has developed information and methodological literacy, methodological and expressive skills in the field of study.
The student has acquired the skills to correctly navigate in primary and secondary professional and scientific sources in the field of study, has acquired knowledge of the observance of the principles of authorial ethics, of the critical approach and evaluation of the professional dimension of print and online sources, of the application of the principles of writing a professional text, and of the observance of the main points in the structure and terminological construction of a professional text according to the current rules of the field and the principles of citation.
The student has acquired the skills to promptly perceive, apply and develop the principles of professional text production, critical use of sources and correct citation of literature following in the subsequent years of his/her studies. He/she is prepared to deepen and develop this knowledge and skills in further Bachelor and then Master studies, and is able to apply them creatively in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey the essential knowledge of professional text production, critical use of sources and legal citation of literature to the general public and lay readers. By solving problem-based tasks, the student has acquired the

skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures. The student has the skills to communicate facts and concepts and to formulate and defend his/her views in an argumentative manner. The student has the competence to independently extend his/her knowledge and appreciate the broader context of issues in the production of a professional text. They have also developed a number of transferable skills, e.g. analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, metacognitive skills, etc.

Class syllabus:

1. Background, assumptions and requirements for the preparation and writing of a professional text.
2. Formal and substantive aspects of the professional text.
3. Research on the topic of the professional text, compilation of bibliography.
4. Background, requirements and conditions for the application of methodological procedures.
5. Work with information sources and critical study.
6. The use of research results and excerpts in the development of the abstract and the project of a professional text.
7. The process of creating a professional text within the scope of a professional text project.
8. Creation of the professional text and preparation of relevant documentation.
9. Principles of proper citation of scientific sources, sources, scientific and professional literature.
10. Forms of referencing cited sources. Writing a micro-chapter for a draft professional text.
11. Linguistic and formal editing of a professional text, appraisal and proofreading of the text.

The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field.

The thematic stratification of the course will provide a basic overview of the production of a professional text with an emphasis on the acquisition and development of skills in the production of a professional text, especially in terms of its content and form. COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSJL/B-SLOex015/22	**Course title:** Analysis of literary text
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** **per level/semester:** 4s **Form of the course:** combined	
Type, volume, methods and workload of the student - additional information Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person) Student workload: 13 hours of direct instruction; 14 hours of continuous class preparation; 19 hours of preparation for the interpretation of a literary text; 14 hours of preparation for a midterm test with emphasis on acquired interpretive skills. A total of 60 hours of student work. Teaching methods: Problem-based interpretation of the material, demonstration, discussion of the topic, problem solving, practical problem solving, analytical and interpretative work with a literary text, guided self-study, e-learning	
Number of credits: 2	
Recommended semester: 1., 3.	
Educational level: I.	
Prerequisites:	
Course requirements: Active participation in the class is required to pass the course. The student will be evaluated continuously by reviewing the acquired knowledge and its application in the form of interpretation of poetic and prose texts (60 points) and by a continuous written test with emphasis on the acquired interpretive skills at the end of the continuous teaching (40 points). The course culminates in a grade resulting from an interim review of learning outcomes during the teaching portion of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (Interpretation: less than 36 points, Intermediate test: less than 24 points). The rating is awarded on a scale: A (100 - 93%, excellent - outstanding): excellent performance: The student has an excellent knowledge of literary text analysis in the required scope, logically arranges the presented facts in a flawless manner, can apply the acquired literary knowledge at an excellent level and adapt the procedures of literary text analysis work in school practice, has the ability to independently and imaginatively solve individual tasks and assignments also in a broader literary, literary-historical	

and cultural context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85%, very good - above average standard): very good performance: The student has very good knowledge of literary text analysis to the required extent, arranges the facts presented logically, with only minor errors, can apply the acquired literary knowledge very well and adapt the procedures of literary text analysis work in school practice without major errors, has the ability to independently solve individual tasks and assignments also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: the student has a good knowledge of literary text analysis to the required extent, organises the facts presented appropriately and makes errors only in places, can reliably apply and adapt the procedures of literary text analysis work text in school practice, solves individual tasks and assignments reliably independently, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of the analysis of a literary text to the required extent, demonstrates some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge and existing working methods of the analysis of a literary text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimal amount of knowledge of literary text analysis to the required extent and significant deficiencies in the organisation of facts, can minimally apply the acquired knowledge and existing working practices of literary text analysis in school practice, solves individual tasks and assignments at a satisfactory level with considerable help, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of literary text analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge to the work of literary text analysis in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
The student has knowledge of selected literary-analytical phenomena, which can be identified and critically evaluated in literary texts. The student has acquired the basics of professional reading of a fiction text with emphasis on its structure, structure and artistic value, understands its specifics, actively seeks new possibilities in approaching it. Knows and is able to interpret a literary text in a synchronic and diachronic process and in relation to other types of art. Can also work with different possible interpretations of the text in school practice. Based on an analytical and critical approach to the literary text in the analytical-interpretive strand, the student has developed transferable competencies with a focus on critical thinking and reasoning in context. As a result of solving specific assignments and constructing their own interpretations of literary texts, the student's communicative and digital competences are developed. The student is able to readily perceive the interpretations of literature that follow in the subsequent years of his/her studies. On the basis of problem-solving tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. A number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills, are also consolidated and developed. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further Bachelor's and then

Master's studies, but also to use and creatively apply them in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment in the position of a proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Possibilities of interpretation of literature. Basic methods, procedures and aspects in the analysis of a literary text. Author, text, reader. Theory of interpretation and its application in practice.
2. Principles of internal construction of a literary work. Transformations of genres.
3. Character system of a literary work (language, style, tropes, figures).
4. Components of the thematic construction of an artistic text. Composition of a literary work of fiction.
5. Structure of a prose text. Epic prose as a plot type of functional verbal expression. Epic narration. Literary character.
6. Structure of a dramatic text. Speech in drama, plot and characterization function of protagonists.
7. Verse systems in poetry. Prosodic features and verse. Rhythm and rhythmic structure of verse.
8. The temporal versification system and its realization in Latin humanism and in the Bernese language.
9. The syllabic versification system and its verse modifications, syllabic verse in older Slovak poetry and in Romantic poetry.
10. The syllabotonic versification verse system and its modifications, syllabotonic verse of the Star-Slavic period.
11. Decanonization of verse in 20th and 21st century poetry.

The course curriculum covers a spectrum of cross-cutting and specialized literary knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge of literary text analysis. The stratification of topics will provide the student with the necessary body of knowledge to support the formation of creative and synthesizing skills about the literary and literary-analytic context. The student will have analytical-interpretive experience with specific literary texts and will be able to translate theoretical information about a work into interpretive skills. In this course, the student will deepen and develop knowledge of the possibilities of interpreting literature, will be able to orient himself/herself in basic literary-analytical methods, and will be able to implement various procedures and aspects in the analysis of a literary text. The student will be able to explain the process of literary communication, to perceive the text as a communicative message and to understand the position of the author as the creator of the literary text and the reader as the recipient of the literary work. They will be able to describe the steps leading, through analysis and interpretation, to the recognition of a literary text. The student will be able to clarify the internal form of a literary work. The student will be familiar with the different literary genres and will be able to identify their development and transformation in the context of the history of literature. The student will be able to clarify the language and style of a literary work and identify the means of expression of fiction. The student will be able to name the components of the thematic construction of a fiction text. The student will be able to analyze a prose text, clarify the issues of plot and storyline, describe the setting of an epic work, explain the category of narrator, and define a literary character. The student will learn the structure of a dramatic text, the compositional aspects and structure of drama, and the language in a dramatic work. The student will recognize verse systems in poetry and will be able to demonstrate, through specific examples, the rhyming, syllabic, and syllabotonic versification systems and their implementation in various historical periods of literary development. The student will understand the transformations of verse in 20th and 21st century poetry and will be able to subject them to literary analysis. The student will deepen and develop knowledge of literary concepts along with practical examples, which they will then be able to

apply to their own literary analysis of the text. The student will be able to assess the value of a literary work in a literary-historical context in the analysis and will be able to point out the importance of knowing the wider context, the time, the social situation, etc. He/she will learn to justify and apply various methodological procedures of literary analysis, acquire analytical and interpretive skills in working with a fiction text and will be able to evaluate its artistic contribution. The student will be able to develop his/her analytical skills with an emphasis on independent and creative work. They will acquire appropriate techniques for analysing a literary text and develop their interpretative skills and critical thinking. On the basis of the acquired knowledge and skills, he/she will be able to express his/her attitude and interpret knowledge, apply analytical-interpretive competences to other literary texts, point out the interrelationships between them and reflect on new possibilities of literary analysis. The student will not only be prepared to deepen and develop them in further Bachelor's and then Master's studies, but will also be able to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, modifying his/her knowledge in the process and creatively using the appropriate and appropriate methods of the discipline. The student will consolidate and develop communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate his/her sense of socially responsible action and civic attitudes in the spirit of democracy. The student will be competent in the use of digital technologies in the teaching of literature.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex015/22	Analysis of literary text

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 14 hours of continuous class preparation; 19 hours of preparation for the interpretation of a literary text; 14 hours of preparation for a midterm test with emphasis on acquired interpretive skills. A total of 60 hours of student work.
Teaching methods: Problem-based interpretation of the material, demonstration, discussion of the topic, problem solving, practical problem solving, analytical and interpretative work with a literary text, guided self-study, e-learning

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated continuously by reviewing the acquired knowledge and its application in the form of interpretation of poetic and prose texts (60 points) and by a continuous written test with emphasis on the acquired interpretive skills at the end of the continuous teaching (40 points). The course culminates in a grade resulting from an interim review of learning outcomes during the teaching portion of the semester of study (100/0).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (Interpretation: less than 36 points, Intermediate test: less than 24 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has an excellent knowledge of literary text analysis in the required scope, logically arranges the presented facts in a flawless manner, can apply the acquired literary knowledge at an excellent level and adapt the procedures of literary text analysis work in school practice, has the ability to independently and imaginatively solve individual tasks and assignments also in a broader literary, literary-historical

and cultural context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85%, very good - above average standard): very good performance: The student has very good knowledge of literary text analysis to the required extent, arranges the facts presented logically, with only minor errors, can apply the acquired literary knowledge very well and adapt the procedures of literary text analysis work in school practice without major errors, has the ability to independently solve individual tasks and assignments also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: the student has a good knowledge of literary text analysis to the required extent, organises the facts presented appropriately and makes errors only in places, can reliably apply and adapt the procedures of literary text analysis work text in school practice, solves individual tasks and assignments reliably independently, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of the analysis of a literary text to the required extent, demonstrates some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge and existing working methods of the analysis of a literary text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimal amount of knowledge of literary text analysis to the required extent and significant deficiencies in the organisation of facts, can minimally apply the acquired knowledge and existing working practices of literary text analysis in school practice, solves individual tasks and assignments at a satisfactory level with considerable help, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of literary text analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge to the work of literary text analysis in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
The student has knowledge of selected literary-analytical phenomena, which can be identified and critically evaluated in literary texts. The student has acquired the basics of professional reading of a fiction text with emphasis on its structure, structure and artistic value, understands its specifics, actively seeks new possibilities in approaching it. Knows and is able to interpret a literary text in a synchronic and diachronic process and in relation to other types of art. Can also work with different possible interpretations of the text in school practice. Based on an analytical and critical approach to the literary text in the analytical-interpretive strand, the student has developed transferable competencies with a focus on critical thinking and reasoning in context. As a result of solving specific assignments and constructing their own interpretations of literary texts, the student's communicative and digital competences are developed. The student is able to readily perceive the interpretations of literature that follow in the subsequent years of his/her studies. On the basis of problem-solving tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. A number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills, are also consolidated and developed. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further Bachelor's and then

Master's studies, but also to use and creatively apply them in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment in the position of a proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Possibilities of interpretation of literature. Basic methods, procedures and aspects in the analysis of a literary text. Author, text, reader. Theory of interpretation and its application in practice.
2. Principles of internal construction of a literary work. Transformations of genres.
3. Character system of a literary work (language, style, tropes, figures).
4. Components of the thematic construction of an artistic text. Composition of a literary work of fiction.
5. Structure of a prose text. Epic prose as a plot type of functional verbal expression. Epic narration. Literary character.
6. Structure of a dramatic text. Speech in drama, plot and characterization function of protagonists.
7. Verse systems in poetry. Prosodic features and verse. Rhythm and rhythmic structure of verse.
8. The temporal versification system and its realization in Latin humanism and in the Bernese language.
9. The syllabic versification system and its verse modifications, syllabic verse in older Slovak poetry and in Romantic poetry.
10. The syllabotonic versification verse system and its modifications, syllabotonic verse of the Star-Slavic period.
11. Decanonization of verse in 20th and 21st century poetry.

The course curriculum covers a spectrum of cross-cutting and specialized literary knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge of literary text analysis. The stratification of topics will provide the student with the necessary body of knowledge to support the formation of creative and synthesizing skills about the literary and literary-analytic context. The student will have analytical-interpretive experience with specific literary texts and will be able to translate theoretical information about a work into interpretive skills. In this course, the student will deepen and develop knowledge of the possibilities of interpreting literature, will be able to orient himself/herself in basic literary-analytical methods, and will be able to implement various procedures and aspects in the analysis of a literary text. The student will be able to explain the process of literary communication, to perceive the text as a communicative message and to understand the position of the author as the creator of the literary text and the reader as the recipient of the literary work. They will be able to describe the steps leading, through analysis and interpretation, to the recognition of a literary text. The student will be able to clarify the internal form of a literary work. The student will be familiar with the different literary genres and will be able to identify their development and transformation in the context of the history of literature. The student will be able to clarify the language and style of a literary work and identify the means of expression of fiction. The student will be able to name the components of the thematic construction of a fiction text. The student will be able to analyze a prose text, clarify the issues of plot and storyline, describe the setting of an epic work, explain the category of narrator, and define a literary character. The student will learn the structure of a dramatic text, the compositional aspects and structure of drama, and the language in a dramatic work. The student will recognize verse systems in poetry and will be able to demonstrate, through specific examples, the rhyming, syllabic, and syllabotonic versification systems and their implementation in various historical periods of literary development. The student will understand the transformations of verse in 20th and 21st century poetry and will be able to subject them to literary analysis. The student will deepen and develop knowledge of literary concepts along with practical examples, which they will then be able to

apply to their own literary analysis of the text. The student will be able to assess the value of a literary work in a literary-historical context in the analysis and will be able to point out the importance of knowing the wider context, the time, the social situation, etc. He/she will learn to justify and apply various methodological procedures of literary analysis, acquire analytical and interpretive skills in working with a fiction text and will be able to evaluate its artistic contribution. The student will be able to develop his/her analytical skills with an emphasis on independent and creative work. They will acquire appropriate techniques for analysing a literary text and develop their interpretative skills and critical thinking. On the basis of the acquired knowledge and skills, he/she will be able to express his/her attitude and interpret knowledge, apply analytical-interpretive competences to other literary texts, point out the interrelationships between them and reflect on new possibilities of literary analysis. The student will not only be prepared to deepen and develop them in further Bachelor's and then Master's studies, but will also be able to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, modifying his/her knowledge in the process and creatively using the appropriate and appropriate methods of the discipline. The student will consolidate and develop communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate his/her sense of socially responsible action and civic attitudes in the spirit of democracy. The student will be competent in the use of digital technologies in the teaching of literature.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex002/22	Anatomy and physiology of the nervous system

Educational activities:
Type of activities: lecture
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
Scope, type/method of teaching and organizational form:
5 hours per semester, combined form (full-time + distance)
Student workload:
5 hours combined teaching + self-study (17 hours) per semester; preparation of seminar paper and presentation (14 hours), preparation for the mid-term test (20), preparation for the final examination (30 hours). 56 hours in total.
Teaching methods:
self-study, handouts and exercises in MS Teams, heuristic method, work with professional text and information sources

Number of credits: 4

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
50% of the interim evaluation + 50% of the final evaluation.
The interim assessment includes an interim test (30 points) and a seminar paper on the assigned topic and Power Point presentation (20 points). The final assessment will consist of a final exam in the form of a written test (50 points). For successful completion of the course, it is necessary to obtain a minimum of 60% of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required.
For a grade of A, students need to perform outstandingly well continuously throughout the semester and be capable of independent study. Students are able to navigate through a patchwork of different literary sources, select relevant sources for their study, are able to understand the anatomy and physiology of the nervous system, and are able to use their knowledge to compare the functions of different parts of the brain and cerebral cortex.

A grade of B means that students have performed above average throughout the semester, have been able to study independently, have mastered basic information regarding the anatomy and physiology of the nervous system, and are able to navigate the literature study correctly.
A grade of C means that students performed well throughout the semester, their theoretical knowledge of anatomy and physiology of the nervous system is at a good level, but they lack the ability to apply this knowledge correctly, to critically evaluate and compare literature sources.
A grade of D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to anatomy and physiology of the nervous system. They have considerable difficulties in working independently, they cannot critically analyse information on their own.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge correctly, but have mastered most of the necessary theoretical knowledge from the course.
A grade of Fx indicates that the student needs extra study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim evaluation + 50% of the final evaluation.

Learning outcomes:
The aim of the course is to be familiar with the anatomy and physiology of the nervous system and to know the functions of the nervous system (in general) and the individual parts of the brain. By completing the course, the student will learn basic anatomical and physiological terminology. The student will acquire knowledge of the structure, functions of the nervous system (in general), individual parts of the brain, cerebral cortex, central and peripheral nervous system. Acquire basic information about the structure and functional manifestations of neurons and nervous tissue. The knowledge will be the basis for the study of related psychological disciplines

Class syllabus:
1. Introduction to the study: functional systems of the human brain, CNS and PNS, nervous excitement.
2. Nervous tissue. Neuron. Synapse. Mechanisms and modes of signalling in neurons and in the nervous
system.
3. Spinal cord. Extended spinal cord.
4. Brain. Midbrain. Forebrain.
5. Hind brain. Cerebellum. Bridge.
6. Nerves. Cranial nerves. Spinal nerves. Vegetative nerves.
7. Pyramidal pathway.
8. Cerebral cortex. Neurons of the cerebral cortex.
9. Sympathetic and parasympathetic functions.
10. Reflexes and instincts.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KP/B-VUZex008/22	Bachelor thesis seminar

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 2

Recommended semester: 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The student's task is to solve the assignments given continuously during the semester and to hand in the final thesis project at the end of the midterm evaluation. The student actively participates in presenting and discussing solutions to the interim assignments in seminars, for which he/she receives points (20%). The solution of each interim assignment that is handed in on the due date is evaluated with points (40%). The student receives points (40%) for the final thesis project at the end of the interim assessment. All points will be added together at the end of the interim assessment.
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results), the student actively works on continuous assignments, participates in the presentation and discussion of the assignments in seminars. Reflects both critically and creatively on interim assignments. He/she is able to produce a final thesis project at an excellent level.
B (90-81%, very good - above average standard), the student actively works adequately on the continuous assignments, participates in the presentation and discussion of the given assignments in seminars. He/she reflects adequately on the intermediate assignments and is able to produce a final thesis project at a very good level.
C (80-73%, good - normal reliable work), the student has performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge. The final thesis project is done at a good level.
D (72-66%, satisfactory - acceptable results), the student was less prepared during the semester, has slight deficiencies in theoretical knowledge. Cannot critically analyze information. He/she prepared the final thesis project at a satisfactory level.
E (66-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge. Intermediate tasks meet the minimum criteria, as well as the development of the final thesis project.
Fx (59-0%, insufficient - extra work required).

Scale of assessment (preliminary/final): Predmet je ukončený hodnotením (100% priebežného hodnotenia). Úlohou študenta je v priebehu semestra vyriešiť priebežne zadávané úlohy a odovzdať záverečný projekt záverečnej práce na konci priebežného hodnotenia. Študent sa aktívne podieľa na prezentácii a diskutovaní riešení priebežných úloh na seminároch, za ktoré získava body (20%). Riešenie každej priebežnej úlohy, ktorá sa odovzdáva v stanovenom termíne, je hodnotené bodmi (40%). Za projekt záverečnej práce na konci priebežného hodnotenia získava študent body (40%). Všetky body sa na záver priebežného hodnotenia spočítajú.Pre úspešné absolvovanie predmetu je potrebné získať minimálne 60% bodového hodnotenia.Hodnotenie sa udeľuje na stupnici:A (100-91%, výborne - vynikajúce výsledky), študent aktívne priebežne pracuje na priebežných úlohách, podieľa sa na prezentácii a diskutovaní daných úloh na seminároch. Kriticky aj tvorivo reflektuje priebežné zadania. Je schopný vypracovať projekt záverečnej práce na vynikajúcej úrovni.B (90-81%, veľmi dobre - nadpriemerný štandard), študent aktívne primerane pracuje na priebežných úloha, podieľa sa na prezentácii a diskutovaní daných úloh na seminároch. Primerane reflektuje priebežné zadania a je schopný na veľmi dobrej úrovni vypracovať projekt záverečnej práce. C (80-73%, dobre - bežná spoľahlivá práca), študent počas semestra podával štandardne dobré výkony, ich teoretické znalosti sú na dobrej úrovni, chýba mu však schopnosť tieto poznatky kriticky aplikovať. Projekt záverečnej práce je vypracovaný na dobrej úrovni.D (72-66%, uspokojivo - prijateľné výsledky), študent bol v priebehu semestra slabšie pripravený, má mierne nedostatky v teoretických znalostiach. Nevie kriticky analyzovať informácie. Projekt záverečnej práce vypracoval na uspokojivej úrovni.E (66-60%, dostatočne - výsledky spĺňajú minimálne kritériá), študent disponuje v obmedzenej miere teoretickými poznatkami, nedokáže kriticky analyzovať tieto poznatky, je len v minimálnej miere schopný poznatky aplikovať. Priebežné úlohy spĺňajú minimálne kritériá, rovnako ako vypracovanie projektu záverečnej práce. Fx (59-0%, nedostatočne - vyžaduje sa ďalšia práca navyše)

Learning outcomes:

Learning objectives and outcomes:
The aim of the course is to familiarize students theoretically and practically with the principles and procedures that need to be mastered for the successful preparation of a bachelor's thesis.
The student is able to define the topic of his/her own bachelor thesis, is able to correctly determine the methods of its processing, acquires the ability to work selectively and correctly with the professional literature on the chosen topic. He/she knows the individual parts of the final thesis. Is able to prepare and present the results of the thesis and is able to respond to questions on the thesis in discussion.

Class syllabus:

Brief outline of the course:
Types of bachelor theses. The timetable of thesis processing. Definition of the topic and goal of the thesis. Study of literature. Excerpting of material. Theoretical and methodological conception of the thesis. Methodology of problem processing. Methodology of elaboration of the thesis. Formal-compositional requisites of the final thesis. How to prepare for the defence of the thesis.

Primerane reflektuje priebežné zadania a je schopný na veľmi dobrej úrovni vypracovať projekt záverečnej práce. C (80-73%, dobre - bežná spoľahlivá práca), študent počas semestra podával štandardne dobré výkony, ich teoretické znalosti sú na dobrej úrovni, chýba mu však schopnosť tieto poznatky kriticky aplikovať. Projekt záverečnej práce je vypracovaný na dobrej úrovni.D (72-66%, uspokojivo - prijateľné výsledky), študent bol v priebehu semestra slabšie pripravený, má mierne nedostatky v teoretických znalostiach. Nevie kriticky analyzovať informácie. Projekt záverečnej práce vypracoval na uspokojivej úrovni.E (66-60%, dostatočne - výsledky spĺňajú minimálne kritériá), študent disponuje v obmedzenej miere teoretickými poznatkami, nedokáže kriticky analyzovať tieto poznatky, je len v minimálnej miere schopný poznatky aplikovať. Priebežné úlohy spĺňajú minimálne kritériá, rovnako ako vypracovanie projektu záverečnej práce. Fx (59-0%, nedostatočne - vyžaduje sa ďalšia práca navyše)

Learning outcomes:

Learning objectives and outcomes:
The aim of the course is to familiarize students theoretically and practically with the principles and procedures that need to be mastered for the successful preparation of a bachelor's thesis.
The student is able to define the topic of his/her own bachelor thesis, is able to correctly determine the methods of its processing, acquires the ability to work selectively and correctly with the professional literature on the chosen topic. He/she knows the individual parts of the final thesis. Is able to prepare and present the results of the thesis and is able to respond to questions on the thesis in discussion.

Class syllabus:

Brief outline of the course:
Types of bachelor theses. The timetable of thesis processing. Definition of the topic and goal of the thesis. Study of literature. Excerpting of material. Theoretical and methodological conception of the thesis. Methodology of problem processing. Methodology of elaboration of the thesis. Formal-compositional requisites of the final thesis. How to prepare for the defence of the thesis.

Recommended literature:

Recommended reading:

STATE EXAM DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZšt011/15	**Course title:** Bachelor's thesis defence
Number of credits: 12	
Educational level: I.	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The state examination of the defence of the thesis, its conditions and procedural aspects are regulated by the Internal Regulation No.1/2020 Study Regulations of the Faculty of Arts of Charles University, as well as by the Internal Regulation No. 5/2021 Study Regulations of the Charles University.

A student may take the state examination a) after obtaining at least such number of credits that after obtaining credits for successful completion of the last state examination he/she achieves the necessary number of credits for proper completion of studies and b) after successful completion of compulsory courses, compulsory elective courses and elective courses in the composition determined by the study programme except for the state examination and c) no disciplinary proceedings are conducted against him/her.

In the bachelor's degree, the student receives 12 credits for the successful defence of the bachelor's thesis (credits included in the UZ study plan).

According to the VP 23/2021 Internal Quality Assurance System for Higher Education of the Charles University in Bratislava, the student is evaluated in particular:

- Demonstration of the student's ability to collect and interpret relevant data (facts), usually within the field of study in which the student has completed the programme of study, with the possibility of interdisciplinary overlap into other fields if necessary;
- Demonstrate the ability to make informed decisions that also take into account social, scientific and ethical considerations;
- Ability to communicate information, concepts, problems and solutions to both professional and lay audiences.
- the ability to think and work creatively in the field of study in which they have completed their degree programme.
- knowledge and understanding of the problem/issue addressed.
- Applying their skills in collecting, interpreting and processing basic literature, which may include its application in practice, or solving a sub-task related to the student's future field of study/ assignment.

The rating is awarded on a scale:

A 100 - 91% (excellent - outstanding results),
B 90 - 81% (very good - above average standard),
C 80 - 73% (good - normal reliable operation),
D 72 - 66% (satisfactory - acceptable results),
E 65 - 60% (sufficient - results meet minimum criteria),
Fx 59% or less (insufficient).

A student is evaluated with the FX grade if he/she has fulfilled the requirements for the grade only at a level not exceeding 60% of the total highest possible level of fulfilment of the requirements for the completion of the subject of the state examination - the defence of the bachelor thesis. In the same way, a student shall be assessed with an FX grade if he/she has submitted a thesis in violation of paragraph 7 of Article 56 of the UK Internal Regulation 23/2021 or has submitted a thesis that does not substantially meet the requirements under paragraph 1(d), paragraph 2(d) or paragraph 3(d) of Article 56 of the UK Internal Regulation 23/2021 Internal Quality Assurance System for Higher Education at the University of Bratislava.
The details and specifications of the requirements of the final theses for the individual teacher study programmes in combination (approbation) will be specified in the respective Study Programme Descriptions.

Learning outcomes:

Learning outcomes:
The learning outcome is in accordance with the Long-Term Plan of the Charles University/PdF, the mission and strategic goals of the Charles University/PdF, in accordance with the description of the field of study, in accordance with the NKR/SKR/DD, in accordance with the profile of the graduate, in accordance with the learning objectives and learning outcomes in the individual subjects of the study programme curriculum, and other relevant documents.
The student is able to demonstrate his/her ability to work creatively in the field of study in which he/she has completed the study programme when conceiving his/her bachelor thesis. The student is able to demonstrate adequate knowledge of the subject matter and to apply his/her skills in collecting, interpreting and processing the basic literature, or its application in practice, or is able to solve a sub-task related to the focus of the student's bachelor's thesis.

Class syllabus:

Brief outline of the course:
1. Contribution of the thesis to the field of study. The evaluation of the bachelor thesis assesses whether the student has adequately demonstrated the ability to work creatively in the field of study in which he/she has completed the study programme, reflects the degree of demonstration of knowledge and knowledge of the issue, assesses the skills applied in collecting, interpreting and processing the basic literature, or the extent to which the student has mastered the application of theoretical assumptions in practice or how he/she is able to solve a subtask that is related to the focus of the student's bachelor thesis;
2. Originality of the thesis (the thesis must not be plagiarized, must not infringe the copyrights of other authors), the documentation for the defence of the thesis as a subject of the state examination includes originality protocols: from the Central Register and Theses, the results of which are commented on by the supervisor and the opponent in their opinions;
3. Correctness and correctness of citation of used information sources, research results of other authors and author teams, correctness of description of methods and working procedures of other authors or author teams;
4. Compliance of the structure of the thesis with the prescribed structure defined by the Internal Regulation No. 2/2018 Directive of the Rector of Charles University in Bratislava;
5. Respecting the recommended scope of the final thesis (the recommended scope of a bachelor's thesis is usually 30 - 40 standard pages - 54 000 to 72 000 characters including spaces), the adequacy of the scope of the thesis is assessed by the supervisor of the thesis;
6. Linguistic and stylistic level of the work and formal editing;
7. The manner and form of defending the thesis and the student's ability to respond adequately to the comments and questions in the supervisor's and opponent's evaluations.

8. In the study programme focused on the teaching of art-educational subjects, the presentation of artistic outputs and performances may be part of the final thesis and its defence.

State exam syllabus:

Recommended literature:
Recommended reading:
according to the focus of the bachelor thesis topic

Languages necessary to complete the course:
Slovak language, in the case of language approbations also the language of the respective subject approbation

Notes:
Examination committee approved by the Scientific Council of PdF UK. State examination: the defence of the bachelor thesis is carried out only from one approbation. Credits are counted towards "UZ".

Course ID:	**Course title:**
PdF.KSJL/B-SLOex021/22	Basics of proofreading and editing

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 23 hours of continuous preparation for classes, including study of literature, 24 hours of work on the semester project.
Total 60 hours of student work.
Teaching methods: lecture, demonstration, dialogue with students, dialogue in a group of students, group work, problem-based tasks, application of theoretical knowledge to practical examples, analytical and interpretative work with literary text, simulation of practice, e-learning, teaching of the subject by a practitioner, guided self-study

Number of credits: 2

Recommended semester: 7.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous completion of micro-assignments and practical assignments in seminars (50 points);
• completion of a semester project based on a simulated sequence of proofreading work on a manuscript (50 points).
The course is completed with a grade resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0).
To pass the course, a minimum score of 60 % is required. A final grade of A requires at least 93 points, a grade of B requires at least 85 points, a grade of C requires at least 77 points, a grade of D requires at least 69 points and a grade of E requires at least 60 points of the total points. Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (micro-assignments and practical assignments: less than 30 points, semester project: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - outstanding results): excellent performance: the student has excellent knowledge of proofreading and editing issues to the required extent, logically arranges the facts presented in a flawless manner, is able to apply the acquired knowledge excellently in proofreading and editing activities, has the ability to solve individual tasks and assignments independently and

imaginatively, also in a broader linguistic, literary and cultural context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: The student has a very good knowledge of proofreading and editing issues to the required extent, arranges the facts presented logically, with only minor errors, can apply the acquired knowledge very well in proofreading and editing activities, has the ability to solve individual tasks and assignments independently and in a broader linguistic, literary and cultural context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of proofreading and editing issues to the required extent, organises the facts presented appropriately and makes mistakes only in places, can reliably apply the acquired knowledge in proofreading and editing activities, reliably solves individual tasks and assignments independently, and has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of proofreading and editing issues to the required extent, shows some deficiencies in the arrangement of facts, can apply the acquired knowledge satisfactorily in proofreading and editing activities, solves individual tasks and assignments satisfactorily and mostly independently, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of proofreading and editing issues to the required extent and significant deficiencies in the organisation of facts, can apply the acquired knowledge minimally in proofreading and editing activities, solves individual tasks and assignments at a satisfactory level with considerable help, has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of proofreading and editing issues to the required extent, does not know the facts and their logical connections, cannot apply the knowledge gained in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student has a basic knowledge of contemporary book culture in Slovakia from 1989 to today. The student has acquired knowledge about the book as a medium, about the forms and infrastructure of Slovak book culture and the book market, and about the publishing and editorial preparation of a manuscript for book publication. He/she has acquired and verified in simulated practice the principles, procedures, means and aids of proofreading and editing, while having developed linguistic and literary knowledge and skills. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skills to communicate facts, concepts and opinions and to formulate and defend arguments. He/she is prepared to deepen and develop the acquired knowledge and skills in his/her Master's studies and is also able to use and creatively apply them in the school environment in the position of a teaching assistant as well as for the needs of the publishing environment. The student has developed the competence to independently expand his/her knowledge and the ability to identify and evaluate broader contexts of professional issues. The student has also acquired a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. The book, its definition, parts and forms.
2. Book culture in Slovakia after 1989.
3. Book market in Slovakia after 1989.
4. Manuscript preparation for publication.

5. Editorial preparation of the manuscript.
6. Proofreader as a subject of editorial preparation of the manuscript, his/her competence, working means and aids.
7. Proofreader's marks.
8. Tools for digital revision of the text.
9. First proofreading.
10. Page proofreading.
11. Proofreading and editing of accompanying texts.
The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will deepen and develop his/her linguistic and literary knowledge. The knowledge of all levels of the Slovak language system will be used in connection with the knowledge of literary theory, the developmental differentiation of literature and its genre-thematic forms when applied to the activities falling within the scope of proofreading and editing. The student will deepen and develop knowledge about book culture and the book market in Slovakia after 1989, about the book as a material medium of text and its publishing and editorial preparation, about the scope of the proofreader, his/her working means and aids, tools and procedures for classical and digital revision of text. The student will be prepared to deepen and develop this knowledge in the Master's degree and to use and creatively apply it in the school environment in the publishing environment also with regard to school practice. The course will lead the student to actively acquire information and effectively use knowledge and skills in Slovak language and literature. It will develop the student's skill in applying linguistic and literary knowledge in practical proofreading and editing activities. It will consolidate and develop his/her skill in formulating and defending arguments, stimulate his/her skill in proposing and implementing solutions to practical problems on the basis of facts and arguments, modifying his/her knowledge in doing so and creatively using appropriate and adequate procedures. In the course, the student will consolidate and develop communicative competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and civic attitudes in the spirit of democracy.

He/she has acquired and verified in simulated practice the principles, procedures, means and aids of proofreading and editing, while having developed linguistic and literary knowledge and skills. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skills to communicate facts, concepts and opinions and to formulate and defend arguments. He/she is prepared to deepen and develop the acquired knowledge and skills in his/her Master's studies and is also able to use and creatively apply them in the school environment in the position of a teaching assistant as well as for the needs of the publishing environment. The student has developed the competence to independently expand his/her knowledge and the ability to identify and evaluate broader contexts of professional issues. The student has also acquired a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. The book, its definition, parts and forms.
2. Book culture in Slovakia after 1989.
3. Book market in Slovakia after 1989.
4. Manuscript preparation for publication.

5. Editorial preparation of the manuscript.
6. Proofreader as a subject of editorial preparation of the manuscript, his/her competence, working means and aids.
7. Proofreader's marks.
8. Tools for digital revision of the text.
9. First proofreading.
10. Page proofreading.
11. Proofreading and editing of accompanying texts.
The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will deepen and develop his/her linguistic and literary knowledge. The knowledge of all levels of the Slovak language system will be used in connection with the knowledge of literary theory, the developmental differentiation of literature and its genre-thematic forms when applied to the activities falling within the scope of proofreading and editing. The student will deepen and develop knowledge about book culture and the book market in Slovakia after 1989, about the book as a material medium of text and its publishing and editorial preparation, about the scope of the proofreader, his/her working means and aids, tools and procedures for classical and digital revision of text. The student will be prepared to deepen and develop this knowledge in the Master's degree and to use and creatively apply it in the school environment in the publishing environment also with regard to school practice. The course will lead the student to actively acquire information and effectively use knowledge and skills in Slovak language and literature. It will develop the student's skill in applying linguistic and literary knowledge in practical proofreading and editing activities. It will consolidate and develop his/her skill in formulating and defending arguments, stimulate his/her skill in proposing and implementing solutions to practical problems on the basis of facts and arguments, modifying his/her knowledge in doing so and creatively using appropriate and adequate procedures. In the course, the student will consolidate and develop communicative competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex029/22	Basics of psychiatry

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester, combined form (full-time + distance)
Student workload:
5 hours teaching, self-study (17 hours) per semester; preparation of seminar paper and presentation (15 hours), preparation for the mid-term test (20 hours). 56 hours in total.
Teaching methods:
active group work, heuristic method, case study, work with professional text and information sources.

Number of credits: 2

Recommended semester: 7.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex008/22 - Personality psychology

Recommended prerequisites:
B-PSYex008 Personality psychology

Course requirements:
100% of the interim evaluation
Interim assessment (100%) includes the creation and presentation of a seminar paper in PowerPoint (60% of the assessment) and a midterm exam (40%).
For successful completion of the course, it is necessary to obtain a minimum of 60% of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, students need to perform outstandingly well continuously throughout the semester and be capable of independent study. Students are able to navigate through a patchwork of different literary sources, select relevant sources for their study, are able to understand the theoretical foundations of psychiatry.
A grade of B means that students have performed above average throughout the semester, have been able to study independently, have mastered basic information regarding the manifestations of mental disorders, and are able to navigate the literature correctly.

A grade of C means that students performed well throughout the semester, their theoretical knowledge of psychiatry is at a good level, but they lack the ability to apply this knowledge correctly, to critically evaluate and compare literature sources.
A grade of D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to psychiatry. They have considerable difficulties in working independently, they cannot critically analyse information on their own.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge correctly, but have mastered most of the necessary theoretical knowledge from the course.
A grade of Fx indicates that the student needs extra study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is to learn the theoretical foundations of psychiatry and to gain a basic overview of the manifestations of mental disorders.
Upon completion of the course, the student will master the basic concepts of psychiatry. The student will gain a basic overview and information about the classification of mental disorders, treatment methods used in psychiatry.
After completing the course, students must:
grasp:
- the theoretical foundations of psychiatry
- the basic directions of psychiatry
- the basic methods of psychiatry
understand:
- key concepts of psychiatry
- the epidemiology, aetiology and pathogenesis of mental disorders
- the structure of psychopathological syndromes in adults and children
be able to:
- work with knowledge in the field of psychiatry
- critically analyse psychopathological clinical manifestations in adults and children
- apply knowledge in practice.

Class syllabus:
1. Introduction to the study of psychiatry: the subject, roles, directions and history of psychiatry.
2. Epidemiology, aetiology and pathogenesis of mental disorders. The biopsychosocial model.
3. Classification of mental disorders. Classification systems ICD-10, DSM-V.
4. Syndromology: psychopathological symptom, syndrome, nosological diagnosis.
5. Psychopathology: disorders of perception, thinking, attention, intellect, emotionality, instincts, consciousness.
6. Psychotic disorders: epidemiology, causes, classification, clinical manifestations. Schizophrenia: clinical forms, courses and manifestations.
7. Affective disorders: epidemiology, aetiology, classification, clinical manifestations.
8. Organic psychiatric disorders. Epilepsy: clinical forms, courses and manifestations.
9. Personality disorders: epidemiology, causes, classification, clinical manifestations.
10. Anxiety disorders: epidemiology, aetiology, classification, clinical manifestations.
11. Substance and non-substance addictions. Alcoholism: epidemiology, clinical forms and manifestations.
12. Sexual pathology. Sexual dysfunctions. Sexual deviations (paraphilias).
13. Child psychiatry. Disorders characteristic of children.
14. Overview of therapeutic methods used in psychiatry.

15. Organisation of psychiatric care in Slovakia.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex020/22	Basics of sociology

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of teaching, self-study per semester (17 hours); preparation for mid-term test 15 hours, preparation of mid-term assignments 23 hours, total 60 hours.
Teaching methods:
lecture combined with discussion, work with professional text, guided self-study (e-learning, solving tasks and assignments).

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100% of continuous assessment.
Intermediate assessment includes: 2x midterm test (50%) and completion of assignments (50%). Students will use an e-learning environment for their studies. A minimum of 60% of the course grade is required for successful completion of the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).
A grade of A will be awarded if students have performed excellently, their theoretical knowledge of the foundations of sociology is at an excellent level, they have a standard ability to apply knowledge, critically evaluate and compare literary sources in sociology, and they hand in continuous assignments on time.
A grade of B is awarded if students perform very well, their theoretical knowledge of the foundations of sociology is at a very good level, they have a good ability to apply knowledge, critically evaluate and compare literary sources at a very good level, and they usually hand in intermediate assignments on time.

A grade of C will be awarded to students who perform at an average standard, their theoretical knowledge of the foundations of sociology is at a good level, but they lack the ability to apply this knowledge, critically evaluate and compare literary sources and knowledge of sociology.
A grade of D will be given if students were less prepared during the semester, turning in midterm assignments after the assignment due date. They are slightly deficient in basic sociology theory. They cannot process information analytically.
A grade of E will be given to students who were less prepared during the semester, turning in assignments after the assignment due date. They have major deficiencies in the theory of the foundations of sociology, cannot process information analytically and critically.
A grade of Fx requires extra work and study.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The aim of the education is to provide students with a basic overview of the sociological view of society, its structure and changes. Students will be introduced to the subject and focus of sociology and to the foundations of sociological cognition, the key concepts of sociology. They will be able to identify social inequalities in society, issues of people and society, social change and the structure of society. They can navigate research reports, statistical concepts and tables of sociological research.

Class syllabus:
1. Sociological imagination.
2. The individual and the social world in which he/she lives and which he/she shapes.
3. Basic theoretical approaches and theoretical dilemmas in sociology.
4. Types of societies. Culture. Socialization. Social control.
5. Social interactions and social groups.
6. Social inequalities and stratification of society.
7. Institutions (family, school, media).
8. Social change.
9. Transformation of society and social problems.
10. Methods of sociological research.

Recommended literature:
Baumann, Z. (2010). Thinking sociologically. SLON.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex026/22	Basics of speech therapy

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of education, self-study per term (17 hours), 16 hours of preparation for the knowledge test.
Total 50 hours of student work.
Teaching methods:
Teaching with a continuous application of the theoretical knowledge on practical examples and video demonstrations followed by a discussion on the topic, graphic processing of the studied subject.

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
During the term, the student will prepare Seminar paper 1 (preparation of a leaflet on one NKS, 20%), Seminar paper 2 (study preparation, 20%) and pass a knowledge test (60%). To pass the knowledge test, a minimum of 60% of the score is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, marginal performance - results fulfil the minimum criteria),
Fx (59-0%, inadequate - additional work required).
A mark is achieved if the student correctly and actively reflects critically and creatively on speech therapy concepts, including its meaningful integration with knowledge from psychology.
B mark is achieved if the student reflects appropriately both critically and creatively on speech therapy concepts, including its meaningful integration with knowledge from psychology.
For a C mark, the student reflects more or less critically on speech therapy concepts and knows the interdisciplinary context.
For a D mark, the student reflects critically on speech therapy concepts to a limited extent, is moderately critical, and has a partial understanding of interdisciplinary contexts.

E mark will be given if the student meets the minimum criteria, reflects only to a limited extent on speech therapy concepts, and interdisciplinary connections are insufficient.
Fx mark indicates that the student needs further study in the subject matter and additional work is required.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The aim of the course is to acquire the basic theoretical knowledge concerning the different types of impaired communication skills and the basic terminological apparatus.
The student will acquire basic information in the field of speech therapy as a discipline and profession. The student will learn the basic terminology of speech therapy. Upon successful completion, the student will have an overview of the processes in speech production and comprehension, become familiar with the stages in speech development, and gain information about the aetiology, classification, and symptomatology of the most common types of impaired communicative ability in both child and adult speech therapy patients. The acquired knowledge is crucial for effective cooperation between psychologists and speech therapists in practice.

Class syllabus:
1. Speech therapy as a discipline and profession
2. Impaired communication ability
3. Speech development in early childhood, preschool and younger school age
4. Specifics of speech development in bilingual population
5. Developmental language disorder
6. Articulatory and phonological disorder
7. Dyslexia (specific learning disability)
8. Fluency disorders (stuttering and babbling)
9. Voice disorders
10. Disorders of motor speech production
11. Acquired disorders of speech production and comprehension (aphasia, cognitive-communication deficits)

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZex029/22	**Course title:** Basics of the first aid
Educational activities: **Type of activities:** practicals **Number of hours:** **per week:** **per level/semester:** 5s **Form of the course:** combined	
Number of credits: 2	
Recommended semester: 1., 3., 5., 7.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The course is completed by assessment, 100% of the interim assessment:

(a) a continuous written assessment with a maximum of 80 points aimed at testing knowledge and understanding of general first aid principles as well as basic first aid principles for life-threatening conditions (cessation of breathing, blood circulation), serious injuries (bleeding, burning, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices) and minor injuries

(b) by developing an activity on the chosen first aid topic in the form of a simulation of the health problem mentioned above as well as actively performing a drill on the basic principles of first aid with a maximum of 20 points.

A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. Credit will not be awarded to a student who scores less than 40 points on the written midterm and fails to prepare for the activity. A minimum score of 60% is required to pass the course.

The rating is awarded on a scale:

A (100-91%, excellent - excellent results), excellent performance, the student has excellent knowledge of the theoretical knowledge of medical procedures in cases of threat to health, can simulate a case of a threat to health on the basis of the theoretical knowledge and solve the situation when providing first aid in practice

B (90-81%, very good - above average standard), excellent performance, the student knows the theoretical knowledge of medical procedures in cases of health threat very well, can simulate a case of health threat only partially on the basis of the theoretical knowledge, but can deal with the situation when providing first aid in practice

C (80-73%, good - normal reliable work), good performance, the student has a good knowledge of theoretical knowledge of medical procedures in cases of health hazards, but cannot simulate a case of a health hazard, but can partially solve the situation when providing first aid in practice

D (72-66%, satisfactory - acceptable results), satisfactory performance, the student partially knows the theoretical knowledge of health procedures in cases of health threats, but is unable to simulate a case of a health threat and is only partially able to apply the theory to practice
E (65-60%, sufficient - results meet the minimum criteria), satisfactory performance, the student has only minimal knowledge of the theoretical knowledge of health procedures in cases of health threats, is unable to simulate a case of a health threat and is able to apply the theory to practice only partially
Fx (59-0%, insufficient - extra work required), poor performance, student does not have sufficient knowledge of basic health procedures in health emergencies, nor is he/she able to simulate a health emergency and apply the theory to practice
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
Learning objectives and outcomes:
The aim of the course is to teach students the basics of first aid, cardiopulmonary resuscitation, as well as the management of serious medical conditions. Upon completion of the course, the student will gain theoretical knowledge of medical procedures in cases of health threats to children and adolescents. At the same time, the student will strengthen his/her communication and organizational skills in dealing with serious health emergencies through simulated situations.

Class syllabus:
Brief outline of the course:
1. General principles of first aid (the student acquires basic knowledge and knowledge of the general principles of first aid, can recognize basic first aid from rapid medical and technical assistance, can assess the situation without endangering his/her own life, assess the health condition of the affected - the severity and extent, take urgent measures to save life and knows the correct procedure for calling the ambulance service)
2. Positioning and displacement. (the student is familiarized with the basic positions in providing first aid and possible methods of removal, so that the health of the affected person does not further endanger)
3. First aid for life-threatening conditions (respiratory arrest, circulatory arrest) (the student will be able to recognize the signs of respiratory arrest and circulatory arrest and subsequently provide cardiopulmonary resuscitation in both adults and children in the correct way).
4. First aid for serious injuries (bleeding, burns, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices). (the student is able to recognise the risks to health in different degrees of bleeding, burning, scalding, hypothermia, frostbite, bone and joint injuries, injuries to body orifices, to administer appropriate basic first aid in relation to the extent of the injury and consequently to recognise the signs of shock and to provide the correct anti-shock measures)
5. First aid for minor injuries (the student can recognise minor injuries and provide appropriate first aid)

Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The course is completed with an assessment, weighting of the interim and final assessment: 100/0

(a) a continuous written assessment with a maximum score of 80 points aimed at reviewing knowledge and knowledge of the child's developmental characteristics and the factors that affect the child's biological physiological development and which may be the causes of pathological growth and at the same time the consequences of a lower level of the child's ability to cope with the educational process of school education; reviewing the knowledge and use of methods that assess and diagnose physiologically healthy , resp. pathological biological growth and development of the child and, ultimately, on the issue of prevention and protection of the child's health in all its components of the bio-psycho-social nature of the child's development

b) by developing protocols for the assessment and diagnosis of biological development with a maximum score of 20 points as a form of the ability to apply theoretical knowledge about physiologically healthy or pathological biological development of the child to pedagogical practice

A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E.

Credit will not be awarded to a student who scores less than 40 points on the written midterm review and fails to complete a protocol for assessing and diagnosing the child's biological development. A minimum score of 60% is required to pass the course.

The rating is awarded on a scale:

A (100-91%, proficient - outstanding), excellent performance, the student has an excellent command of the knowledge of physiologically healthy biological development of the child and an excellent understanding of the environmental factors that cause pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critically assesses the adequacy of the demands of the educational process on the physical and psychological performance of the child, the student can apply the methods of assessment and diagnosis of biological development on practical examples and can apply them in the education and training of children

B (90-81%, very good - above average standard), excellent performance, the student has a very good command of the knowledge of the physiologically healthy biological development of the child, knows very well which of the environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is borderline, but the student can apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children
C (80-73%, good - normal reliable work), good performance, although the student has a good command of the knowledge of the physiologically healthy biological development of the child, he/she knows well which of the environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, but critical thinking in the area of evaluation of the adequacy of the demands of the educational process on the physical and psychological performance of the child is absent, but can partially apply the methods of evaluation and diagnosis of biological development on practical examples and can apply them in the education and training of children
D (72-66%, Satisfactory-Acceptable performance), Satisfactory performance, the student partially knows the knowledge of physiologically healthy biological development of the child and partially knows which environmental factors are the causes of the development of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the child's physical and psychological performance is absent but he/she is able to apply the methods of evaluation and diagnosis of biological development in the form of practical examples and apply them in the education of children only partially
E (65-60%, satisfactory - results meet minimum criteria), satisfactory performance, the student has only minimal knowledge of physiologically healthy biological development of the child, and similarly minimal knowledge of the environmental factors that cause pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, critical thinking in the field of evaluation of the adequacy of the demands of the educational process on the child's physical and psychological performance is absent, and is able to apply methods of evaluation and diagnosis of biological development in the form of practical examples and apply them in the education and training of children only partially
Fx (59-0%, insufficient - extra work required), inadequate performance, student does not sufficiently master the basic knowledge of physiologically healthy biological development of the child, at the same time does not sufficiently know which of the environmental factors are the causes of the emergence of pathological growth as a result of the child's lower ability to cope with the educational process of the student's schooling, is neither able to critically evaluate the adequacy of the demands of the educational process on the child's physical and psychological performance, nor able to apply methods of assessing and diagnosing biological development in the form of practical examples and apply them in the education and training of children

Learning outcomes:

Learning outcomes and transferable competences:
Learning objectives and outcomes:
Upon completion of the course, students should have knowledge and understanding of the biological laws of growth and development and the factors that determine them. They will acquire knowledge of the bio-psycho-social integration of the human organism. Understand the spatio-temporal sequence and interdependence of changes in the structure and function of the human organism. They will become familiar with critical developmental periods and risk factors interfering with physiological growth and development. They will understand the principles of regulation and

adaptation of the organism in the context of environmental influences. At the same time, students will strengthen their mathematical skills and analytical abilities in the development of protocols for the assessment of child biological development. Ultimately, the course will provide students with the ability to evaluate the appropriateness of the demands of the educational process on a child's physical and psychological performance in relation to the child's level of biological maturation.

Class syllabus:

Brief outline of the course:

1.Defining ontogeny. Progressive and regressive changes with age. Biological explanation of the concepts of growth and development. The laws of growth and development. Typical and atypical growth and development. (The student can distinguish between physiologically healthy and pathological biological development of a child for the purpose of applying knowledge in the education of children, in the form of effective collaboration with special educators, psychologists, and other practitioners)

2.Factors determining growth and development: genetic, neurohormonal, environmental factors. Genetic factors: heredity, mutations - gene, chromosomal aberrations. Mutagens and teratogens. Mutations. Chromosomal aberrations. (The student knows and understands the endogenous endogenous environmental factors that determine the hereditary predisposition of the child to cope with the demands of the educational process on the psychological and physical load of the organism)

3.Environmental factors. Definition of environment, distance learning, internal environment. Neurohormonal regulation. Importance of neural and hormonal regulation as a mechanism of biological adaptation. Determination of growth and developmental processes by environmental factors. Nutrition. Maternal factors. Climatic and geographical factors. Socio-economic level. Morbidity. (The student knows which of the factors act on the biological development of the child and which may be the consequences of the child's lower ability to cope with the educational process of the student's schooling)

4.Ontogenetic development. The division of ontogeny: the biological definition of the different periods. Prenatal, perinatal, postnatal periods. Prenatal period -formation and development of the embryo (gestation), importance of the placenta. Environmental risk factors threatening prenatal development. Perinatal period. Childbirth, newborn at risk. Postnatal period- characteristics of the neonatal, infant, toddler, preschool, junior and senior school age periods in terms of somatic changes (growth, motor development) and risks of developmental disruption. Brief overview of anatomy and physiology of organ systems. (the student distinguishes the age-specific characteristics of the individual systems in the different periods of ontogenesis and is able to use and apply these characteristics in the practice of school education)

5.Methods of assessment of physical growth and development, determination of biological maturity. Adequacy of the demands of the educational process on the child's physical and mental performance - Biological rhythms. Dynamic stereotype. Fatigue and resumption of work activity. (The student can diagnose the level of development of children of preschool and younger school age, critically evaluate the adequacy of the demands of the educational process on the physical and psychological performance of the child and on the basis of the diagnosis to design and implement an appropriate intervention)

6.Pathologically altered growth and development. Prevention of disorders of somatic development - primary, secondary, tertiary. (the student knows how to prevent pathologically altered growth and development in its beginnings, and knows the basics of prevention and protection of the child's health in all components of the bio-psycho-social nature of the child's development)

7. Principles of the organisation of teaching in terms of physical and mental hygiene. Hygiene of the school environment and conditions for educational activities of pupils. (the student knows the basic principles of the organisation of teaching and the correct hygiene of the school environment in terms of the physical and mental hygiene of the pupil)

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex025/22	Communication and presentation skills

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 25 hours include preparation for seminars and self-study of literature on individual topics; 22 hours of preparation for the presentation of a professional text; 60 hours of student work in total.
Teaching methods: explanation, demonstration, text work, colloquium, discussion, presentation, guided self-study, e-learning

Number of credits: 2

Recommended semester: 2., 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student receives a grade based on the presentation of a professional topic according to the assignment and observing all the rules of reference to the presented sources and presentation acoustic and kinetic principles, to the information-technological means and to the principles of the chosen type of educational discourse (100 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D, and a minimum of 60 points of the total points for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (presentation: less than 60 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has excellent knowledge of the background and means of professional communication in the educational environment and in professional communication, logically arranges the presented facts, can apply the acquired knowledge excellently and adapt the working procedures in the field of professional communication in the educational environment and in professional communication, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85%, very good - above average standard): very good performance: The student has very good knowledge of the background and means of professional communication in the educational environment and in professional communication to the required extent, logically arranges the facts

presented, can apply the acquired knowledge well and adapt the working procedures in the field of professional communication in the educational environment and in professional communication in school practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: the student has a good knowledge of the background and means of professional communication in the educational environment and in professional communication to the required extent, logically arranges the presented facts, the acquired knowledge from the area focused on the production of a professional text can be reliably applied and adapted to the working procedures from the field of professional communication in the educational environment and in professional communication in school practice, reliably solves individual tasks and assignments, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of the foundations and means of professional communication in the educational environment and in professional communication in the required range, logically arranges the presented facts, the acquired knowledge and existing working practices in the field of professional communication in the educational environment and in professional communication can be applied in school practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge about the foundations and means of professional communication in the educational environment and in professional communication in the required range, has deficiencies in the arrangement of facts, can apply the acquired knowledge in the field of professional communication in the educational environment and in professional communication in school practice, solves individual tasks and assignments at a sufficient level, has minimal skills for further learning;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the background and means of professional communication in the educational environment and in professional communication to the required extent, does not know the facts and their logical connections, cannot apply knowledge of professional communication in the educational environment and in professional communication in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The main learning outcomes of the course include the student's skills in the correct orientation in the methods of presentation of professional resources in the field of their study. In accordance with the requirements of linguistic culture and correct speech communication, the student is able to observe the principles of ethics, critical thinking in the creation of speech communication, has acquired skills in the use of information and presentation technologies and forms of making information available to students, lay and professional public. The acquired skills in managing discursive communicative contexts can be used in correct and linguistically correct professional and school educational and wider communicative practice.
The student has the acquired skills to perceive, use and develop the principles of professional communication in educational settings and in professional communication in subsequent years of his/her studies. The student is prepared to deepen and develop these knowledge and skills in further bachelor's and then master's studies and is able to creatively apply them in the school environment in the position of a pedagogical assistant, or for the needs of the publishing environment in the position of a proofreader. The student is also able to convey essential knowledge in the field of professional communication to the general public and lay recipients. On the basis of problem solving tasks, the student has acquired the skills to actively acquire further information and use it in solving

practical tasks in the field using appropriate and adequate procedures. The student has the skills to communicate facts and concepts and to formulate and defend his/her views in an argumentative manner. The student has the competence to independently extend his/her knowledge and appreciate the wider contexts of issues in the production of a professional text. They have also developed a number of transferable skills, e.g. analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, metacognitive skills, etc.

Class syllabus:

1. Background and assumptions of professional and everyday communication practice in school practice.
2. Fundamentals of professional communication: communication situation, speaker, listener, audience.
3. The acoustic component of the speaker's speech.
4. Kinetic component of the oratorical speech.
5. Selecting a topic, creating a presentation, and preparing for a rhetorical speech.
6. Differentiation of professional communication speeches: monological and dialogical communication speeches.
7. The expressive components of a rhetorical speech.
8. Selected types of rhetorical speeches from the point of view of school practice.
9. Instructional discursive communication skills.
10. Presentation of artistic and professional text, preparation of comments on exhibitions and presentations.
11. Linguistic culture and correctness of rhetorical expression.

The aim of the course will be to acquire the basic knowledge of the bases and means of professional communication in the educational environment and in professional communication. The student will acquire a basic orientation in the different types of professional and popular communication of monological and dialogical character. The student will gain knowledge of the acoustic and kinetic components of oratory and the means of expression used in the various types of professional presentation and communication. The course will develop the student's information and methodological literacy, methodological and expressive skills.

The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field.

The thematic stratification of the course will provide a basic overview of the creation, emergence and implementation of professional communication with an emphasis on the acquisition and development of communication skills in the educational environment, in school practice, and in professional and verbal-artistic events that the future graduate may encounter in the school environment. The student will gain an overview of the rules of creating a professional communication aimed at the needs of the educational process as well as for presentations of papers, professional activities and the defence of final theses. The course will develop skills focused on speech and presentation communication in a variety of communication situations. Emphasis on developing communication and presentation skills will be based on current needs focused on ways of communicating knowledge to pupils, students and a wider range of lay and professional audiences. The current increasingly high demands placed on communication and presentation skills will require a responsive mastery of not only information and communication technologies, which will enable the operative communication and application of new knowledge and information in the field to a contemporary recipient. Therefore, the seminars will provide space mainly for the presentation of selected professional topics in the form of lectures, poster and powerpoint presentations, which will be necessary for the preparation of the educational process and for the successful course of the final thesis defences. The course will also focus on the acquisition of

skills in the field of organising verbal-artistic and professional events, seminars, presentations and exhibitions.
The student will not only be prepared to deepen and develop the acquired theoretical knowledge and practical skills in further bachelor's and then master's studies, but will also be able to use and creatively apply them in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment in the position of a proofreader. The student will consolidate and develop communication competences and the ability to take responsibility for the quality of his/her work and the principles of cultivated communication, authorial ethics and his/her own education. The student will develop and consolidate a sense of socially responsible behaviour and value pluralistic attitudes. The student will be competent in the use of digital technologies in school practice.

Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (presentation: less than 60 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has excellent knowledge of the background and means of professional communication in the educational environment and in professional communication, logically arranges the presented facts, can apply the acquired knowledge excellently and adapt the working procedures in the field of professional communication in the educational environment and in professional communication, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85%, very good - above average standard): very good performance: The student has very good knowledge of the background and means of professional communication in the educational environment and in professional communication to the required extent, logically arranges the facts

presented, can apply the acquired knowledge well and adapt the working procedures in the field of professional communication in the educational environment and in professional communication in school practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: the student has a good knowledge of the background and means of professional communication in the educational environment and in professional communication to the required extent, logically arranges the presented facts, the acquired knowledge from the area focused on the production of a professional text can be reliably applied and adapted to the working procedures from the field of professional communication in the educational environment and in professional communication in school practice, reliably solves individual tasks and assignments, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of the foundations and means of professional communication in the educational environment and in professional communication in the required range, logically arranges the presented facts, the acquired knowledge and existing working practices in the field of professional communication in the educational environment and in professional communication can be applied in school practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge about the foundations and means of professional communication in the educational environment and in professional communication in the required range, has deficiencies in the arrangement of facts, can apply the acquired knowledge in the field of professional communication in the educational environment and in professional communication in school practice, solves individual tasks and assignments at a sufficient level, has minimal skills for further learning;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the background and means of professional communication in the educational environment and in professional communication to the required extent, does not know the facts and their logical connections, cannot apply knowledge of professional communication in the educational environment and in professional communication in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The main learning outcomes of the course include the student's skills in the correct orientation in the methods of presentation of professional resources in the field of their study. In accordance with the requirements of linguistic culture and correct speech communication, the student is able to observe the principles of ethics, critical thinking in the creation of speech communication, has acquired skills in the use of information and presentation technologies and forms of making information available to students, lay and professional public. The acquired skills in managing discursive communicative contexts can be used in correct and linguistically correct professional and school educational and wider communicative practice.
The student has the acquired skills to perceive, use and develop the principles of professional communication in educational settings and in professional communication in subsequent years of his/her studies. The student is prepared to deepen and develop these knowledge and skills in further bachelor's and then master's studies and is able to creatively apply them in the school environment in the position of a pedagogical assistant, or for the needs of the publishing environment in the position of a proofreader. The student is also able to convey essential knowledge in the field of professional communication to the general public and lay recipients. On the basis of problem solving tasks, the student has acquired the skills to actively acquire further information and use it in solving

practical tasks in the field using appropriate and adequate procedures. The student has the skills to communicate facts and concepts and to formulate and defend his/her views in an argumentative manner. The student has the competence to independently extend his/her knowledge and appreciate the wider contexts of issues in the production of a professional text. They have also developed a number of transferable skills, e.g. analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, metacognitive skills, etc.

Class syllabus:

1. Background and assumptions of professional and everyday communication practice in school practice.
2. Fundamentals of professional communication: communication situation, speaker, listener, audience.
3. The acoustic component of the speaker's speech.
4. Kinetic component of the oratorical speech.
5. Selecting a topic, creating a presentation, and preparing for a rhetorical speech.
6. Differentiation of professional communication speeches: monological and dialogical communication speeches.
7. The expressive components of a rhetorical speech.
8. Selected types of rhetorical speeches from the point of view of school practice.
9. Instructional discursive communication skills.
10. Presentation of artistic and professional text, preparation of comments on exhibitions and presentations.
11. Linguistic culture and correctness of rhetorical expression.

The aim of the course will be to acquire the basic knowledge of the bases and means of professional communication in the educational environment and in professional communication. The student will acquire a basic orientation in the different types of professional and popular communication of monological and dialogical character. The student will gain knowledge of the acoustic and kinetic components of oratory and the means of expression used in the various types of professional presentation and communication. The course will develop the student's information and methodological literacy, methodological and expressive skills.

The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field.

The thematic stratification of the course will provide a basic overview of the creation, emergence and implementation of professional communication with an emphasis on the acquisition and development of communication skills in the educational environment, in school practice, and in professional and verbal-artistic events that the future graduate may encounter in the school environment. The student will gain an overview of the rules of creating a professional communication aimed at the needs of the educational process as well as for presentations of papers, professional activities and the defence of final theses. The course will develop skills focused on speech and presentation communication in a variety of communication situations. Emphasis on developing communication and presentation skills will be based on current needs focused on ways of communicating knowledge to pupils, students and a wider range of lay and professional audiences. The current increasingly high demands placed on communication and presentation skills will require a responsive mastery of not only information and communication technologies, which will enable the operative communication and application of new knowledge and information in the field to a contemporary recipient. Therefore, the seminars will provide space mainly for the presentation of selected professional topics in the form of lectures, poster and powerpoint presentations, which will be necessary for the preparation of the educational process and for the successful course of the final thesis defences. The course will also focus on the acquisition of

skills in the field of organising verbal-artistic and professional events, seminars, presentations and exhibitions.
The student will not only be prepared to deepen and develop the acquired theoretical knowledge and practical skills in further bachelor's and then master's studies, but will also be able to use and creatively apply them in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment in the position of a proofreader. The student will consolidate and develop communication competences and the ability to take responsibility for the quality of his/her work and the principles of cultivated communication, authorial ethics and his/her own education. The student will develop and consolidate a sense of socially responsible behaviour and value pluralistic attitudes. The student will be competent in the use of digital technologies in school practice.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex005/22	Communication in education

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Type, scope and method of educational activities:
13 hours seminar per semester, combined method
Student workload:
13 hours of teaching and 9 hours of guided self-study, 10 hours of preparation for teaching during the semester, 25 hours of preparation for midterm evaluation, 33 hours of preparation for final evaluation, 90 hours in total.
Teaching methods:
Dialogical methods - interview, debate, group discussion, micro-output and feedback training, problem-based methods - brainwriting, brainstorming, monological methods - lecture, guided self-study - working with text, solving tasks and assignments.
Number of credits: 3
Recommended semester: 1st - 2nd semester
Level of study: 1st degree

Number of credits: 3

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
Assessment: consists of 2 intermediate assessments (40+60, total 100 points).
Interim assessment 1: consists of the preparation of a term paper and its oral presentation or practical application in class. This is a prepared micro-performance (alone or in pairs).
Semester work for interim assessment 1: consists of a creative assignment for 40b (20+20). This includes preparation of an oral micro-presentation for 10-15 minutes and feedback (20b) and preparation of a visual presentation in a graphics program (20b).
Intermediate assessment 2: consists of a test of the acquired knowledge, i.e. a test for 60p. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),

D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes:
By completing the Pedagogical Communication course, the student should:
- Be able to compare student-centered and teacher-centered approaches in communication,
- be able to justify the choice and appropriateness of the communication approaches used in teaching,
- be able to create a presentation with high quality content and visually interesting,
- be able to apply theoretical knowledge in the creation of oral micro output,
- be able to present a micro performance in front of a group and be able to give or receive feedback,
- be able to argue correctly and be able to make a factually correct argument,
- understand the importance of selection and analysis of information and information sources,
- know methods for developing critical thinking,
- acquire presentation and communication skills and be able to apply them in practical tasks.
Transferable competences: the student strengthens soft skills such as communication skills through creative tasks in the course, furthermore analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and through their application in discussion, strengthens interpersonal skills within the group - activation and taking initiative and responsibility.

Class syllabus:

Brief outline of the course:

The aim of the course is the practical use of theoretical knowledge about effective communication in the educational process through training and micro-performances. The course is designed to prepare students for the future teaching profession in the field of critical and independent thinking, communication and rhetorical skills, collaboration, creative activity, self-assessment, feedback, etc. Using various activating methods and problem-based tasks, students will actively participate in the teaching and create the content of the course themselves, in which they will use their own potential and develop the inter and intra personal aspects of their own personality.

Topics:

Pedagogical communication in theory - definition of communication, types of communication, information theory and its components. Pedagogical communication - its functions, levels, basic rules, organizational forms. Interaction styles of the teacher. Extralinguistic means of communication, paralinguistic aspects of speech. Verbal communication - monologue, dialogue, conversation, questioning, argumentation. Organizational forms and space in communication. Types of teaching according to the number of participants. Classroom layout.

Pedagogical communication in practice - teachers' inappropriate approaches in pedagogical communication. Appropriate communication approaches and strategies in teacher work - learner centred approach, humanism, non-directivity. Presentation - structure and arrangement of speech/ speech/lecture. Selection and appropriateness of information within an oral presentation. Analysis of speakers. Visualisation and arousal of interest. Organisation of time. Argumentation - composition of argument, types of argument. Logic and errors in argumentation. Types of interviews. Debate - how to conduct a conversation, the structure of a conversation. Division of discussion methods. Feedback - self-evaluation and self-reflection, giving and receiving criticism. Critical thinking and methods to develop critical thinking.

Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 22 hours of preparation for the presentation of the assignment; 25 hours of preparation for the written test. Total 60 hours of student work.
Teaching methods: Lecturing, interpretation of theoretical knowledge and its application to practical examples, moderated conversation, text analysis, guided self-study, e-learning

Number of credits: 2

Recommended semester: 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated for the presentation of the assigned assignment (40 points) and for a written test of professional knowledge at the end of the continuous teaching (60 points). The course will be completed with a grade resulting from an interim review of learning outcomes during the instructional portion of the semester of study (100/0).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E out of the total points. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (presentation of the assignment: less than 24 points, final written test: less than 36 points).
The grade is awarded on a scale:
A (100 - 93 %, excellent - outstanding): excellent performance: The student has an excellent knowledge of the contexts of European cultural thought to the required extent, logically arranges the facts presented in a flawless manner, is able to apply the cultural and historical knowledge acquired at an excellent level and to adapt the procedures of working with a professional text in school practice, has the ability to solve individual tasks and assignments independently and imaginatively, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is excellent, has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: The student has a very good knowledge of the contexts of European cultural thought to the required extent, arranges the

facts presented in a logical way with only minor errors, can apply the acquired cultural and historical knowledge very well and adapt the procedures of working with a professional text in school practice without major errors, has the ability to independently solve individual tasks and assignments also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of the contexts of European cultural thought to the required extent, arranges the facts presented appropriately and makes only occasional errors, can reliably apply and adapt the procedures of working with a specialist text in school practice, solves tasks and assignments independently and reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of the contexts of European cultural thought to the required extent, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired cultural and historical knowledge and existing working practices of the professional text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimal amount of knowledge of the contexts of European cultural thought to the required extent and significant deficiencies in the organisation of facts, can minimally apply the acquired cultural-historical knowledge and the existing procedures of working with a professional text in school practice, solves individual tasks and assignments with a sufficient level of assistance, has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the contexts of European cultural thought to the required extent, does not know the facts and their logical connections, cannot apply the acquired cultural-historical knowledge to work with a professional text in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
By completing the course, the student has acquired knowledge of national, areal and European specifics that shape the processes based on the relationship between language and culture, which are reflected in writing in Slovakia in terms of Latin and Byzantine culture and tradition. The student has developed the skills to synthesize knowledge and use it in a synergistic synchronic-diachronic exploration of the concepts of Slovak linguistic and cultural identity from a historical, comparative and typological perspective in the context of the development and application of the written Slovak language in cultural and social practice.
As a result of engaging in a professional discussion on the topic under discussion, as well as as a result of linking the knowledge of the history and current state of language and culture with modern concepts of European linguistic and cultural thinking, the student's communication skills are developed and the ability to think in context is acquired. The student is able to perceive the cultural interpretations that follow in the subsequent years of his/her studies with alacrity. The student is prepared not only to deepen and develop the acquired knowledge in further bachelor's and then master's studies, but also to use and creatively apply it in the school environment as a teaching assistant or for the needs of the publishing environment as a proofreader. He is also able to convey information about cultural thinking phenomena to the general public and to offer their conclusions and justifications to lay audiences. By solving problem-based tasks, the student has acquired the skills to actively acquire information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They

have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Terminology of the phenomenon of culture. Europe and Europeanism. East and West. Central Europe.
2. The significance of late antique culture and the reception of the ancient tradition in later periods.
3. The liberal arts as the basis of general education.
4. Rhetoric as a model of persuasive argumentation and an expression of refined taste.
5. The stabilization of Latin Christian culture. The contribution of various peoples to the culture of the Middle Ages.
6. Three forms of medieval culture. The culture of the court, the monastery and the city.
7. University scholarship, its origins, character and attributes.
8. The modern world-image. A new approach to scholarship. Humanitas civitas.
9. Baroque everyday life. Baroque preacher and missionary.
10. Enlightenment world view and publishing activities of Slovak scholars.
11. Classical-modernist conception of culture. Patriotism and nationalism. The crisis of culture.

The course will expand knowledge of the nature of the key concepts of culture, civilization, education, cultural and national identity, civil society and European unity, as well as knowledge of the various stages of the formation of European culture, its concepts and value orientation in a broader historical context. It will provide the necessary body of knowledge to foster the formation of creativity and synthesising skills. Upon completion of the course, the student will be able to orient himself/herself to issues of European cultural development and be able to synergistically relate conceptual knowledge to current cultural trends in society and education. The course will create a space for complementarity of approaches necessary for the formation of a comprehensively prepared personality of a teacher of Slovak language and literature, which will enable to connect the acquired knowledge with the interpretative skills related to the history of European cultural thought. At the same time, the student will acquire the prerequisites and motivation to develop these skills in further education.

The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, modifying his/her knowledge in the process, and creatively using appropriate and adequate methods of the discipline. The student will consolidate and develop communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate his/her sense of socially responsible action and civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex028/22	Contexts of European cultural thought

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 22 hours of preparation for the presentation of the assignment; 25 hours of preparation for the written test. Total 60 hours of student work.
Teaching methods: Lecturing, interpretation of theoretical knowledge and its application to practical examples, moderated conversation, text analysis, guided self-study, e-learning

Number of credits: 2

Recommended semester: 3., 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated for the presentation of the assigned assignment (40 points) and for a written test of professional knowledge at the end of the continuous teaching (60 points). The course will be completed with a grade resulting from an interim review of learning outcomes during the instructional portion of the semester of study (100/0).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E out of the total points. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (presentation of the assignment: less than 24 points, final written test: less than 36 points).
The grade is awarded on a scale:
A (100 - 93 %, excellent - outstanding): excellent performance: The student has an excellent knowledge of the contexts of European cultural thought to the required extent, logically arranges the facts presented in a flawless manner, is able to apply the cultural and historical knowledge acquired at an excellent level and to adapt the procedures of working with a professional text in school practice, has the ability to solve individual tasks and assignments independently and imaginatively, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is excellent, has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: The student has a very good knowledge of the contexts of European cultural thought to the required extent, arranges the

facts presented in a logical way with only minor errors, can apply the acquired cultural and historical knowledge very well and adapt the procedures of working with a professional text in school practice without major errors, has the ability to independently solve individual tasks and assignments also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed learning skills;

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZex035/22	**Course title:** Developing critical thinking
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** **per level/semester:** 5s **Form of the course:** combined	
Number of credits: 3	
Recommended semester: 1., 3., 5., 7.	
Educational level: I.	
Prerequisites:	
Course requirements: Prerequisite subjects: Prerequisites for successful completion of the course: The course is completed with an assessment, weighted interim/final assessment 100/0. 100% of the continuous assessment includes: approximately 5 assignments (50%) will be given during the semester, 2 midterm tests during the semester (for a total of 30%), and active participation in seminars, engaging in discussions (20%). Students will use the e-learning environment moodle for their studies. For successful completion of the course it is necessary to obtain at least 60% of the points. The rating is awarded on a scale: A (100-91%, excellent - outstanding results), the student actively participated in seminar discussions, completed the midterm tests at an excellent level, and completed the midterm assignments excellently. B (90-81%, very good - above average standard),), the student actively participated in seminar discussions, completed midterm tests and assignments at a very good level C (80-73%, good - normal reliable work), the student was less actively involved in seminar discussions, he/she completed the midterm tests and assignments at a good level with slight shortcomings D (72-66%, satisfactory - acceptable results), the student did not actively participate in seminar discussions, he/she completed midterm tests and assignments at a satisfactory level E (65-60%, sufficient - results meet the minimum criteria), the student did not actively participate in discussions in seminars, midterm tests and midterm assignments were done at the minimum level Fx (59-0%, insufficient - extra work required)	
Learning outcomes: Learning outcomes and transferable competences: Learning objectives and outcomes: Students are familiar with the principles of critical thinking, they can prepare their own activities on the basis of universal scenarios on the subject aimed at the Development critical thinking. They	

can assess students' critical thinking, recognize hoaxes and identify relevant facts and ideas. They can apply a variety of methods to develop pupils' critical thinking.
Learning objectives:
The aim of the seminar is for students to acquire knowledge and skills that will enable them to prepare methodological materials aimed at developing students' critical thinking skills. To familiarize students with universal scenarios of educational activities and the possibilities of assessing critical thinking in education.

Class syllabus:
Brief outline of the course:
Principles of critical thinking, critical arguing, critical debating, critical writing, organizing knowledge. Basic characteristics of hoaxes. Identifying relevant facts and ideas. Methods of Development critical thinking in pupils, universal scenarios of educational activities, preparation of methodological materials. Evaluation of critical thinking.

5 hours per semester, lecture and seminar, combined form (full-time + distance)
Student workload:
5 hours of teaching, self-study (17 hours) per semester; continuous preparation (17 hours) preparation for the midterm test (20); preparation for the seminar paper and presentation (24 hours); preparation for the final exam (40 hours). 120 hours in total.
Teaching methods:
Self-study, handouts and exercises in MS Teams, lecture, group discussion, guided discussion of the topic covered, heuristic method, guided self-study and work with text.

Number of credits: 4

Recommended semester: 6.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex005/22 - Developmental psychology

Recommended prerequisites:
B-PSYex005 Developmental psychology

Course requirements:
During the semester, students will prepare a term paper (max. 20 points) and present the term paper (max. 10 points), take a midterm test (max. 30 points) and a final exam (max. 40 points). The final examination will consist of a written test. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, students need to perform excellently throughout the semester and be capable of independent study. Students are able to navigate through the various literature sources of information, are able to select relevant sources of information for their studies, are able to navigate the issues of childhood developmental disorders, i.e., have basic information about their etiopathogenesis, epidemiology, diagnosis, and differential diagnosis, as well as about possible forms of intervention.

A grade of B means that the students performed above average throughout the semester, were able to study independently, have a basic knowledge of child development disorders, and are able to navigate the information in the literature very well.
A grade of C means that students performed at a standard level during the semester, their theoretical knowledge of the subject is at a good level, but they lack the ability to apply this knowledge quite correctly, to critically evaluate and compare individual literary sources and psychological knowledge.
The grade D means that students were less prepared during the semester, they have slight deficiencies in theoretical knowledge related to the subject of education and greater problems in independent implementation work, they cannot critically analyze information and they have problems applying knowledge to practice.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge, and are more likely to fail in critical thinking, but have mastered most of the theoretical knowledge of the subject.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The goal of the course - which is an important complement in the pro-inclusive orientation of graduates of the psychology teaching field already at the bachelor's degree - is to familiarize students with the basic classification and manifestations of developmental disorders in childhood and their impact on the child's school functioning. Students will acquire basic information about the most common developmental disorders occurring mainly in preschool and school-age children. The ability to navigate the subject matter is essential for future teaching assistants and specialist assistants with advanced degrees, especially in the context of pro-inclusive school policies. They will not only acquire theoretical knowledge but will also gain sufficient competence to work with other professionals involved in dealing with developmental disorders. It is anticipated that teachers will be increasingly confronted with different images of developmental disorders in the years to come and it is therefore essential to acquire not only knowledge but also competences for possible collaboration. The students are introduced to the issue of normality in child psychology, to the risks of developmental disorders and to international classifications, which will enable them to better understand the origins and manifestations of the various disorders. A good orientation in the given issue is a prerequisite for an individualized teacher-pupil/student, pedagogical assistant-pupil/student with a developmental disorder relationship. Such a relationship requires not only empathy but must also be supported by acquired skills. An important goal is to prepare students for participation in the implementation of individual education plans for children with developmental disorders. Most children with developmental disorders (with few exceptions) are pupils/students in mainstream primary/grammar schools and it is therefore important that students are able to work competently with the inclusion team, but also with specialists in other fields such as neurologist, psychologist, speech therapist, paediatrician.

Class syllabus:
1. Introduction to developmental disorders /definition of developmental disorders, precursors of developmental disorders, classifications of developmental disorders.
2. Aetiology of developmental disorders /pathogenic factors and the complexity of their action, risks in the pre-, peri- and post-natal period, early diagnosis, intervention, stimulation, deprivation/.
3. Psychomotor retardation /general developmental delay/ and mental retardation /intellectual disability, aetiology, classification, possibilities, and limitations of intervention.
4. Communication disorders - delayed and impaired speech development, social/pragmatic/ speech disorder.

5. Primary psychogenic communication disorders - stuttering and mutism /definition, classification, possibilities of intervention/.
6. Pervasive developmental disorders or autism spectrum disorders /autism, Asperger's syndrome, Rett syndrome, aetiology, clinical picture, organization of care.
7. The problem of organicity in child psychology. Cerebral palsy - aetiology, clinical picture. Developmental disorder of motor functions.
8. Mild cerebral dysfunction, present - hyperkinetic syndrome, respectively ADHD. The most significant factors in working with children with ADHD, ADD.
9. Specific learning disabilities - diagnosis and differential diagnosis, remedial programs in work with children with specific learning disabilities.
10. Emotional disorders in childhood - anxiety disorders and depression in childhood and adolescence.
11. Enuresis, encopresis, tics - psychogenic conditioned disorders in somatic area. Manifestations, forms, possibilities of intervention.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex005/22	Developmental psychology

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 11s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form:
A total of 11 hours per semester (lecture + seminar), in a combined form
Student workload:
11 hours of teaching, 12 hours of preparation for on-line and off-line assignments for the thematic units of the course (as mentioned above); 31 hours of preparation for the presentation of the seminar paper and its written completion; 12 hours of preparation for the midterm test; 12 hours of preparation for the final test; 20 hours of preparation for the oral examination. 118 hours in total.
Teaching methods:
Lecture: lecture combined with discussion of the topic (concept); examples of application of knowledge about psychological development and research findings in this field in practice, specific topics for critical reflection on knowledge (development of knowledge, diversity of argumentation, current problems and open questions, etc.), convergent and divergent, closed and open questions, questions for further reflection and independent study (also with regard to the seminar, oral exam), etc. are given.
Seminar: discussion, e-learning, critical reflection on relevant video recordings, critical reflection on current basic and applied research on psychological development in the Slovak Republic and worldwide (monographs, journals, databases of scientific knowledge, case studies, etc.), work in small groups (pairs/triplets, etc.) on the assignment of solving a specific problem or application of knowledge from developmental psychology in practice (e.g. with regard to the developmental stage or scientifically up-to-date concept of developmental psychology, simulated examples of practice, case studies); cooperative, resp. group evaluation of inter-disciplinary (transdisciplinary) aspects of knowledge (perspectives of scientific development, innovations and their application, e.g. digitalization, robotization, convergent technologies and psychological ontogenesis, etc.); presentation of the output (seminar paper) in a study group; written reflection on personal life path (psychological development) on the basis of the studied developmental psychological knowledge (recommended to continuously elaborate towards oneself, life path, experiences and environment, including the educational environment, i.e. other people, pupils, students).

Number of credits: 4

Recommended semester: 2.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex001/22 - General psychology

Recommended prerequisites:

B-PSYex001 General Psychology

Course requirements:

50% of continuous assessment + 50% of final assessment
The interim assessment includes an interim test (20% of the assessment), a presentation of the seminar work in the study group at the seminar and its written completion (30% of the assessment). The final assessment includes a final test (25% of the mark) and an oral examination (25% of the mark). To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
A (100-94%, excellent - outstanding performance; students correctly and actively reflect critically and creatively on both the knowledge and frameworks for further development of the discipline, including its meaningful integration with knowledge from other disciplines and its critical and creative application in assessing or even influencing psychological development in general, and specifically in themselves, students, or other learners);
B (93-86%, very good - above average standard; students critically reflect appropriately on both the knowledge and frameworks for further development of the discipline, including its meaningful integration with knowledge from other disciplines and its critical application in assessing and influencing psychological development in general, and specifically in themselves, pupils, or students);
C (85-76%, good - routinely reliable work; students are more or less good at critically reflecting on knowledge and current developments in the discipline, are aware of interdisciplinary contexts, and are able to apply knowledge in a fundamentally sound way to evaluate and influence psychological development in general, and specifically in themselves, pupils, or students);
D (75-68%, satisfactory - acceptable results; students are limited and/or moderately critical of knowledge and current developments in the discipline, know interdisciplinary contexts, and are broadly acceptable in their ability to apply knowledge in assessing psychological development in general, and in themselves, pupils, or students in particular);
E (67-60%, sufficient - results meet the minimum criteria, students only to a limited extent critically reflect independently on the knowledge and current development of the discipline, they are aware of interdisciplinary contexts, however, at least on the basis of the discussion, they are able to apply the knowledge correctly enough in the assessment of psychological development in general, as well as in themselves, prospectively in pupils or students);
Fx (59-0%, insufficient - further work, extra study required).
Scale of assessment (preliminary/final): 50% priebežného hodnotenia + 50% záverečného hodnotenia

Learning outcomes:

The aim of the course Developmental Psychology (which as a basic psychological discipline is an integral part of the systemic core knowledge framework of the study field of psychology teaching in combination) is to provide graduates with a fundamental and up-to-date scientific and empirical framework of knowledge from the contemporary developmental psychology on the basis of its successful completion. They are thus prepared for the study of other psychological or other relevant disciplines of their study programme, in addition to further developing their psychological literacy (the ability to assess psychological development, including in themselves) and thus preparing

themselves for the profession of psychology teacher (as recommended, among others, by the documents of the Slovak Association for the Teaching of Psychology (SAUP) and the European Federation of Psychology Teachers' Associations (EFTPA)).
By successfully completing the course, students will have critically mastered (to the extent indicated in the grading scale above) the following current theoretical and empirical areas of knowledge in developmental psychology (the subject and methods of research in developmental psychology, the conceptual system of developmental psychology, inter- and transdisciplinary relationships, and the possibilities of application; theories and models of psychological development, laws of psychological development; conditions and characteristics of the course of developmental changes of individual psychological functions, personality and social competence in the context of lifelong human development; basic psychological methods and techniques of developmental level assessment; current areas of research and development in developmental psychology and their results).
After successful completion of the course, students of psychology teaching should use the knowledge and skills acquired not only in further studies (as mentioned above), but also fundamentally in planning methodology or research in their final undergraduate thesis; in practice, prospectively at the level of assistive participation in the teaching of psychology and in preventive counselling and educational activities in the school system (towards the assessment and optimisation of the developmental conditions of specific pupils or students and the solution of potential developmental problems, in this respect also by co-working with other school staff and parents, etc.).
In addition, the specific educational methods (mentioned above) will contribute to the further development of their functional literacy in coexistence with the growth of other areas of psychological literacy, especially interactive and critical literacy, also for the sake of further higher education opportunities (meta-cognitive, critical thinking, convergent and divergent thinking, creativity, and other transferable competences) and gradual preparation for successful practice in line with the profile of graduates of the bachelor's degree in psychology teachers (i.e. thinking in contexts, including systemic ones, self-knowledge and self-management, increased motivation to learn, improved study skills, digital, organisational skills, etc.).
The course contributes directly to the gradual development of disciplinary and subject competence, implicitly to the development of disciplinary-didactic and educational competence, as well as personal, communicative, and relational competence, which are part of the professional competences of teachers, through its content and methods of education.

Class syllabus:
(1) The subject, methods of research in developmental psychology and its relation to related disciplines, further development (transdisciplinary relations). (2) General characteristics of psychological development: classification of developmental changes and processes, factors of psychological development, developmental norm, issues of periodization of psychological development and critical analysis, and current and prospective development of knowledge (incl. limits). (3) Theoretical models of psychological development in the context of the development of the discipline and new trends in research and its results: endogenistic, exogenistic and interactionist models of psychological development, their merits, and limits. (4) Motor development and its significance in overall psychological development: the laws and course of development of gross and fine motor skills, their relationship to overall psychological development. Play and drawing and its place in psychological development (development and characteristics of play and drawing in the context of motor, cognitive and social development). (5) Cognitive development: the development of cognitive psychological functions, also in relation to basic theoretical concepts (perception, attention, memory, imagination, thinking, speech, and its relevance to overall psychological development, human action, and the regulation of behaviour). (6) Personality development:

the formation of self and psychological identity (self-image, self-concept, self-esteem), needs, values, and interests and their formative factors (family, school, peer group, friends, culture) and the cognitive contribution of the major theories of personality development. Interpersonal bonding (relational bonding/attachment): theory and empirical findings. Emotion development: stages and factors of emotion development in the context of socialization (differentiation of emotions and their expression, emotional intelligence, emotional regulation with respect to stages of development). Psychosexual development: the physical and psychological components of human sexuality and its development (psychosexual orientation, gender, gender role, the concept of gender and psychosocial development). (7) Social development: the development of the social self, social understanding and social relationships and the socialization of the individual (processes of socialization in the context of development and the critical social group - family, school, play/peer group, collective with respect to current socio-cultural challenges). Moral development: psychological conceptions of moral development (conditions and developmental stages, moral judgement and moral action /prosocial behaviour, moral character, moral values, moral sentiments, and moral identity; self-discipline and empathy). (8) Methods of psychological developmental assessment: developmental screenings and scales and their diagnostic possibilities, aspects of school maturity. Characteristics of psychological developmental attainment at different ages of lifelong development (from conception to old age): developmental tasks, changes, and traits physical (growth and maturation of the organism), psychological and social (perception, imagination, thought and speech, personality and emotionality, motivation, values, interests, moral development, individuation, social interaction, social cognition).
Note: In particular, thematic units 4 - 8 explicitly and specifically implicitly develop psychological literacy to varying degrees and promote the coexistence of multiple competencies of prospective psychology teachers at the undergraduate level, including the use of particular methods of teaching and learning (especially in seminar activities, seminar work, and written critical reflection of knowledge by the student), as mentioned above, in accordance with the profile of the graduate.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex002/22	Digital technologies 1

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
13h seminar / per semester, combined method
Student workload (distance learning form)
Teaching: 13 hours, guided self-study: 9 hours
Completion of 1 subtask (distance): 8 hours x 6 (distance tasks) = 48 hours
Preparation for mid-term evaluation (semester project)= 20 hours
Total student workload: 13sS (3 credits) = 90 hours
Teaching methods
Monological methods - lecture, interpretation of the curriculum,
Dialogical methods - interview, discussion
Guided self-study - processing of partial assignments according to the lecturer's assignment during the semester and their submission in electronic form within a set time limit, which are continuously checked and evaluated by the lecturer

Number of credits: 3

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course: the course is completed with an assessment, the weight of the interim and final assessment is 100/0
active participation in seminars conducted by both face-to-face and distance learning methods;
processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;
development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Present an original and visually impressive presentation of the educational content of the selected teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at Charles University; The structure of the presentation should be based on one of the templates from the library of customizable templates supported by Prezi Present; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defense

of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences
The aim of the educational discipline Digital Technologies 1 is to develop digital skills of students of teacher-oriented study programmes at the Faculty of Education of the Charles University (hereinafter referred to as the Faculty of Education of the Charles University) to be able to effectively use an appropriate range of didactic software applications in the context of the concept of design and creation of interactive educational activities, knowledge quizzes and assignments, electronic portfolios, impressive didactic presentations, new interactive forms of teaching material and other pedagogical/school documentation usable in the intent of their future teaching profession at different levels of regional education in the Slovak Republic.
By completing the educational discipline Digital Technologies 1, the student has the competences and digital skills to effectively use the tools of the SMART Notebook software application and the

SMART Lumio cloud environment by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom, or in the home conditions in the case of distance/hybrid education.
By completing the educational discipline, the student also has the competences and digital skills in the field of design and creation of mind maps through the tools of the Mindomo software application (or FreeMind, XMind) applicable in educational activities implemented in schools and educational institutions for the target group of intact pupils, as well as pupils with special educational needs in order to improve their communication skills and critical thinking.
By completing the educational discipline Digital Technologies 1, the student acquires professional digital competencies in the concept of design and creation of impressive non-linear presentations and interactive presentations of educational content implemented through the Prezi Present cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline Digital Technologies 1, the student has, last but not least, the competences and digital skills to effectively use the cloud platform Microsoft 365 with an emphasis on software applications Sway, Word and Excel by creating supplementary teaching materials for the needs of school teaching and maintaining the relevant pedagogical documentation. The student masters the basic possibilities of using the online communication platform Microsoft Teams applicable in the implementation of distance learning at the level of regional education.

Class syllabus:
The content of the educational discipline Digital Technologies 1 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.
Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.
Application of SMART Notebook software application and SMART Lumio cloud environment in the educational process
We develop professional digital competences by the ability to effectively use the tools of the SMART Notebook desktop application and the SMART Lumio cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in the lesson in the school classroom or in the home environment in the case of distance/hybrid education;
We acquire digital skills in working with the SMART response 2 tool supported by the SMART Notebook desktop application and the SMART Lumio cloud environment in the context of creating knowledge questions - selecting one correct answer from multiple answer alternatives, selecting multiple correct answers from multiple answer alternatives, selecting Yes/No answers, free-form questions - in test sessions designed to test the knowledge of pupils of regional education in the Slovak Republic;
We are mastering the methodology of applying knowledge tests communicated to students through SMART response 2 in the SMART Notebook desktop application and gamification activities supported by the cloud environment SMART Lumio to the process of school teaching of subjects at the lower/upper secondary level of education;

We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the SMART Board interactive whiteboard.
Topics:
Basic functions and calibration of the SMART Board interactive touchscreen/tablet; Symptoms, causes and solutions to some of the problems encountered when using the SMART Board interactive touchscreen/tablet; Installing and updating the SMART Notebook desktop application; Creating a teacher's virtual classroom in the SMART platform;
Creating and editing objects in the SMART Notebook environment; Using basic tools to support the presentation of processed content; Working with multimedia content from the SMART Gallery; Sharing your own content on the SMART Exchange website; Adding links to distance learning educational resources; Adding sound to objects, Animating objects; Using and sharing your own content; Applying graphic content from other software applications - importing and editing objects; Applying objects from the Lesson Activity Toolkit 2.0; Creating gamification activities in SMART Lab; SMART Response 2 - creating and administering knowledge tests/quizzes;
Principles of Gamification; Gamification Elements in Educational Content; Some Results of Exact Studies on the Application of Gamification in Education; Application of Gamification in Education in Primary and Secondary Schools; Examples of Gamification Activities Used in the Teaching of Science, Social Studies, Art, Education and Vocational Education.
Teacher/student login to SMART Lumio cloud platform account; Managing the library of learning activities; Creating gamification activities in SMART Lumio - SMART Lesson Activity Builder (Lab); Editing activities in edit mode; Making activities available to students - delivery mode; Sharing options for gamification activities;
Setting up and converting a lesson page to a Handout or Workspace activity; Working with predefined graphical activity templates for use in activating student learning, inquiring about student knowledge, or reflecting; Sharing lessons with the created educational materials with students in SMART Lumio.Within the distance assignment, the student will create a set of interactive learning/quiz activities and digital presentation material for the target group of learners with effective use of the widest possible range of tools, objects, pre-prepared templates, advanced functions, settings and features supported by the SMART Notebook authoring environment in a range of at least 10 presentation pages/activities. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.notebook format, the student shall indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the distance assignment, the student will create a set of 10 gamification educational/quiz activities for the target group of students with effective use of pre-made templates and tools of the SMART Lumio cloud environment. The condition is that each type of gamification activity should only occur once in the created set of activities. In the accompanying document (a separate file of *.docx format) to the created gamification educational/quiz activities saved by the student, the student shall indicate the methodology of their application in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a 3-page set of pre-prepared content convertible to Handout format activities and a 3-page set of pre-prepared content convertible to Workspace format activities. In the accompanying document (a separate *.docx file) for the created Handout and Workspace activities stored in the SMART Lumio cloud, the student will indicate the methodology of their application to the educational activities of the target group of students.
Creating and using mind maps in the educational process with the support of digital solutions

We develop professional digital competences by competence in the design and creation of mind maps through the tools of the software application Mindomo (or FreeMind/XMind), usable in our own educational activities implemented in schools and school facilities for the target group of intact pupils, as well as pupils with special educational needs in order to improve communication skills and critical thinking;
We are mastering the methodology of applying mind maps communicated to pupils through Mindomo (or FreeMind/XMind) to the process of school teaching of the subjects of their approbation at primary school / secondary school;
Topics:
Explanation of terminology in the field of mind/concept mapping; Desktop/cloud software applications for creating mind maps in the educational process at primary/ secondary schools; Functions and types of mind maps; Principles and principles of creating mind maps; Possibilities of using mind maps in the process of preparation for teaching and directly in the classroom; Familiarization with the user environment of the Mindomo software application (or FreeMind/ XMind);
Structuring a mind map; Inserting, editing and formatting nodes; Creating and formatting branches; Encrypted node; Editing multi-line nodes; Creating image nodes; Moving/copying nodes and groups of nodes in the map; Inserting annotations to nodes; Linking nodes with local links - independent linking of ideas; Hypertext linking of nodes to distance learning information sources - links in nodes leading to distance learning sources (web) or to local files on the local disk of the computer; Importing content into the mind map; Exporting the map to the output of different formats; Text search in the subnetwork of the current node; Mind maps and their use when working with pupils with SEN.
As part of the distance assignment, the student will design and create one mind map from any thematic area of school subject teaching in primary/elementary school. The focus of the mind map should be situated in a curricular issue of the student's own choice falling within the educational content of the teaching subject at primary/ secondary school in the intent of the approbation subjects that the student is studying in the teacher education programmes at the Faculty of Education at PdF UK. In the mind map, tools and functions of the Mindomo (or FreeMind/XMind) application environment will be applied in the intent of the complexity of the explained problem. The student will justify in a brief written form the choice of the processed content/topic in the form of a mind map, their functionality and use in his/her educational activities.
Creation of non-linear presentations of educational content through the Prezi presentation platform supporting teacher's interpretation and systematization of students' knowledge
We acquire professional digital competencies in the concept of design and creation of impressive non-linear presentations of educational content realized through the Prezi Present cloud platform Prezi applicable to our own pedagogical activities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Prezi Present to the process of school teaching of subjects of their approbation at primary school / high school;
Topics:
Introduction of the software tool Prezi Present as a presentation platform - creation of trendy, effective presentations; Explanation and clarification of the terms used in the field of creating didactic presentations in the environment of Prezi Present; Possibilities of using the presentation application Prezi Present in the preparation and creation of supporting educational materials effectively usable in the teaching of their own subject; Presentation of examples of presentations used in teaching science, social science, art-educational and vocational educational disciplines; Illustrative comparison of differences between classical (Microsoft PowerPoint) and dynamic (Prezi Present) presentations;

Theoretical background of presentation preparation and the system of selection of presented information; Basic steps of the procedure for creating didactic presentations in Prezi Present; Functionality of the online presentation tool Prezi Present; Creating dynamic presentations in Prezi Present - working with text and graphic objects; Creating topic/subtopic structures, changing the order of topics/subtopics, Creating depth and rotation effects; Inserting additional graphic visuals into a presentation in Prezi Present; Working in edit mode for main topics, subtopics and other presentation content; Creating visual effects and animations of presentation objects;
Use of templates - change the design - colors, background, fonts; Inserting audio tracks on the background of individual topics/subtopics, the whole presentation; 3D presentations; Importing and editing PowerPoint presentations in Prezi Present; Sharing presentations with other users, sharing on social networks, on web portals; Exporting presentations to *.pdf and Portable Prezi (for off-line presentation); Export options and presentation size; Working with Prezi Present in off-line mode.
Within the distance assignment, the student will use the Prezi Present presentation tool to create an original didactic and visually engaging presentation of the educational content for the target group of students. The focus of the presentation should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at the primary school / secondary school in the intent of the approbation subjects that the student is studying in the study programmes of teaching at the Faculty of Education of the Charles University. The presentation will be at least 30 presentation views (= topics at the highest hierarchical level, subtopics at lower hierarchical levels and stack structure pages) to a minimum hierarchical nesting depth of three.
Use of Microsoft 365 platform in teacher's pedagogical activity
We develop professional digital competencies in the concept of design and creation of responsive presentations with educational content and emphasis on the cloud solution Microsoft Sway usable in educational activities implemented in schools or school facilities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Microsoft Sway to the process of school teaching of subjects of their approbation at primary school / secondary school;
We hone professional digital skills to include the ability to effectively use the range of form content controls and ActiveX elements of Microsoft Word in the creation of interactive worksheets, tests and supplementary learning materials for pupils or other classroom agenda documents usable in the context of pedagogical activity;
We are mastering the methodology of applying interactive worksheets communicated to pupils through Microsoft Word to the process of school teaching of subjects of their area of specialization at primary school / high school;
Develop professional digital skills in the creation of large documents (such as letters, invitations, labels) through a mass correspondence tool usable in the maintenance of relevant pedagogical documentation;# We develop professional digital skills in the creation of statistical calculations, compound expressions using functions for finding conditional frequency, sum, or arithmetic mean and techniques for addressing continuous and discontinuous areas in expressions/functions usable in the tabular processing of classroom data (student evaluations in knowledge or sports activities) supported by Microsoft Excel;
We hone professional competencies to include the ability to effectively apply advanced conditions and techniques for conditional formatting of table records using functions;
We extend digital skills to include the ability to effectively apply an advanced filtering tool to large tabular data by defining compound logical conditions (AND/OR), wildcards (*, ?), and a Subtotal function usable in maintaining appropriate pedagogical documentation;
Develop professional digital skills in creating cumulative graphical visualizations of tabulated data in the context of changing attributes of individual chart elements;

We apply other selected tools of the Microsoft 365 cloud platform, with an emphasis on the Microsoft Teams software application for teachers to use in conducting online learning activities.
Topics:
A basic theoretical introduction to Microsoft cloud solutions;
Sway presentation platform - creation of interactive school materials (portfolios), impressive presentations of educational content; Other possibilities of practical use of Microsoft Sway in educational activities; Concept of creating multimedia responsive presentations; Creating a new Sway, creating a Sway by importing an existing file/presentation, creating a Sway based on a template; Articulating presentation content; Options for inserting and formatting supported visuals via tabs; Grouping multimedia content; Influencing the appearance of a presentation; Changing the layout of content; Adapting specific elements to the style of a presentation; Exporting a presentation in *.pdf/*.docx; Additional options for setting up the presentation in Sway; Share Sway output from a personal Microsoft account; Share Sway output from an account assigned by the educational organization;
Editing large text documents in the Microsoft Word environment - standard settings; Using tabs; Text blocks; Columns; Objects in text - equation editor; Tables in text; Editing a document using a style; Creating your own style and editing an existing style. Document Revision. Definition of the terms section and reference and possibilities of their use; Document revision and its use in writing term papers and qualification papers; Document structuring - dividing a document into sections, types of section breaks, page settings in sections, creating a header and footer in a document divided into sections; Possibilities of using a structured document within the agenda of a teaching staff member; Creating references - automatic content creation, content setup, content formatting, numbering figures and tables, creating a list of tables and figures, footnotes and endnotes, cross-references, citations and list of references used, creating a document index; Creating templates - the importance of a template type document. Electronic forms - what are form elements and what is their difference from ActiveX elements, settings of form elements, ActiveX element and its settings, Form security; Application of the acquired experience and skills of working with Microsoft Word text editor in creating documents useful in own pedagogical activities; Creation of large documents - letters, invitations, labels - by means of the tool of mass correspondence useful in the framework of keeping the relevant pedagogical documentation.
Working with tabular data in Microsoft Excel; Inserting data into cells; Predefined and custom data format; Working with cells - moving, cutting, copying; Bulk filling of data and creating expressions/patterns; Applying elementary functions; Modifying function parameters; Modifying table appearance; Sorting tabular data; Data lists - creating custom lists; Increasing values. Rounding; Absolute and relative cell addressing; Hiding table values; Notes in cells; Working with large data - automatic and extended data filter, Subtotal function; Operations between sheets; Conditional formatting of table data; More advanced functions - If, Count, CountIf, SumIf, SumIfS, AverageIfS; Contingency table; Search functions; Creating forms.
We get familiar with the Microsoft Teams online communication platform environment; Creating Teams; Creating a pure team in MS Teams; Creating teams from an existing team and basic team customization; Creating a team from an Office 365 Group; Setting up and managing teams; Managing team members; Managing teams in bulk; Guest in a Team Class; Invitation from MS Teams; Channels; Cards; Creating your first online lesson; Creating a link to a lesson; Connecting students to an online lesson; Running a lesson with MS Teams; Preparing a lesson outline; Presenting in MS Teams; Tools available during the implementation of an online lesson on the student's/teacher's side (e.g. Conversation panel; Reporting for a word; Downloading a list of participants, etc.); Course notes - notepad; Uploading files with educational content; Creating a shared file for pupils/students in the virtual classroom; Creating a quiz; Quiz evaluation, Quiz setup.

Within the distance task, the student will design and create a document in the form of an electronic workbook in Microsoft Word using a template and applying content controls and ActiveX elements - text field, drop-down field, drop-down list, comma field, option button, command button - usable in the context of teaching subjects of his/her area of specialization at primary school / high school.
Within the framework of the distance task, the student will create a table of fictitious evaluation of pupils in the framework of knowledge or sports activities implemented in schools or school facilities in the range of at least 20 rows and 10 columns, where the functions of the Microsoft Excel spreadsheet application will be used in the context of the complexity of the explained issue.
In a distance task, the student formats a table of fictitious assessment of students in knowledge/ sport activities, applying various conditions and techniques of conditional formatting of the table entries in the intent of the difficulty of the explained problem.
In the distance task, the student will create three different graphical visualisations of the data from the table of the previous distance task, in which he/she has processed the assessments achieved in the knowledge/sport activities implemented in schools or school facilities. They will add to the graphical visualisation the title of the graph, the axis names as well as other parameters of the graph as they wish in the context of the readability of the graph.
In the distance task, the student applies an extended filter to the table from the previous distance task to display the student's name and grade attained in the context of the knowledge/sport activities undertaken in the school or school facilities and filters to another location within the same worksheet/workbook when defining specific filter conditions (e.g. grade attained below/above a set value, etc.).
Within the framework of the distance task, the student will create through the Microsoft Sway application an original, dynamic and visually impressive presentation of the learning issue for the target group of pupils according to his/her own discretion in the intent of school teaching of the subjects of his/her apprenticeship at primary school/elementary school. The aim of the presentation to be realized by the student is to make it multimedia and at the same time attractive for the target group of pupils in terms of content. The scope of the presentation in Microsoft Sway must consist of at least 25 presentation views - cards with the subject content. To organize the presentation, the student should use its layout into sections, subsections and layers in order to increase the clarity of the presented topic for the student.

Základný študijný text k vzdelávaciemu obsahu disciplíny Digitálne technológie 1 bude študentom pravidelných časových intervaloch sprístupňovaný v elektronickej forme prostredníctvom univerzitného LMS Moodle.

Languages necessary to complete the course:

slovak and czech

Notes:
the seminar is held in a computer room, each student has a computer at his/her disposal, the number of students in one group - max. 15.

Past grade distribution
Total number of evaluated students: 227

A	ABS	B	C	D	E	FX

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex002/22	Digital technologies 1

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
13h seminar / per semester, combined method
Student workload (distance learning form)
Teaching: 13 hours, guided self-study: 9 hours
Completion of 1 subtask (distance): 8 hours x 6 (distance tasks) = 48 hours
Preparation for mid-term evaluation (semester project)= 20 hours
Total student workload: 13sS (3 credits) = 90 hours
Teaching methods
Monological methods - lecture, interpretation of the curriculum,
Dialogical methods - interview, discussion
Guided self-study - processing of partial assignments according to the lecturer's assignment during the semester and their submission in electronic form within a set time limit, which are continuously checked and evaluated by the lecturer

Number of credits: 3

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course: the course is completed with an assessment, the weight of the interim and final assessment is 100/0
active participation in seminars conducted by both face-to-face and distance learning methods;
processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;
development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Present an original and visually impressive presentation of the educational content of the selected teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at Charles University; The structure of the presentation should be based on one of the templates from the library of customizable templates supported by Prezi Present; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defense

of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences
The aim of the educational discipline Digital Technologies 1 is to develop digital skills of students of teacher-oriented study programmes at the Faculty of Education of the Charles University (hereinafter referred to as the Faculty of Education of the Charles University) to be able to effectively use an appropriate range of didactic software applications in the context of the concept of design and creation of interactive educational activities, knowledge quizzes and assignments, electronic portfolios, impressive didactic presentations, new interactive forms of teaching material and other pedagogical/school documentation usable in the intent of their future teaching profession at different levels of regional education in the Slovak Republic.
By completing the educational discipline Digital Technologies 1, the student has the competences and digital skills to effectively use the tools of the SMART Notebook software application and the

SMART Lumio cloud environment by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom, or in the home conditions in the case of distance/hybrid education.
By completing the educational discipline, the student also has the competences and digital skills in the field of design and creation of mind maps through the tools of the Mindomo software application (or FreeMind, XMind) applicable in educational activities implemented in schools and educational institutions for the target group of intact pupils, as well as pupils with special educational needs in order to improve their communication skills and critical thinking.
By completing the educational discipline Digital Technologies 1, the student acquires professional digital competencies in the concept of design and creation of impressive non-linear presentations and interactive presentations of educational content implemented through the Prezi Present cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline Digital Technologies 1, the student has, last but not least, the competences and digital skills to effectively use the cloud platform Microsoft 365 with an emphasis on software applications Sway, Word and Excel by creating supplementary teaching materials for the needs of school teaching and maintaining the relevant pedagogical documentation. The student masters the basic possibilities of using the online communication platform Microsoft Teams applicable in the implementation of distance learning at the level of regional education.

Class syllabus:
The content of the educational discipline Digital Technologies 1 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the set partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.
Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.
Application of SMART Notebook software application and SMART Lumio cloud environment in the educational process
We develop professional digital competences by the ability to effectively use the tools of the SMART Notebook desktop application and the SMART Lumio cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in the lesson in the school classroom or in the home environment in the case of distance/hybrid education;
We acquire digital skills in working with the SMART response 2 tool supported by the SMART Notebook desktop application and the SMART Lumio cloud environment in the context of creating knowledge questions - selecting one correct answer from multiple answer alternatives, selecting multiple correct answers from multiple answer alternatives, selecting Yes/No answers, free-form questions - in test sessions designed to test the knowledge of pupils of regional education in the Slovak Republic;
We are mastering the methodology of applying knowledge tests communicated to students through SMART response 2 in the SMART Notebook desktop application and gamification activities supported by the cloud environment SMART Lumio to the process of school teaching of subjects at the lower/upper secondary level of education;

We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the SMART Board interactive whiteboard.
Topics:
Basic functions and calibration of the SMART Board interactive touchscreen/tablet; Symptoms, causes and solutions to some of the problems encountered when using the SMART Board interactive touchscreen/tablet; Installing and updating the SMART Notebook desktop application; Creating a teacher's virtual classroom in the SMART platform;
Creating and editing objects in the SMART Notebook environment; Using basic tools to support the presentation of processed content; Working with multimedia content from the SMART Gallery; Sharing your own content on the SMART Exchange website; Adding links to distance learning educational resources; Adding sound to objects, Animating objects; Using and sharing your own content; Applying graphic content from other software applications - importing and editing objects; Applying objects from the Lesson Activity Toolkit 2.0; Creating gamification activities in SMART Lab; SMART Response 2 - creating and administering knowledge tests/quizzes;
Principles of Gamification; Gamification Elements in Educational Content; Some Results of Exact Studies on the Application of Gamification in Education; Application of Gamification in Education in Primary and Secondary Schools; Examples of Gamification Activities Used in the Teaching of Science, Social Studies, Art, Education and Vocational Education.
Teacher/student login to SMART Lumio cloud platform account; Managing the library of learning activities; Creating gamification activities in SMART Lumio - SMART Lesson Activity Builder (Lab); Editing activities in edit mode; Making activities available to students - delivery mode; Sharing options for gamification activities;
Setting up and converting a lesson page to a Handout or Workspace activity; Working with predefined graphical activity templates for use in activating student learning, inquiring about student knowledge, or reflecting; Sharing lessons with the created educational materials with students in SMART Lumio.Within the distance assignment, the student will create a set of interactive learning/quiz activities and digital presentation material for the target group of learners with effective use of the widest possible range of tools, objects, pre-prepared templates, advanced functions, settings and features supported by the SMART Notebook authoring environment in a range of at least 10 presentation pages/activities. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.notebook format, the student shall indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the distance assignment, the student will create a set of 10 gamification educational/quiz activities for the target group of students with effective use of pre-made templates and tools of the SMART Lumio cloud environment. The condition is that each type of gamification activity should only occur once in the created set of activities. In the accompanying document (a separate file of *.docx format) to the created gamification educational/quiz activities saved by the student, the student shall indicate the methodology of their application in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a 3-page set of pre-prepared content convertible to Handout format activities and a 3-page set of pre-prepared content convertible to Workspace format activities. In the accompanying document (a separate *.docx file) for the created Handout and Workspace activities stored in the SMART Lumio cloud, the student will indicate the methodology of their application to the educational activities of the target group of students.
Creating and using mind maps in the educational process with the support of digital solutions

We develop professional digital competences by competence in the design and creation of mind maps through the tools of the software application Mindomo (or FreeMind/XMind), usable in our own educational activities implemented in schools and school facilities for the target group of intact pupils, as well as pupils with special educational needs in order to improve communication skills and critical thinking;
We are mastering the methodology of applying mind maps communicated to pupils through Mindomo (or FreeMind/XMind) to the process of school teaching of the subjects of their approbation at primary school / secondary school;
Topics:
Explanation of terminology in the field of mind/concept mapping; Desktop/cloud software applications for creating mind maps in the educational process at primary/ secondary schools; Functions and types of mind maps; Principles and principles of creating mind maps; Possibilities of using mind maps in the process of preparation for teaching and directly in the classroom; Familiarization with the user environment of the Mindomo software application (or FreeMind/ XMind);
Structuring a mind map; Inserting, editing and formatting nodes; Creating and formatting branches; Encrypted node; Editing multi-line nodes; Creating image nodes; Moving/copying nodes and groups of nodes in the map; Inserting annotations to nodes; Linking nodes with local links - independent linking of ideas; Hypertext linking of nodes to distance learning information sources - links in nodes leading to distance learning sources (web) or to local files on the local disk of the computer; Importing content into the mind map; Exporting the map to the output of different formats; Text search in the subnetwork of the current node; Mind maps and their use when working with pupils with SEN.
As part of the distance assignment, the student will design and create one mind map from any thematic area of school subject teaching in primary/elementary school. The focus of the mind map should be situated in a curricular issue of the student's own choice falling within the educational content of the teaching subject at primary/ secondary school in the intent of the approbation subjects that the student is studying in the teacher education programmes at the Faculty of Education at PdF UK. In the mind map, tools and functions of the Mindomo (or FreeMind/XMind) application environment will be applied in the intent of the complexity of the explained problem. The student will justify in a brief written form the choice of the processed content/topic in the form of a mind map, their functionality and use in his/her educational activities.
Creation of non-linear presentations of educational content through the Prezi presentation platform supporting teacher's interpretation and systematization of students' knowledge
We acquire professional digital competencies in the concept of design and creation of impressive non-linear presentations of educational content realized through the Prezi Present cloud platform Prezi applicable to our own pedagogical activities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Prezi Present to the process of school teaching of subjects of their approbation at primary school / high school;
Topics:
Introduction of the software tool Prezi Present as a presentation platform - creation of trendy, effective presentations; Explanation and clarification of the terms used in the field of creating didactic presentations in the environment of Prezi Present; Possibilities of using the presentation application Prezi Present in the preparation and creation of supporting educational materials effectively usable in the teaching of their own subject; Presentation of examples of presentations used in teaching science, social science, art-educational and vocational educational disciplines; Illustrative comparison of differences between classical (Microsoft PowerPoint) and dynamic (Prezi Present) presentations;

Theoretical background of presentation preparation and the system of selection of presented information; Basic steps of the procedure for creating didactic presentations in Prezi Present; Functionality of the online presentation tool Prezi Present; Creating dynamic presentations in Prezi Present - working with text and graphic objects; Creating topic/subtopic structures, changing the order of topics/subtopics, Creating depth and rotation effects; Inserting additional graphic visuals into a presentation in Prezi Present; Working in edit mode for main topics, subtopics and other presentation content; Creating visual effects and animations of presentation objects;
Use of templates - change the design - colors, background, fonts; Inserting audio tracks on the background of individual topics/subtopics, the whole presentation; 3D presentations; Importing and editing PowerPoint presentations in Prezi Present; Sharing presentations with other users, sharing on social networks, on web portals; Exporting presentations to *.pdf and Portable Prezi (for off-line presentation); Export options and presentation size; Working with Prezi Present in off-line mode.
Within the distance assignment, the student will use the Prezi Present presentation tool to create an original didactic and visually engaging presentation of the educational content for the target group of students. The focus of the presentation should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at the primary school / secondary school in the intent of the approbation subjects that the student is studying in the study programmes of teaching at the Faculty of Education of the Charles University. The presentation will be at least 30 presentation views (= topics at the highest hierarchical level, subtopics at lower hierarchical levels and stack structure pages) to a minimum hierarchical nesting depth of three.
Use of Microsoft 365 platform in teacher's pedagogical activity
We develop professional digital competencies in the concept of design and creation of responsive presentations with educational content and emphasis on the cloud solution Microsoft Sway usable in educational activities implemented in schools or school facilities;
We are mastering the methodology of applying the presentation of educational content communicated to pupils through Microsoft Sway to the process of school teaching of subjects of their approbation at primary school / secondary school;
We hone professional digital skills to include the ability to effectively use the range of form content controls and ActiveX elements of Microsoft Word in the creation of interactive worksheets, tests and supplementary learning materials for pupils or other classroom agenda documents usable in the context of pedagogical activity;
We are mastering the methodology of applying interactive worksheets communicated to pupils through Microsoft Word to the process of school teaching of subjects of their area of specialization at primary school / high school;
Develop professional digital skills in the creation of large documents (such as letters, invitations, labels) through a mass correspondence tool usable in the maintenance of relevant pedagogical documentation;# We develop professional digital skills in the creation of statistical calculations, compound expressions using functions for finding conditional frequency, sum, or arithmetic mean and techniques for addressing continuous and discontinuous areas in expressions/functions usable in the tabular processing of classroom data (student evaluations in knowledge or sports activities) supported by Microsoft Excel;
We hone professional competencies to include the ability to effectively apply advanced conditions and techniques for conditional formatting of table records using functions;
We extend digital skills to include the ability to effectively apply an advanced filtering tool to large tabular data by defining compound logical conditions (AND/OR), wildcards (*, ?), and a Subtotal function usable in maintaining appropriate pedagogical documentation;
Develop professional digital skills in creating cumulative graphical visualizations of tabulated data in the context of changing attributes of individual chart elements;

We apply other selected tools of the Microsoft 365 cloud platform, with an emphasis on the Microsoft Teams software application for teachers to use in conducting online learning activities.
Topics:
A basic theoretical introduction to Microsoft cloud solutions;
Sway presentation platform - creation of interactive school materials (portfolios), impressive presentations of educational content; Other possibilities of practical use of Microsoft Sway in educational activities; Concept of creating multimedia responsive presentations; Creating a new Sway, creating a Sway by importing an existing file/presentation, creating a Sway based on a template; Articulating presentation content; Options for inserting and formatting supported visuals via tabs; Grouping multimedia content; Influencing the appearance of a presentation; Changing the layout of content; Adapting specific elements to the style of a presentation; Exporting a presentation in *.pdf/*.docx; Additional options for setting up the presentation in Sway; Share Sway output from a personal Microsoft account; Share Sway output from an account assigned by the educational organization;
Editing large text documents in the Microsoft Word environment - standard settings; Using tabs; Text blocks; Columns; Objects in text - equation editor; Tables in text; Editing a document using a style; Creating your own style and editing an existing style. Document Revision. Definition of the terms section and reference and possibilities of their use; Document revision and its use in writing term papers and qualification papers; Document structuring - dividing a document into sections, types of section breaks, page settings in sections, creating a header and footer in a document divided into sections; Possibilities of using a structured document within the agenda of a teaching staff member; Creating references - automatic content creation, content setup, content formatting, numbering figures and tables, creating a list of tables and figures, footnotes and endnotes, cross-references, citations and list of references used, creating a document index; Creating templates - the importance of a template type document. Electronic forms - what are form elements and what is their difference from ActiveX elements, settings of form elements, ActiveX element and its settings, Form security; Application of the acquired experience and skills of working with Microsoft Word text editor in creating documents useful in own pedagogical activities; Creation of large documents - letters, invitations, labels - by means of the tool of mass correspondence useful in the framework of keeping the relevant pedagogical documentation.
Working with tabular data in Microsoft Excel; Inserting data into cells; Predefined and custom data format; Working with cells - moving, cutting, copying; Bulk filling of data and creating expressions/patterns; Applying elementary functions; Modifying function parameters; Modifying table appearance; Sorting tabular data; Data lists - creating custom lists; Increasing values. Rounding; Absolute and relative cell addressing; Hiding table values; Notes in cells; Working with large data - automatic and extended data filter, Subtotal function; Operations between sheets; Conditional formatting of table data; More advanced functions - If, Count, CountIf, SumIf, SumIfS, AverageIfS; Contingency table; Search functions; Creating forms.
We get familiar with the Microsoft Teams online communication platform environment; Creating Teams; Creating a pure team in MS Teams; Creating teams from an existing team and basic team customization; Creating a team from an Office 365 Group; Setting up and managing teams; Managing team members; Managing teams in bulk; Guest in a Team Class; Invitation from MS Teams; Channels; Cards; Creating your first online lesson; Creating a link to a lesson; Connecting students to an online lesson; Running a lesson with MS Teams; Preparing a lesson outline; Presenting in MS Teams; Tools available during the implementation of an online lesson on the student's/teacher's side (e.g. Conversation panel; Reporting for a word; Downloading a list of participants, etc.); Course notes - notepad; Uploading files with educational content; Creating a shared file for pupils/students in the virtual classroom; Creating a quiz; Quiz evaluation, Quiz setup.

Within the distance task, the student will design and create a document in the form of an electronic workbook in Microsoft Word using a template and applying content controls and ActiveX elements - text field, drop-down field, drop-down list, comma field, option button, command button - usable in the context of teaching subjects of his/her area of specialization at primary school / high school.
Within the framework of the distance task, the student will create a table of fictitious evaluation of pupils in the framework of knowledge or sports activities implemented in schools or school facilities in the range of at least 20 rows and 10 columns, where the functions of the Microsoft Excel spreadsheet application will be used in the context of the complexity of the explained issue.
In a distance task, the student formats a table of fictitious assessment of students in knowledge/ sport activities, applying various conditions and techniques of conditional formatting of the table entries in the intent of the difficulty of the explained problem.
In the distance task, the student will create three different graphical visualisations of the data from the table of the previous distance task, in which he/she has processed the assessments achieved in the knowledge/sport activities implemented in schools or school facilities. They will add to the graphical visualisation the title of the graph, the axis names as well as other parameters of the graph as they wish in the context of the readability of the graph.
In the distance task, the student applies an extended filter to the table from the previous distance task to display the student's name and grade attained in the context of the knowledge/sport activities undertaken in the school or school facilities and filters to another location within the same worksheet/workbook when defining specific filter conditions (e.g. grade attained below/above a set value, etc.).
Within the framework of the distance task, the student will create through the Microsoft Sway application an original, dynamic and visually impressive presentation of the learning issue for the target group of pupils according to his/her own discretion in the intent of school teaching of the subjects of his/her apprenticeship at primary school/elementary school. The aim of the presentation to be realized by the student is to make it multimedia and at the same time attractive for the target group of pupils in terms of content. The scope of the presentation in Microsoft Sway must consist of at least 25 presentation views - cards with the subject content. To organize the presentation, the student should use its layout into sections, subsections and layers in order to increase the clarity of the presented topic for the student.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex012/22	Digital technologies 2

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 3., 5., 7.

Educational level: I.

Prerequisites: PdF.KPg/B-VUZex002/22 - Digital technologies 1

Course requirements:
Prerequisites: B-VUZex002 / Digital Technologies 1
Prerequisites for successful completion of the course: the course is completed with an assessment (100% of the continuous assessment).
active participation in seminars conducted by both face-to-face and distance learning methods;
processing of partial (distance) deliverables/assignments according to the lecturer's assignment during the semester from the selected subject areas and their submission in electronic form within the set deadline, which are continuously checked and evaluated by the lecturer, constitutes 80% of the total achievable point value; Submission of partial assignments is a condition for the award of credits;
development of a semester project - at the end of the semester, the student develops through the cloud tool Prezi Video an original and visually impressive video presentation of the educational content of the selected teaching subject at primary school / secondary school in the context of the subjects that the student studies in the study programmes of teaching at the Faculty of Education of Charles University; The structure of the video presentation should be based on the presentation created in the Prezi Present software application; Personal presentation of the created project in Prezi in front of the whole study group; Successful implementation and defence of the project constitutes 20% of the total achievable point value and is a condition for the award of credits.
The rating shall be awarded on a scale of
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
For successful completion of the educational subject it is necessary to obtain at least 60 % of the score.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation

in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.
Scale of assessment (preliminary/final): 70/30

Learning outcomes:
Learning outcomes and transferable competences:
The aim of the educational discipline Digital Technologies 2 is to develop digital skills in the field of work with selected software (desktop and cloud) didactic applications and to be able to apply them effectively in the context of their future teaching profession.
By completing the educational discipline Digital Technologies 2, the student has the competences and advanced digital skills to effectively use the tools of the software application ActivInspire and the cloud environment ClassFlow by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom, or in the home conditions in the case of distance/hybrid education.
By completing the educational discipline Digital Technologies 2, the student acquires advanced professional digital competences in the concept of design and creation of interactive video presentations of educational content implemented through Prezi Present and Prezi Video cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline, the student acquires competence and advanced digital skills in the concept of design, creation and administration of (gamification) quiz and educational activities and knowledge games with dynamic elements created through the cloud tool Socrative 2.0, Kahoot!, Wizer.me and Google Forms usable in own educational activities implemented in schools and school facilities for the target group of intact pupils as well as pupils with special educational needs.
By completing the educational discipline Digital Technologies 2, the student has, last but not least, competencies and advanced digital skills in the field of vector graphic creation in the environment of the cloud application Prezi Design in the implementation of the work activities of a pedagogical employee of regional education or his/her own professional development.

Class syllabus:

Brief outline of the course

The content of the educational discipline Digital Technologies 2 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the stated partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.

Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.

Application of ActivInspire software application and ClassFlow cloud environment in the educational process

We master the principle and methodology of working with selected (Promethean World Ltd) digital didactic resources designed to support interactive teaching of subjects of its approbation in primary and secondary schools;

We develop professional digital competences by the ability to effectively use the software tools of the ActivInspire desktop application and the ClassFlow cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in a lesson in the school classroom or in home conditions in the case of distance/hybrid education; In the context of the above activity, the trainee is also expected to learn the methodology for applying the activities developed in the school classroom;

We gain knowledge about desktop digital voting solutions and (trendy) cloud-based applications for creating knowledge tests/quizzes currently available on the market as an interactive didactic means of teaching, advantages and disadvantages of their deployment in the teaching process in the field of regional education;

We acquire digital skills in creating, editing and administering knowledge tests through voting sessions and supported by the ActivInspire software application and ActivExpression2 digital voting device to stimulate pupil activation and attention in the classroom; We use the ExpressPoll voting session; we use the question creation wizard to create test activities in the teacher stimulation; we implement the work with the question set wizard for processing at the pupil's own pace (voting session in the pupil stimulation) in the teaching of the subjects of his/her apprenticeship;

We are mastering the methodology of applying the knowledge tests communicated to pupils through the ActivInspire application and the ActivExpression2 digital voting device to the process of school teaching of the subjects of their approbation in primary/ secondary schools;

Develop skills in statistically processing the results of whole group voting activities into the ActivInspire demonstration workbook, as well as exporting them to Microsoft Excel;

We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the ActivBoard interactive whiteboard.

Topics:

Design of demonstration workbooks - options for setting up and customizing the ActivInspire work environment; Main toolbar - demonstration for familiarizing yourself with the most Generally used tools - ideas for their use in creating interactive educational content; Annotation mode on the desktop; Browsers in ActivInspire; Export/Import (*.flipchart) of demonstration workbooks; Collaboration of teacher and pupil/student on the whiteboard - dual user mode;

Adding additional graphical content to the ActivInspire demonstration workbook; Importing and exporting asset packages; Defining object properties; Using layers and layering: Blind Map, Magic Tunnel, Magic Ink - ideas for using them when designing educational activities aimed at the target group of students; Adding and removing links to linked distance learning files/ internet resources; Creating and using grid features when designing educational activities; Creating interactive demonstration workbooks - creating containers; Working with actions; Suggestions for their use of selected actions in the creation of interactive materials usable in the educational process; Benefits of using profiles; Annotating the desktop; Using desktop tools; Working in dual user mode; Using mathematical and design tools; Demonstrations of the use of mathematical and design tools in the creation of interactive materials usable in the educational process;
We extend professional digital competencies with the ability to effectively apply gamification educational activities through predefined templates - Sorting into categories, Crossword, Learning Cards, Assigning and Sorting items and other templates supported by the cloud-based ClassFlow application;
Current trends in the application of digital voting solutions for education; Technological principle of digital voting systems; Possibilities of using digital voting systems in school teaching in primary schools / elementary schools ; Methodology of working with digital voting systems; Digital voting solutions - effective support of group cooperation in classrooms stimulating the learning process;
We use the ActivExpression2 digital voting system in the classroom; Components of an intelligent digital voting solution; ActivExpression2 voting device registration in ActivInspire; Voting Browser; Types of voting sessions and test questions supported by the ActivInspire software application and ActivExpression2 voting device; Working with voting session results in ActivInspire - viewing results in different formats; Exporting results from ExpressPoll from prepared questions and from a set of self-paced questions to Microsoft Excel; Suggestions for educational activities and games using ActivExpression2 voting devices to promote student activation and attention in the classroom.
Within the framework of the distance assignment, the student in the ActivInspire environment will develop a set of engaging learning activities, knowledge games, engaging presentations of educational content as new interactive forms of learning material supporting the activation and attention of students in the classroom. In conceptualising the design and development of the task, the learner will use as far as possible the widest possible range of available tools, functions, actions and features. Within a developed demonstration workbook of at least 6 pages, the student will be expected to primarily use the container activity, magic ink, magic tunnel, set actions and constraints on objects, and apply the presentation tools of the ActivInspire environment. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.flipchart format, the student will indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the framework of the distance assignment, the student will create a set of 10 gamification educational activities for the target group of students with the effective use of pre-prepared templates and tools of the ClassFlow cloud environment. In the accompanying document (a separate file of *.docx format) to the created gamification activities, the student will indicate the methodology of their integration into the educational activities of the target group of pupils.
Within the framework of the distance task, the student will create, through the ClassFlow cloud environment, a test activity conceived from 20 test questions of supported types with the potential possibility of its use in the teaching of the subjects of his/her apprenticeship to pupils at primary school / secondary school.
We create video presentations of educational content through the cloud application Prezi Video

We develop professional digital competencies in the design and creation of compelling non-linear video presentations of educational content realized through Prezi Present and Prezi Video cloud platform Prezi by expressing visual ideas applicable to our own pedagogical activities;
We are mastering the methodology of applying video presentation of educational content communicated to pupils through Prezi Video to the process of school teaching of subjects of their approbation at primary school / high school;
We innovate didactic approaches to educational activities implemented in schools or educational institutions through immersive non-linear video presentations created in the cloud platform Prezi.
Topics:
We create a video presentation in the Prezi Video online editor environment from scratch using the Quick record tool - selecting a suitable template, inserting text content and other graphic visuals; supplementing the video presentation with a recording of your own image and sound;
We create a video presentation in the Prezi Video online editor environment by offering reusable videos recorded by other Prezi Video users;
Creating a video presentation based on a Prezi Present; Adding an accompanying commentary; Adding a video with accompanying commentary.
Within the distance assignment, the student will use the cloud platform Prezi (Prezi Present and Prezi Video) to create an original didactic and visually engaging video presentation of educational content of his/her own choice for the target group of students, in a range of at least 20 presentation views, usable in teaching the subjects of his/her area of expertise at primary school/junior high school.
Application of selected Web 2.0 tools for feedback in the process of school teaching in primary schools
We use selected Web 2.0 software tools to obtain feedback from students participating in the school teaching process, in the case of students enrolled in distance (online) learning;
We are expanding the knowledge framework in the field of applying gamification (game-based learning) as one of the innovative and activating methods applied in the educational process at the primary school level;
We are expanding digital skills to include the ability to effectively use Socrative 2.0, a cloud-based application designed to create and manage knowledge/quiz activities in order to get immediate feedback from students participating in a lesson in the classroom or at home in the case of distance/ hybrid learning;
We are mastering the methodology of applying knowledge/quiz activities communicated to students through Socrative 2.0 to the process of school teaching of subjects of their area of interest in primary schools;
We extend professional digital competences with the ability to create gamification quiz activities and knowledge games through the online platform Kahoot! into the school learning process in a fun and playful way - transforming traditional knowledge testing through quizzes in an activating form using digital means;
We acquire competencies in the application of the application methodology, in the Kahoot! author-prepared, gamified educational and quiz activities to the process of school teaching of subjects of their approbation in primary school / secondary school;
We develop digital competences by the ability to effectively use the cloud tool Wizer.me for creating multimedia online worksheets with educational content for the target group of primary school pupils;
We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Wizer.me to the process of school teaching of subjects of their approbation in primary school / secondary school;

We master the principle and methodology of working with the cloud application Google Forms designed for the creation of online knowledge tests and research tools usable in the context of pedagogical activities;
Topics:
Socratvive.com - a web-based tool for online testing of student knowledge; Free registration vs. benefits of paid registration for teachers; Creating a teacher/student account; Test administration panel in Socrative 2.0 - Creating a new test - question types for creating your own tests - multiple choice, yes/no and short open answer; Managing teacher-created tests; Creating a copy of a test - a variant for a parallel group with slightly different questions; Deleting a test; Downloading a test to a document in *.pdf; Editing the created test; Importing a test from another teacher - sharing tests between teachers; Access to the results of all (already) completed tests; Modes of making the test available to pupils - instant feedback: Instatnt Feedback; Teacher-controlled test; Selecting the ways of displaying the results; Defining the appearance of the test results - a general overview of all pupils with statistics of pupil's success and questions; Separate *.Separate pdf files for each pupil; Success statistics for each test question; Practical examples of administered tests in the Socrative 2.0 environment for different educational disciplines and learning topics;
For the sake of brevity, the thematic focus of Kahoot! is analogous in content to the Socrative 2.0 application;
Cloud Computing; Google Drive; Viewing Google Docs options; Description of the Google Forms environment - Questions tab; Creating a form; Editing the appearance of the form; Setting up the form as a quiz; Evaluating the data obtained from the form administration - Answers tab; Sending the form to respondents; Setting up Google Form sharing - in Google Drive and in the Google Forms editor; Setting up Google Form sharing for a user with an un-created Google account.
As part of the distance task, the student will create a knowledge test with ten multiple choice questions, ten yes/no questions and ten short free-form questions using the online software application Socrative. The focus of the knowledge test should be situated in a curricular issue of the student's choice falling within the educational content of the subject taught at primary/ secondary school, in the context of the subjects of interest that the student is studying in the teacher education programmes at PdF UK. The knowledge test defined in this way will be implemented by the student among his/her classmates in his/her educational group.
As part of the distance assignment, the student will create a software application Kahoot! test activity made up of 20 knowledge questions of supported types. The focus of the test activity should be situated in a teaching issue of his/her own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student studies in the study programs of teaching at the Faculty of Education of the Charles University. The test activity defined in this way will be implemented by the student among the classmates of his/her educational group.
Within the distance assignment, the student will design and create an engaging multimedia worksheet with educational content for the target group of pupils in primary school / secondary school in the environment of the cloud tool Wizer.me; To the created digital graphic output (in a separate file format *.docx), the student will provide a methodology for its inclusion in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a knowledge quiz activity with a minimum of 15 questions of supported types via the Google Forms cloud application. The focus of the knowledge quiz should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at PdF UK. The knowledge quiz defined in this way will be implemented by the student among the classmates of his/her educational group.

Creation of digital graphic outputs in the environment of selected cloud applications
Acquire digital competences by the ability to effectively use the Prezi Design cloud tool of the Prezi cloud platform to create multimedia posters with educational content intended for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;
We develop digital competences by the ability to effectively use the cloud tool Glogster (edu.Glogster.com) for digital storytelling - creating engaging multimedia posters with educational content - designed for the target group of pupils in primary/ secondary schools by expressing their own visual ideas;
We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Prezi Design and Glogster to the school teaching of subjects that the student studies in the study programs of teaching at the Faculty of Education at Charles University.
Topics:
Prezi Design as a comprehensive graphic design and data visualization tool; Template library; Creating and editing content by adding multimedia items in the editor; Adding, moving and layering objects; Using *.ppt, *.pdf and *.doc in Prezi Design; Implementing animated elements into the graphic content you create; Creating visual effects to images by applying masks and filters; Adding links to text objects, graphics and shapes; Multi-page design; Linking text, images, icons and shapes to pages and sections; Sharing content created in Prezi Design with your audience on social media using private or public links; Collaborating in the Prezi Design environment; Adding/removing collaborators; Adding an entire team of collaborators; Collaborating in real time;
Creating and editing engaging data visualizations using maps; Creating a social post - adding and editing content, adding animation to the content of the post being created; Downloading and sharing the created content for publishing purposes;
Creating infographics for visual representation of information and data, Adding and editing content; Creating gif and mp4 videos in the Prezi Design environment; Embedding videos from Prezi Video into Prezi Design; Adding videos to Prezi Design and editing settings; Media integrations in Prezi Design - adding content from Prezi Video to projects.
Within the distance assignment, the student will design and create in the environment of the cloud tool Prezi Design an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects, which the student studies in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.
Within the distance task, the student will design and create in the cloud tool edu.Glogster an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education of the
Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.

Learning outcomes and transferable competences:
The aim of the educational discipline Digital Technologies 2 is to develop digital skills in the field of work with selected software (desktop and cloud) didactic applications and to be able to apply them effectively in the context of their future teaching profession.
By completing the educational discipline Digital Technologies 2, the student has the competences and advanced digital skills to effectively use the tools of the software application ActivInspire and the cloud environment ClassFlow by creating gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of students participating in the lesson in the school classroom, or in the home conditions in the case of distance/hybrid education.
By completing the educational discipline Digital Technologies 2, the student acquires advanced professional digital competences in the concept of design and creation of interactive video presentations of educational content implemented through Prezi Present and Prezi Video cloud platform Prezi by expressing their own visual ideas usable in their own pedagogical activities in schools or educational institutions.
By completing the educational discipline, the student acquires competence and advanced digital skills in the concept of design, creation and administration of (gamification) quiz and educational activities and knowledge games with dynamic elements created through the cloud tool Socrative 2.0, Kahoot!, Wizer.me and Google Forms usable in own educational activities implemented in schools and school facilities for the target group of intact pupils as well as pupils with special educational needs.
By completing the educational discipline Digital Technologies 2, the student has, last but not least, competencies and advanced digital skills in the field of vector graphic creation in the environment of the cloud application Prezi Design in the implementation of the work activities of a pedagogical employee of regional education or his/her own professional development.

Class syllabus:

Brief outline of the course

The content of the educational discipline Digital Technologies 2 is divided into four thematic headings and relevant sub-topics in order to ensure the achievement of the stated partial educational objectives. The content structure of the educational discipline is designed so that the student continuously develops his didactic-technological competences in the field of selected didactic software applications by completing the educational topics organized in the present and distance form and at the same time strengthens his professional training in the subject area.

Due to the rapid development of new didactic software usable in the pedagogical process, the specific content structure of the discipline can be adapted to the current requirements of practice and students.

Application of ActivInspire software application and ClassFlow cloud environment in the educational process

We master the principle and methodology of working with selected (Promethean World Ltd) digital didactic resources designed to support interactive teaching of subjects of its approbation in primary and secondary schools;

We develop professional digital competences by the ability to effectively use the software tools of the ActivInspire desktop application and the ClassFlow cloud environment through the creation of gamification educational/quiz activities, engaging presentations of educational content and new interactive forms of learning material supporting the activation and attention of pupils (including pupils with special educational needs) participating in a lesson in the school classroom or in home conditions in the case of distance/hybrid education; In the context of the above activity, the trainee is also expected to learn the methodology for applying the activities developed in the school classroom;

We gain knowledge about desktop digital voting solutions and (trendy) cloud-based applications for creating knowledge tests/quizzes currently available on the market as an interactive didactic means of teaching, advantages and disadvantages of their deployment in the teaching process in the field of regional education;

We acquire digital skills in creating, editing and administering knowledge tests through voting sessions and supported by the ActivInspire software application and ActivExpression2 digital voting device to stimulate pupil activation and attention in the classroom; We use the ExpressPoll voting session; we use the question creation wizard to create test activities in the teacher stimulation; we implement the work with the question set wizard for processing at the pupil's own pace (voting session in the pupil stimulation) in the teaching of the subjects of his/her apprenticeship;

We are mastering the methodology of applying the knowledge tests communicated to pupils through the ActivInspire application and the ActivExpression2 digital voting device to the process of school teaching of the subjects of their approbation in primary/ secondary schools;

Develop skills in statistically processing the results of whole group voting activities into the ActivInspire demonstration workbook, as well as exporting them to Microsoft Excel;

We strengthen professional digital competences in the area of working with complex interactive solutions usable in educational situations with an emphasis on the ActivBoard interactive whiteboard.

Topics:

Design of demonstration workbooks - options for setting up and customizing the ActivInspire work environment; Main toolbar - demonstration for familiarizing yourself with the most Generally used tools - ideas for their use in creating interactive educational content; Annotation mode on the desktop; Browsers in ActivInspire; Export/Import (*.flipchart) of demonstration workbooks; Collaboration of teacher and pupil/student on the whiteboard - dual user mode;

Adding additional graphical content to the ActivInspire demonstration workbook; Importing and exporting asset packages; Defining object properties; Using layers and layering: Blind Map, Magic Tunnel, Magic Ink - ideas for using them when designing educational activities aimed at the target group of students; Adding and removing links to linked distance learning files/ internet resources; Creating and using grid features when designing educational activities; Creating interactive demonstration workbooks - creating containers; Working with actions; Suggestions for their use of selected actions in the creation of interactive materials usable in the educational process; Benefits of using profiles; Annotating the desktop; Using desktop tools; Working in dual user mode; Using mathematical and design tools; Demonstrations of the use of mathematical and design tools in the creation of interactive materials usable in the educational process;
We extend professional digital competencies with the ability to effectively apply gamification educational activities through predefined templates - Sorting into categories, Crossword, Learning Cards, Assigning and Sorting items and other templates supported by the cloud-based ClassFlow application;
Current trends in the application of digital voting solutions for education; Technological principle of digital voting systems; Possibilities of using digital voting systems in school teaching in primary schools / elementary schools ; Methodology of working with digital voting systems; Digital voting solutions - effective support of group cooperation in classrooms stimulating the learning process;
We use the ActivExpression2 digital voting system in the classroom; Components of an intelligent digital voting solution; ActivExpression2 voting device registration in ActivInspire; Voting Browser; Types of voting sessions and test questions supported by the ActivInspire software application and ActivExpression2 voting device; Working with voting session results in ActivInspire - viewing results in different formats; Exporting results from ExpressPoll from prepared questions and from a set of self-paced questions to Microsoft Excel; Suggestions for educational activities and games using ActivExpression2 voting devices to promote student activation and attention in the classroom.
Within the framework of the distance assignment, the student in the ActivInspire environment will develop a set of engaging learning activities, knowledge games, engaging presentations of educational content as new interactive forms of learning material supporting the activation and attention of students in the classroom. In conceptualising the design and development of the task, the learner will use as far as possible the widest possible range of available tools, functions, actions and features. Within a developed demonstration workbook of at least 6 pages, the student will be expected to primarily use the container activity, magic ink, magic tunnel, set actions and constraints on objects, and apply the presentation tools of the ActivInspire environment. In the accompanying document (a separate file of *.docx format) to the created presentation materials and educational activities stored in *.flipchart format, the student will indicate the methodology of their inclusion in the educational activities of the target group of pupils.
Within the framework of the distance assignment, the student will create a set of 10 gamification educational activities for the target group of students with the effective use of pre-prepared templates and tools of the ClassFlow cloud environment. In the accompanying document (a separate file of *.docx format) to the created gamification activities, the student will indicate the methodology of their integration into the educational activities of the target group of pupils.
Within the framework of the distance task, the student will create, through the ClassFlow cloud environment, a test activity conceived from 20 test questions of supported types with the potential possibility of its use in the teaching of the subjects of his/her apprenticeship to pupils at primary school / secondary school.
We create video presentations of educational content through the cloud application Prezi Video

We develop professional digital competencies in the design and creation of compelling non-linear video presentations of educational content realized through Prezi Present and Prezi Video cloud platform Prezi by expressing visual ideas applicable to our own pedagogical activities;
We are mastering the methodology of applying video presentation of educational content communicated to pupils through Prezi Video to the process of school teaching of subjects of their approbation at primary school / high school;
We innovate didactic approaches to educational activities implemented in schools or educational institutions through immersive non-linear video presentations created in the cloud platform Prezi.
Topics:
We create a video presentation in the Prezi Video online editor environment from scratch using the Quick record tool - selecting a suitable template, inserting text content and other graphic visuals; supplementing the video presentation with a recording of your own image and sound;
We create a video presentation in the Prezi Video online editor environment by offering reusable videos recorded by other Prezi Video users;
Creating a video presentation based on a Prezi Present; Adding an accompanying commentary; Adding a video with accompanying commentary.
Within the distance assignment, the student will use the cloud platform Prezi (Prezi Present and Prezi Video) to create an original didactic and visually engaging video presentation of educational content of his/her own choice for the target group of students, in a range of at least 20 presentation views, usable in teaching the subjects of his/her area of expertise at primary school/junior high school.
Application of selected Web 2.0 tools for feedback in the process of school teaching in primary schools
We use selected Web 2.0 software tools to obtain feedback from students participating in the school teaching process, in the case of students enrolled in distance (online) learning;
We are expanding the knowledge framework in the field of applying gamification (game-based learning) as one of the innovative and activating methods applied in the educational process at the primary school level;
We are expanding digital skills to include the ability to effectively use Socrative 2.0, a cloud-based application designed to create and manage knowledge/quiz activities in order to get immediate feedback from students participating in a lesson in the classroom or at home in the case of distance/ hybrid learning;
We are mastering the methodology of applying knowledge/quiz activities communicated to students through Socrative 2.0 to the process of school teaching of subjects of their area of interest in primary schools;
We extend professional digital competences with the ability to create gamification quiz activities and knowledge games through the online platform Kahoot! into the school learning process in a fun and playful way - transforming traditional knowledge testing through quizzes in an activating form using digital means;
We acquire competencies in the application of the application methodology, in the Kahoot! author-prepared, gamified educational and quiz activities to the process of school teaching of subjects of their approbation in primary school / secondary school;
We develop digital competences by the ability to effectively use the cloud tool Wizer.me for creating multimedia online worksheets with educational content for the target group of primary school pupils;
We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Wizer.me to the process of school teaching of subjects of their approbation in primary school / secondary school;

We master the principle and methodology of working with the cloud application Google Forms designed for the creation of online knowledge tests and research tools usable in the context of pedagogical activities;
Topics:
Socratvive.com - a web-based tool for online testing of student knowledge; Free registration vs. benefits of paid registration for teachers; Creating a teacher/student account; Test administration panel in Socrative 2.0 - Creating a new test - question types for creating your own tests - multiple choice, yes/no and short open answer; Managing teacher-created tests; Creating a copy of a test - a variant for a parallel group with slightly different questions; Deleting a test; Downloading a test to a document in *.pdf; Editing the created test; Importing a test from another teacher - sharing tests between teachers; Access to the results of all (already) completed tests; Modes of making the test available to pupils - instant feedback: Instatnt Feedback; Teacher-controlled test; Selecting the ways of displaying the results; Defining the appearance of the test results - a general overview of all pupils with statistics of pupil's success and questions; Separate *.Separate pdf files for each pupil; Success statistics for each test question; Practical examples of administered tests in the Socrative 2.0 environment for different educational disciplines and learning topics;
For the sake of brevity, the thematic focus of Kahoot! is analogous in content to the Socrative 2.0 application;
Cloud Computing; Google Drive; Viewing Google Docs options; Description of the Google Forms environment - Questions tab; Creating a form; Editing the appearance of the form; Setting up the form as a quiz; Evaluating the data obtained from the form administration - Answers tab; Sending the form to respondents; Setting up Google Form sharing - in Google Drive and in the Google Forms editor; Setting up Google Form sharing for a user with an un-created Google account.
As part of the distance task, the student will create a knowledge test with ten multiple choice questions, ten yes/no questions and ten short free-form questions using the online software application Socrative. The focus of the knowledge test should be situated in a curricular issue of the student's choice falling within the educational content of the subject taught at primary/ secondary school, in the context of the subjects of interest that the student is studying in the teacher education programmes at PdF UK. The knowledge test defined in this way will be implemented by the student among his/her classmates in his/her educational group.
As part of the distance assignment, the student will create a software application Kahoot! test activity made up of 20 knowledge questions of supported types. The focus of the test activity should be situated in a teaching issue of his/her own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student studies in the study programs of teaching at the Faculty of Education of the Charles University. The test activity defined in this way will be implemented by the student among the classmates of his/her educational group.
Within the distance assignment, the student will design and create an engaging multimedia worksheet with educational content for the target group of pupils in primary school / secondary school in the environment of the cloud tool Wizer.me; To the created digital graphic output (in a separate file format *.docx), the student will provide a methodology for its inclusion in the educational activities of the target group of pupils.
As part of the distance learning assignment, the student will create a knowledge quiz activity with a minimum of 15 questions of supported types via the Google Forms cloud application. The focus of the knowledge quiz should be situated in a teaching issue of the student's own choice falling within the educational content of the teaching subject at primary school / high school in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education at PdF UK. The knowledge quiz defined in this way will be implemented by the student among the classmates of his/her educational group.

Creation of digital graphic outputs in the environment of selected cloud applications
Acquire digital competences by the ability to effectively use the Prezi Design cloud tool of the Prezi cloud platform to create multimedia posters with educational content intended for the target group of pupils in primary schools / secondary schools by expressing their own visual ideas;
We develop digital competences by the ability to effectively use the cloud tool Glogster (edu.Glogster.com) for digital storytelling - creating engaging multimedia posters with educational content - designed for the target group of pupils in primary/ secondary schools by expressing their own visual ideas;
We are mastering the methodology of applying the processed digital graphic outputs of educational content communicated to students through the cloud tool Prezi Design and Glogster to the school teaching of subjects that the student studies in the study programs of teaching at the Faculty of Education at Charles University.
Topics:
Prezi Design as a comprehensive graphic design and data visualization tool; Template library; Creating and editing content by adding multimedia items in the editor; Adding, moving and layering objects; Using *.ppt, *.pdf and *.doc in Prezi Design; Implementing animated elements into the graphic content you create; Creating visual effects to images by applying masks and filters; Adding links to text objects, graphics and shapes; Multi-page design; Linking text, images, icons and shapes to pages and sections; Sharing content created in Prezi Design with your audience on social media using private or public links; Collaborating in the Prezi Design environment; Adding/removing collaborators; Adding an entire team of collaborators; Collaborating in real time;
Creating and editing engaging data visualizations using maps; Creating a social post - adding and editing content, adding animation to the content of the post being created; Downloading and sharing the created content for publishing purposes;
Creating infographics for visual representation of information and data, Adding and editing content; Creating gif and mp4 videos in the Prezi Design environment; Embedding videos from Prezi Video into Prezi Design; Adding videos to Prezi Design and editing settings; Media integrations in Prezi Design - adding content from Prezi Video to projects.
Within the distance assignment, the student will design and create in the environment of the cloud tool Prezi Design an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects, which the student studies in the study programs of teaching at the Faculty of Education of the Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.
Within the distance task, the student will design and create in the cloud tool edu.Glogster an engaging digital poster with multiMedial educational content usable in teaching in the intent of the approbation subjects that the student is studying in the study programs of teaching at the Faculty of Education of the
Charles University; To the created digital graphic output (in a special file format *.docx) the student will provide a methodology for its inclusion in the educational activities of the target group of students.

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 31 hours of ongoing preparation for individual classes with application of specific assignments, including reading of literary texts for individual classes; 16 hours of preparation for presentation of a written final interpretation based on selected textual segments from the work of the author studied, with emphasis on application of acquired knowledge of the author's specific poetics, on analytical-interpretive skills, and on defending one's arguments. A total of 60 hours of student work.
Teaching methods: interpretation, inductive-generalizing conversation, discussion, demonstration and analysis of concrete examples, analytical and interpretative work with the text, group work, problem-based tasks, guided self-study, e-learning

Number of credits: 2

Recommended semester: 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous reading of literary texts and completion of assignments in seminars on the theoretical knowledge and practical skills needed when working with literary texts in the educational process (60 points);
• presentation of a written final interpretation based on selected textual segments from the work of the read author, with emphasis on the application of the acquired knowledge of the author's specific poetics, analytical-interpretive skills and on the defence of one's arguments (40 points).
The course is completed with a grade resulting from the continuous monitoring of learning outcomes during the teaching part of the semester of study (100/0).
To pass the course, a minimum of 60 % of the points must be obtained (at least 60 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E. Credit will not be awarded to a student who scores less than 60 % on any component of the assessment (assignments: less than 36 points; final interpretation: less than 24 points).

A (100 - 93 %, excellent - outstanding): excellent performance: The student has an excellent knowledge of the basic theoretical background related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and young people and of relevant works of literature for children and young people promoting pro-social, environmental and intercultural education of children and young people to the extent required, logically organises the facts presented in a flawless manner, can apply and adapt the acquired knowledge at an excellent level in specific approaches to literary texts applicable to the teaching of literature in school practice, has the ability to creatively solve individual tasks and assignments independently and imaginatively, also in a broader literary, cultural and social context, the linguistic and stylistic level of his/her speech is excellent, has well-developed skills for independent further learning;
B (92 - 85 %, very good - above average standard): very good performance: The student has a very good knowledge of the basic theoretical background related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and young people and of relevant works of literature for children and young people promoting pro-social, environmental and intercultural education of children and young people to the required extent, arranges the facts presented logically, with only minor errors, can apply and adapt the acquired knowledge very well in specific approaches to literary texts applicable to the teaching of literature in school practice, has the ability to independently solve individual tasks and assignments also in a broader literary, cultural and social context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: The student has a good understanding of the basic theoretical foundations associated with the development of cognitive, communicative, interpersonal and intrapersonal competencies through children's and young people's literature and of relevant works of children's and young people's literature promoting pro-social, environmental and intercultural education for children and young people to the required extent, arranges the presented facts appropriately and makes errors only in places, can reliably apply and adapt the acquired knowledge in concrete approaches to literary texts applicable to the teaching of literature in school practice, can reliably solve individual tasks and assignments independently, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: The student has satisfactory knowledge of the basic theoretical foundations associated with the development of cognitive, communicative, interpersonal and intrapersonal competencies through children's and young adult literature and of relevant works of children's and young adult literature promoting pro-social, environmental and intercultural education of children and young adults to the extent required, demonstrates some deficiencies in the organisation of facts, can satisfactorily apply the acquired knowledge in specific approaches to literary texts applicable to the teaching of literature in school practice, satisfactorily and predominantly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: The student demonstrates a minimum amount of knowledge of the basic theoretical foundations associated with the development of cognitive, communicative, interpersonal, and intrapersonal competencies through children's and young adult literature and relevant works of literature for children and young adults promoting prosocial, environmental and intercultural education of children and youth in the required scope and significant deficiencies in the organization of facts, can minimally apply the acquired knowledge in specific approaches to literary text usable in the teaching of literature in school practice, with significant help at a sufficient level to solve individual tasks and assignments, has minimal learning skills;

Fx (59 - 0 %, insufficient - additional work required): insufficient performance: The student does not demonstrate sufficient knowledge of the basic theoretical foundations associated with developing cognitive, communicative, interpersonal, and intrapersonal competencies through children's and young adult literature and relevant works of literature for children and young adults promoting prosocial, environmental and intercultural education of children and youth in the required scope, does not know the facts and their logical connections, cannot apply the acquired knowledge in specific approaches to literary texts applicable in teaching literature in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student has knowledge of the basic theoretical foundations related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and youth and relevant works of literature for children and youth supporting pro-social, environmental and intercultural education of children and youth, and is aware of their importance in the development of the pupil's value system. Is able to assess the value and artistic contribution of a literary work also in a social context. Can creatively and independently analyse and interpret literary texts, characterise the poeological and value specifics of the work of individual authors. Has acquired analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts, understands the specifics and artistic value of selected literary texts, can actively seek new possibilities in the approach to a literary text in which he/she can conceptually, inventively and effectively use literature to develop cognitive, communicative, social and personal competences of a child/young person. Can also work with a variety of possible interpretations of the text in school practice. As a result of the analytical and critical approach to the literary text, the student's transferable competences are developed, because especially in the analytical-interpretive part, critical thinking, thinking in context, developing communicative and digital competences are emphasised, on the basis of which the student is able to solve specific tasks as well as to construct his/her own interpretations of literary texts. The student is prepared to readily perceive interpretations of literature in the following years of his/her studies. By solving problem-based tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further bachelor's and then master's studies, but also to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Intercultural education through literature for children and youth. European projects on intercultural education through children's books (e.g. BARFIE - Books and Reading for Intercultural Education, EPBC - European Picture Book Collection, etc.). Children's literature as a means of teaching a foreign language.
2. Pro-social education through children's fiction. The thematization of outsiderism. Education for empathy, tolerance and acceptance of differences determined by generational and social differences.
3. The thematisation of outsiderism. Education for empathy, tolerance and acceptance of differences that are determined by disabilities, racial, ethnic, religious, etc.

4. Socialisation (acquisition of social values and norms of behaviour) and personalisation of the child (encouraging the child's personal development as an individual) through literature for children and young people. The thematisation of the family in literature for children and young people as a space of positive emotional background, but also as a space of social and emotional destabilisation of the child.
5. The thematization of incomplete families and child upbringing without biological parents (substitute form of upbringing and care for children - orphanages, adoption, fostering) in literature for children and youth.
6. The thematization of friendship in literature for children and youth as a space of positive emotional background.
7. Socialization of the child in the environment of institutional school education. The thematization of socio-pathological phenomena in the school and out-of-school environment (bullying, truancy) in literature for children and youth.
8. The thematisation of socio-pathological phenomena (alcohol use, smoking, drug experimentation) in literature for children and youth.
9. Environmental education through children's fiction. Developing a positive emotional relationship with the natural environment. The thematisation of specific environmental issues in children's fiction.
10. Self-oriented fiction and non-fiction texts for children and youth. Familiarising children with folk culture, cultivating a relationship to traditions and folk customs. Promoting pride in specific historical events and facts, significant personalities of national, cultural and social life.
11. Formation of a cultured and cultivated reader. Cognitive and noncognitive prerequisites for the formation of literary culture. Synesthetic approach to the literary text. Projects developing the cultivated child reader (Reading Room, etc.).
The curriculum of the course covers a spectrum of cross-sectional and specialized knowledge, which also builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will acquire knowledge concerning the basic theoretical background related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and youth and about relevant works of literature for children and youth promoting pro-social, environmental, intercultural and patriotic education of children and youth. Special emphasis will be placed on the thematization of outsiderism and its overcoming through empathy, tolerance and acceptance of differences, on the thematization of the complete and incomplete family, on friendship as an additional space of positive emotional background, on the thematization of socio-pathological phenomena in both school and out-of-school environments. Emphasis will be placed not only on the acquisition of social values and norms of behaviour (socialisation), but also on stimulating the personal development of the child/young person as an individual (personalisation). The student will learn about the cognitive and non-cognitive prerequisites for the formation of a literary culture, and will be familiar with projects that develop a cultivated child reader (e.g. the Reading Room project). The student will use the acquired knowledge appropriately when working with selected textual material. The student will be able to use literature conceptually, inventively and effectively to develop the cognitive, communicative, social and personal competences of the child/young person in which literature can serve in the development of the student's value system. The student will also be able to assess the value and artistic contribution of a literary work in a social context. The student will be able to justify and apply various methodological approaches to literary analysis and interpretation, and to use the experience of an artistic text in his/her own individual (reception and production) activity. He/she will develop his/her analytical skills with emphasis on independent and creative work. On the basis of the knowledge and skills acquired, he/she will be able to apply analytical-interpretive competencies

to other literary texts, to point out the interrelationships between them, and to reflect on new possibilities of literary analysis and interpretation. The student will also be oriented in the related practical and methodological knowledge that will be a prerequisite for his/her proper understanding of literary communication in the wider international context and the past in the courses of the continuing Master's degree. The student will acquire a base of knowledge and skills which he/she will deepen and develop in further bachelor's and subsequently master's studies, he/she will be able to use them and creatively apply them in the school environment in the position of a pedagogical assistant, later on for the analysis and selection of didactic materials from literature for children and youth with regard to teaching objectives, and possibly also for the needs of the publishing environment in the position of a text proofreader. The student will be guided to actively acquire information and effectively use cross-cutting and specialized knowledge, consolidate and develop his/her ability to formulate and defend arguments, and will be able to communicate theoretical knowledge and practical skills to a wider and lay public. An analytical and critical approach to a literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate in solving specific assignments as well as in constructing his/her own final interpretation. The student will creatively use appropriate and discipline-appropriate methods in solving problem-based assignments. Acquire the prerequisites and motivation to develop the skills necessary for further learning and to encourage students to actively acquire literary and historical knowledge. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, to plan and be actively responsible for his/her own learning, to develop and consolidate a sense of socially responsible action and pluralistic civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex026/22	Education through literature

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 6s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 31 hours of ongoing preparation for individual classes with application of specific assignments, including reading of literary texts for individual classes; 16 hours of preparation for presentation of a written final interpretation based on selected textual segments from the work of the author studied, with emphasis on application of acquired knowledge of the author's specific poetics, on analytical-interpretive skills, and on defending one's arguments. A total of 60 hours of student work.
Teaching methods: interpretation, inductive-generalizing conversation, discussion, demonstration and analysis of concrete examples, analytical and interpretative work with the text, group work, problem-based tasks, guided self-study, e-learning

Number of credits: 2

Recommended semester: 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous reading of literary texts and completion of assignments in seminars on the theoretical knowledge and practical skills needed when working with literary texts in the educational process (60 points);
• presentation of a written final interpretation based on selected textual segments from the work of the read author, with emphasis on the application of the acquired knowledge of the author's specific poetics, analytical-interpretive skills and on the defence of one's arguments (40 points).
The course is completed with a grade resulting from the continuous monitoring of learning outcomes during the teaching part of the semester of study (100/0).
To pass the course, a minimum of 60 % of the points must be obtained (at least 60 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E. Credit will not be awarded to a student who scores less than 60 % on any component of the assessment (assignments: less than 36 points; final interpretation: less than 24 points).

A (100 - 93 %, excellent - outstanding): excellent performance: The student has an excellent knowledge of the basic theoretical background related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and young people and of relevant works of literature for children and young people promoting pro-social, environmental and intercultural education of children and young people to the extent required, logically organises the facts presented in a flawless manner, can apply and adapt the acquired knowledge at an excellent level in specific approaches to literary texts applicable to the teaching of literature in school practice, has the ability to creatively solve individual tasks and assignments independently and imaginatively, also in a broader literary, cultural and social context, the linguistic and stylistic level of his/her speech is excellent, has well-developed skills for independent further learning;
B (92 - 85 %, very good - above average standard): very good performance: The student has a very good knowledge of the basic theoretical background related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and young people and of relevant works of literature for children and young people promoting pro-social, environmental and intercultural education of children and young people to the required extent, arranges the facts presented logically, with only minor errors, can apply and adapt the acquired knowledge very well in specific approaches to literary texts applicable to the teaching of literature in school practice, has the ability to independently solve individual tasks and assignments also in a broader literary, cultural and social context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: The student has a good understanding of the basic theoretical foundations associated with the development of cognitive, communicative, interpersonal and intrapersonal competencies through children's and young people's literature and of relevant works of children's and young people's literature promoting pro-social, environmental and intercultural education for children and young people to the required extent, arranges the presented facts appropriately and makes errors only in places, can reliably apply and adapt the acquired knowledge in concrete approaches to literary texts applicable to the teaching of literature in school practice, can reliably solve individual tasks and assignments independently, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: The student has satisfactory knowledge of the basic theoretical foundations associated with the development of cognitive, communicative, interpersonal and intrapersonal competencies through children's and young adult literature and of relevant works of children's and young adult literature promoting pro-social, environmental and intercultural education of children and young adults to the extent required, demonstrates some deficiencies in the organisation of facts, can satisfactorily apply the acquired knowledge in specific approaches to literary texts applicable to the teaching of literature in school practice, satisfactorily and predominantly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: The student demonstrates a minimum amount of knowledge of the basic theoretical foundations associated with the development of cognitive, communicative, interpersonal, and intrapersonal competencies through children's and young adult literature and relevant works of literature for children and young adults promoting prosocial, environmental and intercultural education of children and youth in the required scope and significant deficiencies in the organization of facts, can minimally apply the acquired knowledge in specific approaches to literary text usable in the teaching of literature in school practice, with significant help at a sufficient level to solve individual tasks and assignments, has minimal learning skills;

Fx (59 - 0 %, insufficient - additional work required): insufficient performance: The student does not demonstrate sufficient knowledge of the basic theoretical foundations associated with developing cognitive, communicative, interpersonal, and intrapersonal competencies through children's and young adult literature and relevant works of literature for children and young adults promoting prosocial, environmental and intercultural education of children and youth in the required scope, does not know the facts and their logical connections, cannot apply the acquired knowledge in specific approaches to literary texts applicable in teaching literature in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student has knowledge of the basic theoretical foundations related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and youth and relevant works of literature for children and youth supporting pro-social, environmental and intercultural education of children and youth, and is aware of their importance in the development of the pupil's value system. Is able to assess the value and artistic contribution of a literary work also in a social context. Can creatively and independently analyse and interpret literary texts, characterise the poeological and value specifics of the work of individual authors. Has acquired analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts, understands the specifics and artistic value of selected literary texts, can actively seek new possibilities in the approach to a literary text in which he/she can conceptually, inventively and effectively use literature to develop cognitive, communicative, social and personal competences of a child/young person. Can also work with a variety of possible interpretations of the text in school practice. As a result of the analytical and critical approach to the literary text, the student's transferable competences are developed, because especially in the analytical-interpretive part, critical thinking, thinking in context, developing communicative and digital competences are emphasised, on the basis of which the student is able to solve specific tasks as well as to construct his/her own interpretations of literary texts. The student is prepared to readily perceive interpretations of literature in the following years of his/her studies. By solving problem-based tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further bachelor's and then master's studies, but also to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Intercultural education through literature for children and youth. European projects on intercultural education through children's books (e.g. BARFIE - Books and Reading for Intercultural Education, EPBC - European Picture Book Collection, etc.). Children's literature as a means of teaching a foreign language.
2. Pro-social education through children's fiction. The thematization of outsiderism. Education for empathy, tolerance and acceptance of differences determined by generational and social differences.
3. The thematisation of outsiderism. Education for empathy, tolerance and acceptance of differences that are determined by disabilities, racial, ethnic, religious, etc.

4. Socialisation (acquisition of social values and norms of behaviour) and personalisation of the child (encouraging the child's personal development as an individual) through literature for children and young people. The thematisation of the family in literature for children and young people as a space of positive emotional background, but also as a space of social and emotional destabilisation of the child.
5. The thematization of incomplete families and child upbringing without biological parents (substitute form of upbringing and care for children - orphanages, adoption, fostering) in literature for children and youth.
6. The thematization of friendship in literature for children and youth as a space of positive emotional background.
7. Socialization of the child in the environment of institutional school education. The thematization of socio-pathological phenomena in the school and out-of-school environment (bullying, truancy) in literature for children and youth.
8. The thematisation of socio-pathological phenomena (alcohol use, smoking, drug experimentation) in literature for children and youth.
9. Environmental education through children's fiction. Developing a positive emotional relationship with the natural environment. The thematisation of specific environmental issues in children's fiction.
10. Self-oriented fiction and non-fiction texts for children and youth. Familiarising children with folk culture, cultivating a relationship to traditions and folk customs. Promoting pride in specific historical events and facts, significant personalities of national, cultural and social life.
11. Formation of a cultured and cultivated reader. Cognitive and noncognitive prerequisites for the formation of literary culture. Synesthetic approach to the literary text. Projects developing the cultivated child reader (Reading Room, etc.).
The curriculum of the course covers a spectrum of cross-sectional and specialized knowledge, which also builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will acquire knowledge concerning the basic theoretical background related to the development of cognitive, communicative, interpersonal and intrapersonal competences through literature for children and youth and about relevant works of literature for children and youth promoting pro-social, environmental, intercultural and patriotic education of children and youth. Special emphasis will be placed on the thematization of outsiderism and its overcoming through empathy, tolerance and acceptance of differences, on the thematization of the complete and incomplete family, on friendship as an additional space of positive emotional background, on the thematization of socio-pathological phenomena in both school and out-of-school environments. Emphasis will be placed not only on the acquisition of social values and norms of behaviour (socialisation), but also on stimulating the personal development of the child/young person as an individual (personalisation). The student will learn about the cognitive and non-cognitive prerequisites for the formation of a literary culture, and will be familiar with projects that develop a cultivated child reader (e.g. the Reading Room project). The student will use the acquired knowledge appropriately when working with selected textual material. The student will be able to use literature conceptually, inventively and effectively to develop the cognitive, communicative, social and personal competences of the child/young person in which literature can serve in the development of the student's value system. The student will also be able to assess the value and artistic contribution of a literary work in a social context. The student will be able to justify and apply various methodological approaches to literary analysis and interpretation, and to use the experience of an artistic text in his/her own individual (reception and production) activity. He/she will develop his/her analytical skills with emphasis on independent and creative work. On the basis of the knowledge and skills acquired, he/she will be able to apply analytical-interpretive competencies

to other literary texts, to point out the interrelationships between them, and to reflect on new possibilities of literary analysis and interpretation. The student will also be oriented in the related practical and methodological knowledge that will be a prerequisite for his/her proper understanding of literary communication in the wider international context and the past in the courses of the continuing Master's degree. The student will acquire a base of knowledge and skills which he/she will deepen and develop in further bachelor's and subsequently master's studies, he/she will be able to use them and creatively apply them in the school environment in the position of a pedagogical assistant, later on for the analysis and selection of didactic materials from literature for children and youth with regard to teaching objectives, and possibly also for the needs of the publishing environment in the position of a text proofreader. The student will be guided to actively acquire information and effectively use cross-cutting and specialized knowledge, consolidate and develop his/her ability to formulate and defend arguments, and will be able to communicate theoretical knowledge and practical skills to a wider and lay public. An analytical and critical approach to a literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate in solving specific assignments as well as in constructing his/her own final interpretation. The student will creatively use appropriate and discipline-appropriate methods in solving problem-based assignments. Acquire the prerequisites and motivation to develop the skills necessary for further learning and to encourage students to actively acquire literary and historical knowledge. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, to plan and be actively responsible for his/her own learning, to develop and consolidate a sense of socially responsible action and pluralistic civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex037/22	Educational counselling

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 1., 3., 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment, 100% of the interim assessment. Students are required to complete a midterm paper for 40 points and a midterm test for 60 points, for a total of 100 points. The condition for successful completion of the course is obtaining at least 60% of the maximum possible grade for the course. The grade is awarded on a scale:
The rating is awarded on a scale:
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.

A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to prepare continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation in the subject matter, basic communication skills, completion of the assigned tasks.

Learning outcomes:
Learning outcomes and transferable competences:
Learning objectives and outcomes:
The aim of the course Educational Counselling is to provide students with an initial framework of knowledge in the field of the educational counselling system. Upon successful completion of the course, students will be able to navigate the school counseling system. They understand the place and role of the guidance counselor in the guidance system and master the prerequisites for the position of guidance counselor. Know the differences in the responsibilities of the class teacher, guidance counsellor or school counsellor in providing guidance on educational issues. They know the methods of educational counselling. They know strategies for the prevention of problem behaviour and understand their importance. They are able to apply the acquired knowledge in solving specific problem situations in educational practice. They are oriented in school career guidance. They can describe and interpret the importance of school cooperation with educational guidance and prevention institutions, social and legal protection bodies and others.
Transferable competences: by analysing, solving and discussing seminar assignments, students will be able to communicate their conclusions, think critically and think in context.

Class syllabus:
Brief outline of the course:
1. School guidance system.
2.Framework for the work of the educational advisor, professional and personal qualifications of the educational advisor, education of the educational advisor.
3. The class teacher and his/her role in counselling pupils and guardians in education and training.
4. Methods of work in educational counselling.
5. Strategies to prevent problem behaviour of pupils.
6. Addressing the educational difficulties of pupils.
7. Methods and possibilities of intervention of problem behaviour of pupils.
8. Career counselling.
9. Educational counselling in the field of care for gifted pupils.
10. Cooperation of the school with other institutions, family. Social and legal protection of children and youth.

They understand the place and role of the guidance counselor in the guidance system and master the prerequisites for the position of guidance counselor. Know the differences in the responsibilities of the class teacher, guidance counsellor or school counsellor in providing guidance on educational issues. They know the methods of educational counselling. They know strategies for the prevention of problem behaviour and understand their importance. They are able to apply the acquired knowledge in solving specific problem situations in educational practice. They are oriented in school career guidance. They can describe and interpret the importance of school cooperation with educational guidance and prevention institutions, social and legal protection bodies and others.
Transferable competences: by analysing, solving and discussing seminar assignments, students will be able to communicate their conclusions, think critically and think in context.

Class syllabus:
Brief outline of the course:
1. School guidance system.
2.Framework for the work of the educational advisor, professional and personal qualifications of the educational advisor, education of the educational advisor.
3. The class teacher and his/her role in counselling pupils and guardians in education and training.
4. Methods of work in educational counselling.
5. Strategies to prevent problem behaviour of pupils.
6. Addressing the educational difficulties of pupils.
7. Methods and possibilities of intervention of problem behaviour of pupils.
8. Career counselling.
9. Educational counselling in the field of care for gifted pupils.
10. Cooperation of the school with other institutions, family. Social and legal protection of children and youth.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex011/22	Educational psychology

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 11s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form:
11 hours per semester, lecture and seminar, combined form (full-time + distance)
Student workload:
11 hours of direct teaching; intermediate preparation (35 hours); preparation for intermediate test (20 hours); preparation of seminar paper - output in video format (15 hours); independent work with literature (13 hours); preparation for final exam (26 hours). Total 120 hours.
Teaching methods:
Lecture - lecture, group discussion, heuristic method, analysis of videos and real situations. Seminar - didactic, psychological and cooperative games, analysis of problem situations, guided self-study and work with text.

Number of credits: 4

Recommended semester: 5.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex005/22 - Developmental psychology

Recommended prerequisites:
B-PSYex005 Developmental psychology

Course requirements:
50% of the interim evaluation + 50% of the final evaluation
There will be one written examination during the semester with the possibility to get 30 points, students and present a seminar paper of max. 20 minutes + 10 minutes discussion or make the output interactive in the way of PepTalk/TedTalk, or as a video presentation (of students' choice) (max. 15 points), the level of giving feedback in the group (5 points). The exam will consist of a written part (30 points) and an oral part (20 points). Credit will not be awarded to a student who scores less than 50% on any of the assignments. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).

For a grade of A, the student needs to produce consistently excellent results, be able to study independently, and be able to reflect on the problems presented. The student is able to navigate a variety of literary sources of information and is able to select relevant sources for his/her study, is able to analyze and select professional or scientific information and to present to a group, is proficient in the basics of educational psychology and is able to apply this information in practice. They are also able to self-reflect, receive feedback, and give feedback to others.
A grade of B means that the student achieved above average results throughout the semester, was capable of independent study, knows basic information related to educational psychology, can navigate the literature study, can apply the acquired knowledge to practice in educational work with children and pupils, is capable of self-reflection, accepting feedback and providing feedback to others, there are moderate deficiencies in his/her creative and critical thinking.
A grade of C means that the student has performed well during the semester, his/her theoretical knowledge of the subject matter is at a good level, but the ability to apply this knowledge quite correctly, to critically evaluate and compare individual literary sources and psychological knowledge is lacking. Minor shortcomings are evident in the ability to work with feedback and in the area of self-reflection.
A grade D means that the student has been less prepared during the semester, has slight deficiencies in theoretical knowledge related to the subject of education and has more problems in independent implementation work as well as in group work, cannot critically analyse information independently and has problems in correctly applying knowledge to practice, presentation skills and the ability to give feedback are at a weaker level.
A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyse and collate multiple pieces of knowledge, and more often fails to think critically and apply theoretical knowledge to practice, but knows most of the theoretical knowledge in the course and presentation skills and the ability to give feedback are at a borderline level of proficiency.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim evaluation + 50% of the final evaluation

Learning outcomes:
The aim of the course - which is another supporting component in the core of basic psychological disciplines, important in the profile of graduates of the field of psychology teacher education combined already at the bachelor's degree - is to make graduates know how to navigate the basic theoretical and empirically research-based knowledge of educational psychology. Students will be able to use this knowledge in their further studies and later in educational practice. They will be able to take a creative and active approach to working with children and pupils/students in school, know their motivation, learning styles and be able to select the right way of learning in individual conditions when working with a child/student, distinguish between different educational styles and educational situations, understand pupils' failure to thrive and know how to motivate them. They will also be able to assess, analyse and compare information, be able to think critically and evaluate different models of learning and working with children/students. In addition, they will further develop (transferable competences) their presentation skills, working with modern technologies, the ability to self-evaluate and give feedback.

Class syllabus:
1. System and methods of educational psychology. Determinants of individual psyche formation in the context of education and teaching/learning.
2. Psychological issues of learning. The concept of learning in terms of psychological theories of learning, types of learning, laws of learning, control of learning processes, motivation, and its influence on learning.

3. Cognitive and learning styles.
4. Social-psychological cognition in the pedagogical space (impression formation, distorting mechanisms in assessing performance or learning success, attitudes, stereotypes).
5. Communication in the pedagogical process - verbal and non-verbal communication, conflict situations and their resolution.
6. Teacher's strategies in classroom management, teacher's social-psychological competences.
7. Psychological analysis of success and failure of pupils or students in school. Psychological aspects of the personality of the teacher/person working with the child. Performance of pupils/ students and teachers.
8. Psychological issues in education, logical implications.
9. Individual characteristics of pupils/students with giftedness and behavioural disorders.
10. Individual characteristics of pupils/students with learning disabilities.
11. Individual characteristics of pupils/students and working with them. Multiculturalism, culture of poverty.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZex030/22	**Course title:** Environmetal education
Educational activities: **Type of activities:** lecture **Number of hours:** **per week:** **per level/semester:** 5s **Form of the course:** combined	
Number of credits: 3	
Recommended semester: 1., 3., 5., 7.	
Educational level: I.	
Prerequisites:	
Course requirements: Prerequisite subjects: none Prerequisites for successful completion of the course: the course is completed with an assessment (100% of the continuous assessment). The student will be evaluated on an ongoing basis: a) defending a term paper with the content of current environmental problems on the territory of the Slovak Republic as well as environmental problems that are solved globally with a maximum value of 20 points b) its elaboration in the form of analysis and critical evaluation of the chosen environmental issue, in the form of creating reflections from each presented environmental topic and application of the chosen topic to the education of pupils with a maximum value of 80 points. A minimum of 91 points is required for a final grade A, a minimum of 81 points for a grade B, a minimum of 73 points for a grade C, a minimum of 66 points for a grade D and a minimum of 60 points for a grade E. Credit will not be awarded to a student who obtains less than 40 points in a seminar paper and fails to defend the paper. To pass the course, a minimum score of 60% is required. The rating is awarded on a scale: A (100-91%, excellent - excellent results), excellent performance, the student can work well with professional literature dealing with the issue of current environmental problems not only in the Slovak Republic but also at the global level, can critically evaluate environmental problems in society and create appropriate activating methods for the environmental problem usable in pedagogical practice B (90-81%, very good - above average standard), excellent performance, the student can work with the literature dealing with the issues of current environmental problems not only in the Slovak Republic but also at the global level very well, but critical thinking in the field of environmental science is borderline, but can create appropriate activating methods for the environmental problem usable in pedagogical practice C (80-73%, good - normal reliable work), good performance, the student can work well with literature dealing with current environmental problems not only in the Slovak Republic but also at the global level, but critical thinking in the field of environmental science is partially absent, but can create appropriate activating methods for the environmental problem usable in pedagogical practice	

D (72-66%, satisfactory - acceptable results), satisfactory performance, the student can only partially work with professional literature dealing with current environmental problems not only in the Slovak Republic but also at the global level, critical thinking in the field of environmental science is partially absent and only partially can apply environmental theory in the form of creating activating methods in pedagogical practice
E (65-60%, sufficient - the results meet the minimum criteria), sufficient performance, the student can work with the literature dealing with current environmental problems not only in the Slovak Republic but also at the global level at a minimum level, critical thinking in the field of environmental science is absent and his ability to apply environmental theory in the form of creating activating methods in pedagogical practice is minimal
Fx (59-0%, insufficient - additional work required), insufficient performance, student is unable to work with literature dealing with current environmental issues not only in the Slovak Republic but also on a global level, nor critically evaluate environmental issues and is unable to apply environmental theory in the form of creating activating methods to pedagogical practice
Scale of assessment (preliminary/final): 100/0

Learning outcomes:

Learning outcomes and transferable competences:
Upon completion of the course, the student will gain basic information on nature conservation, quality of life assurance and remediation options, which will subsequently enable him/her to solve problems in environmental issues. He will be able to apply all this knowledge to teaching practice; he will strengthen his digital skills in searching for literature on environmental issues on appropriate professional domestic and foreign Internet portals, as well as his communication skills, critical thinking and evaluation of environmental problems in society.

Class syllabus:

Brief outline of the course:
1. Ecology. (the student can distinguish between the concepts of ecology and environmental science, knows the relationships of organisms in the environment and how endogenous and exogenous factors affect the environment)
2. Stability and biodiversity of ecosystems. Protected areas. Regulation of trophic chains. Anthropocentrism, biocentrism and ecocentrism. (the student will learn to perceive the interconnectedness of relationships in nature, the sensitivity of ecosystem stability, how this stability is affected by man himself and ultimately be able to take a stance on the protection of individual ecosystems for the need to maintain balance in nature)
3. Waste management. (the student will get acquainted with the issues of waste management, the creation and regulation of the amount of waste in society, the problem of black dumps but also with the process of recycling as an option for environmental protection)
4. Transport and the greenhouse effect. (the student is able to assess the negative impact of transport use on the environment and is able to adopt the right attitude to dealing with the issue in terms of protecting the environment in which he/she lives)
5. Environmental education in primary schools. Environmental projects of the Slovak Republic. (The student knows how to incorporate environmental education as a cross-cutting theme in the state educational programme, knows how environmental education contributes to the development of the pupil's personality by acquiring the ability to understand, analyse and evaluate the relationships between man and his environment on the basis of knowledge of the laws governing life on Earth, to know and understand the connections between the development of human population and the relationship to the environment in different areas of the world, to understand the links between local and global problems and their own responsibility in relation to the environment, ultimately the student will also become familiar with the current environmental projects of the Slovak Republic

that support this education at primary school and will be able to bring the environmental problems in question to the student's mental level by appropriate activating methods)

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex021/22	Ethical propedeutics

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester; seminar, combined form (attendance+distance)
Student workload:
5 hours of teaching, self-study per semester (17 hours), 33 hours of class preparation (including written preparation); 2 hours of preparation for the paper. Total 57.
Teaching methods:
In the self-study, it is mainly a work with the text (selected passages of works of important authors relevant to the topic under discussion, scientific articles) or a critical reflection on other material (film); during seminars, the individual study of the assigned text (material) - which determines the main topic of the lesson - is followed mainly by dialogical methods such as discussion, interview, Socratic method, which are complemented by monological methods of interpretation, explanation, or lecturing.

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100% of the continuous assessment, which includes: 20% class preparation, 40% class activity, 40% report.
1. Preparation for each lesson, which consists of reading and reviewing the assigned text and handing in the outline by the beginning of the lesson.
2. Active participation in class - engaging in discussion.
3. Prepare and present a paper on the chosen topic.
For successful completion of the course, it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good - above average standard),
C (85-76%, well - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).

For grade A, the students performed excellently during the semester, they were always thoroughly prepared for classes, actively participated in the teaching and showed interest in the subject matter, their theoretical knowledge in the field of ethics is at a high level, they are able to apply the acquired knowledge without any problems, critically assess and compare individual ethical concepts and knowledge.
For grade B, students performed very well during the semester, they were prepared for the classes, they participated in the teaching, their theoretical knowledge in the field of ethics is at a very good level, they are able to apply the acquired knowledge, they can critically assess and compare individual ethical concepts and knowledge.
For a grade of C, students performed well throughout the semester, their theoretical knowledge of ethics is at a good level, but they lack the ability to apply this knowledge, critically evaluate and compare individual ethical concepts and knowledge.
For a grade of D, students were less prepared during the semester; they have slight deficiencies in theoretical knowledge related to ethics; they have difficulty working independently; they are unable to critically analyze information.
For a grade of E, students were only minimally prepared during the semester, were only minimally engaged in the course of instruction, have significant deficiencies in theoretical knowledge related to ethics; have significant difficulty working independently, and cannot critically analyze information.
For the Fx assessment, students were unprepared for class during the semester, did not engage in the course and were unable to respond to questions posed, unable to work independently, and had significant deficiencies in theoretical knowledge in the area of ethics.
Scale of assessment (preliminary/final): 100% of the continuous assessment

Learning outcomes:
The aim is to be able to orientate oneself in the issue of social pathological phenomena, to know the cause of their occurrence, the consequences for the individual and to be able to implement preventive measures to eliminate them.
After completing the course, the student can: define the subject of ethics and the basic concepts of ethics, give an overview of the most important ethical concepts, understand the development of morality and ethical concepts in a historical context, understand the psychology of moral development, highlight the alternative and equivalence of ethical concepts, distinguish the ethical from the non-ethical sphere, help navigate ethical issues, recognize the value aspect of ethical categories, clarify the basic categories of ethics, find intrinsic motivational sources of behaviour, cultivate and develop empathy and the good in us. By completing the course, the student develops the following transferable competencies: communication skills, analytical skills, interpersonal skills, creativity and the ability to think abstractly, critical thinking skills, motivation and the ability to learn, reasoning in context.

Class syllabus:
1. Introduction to ethics as a philosophical discipline; definition of the subject of ethics and the basic concepts of ethics, morality, etiquette; basic forms of ethics.
2. Introduction of basic ethical concepts (virtue ethics, hedonism, deontological ethics, utilitarianism).
3. Selected forms of psychological ethics (Freud, Fromm, Frankl).
4. Psychology and the Problem of Evil (Zimbardo, Milgram).
5. The psychology of morality (Piaget, Kohlberg).

Recommended literature:
Compulsory readings:
Aristoteles (2011). Etika Nikomachova. Kalligram (Kniha druhá, kap. 1-6).

Epikuros (2014). O šťastnom živote l. Thetis, (List Menoikeovi).

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex016/22	Ethics and professional ethics

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 1., 3., 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
100% of the interim grade, which includes 30% class activity (30 points) and 70% project (70 points).
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results), the student reflects correctly and actively both critically and creatively
knowledge, including its meaningful integration into the realities of life and pedagogical practice.
B (93-86%, very good - above average standard), the student reflects critically on knowledge appropriately,
including their meaningful integration into the realities of life and pedagogical practice.
C (85-76%, good - routine reliable work), students performed standardly well during the semester, their theoretical knowledge is at a good level, but they lack the ability to critically apply this knowledge.
D (75-68%, satisfactory - acceptable results), students were less prepared during the semester, they have slight deficiencies in theoretical knowledge. They cannot critically analyze information.
E (67-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge.
Fx (59-0%, insufficient - extra work required).
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
Learning objectives and outcomes:
The thematic focus of the course introduces students to applied ethics and its disciplinary divisions, to

defining the basic concepts of ethics, explaining morality as a social regulator, moral norms and the principles of creating ethical codes. It focuses on the professional ethics of the teaching profession (teacher competences, ethical dilemmas in the teaching profession, etc.) and the importance of a code of ethics in this profession. The aim of the course is to highlight the importance of a favourable classroom and school climate and to work with the content of the Convention on the Rights of the Child. Using selected examples from other branches of applied ethics (bioethics, media ethics, etc.) to show the importance of the presence of a code of ethics in the professions, the possibility of using classical ethical concepts and also different alternatives in solving ethical dilemmas.
This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).
The course contributes to the gradual development of important professional competences of future teachers by its focus and methods of education.

Class syllabus:

Brief outline of the course:
1. Introduction to the subject: defining the basic concepts: ethics and morality.
Ethics and professional ethics: definition of basic terms: applied ethics - sectoral division of applied ethics. Professional ethics as a part of applied ethics.
2. Professional tact and etiquette as a basis for the formation of the code of ethics of individual professions.
3. The teaching profession and the teacher's code of ethics. Status and role of the teacher. Resolving dilemmas in the teaching profession.
4. Positive climate in the classroom, relationships between school climate factors.
5. Convention on the Rights of the Child.
6. A closer definition of bioethics and its areas of interest on concrete examples, the issue of the code of ethics. Classical ethical theories and alternative methods in solving ethical dilemmas.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZex024/22	**Course title:** Family education
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** **per level/semester:** 5s **Form of the course:** combined	
Number of credits: 3	
Recommended semester: 1., 3., 5., 7.	
Educational level: I.	
Prerequisites:	
Course requirements: Prerequisite subjects: none Prerequisites for successful completion of the course: The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points). The rating is awarded on a scale: A (100-91%, excellent - excellent results with only minimal errors), B (90-81%, very good - above average results with minor errors), C (80-73%, good - normal reliable work, average results), D (72-66%, satisfactory - acceptable results, but significant errors occur), E (65-60%, sufficient - results meet minimum criteria), Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student). A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester. A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester. A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help	

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes:
Learning objectives and outcomes:
The aim of the Family Education course is to convey basic information about the family as an educational institution and about the possible impact of the specifics of family life and family education on the educational process in school. The student is able to define the family as an educational institution, remembers its functions, knows the typology of families. The student can explain the transformations of the family in a historical context and the transformations of the family within its life cycle. The student knows and understands the educational goals, content, methods and means of family education. The student is able to critically evaluate and articulate the specifics of family education in alternative forms of partnership cohabitation. The student is able to categorize styles of family education. Describe and interpret inappropriate approaches in family education and predict their possible effects on student performance in school. The student is able to apply the acquired knowledge in solving educational difficulties of the pupil resulting from the specifics of family life and family education.
Transferable competences: by analysing, proposing solutions and discussing problem problems assigned during seminars, the student is able to communicate his/her conclusions, think critically, think in context.

Class syllabus:
Brief outline of the course:
1. Definition of family (traditional vs. newer concept of family), family typology and functions.
2. Basic demographic changes of the family in historical context (from traditional to postmodern family).
3. Family life cycle. Marriage as an institution. Education for marriage and parenthood.
4. The (un)stable family - the contemporary family and the issue of divorce. Inappropriate approaches in family upbringing in the period of divorce. Pupil in school in the period of parents' divorce process.
5. Alternative forms of cohabitation (cohabitation, mingle, single, "patchwork", homosexual partnerships...) - specifics of family education in alternative forms of cohabitation.
6. Pedagogy of the family. Theory of family education. Objectives, content, methods and means of family education. Styles of family education.
7. Relational attachment as a key prerequisite for harmonious personality development. Pupil's manifestations at school with regard to the type of relational attachment.
8. Alternative family education. Specifics of raising a child in foster care.
9. Different forms of violence in the family and their negative impact on the child's personality.

10. Specifics of family education in families with children with disabilities.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZex018/22	**Course title:** Gender aspects of education
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** **per level/semester:** 5s **Form of the course:** combined	
Number of credits: 3	
Recommended semester: 1., 3., 5., 7.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisites for successful completion of the course:
The course is completed with an assessment, weighted interim/final assessment 100/0.
100% of the continuous assessment includes: during the semester there will be approximately 6 - 8 assignments: focused on working with a professional text and its application in an example and the interpretation of the example processed on the basis of the professional text, the analysis of stereotypes in teaching texts, the processing of professional literature into an annotation with questions on the read text. Students will use the e-learning environment moodle for their studies.
For successful completion of the course it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
Learning objectives and outcomes:
Students know the mechanisms to prevent the violation of equal opportunities for women and men (girls and boys) in education; they can identify gender stereotypes and their negative consequences in the educational process. They use methods to deepen gender democracy in school; They perceive the educational process from a gender perspective. They can name and find connections between gender-sensitive education and the cross-cutting theme of education for marriage and parenthood (sex education); apply the gender perspective in relational sex education.
Educational Objectives:
Students will acquire knowledge and skills that will enable them to prevent violations of equal opportunities for women and men (girls and boys), eliminate gender stereotypes and their negative consequences in the educational process, deepen gender democracy at school, and perceive the educational process from a gender perspective.

Class syllabus:
Brief outline of the course:
Definition of the terms: gender, sex, gender stereotypes, gender sensitive education, direct and indirect discrimination. Education and training from a gender perspective - theories of gender socialisation, feminist pedagogy, models of gender-sensitive pedagogy. Gender in the pedagogical process. Inequalities in school from a gender perspective. Language - gender insensitivity. Research, projects, development of study materials, methodologies - gender perspective. Gender aspects of marriage and parenthood/sexual relationship education in schools.

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex010/22	General pathopsychology

Educational activities:
Type of activities: lecture
Number of hours:
per week: per level/semester: 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of direct teaching; self-study (18 hours); preparation of seminar paper and presentation (27 hours); preparation for mid-term test (20 hours); preparation for final paper (20 hours); exam preparation (30 hours). 120 hours in total.
Teaching methods:
Lecturing, self-study, study of materials in MS Teams, group discussion, guided discussion on discussion, guided self-study, guided discussion of a topic, heuristic method, guided self-study and work with a professional text, guided self-study, guided self-study.

Number of credits: 4

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex005/22 - Developmental psychology

Recommended prerequisites:
B-PSYex005 Developmental psychology

Course requirements:
50% of the interim evaluation + 50% of the final evaluation
The interim assessment includes an interim test (30 points) and a seminar paper on the assigned topic and Power Point presentation (20 points). The final assessment will consist of a final exam in the form of a written test (50 points). For successful completion of the course, it is necessary to obtain a minimum of 60% of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, students need to submit outstanding work and results continuously throughout the semester and are capable of independent study. Students are able to select relevant sources for their study, understand the general patterns of psyche formation under disability conditions, and

the specific features of the psyche of individuals with different types of disability and are able to apply their knowledge in practice.
A grade of B means that students performed above average throughout the semester, were able to study independently, have a basic understanding of general pathopsychology, they are able to navigate the information in the literature very well.
A grade of C means that students performed at a standard level throughout the semester, their theoretical knowledge of general pathopsychology is at a good level, but they lack the ability to use this knowledge without to apply this knowledge in practice.
A grade of D indicates that students were less prepared during the semester, having slight deficiencies in theoretical knowledge related to general pathopsychology. They have considerable difficulties in independent work, they cannot critically analyse information.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyze and compare multiple pieces of knowledge, but have mastery of most of the theoretical knowledge in the course.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim evaluation + 50% of the final evaluation

Learning outcomes:
The aim of the course - which represents a pro-inclusive approach in psychological and related sciences and is also an essential element in the progressive comprehensive preparation of graduated psychology teachers in combination already at the bachelor's level – to be able to orient themselves correctly in the knowledge of general pathopsychology and to know the laws of the formation of the psyche in the conditions of disability and the peculiarities of the psyche of individuals with disabilities. After completing the course, the student will acquire the basic concepts of general pathopsychology. The student will acquire a basic overview of the theory and related knowledge of general pathopsychology, also necessary for working with children, adolescents, and adults with disabilities in the context of lifelong development and education. Understands the general patterns of psychological formation in conditions of disability and the specific features of the psyche of individuals with disabilities. It should be able to identify the specific features of the psychological processes of individuals with disabilities and know the basic methods of pathopsychological diagnostics. Apply the knowledge acquired in further studies and in practice in the approach and care of individuals with disabilities. Graduates are able to work critically with knowledge in general pathopsychology and apply knowledge in theory and practice.

Class syllabus:
1. Introduction to the study of general pathopsychology: subject, methods, and history in pathopsychology. Development of pathopsychology in Slovakia.
2. Basic concepts of general pathopsychology and related disciplines.
3. Normality - abnormality in relation to pathopsychology. Normality and disability.
4. Pathopsychological research of psychological processes. Methodology of pathopsychological research on children and adolescents.
5. Peculiarities of the psychological development of individuals with disabilities.
6. Social-psychological aspects of disability. Attitudes of society towards the disabled people. Issues of the family of disabled individual.
7. Personality of individuals with disabilities.
8. Psychological problems of integration and inclusion of the people with disability into society. Psychological aspects of school integration/inclusion.

Form of the course: combined

Type, volume, methods and workload of the student - additional information
11 hours per semester, lecture and seminar, combined form (full-time + distance).
Student workload:
11 hours of direct instruction, ongoing preparation for classes (35 hours), preparation of a seminar paper presentation in an attractive interactive format related to modern research in general psychology and its written completion of 5-7 pages (10 hours); preparation for the mid-term test (18 hours); final essay on the most interesting areas of general psychology and its use in teaching practice (6 hours); preparation for the final test (20 hours); preparation for the oral examination (20 hours). 120 hours in total.
Teaching methods:
Lecture: lecture using heuristic methods, group discussion, group work, analysis of videos and real situations, analysis of problem situations, guided self-study, and work with a professional text.
Seminar: group work, analysis of videos, independent work with professional text, work with authentic text, work with samples of psychological questionnaires and other psychological tests, heuristic methods: problem-based interpretation and brainstorming, concept mapping, critical analysis of psychological research, free association method, work with digital resources (textual and audiovisual), game test activities.

Number of credits: 4

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
50% of continuous assessment + 50% of final assessment
During the semester there will be two written examinations with the possibility to obtain a maximum of 15 points each (15 closed questions, 1 question = 1 point), students will prepare a seminar paper on the topic of an interesting psychological experiment from history or the present of the discipline, which they will present in an interactive way in a study group (also using various online applications) in the scope of about 10 minutes (20 points). The exam will consist of a written part (15 open and closed questions) (30 points) and an oral part (20 points). Credit will not be awarded to a student who scores less than 50% on any of the tasks. In order to pass the course, the student must obtain a minimum of 50% on each assignment and a minimum of 60% overall.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),

B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).
For a grade of A, the student needs to produce consistently excellent results, be able to study independently, and be able to reflect on the problems presented. The student is able to navigate through a variety of professional information, can select relevant sources for his/her studies, can analyse and select professional or scientific information, is proficient in theoretical and empirically derived knowledge of general psychology, and understands the scientific way of thinking and hypothesis formation. He/she is also able to self-reflect, to receive feedback in the process of evaluating his/her studies and outcomes, and to provide feedback to others.
A grade of B means that the student has performed above average throughout the semester, has been able to study independently, has a very good command of all the important knowledge of general psychology, can navigate the literature study very well, understands the scientific way of thinking, but has slight deficiencies in creative and critical thinking.
A grade of C means that the student has performed standardly well during the semester, has engaged in activities, his/her theoretical knowledge of the subject matter is at a good level, but lacks the ability to apply this knowledge quite correctly, to critically evaluate and compare the various literary sources and psychological knowledge. He is not able to reflect and evaluate more complex or problematic situations (psychological theories, experiments, etc.) adequately; he needs help in creative and critical thinking tasks.
A grade of D means that the student has been less well prepared during the semester, has moderate deficiencies in theoretical knowledge related to the subject of education and has greater problems in independent implementation work as well as in group work, cannot critically analyse information quite well and has problems applying more complex knowledge to practice.
A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyse and compare multiple pieces of knowledge correctly on his/her own, and fails more often in critical thinking and in applying more complex theoretical knowledge to practice, but has mastered most of the basic and necessary theoretical knowledge of the subject.
A grade of Fx indicates that the student needs further study or extra work on assignments to acquire the necessary knowledge at the required standard level (60%).
Scale of assessment (preliminary/final): 50% of continuous assessment + 50% of final assessment

Learning outcomes:
The aim of education in the subject of general psychology - which is a fundamental conceptual-methodological basic discipline in the system of psychological sciences - is to provide graduates of this subject as future teachers, in addition to this basic system of theoretical knowledge related to the necessary overview of the knowledge and terminology of general psychology, with the ability to compare and critically evaluate professional and scientific information and related various information sources. After successful completion of the course, students are also able to correctly reproduce and clarify professional knowledge, including the graphs and tables used, to apply the acquired knowledge in the study of other related psychological disciplines and also in real-life situations; they are also able to find logical connections and differentiate individual findings in opinions and ideas, to evaluate them, and then to present and clarify them. They are able to compare, evaluate and analyse research and apply the findings to practice (in the sense of a sound scientific understanding of psychological functions, personality, and behaviour in the context of the psychological sciences system as well as in the context of education and training). They also develop further organisational and digital skills (transferable competences) by completing the

course, including, for example, working with modern information technology, improving their self-assessment and social communication skills, and providing feedback in a more effective way.

Class syllabus:

1. Historical foundations of psychology, basic psychological trends.
2. Methods of research in psychology.
3. Biological processes, central nervous system, complex organization of the nervous system, the contribution of genetic processes in psychological functions manifestations and behavior.
4. Sensory processes; sensation and perception, consciousness and mental states.
5. Memory, types or divisions of memory and memory processes, implicit/explicit and other types of memory, memory enhancement.
6. Learning and conditioning - theoretical approaches to learning in psychology, classical and instrumental conditioning, other types of learning, learning and cognition.
7. Attention - the concept of attention in psychology, classification of types of attention, attention and other cognitive mental functions. Imagination - the concept of imagination in psychology, classification of types of imagination and their relationship to other psychological functions and personality.
8. Thinking and intelligence - their conceptualization in psychology; reasoning, heuristic and analytical thinking, problem solving, assessment of intellectual abilities and their limits, modern theories of intelligence, heredity, and intelligence, fixed and growth mind-set.
9. Language and speech, language and communication in psychology, concepts and categorization of communication, language acquisition/speech development.
10. Motivation and emotions - concept of homeostasis in psychology, drives, needs, intrinsic and extrinsic motives; concept of emotion in psychology, components of emotion, cognitive appraisal and emotion, bodily changes and emotion, complex reactions to emotion and emotion regulation.
11. Personality - Concept of personality in psychology, personality typologies, personality and inter-individual differences, different approaches to theories of personality in psychology, hereditary aspects of personality.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex004/22	General theory of instruction

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 8s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Type, scope and methods of educational activities:
lecture+seminar, 20 hours per semester, combined
Student workload: 20 hours of teaching, 13 hours of guided self-study; 36 hours of seminar paper preparation, 11 hours of mid-term assessment preparation, 40 hours of exam preparation. Total 120 hours of student work.
Educational methods: lecture, interpretation, problem-based interpretation, discussion methods, individual work, small group work, mind mapping, didactic games, problem-based methods, situation analysis methods, guided self-study
Number of credits: 4
Recommended semester: 3rd - 4th semester
Level of study: 1st degree
Prerequisite subjects: none

Number of credits: 4

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
The course is completed by examination, the weighting of the interim and final assessment is 50/50. Students work on continuous work during the semester (setting objectives, taxonomy of objectives, creation of material aids, creation of didactic test, ...). Intermediate works are evaluated for 20 points. At the end of the intermediate teaching they hand in the semester work - methodical preparation for the teaching unit. The semester work is evaluated for 30 points. During the examination period, they take an oral final examination. The final assessment is worth 50 points. The successful completion of the course is subject to obtaining at least 60 % of the maximum possible grade for the course.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good - above average standard),
C (85-76%, well - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)

Scale of assessment (preliminary/final): 50/50

Learning outcomes:

Learning outcomes:

Learning objectives and outcomes:

The student will acquire knowledge of the importance of general didactics and its essence for successful functioning in the practice of the teaching profession. The student will be able to define the subject and methodological profile of didactics, develop knowledge, competences and attitudes associated with the teaching profession, knowledge and competences of planning and organizing pupils' learning activities. The student is able to define general didactics in the system of pedagogical sciences, list and characterise its functions and significance. Characterise the personality of the pupil and the teacher in educational contexts. Characterise and analyse basic school documents and explain their interrelation, compare their structure. Analyse the curriculum from a didactic point of view, defend and present their solution. Apply procedures in the processes of formulating specific objectives according to different taxonomies of objectives. Recognise the nature and importance of the application of didactic principles in the teaching process. Orient themselves in the theories and concepts of teaching. Can characterise different approaches to the classification of methods and organisational forms of the teaching process. Analyse and classify the methods and forms mentioned in school documents. Create a portfolio of own outcomes in general didactics in accordance with the acquired knowledge. Be able to critically and factually assess and evaluate the outputs of others.

Transferable competences:

By discussing, solving and presenting the results of continuously assigned tasks, students will develop their analytical and critical thinking, communication skills, interpersonal skills, organizational skills, digital skills, lecturing and metacognitive skills. Students will be able to use the acquired knowledge and competences creatively in the study of other pedagogical disciplines and in their future pedagogical practice.

Brief outline of the course:

General didactics as a basic pedagogical discipline studies the educational process in all its complexity. Didactics helps students to develop and become aware of basic pedagogical knowledge, to understand didactic interrelationships in teaching. It emphasizes the basic concepts and theories of teaching, for the formation of students' individual conceptions of teaching. Makes accessible the formation and essence of basic didactic principles, pedagogical documents and objectives in the teaching process. It leads students to confront theory with practice, to understand a concept in relation to a specific educational activity, to the specific work of the teacher, but above all in relation to the pupil. It characterises the whole process of preparing a teaching unit, through the interaction of teacher and pupils, i.e. through methods, organisational forms and material means.

Topics:

Historical and contemporary conceptions of general didactics. General didactics as a basic pedagogical discipline and its relation to other sciences. The personality of the pupil and the teacher. Basic pedagogical documents. Didactic principles. Pupils' learning styles and teachers' teaching styles. Didactical analysis of the curriculum. Educational objectives, taxonomies of objectives. Theories and concepts of education. Traditional and activating teaching methods. System of organizational forms. Teaching process, its stages and their analysis. Material teaching means - teaching aids, didactic technology and their importance. Assessment, screening, classification.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex011/22	History of Slovak literature of the 20th century I

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 12s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 26 hours per semester, combined form (primarily in-person)
Student workload: 26 hours of direct teaching (13 hours lecture + 13 hours seminar); 14 hours preparation for the midterm test; 14 hours preparation of the seminar paper; 66 hours study of literature and preparation for the oral examination. A total of 120 hours of student work.
Teaching methods: lecture, demonstration, dialogue with students, dialogue in a group of students, group work, problem-based tasks, application of theoretical knowledge to practical examples, analytical and interpretative work with a literary text, e-learning, guided self-study

Number of credits: 4

Recommended semester: 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous completion of micro-assignments in seminars (10 points);
• a continuous written test on literary history (during the semester, covering the first 5 topics, 10 points);
• the preparation of a seminar paper (30 points), which analytically and interpretively examines a selected problem of one work from the list of required fiction;
• an oral examination on specialist knowledge and analytical-interpretive skills (50 points).
The course culminates in an assessment resulting from an interim review of learning outcomes during the instructional portion of the semester of study and a final review of learning outcomes (50/50).
To pass the course, a minimum of 60 % of the points must be obtained. A final grade of A requires at least 93 points, a grade of B requires at least 85 points, a grade of C requires at least 77 points, a grade of D requires at least 69 points and a grade of E requires at least 60 points of the total points. Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (micro-assessments: less than 6 points; mid-term test: less than 6 points; seminar paper: less than 18 points; oral examination: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - excellent results): excellent performance: the student has excellent knowledge of the 1st half of the 20th century Slovak literature. The student has excellent knowledge

of Slovak literature of the 20th century in the required scope, logically arranges the presented literary-historical facts flawlessly, he/she can apply and adapt the acquired literary-scientific knowledge excellently when working with a literary text in school practice, he/she has the ability to solve individual tasks and assignments independently and imaginatively in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is excellent, he/she has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of the 1st half of the 20th century Slovak literature. The student has a very good knowledge of Slovak literature of the 20th century to the required extent, he/she arranges the presented literary-historical facts logically, with only minor errors, he/she can apply and adapt the acquired literary knowledge very well when working with a literary text in school practice, he/she has a very good the ability to solve individual tasks and assignments independently in a broader literary, literary-historical and cultural context; the linguistic and stylistic level of his/her expression is very good; he/she has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of the 1st half of the 20th century Slovak literature. The student has a good knowledge of Slovak literature of the 20th century in the required range, appropriately arranges the presented literary-historical facts and makes only occasional mistakes, can reliably apply and adapt the acquired literary-historical knowledge when working with a literary text in school practice, independently and reliably solves individual tasks and assignments, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of the 1st half of the 20th century Slovak literature. The student has satisfactory knowledge of Slovak literature of the 20th century in the required range, shows some deficiencies in the arrangement of literary-historical facts, satisfactorily applies the acquired literary-scientific knowledge and existing procedures for working with literary text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of the 1st half of the 20th century Slovak literature. The student demonstrates a satisfactory level of knowledge of 20th century Slovak literature to the required extent and significant deficiencies in the organisation of literary-historical facts, is minimally able to apply acquired literary knowledge and existing procedures for working with literary text in school practice, solves individual tasks and assignments with significant help at a sufficient level, has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the 1st half of the 20th century Slovak literature. The student has insufficient knowledge of Slovak literature of the 20th century in the required extent, does not know literary-historical facts and their logical connections, cannot apply the acquired literary knowledge when working with a literary text in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student has a synthetic knowledge of Slovak literature of 1918 - 1948. He/she has acquired knowledge of the existing literary-historical models of this period and of the fundamental literary-theoretical reflections of its key authors and literary works. It has acquired knowledge of the literary culture of the period in the context of contemporary political, social, cultural and civilizational processes, of periodization models and internal differentiation of original Slovak works of this era. In a representative spectrum, it is familiar with individual modern and avant-garde tendencies and directions, group and individual ideological and aesthetic initiatives and poetics. He is aware of the value of the linguistic-cultural originality of Slovak literature and has cultivated a sense of its

organic links to universal humanistic value bases. As a result of the seminar part of the course, the student develops analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skills to communicate facts, concepts, and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. He/she is prepared to deepen and develop the acquired knowledge and skills in further bachelor and master studies and is also able to use and creatively apply them in the school environment in the position of a pedagogical assistant or for the needs of the publishing environment. He is also able to convey basic information about Slovak literature of 1918-1948 to the general public, and thus offer certain conclusions and justifications to lay readers as well. He has also developed a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Slovak literature after 1918 in the context of contemporary political, social, cultural-civilisational and other transformations.
2. Periodization models of literary development in 1918-1948, generational, functional, ideological-aesthetic and other differentiation of literature.
3. Literary development in the modernist stage (1918-1935): modern and avant-garde tendencies and individual concretizations (realism, naturalism, second modernism, symbolism, expressionism).
4. Panorama of opinion, stylistic and thematic differentiation in the poetry of the 1920s and 1930s (J. Smrek, E. B. Lukáč, L. Novomeský and others).
5. Panorama of opinion, stylistic and thematic differentiation in the prose of the 1920s and 1930s (J. Hrušovský, J. C. Hronský, M. Urban and others).
6. Social, intra-literary and individual motivations of the formation of the avant-garde literary model (1935-1948).
7. Avant-garde literary directions in poetry: surrealism, Catholic modernism.
8. Avant-garde literary directions in prose: socialist realism, naturism.
9. The literary situation in the years of the authoritarian nation-state 1939-1945.
10. Literary situation in the conditions of limited democracy in the years 1945 - 1948.
11. Developmental tendencies in Slovak literature in the 1930s and 1940s (social novel, historical novel, chamber psychological prose, poets of the sujet, poetry of the native nest, apocalyptic-utopian poetry, ódico-elegic lyric).

The curriculum of the course covers a spectrum of cross-sectional and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will deepen and develop his/her knowledge of the conditions in which Slovak literature existed between 1918 and 1948, its literary-historical concepts and literary-critical reflection. Particular emphasis will be placed on distinguishing the conditions for the existence of literature in the democratic pre-war, authoritarian wartime and limited democratic post-war social context. The student will deepen and develop knowledge of internal periodization, generational, functional and ideological-aesthetic differentiation, and genre-thematic forms, and of representative supra-individual developmental formations (realism, Symbolism, Naturalism, Second Modernism, Expressionism, Proletarian Poetry, Vitalism, Poeticism, Surrealism, Catholic Modernism, Socialist Realism, Naturism) and the individual creative efforts of representative authors. Aesthetically extraordinary works will be the focus of attention. A sound orientation of the student in the problems of literature of the first half of the 20th century and the related practical and methodological

knowledge will be a prerequisite for his/her proper understanding of the past in the courses of the continuing degree and an important part of preparation for the teaching profession corresponding to the current needs of school practice. The student will be prepared to deepen and develop the acquired theoretical knowledge and practical skills in further bachelor and master studies and to use them purposefully and creatively in the school environment in the position of a teaching assistant, possibly also for the needs of the publishing environment. The student will acquire a base of knowledge and skills that will be a professional prerequisite for the analysis and selection of didactic materials from Slovak literature with regard to teaching objectives, a prerequisite for the analysis and evaluation of educational activities and for solving common problems in the teaching of Slovak language and literature. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, to modify his/her knowledge in doing so, and to creatively use the appropriate and adequate methods of the discipline. The theoretical knowledge and practical skills acquired by the student will be able to be communicated to a wider and lay public. An analytical and critical approach to a literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate by solving specific assignments as well as by compiling his/her own analytical-interpretive term paper. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex011/22	History of Slovak literature of the 20th century I

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 12s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 26 hours per semester, combined form (primarily in-person)
Student workload: 26 hours of direct teaching (13 hours lecture + 13 hours seminar); 14 hours preparation for the midterm test; 14 hours preparation of the seminar paper; 66 hours study of literature and preparation for the oral examination. A total of 120 hours of student work.
Teaching methods: lecture, demonstration, dialogue with students, dialogue in a group of students, group work, problem-based tasks, application of theoretical knowledge to practical examples, analytical and interpretative work with a literary text, e-learning, guided self-study

Number of credits: 4

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous completion of micro-assignments in seminars (10 points);
• a continuous written test on literary history (during the semester, covering the first 5 topics, 10 points);
• the preparation of a seminar paper (30 points), which analytically and interpretively examines a selected problem of one work from the list of required fiction;
• an oral examination on specialist knowledge and analytical-interpretive skills (50 points).
The course culminates in an assessment resulting from an interim review of learning outcomes during the instructional portion of the semester of study and a final review of learning outcomes (50/50).
To pass the course, a minimum of 60 % of the points must be obtained. A final grade of A requires at least 93 points, a grade of B requires at least 85 points, a grade of C requires at least 77 points, a grade of D requires at least 69 points and a grade of E requires at least 60 points of the total points.
Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (micro-assessments: less than 6 points; mid-term test: less than 6 points; seminar paper: less than 18 points; oral examination: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - excellent results): excellent performance: the student has excellent knowledge of the 1st half of the 20th century Slovak literature. The student has excellent knowledge

of Slovak literature of the 20th century in the required scope, logically arranges the presented literary-historical facts flawlessly, he/she can apply and adapt the acquired literary-scientific knowledge excellently when working with a literary text in school practice, he/she has the ability to solve individual tasks and assignments independently and imaginatively in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is excellent, he/she has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of the 1st half of the 20th century Slovak literature. The student has a very good knowledge of Slovak literature of the 20th century to the required extent, he/she arranges the presented literary-historical facts logically, with only minor errors, he/she can apply and adapt the acquired literary knowledge very well when working with a literary text in school practice, he/she has a very good the ability to solve individual tasks and assignments independently in a broader literary, literary-historical and cultural context; the linguistic and stylistic level of his/her expression is very good; he/she has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of the 1st half of the 20th century Slovak literature. The student has a good knowledge of Slovak literature of the 20th century in the required range, appropriately arranges the presented literary-historical facts and makes only occasional mistakes, can reliably apply and adapt the acquired literary-historical knowledge when working with a literary text in school practice, independently and reliably solves individual tasks and assignments, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of the 1st half of the 20th century Slovak literature. The student has satisfactory knowledge of Slovak literature of the 20th century in the required range, shows some deficiencies in the arrangement of literary-historical facts, satisfactorily applies the acquired literary-scientific knowledge and existing procedures for working with literary text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of the 1st half of the 20th century Slovak literature. The student demonstrates a satisfactory level of knowledge of 20th century Slovak literature to the required extent and significant deficiencies in the organisation of literary-historical facts, is minimally able to apply acquired literary knowledge and existing procedures for working with literary text in school practice, solves individual tasks and assignments with significant help at a sufficient level, has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the 1st half of the 20th century Slovak literature. The student has insufficient knowledge of Slovak literature of the 20th century in the required extent, does not know literary-historical facts and their logical connections, cannot apply the acquired literary knowledge when working with a literary text in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student has a synthetic knowledge of Slovak literature of 1918 - 1948. He/she has acquired knowledge of the existing literary-historical models of this period and of the fundamental literary-theoretical reflections of its key authors and literary works. It has acquired knowledge of the literary culture of the period in the context of contemporary political, social, cultural and civilizational processes, of periodization models and internal differentiation of original Slovak works of this era. In a representative spectrum, it is familiar with individual modern and avant-garde tendencies and directions, group and individual ideological and aesthetic initiatives and poetics. He is aware of the value of the linguistic-cultural originality of Slovak literature and has cultivated a sense of its

organic links to universal humanistic value bases. As a result of the seminar part of the course, the student develops analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skills to communicate facts, concepts, and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. He/she is prepared to deepen and develop the acquired knowledge and skills in further bachelor and master studies and is also able to use and creatively apply them in the school environment in the position of a pedagogical assistant or for the needs of the publishing environment. He is also able to convey basic information about Slovak literature of 1918-1948 to the general public, and thus offer certain conclusions and justifications to lay readers as well. He has also developed a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Slovak literature after 1918 in the context of contemporary political, social, cultural-civilisational and other transformations.
2. Periodization models of literary development in 1918-1948, generational, functional, ideological-aesthetic and other differentiation of literature.
3. Literary development in the modernist stage (1918-1935): modern and avant-garde tendencies and individual concretizations (realism, naturalism, second modernism, symbolism, expressionism).
4. Panorama of opinion, stylistic and thematic differentiation in the poetry of the 1920s and 1930s (J. Smrek, E. B. Lukáč, L. Novomeský and others).
5. Panorama of opinion, stylistic and thematic differentiation in the prose of the 1920s and 1930s (J. Hrušovský, J. C. Hronský, M. Urban and others).
6. Social, intra-literary and individual motivations of the formation of the avant-garde literary model (1935-1948).
7. Avant-garde literary directions in poetry: surrealism, Catholic modernism.
8. Avant-garde literary directions in prose: socialist realism, naturism.
9. The literary situation in the years of the authoritarian nation-state 1939-1945.
10. Literary situation in the conditions of limited democracy in the years 1945 - 1948.
11. Developmental tendencies in Slovak literature in the 1930s and 1940s (social novel, historical novel, chamber psychological prose, poets of the sujet, poetry of the native nest, apocalyptic-utopian poetry, ódico-elegic lyric).

The curriculum of the course covers a spectrum of cross-sectional and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will deepen and develop his/her knowledge of the conditions in which Slovak literature existed between 1918 and 1948, its literary-historical concepts and literary-critical reflection. Particular emphasis will be placed on distinguishing the conditions for the existence of literature in the democratic pre-war, authoritarian wartime and limited democratic post-war social context. The student will deepen and develop knowledge of internal periodization, generational, functional and ideological-aesthetic differentiation, and genre-thematic forms, and of representative supra-individual developmental formations (realism, Symbolism, Naturalism, Second Modernism, Expressionism, Proletarian Poetry, Vitalism, Poeticism, Surrealism, Catholic Modernism, Socialist Realism, Naturism) and the individual creative efforts of representative authors. Aesthetically extraordinary works will be the focus of attention. A sound orientation of the student in the problems of literature of the first half of the 20th century and the related practical and methodological

knowledge will be a prerequisite for his/her proper understanding of the past in the courses of the continuing degree and an important part of preparation for the teaching profession corresponding to the current needs of school practice. The student will be prepared to deepen and develop the acquired theoretical knowledge and practical skills in further bachelor and master studies and to use them purposefully and creatively in the school environment in the position of a teaching assistant, possibly also for the needs of the publishing environment. The student will acquire a base of knowledge and skills that will be a professional prerequisite for the analysis and selection of didactic materials from Slovak literature with regard to teaching objectives, a prerequisite for the analysis and evaluation of educational activities and for solving common problems in the teaching of Slovak language and literature. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, to modify his/her knowledge in doing so, and to creatively use the appropriate and adequate methods of the discipline. The theoretical knowledge and practical skills acquired by the student will be able to be communicated to a wider and lay public. An analytical and critical approach to a literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate by solving specific assignments as well as by compiling his/her own analytical-interpretive term paper. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and civic attitudes in the spirit of democracy.

Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the 2nd half of the 20th century Slovak literature. The student has insufficient knowledge of Slovak literature of the 20th century in the required extent, does not know literary-historical facts and their logical connections, cannot apply the acquired literary knowledge when working with a literary text in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student has a synthetic knowledge of Slovak literature of 1948 - 1989. The student has acquired knowledge of the existing literary-historical models of this period and of the fundamental literary-theoretical reflections of its key authors and literary works. It has acquired knowledge of the literary culture of the period in the context of contemporary political, social, cultural and civilizational processes, of periodization models and internal differentiation of original Slovak works of this era. In a representative spectrum, it is familiar with individual tendencies, group and individual ideological and aesthetic initiatives and poetics. He is aware of the value of the linguistic-cultural originality of Slovak literature and has cultivated a sense of its organic links to

universal humanistic value bases. As a result of the seminar part of the course, the student develops analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skill to communicate facts, concepts, and opinions and to formulate and defend arguments The student has the competence to independently expand his or her knowledge and the ability to identify and evaluate the broader contexts of professional issues. He/she is prepared to deepen and develop the acquired knowledge and skills in further bachelor and master studies and is also able to use and creatively apply them in the school environment in the position of a pedagogical assistant or for the needs of the publishing environment. He is also able to convey basic information about Slovak literature of 1948-1989 to the general public and thus to offer certain conclusions and justifications to the lay public as well. He has also developed a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Periodization models of literary development in the years 1948 - 1989.
2. Power establishment of the monolithic model of literature after 1948.
3. Socialist realism.
4. Modernisation and subjectivisation of Slovak prose by the initiatives of members of the middle generation in the 1950s and 1960s (A. Bednár, L. Mňačko and others).
5. Modernisation and subjectivisation of Slovak poetry by the initiatives of members of the middle generation in the 1950s and 1960s (M. Rúfus, M. Válek and others).
6. Modernisation and depoliticisation of Slovak prose by the initiatives of members of the young generation in the 1950s and 1960s (J. Blažková, J. Johanides and others).
7. Modernisation and depoliticisation of Slovak poetry by the initiatives of members of the young generation in the 1950s and 1960s (Concretists, Lonely Runners).
8. Normalization of society and literature after 1968, three parallel communication circuits (official, non-public, emigrant), literature in conditions of non-public culture.
9. Differentiation of the prose of the official circle in 1976-1989 with emphasis on anthropocentrically oriented initiatives (V. Šikula, L. Ballek, R. Sloboda, etc.).
10. Differentiation of the poetry of the official circle in 1976-1989 with emphasis on anthropocentrically oriented initiatives (Š. Strážay, Š. Moravčík, D. Hevier and others).
11. Postmodern tendencies in Slovak literature, 2nd half of the 20th century. 20th century (D. Mitana, P. Vilikovský and others).

The curriculum of the course covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will deepen and develop his/her knowledge of the conditions in which Slovak literature existed between 1948 and 1989, its literary-historical concepts and literary-critical reflection. Particular emphasis will be placed on distinguishing the conditions for the existence of literature in the different stages of the development of the communist totalitarian regime (the founding period of the dictatorship of the proletariat, the post-Stalinist period, the normalisation period, the pre-reconstruction period). Delayed Debutantes, Everyday Prose, Existentialism, Concretism, The Lonely Runners, the historicist-regionalist novel, the problematic epic of the present, compensatory-asyllabic poetry, analytic poetry, non-conformist individualists, postmodern tendencies) and the individual creative efforts of representative authors. Aesthetically extraordinary works will take center stage. A reliable orientation of the student in the problems of literature of the second half of the 20th century and related practical and methodological knowledge will be a prerequisite for his/her proper understanding of the past in the courses of the continuing degree

and an important part of preparation for the teaching profession corresponding to the current needs of school practice. The student will be prepared to deepen and develop the acquired theoretical knowledge and practical skills in further bachelor and master studies and to use them purposefully and creatively in the school environment in the position of a teaching assistant, possibly also for the needs of the publishing environment. The student will acquire a base of knowledge and skills that will be a professional prerequisite for the analysis and selection of didactic materials from Slovak literature with regard to teaching objectives, a prerequisite for the analysis and evaluation of educational activities and for solving common problems in the teaching of Slovak language and literature. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, to modify his/her knowledge in doing so, and to creatively use the appropriate and adequate methods of the discipline. The student will be able to communicate the theoretical knowledge and practical skills acquired to the wider and lay public. An analytical and critical approach to the literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate by solving specific assignments as well as by compiling his/her own analytical-interpretive term paper. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex013/22	History of Slovak literature of the 20th century II

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 14s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 26 hours per semester, combined form (primarily in-person)
Student workload: 26 hours of direct teaching (13 hours lecture + 13 hours seminar); 14 hours preparation for the midterm test; 14 hours preparation of the seminar paper; 66 hours study of literature and preparation for the oral examination. A total of 120 hours of student work.
Teaching methods: lecture, demonstration, dialogue with students, dialogue in a group of students, group work, problem-based tasks, application of theoretical knowledge to practical examples, analytical and interpretative work with a literary text, e-learning, guided self-study

Number of credits: 4

Recommended semester: 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous completion of micro-assignments in seminars (10 points);
• a continuous written test on literary history (during the semester, covering the first 5 topics, 10 points);
• the preparation of a seminar paper (30 points), which analytically and interpretively examines a selected problem of one work from the list of required fiction;
• an oral examination on specialist knowledge and analytical-interpretive skills (50 points).
The course culminates in an assessment resulting from an interim review of learning outcomes during the instructional portion of the semester of study and a final review of learning outcomes (50/50).
To pass the course, a minimum of 60 % of the points must be obtained. A final grade of A requires at least 93 points, a grade of B requires at least 85 points, a grade of C requires at least 77 points, a grade of D requires at least 69 points and a grade of E requires at least 60 points of the total points.
Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (micro-assessments: less than 6 points; mid-term test: less than 6 points; seminar paper: less than 18 points; oral examination: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - excellent results): excellent performance: the student has excellent knowledge of the 2nd half of the 20th century Slovak literature. The student has excellent

knowledge of Slovak literature of the 20th century in the required scope, logically arranges the presented literary-historical facts flawlessly, he/she can apply and adapt the acquired literary-scientific knowledge excellently when working with a literary text in school practice, he/she has the ability to solve individual tasks and assignments independently and imaginatively in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is excellent, he/she has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of the 2nd half of the 20th century Slovak literature. The student has a very good knowledge of Slovak literature of the 20th century to the required extent, he/she arranges the presented literary-historical facts logically, with only minor errors, he/she can apply and adapt the acquired literary knowledge very well when working with a literary text in school practice, he/she has a very good the ability to solve individual tasks and assignments independently in a broader literary, literary-historical and cultural context; the linguistic and stylistic level of his/her expression is very good; he/she has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of the 2nd half of the 20th century Slovak literature. The student has a good knowledge of Slovak literature of the 20th century in the required range, appropriately arranges the presented literary-historical facts and makes only occasional mistakes, can reliably apply and adapt the acquired literary-historical knowledge when working with a literary text in school practice, independently and reliably solves individual tasks and assignments, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of the 2nd half of the 20th century Slovak literature. The student has satisfactory knowledge of Slovak literature of the 20th century in the required range, shows some deficiencies in the arrangement of literary-historical facts, satisfactorily applies the acquired literary-scientific knowledge and existing procedures for working with literary text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of the 2nd half of the 20th century Slovak literature. The student demonstrates a satisfactory level of knowledge of 20th century Slovak literature to the required extent and significant deficiencies in the organisation of literary-historical facts, is minimally able to apply acquired literary knowledge and existing procedures for working with literary text in school practice, solves individual tasks and assignments with significant help at a sufficient level, has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the 2nd half of the 20th century Slovak literature. The student has insufficient knowledge of Slovak literature of the 20th century in the required extent, does not know literary-historical facts and their logical connections, cannot apply the acquired literary knowledge when working with a literary text in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student has a synthetic knowledge of Slovak literature of 1948 - 1989. The student has acquired knowledge of the existing literary-historical models of this period and of the fundamental literary-theoretical reflections of its key authors and literary works. It has acquired knowledge of the literary culture of the period in the context of contemporary political, social, cultural and civilizational processes, of periodization models and internal differentiation of original Slovak works of this era. In a representative spectrum, it is familiar with individual tendencies, group and individual ideological and aesthetic initiatives and poetics. He is aware of the value of the linguistic-cultural originality of Slovak literature and has cultivated a sense of its organic links to

universal humanistic value bases. As a result of the seminar part of the course, the student develops analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skill to communicate facts, concepts, and opinions and to formulate and defend arguments The student has the competence to independently expand his or her knowledge and the ability to identify and evaluate the broader contexts of professional issues. He/she is prepared to deepen and develop the acquired knowledge and skills in further bachelor and master studies and is also able to use and creatively apply them in the school environment in the position of a pedagogical assistant or for the needs of the publishing environment. He is also able to convey basic information about Slovak literature of 1948-1989 to the general public and thus to offer certain conclusions and justifications to the lay public as well. He has also developed a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Periodization models of literary development in the years 1948 - 1989.
2. Power establishment of the monolithic model of literature after 1948.
3. Socialist realism.
4. Modernisation and subjectivisation of Slovak prose by the initiatives of members of the middle generation in the 1950s and 1960s (A. Bednár, L. Mňačko and others).
5. Modernisation and subjectivisation of Slovak poetry by the initiatives of members of the middle generation in the 1950s and 1960s (M. Rúfus, M. Válek and others).
6. Modernisation and depoliticisation of Slovak prose by the initiatives of members of the young generation in the 1950s and 1960s (J. Blažková, J. Johanides and others).
7. Modernisation and depoliticisation of Slovak poetry by the initiatives of members of the young generation in the 1950s and 1960s (Concretists, Lonely Runners).
8. Normalization of society and literature after 1968, three parallel communication circuits (official, non-public, emigrant), literature in conditions of non-public culture.
9. Differentiation of the prose of the official circle in 1976-1989 with emphasis on anthropocentrically oriented initiatives (V. Šikula, L. Ballek, R. Sloboda, etc.).
10. Differentiation of the poetry of the official circle in 1976-1989 with emphasis on anthropocentrically oriented initiatives (Š. Strážay, Š. Moravčík, D. Hevier and others).
11. Postmodern tendencies in Slovak literature, 2nd half of the 20th century. 20th century (D. Mitana, P. Vilikovský and others).

The curriculum of the course covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will deepen and develop his/her knowledge of the conditions in which Slovak literature existed between 1948 and 1989, its literary-historical concepts and literary-critical reflection. Particular emphasis will be placed on distinguishing the conditions for the existence of literature in the different stages of the development of the communist totalitarian regime (the founding period of the dictatorship of the proletariat, the post-Stalinist period, the normalisation period, the pre-reconstruction period). Delayed Debutantes, Everyday Prose, Existentialism, Concretism, The Lonely Runners, the historicist-regionalist novel, the problematic epic of the present, compensatory-asyllabic poetry, analytic poetry, non-conformist individualists, postmodern tendencies) and the individual creative efforts of representative authors. Aesthetically extraordinary works will take center stage. A reliable orientation of the student in the problems of literature of the second half of the 20th century and related practical and methodological knowledge will be a prerequisite for his/her proper understanding of the past in the courses of the continuing degree

and an important part of preparation for the teaching profession corresponding to the current needs of school practice. The student will be prepared to deepen and develop the acquired theoretical knowledge and practical skills in further bachelor and master studies and to use them purposefully and creatively in the school environment in the position of a teaching assistant, possibly also for the needs of the publishing environment. The student will acquire a base of knowledge and skills that will be a professional prerequisite for the analysis and selection of didactic materials from Slovak literature with regard to teaching objectives, a prerequisite for the analysis and evaluation of educational activities and for solving common problems in the teaching of Slovak language and literature. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, to modify his/her knowledge in doing so, and to creatively use the appropriate and adequate methods of the discipline. The student will be able to communicate the theoretical knowledge and practical skills acquired to the wider and lay public. An analytical and critical approach to the literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate by solving specific assignments as well as by compiling his/her own analytical-interpretive term paper. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate a sense of socially responsible action and civic attitudes in the spirit of democracy.

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex022/22	History of education

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 1., 3., 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed by assessment (100% of the interim assessment).
The students' task is to solve 10 continuously assigned problems during the semester and to participate in the presentation and discussion of their solutions in seminars. The solution of each problem is evaluated on a 3-0 point scale according to specific criteria set for each problem. The maximum number of points possible is 30.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good - above average standard),
C (85-76%, well - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points. A minimum of 28 points is required for a final grade of A (excellent - outstanding results), a minimum of 25 points is required for a grade of B (very good - above average standard), a minimum of 22 points is required for a grade of C (good - normal reliable work), a minimum of 20 points is required for a grade of D (satisfactory - acceptable results), and a minimum of 18 points is required for a grade of E (satisfactory - results meet the minimum criteria). A grade of FX (Inadequate - extra work required) will be awarded to students who score 17 points or less.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
Upon completion of the course, students will be able to use professional terminology, define the subject, and describe the system of the history of pedagogy. They are able to explain the context of the emergence and the main features of the historical currents of educational thought, describe and compare the systems of education and training in different historical periods, explain the views

and characterize the work of important figures in the history of education and training, critically evaluate them and identify their influence on education and training today.
Working with original historical sources and their contemporary interpretations, students will be able to critically reflect and discuss ethical issues of education and education, the position and roles of the subjects of education and education. In solving, presenting and discussing the results of ongoing assignments, students will develop their analytical and critical thinking, communication, lecturing and metacognitive skills.
Students will be able to use the acquired knowledge and skills creatively in the study of other pedagogical disciplines and in their future pedagogical practice.

Class syllabus:
Brief outline of the course:
The subject, terminology and system of the history of pedagogy. Education and education in ancient and medieval times. Education and pedagogical ideas in the period of humanism and the Renaissance. Life, work and pedagogical views of J. A. Comenius. The development of education and pedagogical thinking in the works of selected representatives in the world (Lock. Rousseau, Pestalozzi, Herbart, Tolstoy) and in the territory of present-day Slovakia (Bel, Tešedík, Fándly, Lehocký) in the 17th-19th centuries. Pedagogical trends and schools of the 20th century in the world. Education in Slovakia in the 20th century. Contemporary trends in education.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex014/22	History of philosophy 1

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 2., 4., 6., 8.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed with an assessment, the midterm/final assessment ratio is 100/0, which includes a final test in the assessment week of the semester (100% of the assessment). A minimum of 60% of the total mark is required to pass the course.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in class during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing assignments using a model, above-average professional knowledge and application of that knowledge in solving problem-based assignments using tutorials, above-average orientation to the problem, above-average communication skills, responsibility and timely completion of assignments, and above-average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to prepare assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the teacher, good orientation in the subject, good communication skills, completion of the assigned tasks, average activity in the class during the semester on the basis of the teacher's prompting.

A minimum of 66 points is required for a final grade of D. For this grade, the student should demonstrate: the ability to develop assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group or with the assistance of the instructor, average orientation to the problem, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): The course is completed with an assessment, the midterm/final assessment ratio is 100/0, which includes a final test in the assessment week of the semester (100% of the assessment). A minimum of 60% of the total mark is required to pass the course.

Learning outcomes:

Learning outcomes and transferable competences:
Completion of the course will provide students with a certain handle on orientation in the now almost opaque tangle of diverse philosophical directions, movements, orientations and attitudes, will provide them with basic categorical-conceptual equipment and methodological instrumentation useful in other special sciences and disciplines (sociology, pedagogy, political science, psychology, etc.), which will help to bridge their particularism in favor of a global vision and solutions to the problems of the contemporary world. Knowledge of the approaches of different philosophical trends to certain problems will facilitate the students' professional and human orientation in the contemporary world, since many pedagogical, economic, social, legal and political concepts are based on these philosophical trends as their conceptual framework. The course also emphasizes the mapping of these overlaps of philosophy into other components of culture. The problem field thus delineated will help the students to reflect and specify their own position and provide arguments for the vindication of their own positions, thus contributing to better self-knowledge and self-identification. History of Philosophy provides students with the experience of encountering the "other", giving guidance and cultivating habits of coping with it, and thus teaching them tolerance and respect for other points of view. By completing the course, the student develops transferable competencies such as communication skills, analytical skills, abstract thinking skills, critical thinking skills, motivation and the ability to learn, and reasoning in context.
Learning objectives:
To familiarize students with the history of European philosophical thought and to provide them with a basic conceptual and methodological apparatus that they will be able to use in other special sciences such as pedagogy, political science, psychology, or sociology.

Class syllabus:

Brief outline of the course:
History of Philosophy I focuses on the period from Antiquity to the French Enlightenment.
1. Introduction: philosophy and its importance for man; The study of the history of philosophy as an introduction to philosophy; Periodization of the history of philosophy.
2. Ancient Philosophy: the Pre-Socratics (Ionian Philosophy - School of Miletus, Xenophanes, Heracleitos; Philosophy in the West - Pythagoras, Parmenides, Zeno, Empedocles; Reaction of Ionian Philosophy - Anaxagoras, Democritus); Classical Greek Philosophy (Sophists, Socrates, Plato, Aristotle); Hellenistic Period (Stoicism, Epicureanism, Skepticism).

3. Medieval Philosophy: Patristics (Augustine); Early Scholasticism (Eriugena, Anselm of Canterbury, Abaelard); High Scholasticism (Albert the Great, Aquinas, Bonaventure, R. Bacon); Late Scholasticism (Occam, Scotus)
4. Renaissance philosophy: M. Kuzansky; Renaissance Platonism and Aristotelianism (Ficinus, Mirandola, Pompanazzi); Renaissance natural science (Copernicus, Kepler, Galilei)
Renaissance philosophy of nature (Telesio, Bruno); Renaissance social philosophy (Machiavelli, More, Campanella); Renaissance humanism (Erasmus of Rotterdam, Montaigne); Reformation (Luther, Calvin, Münzer, Zwingli)
5. Modern Philosophy: Origins of Modern Empiricism and Mechanistic Materialism (F. Bacon, Hobbes); Modern Rationalism (Descartes, Spinoza, Leibniz); Modern Empiricism (Locke, Berkley, Hume)
6. The Enlightenment in France (Montesquieu, Voltaire, Rousseau, the Encyclopedists, Materialists)

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex014/22	History of philosophy 1

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 1., 3., 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
The course is completed with an assessment, the midterm/final assessment ratio is 100/0, which includes a final test in the assessment week of the semester (100% of the assessment). A minimum of 60% of the total mark is required to pass the course.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results),
B (90-81%, very good - above average standard),
C (80-73%, well - normal reliable work),
D (72-66%, satisfactory - acceptable results),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required)
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in class during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing assignments using a model, above-average professional knowledge and application of that knowledge in solving problem-based assignments using tutorials, above-average orientation to the problem, above-average communication skills, responsibility and timely completion of assignments, and above-average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to prepare assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the teacher, good orientation in the subject, good communication skills, completion of the assigned tasks, average activity in the class during the semester on the basis of the teacher's prompting.

A minimum of 66 points is required for a final grade of D. For this grade, the student should demonstrate: the ability to develop assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group or with the assistance of the instructor, average orientation to the problem, average communication skills, completion of assignments, and basic activity in class during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): The course is completed with an assessment, the midterm/final assessment ratio is 100/0, which includes a final test in the assessment week of the semester (100% of the assessment). A minimum of 60% of the total mark is required to pass the course.

Learning outcomes:

Learning outcomes and transferable competences:
Completion of the course will provide students with a certain handle on orientation in the now almost opaque tangle of diverse philosophical directions, movements, orientations and attitudes, will provide them with basic categorical-conceptual equipment and methodological instrumentation useful in other special sciences and disciplines (sociology, pedagogy, political science, psychology, etc.), which will help to bridge their particularism in favor of a global vision and solutions to the problems of the contemporary world. Knowledge of the approaches of different philosophical trends to certain problems will facilitate the students' professional and human orientation in the contemporary world, since many pedagogical, economic, social, legal and political concepts are based on these philosophical trends as their conceptual framework. The course also emphasizes the mapping of these overlaps of philosophy into other components of culture. The problem field thus delineated will help the students to reflect and specify their own position and provide arguments for the vindication of their own positions, thus contributing to better self-knowledge and self-identification. History of Philosophy provides students with the experience of encountering the "other", giving guidance and cultivating habits of coping with it, and thus teaching them tolerance and respect for other points of view. By completing the course, the student develops transferable competencies such as communication skills, analytical skills, abstract thinking skills, critical thinking skills, motivation and the ability to learn, and reasoning in context.
Learning objectives:
To familiarize students with the history of European philosophical thought and to provide them with a basic conceptual and methodological apparatus that they will be able to use in other special sciences such as pedagogy, political science, psychology, or sociology.

Class syllabus:

Brief outline of the course:
History of Philosophy I focuses on the period from Antiquity to the French Enlightenment.
1. Introduction: philosophy and its importance for man; The study of the history of philosophy as an introduction to philosophy; Periodization of the history of philosophy.
2. Ancient Philosophy: the Pre-Socratics (Ionian Philosophy - School of Miletus, Xenophanes, Heracleitos; Philosophy in the West - Pythagoras, Parmenides, Zeno, Empedocles; Reaction of Ionian Philosophy - Anaxagoras, Democritus); Classical Greek Philosophy (Sophists, Socrates, Plato, Aristotle); Hellenistic Period (Stoicism, Epicureanism, Skepticism).

3. Medieval Philosophy: Patristics (Augustine); Early Scholasticism (Eriugena, Anselm of Canterbury, Abaelard); High Scholasticism (Albert the Great, Aquinas, Bonaventure, R. Bacon); Late Scholasticism (Occam, Scotus)
4. Renaissance philosophy: M. Kuzansky; Renaissance Platonism and Aristotelianism (Ficinus, Mirandola, Pompanazzi); Renaissance natural science (Copernicus, Kepler, Galilei)
Renaissance philosophy of nature (Telesio, Bruno); Renaissance social philosophy (Machiavelli, More, Campanella); Renaissance humanism (Erasmus of Rotterdam, Montaigne); Reformation (Luther, Calvin, Münzer, Zwingli)
5. Modern Philosophy: Origins of Modern Empiricism and Mechanistic Materialism (F. Bacon, Hobbes); Modern Rationalism (Descartes, Spinoza, Leibniz); Modern Empiricism (Locke, Berkley, Hume)
6. The Enlightenment in France (Montesquieu, Voltaire, Rousseau, the Encyclopedists, Materialists)

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex004/22	History of psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of combined teaching + self-study (17 hours) per semester; preparation for the seminar thesis (14 hours); preparation for the midterm test (20 hours), 56 hours hours.
Teaching methods:
Self-study, handouts and exercises in MS Teams group discussion, guided discussion on the topic covered, heuristic method, guided self-study and work with text.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% of continuous assessment
Over the course of the semester, students will complete a term paper (analyze the main ideas from major psychologists - authored monographs that have influenced basic directions in psychology, max. 30 points), present the term paper (on schedule, max. 10 points), and successfully complete a midterm test (max. 60 points). To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, students need to perform excellently throughout the semester and be capable of independent study. Students are able to navigate through the tangle of information in various literary sources, select relevant sources of information for their study, are knowledgeable about the history of psychology, the various psychological science trends, and are able to compare the various modern psychological trends based on their knowledge.

A grade of B means that students performed above average throughout the semester, were able to study independently, have a very good command of basic information related to the history of psychology, and are able to navigate the information in the literature very well.
A grade of C means that students performed well throughout the semester, their theoretical knowledge of the history of psychology is at a good level, but they sometimes lack the ability to apply this knowledge in deeper study, to critically evaluate and compare the various literary sources of information and contemporary psychological trends.
A grade of D indicates that students were less well prepared during the semester, with moderate deficiencies in theoretical knowledge related to the history of psychology. They have considerable difficulty in working independently; they are not able to critically analyze information quite correctly on their own.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyze and compare multiple pieces of knowledge, but have mastery of most of the theoretical knowledge in the course.
A grade of Fx indicates that the student needs extra study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The aim of successful completion of the course is to be able to orient oneself correctly in the knowledge of the history of psychology, to know the psychological trends and the main founders of scientific psychology itself. Students will be able to think in context and orient themselves in the different psychological trends and currents (form psychology, behaviourism, psychodynamic psychology, existential and humanistic psychology, cognitive and transpersonal psychology), which will help them in the further education process. They will be able to compare the various modern psychological trends on the basis of their acquired knowledge. At the same time, they are able to assess, analyse and compare the findings of different psychological trends, think critically and evaluate monographs written by eminent psychologists who have influenced the basic trends in psychology. They develop their analytical thinking while working with professional monographs written by representatives of the most important psychological trends. They also learn about the development of psychology in Slovakia and important personalities in the field of psychology and pathopsychology.

Class syllabus:
1. Founders of independent psychology as a science.
2. The main psychological trends and currents.
3. Shape psychologists.
4. Behaviorism and neobehaviorism.
5. Representatives of psychodynamic psychology.
6. Existential and humanistic psychology.
7. Cognitive psychology.
8. Transpersonal psychology.
9. Postmodern psychology.
10. Development of psychology and pathopsychology in Slovakia.

Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form:
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
Attendance (5 hours), self-study (17 hours), independent work on assignments (12 hours), group work (26 hours), total 60 hours of work.
Teaching methods:
Dialogical and discussion methods, work with tests and questionnaires, work with authentic text, work with information sources, brainstorming, problem-based interpretation, elearning (Moodle or MS Teams)

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex007/22 - Social psychology

Recommended prerequisites:
B-PSYex007 Social psychology

Course requirements:
100% pass mark
The continuous assessment includes assignments and tasks for independent (40%) and group work (60% of the assessment). Independent work includes a case study (10%), a critical analysis of psychological theory (20%) and a reflective essay (10%). Group work in randomly formed subgroups consists of the creation of a case study (20%) and a proposal for a project to develop the target group's intercultural competence (40%), in which the subgroup will use knowledge from their study combination.
To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale of:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).

For a grade of A, the student correctly explains and identifies knowledge and phenomena that are part of intercultural psychology and is able to integrate them meaningfully with knowledge from other disciplines. Critically and creatively applies the information learned to school and everyday practice using a variety of tools, methods, and techniques. Can design strategies leading to change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
For a grade of B, the student can explain and identify, at an appropriate level, the knowledge and phenomena that are part of intercultural psychology and can integrate them into the knowledge of other disciplines. Critically and creatively applies the information learned to school and everyday practice using a variety of tools, methods, and techniques. Can design strategies leading to change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
A grade of C is awarded if the student can generally explain and identify knowledge and phenomena that are part of intercultural psychology and can integrate them with knowledge from other disciplines. He/she is able to apply the information acquired in school and in everyday practice using the tools, methods and techniques selected. In most cases, he/she can correctly propose strategies leading to a change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
A grade of D will be awarded if the student can explain the basic knowledge and phenomena involved in intercultural psychology and knows the interdisciplinary context. He/she can apply the acquired information with greater guidance in school and everyday practice using the selected tools, methods and techniques. In most cases, he/she will correctly propose strategies leading to a change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
For grade E, the student can only to a limited extent explain the basic knowledge and phenomena that are part of intercultural psychology and knows the interdisciplinary contexts. At a minimal level, the student is able to apply the acquired information in school and everyday practice using selected tools, methods and techniques. At least in some cases, correctly suggests strategies leading to a change in the perception of others (otherness caused by belonging to a different culture, ethnicity, etc.).
Scale of assessment (preliminary/final): 100% pass mark

Learning outcomes:
The aim of the course is to introduce the status, history of the emergence and basic terminology of intercultural psychology as well as the possibilities of developing and diagnosing intercultural competences.
Intercultural psychology is now a recognized theoretical and research field due to globalization and the intermingling of different cultures.
Upon completion of the course, the student:
- can delineate areas of inquiry in intercultural psychology and define key terms, e.g., culture, acculturation, culture shock, etc.,
- can identify universal and culturally specific aspects of the psyche,
- recognises the reactions and phenomena that arise when different cultures meet and when people move from culture to culture,
- knows the tools, methods and techniques that can be used to diagnose and develop intercultural competences,
- applies the knowledge of intercultural psychology to school practice and specifically to the teaching of psychology.

Class syllabus:
1. Definition and history of intercultural psychology (ethnology, sociology, cultural anthropology).
2. Basic terminology and areas of inquiry (culture, assimilation, ethnicity, ethnicity, ethnic consciousness, nation, nationality, ethnic minority, race, racism).

3. Stereotypes, prejudices and attitudes towards other cultures in children and adults.
4. Culture as a key concept.
5. Intercultural competences, their diagnosis and development (cognitive, affective and behavioural competences).
6. Application of intercultural psychology in school practice and psychology teaching.
7. Intercultural training and its specifics.

Educational activities:
Type of activities: lecture
Number of hours:
per week: **per level/semester:** 8s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
Scope, type/method of teaching and organizational form: lecture, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 42 hours of continuous preparation for lecture and preparation for midterm test, including study of literature; 65 hours of preparation for final test, including study of literature. A total of 120 hours of student work.
Teaching methods: explanation; demonstration of theoretical knowledge and concepts by practical examples; discussion of the topic; guided self-study; e-learning

Number of credits: 4

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of a midterm test in the scope of the first 6 topics (50 points) and in the exam period in the form of a final test (50 points). The course is completed with a grade resulting from the interim assessment of learning outcomes during the teaching part of the semester of study and from the final assessment of learning outcomes (0/50). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (mid-term test: less than 30 points; final test: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - outstanding results): excellent performance: the student has an excellent knowledge of the introduction to language study in the required range, logically arranges the facts presented, can apply and adapt the acquired linguistic knowledge in practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellent developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of the introduction to language learning to the required extent, logically organises the facts presented, can apply and adapt the linguistic knowledge acquired very well in practice,

has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, has very well-developed skills to learn;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of introductory language learning to the required extent, organises the facts presented appropriately, can reliably apply and adapt the linguistic knowledge acquired in practice, solves individual tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of the introduction to language learning within the required scope, shows some deficiencies in the arrangement of facts, can satisfactorily apply the linguistic knowledge acquired in practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge from the introduction to the study of language in the required range and deficiencies in the arrangement of facts, can minimally apply the acquired linguistic knowledge in practice, solves individual tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the introduction to language learning to the required extent, does not know the facts and their logical connections, cannot apply the linguistic knowledge acquired in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
The student has acquired a set of basic knowledge about language in general so that he/she can easily perceive the specialised explanations about language in the following years of study. At the level of the current state of scientific knowledge, the student has a thorough knowledge of basic linguistic terms and concepts and has acquired basic knowledge of the individual levels of the language system. The student is able to appropriately concretise the acquired theoretical knowledge and concepts, especially in the field of sound, lexical, morphological and syntactic subsystems of language, using practical examples of individual linguistic phenomena. He/she is also able to apply them appropriately to the solution of a problem in the field of language, being able to actively obtain and communicate the necessary information and facts and to formulate and defend relevant professional arguments appropriately. The student has developed analytical skills as well as the ability to think abstractly and critically, can think about linguistic phenomena in context and has developed the ability to expand his/her knowledge independently. He has acquired the basic theoretical knowledge of language and linguistics as well as the skills which enable him to navigate reliably through the linguistic literature and to perceive readily the interpretations of language which follow in the subsequent years of his studies. The acquired theoretical knowledge is not only prepared to deepen and develop it in further Bachelor's and subsequently Master's studies, but also to use and creatively apply it in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment. The student is also able to convey basic information about language and its individual subsystems to the general public and thus offer certain conclusions and linguistic justifications to lay audiences as well. The student has achieved a high professional level as well as a high level of linguistic culture, which is very necessary in terms of the student's future practice.

Class syllabus:
1. Language as a social phenomenon. Language and speech. System and structure of language. Basic subsystems of language, basic linguistic units differentiated according to subsytems of language, basic linguistic disciplines. Systemic relations in language. Properties of the system.

2. Language feature. Unilateral and bilateral understanding and nature of the linguistic sign.
3. Linguistic functions. Communicative, cognitive, representational and aesthetic functions of language.
4. Language and society. National language and its formations. The basic developmental line of written Slovak. Basic Slovak codification manuals and linguistic works on the Slovak language. Slovak linguists.
5. Language and consciousness. Language and thinking. Language as an individual phenomenon.
6. Language as an object of research in linguistics. Linguistics, philology, grammar. Language and writing, spelling, principles of Slovak spelling. Linguistics in the system of sciences.
7. The sound level of language. Phoneme, vowel, allophone. Phonology and phonetics. Properties of phonemes. Phonological opposites. Vowels and consonants. Diphthongs. Neutralizations and alternations. Suprasegmental phenomena.
8. Lexical subsystem of language. Word, lexeme. Meaning of a word, sememe, seme. Lexicology and its sub-disciplines. Ways of vocabulary enrichment. Word-forming structure of a word. Paradigmatic relations in vocabulary. Vocabulary breakdown and classification. Lexicography, types of dictionaries in Slovak.
9. Morphological level of language. Grammatical form. Morpheme, morphemic structure of a word, types of morphemes. Word types, criteria for defining word types, classification of word types. Lexical, grammatical and lexico-grammatical categories. Characteristic features of Slovak morphology.
10. Syntactic level. Construction, types of construction. Syntagmatics. Sentence syntax, sentence articles. Semi-sentential syntax. Sentence syntax. Suprasentential and semantic syntax.
11. Genealogical, typological and areal classification of languages. The position of Slovak among the languages. Linguistics, its development and methods. History of linguistics.
The student will thoroughly acquire basic theoretical knowledge about language and linguistics, which will not only build on the knowledge acquired in general secondary education, but will also further enable the deepening and systematic development of his/her knowledge in the field into a comprehensive form, which he/she will be able to subsequently use in application. The student will become acquainted with basic linguistic terms and concepts, acquire basic knowledge of the individual levels of the language system and the laws of its functioning. At the level of the current state of knowledge, the student will acquire relevant knowledge about language and speech, linguistic sign, content and form in language and their interrelation, the functions of language, the relationship between language and society, the stratification of language, the notion of national language, written language and other existential forms of language, the relationship between language and consciousness, language and thought, linguistics as a science of language, the history of linguistics and the classification of languages. The student will also acquire a thorough knowledge of the basic knowledge of the individual levels of the language system, become familiar with the definition of basic concepts, characteristics and classifications of linguistic phenomena in the field of sound, lexical, morphological and syntactic subsystems of language. An important aspect of the course will also be the acquisition of the ability to appropriately concretise the theoretical concepts acquired through practical examples. The student will be able to actively acquire information in the field of language and linguistics, using digital technologies and resources, effectively use the acquired knowledge, adequately formulate and defend arguments, and on their basis solve professional problems in the field, using appropriate methods of the discipline. They will also develop their communicative competences, the ability to interpret facts correctly, to take responsibility for the quality of their work, to observe the principles of authorial ethics, the ability to plan and to be actively responsible for their own learning. The student will be able to apply the acquired knowledge and skills in a reliable orientation in linguistic literature, in a prompt perception of the interpretations of language in the following years of his/her studies, thus being prepared to

deepen and develop them in further Bachelor and subsequently Master studies, as well as to use them and creatively apply them in the school environment in the position of a teaching assistant, possibly also for the needs of the publishing environment. Emphasis on raising the student's professional level and linguistic culture will be equally important in adequately conveying basic information about language in general and about phonological, lexical and grammatical linguistic phenomena to the general public, as well as in independently analysing a problem in a given field at the level of language and offering relevant conclusions, explanations and linguistic justifications to lay audiences.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex002/22	Introduction to literature study

Educational activities:
Type of activities: lecture
Number of hours:
per week: per level/semester: 8s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture, total 13 hours per semester, combined form (primarily in-person)
Student workload:13 hours of direct instruction; 10 hours of continuous class preparation; 42 hours of preparation for 2 midterm tests; 55 hours of literature study and preparation for the final written test on professional knowledge and analytical-interpretive skills. A total of 120 hours of student work.
Teaching methods: lecture, inductive-generative interview, discussion, demonstration and analysis of concrete examples, analytical and interpretative work with text, problem-based tasks, guided self-study, e-learning

Number of credits: 4

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• two continuous written tests (the first one during the semester covering the first 6 topics, the second one at the end of the continuous teaching, both tests 25 points each);
• a final written test on professional knowledge and analytical-interpretive skills (50 points).
The course is completed with an assessment resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study and from the final assessment of learning outcomes (50/50).
To pass the course, a minimum of 60 % of the points must be obtained (at least 60 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E. Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (intermediate tests: less than 15 points each; final written test: less than 30 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has an excellent knowledge of the introduction to the study of literature in the required scope, logically arranges the presented facts in a flawless manner, can apply and adapt the acquired literary knowledge at an excellent level in specific approaches to the literary text in the teaching of literature in school practice, has the ability to creatively solve individual tasks and assignments independently and

imaginatively, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is excellent, has well-developed skills for independent further learning;
B (92 - 85%, very good - above average standard): very good performance: The student has a very good knowledge of the introduction to the study of literature to the required extent, he/she arranges the facts presented logically, with only minor errors, he/she is able to apply and adapt the acquired literary knowledge very well in concrete approaches to literary texts in the teaching of literature in school practice, has the ability to solve individual tasks and assignments independently and in wider literary, literary-historical and cultural contexts, the linguistic and stylistic level of his/her expression is very good, has very well-developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: the student has a good knowledge of the introduction to the study of literature to the required extent, arranges the facts presented appropriately and makes errors only in places, can reliably apply and adapt the acquired literary knowledge in specific approaches to the literary text in the teaching of literature in school practice, reliably solves individual tasks and assignments independently, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of the introduction to the study of literature to the required extent, demonstrates some deficiencies in the arrangement of facts, can satisfactorily apply the acquired literary knowledge in specific approaches to the literary text in the teaching of literature in school practice, satisfactorily and predominantly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates minimal knowledge of introductory literature study to the extent required and significant gaps in the organization of facts, can minimally apply acquired literary knowledge in specific approaches to literary text, solves individual tasks and assignments with considerable assistance at a satisfactory level, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: student does not demonstrate sufficient knowledge of the introduction to the study of literature to the required extent, does not know the facts or their logical connections, cannot apply the acquired literary knowledge in specific approaches to the literary text, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
The student has knowledge of the theoretical-methodological and terminological apparatus of literary science, of semiotic-communicative and literary-aesthetic principles and laws of the verbal work, of the means and methods of construction of the work, of genology, versology and the issues of reception of the literary work. The student has knowledge of the methodology of literary analysis, has developed his/her analytical skills with an emphasis on independent and creative work, has acquired analytical and interpretive skills applicable to the professional and school analysis and interpretation of specific literary texts, can identify different forms of literariness and can actively seek new possibilities in approaching a literary text. The student is able to interpret a literary text in relation to other art forms. Can also work with different possible interpretations of a text in school practice. As a result of the analytical and critical approach to the literary text, the student has developed transferable competences, because especially in the analytical-interpretive part, critical thinking, thinking in context, developing communicative and digital competences are emphasised, on the basis of which the student is able to solve specific tasks, as well as to construct his/her own interpretations of literary texts. The student is able to promptly perceive interpretations of literature in the following years of his/her studies. Based on problem-solving tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to

communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further bachelor's and subsequently master's studies, but also to use and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Literary science and its disciplines. Methodology of literary science. Overview of world and domestic literary theory.
2. Possibilities of interpretation of literature. Basic methods, procedures and aspects in the analysis of a literary text. An overview of some of the major literary theoretical and interpretive movements and schools.
3. Semiotic-communicative and receptive-aesthetic nature of fiction and literary work.
4. Linguistic construction - stylistic level and expressive organization of a literary work. Stylistic (expressive) model of the text. Poetics of a poetic text. Tropes and figures.
5. Thematic construction of a literary work. The thematic model of a literary work and its basic categories (character, narrator/lyrical subject, chronotope, plot, sujet). Basics of narrative theory (narratology).
6. Compositional construction of a literary work. Compositional model of a literary work and its basic categories of external and internal composition.
7. Literary types and genres. Species and genre system of literature and its developmental dynamics. The genre nature of the literary work and the literary process.
8. Author, text, reader. The question of intentionality as a prerequisite for understanding a literary work. The meaning and sense of the text.
9. Basics of versology (metre, prosodic systems, verse, rhyme, stanza).
10. Analysis and interpretation of selected poetic texts.
11. Analysis and interpretation of selected prose and dramatic texts.

The curriculum of the course covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will acquire knowledge concerning the theoretical-methodological and terminological apparatus of literary science (its disciplines and methods within the framework of research of artistic literature), semiotic-communicative and literary-aesthetic principles and laws of the verbal work, means and procedures of linguistic, formal, thematic and compositional construction of the work, the stylistic level, means of expression, generic and genre system of literature, versology and issues of reception of the literary work. The student will be able to create simple definitions of literary terms, to give age-appropriate examples and to identify and correct the most frequent mistakes that occur when working with text in school practice. The acquired knowledge will be used appropriately when working with selected textual material. The student will be able to justify and apply various methodological procedures of literary analysis and interpretation, to evaluate the artistic contribution of a literary work, to use the experience with an artistic text in his/her own individual (reception and production) activity. Develop analytical skills with emphasis on independent and creative work. On the basis of the knowledge and skills acquired, he/she will be able to apply analytical-interpretive competencies to other literary texts, to point out the interrelationships between them, and to reflect on new possibilities of literary analysis and

interpretation. The student will acquire a base of knowledge and skills that he/she will deepen and develop in further Bachelor's and then Master's studies, he/she will be able to use them and creatively apply them in the school environment in the position of a pedagogical assistant, or for the needs of the publishing environment in the position of a text proofreader. The student's acquired knowledge and skills will be a professional prerequisite for the analysis and selection of didactic materials from literature with regard to teaching objectives. The student will develop his/her analytical-interpretive skills with an emphasis on independent and creative work, critical thinking and reasoning in context, and will be able to justify and apply various methodological approaches to the interpretation of a literary work. The student will be guided to actively acquire information and effectively use cross-cutting and specialised knowledge, will consolidate and develop his/her ability to formulate and defend arguments, and will be able to communicate theoretical knowledge and practical skills to a wider and lay public. They will creatively use appropriate and appropriate methods of the discipline in solving problem-based assignments. He/she will have the aptitude and motivation to develop the skills necessary for further learning and will be prepared to encourage pupils to actively acquire literary (especially literary-theoretical) knowledge. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own education, to develop and strengthen a sense of social responsibility and pluralistic citizenship in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex016/22	Introduction to the studying of psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
Seminar, scope of instruction: 5 hours /semester, combined method (full-time+distance)
Student workload:
Presentation teaching (5 hours); continuous preparation for class (23 hours), preparation and implementation of the seminar paper and PPT presentation (15 hours); preparation for the midterm test (16 hours), 60 hours in total.
Teaching methods:
Group discussion interview, guided discussion, active group work, heuristic method, didactic games, creation of mind maps, guided self-study and work with text.

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
Throughout the semester, students will complete a term paper (35 points), present the term paper in a study group (20 points), demonstrate their activity in the study group (10 points), and successfully complete a midterm test (35 points).
Credit will not be awarded to a student who scores less than 50% on any of the assignments.
A minimum score of 60% is required to pass the course.
Grades are awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, the student needs to produce excellent results continuously throughout the semester, be capable of independent study, and be able to critically compare professional psychology texts. The student is able to navigate through the tangle of information in various literary sources and is able to select relevant sources for his or her study, has a basic understanding of psychology as a science, and is able to compare and contrast the various modern schools of psychology on the basis of his or her knowledge.

A grade of B means that the student has performed above average throughout the semester, has been able to study independently, has mastered basic information related to psychology as a science, can navigate information in the literature very well, and has moderate deficiencies in creative and critical thinking.
A grade of C means that the student performed at a standard level during the semester, the theoretical knowledge of the subject matter is at a good level, but the ability to apply this knowledge quite correctly, to critically evaluate and compare the various literary sources and psychological knowledge is lacking.
A grade of D means that the student was less prepared during the semester, has moderate deficiencies in theoretical knowledge related to the subject of education and has more problems in independent implementation work as well as in group work, more often cannot critically analyse information or has problems applying knowledge to practice.
A grade of E means that the student fails in more than one of the assignments, lacks the ability to analyse and compare multiple pieces of knowledge, and fails to think critically and apply theoretical knowledge to practice.
A grade of Fx indicates that the student is not achieving the necessary standard and further study and extra work is required.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The aim of the course is to orient students in the history of psychology as a science as well as in the current areas of modern psychology. The student distinguishes between psychological institutions, is familiar with their activities, develops analytical and active, critical thinking when working with an assigned professional text, is able to compare and evaluate information, plan his/her activities or activities in a group (group work). Knows where and how to search for professional and relevant bibliographic resources in the field of psychology and psychology teaching and actively uses digital technologies for his/her further education and to develop his/her competences in the study of psychology teaching at the bachelor's degree level. He/she also knows his/her future career options after completing the bachelor's degree.

Class syllabus:
1. A brief history of psychology
2. The formation of psychology as a science
3. The object of psychological investigation
4. The formation of contemporary psychological knowledge
5. Modern psychology in the world and in Slovakia and its areas of research
6. Professional psychologists and their activities
7. Psychological institutions and workplaces in Slovakia
8. Classical and electronic information on psychology
9. How to study effectively
10. Slovak Association of Teachers of Psychology (SPTA) and its activities and EFPTA in the EU
11. Employment opportunities for psychology teachers in Slovakia and abroad

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex009/22	Introduction to the teaching of psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of combined teaching, self-study (17 hours) per semester; continuous preparation for class (12 hours); creation of 2 x set of teaching materials (20 hours), total of 54 hours.
Teaching methods:
Lecture, guided discussion, problem-solving, experiential methods, creation of concept maps, guided self-study, work with didactic text and information sources, critical analysis of psychology textbooks, and work with MS Teams.

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex001/22 - General psychology

Recommended prerequisites:
B-PSYex001 General psychology

Course requirements:
100% of the interim assessment.
Interim evaluation includes the performance of interim tasks according to the assignment: creation and presentation of 2 x sets of teaching materials for primary and secondary schools on a selected topic, i.e. 1 x psychological topic according to the content of the subject civics for 7. year. Elementary school, 1 x psychological topic from the selected textbook of psychology for secondary schools (50% + 50% of the evaluation). Each developed set of teaching materials includes a worksheet on the topic for class work (10% of the evaluation), a concept map on the selected topic (10% of the evaluation), an experiential activity for class work to develop the selected topic (10% of the evaluation), a critical analysis of the textbook with which the students worked (10% of the evaluation), adherence to the topic, originality, formal and professional correctness of its processing and presentation (10% of the evaluation).
A minimum of 60% of the total score is required to pass the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding results),
B (93-86%, very good – above-average standard),
C (85-76%, good - normal reliable work),

D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
A - the student continuously produces excellent results during the semester, is capable of independent study and critical comparison of professional texts in the teaching of psychology, is proficient in the fundamentals of teaching psychology as a scientific discipline, including their meaningful integration with the knowledge of other disciplines, is able to practically apply theoretical knowledge on the basis of his/her knowledge to the elaboration of the assigned tasks;
B - the student has achieved above-average results during the semester, is capable of independent study and adequate critical comparison of professional texts from the teaching of psychology, and knows the basics of teaching psychology as a scientific discipline, including their appropriate integration with the knowledge of other disciplines, is able on the basis of their knowledge to practically apply theoretical knowledge to the development of the assigned tasks;
C - during the semester, the student performed standardly well, the ability of independent study and critical comparison of professional texts from the teaching of psychology is average, the theoretical knowledge of the subject matter is at a good level, and the ability to practically apply theoretical knowledge to the development of the assigned tasks is average;
D - the student's ability of independent study and critical comparison of professional texts from the teaching of psychology is at a weaker level, the theoretical knowledge of the subject matter is moderately deficient, and the ability to practically apply theoretical knowledge to the development of the assigned tasks is a problem for the student;
E - the student fails in more than one of the assignments, lacks the ability of independent study and critical comparison of professional texts from the teaching of psychology, has deficiencies in the theoretical knowledge, and fails in the practical application of theoretical knowledge to the development of the assigned tasks.
FX - the student has not sufficiently fulfilled the requirements for passing the course and extra work is required.
Scale of assessment (preliminary/final): 100% of the interim assessment

Learning outcomes:
The aim of the course (as a key component of the gradual practical preparation for a profession in the field of psychology teaching in combination at the bachelor's degree) is to gain an overview of the tradition, concepts, objectives, and content of psychology teaching in Slovakia and abroad (documents and recommendations of SAUP and EFPTA), to realize the importance of psychological education in the context of the general objectives of education and professional training for a profession.
Student after completing the course:
- knows the specifics of teaching psychology as a secondary school subject,
- is able to navigate in the pedagogical documentation of the subject of psychology and critically analyze it,
- knows the basic principles and bases for the development of psychological thinking and psychological literacy in the subject of psychology,
- knows the theoretical foundations of the didactics of psychology,
- understands the psychodidactic aspects of teaching psychology,
- can creatively apply the acquired theoretical knowledge to the preparation of selected teaching materials,
- can critically assess the suitability of the developed teaching materials and provide constructive feedback.

Class syllabus:

1. History and concept of teaching psychology in secondary and tertiary education in Slovakia and abroad.
2. The status of the subject of psychology in the curricula of grammar schools and secondary vocational schools.
3. General aims of psychology education in higher secondary education.
4. Analysis of content and performance standards of the subject of psychology at different types of schools, basic pedagogical documentation.
5. Development of key competencies and personal and social development in the subject of psychology.
6. Specifics of teaching psychology: motivation and expectations of male and female students in teaching psychology.
7. Psychological literacy and psychological thinking - concepts and methods of their research and development.
8. Theoretical foundations of didactics of psychology.
9. Psychodidactic aspects of teaching psychology.
10. - 11. Teaching psychology in interdisciplinary contexts and inter-subject relations. Social-psychological training and subjects of personal and social development.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex023/22	Leisure time education

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Type, scope and method of educational activities:
13 hours seminar per semester, combined method
Student workload:
13 hours of teaching and 9 hours of guided self-study, 10 hours of preparation for teaching during the semester, 25 hours of preparation for midterm evaluation, 33 hours of preparation for final evaluation, 90 hours in total.
Teaching methods:
dialogical methods - interview, group discussion, problem-based methods - brainwriting, brainstorming, monological methods - lecture, interpretation, guided self-study - work with text, solving tasks and assignments.
Number of credits: 3
Recommended semester: 5th - 6th semester
Level of study: 1st degree

Number of credits: 3

Recommended semester: 6.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course: 100% pass mark.
Assessment: consists of 2 intermediate assessments (40+60, total 100 points).
Interim assessment 1: consists of the preparation of a term paper and its oral presentation or practical application in class.
Semester work: consists of a creative assignment for 40b (20+20). It includes an electronic portfolio - a plan of experiential activities in the context of leisure education based on a set structure (20b) and its presentation or application of the created activities in the classroom (20b).
Intermediate assessment 2: consists of a test of the acquired knowledge, namely a knowledge test for 60p. The written exam/test consists of theoretical preparation for the course in basic concepts and study of the literature.
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),

C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
obtain at least 91 points. For this evaluation, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to produce continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes:
By completing the subject Pedagogy of Leisure Time, the student should:
- to know the content of leisure time pedagogy as a scientific discipline: functions, goals and requirements, areas of leisure time education,
- to know the subjects of leisure education and their importance in influencing the leisure time of an individual in society in a meaningful way,
- to be able to apply the acquired knowledge in the creation of leisure time activities,
- be able to create a plan for an activity of interest and be able to apply it through practical tasks,
- be able to present their creative output to a group,
- be able to justify the appropriateness of the choice of didactic categories in the interest activity plan,
- understand the importance of leisure as a fundamental value in human life.
Transferable competences: the student strengthens soft skills such as communication skills through creative tasks on the course, digital skills - the student realizes the creation of a website as an e-portfolio with the use of feedback, interpersonal skills within the group - activation in the group, taking initiative and responsibility.

Class syllabus:

Brief outline of the course:

The pedagogy of leisure is intended to introduce students to the important sphere of leisure through leisure activities, which represent an important value for the individual and which are necessary in the targeted education of children, youth and adults. The Pedagogy of Leisure course clarifies the basic pedagogical categories in a direct link between theoretical and practical training. By completing the course, the student will gain knowledge of the basic concepts in the field of leisure pedagogy, of leisure organizations aimed at children, youth, adults, and of activating didactic methods or experiential learning for the creation of leisure activities.

Topics:

Basic concepts of leisure pedagogy. Objectives of leisure education. Didactic process of leisure education and the creation of a plan of activating leisure activities - mission, goals, tasks, principles, content, forms and methods. Educational areas of activity outside the classroom. Interests and leisure-time education. Problems of education in leisure time. Field work (streetwork), prevention, volunteering. New approaches in leisure time pedagogy. Personality of the pedagogue, social assistant, animator in the processes of leisure education. Educator and education and training in the school. Institutions and facilities providing leisure and interest activities.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex016/22	Lexical analysis

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 13 hours of continuous preparation for individual seminars; 2 x 17 hours of preparation for two practical lexical analyses of the text = 34 hours. A total of 60 hours of student work.
Teaching methods: lecture, explanation, demonstration of practical examples, exercises, analysis and problem solving, guided self-study, e-learning

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of 2 practical lexical analyses of the text in the scope of the first 5 topics and in the scope of the 6th - 11th topics, which will be focused on the application of the acquired knowledge and the identification of lexical phenomena (2 x 50 points = 100 points). To pass the course, a minimum of 60 % of the points must be obtained. A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D and a minimum of 60 points out of the total number of points for a grade of E. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (1. practical analysis: less than 30 points; 2. practical analysis: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - outstanding results): excellent performance: the student has excellent knowledge of lexicology in the required range, logically arranges the facts presented, can apply and adapt the acquired knowledge of lexicology in practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of lexicology to the required extent, logically organises the facts presented, can apply and adapt the acquired knowledge of lexicology very well in practice, has the ability to solve

individual tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of lexicology to the required extent, organises the facts presented appropriately, can reliably apply and adapt the lexical knowledge acquired in practice, solves individual tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of lexicology to the required extent, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of lexicology in practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60%, sufficient - results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of lexicology in the required range and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge from lexicology in practice, solves individual tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of lexicology to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of lexicology in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
Students are able to apply the acquired theoretical knowledge from lexicology and its disciplines in the analysis and characterisation of lexical resources and their interrelationships used in a specific text. They are reliably oriented in the vocabulary of our national language and are prepared to evaluate and justify the appropriateness, correctness and creativity of the use of lexical means in diverse types of texts. They can creatively, independently and with the use of appropriate procedures and relevant resources solve problem-solving tasks and assignments also in a broader linguistic context, not only in terms of the current state of scientific knowledge, but also in terms of school practice. They can actively acquire information about lexical resources and their use, communicate it to the public and use it in their own text production and in the cultivation of their linguistic expression. They have developed the ability to think analytically and critically. They are prepared not only to deepen and develop the acquired knowledge and skills in further bachelor's and subsequently master's studies, but also to effectively use and creatively apply them in the school environment in the position of a teaching assistant, in the publishing environment in the position of a proofreader and, after the completion of the master's degree, also in the position of a teacher of Slovak language and literature in secondary education.

Class syllabus:
1. Principles of processing of the Short Dictionary of the Slovak Language, the Dictionary of the Contemporary Slovak Language and the Synonymic Dictionary of the Slovak Language. Variations in the spelling, form, word-formation and spelling of words.
2. Arbitrariness of a linguistic sign. Motivation of words, types of lexical motivation.
3. Characteristics of vocabulary. Semasiological and onomasiological approach to lexis. Sub-systems in vocabulary. Centre and periphery in vocabulary.
4. Meaning structure of a word. Determining the lexical meaning of a word. Meaning nuance. Component analysis, semantic disjunctive signs (semes).
5. Paradigmatic relations of lexemes. Homonymy, synonymy, antonymy, hyperonymy, hyponymy, cohyponymy.
6. Syntagmatic relations of lexemes. Factors determining the connectivity of words. Changes in word connectivity as signals of extensional-intensional and transpositional meaning changes of word meaning.

7. Manifestations of dynamics in vocabulary. Vocabulary enrichment (word formation, formation of multi-word nominalizations, universalization, abreviation, multiverbalization, semi-nomasiological-onomasiological derivation, adoption of foreign lexemes, conversion). The disappearance of words.
8. Word-motivated words, their word-formation structure. Word-formation means, procedures, formations.
9. Vocabulary differentiation in terms of spelling, stylistic symptomatology and expressiveness, in terms of social and territoriality, in terms of time, in terms of origin and frequency.
10. Phrasemes. Variants of phrases, the actualization of phrases in speech.
11. Terms, their structure and formation. Logicization of terms, terminologization and determinologization.
The curriculum of the course covers a complex of knowledge from lexicology and individual lexical disciplines, which builds on the general secondary education of students and systematically develops their knowledge into a complex form with an emphasis on strengthening the ability to practically apply the acquired theoretical knowledge in lexical-semantic and word-formation analysis of words, as well as in the characterization of lexical means and their interrelationships used in a specific text. Students will be able to work correctly and efficiently with different types of dictionaries, understand the basic principles of their processing, learn to search for necessary information in them and use them in analysing lexical means used in a text, in evaluating and justifying the appropriateness and correctness of their use, as well as in their own text production and in cultivating their linguistic expression. They will be able to orient themselves reliably in the vocabulary of our national language and evaluate words in terms of spelling, expressiveness, frequency, in terms of time and in terms of belonging to different styles and stylistic layers. They will be able to identify and explain the diverse semantic relationships of words in a text, as well as to perceive and critically evaluate the particularities of their use in diverse types of texts, including their creative use in non-fiction texts. The course will lead students to actively acquire information and use knowledge effectively, consolidate and develop their ability to interpret facts, formulate arguments, propose solutions to professional problems and communicate them to the public. Students will also consolidate and develop their communication and digital skills. They will be prepared not only to deepen and develop the acquired knowledge and skills in further bachelor's and then master's studies, but also to use and creatively apply them in the publishing environment in the position of a proofreader, in the school environment in the position of a teaching assistant and, after completing their master's studies, in the position of a teacher of Slovak language and literature in secondary education.

Prerequisites:	
Course requirements: Active participation in the class is required to pass the course. The student will be evaluated in the form of a midterm test in the scope of the first 5 topics (50 points) and a final test (50 points) in the examination period. The course is completed with an assessment resulting from the interim assessment of learning outcomes during the teaching part of the semester of study and from the final assessment of learning outcomes (50/50). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E out of the total points. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (mid-term test: less than 30 points; final test: less than 30 points). The rating is awarded on a scale: A (100 - 93 %, excellent - outstanding results): excellent performance: the student has excellent knowledge of lexicology in the required range, logically arranges the facts presented, can apply and adapt the acquired knowledge of lexicology in practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills; B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of lexicology to the required extent, logically organises the facts presented, can apply and adapt the acquired knowledge of lexicology very well in practice, has the ability to solve	

individual tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of lexicology to the required extent, organises the facts presented appropriately, can reliably apply and adapt the lexical knowledge acquired in practice, solves individual tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of lexicology to the required extent, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of lexicology in practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 – 60 %, sufficient - results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of lexicology in the required range and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge from lexicology in practice, solves individual tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of lexicology to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of lexicology in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
Students have a complex knowledge of lexicology and individual lexical disciplines, they know the content and division of lexicology, the subject and methods of its research. They perceive the connection of the lexical level with other levels of the language system, the multistructure of the vocabulary and the internal differentiation of our national language. They are able to explain and concretise the acquired theoretical knowledge of lexical resources on practical examples, they are able to independently search for necessary information in relevant sources, critically evaluate them and use them appropriately when communicating their knowledge, conclusions and justifying them to the lay and professional public. They are able to perceive and evaluate various lexical phenomena not only from the point of view of the current state of scientific knowledge, but also from the point of view of school practice. They have developed the ability to think in context, to argue and to think critically. They are prepared to deepen and develop the acquired knowledge in the course of further studies, to use it effectively in the cultivation of their linguistic expression and in their own text production, as well as in the school environment in the position of a teaching assistant, in the publishing environment in the position of a proofreader and, after the completion of the master's degree, in the position of a teacher of Slovak language and literature in secondary education.

Class syllabus:
1. The lexical subsystem and its relation to other subsystems of language. Lexicology - its scope, division, subject and methods.
2. The word as the basic unit of the lexical subsystem of the language system. The word in terms of the lexical, sound, morphological and syntactic levels of language. Variants of the word.
3. Characteristics of word types in terms of their naming value. Sub-systems in the vocabulary. Lexical units in terms of paradigmatic, syntagmatic and pragmatic properties. Centre and periphery in the vocabulary.
4. Lexical semantics. The word as a linguistic sign. Meaning-forming factors. Motivation of lexemes. Component analysis, types of semantic disjunctive signs.
5. Semantic structure of a word. Manifestations of symmetrical dualism of a linguistic sign. Polysemy, homonymy and synonymy. Word connectivity and the factors that condition it. Changes in the meaning of a word.

6. Derivatology. Word-forming structure of a word, word-forming ways, means, procedures and types.
7. Manifestations of dynamics in vocabulary. Word formation (derivation, composition), universalization, multiverbalization, abreviation, appellativization, proprialization, formation of multi-word nominalizations, semiological-onomasiological derivation, acquisition from foreign languages, word extinction
8. Vocabulary differentiation from the semantic point of view, from the stylistic and expressive point of view, from the social and territorial point of view, from the temporal point of view, from the point of view of origin and frequency, from the point of view of spelling.
9. Phraseology. Characteristics of phrases, their semantic and structural classification.
10. Terminology. Properties and structure of terms, logization of terms, terminologization and determinologization.
11. Lexicography. Typology of dictionaries.
The curriculum of the course covers a complex of knowledge from lexicology and individual lexical disciplines, which builds on the general secondary education of students and systematically develops and deepens their knowledge into a comprehensive and applicable form. The course will enable students to acquire a comprehensive picture of the system in the vocabulary, the principles of its differentiation and organization, the semantic and formal relations in the vocabulary, the word as the central unit of the lexical system, its semantic and word-forming structure and its place in the vocabulary system. Students will learn knowledge and basic concepts of lexical semantics (semasiology), onomasiology, derivatology, phraseology, terminology and lexicography, which they will be able to apply in the analysis of lexical devices used in the text as well as in the evaluation of the appropriateness, correctness and creativity of their use. They will reliably orient themselves in the vocabulary of our national language, learn to differentiate and evaluate words in terms of spelling, expressiveness, frequency, in terms of time and in terms of belonging to different styles and stylistic layers, identify and explain the diverse semantic relationships of words in a text, and sensitively perceive and critically evaluate the peculiarities of their use in diverse types of texts. They will be prepared to solve problem-solving tasks and assignments independently and in a broader linguistic context, to independently search for necessary information in different types of dictionaries and in specialist literature, to critically evaluate them and to use them appropriately in communicating knowledge, conclusions and their justifications to both specialist and lay audiences. They will be prepared not only to deepen, develop and systematize the acquired knowledge in the course of their further studies, as well as in the cultivation of their linguistic expression, but also to apply it creatively in the school environment in the position of a pedagogical assistant, in the publishing environment in the position of a proofreader and, after the completion of the master's degree, also in the position of a teacher of Slovak language and literature in secondary education.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex009/22	Literature for children and youth

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 12s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 19 hours per semester, combined form (primarily in-person)
Student workload: 19 hours of direct teaching; 30 hours of continuous preparation for individual lessons with application of specific assignments, including reading of literary texts for individual lessons; 16 hours of seminar paper writing; 55 hours of literature study and preparation for the oral examination on professional knowledge and analytical-interpretive skills. A total of 120 hours of student work.
Teaching methods: lecture, inductive-generalizing interview, discussion, demonstration and analysis of concrete examples, analytical and interpretative work with text, group work, problem-based tasks, guided self-study, e-learning

Number of credits: 4

Recommended semester: 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous reading of literary texts and completion of assignments in seminars on the theoretical knowledge and practical skills required in working with literary texts (30 points);
• the production of a seminar paper which examines the work of the author studied with an emphasis on the application of the knowledge acquired about the particularities of the author's poetics, on analytical-interpretive skills and on the defence of one's arguments (20 points);
• an oral examination on professional knowledge and analytical-interpretive skills (50 points).
The course culminates in an assessment resulting from an interim review of learning outcomes during the teaching part of the semester of study and a final review of learning outcomes (50/50). To pass the course, a minimum of 60 % of the points must be obtained (at least 60 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E. Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (assignments: less than 18 points; final analysis: less than 12 points; oral examination: less than 30 points).
A (100 - 93%, excellent - outstanding results): excellent performance: The student has an excellent knowledge of Slovak literature for children and youth, its developmental phases, genre invariants,

the most important representatives and their representative works in the required scope, logically arranges the presented literary-historical facts flawlessly, the acquired literary-scientific knowledge can be applied and adapted at an excellent level in specific approaches to the literary text usable in the teaching of literature in school practice, has the ability to creatively solve individual tasks and assignments independently and imaginatively, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is excellent, has well-developed skills for independent further learning;
B (92 - 85%, very good - above average standard): very good performance: the student has a very good knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works within the required scope, logically, with only minor errors, arranges the presented literary-historical facts, the acquired literary-scientific can apply and adapt the knowledge very well in specific approaches to literary texts applicable to the teaching of literature in school practice, has the ability to independently solve individual tasks and assignments also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is very good, has very well developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: The student has a good knowledge of Slovak literature for children and young people, its developmental stages, genre invariants, the most important representatives and their representative works to the required extent, arranges the presented literary-historical facts appropriately and makes errors only in places, can reliably apply and adapt the acquired literary-historical knowledge in specific approaches to literary texts applicable to the teaching of literature in school practice, reliably solves individual tasks and assignments independently, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: Student has satisfactory knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, most important representatives and their representative works in the required range, demonstrates some deficiencies in the arrangement of literary-historical facts, can satisfactorily apply the acquired literary-historical knowledge in specific approaches to the literary text applicable to the teaching of literature in school practice, satisfactorily and predominantly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: Student demonstrates a minimal amount of knowledge about Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works in the required range, as well as significant deficiencies in the arrangement of literary-historical facts, the acquired literary-scientific knowledge can be minimally applied in specific approaches to the literary text usable in the teaching of literature in school practice, with significant help at a sufficient level, solves individual tasks and assignments, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: Student does not demonstrate sufficient knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works to the required extent, does not know literary-historical facts and their logical connections, cannot apply the acquired literary-scientific knowledge in specific approaches to literary text usable in teaching literature in school practice, cannot solve individual tasks and assignments, has insufficient skills to learn.

Learning outcomes:

The student has knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works. The student is able to creatively and independently analyse and interpret literary texts, to characterise the poeological and value specifics of the work of individual authors and to identify different forms

of literariness. Has acquired analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts, understands the specificity and artistic value of selected literary texts, and can actively seek new possibilities in approaching a literary text. The student is able to interpret a literary text in relation to other types of art. The student can also work with different possible interpretations of the text in school practice. As a result of the analytical and critical approach to the literary text, the student develops transferable competences, because especially in the analytical-interpretive part, critical thinking, thinking in context, developing communicative and digital competences are emphasised, on the basis of which the student is able to solve specific tasks, as well as to construct his/her own interpretations of literary texts. The student is able to promptly perceive interpretations of literature in the following years of his/her studies. Based on problem-solving tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further bachelor's and then master's studies, but also to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Children's recipient, age periods and genre composition of literature for children and youth. Periodization process and developmental phases of Slovak literature for children and youth. Education for literature and education through literature. Institutional and journal base of literature for children and youth. Projects promoting reading for children and young people.
2. Folktale, poetics and typology. Collectors and their concepts. Basic manuscript and printed collections. The work of S. Reuss, J. Francisci, A. H. Škultéty and P. Dobšinský. Incorporation of the fairy tale into the children's reading fund. Literary folklorism for children and youth in the 20th century. Interpretation of selected folk tales by P. Dobšinský and the work of M. Rúfus The Book of Fairy Tales.
3. Folk tale, typology, collectors. The folktale work of A. Mednyanský, J. C. Hronský, J. Horák, M. Ďuríčková, literary project Tale Map of Slovakia. Interpretation of J. C. Hronský's The Buried Sword and M. Ďuríčková's The Queen of the Danube.
4. Constituting Slovak artistic literature for children and youth in the 1930s (works for children and youth by Ľ. Podjavorinská, Ľ. Ondrejov, J. C. Hronský, M. Rázusová-Martáková, M. Hranko, M. Rázus, J. Bodenek. Interpretation of the works of J. C. Hronský's The Bold Hare and Ľ. Ondrejov's The Robber's Youth.
5. Author's fairy tale, poetics and typology. The most important Slovak creators of modern fairy tales (Ľ. Feldek, M. Ďuríčková, J. Blažková, K. Bendová and others). Interpretation of M. Ďuríčková's fairy tale Jasietka and selected fairy tales from the works of K. Bendová's Osmijanka's Fairy Tales and Ľ. Feldek's Green Deer.
6. The most important Slovak creators of modern fairy tales (D. Hevier, J. Uličiansky, E. J. Groch, J. Milčák, D. Pastirčák, D. Taragel and others). Interpretation of the author's fairy tale by D. Hevier Land of Agord, J. Uličiansky's The Little Princess, E. J. Groch's The Tramp and Clara, D. Taragel's Fairy Tales for naughty children and their caring parents.
7. Modern Slovak poetry for children. Poetic works of K. Bendová, M. Válek, Ľ. Feldek, T. Janovic, D. Hevier, Š. Moravčík, M. Rúfus and others. Janovic's Wooden Dad and his Fairy Tales.

8. Intermedia poetry for children. Poetic works of Š. Moravčík, D. Hevier and F. Rojček. Interpretation of selected poems from Moravčík's collections The Rocket with the Golden Tail and Hadakum kvadakum or the Little Book for All the Change, from Hevier's collection Don't Crawl Your Tongue on a Lion and from Rojček's collection Torka z piesku.
9. Modern social prose for children and youth (social prose K. Jarunková, J. Blažková, M. Ďuríčková, V. Šikula, D. Dušek, P. Holka, J. Šebesta, etc.). Jarunková's Tulák, M. Ďuríčková's Majka Tárajka, J. Blažková's My Great Brother Robinzon and J. Šebesta's Venussha.
10. Modern theatre, radio and television works for children. The work of Ľ. Feldek, E. Čepčeková, J. Pavlovič, M. Čeretková-Gállová, J. Mokoš, J. Milčák, J. Uličiansky, M. Grznárová, D. Dušek, J. Bodnárová, V. Klimáček. Interpretation of Feldek's play Botafogo, Milčák's play Celestínka, ryba a pán Baltazár and Uličiansky's play Peter Kľúčik.
11. Development and forms of Slovak non-fiction for children and youth. Creation of V. Zamarovský, Ľ. Zúbek and V. Ferko. Non-fiction series in the magazine Slniečko. Experiential informativeness in modern non-fiction. Interpretation of the works of V. Zamarovský's The Discovery of Troy, Ľ. Zúbek's The Empire of Svätopluk and O. Sliacky's The Wonders of Slovakia.
The curriculum of the course covers a spectrum of cross-sectional and specialized knowledge, which also builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will acquire knowledge concerning the history of Slovak literature for children and youth, its developmental phases, individual tendencies and individual ideological and aesthetic initiatives and poetics, as well as theoretical background to the characterization of invariant features of individual genres of literature for children and youth. In presenting the poetological peculiarities of the work of the most prominent figures of Slovak literature for children and youth, the specificities of the child recipient, the need for intense aesthetic stimuli from age-appropriate literature in a varied genre composition in the development of the process of text reception, as well as the potential of literature for children and youth to shape and cultivate the reader will be taken into account. The student will be able to create simple definitions of literary terms, give age-appropriate examples of these terms, and identify and correct the most common errors that occur when working with text from children's and young adult literature in school practice. The acquired knowledge will be used appropriately when working with selected textual material. The student will be able to assess the value and artistic contribution of a literary work in a literary-historical context and be able to point out the importance of knowledge of the wider literary, cultural and social context. The student will be able to justify and apply various methodological approaches to literary analysis and interpretation, and will be able to use the experience of an artistic text in his/her own individual (reception and production) activity. He/she will develop his/her analytical skills with emphasis on independent and creative work. On the basis of the knowledge and skills acquired, he/she will be able to apply analytical-interpretive competencies to other literary texts, to point out the interrelationships between them, and to reflect on new possibilities of literary analysis and interpretation. The student will also become familiar with the related practical and methodological knowledge that will be a prerequisite for his/her proper understanding of the past in the courses of the continuing Master's degree. The student will acquire a base of knowledge and skills which he/she will deepen and develop in further bachelor's and subsequently master's studies, he/she will be able to use them and creatively apply them in the school environment in the position of a pedagogical assistant, later on for the analysis and selection of didactic materials from literature for children and young people with regard to teaching objectives, and possibly also for the needs of the publishing environment in the position of a textual proofreader. The student will be guided to actively acquire information and effectively use cross-cutting and specialized knowledge, will consolidate and develop his/her ability to formulate and defend arguments, and will be able to communicate theoretical knowledge and practical skills to a wider and lay public.

An analytical and critical approach to the literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate in solving specific assignments as well as in the composition of the term paper. The student will creatively use appropriate and appropriate methods of the discipline in solving problem-based assignments. The student will acquire the prerequisites and motivation to develop the skills necessary for further learning and will be able to encourage students to actively acquire literary-historical and literary-theoretical knowledge. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own learning, to develop and consolidate a sense of socially responsible action and pluralistic civic attitudes in the spirit of democracy.

Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 12s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 19 hours per semester, combined form (primarily in-person)
Student workload: 19 hours of direct teaching; 30 hours of continuous preparation for individual lessons with application of specific assignments, including reading of literary texts for individual lessons; 16 hours of seminar paper writing; 55 hours of literature study and preparation for the oral examination on professional knowledge and analytical-interpretive skills. A total of 120 hours of student work.
Teaching methods: lecture, inductive-generalizing interview, discussion, demonstration and analysis of concrete examples, analytical and interpretative work with text, group work, problem-based tasks, guided self-study, e-learning

Number of credits: 4

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous reading of literary texts and completion of assignments in seminars on the theoretical knowledge and practical skills required in working with literary texts (30 points);
• the production of a seminar paper which examines the work of the author studied with an emphasis on the application of the knowledge acquired about the particularities of the author's poetics, on analytical-interpretive skills and on the defence of one's arguments (20 points);
• an oral examination on professional knowledge and analytical-interpretive skills (50 points).
The course culminates in an assessment resulting from an interim review of learning outcomes during the teaching part of the semester of study and a final review of learning outcomes (50/50). To pass the course, a minimum of 60 % of the points must be obtained (at least 60 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E. Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (assignments: less than 18 points; final analysis: less than 12 points; oral examination: less than 30 points).
A (100 - 93%, excellent - outstanding results): excellent performance: The student has an excellent knowledge of Slovak literature for children and youth, its developmental phases, genre invariants,

the most important representatives and their representative works in the required scope, logically arranges the presented literary-historical facts flawlessly, the acquired literary-scientific knowledge can be applied and adapted at an excellent level in specific approaches to the literary text usable in the teaching of literature in school practice, has the ability to creatively solve individual tasks and assignments independently and imaginatively, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is excellent, has well-developed skills for independent further learning;
B (92 - 85%, very good - above average standard): very good performance: the student has a very good knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works within the required scope, logically, with only minor errors, arranges the presented literary-historical facts, the acquired literary-scientific can apply and adapt the knowledge very well in specific approaches to literary texts applicable to the teaching of literature in school practice, has the ability to independently solve individual tasks and assignments also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is very good, has very well developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: The student has a good knowledge of Slovak literature for children and young people, its developmental stages, genre invariants, the most important representatives and their representative works to the required extent, arranges the presented literary-historical facts appropriately and makes errors only in places, can reliably apply and adapt the acquired literary-historical knowledge in specific approaches to literary texts applicable to the teaching of literature in school practice, reliably solves individual tasks and assignments independently, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: Student has satisfactory knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, most important representatives and their representative works in the required range, demonstrates some deficiencies in the arrangement of literary-historical facts, can satisfactorily apply the acquired literary-historical knowledge in specific approaches to the literary text applicable to the teaching of literature in school practice, satisfactorily and predominantly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: Student demonstrates a minimal amount of knowledge about Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works in the required range, as well as significant deficiencies in the arrangement of literary-historical facts, the acquired literary-scientific knowledge can be minimally applied in specific approaches to the literary text usable in the teaching of literature in school practice, with significant help at a sufficient level, solves individual tasks and assignments, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: Student does not demonstrate sufficient knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works to the required extent, does not know literary-historical facts and their logical connections, cannot apply the acquired literary-scientific knowledge in specific approaches to literary text usable in teaching literature in school practice, cannot solve individual tasks and assignments, has insufficient skills to learn.

Learning outcomes:

The student has knowledge of Slovak literature for children and youth, its developmental phases, genre invariants, the most important representatives and their representative works. The student is able to creatively and independently analyse and interpret literary texts, to characterise the poeological and value specifics of the work of individual authors and to identify different forms

of literariness. Has acquired analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts, understands the specificity and artistic value of selected literary texts, and can actively seek new possibilities in approaching a literary text. The student is able to interpret a literary text in relation to other types of art. The student can also work with different possible interpretations of the text in school practice. As a result of the analytical and critical approach to the literary text, the student develops transferable competences, because especially in the analytical-interpretive part, critical thinking, thinking in context, developing communicative and digital competences are emphasised, on the basis of which the student is able to solve specific tasks, as well as to construct his/her own interpretations of literary texts. The student is able to promptly perceive interpretations of literature in the following years of his/her studies. Based on problem-solving tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further bachelor's and then master's studies, but also to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Children's recipient, age periods and genre composition of literature for children and youth. Periodization process and developmental phases of Slovak literature for children and youth. Education for literature and education through literature. Institutional and journal base of literature for children and youth. Projects promoting reading for children and young people.
2. Folktale, poetics and typology. Collectors and their concepts. Basic manuscript and printed collections. The work of S. Reuss, J. Francisci, A. H. Škultéty and P. Dobšinský. Incorporation of the fairy tale into the children's reading fund. Literary folklorism for children and youth in the 20th century. Interpretation of selected folk tales by P. Dobšinský and the work of M. Rúfus The Book of Fairy Tales.
3. Folk tale, typology, collectors. The folktale work of A. Mednyanský, J. C. Hronský, J. Horák, M. Ďuríčková, literary project Tale Map of Slovakia. Interpretation of J. C. Hronský's The Buried Sword and M. Ďuríčková's The Queen of the Danube.
4. Constituting Slovak artistic literature for children and youth in the 1930s (works for children and youth by Ľ. Podjavorinská, Ľ. Ondrejov, J. C. Hronský, M. Rázusová-Martáková, M. Hranko, M. Rázus, J. Bodenek. Interpretation of the works of J. C. Hronský's The Bold Hare and Ľ. Ondrejov's The Robber's Youth.
5. Author's fairy tale, poetics and typology. The most important Slovak creators of modern fairy tales (Ľ. Feldek, M. Ďuríčková, J. Blažková, K. Bendová and others). Interpretation of M. Ďuríčková's fairy tale Jasietka and selected fairy tales from the works of K. Bendová's Osmijanka's Fairy Tales and Ľ. Feldek's Green Deer.
6. The most important Slovak creators of modern fairy tales (D. Hevier, J. Uličiansky, E. J. Groch, J. Milčák, D. Pastirčák, D. Taragel and others). Interpretation of the author's fairy tale by D. Hevier Land of Agord, J. Uličiansky's The Little Princess, E. J. Groch's The Tramp and Clara, D. Taragel's Fairy Tales for naughty children and their caring parents.
7. Modern Slovak poetry for children. Poetic works of K. Bendová, M. Válek, Ľ. Feldek, T. Janovic, D. Hevier, Š. Moravčík, M. Rúfus and others. Janovic's Wooden Dad and his Fairy Tales.

8. Intermedia poetry for children. Poetic works of Š. Moravčík, D. Hevier and F. Rojček. Interpretation of selected poems from Moravčík's collections The Rocket with the Golden Tail and Hadakum kvadakum or the Little Book for All the Change, from Hevier's collection Don't Crawl Your Tongue on a Lion and from Rojček's collection Torka z piesku.
9. Modern social prose for children and youth (social prose K. Jarunková, J. Blažková, M. Ďuríčková, V. Šikula, D. Dušek, P. Holka, J. Šebesta, etc.). Jarunková's Tulák, M. Ďuríčková's Majka Tárajka, J. Blažková's My Great Brother Robinzon and J. Šebesta's Venussha.
10. Modern theatre, radio and television works for children. The work of Ľ. Feldek, E. Čepčeková, J. Pavlovič, M. Čeretková-Gállová, J. Mokoš, J. Milčák, J. Uličiansky, M. Grznárová, D. Dušek, J. Bodnárová, V. Klimáček. Interpretation of Feldek's play Botafogo, Milčák's play Celestínka, ryba a pán Baltazár and Uličiansky's play Peter Kľúčik.
11. Development and forms of Slovak non-fiction for children and youth. Creation of V. Zamarovský, Ľ. Zúbek and V. Ferko. Non-fiction series in the magazine Slniečko. Experiential informativeness in modern non-fiction. Interpretation of the works of V. Zamarovský's The Discovery of Troy, Ľ. Zúbek's The Empire of Svätopluk and O. Sliacky's The Wonders of Slovakia.
The curriculum of the course covers a spectrum of cross-sectional and specialized knowledge, which also builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will acquire knowledge concerning the history of Slovak literature for children and youth, its developmental phases, individual tendencies and individual ideological and aesthetic initiatives and poetics, as well as theoretical background to the characterization of invariant features of individual genres of literature for children and youth. In presenting the poetological peculiarities of the work of the most prominent figures of Slovak literature for children and youth, the specificities of the child recipient, the need for intense aesthetic stimuli from age-appropriate literature in a varied genre composition in the development of the process of text reception, as well as the potential of literature for children and youth to shape and cultivate the reader will be taken into account. The student will be able to create simple definitions of literary terms, give age-appropriate examples of these terms, and identify and correct the most common errors that occur when working with text from children's and young adult literature in school practice. The acquired knowledge will be used appropriately when working with selected textual material. The student will be able to assess the value and artistic contribution of a literary work in a literary-historical context and be able to point out the importance of knowledge of the wider literary, cultural and social context. The student will be able to justify and apply various methodological approaches to literary analysis and interpretation, and will be able to use the experience of an artistic text in his/her own individual (reception and production) activity. He/she will develop his/her analytical skills with emphasis on independent and creative work. On the basis of the knowledge and skills acquired, he/she will be able to apply analytical-interpretive competencies to other literary texts, to point out the interrelationships between them, and to reflect on new possibilities of literary analysis and interpretation. The student will also become familiar with the related practical and methodological knowledge that will be a prerequisite for his/her proper understanding of the past in the courses of the continuing Master's degree. The student will acquire a base of knowledge and skills which he/she will deepen and develop in further bachelor's and subsequently master's studies, he/she will be able to use them and creatively apply them in the school environment in the position of a pedagogical assistant, later on for the analysis and selection of didactic materials from literature for children and young people with regard to teaching objectives, and possibly also for the needs of the publishing environment in the position of a textual proofreader. The student will be guided to actively acquire information and effectively use cross-cutting and specialized knowledge, will consolidate and develop his/her ability to formulate and defend arguments, and will be able to communicate theoretical knowledge and practical skills to a wider and lay public.

An analytical and critical approach to the literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate in solving specific assignments as well as in the composition of the term paper. The student will creatively use appropriate and appropriate methods of the discipline in solving problem-based assignments. The student will acquire the prerequisites and motivation to develop the skills necessary for further learning and will be able to encourage students to actively acquire literary-historical and literary-theoretical knowledge. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own learning, to develop and consolidate a sense of socially responsible action and pluralistic civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex032/22	Medial education

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 2., 4., 6., 8.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course:
100% of the interim grade, which includes 30% class activity (30 points) and 70% project and its defense (70 points). A minimum of 60% of the points is required to pass the course.
The rating is awarded on a scale:
A (100-94%, excellent - outstanding results), the student reflects correctly and actively both critically and creatively
knowledge in the field of Medial education, including its meaningful integration into the realities of life and pedagogical practice.
B (93-86%, very good - above average standard), the student reflects critically on knowledge appropriately,
including their meaningful integration into the realities of life and pedagogical practice.
C (85-76%, good - normal reliable work), students performed standardly well during the semester, their theoretical knowledge of Medial education is at a good level, but they lack the ability to critically apply this knowledge.
D (75-68%, satisfactory - acceptable results), students were less prepared during the semester, they have slight deficiencies in theoretical knowledge of Medial education. They cannot critically analyze information.
E (67-60%, sufficient - the results meet the minimum criteria), the student has limited theoretical knowledge, is unable to critically analyze this knowledge, is only minimally able to apply the knowledge.
Fx (59-0%, insufficient - extra work required).
Learning outcomes and transferable competences:
Learning objectives and outcomes:
The thematic focus of the course introduces students to the history of media, the importance of Medial education in school and in the family, and the selection of appropriate content for children. It explains the objectives of Medial education in primary and secondary schools, the possibilities of using media, mass media as a means of learning (Internet, television, film, magazines, electronic encyclopaedias, educational CD-ROMs, video games). It draws attention to the dangers of the

Internet and how to prevent these risks. The course guides students to identify manipulative techniques present in news, advertising, etc. It leads them to think critically about the quality and truthfulness of information, and the impact of media owners on that information.
This knowledge can be used in further studies as well as in real life. The chosen educational methods will contribute to the further development of their competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital and presentation skills; social area: cooperation, communication).
The course contributes to the gradual development of important professional competences and competencies of future teachers through its focus and methods of education.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex013/22	Methodology of academic writing in psychology

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
5 hours per semester, lecture and seminar, combined form (on-site + distance)
Student workload:
5 hours of teaching, self-study (17 hours) per semester; 8 hours of seminar work editing and editing professional texts; 20 hours of final seminar work. Total 50 hours of work.
Teaching methods:
Lecture with multimedia support, group discussions on edited texts, demonstration of analysis of stylistics of a scientific text, demonstration of creation and improvement of the content goal of a scientific text and subsequent simulation of the procedure, systematic reflective editing of processed texts.

Number of credits: 2

Recommended semester: 7.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex006/22 - Methodology of psychological research

Recommended prerequisites:
B-PSYex006 Methodology of psychological research

Course requirements:
100% of the interim evaluation
Seminar work - elaboration of a professional text according to the assignment 50% of the mark. The remaining assessment consists of in-class sub-assignments using reflective writing techniques - students assess each other's completed texts and then incorporate changes for improvement identified by the team. Students receive 10 points for each improvement and editing of the text in class before handing in the final text. A minimum score of 60% is required to pass the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required.
Grade A: the student is able to analyse and produce texts with a psychological orientation in an excellent manner. The texts produced, make use of, and synthesise modern sources from psychology

and relevant disciplines and answer predetermined professional questions in an interesting way. The student is also able to edit mistakes in other professional texts to a high standard and suggest modifications to improve the quality of the texts stylistically and in terms of content.
Grade B: the student is able to analyse and produce texts with a psychological orientation reasonably well. The texts produced, use and synthesise relevant sources in the field of psychology and answer predetermined questions. The student is able to systematically edit out errors in foreign professional texts and suggest modifications to improve the quality of the texts stylistically and in terms of content.
A grade of C is awarded if the student is moderately able to analyse and produce texts with psychological orientation. The texts produced, make use of relevant sources in the field of psychology, and answer predetermined questions. The student is able to edit mistakes in foreign professional texts and suggest modifications to improve the quality of the texts stylistically.
A grade of D is awarded if the student is able to analyse and produce texts with a psychological orientation to a satisfactory degree. The texts produced, make use of local psychological sources of older date and quality. Stylistic and grammatical errors appear more frequently in the text.
A grade of E is awarded if the student is at least minimally able to produce texts with psychological orientation. However, the student misses basic content and stylistic errors when editing texts. Errors often occur in authored texts, and the student also uses sources that are not relevant and without a broader synthesis of multiple authors.
A grade of Fx indicates that the student needs additional study to gain the necessary knowledge.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is for the student to master the procedures of producing a professional text with emphasis on standards in psychology, such as IMRaD, APA7 Publication manual, etc., and to be able to qualitatively distinguish between the level of academic and research text. Upon successful completion of the course, the student is not only able to critically evaluate the quality of available psychological scholarly resources but is also able to author his/her own psychology-oriented text (to the extent indicated in the assessment above). In the process of learning, the student will learn to critically edit texts as well as to evaluate the quality of scholarly sources. The course also aims (transferable competencies) to develop students' information literacy, and professional, methodological, and expressive skills. Emphasis is placed on working with modern information technologies in order to search the literature and then synthesize it into original texts. Regarding the development of critical thinking, students are developed in synthesizing and comparing scientific knowledge from multiple authors.

Class syllabus:
1. Origin and formulation of scientific problems, peer-review, APA JARS.
2. Argumentation and evidence in a scholarly text. APA7 model term paper template. Proper wording and stylistics of paragraphs.
3. Citation. A literature search in databases and free repositories. Synthesizing literature. Features of a professional text.
4. The most common mistakes in academic writing. Ethics in writing and plagiarism. Ethics of writing a professional text.
5. Reflective writing method in improving professional text in psychology.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex006/22	Methodology of psychological research

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
5 hours per semester, seminar, combined form (on-site + distance)
Student workload:
5 hours of teaching, self-study (17 hours) per semester; 25 hours of preparation for the midterm test; 15 hours of preparation for the seminar paper, and 35 hours of preparation for the final test and oral examination. A total of 97 hours of work.
Teaching methods:
Lecture with multimedia support, dialogical and discussion methods, demonstration of analysis of a scientific text, critical analysis of the methodological aspect of a scientific study, and self-study.

Number of credits: 4

Recommended semester: 3.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex001/22 - General psychology

Recommended prerequisites:
B-PSYde001 General Psychology

Course requirements:
50% of the interim assessment + 50% of the final assessment
The interim assessment includes a midterm test (30% of the assessment) and group work (critical analysis and presentation of the methodological framework of the assigned psychological research, 20% of the assessment). The final assessment includes a final test (30% of the mark) and an oral examination (20% of the mark). The oral examination is conducted in smaller groups and takes the form of an analysis of the methodological framework of the selected research study or questions focusing on methodology and research in the field of psychology. To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale of:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required.

Grade A: the student has an excellent understanding and reflection of the basic methodological frameworks used in the design of psychological research. The student has a very good understanding of the content and structure of these frameworks and can clearly identify their different parts in selected psychological studies.
Grade B: the student adequately understands and reflects on the basic methodological frameworks used in the design of psychological research. The student has a good understanding of the content and structure of these frameworks and can identify the vast majority of the individual parts in selected psychological studies.
A grade of C is awarded if the student predominantly understands and reflects on the basic methodological frameworks used in the design of psychological research. The student is familiar with the content and structure of these frameworks and can identify the most crucial individual parts in selected psychological studies.
Grade D is earned if the student has an average understanding and reflection of the basic methodological frameworks used in the design of psychological research. The student is familiar with the content and structure of these frameworks and can identify only some of the individual parts in selected psychological studies.
Grade E: the student has only a limited understanding and reflection of the basic methodological frameworks used in the design of psychological research. The student is familiar with the content and structure of these frameworks but finds it difficult to identify their individual parts in selected psychological studies without help.
A grade of Fx indicates that the student needs additional study to gain the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim assessment + 50% of the final assessment.

Learning outcomes:
The student will gain an overview of the knowledge of the methodology of psychology, learn the standard framework of scientific text processing in psychology (IMRaD), and adopts the ability to critically analyse the methodology of psychological studies when working independently with scientific texts. Additional knowledge includes: how knowledge is constructed in the social sciences; theoretical information about the design of psychological research projects; and the functions and types of research. The student should also learn to understand the social embeddedness of science and the ethical issues of research; critically evaluate the methodological framework of research studies; navigate information in scientific studies and the scientific literature correctly. The student is able to identify relevant literature that may be enriching to his/her teaching practice and is able to critically evaluate it based on the qualitative level of its methodological framework.

Class syllabus:
Course outcomes of the subject (content):
1. The emergence of research problems. Objectives of scientific investigation. The language of science. Paradigm, theory, research, methodology, method. History of psychological research. Research as a scientific method of knowledge.
2. IMRaD. Research preparation. Research project: theoretical, methodological, and implementation part.
3. Ethics in research.
4. The relationship between theory and empirics in research. Psychological research: specifics and definition. Basic types of research. 20th century - crisis in research, current challenges in the 21st century.
5. Research structure and strategies. Quantitative and qualitative approaches.

6. Basic data collection techniques: observation, experiment, interview, focus groups, questionnaire, psychological test, case study, document study/analysis, semantic differential.
7. Outcomes in psychological research: evaluation and interpretation of quantitative and qualitative data. Secondary data analysis and meta-analysis.
8. Discussion in research, peer-review, publication of results, and new trends in research methodology.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex017/22	Morphological analysis

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 13 hours of continuous preparation for individual seminars; 2 x 17 hours of continuous preparation for 2 practical morphological analyses of text = 34 hours. A total of 60 hours of student work.
Teaching methods: explanation, application of theoretical knowledge in practical analyses of grammatical forms, morphemes and word types; analysis and solution of problem solving tasks; guided self-study; e-learning

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of 2 practical morphological analyses of the text in the scope of the first 5 topics and in the scope of the 6th - 11th topics, which will be focused on the application of the acquired knowledge and the identification of morphological phenomena (2 x 50 points = 100 points). The course is completed with an assessment resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E out of the total number of points. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (1. practical analysis: as less than 30 points; 2. practical analysis: as less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - excellent results): excellent performance: the student has excellent knowledge of morphological analysis in the required range, logically arranges the presented facts, can apply and adapt the acquired knowledge of morphological analysis in practice, has the ability to independently solve individual morphological tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;

B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of morphological analysis to the required extent, logically organises the facts presented, can apply and adapt the acquired knowledge of morphological analysis very well in practice, has the ability to solve individual morphological tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of the student's speech is very good, and the student has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of morphological analysis to the required extent, organises the facts presented appropriately, can reliably apply and adapt the knowledge gained from morphological analysis in practice, solves individual morphological tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of morphological analysis in the required range, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of morphological analysis in practice, satisfactorily solves individual morphological tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of morphological analysis in the required range and deficiencies in the arrangement of facts, the acquired knowledge of morphological analysis can be minimally applied in practice, solves individual morphological tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of morphological analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of morphological analysis in practice, cannot solve individual morphological tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student is introduced to the morphological system as part of the grammatical system of the language, as well as to selected sub-issues of Slovak morphology, also with regard to school practice. He/she has acquired practical skills which he/she can apply in assessing and analysing morphological phenomena of the language. The student is able to use the acquired theoretical knowledge in its concretization on practical examples, both in solving individual morphological phenomena, as well as in practical morphological analyses of grammatical forms and word types, in complex analysis of morphological phenomena, in independent solving of morphological problems and in possible synthesis of new and creative solutions, while the student is able to actively acquire and communicate the necessary information and facts, and to adequately formulate and defend the relevant professional arguments. He/she has developed his/her analytical skills as well as abstract and critical thinking skills, is able to think in context and has developed the ability to expand his/her knowledge independently. The student is able to creatively apply the acquired knowledge and skills in his/her further studies. He is able to look at morphological phenomena in a broader linguistic (especially syntactic) context, but he is also able to use them in assessing, analysing and evaluating the morphological aspects of linguistic expressions in the school environment in the position of a teaching assistant, or for the needs of the publishing environment when proofreading linguistic expressions. The student is also able to convey information about morphological phenomena to the general public and to offer conclusions and morphological justifications to lay audiences. The student has achieved a high professional level as well as a high level of linguistic culture, which is very necessary in terms of the student's future practice.

Class syllabus:

1. Morphology and its place in the language system. The essence and subject of morphology. Relationship of the morphological subsystem to other subsystems of language. Identification and analysis of grammatical forms as central units of the morphological subsystem, especially in relation to the word and syntactic construction. Issues of word-species transitions.
2. Grammatical form and its structure. Determining the morphological structure of a grammatical shape, i.e. the formative base and the formative formant in specific grammatical shapes.
3. Analysis of the concepts and terms lexico-semantic category, grammatical category, lexico-grammatical category. Word types, criteria for defining word types and their classification from the lexico-semantic, morphological and syntactic point of view. Determination of word species.
4. Morpheme, morphemic structure of word and form (in relation to word-formation and morphological structure of word and form). Determination of individual types of morphemes and submorphemes.
5. Typological classification of languages and morphological type of Slovak. Application of theoretical knowledge to the material of Slovak.
6. Paradigmatics, determining and practising nouns. Determination of nominal grammatical categories and inflection of nouns. Inflectional patterns of nouns.
7. Paradigmatics, determining and practising other nominal word types - adjectives, pronouns and numerals. Determination of nominal grammatical categories, inflection and inflection patterns of nominal word types, gradation of adjectives.
8. Paradigmatics, determining and practising verbs. Analyzing and practicing auxiliary verbs, personal and impersonal verbs, subject and non-subject verbs, definite and indefinite verb forms, simple and compound descriptive and reflexive verb forms. Distinguish between the concepts of the reflexive verb, the reflexive form of an irreversible verb and the reflexive form of an irreversible verb and identify them.
9. Determining verb grammatical and lexico-grammatical categories. Verb tenses, especially from the point of view of the application of the standard of written Slovak, determination of verb tense patterns.
10. Formation and gradation of adverbs. Practicing the problem of adverbs.
11. Identifying and practising prepositions, conjunctions and linking expressions, particles and quotation marks.
On the basis of the use of the acquired theoretical knowledge of Slovak morphology, which will not only build on the knowledge acquired in the field within the general secondary education, but will also further enable the deepening and systematic development of his/her knowledge into a complex form, the student will acquire practical skills, which he/she will be able to apply in the assessment and analysis of morphological phenomena of the language. The student will be able to use the acquired theoretical knowledge about the morphological level of the language as a part of the grammatical system of written Slovak, about the grammatical shape as the central morphological unit, about grammatical, lexical-semantic and lexical-grammatical categories, about the morpheme as the smallest unit of morphology, about the characteristic features of Slovak morphology in terms of morphological typology of languages, as well as about individual word types as basic word groups in their concretization on practical examples on individual morphological phenomena, as well as in practical morphological analyses of grammatical forms and word types, in complex analysis of morphological phenomena, in independent solving of morphological problems and possible synthesis of their new and creative solutions. The student will be guided to actively acquire information from the field of Slovak morphology, to use digital technologies and resources, to use the acquired knowledge effectively, to formulate and defend arguments appropriately and on their basis to solve professional problems in the field, using appropriate methods of the discipline. He/she will also develop his/her communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to follow the principles of authorial ethics, to

plan and be actively responsible for his/her own learning. He will also learn to look at the acquired knowledge base from the perspective of school practice. The acquired knowledge and skills will also be necessary for the student in his/her further studies, where he/she will be able to apply them convincingly when looking at morphological linguistic phenomena from a broader linguistic (especially syntactic) aspect and further deepen and develop them. He will also be able to apply the acquired knowledge in assessing, analysing and evaluating the morphological aspect of linguistic expressions and subsequent independent analysis of the problem in the given area at the level of language in the school environment in the position of a teaching assistant, or also for the needs of the publishing environment when correcting linguistic expressions. Emphasis on raising the student's professional level and linguistic culture will be equally important in adequately conveying information about morphological phenomena to the general public, as well as in offering relevant conclusions and morphological justifications to lay audiences.

C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of morphological analysis to the required extent, organises the facts presented appropriately, can reliably apply and adapt the knowledge gained from morphological analysis in practice, solves individual morphological tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of morphological analysis in the required range, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of morphological analysis in practice, satisfactorily solves individual morphological tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of morphological analysis in the required range and deficiencies in the arrangement of facts, the acquired knowledge of morphological analysis can be minimally applied in practice, solves individual morphological tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of morphological analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of morphological analysis in practice, cannot solve individual morphological tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student is introduced to the morphological system as part of the grammatical system of the language, as well as to selected sub-issues of Slovak morphology, also with regard to school practice. He/she has acquired practical skills which he/she can apply in assessing and analysing morphological phenomena of the language. The student is able to use the acquired theoretical knowledge in its concretization on practical examples, both in solving individual morphological phenomena, as well as in practical morphological analyses of grammatical forms and word types, in complex analysis of morphological phenomena, in independent solving of morphological problems and in possible synthesis of new and creative solutions, while the student is able to actively acquire and communicate the necessary information and facts, and to adequately formulate and defend the relevant professional arguments. He/she has developed his/her analytical skills as well as abstract and critical thinking skills, is able to think in context and has developed the ability to expand his/her knowledge independently. The student is able to creatively apply the acquired knowledge and skills in his/her further studies. He is able to look at morphological phenomena in a broader linguistic (especially syntactic) context, but he is also able to use them in assessing, analysing and evaluating the morphological aspects of linguistic expressions in the school environment in the position of a teaching assistant, or for the needs of the publishing environment when proofreading linguistic expressions. The student is also able to convey information about morphological phenomena to the general public and to offer conclusions and morphological justifications to lay audiences. The student has achieved a high professional level as well as a high level of linguistic culture, which is very necessary in terms of the student's future practice.

Class syllabus:

1. Morphology and its place in the language system. The essence and subject of morphology. Relationship of the morphological subsystem to other subsystems of language. Identification and analysis of grammatical forms as central units of the morphological subsystem, especially in relation to the word and syntactic construction. Issues of word-species transitions.
2. Grammatical form and its structure. Determining the morphological structure of a grammatical shape, i.e. the formative base and the formative formant in specific grammatical shapes.
3. Analysis of the concepts and terms lexico-semantic category, grammatical category, lexico-grammatical category. Word types, criteria for defining word types and their classification from the lexico-semantic, morphological and syntactic point of view. Determination of word species.
4. Morpheme, morphemic structure of word and form (in relation to word-formation and morphological structure of word and form). Determination of individual types of morphemes and submorphemes.
5. Typological classification of languages and morphological type of Slovak. Application of theoretical knowledge to the material of Slovak.
6. Paradigmatics, determining and practising nouns. Determination of nominal grammatical categories and inflection of nouns. Inflectional patterns of nouns.
7. Paradigmatics, determining and practising other nominal word types - adjectives, pronouns and numerals. Determination of nominal grammatical categories, inflection and inflection patterns of nominal word types, gradation of adjectives.
8. Paradigmatics, determining and practising verbs. Analyzing and practicing auxiliary verbs, personal and impersonal verbs, subject and non-subject verbs, definite and indefinite verb forms, simple and compound descriptive and reflexive verb forms. Distinguish between the concepts of the reflexive verb, the reflexive form of an irreversible verb and the reflexive form of an irreversible verb and identify them.
9. Determining verb grammatical and lexico-grammatical categories. Verb tenses, especially from the point of view of the application of the standard of written Slovak, determination of verb tense patterns.
10. Formation and gradation of adverbs. Practicing the problem of adverbs.
11. Identifying and practising prepositions, conjunctions and linking expressions, particles and quotation marks.
On the basis of the use of the acquired theoretical knowledge of Slovak morphology, which will not only build on the knowledge acquired in the field within the general secondary education, but will also further enable the deepening and systematic development of his/her knowledge into a complex form, the student will acquire practical skills, which he/she will be able to apply in the assessment and analysis of morphological phenomena of the language. The student will be able to use the acquired theoretical knowledge about the morphological level of the language as a part of the grammatical system of written Slovak, about the grammatical shape as the central morphological unit, about grammatical, lexical-semantic and lexical-grammatical categories, about the morpheme as the smallest unit of morphology, about the characteristic features of Slovak morphology in terms of morphological typology of languages, as well as about individual word types as basic word groups in their concretization on practical examples on individual morphological phenomena, as well as in practical morphological analyses of grammatical forms and word types, in complex analysis of morphological phenomena, in independent solving of morphological problems and possible synthesis of their new and creative solutions. The student will be guided to actively acquire information from the field of Slovak morphology, to use digital technologies and resources, to use the acquired knowledge effectively, to formulate and defend arguments appropriately and on their basis to solve professional problems in the field, using appropriate methods of the discipline. He/she will also develop his/her communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to follow the principles of authorial ethics, to

plan and be actively responsible for his/her own learning. He will also learn to look at the acquired knowledge base from the perspective of school practice. The acquired knowledge and skills will also be necessary for the student in his/her further studies, where he/she will be able to apply them convincingly when looking at morphological linguistic phenomena from a broader linguistic (especially syntactic) aspect and further deepen and develop them. He will also be able to apply the acquired knowledge in assessing, analysing and evaluating the morphological aspect of linguistic expressions and subsequent independent analysis of the problem in the given area at the level of language in the school environment in the position of a teaching assistant, or also for the needs of the publishing environment when correcting linguistic expressions. Emphasis on raising the student's professional level and linguistic culture will be equally important in adequately conveying information about morphological phenomena to the general public, as well as in offering relevant conclusions and morphological justifications to lay audiences.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex008/22	Morphology

Educational activities:
Type of activities: lecture
Number of hours:
per week: **per level/semester:** 10s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 42 hours of continuous preparation for lecture and preparation for midterm test, including study of literature; 65 hours of preparation for final test, including study of literature. A total of 120 hours of student work.
Teaching methods: explanation; demonstration of theoretical knowledge and concepts through practical examples; discussion of the topic covered; guided self-study; e-learning

Number of credits: 4

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of a midterm test within the scope of the first 4 topics (50 points) and in the exam period in the form of a final test (50 points). The course is completed with an assessment resulting from the interim review of learning outcomes during the teaching part of the semester of study and from the final review of learning outcomes (50/50). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course, a minimum of 60% of the points must be obtained. Credit will not be awarded to a student who obtains less than 60% of the points in any component of the assessment (mid-term test: less than 30 points; final test: less than 30 points).
The rating is awarded on the basis of a scale:
(100 - 93 %, excellent - outstanding result): excellent performance: the pupil has excellent knowledge of morphology to the required extent, logically arranges the facts presented, can apply and adapt the acquired knowledge of morphology in practice, has the ability to independently solve individual morphological tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has well-developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the pupil has a very good knowledge of morphology to the required extent, organises the facts presented logically, can apply and adapt the acquired knowledge of morphology in practice very well, has the ability to solve individual morphological tasks and assignments independently and in a broader linguistic

context, the linguistic and stylistic level of his/her expression is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the pupil has a good knowledge of morphology to the required extent, organises the facts presented appropriately, can reliably apply and adapt the acquired knowledge of morphology in practice, solves individual morphological tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory results: the pupil has satisfactory knowledge of morphology to the required extent, shows some deficiencies in the organisation of facts, can satisfactorily apply the acquired knowledge of morphology in practice, satisfactorily solves individual morphological tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - results meet minimum criteria): sufficient performance: student demonstrates a minimum amount of knowledge of morphology in the required range and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge of morphology in practice, solves individual morphological tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of morphology to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of morphology in practice, cannot solve individual morphological tasks and assignments, has insufficient learning skills.

Learning outcomes:
By familiarizing himself with the morphology of written Slovak, the student has acquired comprehensive theoretical knowledge and knowledge of the morphological system as a part of the grammatical system of written Slovak. The student has thoroughly acquired knowledge of grammatical form, morphemes, linguistic categories and individual word types, and has acquired theoretical knowledge of selected sub-issues of Slovak morphology, while being able to view the phenomena from the perspective of the current state of scientific knowledge as well as from the perspective of school practice. The student is able to concretise the acquired theoretical knowledge of morphology on practical examples of individual morphological phenomena. He/she is also able to use them appropriately to solve a problem in the field of morphology, while being able to actively obtain and communicate the necessary information and facts and to formulate and defend relevant professional arguments appropriately. The above leads to the fact that he/she has developed analytical skills as well as the ability to think abstractly and critically, he/she is forced to think in contexts and has also developed the ability to expand his/her knowledge independently. The thoroughly acquired theoretical knowledge of morphology and the acquired skills are important for the student's further studies and are a prerequisite for judging and evaluating morphological phenomena also in broader grammatical correlations. The acquired theoretical knowledge of the morphology of written Slovak is not only prepared to deepen and develop in further Bachelor's and then Master's studies, but can also be used and creatively applied in the school environment in the position of a pedagogical assistant, or for the needs of the publishing environment in the position of a text proofreader. The student can also communicate information about morphological phenomena to the general public and offer conclusions and morphological justifications to lay audiences. The student has achieved a high professional level as well as a high level of linguistic culture, which is very necessary in terms of the student's future practice.

Class syllabus:
1. Morphology and its place in the language system. The essence and subject of morphology, basic concepts, methodology. The central unit of morphology: grammatical form. Relationship of morphology to other linguistic levels. Grammatical form and its structure.

2. Morphological or grammatical categories (nominal, verbal), lexico-semantic and lexico-grammatical categories. Verbal species. Criteria for defining word species. Classification of word species in lexico-semantic, morphological and syntactic terms.
3. Morpheme as the smallest unit of morphology. Morphematic structure of word and form. Types of morphemes and submorphemes.
4. Typological classification of languages. Morphological type of Slovak.
5. Lexical-semantic nature and classification of nouns. Grammatical categories and inflection of nouns.
6. Lexical-semantic nature and classification of adjectives. Inflection and gradation of adjectives. Adjectivals.
7. Lexico-semantic nature and classification of pronouns. Pronouns.
8. Lexical-semantic nature and classification of numerals. Lexicalisation of numerals.
9. Lexical-semantic nature and division of verbs and verb forms. Verbal grammatical and lexico-grammatical categories and verb tenses.
10. Lexical-semantic nature, division, formation and gradation of adverbs.
11. Lexico-semantic characteristics and classification of prepositions, conjunctions, particles and quotation marks.
The student will thoroughly acquire theoretical knowledge about the morphological level of the language as a part of the grammatical system of written Slovak, which will not only build on his knowledge acquired in the field within the general secondary education, but will also further enable the deepening and systematic development of his knowledge in the field of Slovak morphology into a comprehensive form, which he will be able to subsequently use in application. At the level of the current state of knowledge, the student will acquire relevant knowledge about the grammatical form as the central morphological unit and its structure, as well as about the morpheme as the smallest unit of morphology and the individual types of morphemes and submorphemes, and will master the issues of grammatical, lexical-semantic and lexical-grammatical categories, get acquainted with the characteristic features of Slovak morphology in terms of morphological typology of languages, gain relevant knowledge about the lexical-semantic essence, morphological and syntactic characteristics of individual word types as basic word groups and deepen theoretical knowledge about selected sub-issues of Slovak morphology. An important aspect of the course will also be to look at morphological theory with regard to school practice, as well as to acquire the ability to appropriately concretize the acquired theoretical morphological concepts on concrete practical examples. The student will be guided to actively acquire information in the field of Slovak morphology, to use digital technologies and resources, to use the acquired knowledge effectively, to formulate and defend arguments appropriately and on their basis to solve professional problems in the field, using appropriate methods of the discipline. They will also develop their communicative competences, the ability to interpret facts correctly, to take responsibility for the quality of their work, to follow the principles of authorial ethics, the ability to plan and be actively responsible for their own learning. The acquired knowledge and skills will be applied and developed in the student's further Bachelor's and Master's studies, because they will enable him to perceive morphological phenomena in a broader linguistic (especially syntactic) context, and he will be able to use them creatively in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment and proofreading practice. Emphasis on raising the student's professional level and linguistic culture will prove to be equally important in adequately conveying information about morphological phenomena to the general public, as well as in independently analysing a problem in a given area at the language level and offering relevant conclusions, explanations and morphological justifications to lay audiences as well.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex033/22	Multicultural education

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 1., 3., 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course:
Weighting of interim and final assessment: 100/0, the course ends with an assessment.
Students will develop two interim activities/projects as part of the interim coursework assessed at 40% and 40%. Activity and preparation in seminars is assessed (20%). A total of 100% of the interim assessment.
Students will choose one of the activities, work it systematically and develop it into a comprehensive lesson preparation according to this structure:
a. Objectives of the activity (what skills and abilities it develops - students will choose an appropriate topic according to their apprenticeship, where they will be able to apply the activity as a cross-cutting theme).
b. Target group of the activity (for which pupils it could be used).
c. Time and space (how long it would take, any special space requirements).
d. Activity flow (a brief scenario of how the student would carry it out).
e. Evaluation of the activity (different ways of assessing pupils, self-assessment, etc.).
f. Theoretical perspective on the activity (interpretation of the activity based on at least three key words from multicultural education theory).
g. Literature used.
The evaluation will assess the fulfilment of the principles of multicultural education, the suitability of the activity for teaching within the cross-cutting theme of multicultural education, the systematic nature of the preparation and the interconnectedness of its components. Negative evaluations are given to projects that could reinforce stereotypes and prejudices among pupils or in which students present stereotypical views of other cultures.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results), students will produce an original project that is thought through as a coherent whole to develop intercultural understanding, all criteria are met at an excellent level.
B (90-81%, very good - above average standard), students creatively develop a project that will assist in developing intercultural understanding, Criteria are met at a very good level.

C (80-73%, good - normal reliable work), students will produce a project that does not undermine the principles of multicultural education, Criteria are met at a good level.
D (72-66%, satisfactory - acceptable results), students will develop a project that is not internally intertwined but does not violate the principles of multicultural education, the criteria are met satisfactorily.
E (65-60%, sufficient - results meet minimum criteria), students will develop a project that marginally undermines the principles of multicultural education, Criteria are met sufficiently.
Fx (59-0%, insufficient - extra work required), students will develop a project that promotes cultural stereotypes and biases. The project does not meet the minimum criteria.

Learning outcomes:

Learning outcomes and transferable competences:
Learning objectives and outcomes:
Students understand the principles and practices of multicultural education. They know how to work with stereotypes and prejudices in the classroom. They can plan and design multicultural education and integrate it as a cross-curricular topic in the classroom. They develop intercultural understanding. They master the main didactical procedures for the implementation of multicultural education as a cross-cutting theme.
Learning objectives:
To provide students with the basic information needed to understand the principles of multicultural education as a cross-cutting theme in the national curriculum. To teach students how to work with the issue of stereotypes and prejudices, to teach them how to plan and design multicultural education in schools as a cross-cutting theme. To familiarize students with the basic didactic practices in the implementation of multicultural education in education

Class syllabus:

Brief outline of the course:
The problem facing multicultural education - stereotypes and prejudices in us. Encountering another culture. Culture shock. How we get information about other cultures. How to cope with the arrival of foreigners. What we think about intercultural communication. Migration and values in multicultural education. How to proceed in multicultural education. Assessment in multicultural education.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex033/22	Multicultural education

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 2., 4., 6., 8.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisites for successful completion of the course:
Weighting of interim and final assessment: 100/0, the course ends with an assessment.
Students will develop two interim activities/projects as part of the interim coursework assessed at 40% and 40%. Activity and preparation in seminars is assessed (20%). A total of 100% of the interim assessment.
Students will choose one of the activities, work it systematically and develop it into a comprehensive lesson preparation according to this structure:
a. Objectives of the activity (what skills and abilities it develops - students will choose an appropriate topic according to their apprenticeship, where they will be able to apply the activity as a cross-cutting theme).
b. Target group of the activity (for which pupils it could be used).
c. Time and space (how long it would take, any special space requirements).
d. Activity flow (a brief scenario of how the student would carry it out).
e. Evaluation of the activity (different ways of assessing pupils, self-assessment, etc.).
f. Theoretical perspective on the activity (interpretation of the activity based on at least three key words from multicultural education theory).
g. Literature used.
The evaluation will assess the fulfilment of the principles of multicultural education, the suitability of the activity for teaching within the cross-cutting theme of multicultural education, the systematic nature of the preparation and the interconnectedness of its components. Negative evaluations are given to projects that could reinforce stereotypes and prejudices among pupils or in which students present stereotypical views of other cultures.
The rating is awarded on a scale:
A (100-91%, excellent - outstanding results), students will produce an original project that is thought through as a coherent whole to develop intercultural understanding, all criteria are met at an excellent level.
B (90-81%, very good - above average standard), students creatively develop a project that will assist in developing intercultural understanding, Criteria are met at a very good level.

C (80-73%, good - normal reliable work), students will produce a project that does not undermine the principles of multicultural education, Criteria are met at a good level.
D (72-66%, satisfactory - acceptable results), students will develop a project that is not internally intertwined but does not violate the principles of multicultural education, the criteria are met satisfactorily.
E (65-60%, sufficient - results meet minimum criteria), students will develop a project that marginally undermines the principles of multicultural education, Criteria are met sufficiently.
Fx (59-0%, insufficient - extra work required), students will develop a project that promotes cultural stereotypes and biases. The project does not meet the minimum criteria.

Learning outcomes:

Learning outcomes and transferable competences:
Learning objectives and outcomes:
Students understand the principles and practices of multicultural education. They know how to work with stereotypes and prejudices in the classroom. They can plan and design multicultural education and integrate it as a cross-curricular topic in the classroom. They develop intercultural understanding. They master the main didactical procedures for the implementation of multicultural education as a cross-cutting theme.
Learning objectives:
To provide students with the basic information needed to understand the principles of multicultural education as a cross-cutting theme in the national curriculum. To teach students how to work with the issue of stereotypes and prejudices, to teach them how to plan and design multicultural education in schools as a cross-cutting theme. To familiarize students with the basic didactic practices in the implementation of multicultural education in education

Class syllabus:

Brief outline of the course:
The problem facing multicultural education - stereotypes and prejudices in us. Encountering another culture. Culture shock. How we get information about other cultures. How to cope with the arrival of foreigners. What we think about intercultural communication. Migration and values in multicultural education. How to proceed in multicultural education. Assessment in multicultural education.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPg/B-VUZex028/22	**Course title:** Pedagogy of individuals with special educational needs
Educational activities: **Type of activities:** seminar **Number of hours:** **per week:** **per level/semester:** 5s **Form of the course:** combined	
Number of credits: 3	
Recommended semester: 1., 3., 5., 7.	
Educational level: I.	
Prerequisites:	

Course requirements:

Prerequisite subjects: none

Prerequisites for successful completion of the course:

The course is completed by assessment, 100% of the interim assessment. Interim assessment includes: the student will prepare a seminar paper (maximum possible number of points - 40). The seminar paper is a condition for the award of the overall grade. The student completes an intermediate written examination of knowledge (maximum possible points - 60). For successful completion of the course, it is necessary to obtain at least 60% of the points (min. 60 out of 100 points).

The rating is awarded on a scale:

A (100-91%, excellent - excellent results with only minimal errors),

B (90-81%, very good - above average results with minor errors),

C (80-73%, good - normal reliable work, average results),

D (72-66%, satisfactory - acceptable results, but significant errors occur),

E (65-60%, sufficient - results meet minimum criteria),

Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).

A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.

A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help

of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to work through assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, and completion of assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
Learning objectives and outcomes:
The aim of the course Pedagogy of Individuals with Special Educational Needs is to make available basic information about the specifics of educating individuals with special educational needs and to prepare the student for pedagogical work in the context of the diversity of the educated population. The student will be able to define the term special educational needs, categorize individuals with special educational needs (SEN) in relation to the current system of special education and in accordance with current legislation. Becomes familiar with basic terminology in special education. Is able to characterize the educational opportunities for individuals with SEN. Can explain the implications of a disability/impairment/threat and/or other SEN in the educational process. Knows and understands the specifics of educating individuals with SEND. Can name and justify selected support measures in the education of children and pupils with SEND. Explain the importance of the teacher's cooperation with other educational and professional staff of the school and the school counselling centre in the care of pupils with SEN included in mainstream education. Know the educational programmes for pupils with SEND and understand the Individual Education Programme document. The student is prepared to address the risks associated with the inclusion of a pupil with SEND in a classroom of able-bodied classmates.
Transferable competences developed during the students' work in the seminars: critical thinking skills, reasoning in context, communication skills

Class syllabus:
Brief outline of the course:
General foundations and terminological definition of special education.
Definition of basic terms in special education.
Trends in education, current opportunities and legislative conditions in education of individuals with SEND (with a focus on inclusive education).
Specifics of education and support measures for children and pupils with SEN according to individual categories:
pupils with intellectual disabilities and cognitive impairment; pupils with autism spectrum disorder; pupils with physical disabilities, illnesses and disabilities; pupils with impaired communication skills; pupils with specific learning disabilities; pupils with behavioural disorders; pupils from socially disadvantaged backgrounds; gifted and exceptionally gifted pupils.
Educational programmes and individual educational programme for pupils with SEN.
The position of a pupil with SEN in a class group of intact classmates.

Cooperation of the teacher with other pedagogical and professional staff of the school and the school counselling centre in the care of SEN pupils (inclusive team).

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex008/22	Personality psychology

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 11s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
11 per semester; lecture and seminar, combined method (mostly full-time + distance)
Student workload:
11 hours of teaching, 33 hours of self-study per semester, 16 hours of seminar paper preparation, 30 hours of exam preparation, total 90 hours of work.
Teaching methods:
lecturing, instruction, discussion on a selected topic, case studies, brainstorming, work with professional text and information sources.

Number of credits: 4

Recommended semester: 5.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex005/22 - Developmental psychology

Recommended prerequisites:
PSYex005 Developmental psychology

Course requirements:
50% of the interim assessment and 50% of the final assessment.
Interim assessment is 50% of the grade, the student will prepare a seminar paper. The final assessment consists of a written knowledge test (30%) and an oral examination (20%). To pass the course, a minimum of 60% marks is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
For grade A, the student produces excellent results continuously throughout the semester, is capable of independent study and critical comparison of professional texts in personality psychology, is proficient in the fundamentals of personality psychology as a scientific discipline, including their meaningful integration with the knowledge of other disciplines, is able to practically apply theoretical knowledge on the basis of his/her knowledge to the elaboration of the assigned tasks.

For a grade of B, the student achieves above-average results during the semester, is capable of independent study and adequate critical comparison of professional texts in personality psychology, is proficient in the fundamentals of personality psychology as a scientific discipline, including their reasonable integration with the knowledge of other disciplines, is able to apply theoretical knowledge practically on the basis of his/her knowledge to the elaboration of the assigned tasks.
For a grade of C, the student performs standardly well during the semester, is average in independent study and critical comparison of professional texts in the psychology of personality, achieves an average level of theoretical knowledge of the subject matter and the ability to practically apply theoretical knowledge to the development of the assigned tasks.
For grade D, the student is capable of a weaker level of independent study and critical comparison of professional texts in the psychology of personality, he/she has moderate deficiencies in the theoretical knowledge of the subject matter, the ability to practically apply theoretical knowledge to the elaboration of the assigned tasks is a problem for the student.
For grade E the student fails in some of the assigned tasks, lacks the ability to study independently and critically compare professional texts in the psychology of personality, has deficiencies in theoretical knowledge, fails in the practical application of theoretical knowledge to the development of the assigned tasks.
A grade of Fx means that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 50% of the interim assessment and 50% of the final assessment

Learning outcomes:

:
The aim is to know the psychological theoretical foundations of personality formation and to get a basic overview of the directions and approaches in personality psychology.
After completing the course, students must correctly
know:
• the basic components of personality
• the theoretical foundations of personality psychology
• the basic theories of personality
• methods of personality research
understand:
• the basic principles of personality formation
• the structure of personality
• the basic peculiarities of personality development in norm and pathology.
be able to:
• use the psychological principles of personality formation to develop the cognitive, affective qualities and abilities of pupils and students
• integrate different psychological approaches into a holistic understanding of personality
• develop the different components of the educational process in the context of the personalities of pupils in the classroom
• to use an empathetic approach and to promote pupils' and students' self-actualising tendencies
• critically analyse and compare information in the literature.

Class syllabus:

1. Basic definition and concepts of personality psychology - structure and dynamics of personality.
2. Concepts of the psychoanalytic approach - the structure of personality according to S. Freud, defence mechanisms of A. Freud and their relation to psychological difficulties in the educational environment (burnout syndrome, depression, etc.).

3. Individual and analytical psychology - the desire for power according to A. Adler, the need for power in pupils in the educational environment; C. G. Jung's archetypes, the acceptance of archetypal tendencies and their relation to the educational process.
4. Humanistic psychoanalysis of E. Fromm and K. Horney.
5. Behaviorism and neobehaviorism - the concept of behaviourism of E. L. Thorndike, J. B. Watson, operant conditioning B. F. Skinner and its significance in teacher-student interaction, social learning of A. Bandura - the teacher as a role model, M. E. P. Seligman's theory of learned helplessness, N. E. Miller and J. Dollard's synthesis of behaviourism and psychoanalysis.
6. Humanistic psychology - concepts of A. H. Maslow, V. E. Frankl, C. Rogers, self-actualization, and the promotion of the self-actualizing instinct as the goal of the educational process.
7. Trait approaches of R. Cattell, H. J. Eysenck, G. W. Allport.
8. Cognitive approach to understanding personality according to G. A. Kelly, K. Lewin.
9. Psychological methods of cognition of personality.
10. Psychological approaches and their significance in pedagogy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex019/22	Philosophical conceptions of man

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
5 hours/semester; seminar, combined form (attendance+distance)
Student workload:
5 hours lessons, self-study per semester (17 hours), 16 hours – preparation for interim test, 12 hours elaboration of interim tasks, 10 hours self-study. Total: 60 hours.
Teaching methods:
problem-based interpretation, application of methodological scepticism in relation to established anthropological concepts (the aim is to provoke students to criticize them and object to their underlying assumptions), documented cases of misuse of knowledge coming from the arsenal of anthropology will be discussed and students will be invited to suggest measures that could prevent such failures.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
Interim assessment includes the completion of assigned intermediate tasks (40% of the assessment) and an intermediate didactic test (60% of the assessment). The score or percentage of the interim assignments reflects the degree of compliance of the student's interim assignment with the criteria published in the assignment for each assignment. The didactic test contains tasks of varying cognitive difficulty, so it stratifies students not only according to the amount of knowledge they have acquired. Both the test and the intermediate tasks are designed to verify the specified learning outcomes. A minimum score of 60% is required to pass the course.
The grade is awarded on a scale:
A (100-94%, excellent – outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good – normal reliable work),
D (75-68%, satisfactory – acceptable results),
E (67-60%, sufficient – results meet minimum criteria),
Fx (59-0%, insufficient – additional work required.

In the didactic test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to an A grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a B grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a C grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a D grade.
In the knowledge test, the student has demonstrated a level of knowledge (the extent of acquired knowledge and mobilised cognitive abilities) which, in terms of points or percentages, together with the scores (percentages) of the intermediate tasks, corresponds to a E grade.
Fx – The student has not met the required thresholds for passing the course.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The aim of the course will be to extend the knowledge of human beings acquired in other courses to include the socio-cultural and spiritual dimensions as they are reflected especially in the environment of philosophy.
Within its framework, one also acquires the ability to approach man as a kind of holistic and multidimensional being. The students can distinguish between philosophical and scientific approaches to the conceptualization of anthropological issues and know their strengths and weaknesses. The students become familiar with the motives and arguments of philosophical criticism of scientific concepts of man, learn methodological approaches of philosophical provenance that have proven productive in the relevant human sciences. Its main purpose is to equip students cognitively and argumentatively so that they can defend the interests of man, his dignity and humanity against possible dehumanizing influences. The student will also be guided to infer the human-legal implications arising from certain anthropological concepts and research on human beings. The aim of continuously assigned tasks is for the student to be able to search for relevant information sources, to take qualified opinions on them, to work creatively with them and to take evaluative attitudes towards them.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex017/22	Philosophy of education

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours/semester, seminar, combined form (attendance+distance)
Student workload:
5 hours of teaching, self-study per semester (17 hours); 10 hours of preparation for the seminar – studying the required literature, 28 hours of work on the project and its presentation. Total 60 hours of work.
Teaching methods:
Seminar: lecture combined with discussion of the topic; examples are given of how educational practice has been a topic of reflection for philosophers and a subject of philosophical inquiry since antiquity. Critical reflection and awareness of the possibilities of applying this knowledge in the present day is essential. Also, a reflection on the importance of values guidance in the school environment through the figure of the teacher and the different subjects of instruction.
Emphasis on discussion, e-learning, critical reflection on relevant materials (monographs, journals, databases of scientific knowledge, videos, etc.).

Number of credits: 2

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
100% of the interim grade, which includes 30% classroom activity and 70% project and its defence.
For successful completion of the course, it is necessary to obtain at least 60% of the points.
The rating is awarded on a scale:
A (100-94%, excellent – outstanding results),
B (93-86%, very good – above average standard),
C (85-76%, well – normal reliable work),
D (75-68%, satisfactory – acceptable results),
E (67-60%, sufficient – results meet minimum criteria),
Fx (59-0%, insufficient – extra work required).
For an A grade, the student correctly and actively reflects critically and creatively on both knowledge and frameworks for further development of the discipline, including their meaningful integration into pedagogical practice.

For a grade of B, the student reflects appropriately critically on both the knowledge and frameworks for further development of the discipline, including their meaningful integration into pedagogical practice.
For a grade of C, the students performed well during the semester, his theoretical knowledge of the philosophy of education is at a good level, but he lacks the ability to apply this knowledge, to critically evaluate its relevance for today‘s times.
A grade of D will be given to a student who has been underprepared during the semester, has slight deficiencies in theoretical knowledge regarding the intersections between philosophy and education, the student cannot critically analyze information.
For a grade of E, the student meets the minimum criteria, reflects critically on knowledge and current developments in the discipline only to a limited extent, knows the interdisciplinary connections between philosophy and education, and is at least minimally able to apply the knowledge.
The Fx assessment requires extra work and study.
Scale of assessment (preliminary/final): 100% of the interim grade

Learning outcomes:
The aim of the course is to make graduates properly aware of the possibilities of using the thought bases, conceptual apparatus and scientific methodology coming from philosophy in educational theory and practice. The thematic focus of the course leads students to think critically and to look for intersections between philosophy and education, to realize how the thought bases, conceptual apparatus and scientific methodologies derived from philosophy have been and can be applied in educational theory and practice. Students will be able to critically consider the contribution of particular concepts and their applicability today. They will gain an understanding of how educational practice (from antiquity to the present) has been a topic of reflection for philosophers and a subject of inquiry for philosophy. They are further encouraged to reflect on educational issues such as the highly topical subject of values and education.
This knowledge can be used in further study, as well as in planning the thesis research methodology, and then in practice. The chosen educational methods will contribute to the further development of their competences (cognitive area: memory, critical thinking, thinking in context, reasoning; affective area: attitudes and beliefs, values; psychomotor area: digital skills; social area: cooperation, communication).
The course contributes to the gradual development of subject and subject competence as well as to the development of important professional competences of future teachers.

Class syllabus:
1. How does philosophy enter into thinking about education? Finding the intersections between philosophy and education.
2. A primer for pedagogical concepts – from antiquity to the present.
3. Specific forms of influence of philosophical concepts on pedagogy – 20th century:
1. A hermeneutic approach to pedagogy (W. Dilthey, H.-G. Gadamer).
2. Phenomenological approach to pedagogy (J. Patočka, R. Palouš). Existentialist-influenced concepts (R. C. Rogers, V. E. Frankl).
3. Personalism (M. Scheler, M. Buber, E. Levinas, S. Freud, R. C. Rogers). Positivism, scientism in pedagogy (W. Brezinka).
4. Pragmatism in pedagogy (J. Dewey). Marxism and neo-Marxism (J. Habermas, P. Freire, H. Giroux).
4. Contemporary educational theories, their structural elements and theoretical underpinnings.
5. Philosophy of Education through reflection on the problems of education – Values and Education.

The themes focus on the intersection between philosophy and education, on the use of knowledge, thought bases, conceptual apparatus and scientific methodology coming from the field of philosophy in educational theory and practice.
The course develops several competences in line with the profile of the graduate of the psychology teaching field in combination.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex004/22	Phonetics and phonology

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 10s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 19 hours per semester, combined form (primarily in-person)
Student workload: 19 hours of direct instruction (13 hours lecture + 6 hours seminar); 30 hours of preparation for the midterm test, 20 hours of preparation for the orthoepy exercises, 31 hours of preparation for the final test and 20 hours of preparation for the phonetic transcription. Total 120 hours of student work.
Teaching methods: interpretation, explanation, practical practice of theoretical knowledge and phenomena, solving tasks and assignments, guided self-study, e-learning

Number of credits: 4

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of a midterm test (30 points) and orthoepic exercises (20 points) in the scope of the first 6 topics. In the examination period, he/she will be assessed by means of a final test (30 points) and a phonetic transcription (20 points).
The course is completed with an assessment resulting from the mid-term and final assessment of learning outcomes during the teaching part of the semester of study (50/50).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D, and a minimum of 60 points of the total number of points for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (intermediate test: less than 18 points; orthographic exercises: less than 12 points; final test: less than 18 points; and phonetic transcription: less than 12 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has excellent knowledge of phonetics, phonology and selected orthoepic phenomena to the required extent, logically arranges the facts presented, can apply and adapt the acquired linguistic knowledge excellently in practice, has the ability to independently solve individual tasks and assignments in phonetics, phonology and

orthoepy also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85%, very good - above average standard): very good performance: The student has a very good knowledge of phonetics, phonology and selected orthoepic phenomena to the required extent, logically arranges the facts presented, can apply and adapt the acquired linguistic knowledge very well in practice, has the ability to independently solve individual tasks and assignments in phonetics, phonology and orthoepy also in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: the student has a good knowledge of phonetics, phonology and selected orthoepic phenomena to the required extent, organises the facts presented appropriately, can reliably apply and adapt the linguistic knowledge acquired in practice, solves individual tasks and assignments reliably, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of phonetics, phonology and selected orthoepic phenomena to the required extent, demonstrates some deficiencies in the arrangement of facts, can satisfactorily apply the acquired linguistic knowledge in practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60%, sufficient - results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of phonetics, phonology and selected orthoepic phenomena to the required extent and deficiencies in the arrangement of facts, can minimally apply the acquired linguistic knowledge in practice, solves individual tasks and assignments at a sufficient level, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of phonetics, phonology and selected orthographic phenomena to the required extent, does not know the facts and their logical connections, cannot apply the linguistic knowledge acquired in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
The student understands the difference between phoneme, vowel and allophone and can apply the acquired theoretical knowledge in phonological and phonetic transcription. The student has acquired knowledge of the laws of the formation of sound speech, its physiology and acoustics, as well as knowledge of the phonological structure of the Slovak language. The student is aware of the relationship of phonetics and phonology to other linguistic disciplines (especially the relationship between phonology and morphology) and understands their interdisciplinary connections (the relationship between phonetics and the culture of spoken discourse, the relationship between phonetics and rhetoric). Knows the articulatory, acoustic and perceptual classification of Slovak vowels. The student is familiar with the system of sound means of continuous speech and knows the principles of their functioning. Knows the basic orthographic rules and can use them practically in the production of their own spoken utterances. He is prepared not only to deepen and develop his knowledge of phonetics, phonology and orthoepy in further bachelor's and then master's studies, but also to use and creatively apply it in the school environment as a teaching assistant, or even for the needs of the publishing environment as a proofreader. By solving problem-based tasks, the student has acquired the skills to actively acquire information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. They have also developed a number of transferable skills, such as analytical thinking, creativity, abstract and critical thinking skills, and reasoning in context. He or she can also communicate information about phonetic, phonological and orthoepic phenomena to the general public and can offer conclusions and justifications in the field of articulatory and acoustic phonetics, phonology and orthoepy to lay audiences. The student has

the competence to expand his/her knowledge independently and the ability to identify and evaluate the broader contexts of professional issues.

Class syllabus:

1. The subject of phonetics and phonology in relation to other linguistic disciplines. Phoneme, vowel, allophone. Phonetic and phonological transcription.
2. Physiological phonetics I. Articulatory phonetics. Physiology of speech production.
3. Vowel system of Slovak. Classification of vowels. Characteristics of vowels.
4. Orthophony and orthoepy.
5. Phonetic transcription.
6. Acoustic phonetics. Physiological phonetics II. Perceptual phonetics. Acoustic properties of sound and physiology of speech perception.
7. Intermediate test and orthoepic exercises.
8. Suprasegmental phenomena. Prosodic properties of speech with a focus on school practice.
9. Basic phonological concepts. Phonological opposites. Inventory of phonemes of written Slovak.
10. Syntagmatic and paradigmatic relations of phonemes. Neutralizations and their use in school practice.
11. Alternations and their use in school practice.

The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will learn to correctly use terms from the sound subsystem of language and the sound subsystem of speech such as phoneme, vowel and allophone. The student will understand the difference between phonetics and phonology, and between phonetic and phonological transcription. Recognizes the relationships between phoneme, grapheme and vowel. Acquire theoretical knowledge of the physiology of production, acoustics and the physiology of speech perception. The student will learn the division and characteristics of the organs of speech, the organogenetic components of speech, the theories of voice production and the physical properties of the voice. Understand concepts and terms such as articulation, secondary articulation and coarticulation. They will become aware of the connection between the articulatory characteristics of Slovak vowels and orthophonic rules. The student will be able to classify Slovak vowels and describe them against the background of individual aspects. He/she will be able to use basic acoustic concepts, understand the nature of formants and antiformants. The student will acquire theoretical knowledge in the field of prosody and phonology (especially in the field of neutralizations and alternations) with a focus on their use in school practice. The student will learn the basic phonological concepts. Understand the nature of phonemes, their properties and ways of determining phonemes. Recognise that phonemic distinctive signs result from the articulatory and acoustic properties of the segments. Understand the relationship between contrastive and complementary distribution of vowels. Know the phonological system of Slovak, phonological contrasts and their neutralizations. Understand the difference between neutralisations and alternations. Based on the knowledge of orthographic rules, he/she will understand the implementation of certain types of neutralisations. The student will be able to provide stimulating feedback on orthographic norms and linguistic culture to colleagues and the wider public. He/she will be able to use the theoretical knowledge of orthographic norms in phonetic transcription and will be prepared not only to deepen and develop the acquired knowledge of orthoepy, phonetics and phonology in further bachelor's and then master's studies, but also to use and creatively apply it in the school environment as a teaching assistant, or even for the needs of the publishing environment as a text proofreader. The student will strengthen and develop communication competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, the ability to plan and be actively responsible for his/her own education.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex014/22	Psychology of creativity

Educational activities:
Type of activities: practicals
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
5 hours per semester, exercises, combined form (full-time+distance)
Student workload:
5 hours of direct teaching; 28 hours of preparation for the implementation of methods of creativity development; 8 hours dedicated to reflection on presentations; 9 hours of self-study on the subject. Total 50 hours of work.
Teaching methods:
Self-study, handouts and exercises in MS Teams group discussion, guided discussion of the topic, heuristic method.

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex005/22 - Developmental psychology

Recommended prerequisites:
B-PSYex005 Developmental Psychology

Course requirements:
100% of continuous assessment. During the semester, students will carry out a seminar paper (analyze the main problems psychology of creativity by psychologists + present a lesson proposal developing students' originality and flexibility. max. 30 points), verbally evaluate the presented seminar work(max. 10 points) and pass the midterm test (max. 60 points). For successful completion a minimum of 60% of the points is required for passing the course.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
For a grade of A, students need to actively show interest and report continuously throughout the semester and are capable of independent study. Students are able to navigate in the literature study, understand the theoretical background, and know methods for developing creativity. Demonstrate an ability in the design of creativity development programmes in the classroom at an excellent level.

A grade of B indicates that students have performed above average throughout the semester, have been capable of independent study, have a basic understanding of the psychology of creativity, are able to navigate the literature study, and know methods for developing creativity. Demonstrate the ability to compile creativity development programmes in the classroom at a very good level.
A grade of C indicates that students performed at a standard level during the semester, their theoretical knowledge of the psychology of creativity is at an average level, but they lack the ability to apply this knowledge correctly, critically evaluate and compare the various literary sources and psychological knowledge, know methods for developing creativity at an average level.
A grade of D indicates that students were less prepared during the semester, have moderate deficiencies in theoretical knowledge related to the psychology of creativity. They have considerable difficulties in independent work, often unable to critically analyse information correctly.
A grade of E means that students fail in more than one of the assignments, lack the ability to analyse and compare multiple pieces of knowledge quite correctly, but have at least an adequate command of most of the theoretical knowledge in the course. A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of continuous assessment

Learning outcomes:
The aim of the Psychology of Creativity course - as an important theoretical and practical component of the structure of psychological disciplines in the field of psychology teacher education - is to familiarize students with the theoretical foundations of the psychology of creativity. After completing of the course, students will have mastered psychological creative techniques, will be familiar with some creativity training and they will learn how to develop creativity in groups and how to set up creativity programs for their study field.

Class syllabus:
Criteria and basic features of creativity. Creative activity, creative product, creative process, creative attitude. Skills and rational operations in the creative process. Systems of creative problem solving. Obstacles to the creative approach (in thinking, practical activity, etc.) and ways of overcoming them. Basic characteristics of the creative personality. Creative techniques and their application in practice. Development creativity, creative task. Training and development of individual components of creativity. Development of the creative thinking in group cooperation. Creativity development programmes in the classroom.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex027/22	Psychology of individuals with hearing impairment

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of teaching. self-study per semester (17 hours), preparation of a seminar paper and presentation of the seminar paper (8 hours); preparation for the midterm test (25 hours), 55 hours in total.
Teaching methods:
monological methods - lectures, guided discussion, work with documents in the MS Teams system, analysis case study analysis, heuristic method, guided self-study and work with presentations and scientific text.

Number of credits: 2

Recommended semester: 6.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex010/22 - General pathopsychology

Recommended prerequisites:
B-PSYex010 - General pathopsychology

Course requirements:
100% of the interim evaluation. Interim assessment includes a seminar paper (40% of the assessment) and two written interim tests (60% of the assessment).
For successful completion of the course, it is necessary to obtain at least 60% of the points grade.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - extra work required).
A (excellent - excellent results, the student has mastered the knowledge of the subject at an excellent level, the student is able to relate the acquired knowledge to the profiling subjects of the study programme at an excellent level psychology teaching, in particular to understand the acquired knowledge in the context of the general psychological laws of the human psyche and developmental laws),

B (very good - above average standard, the student has mastered the knowledge of psychology of people with hearing impairment, at an above-average level, is able to link the acquired knowledge with profiling subjects, can interpret the knowledge in the context of psychological theories, theories of psychological development in particular),
C (good - routine reliable work, student has mastered the knowledge of the subject at an average level, at an average level, is able to link the acquired knowledge with the profiling subjects of the study programme, at a solid level, understands the specifics of the formation of psychological functions and personality in conditions of hearing impairment),
D (satisfactory - acceptable results, the student has mastered the knowledge of the subject at a satisfactory level, at a satisfactory level he/she can link the acquired knowledge with the profiling subjects of the study programme, understands the specifics of psychological functions and the specifics of personality formation in people with hearing impairment),
E (sufficient - the results meet the minimum criteria, the student understands only at a sufficient level the issues of the formation of psychological functions and personality in the conditions of hearing impairment),
Fx (insufficiently, the student has not gained enough insight into the psychology of people with hearing impairment, he/she is not able to link the knowledge with the knowledge gained from the study of general, developmental and social psychology).
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is to understand the specifics of the development of psychological functions in individuals with hearing impairment, to differentiate the impact of prelingual and post-lingual hearing loss, to increase sensitivity to the problems people with hearing impairment.
Upon successful completion of the course, the student will understand the impact of hearing impairment on the formation of psychological functions, personality of the individual with hearing impairment, understand different perspectives on deafness: the clinical and cultural-anthropological model of deafness, the role of psychology in care and post-lingual hearing impairment, can relate the acquired knowledge to knowledge of general psychology, developmental and social psychology, can apply the acquired knowledge of the psychology of individuals with hearing impairment to the education and training of pupils/students with hearing impairment, can apply knowledge in the teaching of pupils/students with hearing impairment educated in integrated/inclusive educational settings, can critically identify and evaluate attitudes and misconceptions towards people with hearing impairment, expands awareness of cultural and linguistic values of deaf people, participates in educational and social problems of individuals with hearing impairment, can critically evaluate solutions based on and arguing from the knowledge of psychology.

Class syllabus:
1. The subject of the psychology of the hearing impaired.
2. Clinical and cultural-anthropological interpretation of deafness- impact on the psychology of people with hearing impairment.
3. Organization of psychological functions in prelingually deaf people - comparison with hearing people, organization of mental functions and cochlear implantation.
4. Compensatory mechanisms and compensatory potential of individuals with hearing impairment.
5. Development of cognitive functions in prelingually deaf people.
6. Language, speech and deafness. Communication modus and relationship to cognitive development.
7. Deaf people as a cultural and linguistic community.
8. Personality of individuals with hearing impairment. Prelingual deafness and personality formation.

9. Participation of people with hearing impairment, quality of life of individuals with prelingual deafness, and post-lingual hearing impairment.
10. Psychological characteristics of the hearing impaired learner and inclusive education.
11. Cochlear implantation. Impacts on the psychosocial and cognitive development of the individual.

Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of teaching, self-study (17 hours) per semester; preparation for class (7 hours), creation of a seminar paper in the form of a PowerPoint (10 hours), and preparation for a midterm exam (15 hours). 54 hours in total.
Teaching methods:
Lecture, guided discussion, problem-solving, guided self-study, work with professional text and information sources, and work with documents in the MS Teams system.

Number of credits: 2

Recommended semester: 6.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex010/22 - General pathopsychology

Recommended prerequisites:
B-PSYex010 – General pathopsychology

Course requirements:
The interim evaluation includes the following interim tasks:
- creating and presenting a seminar paper in PowerPoint on a given topic related to the development of a selected cognitive process or personality in a person with intellectual disabilities, taking into account the specifics of intellectual disabilities (40% of the assessment),
- a mid-term paper (60% of the mark).
To pass the course, a minimum score of 60% is required.
Ratings are given on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
A - the student continuously produces excellent results during the semester, is capable of independent study and critical comparison of professional texts focused on the psychology of people with intellectual disabilities, knows the basics of the psychology of people with intellectual

disabilities as a scientific discipline, and is able to meaningfully integrate this knowledge with the knowledge of other psychological disciplines, is able to apply the theoretical knowledge on the basis of his/her knowledge to the elaboration of the assigned tasks,
B - the student achieved above-average results during the semester, is capable of independent study and adequate critical comparison of professional texts focused on the psychology of people with intellectual disabilities, knows the basics of the psychology of people with intellectual disabilities as a scientific discipline and is able to integrate this knowledge with the knowledge of other psychological disciplines in a meaningful way, is able to practically apply theoretical knowledge on the basis of his/her knowledge to the development of the assigned tasks,
C - the student has the ability to study independently, the critical comparison of professional texts focused on the psychology of people with intellectual disabilities is average, the knowledge of the scientific discipline is at a good level, and the ability to practically apply theoretical knowledge to the development of the assigned tasks is average, during the semester he/she performed standard good performance,
D - the student's ability of independent study and critical comparison of professional texts on the psychology of people with intellectual disabilities is at a weaker level, he/she has moderate deficiencies in the theoretical knowledge of the subject, the ability to practically apply theoretical knowledge to the development of the assigned tasks is a problem for the student,
E - the student fails in more than one of the assignments, lacks the ability to independently study and critically compare professional texts focused on the psychology of people with intellectual disabilities, has major deficiencies in theoretical knowledge, and fails in the practical application of theoretical knowledge to the development of the assigned tasks,
FX - the student has not sufficiently fulfilled the course requirements and extra work is required.
Scale of assessment (preliminary/final): 100% of intermediate assessment

Learning outcomes:
The aim is to understand the basic terminology of the psychology of mental/intellectual disability (MD/ID), the specific features of cognitive processes, and the personality of people with intellectual disabilities.
Upon completion of the course, the student:
- knows the basic terminology of the psychology of mental disability
- knows the specific features of cognitive processes of people with MD
- understands the impact of the cognitive processes of people with MD on different types of learning about their specificities
- understands the specific features of personality formation of people with MD
- understands the problems of integration and inclusion of people with MD, especially about the educational environment
- can design activities to develop the cognitive processes and personality of people with MD about their specific needs and personalities
- acquires and consolidates his/her skills in the field of communication competencies about communication with a person with MD
- critically analyses information from the literature, compares it, and can think in context.

Class syllabus:
1. The subject of the psychology of people with mental disabilities. Research methods in the psychology of people with mental disabilities.
2. Definition of the term mental disability. Classification of mental disability. Causes of mental disability.
3. Psychological diagnosis in people with mental disabilities. Problems of diagnosis in people with mental disabilities.

4. Psychological development about mental disability.
5. Specific features of cognitive processes in people with mental disabilities - perception, and imagination.
6. Specificities of cognitive processes in people with mental disabilities - thinking and speech, attention. Communication with people with mental disabilities.
7. Specific features of memory and learning in people with mental disabilities. Opportunities to improve performance in learning.
8. The personality of people with mental disabilities. Factors influencing self-evaluation in people with mental disabilities. Motivation, interests, emotional experience, volitional action, creativity, and moral development in people with mental disabilities.
9. Legal awareness of people with mental disabilities. Vocational orientation and career choice of people with mental disabilities.
10. Specifics of the socialization process of people with mental disabilities. Integration and inclusion of people with mental disabilities and their possible problems in the school environment.
11. The family with a child with mental disabilities.

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours combined teaching + self-study (17 hours) per semester; preparation for classes (7 hours), preparation of seminar paper and presentation (10 hours), preparation for the mid-term test (15 hours). 56 hours in total.
Teaching methods:
active group work, heuristic method, case study, video analysis, work with professional text and information sources.

Number of credits: 2

Recommended semester: 7.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex010/22 - General pathopsychology

Recommended prerequisites:
B-PSYex010 General pathopsychology

Course requirements:
100% of the interim evaluation
Interim assessment (100%) includes the creation and presentation of a seminar paper in PowerPoint (40% of the assessment) and a midterm exam (60%).
For successful completion of the course, it is necessary to obtain a minimum of 60% of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
A - the student correctly and actively reflects critically and creatively on both the knowledge and frameworks for further development of the discipline, including their meaningful integration with the knowledge of other disciplines and the critical and creative application of the methods of the psychology of people with physical disabilities and chronic illness.

B - The student reflects appropriately critically on both the findings and frameworks for further development of the discipline, including their meaningful integration with the findings of other disciplines.
C - the student reflects more or less critically on the knowledge and current development of the discipline, is aware of interdisciplinary contexts, and is able to apply knowledge from the psychology of people with physical disabilities and chronic illness in a fundamentally sound manner.
D - the student reflects critically on knowledge and current developments in the discipline to a limited extent, knows interdisciplinary contexts, is able to apply knowledge from the psychology of people with physical disabilities and chronic illness.
E - the student reflects critically only to a limited extent the knowledge and current development of the discipline, knows the interdisciplinary context, is at least minimally able to apply knowledge from the psychology of people with physical disabilities and chronic illness.
Fx - 59-0%, insufficient - additional work, additional study required.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim of successful completion of the course is that the student is able to orient himself/herself in the specifics of the psychological processes and personality of people with physical disabilities and chronic diseases. Students will gain an understanding of the basic terminology of the psychology of people with physical disabilities and chronic illness.
Upon completion of the course, students must:
acquire/grasp
- the theoretical foundations of the psychology of people with physical disabilities and chronic illness,
- the basic terminology of the psychology of people with disabilities and chronic illness,
- the personality characteristics of people with physical disabilities and chronic illness,
understand:
- the specificity of the formation of psyche in the conditions of physical disability,
- the specific features of the behaviour of people with physical disabilities and chronic illness,
- the specific features of psychological processes in people with physical disabilities and chronic illness,
be able to:
- work critically with knowledge in the field of psychology of people with physical disabilities and chronic illness,
- apply knowledge in the care of individuals with physical disabilities,
- critically analyse and compare information in the literature.

Class syllabus:
1. Introduction to the study of the psychology of people with physical disabilities and chronic illness: subject, tasks, methods.
2. Basic concepts in the psychology of people with physical disabilities and chronic illness and related fields.
3. Normality - abnormality in relation to the psychology of people with physical disabilities and chronic illness.
4. Specific features of the development of individuals with physical disabilities and chronic illness.
5. Peculiarities of psychological processes in people with physical disabilities and chronic illness.
6. Pathopsychological research of psychological processes in people with physical disabilities and chronic illness.
7. Personality of individuals with physical disabilities and chronic illness.

8. Social-psychological aspects of physical disability. Attitudes of society towards people with physical disabilities or chronic illness.
9. Family issues of individuals with physical disabilities and chronic illness.
10. Psychological problems of socialization and integration/inclusion of people with physical disabilities in society.

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester, seminar, combined form (full-time + distance)
Student workload:
5 hours of teaching, 17 hours of self-study per semester; 13 hours of preparation of a seminar paper in the form of a Power Point based on the assigned topic, 20 hours of exam preparation. Total 55 hours of work.
Teaching methods:
lecturing, briefing, discussion on a selected topic, self-study, case studies, brainstorming.

Number of credits: 2

Recommended semester: 6.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex010/22 - General pathopsychology

Recommended prerequisites:
B-PSYex010 General pathopsychology

Course requirements:
100% of the interim evaluation
The interim assessment consists of a seminar paper and a written knowledge test. For successful completion of the course, it is necessary to obtain at least 60 % of the points.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required)
For an A grade, the student must have excellent theoretical knowledge, be able to evaluate and critically analyse it, and use the knowledge flexibly in practically set tasks.
For a grade B, the student must have very good theoretical knowledge, be able to evaluate and critically analyse it, have moderate weaknesses in the use of knowledge in practically set tasks.
For a grade C, the student must have good theoretical knowledge, moderate deficiencies in evaluating and critically analysing it, moderate deficiencies in using the knowledge in practically set tasks.

For a grade D, the student must have basic theoretical knowledge, moderate deficiencies in their evaluation and critical analysis, moderate deficiencies in the use of knowledge in practically set tasks).
For an E grade, the student must have basic theoretical knowledge, moderate deficiencies in their evaluation and critical analysis, major deficiencies in the use of knowledge in practically set tasks.
FX - the student has not sufficiently met the requirements for the course and extra work is required.
Scale of assessment (preliminary/final): 100% of the interim evaluation

Learning outcomes:
The aim is to understand the patterns of cognitive, emotional and social development of individuals with visual impairment.
Graduate:
- applies pedagogical and psychological interventions in accordance with knowledge of the cognitive and psychosocial development of individuals with visual impairments,
- differentiates the appropriate form of educational environment for a specific person with visual impairment,
- has acquired basic interpersonal and communication competences for persons with visual impairment,
- can understand, name and analyse the development of an individual with a visual impairment on the basis of anamnestic data,
- knows and is able to use appropriate psychological methods for research purposes and psychodiagnostics of persons with visual impairment,
- can critically evaluate research and studies in the field,
- applies his/her empathy as a tool for pedagogical and psychological support,
- acts in the pedagogical and psychological process without positive and negative prejudices.

Class syllabus:
1. Definition of basic terms - typology of visual impairment.
2. Attitudes and prejudices.
3. Cognitive processes (cognitive development, moral development, imagination, memory, emotional experience, attention, motivation.
4. Family background and its impact on the individual with visual impairment.
5. Diagnostic and research methods.
6. Communication and its specifics in persons with visual impairment.
7. Assisting persons with visual impairment.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex034/22	Rhetoric and communication

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 3., 5., 7.

Educational level: I.

Prerequisites: PdF.KPg/B-VUZex005/22 - Communication in education

Course requirements:
Prerequisites: B-VUZex005 / Pedagogical Communication
Prerequisites for successful completion of the course: the course is completed with an evaluation, 100% of the continuous evaluation.
Assessment: consists of 2 intermediate assessments (60+40, total 100 points).
Interim assessment 1: consists of the development of a semester cooperative work and its oral presentation or practical application in class. This is a prepared micro-team output: the creation of a student conference.
Semester work: consists of a creative assignment for 60p (30+30). It includes the preparation of a group simulation of a student conference (30b) together with a professional paper on a selected topic (30b) for approximately 45 minutes.
Intermediate assessment 2: consists of the creation of documents for the student conference (40b): poster, invitation, programme, etc. in an electronic environment (web development).
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above

average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Learning outcomes:

Learning objectives and outcomes:
By completing the Rhetoric and Communication course, the student should:
- be able to select information, identify relevant sources on the selected topic,
- be able to justify the choice of specialist sources for the semester thesis,
- understand the importance of selection and analysis of information and information sources,
- be able to work in a team, organise activities to accomplish sub-tasks,
- be able to present intermediate tasks to the group,
- be able to justify and discuss in a group various social topics related to education and training,
- acquire presentation and communication skills and be able to apply them through creative activities in the classroom,
- know methods for developing critical thinking and good reasoning,
- should be able to identify manipulative behaviour.

Transferable competences: the student strengthens soft skills such as communication skills, analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and their application in discussion, interpersonal skills within the group - activation and taking initiative and responsibility, also creative work with e-portfolio (ability to create an interesting website) through creative tasks in the course.

Class syllabus:

Brief outline of the course:
The aim of the course is the practical application of knowledge about effective communication through practicing rhetorical outcomes and teamwork, i.e. through cooperative methods and interactive activities. Using various activating methods and problem-based tasks, students will actively participate in the learning process and create their own course content, in which they will use their own potential and develop the intra and interpersonal aspects of their own personality. An important part of this is a semester-long group project through which students will learn how to organize major events, while developing proper communication and rhetorical skills.
Topics:
Rhetoric - types of speech, practicing presentation skills through micro performances. Content/ form/communication skills (verbal and non-verbal) of oral presentation and analysis of speakers. Presentation - structure and organization of speech/speech/lecture. Evaluating information and

finding relevant sources. Simulating a debate. Organisation of time and group cooperation. Visualisation and arousing listener interest. Argumentation - types of arguments and logical fallacies. Manipulation and manipulation techniques, assertiveness. Types of conversation, discussion - how to conduct a conversation, structuring a conversation. Division of discussion methods. Feedback - self-assessment and self-reflection. Creating a website and e-portfolio with student outputs. Implementation of student conference - simulation/workshop.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex034/22	Rhetoric and communication

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 2., 4., 6., 8.

Educational level: I.

Prerequisites: PdF.KPg/B-VUZex005/22 - Communication in education

Course requirements:
Prerequisites: B-VUZex005 / Pedagogical Communication
Prerequisites for successful completion of the course: the course is completed with an evaluation, 100% of the continuous evaluation.
Assessment: consists of 2 intermediate assessments (60+40, total 100 points).
Interim assessment 1: consists of the development of a semester cooperative work and its oral presentation or practical application in class. This is a prepared micro-team output: the creation of a student conference.
Semester work: consists of a creative assignment for 60p (30+30). It includes the preparation of a group simulation of a student conference (30b) together with a professional paper on a selected topic (30b) for approximately 45 minutes.
Intermediate assessment 2: consists of the creation of documents for the student conference (40b): poster, invitation, programme, etc. in an electronic environment (web development).
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above

average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.

Learning outcomes:

Learning objectives and outcomes:
By completing the Rhetoric and Communication course, the student should:
- be able to select information, identify relevant sources on the selected topic,
- be able to justify the choice of specialist sources for the semester thesis,
- understand the importance of selection and analysis of information and information sources,
- be able to work in a team, organise activities to accomplish sub-tasks,
- be able to present intermediate tasks to the group,
- be able to justify and discuss in a group various social topics related to education and training,
- acquire presentation and communication skills and be able to apply them through creative activities in the classroom,
- know methods for developing critical thinking and good reasoning,
- should be able to identify manipulative behaviour.

Transferable competences: the student strengthens soft skills such as communication skills, analytical thinking in evaluating information and working with text, critical thinking and thinking in context in the development of arguments and their application in discussion, interpersonal skills within the group - activation and taking initiative and responsibility, also creative work with e-portfolio (ability to create an interesting website) through creative tasks in the course.

Class syllabus:

Brief outline of the course:
The aim of the course is the practical application of knowledge about effective communication through practicing rhetorical outcomes and teamwork, i.e. through cooperative methods and interactive activities. Using various activating methods and problem-based tasks, students will actively participate in the learning process and create their own course content, in which they will use their own potential and develop the intra and interpersonal aspects of their own personality. PdF.KPg/B-VUZex036/22	School management

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Number of credits: 3

Recommended semester: 1., 3., 5., 7.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course: 100% of continuous assessment
Assessment: consists of an interim and a final assessment (30+40, 70 points in total).
Interim assessment: consists of a 30-item knowledge test to be given in week 6 of the interim course.
A written examination/test, consisting of theoretical preparation for the teaching of the individual topics of the teaching units, which will be carried out by the 6th week of continuous teaching and the study of the literature.
The final assessment consists of: the development of a semester project and its presentation.
The semester project consists of: the creation of a project according to a set structure for 40b. It includes idea/problem creation, project planning, project implementation, evaluation and self-reflection of the project = its presentation by students (semester project creators).
Prerequisites:
The rating shall be awarded on a scale of
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 64 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.
A score of at least 57 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above

average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, and above average activity in class during the semester.
A minimum of 51 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 46 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using the assigned template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 42 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to develop continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation to the subject matter, basic communication skills, completion of assigned tasks.
Scale of assessment (preliminary/final): 100%

Learning outcomes:
Learning objectives and outcomes:
By completing the School Management course, the student should:
- to know the content of school management as a scientific discipline: the essence of school management in the Slovak Republic at all levels of school management with an emphasis on internal school management and in the context of managerial functions
- be familiar with the basic legal documents and be able to correctly interpret the meanings given in these legal documents that regulate the activities of primary and secondary schools, with an emphasis on the needs of the work of the teaching staff,
- be able to apply the acquired knowledge and knowledge from other disciplines in the focus area: school image, culture and climate, in the area of cooperation with the school management and legal representatives of children/pupils in solving standard, specific and problematic tasks and situations and in the framework of school development,
- be able to creatively use the acquired knowledge and competences in the study of other pedagogical disciplines and in their future school practice.
Transferable competences: the student strengthens soft skills such as communication skills, organizational skills, interpersonal skills within a group - group activation, taking initiative and responsibility, creativity and imagination, critical thinking, analytical skills, problem-solving skills, and others through the creation of a semester project in the course

Class syllabus:
Brief outline of the course:
Basic terminology, options for studying school management, sources of study. Schools and concepts of management. Specifics of school management. The system of school management in the Slovak Republic and the system of internal school management in the context of managerial functions. Legal regulations governing the activities of primary and secondary schools (laws, decrees, working regulations, pedagogical-organisational guidelines). Personality of the head of teaching staff - legal and personality requirements. School image, school culture. School climate.

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 17 hours of preparation for the paper, 31 hours of preparation for orthographic exercises and 29 hours of preparation for proofreading. Total of 90 hours of student work.
Teaching methods: explanation, guided self-study, practical practice and justification of theoretical orthographic knowledge and phenomena, problem solving, guided self-study, e-learning

Number of credits: 3

Recommended semester: 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of a paper (20 points), orthographic exercises in the scope of the first 2 topics (20 points) and in the scope of the 3rd-7th topics (20 points) and in the form of a language proofreading (40 points).
The course is completed with a grade resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E out of the total number of points. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (paper: less than 12 points, orthographic exercises: less than 12 points + 12 points and proofreading: less than 24 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - outstanding results): excellent performance: the student has excellent knowledge of orthography in the required range, logically arranges the facts presented, can apply and adapt the acquired knowledge of orthography in practice, has the ability to independently solve individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;

B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of orthography to the required extent, logically organises the facts presented, can apply and adapt the acquired knowledge of orthography very well in practice, has the ability to solve individual tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, has very well developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of orthography within the required range, organises the facts presented appropriately, can apply and adapt the orthography knowledge acquired reliably in practice, solves individual tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of orthography within the required range, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of orthography in practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of orthography in the required range and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge of orthography in practice, solves individual tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: student does not demonstrate sufficient knowledge of orthography to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of orthography in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
The student knows the orthographic standard of written Slovak. The theoretical knowledge of the principles and rules of Slovak orthography is ready not only to deepen and develop in further bachelor's and then master's studies, but also to use and creatively apply them in the school environment in the position of a pedagogical assistant, or for the needs of the publishing environment in the position of a text proofreader. Based on problem solving tasks, the student has acquired the skills to actively acquire information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. Competence to independently extend their knowledge of the development of selected orthography phenomena from the time of the Bernolákov codification to the current codifications captured in current codification manuals, as well as the ability to identify and evaluate the broader context of orthographic issues. As a result of assessing and justifying individual orthography phenomena, the student also develops a number of transferable skills, such as analytical thinking, creativity, abstract and critical thinking, and contextual reasoning. The student is also able to convey information about orthography principles and orthography phenomena to the general public, and is able to offer conclusions and orthography justifications to lay audiences.

Class syllabus:
1. Writing, alphabet, orthography. Orthography principles.
2. Writing i/í and y/ý in home-origin words. Writing i/í and y/ý in words of foreign origin.
3. Orthographic exercises. Development of orthography in the context of founding and intermediate codification.
4. Writing the vowel ä. The relationship between orthography and orthoepy for the hard and soft consonants d, t, n, l and ď, ť, ň, ľ and for the consonant v.
5. Neutralizations (undertones, double consonants) and orthography.
6. Writing capital letters I.

7. Writing capital letters II.
8. Orthographic exercise. Writing words separately and skillfully. Word division.
9. Slovak orthography rules before and after 1989. Rhythmic law.
10. Punctuation. Comma and its functions.
11. Linguistic proofreading.

The curriculum of the course covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialized knowledge related to orthography and orthoepy, will consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, modifying his/her knowledge in the process, and creatively using appropriate and adequate methods of the discipline. The student will acquire theoretical knowledge in the field of orthography, become familiar with the individual principles (phonemic, morphematic, grammatical and etymological) on which Slovak orthography is based, and understand their essence and significance for Slovak orthography. They will become aware of the relationships between grapheme, phoneme and vowel. Against the background of the founding and ongoing codification, they will deepen their knowledge of the Slovak graphic system (with a focus on the grapheme y, the soft consonants ď, ť, ň and, above all, the soft consonant ľ), the writing of capital letters, soft and hard consonants, their orthographic and orthoepic specificities, as well as the application of the rhythmic law in terms of the linguistic norm and linguistic practice. They will learn about the development (and peripetitions) of selected orthography phenomena captured in the Slovak Orthography Rules before 1989 and after 1989 up to the present. The student will have a thorough knowledge of capitalization and punctuation (especially commas) and will recognize problematic phenomena in this orthography area. The student will become aware of the relationship between orthography and orthoepy and the influence of certain phenomena of the sound subsystem of the language (neutralisations) on Slovak orthography. Understand the influence of the founding and ongoing codification on the current state of Slovak orthography. The student will be able to use digital technologies in the teaching of orthography principles, in particular in the use of the online version of current codification manuals and the dictionary portal. The student will learn to identify and correct orthographic errors in various types of written expression, and will be able to use and creatively apply knowledge of orthography in a school environment as a teaching assistant or, for the needs of the publishing environment, as a proofreader. He/she will be prepared to provide stimulating feedback on orthography standards to colleagues and the wider public. The student will consolidate and develop communicative competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, to plan and to be actively responsible for his/her own learning.

Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 23 hours of continuous preparation, including literature study, 11 hours of presentation development; 13 hours of seminar paper development.
A total of 60 hours of student work.
Teaching methods: lecture, demonstration, dialogue with students, dialogue in a group of students, group work, problem-based tasks, application of theoretical knowledge to practical examples, analytical and interpretative work with literary texts, project-based learning, e-learning, guided self-study

Number of credits: 2

Recommended semester: 7.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous completion of micro-assignments in seminars (20 points);
• the preparation of a presentation on a topic in book culture after 1989 (40 points);
• the production of a seminar paper (40 points) which analytically and interpretively examines a selected issue in a work from the list of required fiction.
The course culminates in an assessment based on the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0).
A minimum grade of 60% is required to pass the course. A final grade of A requires at least 93 points, a grade of B requires at least 85 points, a grade of C requires at least 77 points, a grade of D requires at least 69 points and a grade of E requires at least 60 points of the total points. Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (micro assignments: less than 12 points, presentation: less than 24 points, seminar paper: less than 24 points).
The grade is awarded on a scale:
A (100 - 93 %, excellent - outstanding results): excellent performance: the student has an excellent knowledge of Slovak literature at the turn of the 20th and 21st century. The student has an excellent knowledge of the literature of the 20th century in the required scope, logically arranges the presented literary-historical facts in a flawless manner, he/she can apply and adapt the acquired literary-

scientific knowledge excellently when working with a literary text in school practice, he/she has the ability to solve individual tasks and assignments independently and imaginatively in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is excellent, he/she has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of Slovak literature at the turn of the 20th and 21st century. The student has a very good knowledge of the Slovak literature in the required range, he/she arranges the presented literary-historical facts logically, with only minor errors, he/she is able to apply and adapt the acquired literary knowledge very well when working with a literary text in school practice, without any major errors, he/she has the ability to solve individual tasks and assignments independently, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of Slovak literature at the turn of the 20th and 21st centuries in the required range, arranges the presented literary-historical facts appropriately and makes mistakes only in places, can reliably apply and adapt the acquired literary-scientific knowledge when working with a literary text in school practice, reliably solves individual tasks and assignments independently, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of Slovak literature at the turn of the 20th and 21st centuries in the required range, shows some deficiencies in the arrangement of literary-historical facts, can satisfactorily apply the acquired literary-scientific knowledge and existing procedures when working with a literary text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimal amount of knowledge of Slovak literature at the turn of the 20th and 21st centuries to the required extent and significant deficiencies in the organization of literary-historical facts, can minimally apply the acquired literary-scientific knowledge when working with a literary text in school practice, solves individual tasks and assignments at a satisfactory level with considerable help, has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of Slovak literature at the turn of the 20th and 21st centuries to the required extent, does not know literary-historical facts and their logical connections, cannot apply the acquired literary knowledge to work with a literary text in school practice, cannot solve individual tasks and assignments, has insufficient skills to learn.

Learning outcomes:

The student has a synthetic knowledge of Slovak literature after 1989. The student has acquired knowledge of the existing literary-historical models of this period, the fundamental literary-theoretical and literary-critical reflections of its key authors and literary works. It has acquired knowledge of the literary culture of the period in the context of contemporary political, social, cultural and civilisational processes, of periodisation models and internal differentiation of original Slovak works of the era. In a representative spectrum, it is familiar with individual tendencies, group and individual ideological and aesthetic initiatives and poetics. He is aware of the value of the linguistic-cultural originality of Slovak literature and has cultivated a sense of its organic links to universal humanistic value bases. The student has developed analytical and interpretive skills applicable to professional and school analysis and interpretation of specific literary texts. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skills to communicate facts, concepts, and opinions and to formulate and defend arguments. The

student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. The acquired knowledge and skills are ready to be deepened and developed in further Bachelor and Master studies and can also be used and creatively applied in the school environment in the position of a teaching assistant or for the needs of the publishing environment. He is also able to convey basic information about Slovak literature after 1989 to the general public and to offer certain conclusions and justifications to lay audiences. He has also developed a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Periodization models of Slovak literature after 1989. Transformations of the pluralistic literary model.
2. Transition and transformation of society, media, book culture and literary infrastructure after 1989.
3. Consolidation of society, media, book culture and literary infrastructure after 1998.
4. Book culture and literature in the context of remediation at the turn of the 20th and 21st centuries.
5. The literary field of cultural production and its relations with the political field. Literature and state power.
6. The literary field of cultural production and its relations with the economic field. Literature and the cultural industry.
7. Reintegration and reconstruction of the pre-1989 literary process in the context of the literature of the late 20th and early 21st centuries.
8. Original prose works of the 1990s: generational and genre-thematic range, representative authors and works (S. Rakús, P. Pišťanek, Balla).
9. Original poetry of the 1990s: generational and genre-thematic range, representative authors and works (M. Haugová, I. Štrpka, P. Macsovszky).
10. Original prose works of the early 21st century: generational and genre-thematic scale (M. Kopcsay, I. Dobraková, R. Pupala).
11. Original poetic works of the early 21st century: generational and genre-thematic range, representative authors and works (E. J. Groch, M. Habaj, M. Ferenčuhová).

The curriculum of the course covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general secondary education and systematically develops his/her knowledge into a comprehensive and applicable form, including the latest knowledge in the field.

The student will deepen and develop his/her knowledge of the conditions framing the existence of Slovak literature after 1989, its literary-historical concepts and literary-critical reflection. Particular emphasis will be placed on the distinction between the conditions for the existence of literature in the transition-transformation period and at the turn of the century (the consequences of remediation). The conceptual tool for organizing knowledge about book culture will be the concept of the literary field as a specific field of cultural production in relation to other fields. Building on the student's knowledge of the transformations of Slovak literature in the 20th century, attention will be focused on the reintegration and reconstruction processes in Slovak literature related to the collapse of the totalitarian communist regime and the formation of a democratic Slovakia. In the course, the student will deepen and develop knowledge of internal periodization, generational, functional and ideological-aesthetic differentiation and genre-thematic forms, and representative supra-individual developmental formations (confessional lyricism, postmodern tendencies, experimental-deconstructive poetry, spiritual poetry, post-conceptual poetry, prose of ironic objectification, social-realist prose, expatriate and regional-local prose) and on the individual creative efforts of representative authors. Emphasis will be placed on aesthetically extraordinary works. A reliable orientation of the student in the issues of literature at the turn of the 20th and 21st centuries and the related practical and methodological knowledge will be a prerequisite for his/her proper

understanding of the past in the courses of the continuing degree and an important part of the preparation for the teaching profession corresponding to the current needs of school practice. The student will be prepared to deepen and develop the theoretical knowledge and practical skills acquired in the master's degree and to use them effectively and creatively in the school environment in the position of a teaching assistant, or for the needs of the publishing environment. The student will acquire a base of knowledge and skills that will be a professional prerequisite for the analysis and selection of didactic materials from Slovak literature with regard to teaching objectives, a prerequisite for the analysis and evaluation of educational activities and for solving common problems in the teaching of Slovak language and literature. The course will lead the student to active acquisition of information and effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her ability to propose and implement solutions to professional problems on their basis, to modify his/her knowledge in doing so, and to creatively use the appropriate and adequate methods of the discipline. The student will be able to communicate the theoretical knowledge and practical skills acquired to the wider and lay public. An analytical and critical approach to a literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate by solving specific assignments as well as by compiling his/her own analytical-interpretive term paper. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of their work, to follow the principles of authorial ethics, the ability to plan and be actively responsible for one's own learning, to develop and strengthen a sense of socially responsible action and civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex030/22	Social pathology

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
5 hours per semester, seminar, combined form of education (full-time + distance education)
Student workload:
5 hours of teaching, self-study per semester (17 hours); 16 hours of preparation of seminar work and ppt presentation; 22 hours of preparation for mid-term evaluation. Total 60 hours of student work.
Teaching methods:
lecture, group discussion, conversation, guided discussion of the topic, guided self-study and work with the text.

Number of credits: 2

Recommended semester: 7.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
Students are required to complete a mid-term paper and present the paper to their classmates (40 points) and pass a mid-term test (60 points) for a total of 100 points. The prerequisite for successful completion of the course is obtaining a minimum of 60% of the maximum possible course grade.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, marginal performance - results fulfil the minimum criteria),
Fx (59-0%, inadequate - additional work required)
For a grade of A, the student is required to demonstrate excellent accuracy and active critical and creative reflection on the knowledge of the field of social pathology, including its meaningful integration with the knowledge of their field of study as well as other disciplines. Demonstrate the ability to have a good understanding of the principles, guidelines, and methods of therapeutic-educational support. Also, in identifying client needs and resources as well as means of assistance.
A grade of B indicates that the student reflects critically on the knowledge of the field of social pathology, including its meaningful integration with the knowledge of their field of study as well as other disciplines, in a reasonably good manner. Demonstrates the ability to be very knowledgeable

about the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as means of assistance.
A grade of C will be awarded if the student is able to critically reflect well on the knowledge of the field of social pathology, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student has demonstrated the ability to be well versed in the principles, guidelines, and methods of therapeutic educational assistance, identification of client needs and resources as well as means of assistance.
A grade of D indicates that the student has limited, moderately critical reflection on the knowledge of the field of social pathology, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student demonstrates the ability to satisfactorily navigate the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as the means of assistance.
A grade of E will be given if the student reflects critically on the knowledge of the field of social pathology to a limited extent. The student has difficulty understanding and navigating the principles, guidelines, and methods of therapeutic-educational assistance, identification of client needs and resources, and means of assistance.
The Fx evaluation requires further study and work by the student.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The aim is to be able to orientate oneself in the issue of social pathological phenomena, to know their causes, and their consequences on the individual and to be able to implement preventive measures to eliminate them.
After successful completion of the course, students will gain an overview of basic theoretical knowledge about selected negative social phenomena, their prevalence in the population, causes, consequences, prevention, correction and also the links between them. They will be able to analyse socio-pathological phenomena, acquire competence for professional intervention in the field and be able to implement preventive measures to eliminate socio-pathological phenomena in society. Furthermore, students will develop analytical and active thinking when working with an assigned professional text, they will be able to compare and evaluate information.

Class syllabus:
1. Social pathology - definition of basic terms.
2. Pathology of the family
3. CAN syndrome
4. Crime and delinquency
5. Drugs and drug addiction
6. Non-substance addictions- pathological gambling, internet, computer and the others
7. Eating disorders
8. Bullying, cyberbullying, cybergrooming
9. Prostitution
10. Self-harm - suicidality
11. Victims and perpetrators of violence - human trafficking, domestic violence, stalking, workplace violence, etc.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex007/22	Social psychology

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester, lecture and seminar, combined form (full-time+distance).
Student workload:
5 hours of teaching, self-study per semester (17 hours); 15 hours of preparation for the midterm test; 25 hours of preparation for the midterm assessment (group work + reflective journal), 10 hours of preparation for the assignments carried out in the seminar, 28 hours of preparation for the final test and oral examination. Total 100 hours of work.
Teaching methods:
lecture with multimedia support, dialogical and discussion methods, psychological games, demonstration, critical analysis of psychological theory, methods of working with text (work with information sources) analysis of case studies, reflective diary

Number of credits: 4

Recommended semester: 3.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex001/22 - General psychology

Recommended prerequisites:
B-PSYex001 General psychology

Course requirements:
50% of continuous assessment + 50% of final assessment
The interim assessment includes a midterm test (30% of the grade), group work (elaboration and presentation of assigned social psychological research in a study group, 15% of the grade) and its reflection (5%). The final assessment includes a final test (30% of the mark) and an oral examination (20% of the mark). The oral examination is conducted in smaller groups and takes the form of an analysis of case studies or questions focusing on the field of social psychology. Credit will not be awarded to a student who scores less than 50% on any of the assignments. A minimum score of 60% is required to pass the course.
Grades are awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),

Fx (59-0%, inadequate - additional work required).
At grade A, the student knows and reflects on both the knowledge and key frameworks of social psychology, including their integration with knowledge from other related disciplines, is well versed in current developments in the discipline, and applies the knowledge gained meaningfully, critically, and creatively in evaluating and influencing group events from the perspective of the individual and the group, as well as specifically in relation to the future target group (the school classroom).
At grade B, the student knows and reflects on the knowledge and frameworks of social psychology, including their integration with the knowledge of other related disciplines, is very well oriented in the current development of the discipline, almost always meaningfully and creatively applies the acquired knowledge in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (the school class).
A grade of C is awarded if the student predominantly knows and reflects on both the knowledge and key frameworks of social psychology, understands the interdisciplinary contexts, and can apply them correctly in most cases in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (school class).
A grade of D will be awarded if the student knows both the knowledge and key frameworks of social psychology at an average level, understands the interdisciplinary contexts, and applies the acquired knowledge with greater guidance in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (school classroom).
In assessment E, the student has a relatively limited but sufficient knowledge and understanding of social psychology, at least partially understands the interdisciplinary context, can apply the knowledge at least at a minimal level in evaluating and influencing group events from the perspective of the individual and the group, but also specifically in relation to the future target group (school class).
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.

Learning outcomes:
The aim of the course is to enable students to gain a basic overview of theories and knowledge in social psychology (which is part of the core disciplines of psychology) and to acquire the ability to work critically with knowledge from this field. It is also an important foundation for further study and success in the teaching profession.
Upon completion of the course, the student will be able to:
- define and explain basic social-psychological mechanisms and phenomena as well as basic social-psychological experiments and their aspects,
- identify social-psychological mechanisms and phenomena in their everyday life and in their functioning in different social groups as well as in the school classroom from the perspective of educational practice,
- critically assess the impact of the cultural and social environment on the individual (or group),
- recommend practices leading to changes in areas such as social perceptions, attitudes, modes of communication or group phenomena,
- give practical examples of these phenomena in the school environment, but also in the family environment or in related disciplines (health, management, marketing, etc.).

Class syllabus:
1. Introduction to the study of social psychology: the subject, methods, and history of social psychology.
2. Socio-cultural determination of the psyche: man, society and culture.
3. Socialization of the individual: definition and nature of socialization, means and methods of socialization, theories of socialization.

4. Social cognition: perception of others, interpersonal attraction, determinants influencing impression formation, attribution theories.
5. Social communication: definition, communication process, nonverbal communication (gestures, facial expressions, spatial location, movements, touching, paralinguistics), verbal communication, lying or manipulating reality as part of communication.
6. Attitudes: definition, functions and structure of attitudes, formation and change of attitudes, measurement of attitudes.
7. Social groups: classification and characteristics of social groups, group influence, group structure and development, group dynamics, group performance, the school classroom as a social group.
8. Social interaction: social facilitation and idleness, conformity, obedience, group processes (group polarization, communication, thinking), competence, cooperation, leadership.
9. Social behaviour: social norm, prosocial behaviour, aggressive behaviour, mob behaviour, conflict.
10. Practical application of social psychology: application of social psychology, social psychological personality problems of male and female teachers, social psychological training, social psychology, and mental health.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KPsPp/B-PSYex003/22	**Course title:** Social-psychological training I.

Educational activities:
Type of activities: practicals
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form:
5 hours per semester, combined form (full-time+distance)
Student workload:
5 hours teaching, self-study per semester (20 hours); 20 hours of preparation prior to the training; 5 hours dedicated to reflection on the events of the training after its completion. Total 50 hours of work.
Teaching methods:
The methodological framework consists of active social and experiential learning (dialogical and discussion methods, psychological and cooperative games, self-discovery techniques, reflective essay), e-learning (Moodle or MS Teams).

Number of credits: 2

Recommended semester: 3.

Educational level: I.

Prerequisites:

Course requirements:
100% pass mark
The continuous assessment includes the evaluation of the completion of ongoing tasks and assignments, which are carried out in individual or group form in the pre-, during and post-training phases. Before the training, the interim assessment consists of three assignments (reflective essay on the expectations associated with the self-awareness training = 10%; work with tests and questionnaires = 10%; self-awareness development exercise = 10%), which are further worked on during the training. In the course of the training, activities and exercises are carried out to enable, in particular, the development of the intrapersonal (20%), interpersonal (20%) and social-inclusive competences (20%) of the students (dating activities, role-plays, cooperative games, trust games, etc.). After the training, the continuous evaluation consists of structured feedback on the events in the training group (10%).
To pass the course, a minimum score of 60% is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),

Fx (59-0%, inadequate - additional work required).
For an A grade, the student is very actively involved in the activities and shows interest and effort to develop his/her competences, seeks original and creative solutions to the tasks set, reflects on the emerging changes that the training brings, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.
B grade means that the student is very well actively involved in the individual activities and shows interest and effort to develop his/her competences, to a lesser extent looks for original and creative solutions to the tasks set, reflects the emerging changes that the training brings, but needs more time and space for their verbalization, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.
A C grade is awarded if the student is generally actively involved in the activities, shows interest and effort to develop his/her competences, but only in some topics and areas, makes little use of his/her personality in finding original and creative solutions to the tasks set, reflects the emerging changes brought by the training only to a certain extent, shows himself/herself as a full member of the training group and actively expresses his/her own opinion.
Grade D means that the student is involved in individual activities to a limited but at the same time still acceptable extent and shows only sporadic interest and effort to develop his/her competences, often only with external help looking for original and creative solutions to the tasks set, he/she cannot adequately reflect the emerging changes that the training brings, he/she is more passive and more like a marginal member of the training group although actively expressing his/her own opinion.
The grade E is given to a student who behaves passively and is minimally involved in individual activities, does not show interest and effort to develop his/her competences, relies on the group to find original and creative solutions to the set tasks, cannot adequately reflect the emerging changes that the training brings, cannot find his/her place in the training group, expresses his/her own opinion sporadically and not always in an appropriate way.
The Fx grade is given exceptionally, most often due to non-participation in the training and failure to complete the set intermediate tasks, non-cooperation, refusal to take a position on the required topics and to express his/her own opinion.
Scale of assessment (preliminary/final): 100% pass mark

Learning outcomes:
:
The aim of the course Social-psychological training I. is to motivate and practically develop self-knowledge and self-reflection of psychology teacher of education of students. It is based on the model of social-psychological competencies (essential for success in the teaching profession in general), in which competencies are developed in three dimensions - knowledge and awareness (the expertise that an individual possesses in a given area and the meaning that he/she attaches to this knowledge), attitudes and beliefs (influencing responses in specific educational situations), and skill (specific ways of behaving).
Upon completion of the course, the student:
- recognizes the importance of self-knowledge and personal development in teaching practice,
- is able to evaluate his/her strengths and weaknesses (level of his/her competences), their impact on the practice of the future profession and motivate himself/herself for further growth,
- can identify his/her priorities and name the areas/persons/things that he/she perceives as personally important,
- is aware of key moments in his/her life so far and name expectations in relation to the future profession,
- gains experience of active social and experiential learning through experiential activities,
- can apply specific techniques and activities in group work.

Class syllabus:

Basic characteristics and introduction of social-psychological training as a method of personality development.
2. Definition of the concept of self-knowledge (process, methods, impacts and problems).
3. Intrapersonal competences of an individual (self-knowledge, self-assessment, self-reflection, self-
acceptance).
4. Interpersonal competences of the individual (social perception, active listening, verbal and non-verbal communication skills, conflict resolution).
5. Socially inclusive competences of the individual (sensitivity to otherness, empathy, acceptance, adaptation).
6. The place of self-knowledge and reflection in teaching.

5 hours per semester, practicum, combined form (on-site + distance)
Student workload:
5 hours of combined teaching + self-study (17 hours) per semester; 16 hours of preparation for the midterm test; 12 hours of individual processing of statistical assignments. A total of 50 hours of work.
Teaching methods:
Lecture and lecture with multimedia support, dialogical and discussion methods, demonstration of analysis of a scientific text with a focus on statistical methods, simulation of the procedure of creating statistical output, instruction on individual statistical tests, and self-study.

Number of credits: 2

Recommended semester: 6.

Educational level: I.

Prerequisites: PdF.KPsPp/B-PSYex006/22 - Methodology of psychological research

Recommended prerequisites:
B-PSYex006 Methodology of Psychological Research

Course requirements:
100% of the interim assessment
The interim assessment includes a knowledge test (60% of the assessment) and a seminar paper (40% of the assessment). To pass the course, a minimum score of 60% is required. The seminar work consists of the submission of four seminar assignments (4 x10 points) consisting of the application of the acquired knowledge to a data set (description, inference, correlation, substantive significance). The test consists of a theoretical part focusing on basic statistical concepts and an application part working with a basic dataset.
The assessment is given on a scale:
A (100-94%, excellent - excellent results),
B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required
Grade A: the student has an excellent understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a high degree

when working independently with a statistical program and also to perform basic operations of descriptive statistics on a basic data set as well as simple operations of inferential statistics and correlation without errors.
Grade B: the student has an adequate understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a sufficient extent in independent work with a statistical program and also to perform basic operations of descriptive statistics and correlation on a basic data set without errors.
A grade of C is awarded if the student has a predominant understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a sufficient extent in independent work with a statistical program and also to perform basic operations of descriptive statistics and correlation on a basic data set without serious errors.
A grade of D is earned if the student has an average understanding of the terminology and principles of data collection and evaluation in psychology. The student is able to apply the knowledge to a sufficient extent in independent work with a statistical program and also to perform basic operations of descriptive statistics without serious errors. The student understands theoretically the principles of correlation and inferential statistics without being able to calculate them correctly in a statistical program.
Grade E: the student has only a limited understanding of the terminology and principles of data collection and evaluation in psychology. The student can apply the knowledge in independent work with a statistical program only to a small extent and only at the level of descriptive statistics.
A grade of Fx indicates that the student needs additional study to acquire the necessary knowledge.
Scale of assessment (preliminary/final): 100% of the interim assessment

Learning outcomes:
The main aim of the training is that during the exercises the students will practically master the basic methods of analysis and interpretation of quantitative data in the field of psychological research. They will also use them in the study of other disciplines, possibly in research for their bachelor thesis. The students will master the skill of working with a selected statistical data processing program. The students will learn how to store collected data, carry out their description, and name key outcomes relevant also for pedagogical practice using empirical procedures of analysis and comparison with respect to the defined research problem. The students will understand the benefits of applying statistical procedures in pedagogical practice and gain the ability to interpret and critically evaluate relevant data.

Class syllabus:
1. Research problem, operationalization, research/theoretical hypotheses, research designs.
2. Introduction to SPSS, data description (mean, median, variability, etc.).
3. Correlation versus causality, introduction to working with and sorting data.
4. Tests of normality and data distribution, basic data visualization.
5. Inferential tests, null hypothesis, between-subjects, and within-subjects designs.
6. Substantial significance, Bonferroni correction.
7. Validity and reliability of tests.
8. Moderator, mediator, correlation, regression.

Recommended literature:
Compulsory readings:
Guráň, P., Fero, P., & Ritomský, A. (2018). Základy spracovania sociologických dát pomocou SPSS.
Recommended readings:
Field, A. (2013). Discovering statistics using IBM SPSS statistics. Sage.
Goss-Sampson, M. A. (2019). Statistical Analysis in JASP: A Guide for Students.

Harris, P. (2008). Designing and reporting experiments in psychology. McGraw-Hill Education.
Somorčík, J., & Teplička, I. (2015). Štatistika zrozumiteľne. ENIGMA Publishing.
Terek, M. (2017). Interpretácia štatistiky a dát. 5.vyd. Equilibria.

Languages necessary to complete the course:
Slovak and English language

Notes:
It is necessary to have the latest version of IBM-SPSS installed, or a similar free software alternative such as JASP or Jamovi.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex012/22	Stylistics

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 12s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 19 hours per semester, combined form (primarily in-person)
Student workload: 19 hours of direct teaching; 25 hours of continuous preparation for individual topics and for the mid-term test; 14 hours of preparation for practical stylistic analysis of the text, 62 hours of preparation for the final test, including analysis of the literature. In total 120 hours of student work.
Teaching methods: explanation, demonstration of practical examples, practical exercises, problem solving, guided self-study, e-learning

Number of credits: 4

Recommended semester: 7.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of a midterm test on the first 5 topics (30 points), a practical stylistic analysis of the text at the end of the midterm, which will focus on the application of the acquired knowledge and the identification of different types of styles (20 points), and in the exam period in the form of a final test (50 points).
The course is completed with an assessment resulting from the continuous assessment of the learning outcomes during the teaching part of the semester of study and from the final assessment of the learning outcomes (50/50).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D, and a minimum of 60 points is required for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who achieves less than 60 % of the points in any component of the assessment (intermediate test: less than 18 points, practical stylistic analysis of the text: less than 12 points, final test: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - excellent results): excellent performance: the student has excellent knowledge of stylistics in the required range, logically arranges the presented facts, can apply and adapt the acquired knowledge of stylistics in practice, has the ability to independently solve

individual tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of stylistics to the required extent, logically organises the facts presented, can apply and adapt the acquired knowledge of stylistics very well in practice, has the ability to solve individual tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of stylistics to the required extent, organises the facts presented appropriately, can reliably apply and adapt the stylistic knowledge acquired in practice, solves individual tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of stylistics in the required range, shows some deficiencies in the arrangement of facts, the acquired can satisfactorily apply knowledge from stylistics in practice, satisfactorily solves individual tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of stylistics in the required range and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge of stylistics in practice, solves individual tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of stylistics to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of stylistics in practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:

Students master the basic stylistic concepts and categories, have acquired knowledge of the stylistic value of linguistic devices, stylistic norms and model text structures. They are able to use the acquired knowledge practically not only in the analysis and critical evaluation of written and oral speeches, but also in their transformation and in the creation of their own linguistic expressions. They are able to explain and concretise theoretical knowledge of stylistic phenomena using practical examples and are able to perceive and evaluate them not only in terms of the current state of scientific knowledge, but also in terms of school practice. They are prepared to creatively and independently solve problem tasks and assignments also in a broader linguistic context, to independently search for necessary information in relevant sources, to critically evaluate them and to use them appropriately in communicating knowledge, conclusions and in justifying them to the lay and professional public. They have developed their analytical skills, communication skills and critical thinking skills. They are prepared not only to deepen and develop the acquired knowledge in the course of further studies, but also in the school environment in the position of a teaching assistant, in the publishing environment in the position of a proofreader and, after the completion of the master's degree, in the position of a teacher of Slovak language and literature in secondary education.

Class syllabus:

Course outcomes of subject (content):
1. The subject of stylistics, methods of stylistic research, classification and characteristics of styles.
2. Lexical stylistic devices, their stylistic classification and functional characteristics.
3. Phonological stylistic devices. Stylistic value of vowels and intonation devices, pronunciation styles.
4. Morphological stylistic devices and their functional characteristics.
5. Syntactic stylistic devices and their functional characteristics.

6. Compositional stylistic devices - supra-sentential contextual units for text segmentation and gradation, text binding devices.
7. Extra-linguistic (non-verbal) stylistic devices. Kinetic means.
8. Model structures of text organization. Text as a basic stylistic concept, potential text, actual text.
9. Content model structures. Stylistic progression and stylistic structure.
10. Formal model structures. Style, style-forming factors, style layer and style norm.
11. Genre model structures.
The curriculum of the course covers a complex of knowledge in stylistics, which builds on students' general secondary education and systematically develops and deepens their knowledge into a comprehensive and applicable form. The course will enable students to acquire knowledge of stylistics as a linguistic discipline, its subject matter and research methods. Students will acquire basic stylistic concepts and categories, knowledge of the stylistic value of linguistic devices, stylistic norms and content, formal and genre model structures of the text. They will be able to apply the acquired knowledge of style differentiation, classification of styles and functional characteristics of linguistic, compositional and extra-linguistic devices in the analysis and evaluation of diverse types of linguistic expressions in terms of functional and creative use of lexical, phonic, morphological and syntactic linguistic styles, compositional and extra-linguistic styles, being able to perceive and respect the specificities of individual model structures, not only in analytical activities, but also in the transformation of the text on the basis of changes in some components of the communicative situation, as well as in the actual creation of diverse linguistic expressions. They will be able to explain and concretise their knowledge of various stylistic phenomena using practical examples and will be able to perceive and evaluate them both in the light of the current state of scientific knowledge and with regard to school practice. They will be prepared to solve problem-solving tasks and assignments, to search for the necessary information in relevant sources, to critically evaluate and interpret it, and to use it appropriately in communicating knowledge and conclusions to lay and professional audiences. They will develop their analytical skills, communication skills and critical thinking skills and will be prepared to deepen and develop the acquired knowledge in further bachelor's and then master's studies, as well as in the position of a teaching assistant or a proofreader and, after the completion of the master's degree, in the position of a teacher of Slovak language and literature in secondary education.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex019/22	Syntactical analysis

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 13 hours of continuous preparation for individual seminars; 2 x 17 hours of continuous preparation for 2 practical syntactic analyses of the text = 34 hours. Total 60 hours of student work.
Teaching methods: explanation, application of theoretical knowledge in practical analyses of individual types of constructions and sentence articles; analysis and solution of problem solving tasks; guided self-study; e-learning

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of 2 practical syntactic analyses of the text in the scope of the first 5 topics and in the scope of the 6th - 11th topics, which will be focused on the application of the acquired knowledge and the identification of syntactic phenomena (2 x 50 points = 100 points). The course is completed with an assessment resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D and a minimum of 60 points of the total points for a grade of E. To pass the course, a minimum of 60% of the points must be obtained. Credit will not be awarded to a student who achieves less than 60% of the points in any component of the assessment (1. practical analysis: less than 30 points; 2. practical analysis: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - excellent results): excellent performance: the student has excellent knowledge of syntactic analysis in the required range, logically arranges the presented facts, can apply and adapt the acquired knowledge of syntactic analysis in practice, has the ability to independently solve individual syntactic tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;

B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of syntactic analysis to the required extent, logically arranges the facts presented, can apply and adapt the acquired knowledge of syntactic analysis very well in practice, has the ability to solve individual syntactic tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of the student's speech is very good, has very well developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of syntactic analysis to the required extent, organises the facts presented appropriately, can reliably apply and adapt the knowledge gained from syntactic analysis in practice, solves individual syntactic tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of syntactic analysis to the required extent, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of syntactic analysis in practice, satisfactorily solves individual syntactic tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of syntactic analysis to the required extent and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge of syntactic analysis in practice, solves individual syntactic tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of syntactic analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of syntactic analysis in practice, cannot solve individual syntactic tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student is introduced to the syntactic system as a part of the grammatical system of the language, as well as to selected sub-issues of Slovak syntax, also with regard to school practice. He/she has acquired practical skills which he/she can apply in assessing and analysing syntactic phenomena of the language. The student is able to use the acquired theoretical knowledge in its concretization on practical examples, both in solving individual syntactic phenomena, as well as in practical syntactic analyses of individual types of syntactic constructions and sentence members, in complex analysis of syntactic phenomena, in independent solving of syntactic problems and in possible synthesis of new and creative solutions, while the student is able to actively acquire and communicate the necessary information and facts, and to adequately formulate and defend the relevant professional arguments. The student has developed his/her analytical skills as well as abstract and critical thinking skills, can think in context and has developed the ability to expand his/her knowledge independently. The student can creatively apply the acquired knowledge and skills in his/her further studies. He is able to look at syntactic phenomena in a broader grammatical context, but he can also use them in assessing, analysing and evaluating the syntactic aspect of linguistic expressions in the school environment in the position of a teaching assistant, or for the needs of the publishing environment when proofreading linguistic expressions. The student can also convey information about syntactic phenomena to the general public and offer conclusions and syntactic justifications to lay audiences. The student has achieved a high professional level as well as a high level of linguistic culture, which is very necessary in terms of the student's future practice.

Class syllabus:

1. Syntax as a linguistic discipline. Construction as a basic syntactic unit, types of constructions. Characteristic features of Slovak syntax.

2. Syntagmatics. Practical practice and analysis of the content and formal aspects of syntagms. Determination of syntactic relations and types of syntagms, as well as means and ways of expressing syntactic relations.
3. The sentence and its essence. Intention of verbal action and its influence on the grammatical and semantic structure of the sentence, verb intention types and their relation to sentence types. Distinguishing and analysing binary and monosyllabic sentences. Identification of sentences according to modality.
4. Basic sentence articles. Practical practise of the subject, adjunct and sentence stem. Distinguishing between the clause stem of a one-part sentence and the adjunct of a two-part sentence. Distinguishing between personal and impersonal verbs.
5. Developing sentence articles. Determining and analysing the types of adjective, subject and adverbial determiner. Determining the boundary between subject and adverbial determiner.
6. Semi-predicative constructions. Practical practice and determination of the complement, delimitation of the complement from the adjective, the adverb, the subject and the adverbial determiner.
7. Analysing and practising adjunct, adjectival and adverbial semi-predicative constructions.
8. Sentences. Simple possessive clauses and their types. Practical identification and analysis of true and false paratactic clauses.
9. Simple subordinating conjunction and its types. Practical identification and analysis of true and false hypotactic clauses, finding common and different features of each type of subordinate clause.
10. Compound sentences and their types. Practical identification and analysis of subordinating, subordinating and subordinating-complex sentences.
11. Text syntax, units of text syntax and means of text binding. Topical sentence structure, meaning structure of sentences. Verbal sequence, verbal sequence factors. Practicing the given problem, determining the correct word sequence of certain elements of the syntagm and the sentence according to the semantic, grammatical and rhythmic principles.
On the basis of the use of the acquired theoretical knowledge of Slovak syntax, which will not only build on the knowledge acquired in the field within the general secondary education, but will also further enable the deepening and systematic development of his/her knowledge into a complex form, the student will acquire practical skills, which he/she will be able to apply in the assessment and analysis of syntactic phenomena of the language. The student will be able to use the acquired theoretical knowledge about the syntactic level of the language as a part of the grammatical system of written Slovak, about the specific features of Slovak syntax, about the construction as a central syntactic unit, about syntagmatic, sentence, semi-predicative and conjunctive constructions as the four basic types of syntactic constructions, as well as on the individual basic, developmental and special sentence members and on the arrangement of syntactic units in the linear sequence of the sentence and the text (i.e. I.e. about the word sequence) in their concretization on practical examples of individual syntactic phenomena, as well as in practical syntactic analyses of individual syntactic constructions and sentence members, in the complex analysis of syntactic phenomena, in the independent solution of syntactic problem solving tasks and the eventual synthesis of new and creative solutions to them. The student will be guided to actively acquire information in the field of Slovak syntax, to use digital technologies and resources, to use the acquired knowledge effectively, to formulate and defend arguments appropriately and on their basis to solve professional problems in the given field, using appropriate methods of the discipline. He/she will also develop his/her communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to follow the principles of authorial ethics, to plan and be actively responsible for his/her own learning. He will also learn to look at the acquired knowledge base from the perspective of school practice. The acquired knowledge and skills will also be necessary for the student in his/her further studies, where he/she will be able to apply them convincingly when looking at syntactic

linguistic phenomena from a broader linguistic aspect and further deepen and develop them. He will also be able to apply the acquired knowledge in assessing, analysing and evaluating the syntactic aspect of linguistic expressions and subsequent independent analysis of the problem in the given area at the language level in the school environment in the position of a teaching assistant, or also for the needs of the publishing environment when correcting linguistic expressions. Emphasis on raising the student's professional level and linguistic culture will be equally important in adequately conveying information about syntactic phenomena to the general public, as well as in offering relevant conclusions and syntactic justifications to lay audiences.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex019/22	Syntactical analysis

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organisational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 13 hours of continuous preparation for individual seminars; 2 x 17 hours of continuous preparation for 2 practical syntactic analyses of the text = 34 hours. Total 60 hours of student work.
Teaching methods: explanation, application of theoretical knowledge in practical analyses of individual types of constructions and sentence articles; analysis and solution of problem solving tasks; guided self-study; e-learning

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated during the semester in the form of 2 practical syntactic analyses of the text in the scope of the first 5 topics and in the scope of the 6th - 11th topics, which will be focused on the application of the acquired knowledge and the identification of syntactic phenomena (2 x 50 points = 100 points). The course is completed with an assessment resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0). A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D and a minimum of 60 points of the total points for a grade of E. To pass the course, a minimum of 60% of the points must be obtained. Credit will not be awarded to a student who achieves less than 60% of the points in any component of the assessment (1. practical analysis: less than 30 points; 2. practical analysis: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - excellent results): excellent performance: the student has excellent knowledge of syntactic analysis in the required range, logically arranges the presented facts, can apply and adapt the acquired knowledge of syntactic analysis in practice, has the ability to independently solve individual syntactic tasks and assignments also in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;

B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of syntactic analysis to the required extent, logically arranges the facts presented, can apply and adapt the acquired knowledge of syntactic analysis very well in practice, has the ability to solve individual syntactic tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of the student's speech is very good, has very well developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of syntactic analysis to the required extent, organises the facts presented appropriately, can reliably apply and adapt the knowledge gained from syntactic analysis in practice, solves individual syntactic tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory knowledge of syntactic analysis to the required extent, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of syntactic analysis in practice, satisfactorily solves individual syntactic tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of syntactic analysis to the required extent and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge of syntactic analysis in practice, solves individual syntactic tasks and assignments at a sufficient level, has minimal skills to learn;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of syntactic analysis to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of syntactic analysis in practice, cannot solve individual syntactic tasks and assignments, has insufficient learning skills.

Learning outcomes:

The student is introduced to the syntactic system as a part of the grammatical system of the language, as well as to selected sub-issues of Slovak syntax, also with regard to school practice. He/she has acquired practical skills which he/she can apply in assessing and analysing syntactic phenomena of the language. The student is able to use the acquired theoretical knowledge in its concretization on practical examples, both in solving individual syntactic phenomena, as well as in practical syntactic analyses of individual types of syntactic constructions and sentence members, in complex analysis of syntactic phenomena, in independent solving of syntactic problems and in possible synthesis of new and creative solutions, while the student is able to actively acquire and communicate the necessary information and facts, and to adequately formulate and defend the relevant professional arguments. The student has developed his/her analytical skills as well as abstract and critical thinking skills, can think in context and has developed the ability to expand his/her knowledge independently. The student can creatively apply the acquired knowledge and skills in his/her further studies. He is able to look at syntactic phenomena in a broader grammatical context, but he can also use them in assessing, analysing and evaluating the syntactic aspect of linguistic expressions in the school environment in the position of a teaching assistant, or for the needs of the publishing environment when proofreading linguistic expressions. The student can also convey information about syntactic phenomena to the general public and offer conclusions and syntactic justifications to lay audiences. The student has achieved a high professional level as well as a high level of linguistic culture, which is very necessary in terms of the student's future practice.

Class syllabus:

1. Syntax as a linguistic discipline. Construction as a basic syntactic unit, types of constructions. Characteristic features of Slovak syntax.

2. Syntagmatics. Practical practice and analysis of the content and formal aspects of syntagms. Determination of syntactic relations and types of syntagms, as well as means and ways of expressing syntactic relations.
3. The sentence and its essence. Intention of verbal action and its influence on the grammatical and semantic structure of the sentence, verb intention types and their relation to sentence types. Distinguishing and analysing binary and monosyllabic sentences. Identification of sentences according to modality.
4. Basic sentence articles. Practical practise of the subject, adjunct and sentence stem. Distinguishing between the clause stem of a one-part sentence and the adjunct of a two-part sentence. Distinguishing between personal and impersonal verbs.
5. Developing sentence articles. Determining and analysing the types of adjective, subject and adverbial determiner. Determining the boundary between subject and adverbial determiner.
6. Semi-predicative constructions. Practical practice and determination of the complement, delimitation of the complement from the adjective, the adverb, the subject and the adverbial determiner.
7. Analysing and practising adjunct, adjectival and adverbial semi-predicative constructions.
8. Sentences. Simple possessive clauses and their types. Practical identification and analysis of true and false paratactic clauses.
9. Simple subordinating conjunction and its types. Practical identification and analysis of true and false hypotactic clauses, finding common and different features of each type of subordinate clause.
10. Compound sentences and their types. Practical identification and analysis of subordinating, subordinating and subordinating-complex sentences.
11. Text syntax, units of text syntax and means of text binding. Topical sentence structure, meaning structure of sentences. Verbal sequence, verbal sequence factors. Practicing the given problem, determining the correct word sequence of certain elements of the syntagm and the sentence according to the semantic, grammatical and rhythmic principles.
On the basis of the use of the acquired theoretical knowledge of Slovak syntax, which will not only build on the knowledge acquired in the field within the general secondary education, but will also further enable the deepening and systematic development of his/her knowledge into a complex form, the student will acquire practical skills, which he/she will be able to apply in the assessment and analysis of syntactic phenomena of the language. The student will be able to use the acquired theoretical knowledge about the syntactic level of the language as a part of the grammatical system of written Slovak, about the specific features of Slovak syntax, about the construction as a central syntactic unit, about syntagmatic, sentence, semi-predicative and conjunctive constructions as the four basic types of syntactic constructions, as well as on the individual basic, developmental and special sentence members and on the arrangement of syntactic units in the linear sequence of the sentence and the text (i.e. I.e. about the word sequence) in their concretization on practical examples of individual syntactic phenomena, as well as in practical syntactic analyses of individual syntactic constructions and sentence members, in the complex analysis of syntactic phenomena, in the independent solution of syntactic problem solving tasks and the eventual synthesis of new and creative solutions to them. The student will be guided to actively acquire information in the field of Slovak syntax, to use digital technologies and resources, to use the acquired knowledge effectively, to formulate and defend arguments appropriately and on their basis to solve professional problems in the given field, using appropriate methods of the discipline. He/she will also develop his/her communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to follow the principles of authorial ethics, to plan and be actively responsible for his/her own learning. He will also learn to look at the acquired knowledge base from the perspective of school practice. The acquired knowledge and skills will also be necessary for the student in his/her further studies, where he/she will be able to apply them convincingly when looking at syntactic

linguistic phenomena from a broader linguistic aspect and further deepen and develop them. He will also be able to apply the acquired knowledge in assessing, analysing and evaluating the syntactic aspect of linguistic expressions and subsequent independent analysis of the problem in the given area at the language level in the school environment in the position of a teaching assistant, or also for the needs of the publishing environment when correcting linguistic expressions. Emphasis on raising the student's professional level and linguistic culture will be equally important in adequately conveying information about syntactic phenomena to the general public, as well as in offering relevant conclusions and syntactic justifications to lay audiences.

Form of the course: combined

Type, volume, methods and workload of the student - additional information
Type of activities, scope (number of hours) and methods of educational activities:
Scope, type/method of teaching and organizational form: lecture, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct teaching; 19 hours of seminar paper preparation; 28 hours of preparation for the midterm test; 60 hours of preparation for the final test, including literature study. Total 120 hours of student work.
Teaching methods: interpretation and explanation, discussion of the material covered, demonstration, guided self-study, e-learning

Number of credits: 4

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated continuously with 20 points for the seminar paper and 30 points for the continuous written test. The course is concluded with a final written test of the knowledge of the whole semester (50 points).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D, and a minimum of 60 points out of the total number of points for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who obtains less than 60 % of the points in any component of the assessment (seminar paper: less than 12 points; mid-term test: less than 18 points; final test: less than 30 points).
The rating is awarded on a scale:
A (100 - 93 %, excellent - outstanding results): excellent performance: the student has excellent knowledge of syntax to the required extent, logically arranges the facts presented, can apply and adapt the acquired knowledge of syntax in practice, has the ability to solve individual syntactic tasks and assignments independently and in a broader linguistic context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of syntax to the required extent, logically organises the facts presented, can apply and adapt the acquired knowledge of syntax very well in practice, has the ability to solve individual

syntactic tasks and assignments independently very well, also in a broader linguistic context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of syntax to the required extent, organises the facts presented appropriately, can apply and adapt the syntax knowledge reliably in practice, solves individual syntactic tasks and assignments reliably, has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has satisfactory results in syntax to the required extent, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired knowledge of syntax in practice, satisfactorily solves individual syntactic tasks and assignments, has satisfactorily developed learning skills;
E (68 - 60 %, sufficient - results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of syntax within the required range and deficiencies in the arrangement of facts, can minimally apply the acquired knowledge of syntax in practice, solves individual syntactic tasks and assignments at a sufficient level, has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of syntax to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge of syntax in practice, cannot solve individual syntactic tasks and assignments, has insufficient learning skills.

Learning outcomes:

By completing the course, the student has acquired professional competence in the theoretical and practical justification of the sentence structure in the Slovak language as a system-communicative unit of the language and the use of its differentiated types in the multifaceted expressive practice. He is prepared to pass on the acquired knowledge later as a teacher of Slovak language, to evaluate the syntactic level of texts and, if necessary, to modify texts in order to meet the holistic requirements of sentence and clause structure and the broader text in Slovak.
The student masters the laws of language construction and is able to use language to develop thinking, to further acquire new knowledge and to improve interpersonal communication, as well as to formulate his/her ideas more thoroughly and precisely and to better understand each other.
The course contributes directly to the student's ability to perceive readily the interpretations of language that follow in the subsequent years of his studies. The student is prepared not only to deepen and develop the knowledge acquired in further Bachelor's and then Master's studies, but also to be able to use and creatively apply it in the school environment in the position of a teaching assistant, or even for the needs of the publishing environment in the position of a proofreader.
The student can also convey information about syntactic phenomena to the general public and offer conclusions and syntactic justifications to lay audiences.
Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skills to communicate facts, concepts and opinions and to formulate and defend arguments and professional positions. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills, such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. Syntax as a linguistic discipline, its subject and the relationship of syntax to other levels of language.
2. The essence of the sentence. Actualization and predication. Grammatical and semantic core and its articulation. Construction as a basic syntactic unit. Content and form of constructions. Syntactic relation, ways and means of its realization.

3. The branch article as a basic element of the grammatical structure of a sentence. Types of sentence articles. Simple and compound sentence articles. Sentence type as a configuration of grammatical and semantic elements of a sentence. Sentence and utterance.
4. Simple and compound sentence. Sentence. Main and subordinate clauses. Types of subordinate clauses according to the sentence-final principle.
5. Subject and adverb as the basic clause members of a two-part sentence.
6. The sentence stem as a basic member of a one-part sentence. Impersonal verbs and impersonal verb forms.
7. Semi-predicative constructions. The complement and the preposition as separate sentence members.
8. Developing sentence articles. Subject, adverbial determination and adjective.
9. Content sentence structure and actual sentence structure. Verb sequence and its factors.
10. Modal sentence structure and the expressive aspect of the sentence. Positive and negative in a sentence. Sentential and article negation.
11. Syntax of the text. Units of text syntax. Means of text binding.
The above course content will directly and immediately contribute to the formation of the graduate's profile, to the development of his/her linguistic awareness, as well as to the learning outcomes and objectives through the choice of topics, their arrangement and their internal interrelation, as well as the way the issues are presented to the students by the teacher, and understood and mastered by the students.
The curriculum of the course includes a spectrum of cross-cutting and specialized knowledge that builds on the student's general education and systematically develops his/her knowledge of syntactic issues into a comprehensive and applicable form, including the latest verified knowledge in the field.
The course will lead the student to both active acquisition of information and effective use of cross-cutting and specialized knowledge of syntax, will consolidate and develop his/her ability to formulate arguments and defend professional positions, stimulate his/her skill to propose and implement solutions to professional syntactic problems on their basis, modifying his/her knowledge in the process, and creatively employing appropriate and adequate methods throughout the discipline. In the course, the student will consolidate and develop communicative competences, the ability to interpret syntactic facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, to plan and be actively responsible for his/her own education, to develop and consolidate his/her sense of socially responsible action and civic attitudes in the spirit of democratic principles.

7. Semi-predicative constructions. The complement and the preposition as separate sentence members.
8. Developing sentence articles. Subject, adverbial determination and adjective.
9. Content sentence structure and actual sentence structure. Verb sequence and its factors.
10. Modal sentence structure and the expressive aspect of the sentence. Positive and negative in a sentence. Sentential and article negation.
11. Syntax of the text. Units of text syntax. Means of text binding.
The above course content will directly and immediately contribute to the formation of the graduate's profile, to the development of his/her linguistic awareness, as well as to the learning outcomes and objectives through the choice of topics, their arrangement and their internal interrelation, as well as the way the issues are presented to the students by the teacher, and understood and mastered by the students.
The curriculum of the course includes a spectrum of cross-cutting and specialized knowledge that builds on the student's general education and systematically develops his/her knowledge of syntactic issues into a comprehensive and applicable form, including the latest verified knowledge in the field.
The course will lead the student to both active acquisition of information and effective use of cross-cutting and specialized knowledge of syntax, will consolidate and develop his/her ability to formulate arguments and defend professional positions, stimulate his/her skill to propose and implement solutions to professional syntactic problems on their basis, modifying his/her knowledge in the process, and creatively employing appropriate and adequate methods throughout the discipline. In the course, the student will consolidate and develop communicative competences, the ability to interpret syntactic facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, to plan and be actively responsible for his/her own education, to develop and consolidate his/her sense of socially responsible action and civic attitudes in the spirit of democratic principles.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex009/22	Teaching practice (A)

Educational activities:
Type of activities: practice
Number of hours:
per week: **per level/semester:** 1t
Form of the course: combined

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
Prerequisite subjects: none
Prerequisites for successful completion of the course: the course is completed with an assessment (100% of the continuous assessment).
The student completes an introductory practice seminar with the practice methodologist and a hospitality in a primary or secondary school according to the subject/subject specialization of the practice in the range of 10 - 20 hours. The student will keep a practice portfolio of the hours of hospitalisation, which he/she will submit to the practice methodologist/methodologist for evaluation in print or electronic form (as agreed with the methodologist/methodologist). The final assessment takes the form of a colloquium. To pass the course, a minimum score of 60% is required.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - passing the course still requires a significant amount of effort and work on the part of the student).
A - excellent results: the student is able to apply procedures in the processes of formulating objectives according to different taxonomies of objectives. The student can analyze and classify methods and forms and other didactic categories in practice. The student is able to work effectively with professional sources. The student can critically, factually assess and evaluate the presented solutions of others, can evaluate the quality of his/her own work.
B - above average standard: the student can apply the procedures in the processes of formulating goals according to different taxonomies of goals. The student can analyze and classify methods and forms and other didactic categories in practice. Above-average orientation in the problems of general didactics, above-average communication skills, completion of assigned tasks. Critical evaluation is at borderline level.

C - normal reliable work: the student is able to work out the assigned tasks, average orientation in the problems of general didactics. Can apply the procedures in the processes according to the model and with the teacher's help. Average activity on intermediate assignments.
D - acceptable results: the student is able to work out intermediate tasks with the help of the teacher, average orientation in general didactics, average student activity.
E - the results meet the minimum criteria: the student can define and define basic didactic concepts and elements, but cannot define them in educational contexts. Critical assessment and evaluation are absent. Sufficient level of practical skills and professional knowledge.
FX - extra work is required: the student has very little knowledge of basic didactic terminology, cannot apply it in the outputs, there is no application of procedures, correct elaboration of tasks. Critical assessment and evaluation are absent.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning objectives and outcomes:
The goal of the Teaching Practicum (A) is to initiate the professional vision of male and female student teachers, particularly in terms of descriptive and identification. After completing the course, the student knows and can navigate in school documentation, can process the record of the educational unit hospitalization, can describe educational phenomena (elements of communication in the learning group, individual differences of pupils, phenomena of the dynamics of the learning group), can identify the individual educational goals, methods, forms, principles and content elements of education. The aim of the course is also to observe and analyse the manifestations of the teacher's personality and the classroom environment. The student will be able to distinguish and evaluate the application of positive and negative evaluation in teaching, be able to identify non-standard educational situations and evaluate the effectiveness of their solution.

Class syllabus:
Brief outline of the course:
Hospitalization activity:
Preparatory phase of the hospitalization - pre-praxis meeting: definition of the objectives, methods and focus of the hospitalization.
The implementation phase of hospitalization - own observation of the educational process and processing of the hospitalization portfolio with emphasis on aspects of pedagogical communication, elements of communication, individual differences of pupils, phenomena of the dynamics of the learning group, educational goals, methods, forms, principles and content elements of education, manifestations of the teacher's personality and the classroom environment, positive and negative evaluations in teaching, non-standard educational situations.
Final phase of the hospitalization - post-hospitalization colloquium: analysis of the practice portfolio, reflection and interpretation of the observed educational phenomena. Familiarisation with the school documentation: state and school curriculum, electronic class book, online student book, Edupage information system. Educational standards, individual education plans, etc.

Scale of assessment (preliminary/final): 100/0

Learning outcomes:
Learning outcomes and transferable competences:
The goal of Teaching Practice B is to initiate students' professional vision at the level of descriptive and identification. After completing the pedagogical practice B, the student knows and can work with pedagogical documentation, can process the record of the teaching unit hospitalization. Identifies the main objectives, methods, forms and phases of the teaching process. Can describe the elements of communication and classroom dynamics.

Class syllabus:
Brief outline of the course:
The aim of teaching practice B is to enable students to observe the teaching process from the perspective of a future teacher. During the practicum, students observe the teaching process of the practicing teachers and, on the basis of theoretical knowledge of general didactics, analyse the teaching process in its entirety and, in the final reflection, formulate a characterisation of the observed teaching, the working atmosphere, evaluate the pedagogical competence of the practicing teachers, point out the positives and negatives, propose their own solutions and describe suggestions for change, and give their own reflections on the profession of teaching, where they are in relation to the observed teaching process.
Preparatory phase for the practice: pre-practicum seminar, definition of requirements for the implementation of the practice, preparation and study of hospitality sheets, study of didactic literature, pre-hospitalization interview with the trainee teacher.
The implementation phase of the practice: self-observation of the teaching process, processing of hospitality sheets with emphasis on aspects of objectives, methods, pedagogical communication, teacher and pupils' activities, identification of teaching phases, cognitive functions, pupils' activity and activation, and a comprehensive record of the teaching process.
Evaluation phase of practice: interpretation of observed educational phenomena, analysis of the hospital portfolio, reflection on the pedagogical practice B.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPg/B-VUZex001/22	Theoretical basics of education

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
13 hours lecture + seminar/semester, combined method
Student workload: 13 hours of teaching; 9 hours of guided self-study, 20 hours of preparation for mid-term papers, 33 hours of term paper preparation, 45 hours of exam preparation. Total 120 hours of student work.
Methods of education: interpretation combined with discussion, situational methods, activating methods, problem-based methods, application of theoretical knowledge to practical examples and tasks, guided self-study - solving tasks and assignments

Number of credits: 4

Recommended semester: 1.

Educational level: I.

Prerequisites:

Course requirements:
The course is completed by examination, 50% of the interim and 50% of the final assessment
The interim evaluation includes the following:
- continuous work during the semester focused on current issues of education, defining educational goals, concretizing educational principles, identifying educational methods, etc. - 15 points,
- term paper focused on a selected area of education - 35 points.
The final evaluation includes the following:
- final written examination - 50 points.
The rating is awarded on a scale:
A (100-91%, excellent - excellent results with only minimal errors),
B (90-81%, very good - above average results with minor errors),
C (80-73%, good - normal reliable work, average results),
D (72-66%, satisfactory - acceptable results, but significant errors occur),
E (65-60%, sufficient - results meet minimum criteria),
Fx (59-0%, insufficient - extra work required).
For successful completion of the course it is necessary to obtain at least 60% of the points.
A minimum of 91 points is required for a final grade of A. For this grade, the student should demonstrate: a creative and original approach in the development of intermediate assignments, excellent professional knowledge and its application in problem solving, excellent orientation in the subject matter, excellent communication skills, responsibility and timely completion of assignments, exceptional activity in the classroom during the semester.

A score of at least 81 points is required for a final grade of B. For this grade, the student should demonstrate: a creative approach in developing ongoing assignments using a model, above average expertise and application of that expertise in problem solving using tutorials, above average orientation to the problem, above average communication skills, responsibility and timely completion of assignments, above average activity in class during the semester.
A minimum of 73 points is required for a final grade of C. For this grade, the student should demonstrate: the ability to develop intermediate assignments using the given template, good professional knowledge and its application in solving problem problems in a group or with the help of the instructor, good orientation in the subject matter, good communication skills, completion of the assigned tasks, average activity in class during the semester when prompted by the instructor.
A minimum of 66 points is required for a final grade of D. For this grade, the student is expected to demonstrate: the ability to develop intermediate assignments using a given template and with the assistance of the instructor, average proficiency and application in problem solving in a group setting or with the assistance of the instructor, average orientation to the subject matter, average communication skills, completion of assignments, and basic activity in the classroom during the semester in collaboration with the instructor or other students.
A score of at least 60 points is required for a final grade of E. For this assessment, the student should demonstrate: the ability to prepare continuous assignments and with the help of the instructor, basic/minimal professional knowledge, basic/minimal orientation in the subject matter, basic communication skills, completion of the assigned tasks.
Scale of assessment (preliminary/final): 100/0

Learning outcomes:

Students will gain knowledge and understanding of the educational and self-educational process in a social context with emphasis on the application of the principles of creative-humanistic education and the presentation of new approaches and perspectives in the development of modern educational theory. On a theoretical-empirical level, students are able to implement a variety of educational activities and activities that can be applied within the profession of teacher/educator/teaching assistant and have the competence to solve basic problem situations in educational practice in collaboration with other professionals.
Transferable competences: the course develops students' analytical, critical, evaluative and creative thinking, reasoning in context and supports the development of their interpersonal skills, self-development and personal and professional growth.

Class syllabus:

An introduction to the discipline of educational theory. Theoretical foundations and determinants of education. Creative-humanistic education.
Views on education. Education in different historical periods.
School documents and legislation with a focus on education. Educational programme.
Goals of education and their determination.
The concept of education and self-education, functions, conditions and factors of education. The process of education/self-education and its phases.
Educational methods and new trends.
Characteristics and classification of educational principles.
Concretization of the content of educational action: moral education, pro-social education, intellectual education, aesthetic education, work education, physical education, ecological and environmental education, multicultural education, etc.
Organizational forms and means of education.

The personality of the teacher/educator/teaching assistant in the educational process. Educational styles and requirements for the personality of the teacher/educator/teaching assistant. Code of ethics of the teaching profession.
The personality of the child in the educational process. Categorization of factors of personality formation, bio-psycho-social determination of personality development and education.
Educational environment and its importance for a person.
Family and family education. Educational styles in the family. Negative tendencies in family upbringing.
Educational conditions of the school environment. Negative phenomena in the school environment and their prevention.
Education outside the classroom and its specifics.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex023/22	Therapeutic Pedagogy for the Helping Professions

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
5 hours per semester, seminar, combined form (full-time + distance education)
Student workload:
5 hours of direct education, self-study per semester (17 hours); 14 hours of preparation for the midterm test; 20 hours of case study and design of a therapeutic-pedagogical intervention (set of exercises, programme); 4 hours of preparation of the presentation of the case study and the programme. Total 60 hours.
Teaching methods:
Seminars: interpretation combined with discussion of the topic, e-learning, critical reflection of relevant video recordings in the field of application of therapeutic-pedagogical therapies in practice, critical reflection of current basic and applied research in the field of therapeutic-pedagogical intervention in the Slovak Republic and in the world (monographs, journals, databases of scientific knowledge, case studies, etc.), work on the assignment of solving a specific problem or application of knowledge from therapeutic pedagogy in practice (e.g. methods applicable in therapeutic-educational intervention with an individual or a family, simulated examples of practice / case studies).

Number of credits: 2

Recommended semester: 4.

Educational level: I.

Prerequisites:

Course requirements:
100% continuous assessment
The continuous assessment includes a mid-term test (30% of the grade), the completion of two assignments (20% of the grade), the completion and oral presentation of a short case study of a client in a difficult life situation and the proposal of a therapeutic-pedagogical intervention (program) (50% of the grade).
To pass the course, a minimum of 60% of the total score is required.
The grade is awarded on a scale:
A (100-94%, excellent - outstanding),
B (93-86%, very good – above-average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, marginal performance - results fulfil the minimum criteria),
Fx (59-0%, inadequate - additional work required).

For a grade of A, the student is required to demonstrate excellent accuracy and active critical and creative reflection on the knowledge of the field of therapeutic pedagogy, including its meaningful integration with the knowledge of their field of study as well as other disciplines. Demonstrate the ability to have a good understanding of the principles, guidelines, and methods of therapeutic-educational support. Also, in identifying client needs and resources as well as means of assistance.
A grade of B indicates that the student reflects critically on the knowledge of the field of therapeutic pedagogy, including its meaningful integration with the knowledge of their field of study as well as other disciplines, in a reasonably good manner. Demonstrates the ability to be very knowledgeable about the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as means of assistance.
A grade of C will be awarded if the student is able to critically reflect well on the knowledge of the field of therapeutic pedagogy, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student has demonstrated the ability to be well versed in the principles, guidelines, and methods of therapeutic educational assistance, identification of client needs and resources as well as means of assistance.
A grade of D indicates that the student has limited, moderately critical reflection on the knowledge of the field of therapeutic pedagogy, including its appropriate integration with the knowledge of their field of study as well as other disciplines. The student demonstrates the ability to satisfactorily navigate the principles, guidelines, and methods of therapeutic-educational assistance, identifying client needs and resources as well as the means of assistance.
A grade of E will be given if the student reflects critically on the knowledge of the field of therapeutic pedagogy to a limited extent. The student has difficulty understanding and navigating the principles, guidelines, and methods of therapeutic-educational assistance, identification of client needs and resources, and means of assistance.
The Fx evaluation requires further study and work by the student.
Scale of assessment (preliminary/final): 100% continuous assessment

Learning outcomes:
The goal of the Therapeutic Pedagogy for the Helping Professions course is for students to acquire knowledge related to the holistic being of the person in the context of their development, environment and relationships, learning, emotional experience, agency, and health, with a focus on personal assistance, inclusion, and promoting the participation of the individual at every age. The course Therapeutic Pedagogy for the Helping Professions is an integral part of the systemic knowledge framework of the combined Psychology Teacher Education degree, in line with the mission and strategic goals of the PdF UK, as well as the graduate profile itself.
By successful graduation, students will have critically mastered (to the extent as indicated in the grading scale above) the current theoretical and empirical knowledge of the field of therapeutic pedagogy - principles, principles and specifics of the integration of educational and therapeutic efforts, the roles and competencies of the therapeutic educator in the levels of diagnosis, prevention, counselling, therapeutic education, accompaniment and therapeutic-educational intervention). They will be able to have a deeper orientation in the person's difficult situation, in the meaning and possibilities of early help, as well as help from the recipient's relational persons. They will demonstrate (regarding the scope of the course) an adequate orientation in the methods of therapeutic-pedagogical assistance and the specifics of therapeutic-pedagogical therapies: art therapy, bibliotherapy, drama therapy, occupational therapy, music therapy, psychomotor therapy, and play therapy.
Students of psychology teaching should use the acquired knowledge and skills in the study of other subjects of their study programme, but especially in practice, in preventive counselling and educational activities in the school system (towards optimisation of developmental conditions of

specific pupils/students and solving potential developmental problems, in this direction also by cooperation with other school staff and parents, etc.).

Class syllabus:

1. Theoretical background of the field of Therapeutic Pedagogy (subject, principles, guidelines) - specifics of the integration of educational and therapeutic efforts.
2. The image of a person - a provider and a recipient of help. A holistic approach to the person (pupil, client, patient) in education and therapy. Orientation in the life situation of the recipient.
3. Roles and competences of the therapeutic educator (diagnosis, prevention, counselling, therapeutic education, accompaniment, therapy).
4. Inclusive potential of therapeutic-educational intervention.
5. Orientation in the person's situation, early help, help to the family (contact, helping relationship). Types and specifics of validation in communication with the recipient of help and their guardians (close relational persons). Methods of therapeutic-pedagogical assistance.
6. Therapeutic-educational exercises and programs in therapeutic-educational care.
7. Therapeutic-educational disciplines in therapeutic-pedagogy: art therapy, bibliotherapy, drama therapy, occupational therapy, music therapy, psychomotor therapy, play therapy.

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KPsPp/B-PSYex018/22	Training of communication competences

Educational activities:
Type of activities: practicals
Number of hours:
per week: **per level/semester:** 5s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching, and organizational form:
5 hours per semester, combined form (full-time + distance)
Student workload:
5 hours of teaching, self-study (17 hours) per semester; preparation for class (14 hours); work on preparing assignments (14 hours), 50 hours total.
Teaching methods:
Guided discussion, experiential and activating methods, work with tests and questionnaires, problem-based methods, reflective essay, guided self-study, handouts and exercises in the MS Teams system, and work with text and information sources.

Number of credits: 2

Recommended semester: 2.

Educational level: I.

Prerequisites:

Course requirements:
100% of intermediate assessment
Interim assessment includes the work of students in completing interim tasks and assignments, which are realized by individual preparation by the student (total 30% of the assessment), as well as by his/her active participation in activities during the hours of implementation of the course (total 70% of the assessment). To pass the course, a minimum score of 60% is required.
Individual assignments are focused on finding a text with a communication sample (in the range of about A4 format) and its analysis according to the teacher's instructions (10%) and elaboration of an assignment on the topic of the strengths and weaknesses of the student's communication (10%). The student will continue to work with the developed material in class. At the end of the semester, the student will produce a reflective essay providing feedback on the course and the student's opinion of his/her communication competence (10% of the grade).
Within the course teaching during the semester, space is devoted to specific activities and simulations of dealing with different communicative situations in which the student actively participates, on the topics of verbal (10%), non-verbal (10%), assertive (10%) and negative (10%) communication, communication in conflict situations (10%), active listening (10%) and effective feedback (10%).
Ratings are given on a scale:
A (100-94%, excellent - outstanding),

B (93-86%, very good - above average standard),
C (85-76%, good - normal reliable work),
D (75-68%, satisfactory - acceptable results),
E (67-60%, satisfactory - results meet minimum criteria),
Fx (59-0%, inadequate - additional work required).
For a grade of A, the student needs to be actively involved in solving the techniques and activities presented in class continuously throughout the semester, actively solve the assigned individual tasks, master the techniques to develop the communication areas, and try to develop his/her communication competences, try to solve the tasks creatively, actively express his/her own opinion.
B grade means that the student is actively involved in solving techniques and activities presented in class, solves individual tasks, has mastered techniques for developing communication areas, has made efforts to develop his/her communication competencies, to a lesser extent seeks original solutions to the tasks set, actively expresses his/her own opinion.
C grade means that the student is usually actively involved in solving the techniques and activities presented in class during the semester, actively solves only some of the set tasks, masters the techniques for developing communication areas, and tries to develop their communication competencies only in some areas, uses creativity in solving the set tasks to a lesser extent, actively expresses his/her own opinion.
Grade D means that the student's activity during the semester in solving the activities presented in class is at a weaker level, the solutions to the tasks are slightly deficient, the student is deficient in the mastery of techniques for developing communication areas, interest in developing his/her communication competences is sporadic, he/she often solves the tasks set only with external help, he/she is more passive in expressing his/her own opinions.
Grade E means that the student is passive during the semester in solving the activities presented in class, is minimally involved in the activities and solving the set tasks, mastery of techniques for developing communication areas is minimal, and shows no interest in developing his/her communication competences, relies more on the group than on himself/herself in solving the tasks, expresses his/her opinions only minimally.
A grade of FX indicates that the student has not sufficiently met the course requirements and extra work is required.
Scale of assessment (preliminary/final): 100% of intermediate assessment

Learning outcomes:
The aim of the course is to gain an overview of communication techniques and to acquire skills in the field of communication competences regarding the specifics of communication in an educational environment.
By completing the course, a student:
- understands the basic theories of communication
- has knowledge of verbal and non-verbal communication
- gains an overview of techniques for the development of communication
- is able to use feedback effectively in social communication
- is familiar with the specifics of communication in the school environment
- is aware of the importance of effective communication in the teaching profession
- becomes proficient in the use of a variety of techniques and activities to develop communication
- can evaluate the strengths and weaknesses of their communication competences
- develops and consolidates his/her skills in the area of communication competencies.

Class syllabus:

1. Communication as the basis of social interaction. The function and components of communication, motivation to communicate, and communication context. Intercultural differences in communication.
2. Basic theories of communication.
3. Social perception as part of human communication.
4. Verbal communication and techniques for its development.
5. Non-verbal communication (haptics, proxemics, paralinguistics, posturing, gestures, mimicry, kinesics) and techniques for its development.
6. Active and empathic listening as an important part of communication.
7. Assertive communication and techniques for its development and training.
8. Feedback in communicative interactions.
9. Communication in conflict situations and conflict management in speech.
10. Negative communication and manipulation in communication.
11. Specifics of communication in educational settings. Errors in teacher-pupil communication.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSJL/B-SLOex007/22	**Course title:** World literature I

Educational activities:
Type of activities: lecture + seminar
Number of hours:
per week: **per level/semester:** 8s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: lecture + seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 33 hours of continuous reading of fiction texts per class period; 21 hours of preparation for the presentation of the assigned assignment with emphasis on the application of acquired knowledge and reading-interpretation skills; 23 hours of preparation for written tests aimed at identifying excerpts from the literary works read. A total of 90 hours of student work.
Teaching methods: lecturing, interpretation of theoretical knowledge and its application to practical examples, demonstration, moderated conversation, analytical and interpretative work with literary text, guided self-study, e-learning

Number of credits: 3

Recommended semester: 3., 5.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. The student will be evaluated for the presentation of the assigned assignment with emphasis on the application of the acquired knowledge and reading-interpretation skills (40 points) and for two continuous written tests (the first is taken during the semester within the scope of the first 6 topics, the second at the end of the continuous teaching, both tests are 30 points each). The course is completed with a grade resulting from the continuous assessment of learning outcomes during the teaching part of the semester of study (100/0).
A minimum of 93 points is required for a final grade of A, a minimum of 85 points for a grade of B, a minimum of 77 points for a grade of C, a minimum of 69 points for a grade of D, and a minimum of 60 points of the total points for a grade of E. To pass the course, a minimum of 60 % of the points must be obtained. Credit will not be awarded to a student who scores less than 60 % on any component of the assessment (presentation of the assignment: less than 24 points, intermediate test: less than 18 points, final test: less than 18 points).
The rating is awarded on a scale:
A (100 - 93%, excellent - outstanding): excellent performance: The student has an excellent knowledge of world literature to the required extent, logically arranges the facts presented in a flawless manner, is able to apply the acquired literary-historical knowledge at an excellent

level and adapt the procedures of working with literary texts in school practice, has the ability to independently and imaginatively solve individual tasks and assignments in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is excellent, has excellently developed learning skills;
B (92 - 85%, very good - above average standard): very good performance: The student has a very good knowledge of world literature to the required extent, arranges the facts presented logically, with only minor errors, can apply the acquired literary-historical knowledge very well and adapt the procedures of working with literary texts in school practice without major errors, has the ability to independently solve individual tasks and assignments also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, he/she has very well-developed learning skills;
C (84 - 77%, good - normal reliable work): good performance: the student has a good knowledge of world literature to the required extent, arranges the facts presented appropriately and makes errors only in places, can reliably apply and adapt the procedures of working with a literary text in school practice, reliably solves individual tasks and assignments independently, has well-developed learning skills;
D (76 - 69%, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of the curriculum to the required extent, shows some deficiencies in the arrangement of facts, can satisfactorily apply the acquired literary-historical knowledge and existing procedures for working with literary text in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60%, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates minimal knowledge of the required range of material and significant gaps in the organisation of facts, can minimally apply acquired knowledge and existing practices of working with literary text in school practice, solves individual tasks and assignments with considerable help at a satisfactory level, has minimal learning skills;
Fx (59 - 0%, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of the curriculum to the required extent, does not know the facts and their logical connections, cannot apply the acquired knowledge to work with a literary text in school practice, cannot solve individual tasks and assignments, has insufficient learning skills.

Learning outcomes:
The student has acquired knowledge about the phenomenon of world literature, its national variants, periodization, literary trends and representatives. The student is able to creatively and independently analyse and interpret literary texts, to characterise the poeological and value specifics of the work of individual authors and to identify different forms of literariness. The student has developed his/her communication skills and is able to practise competent participation in a professional discussion of the topic under discussion, to develop his/her interpretative inventiveness. He is able to perceive readily the interpretations on literature following in the following years of his studies. He is prepared not only to deepen and develop them in further bachelor's and then master's studies, but also to use and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a proofreader. The student is also able to convey information about the phenomena of world literature to the general public and to offer conclusions and morphological justifications to lay audiences. Through problem solving, the student has acquired the skills to actively gather information and use it to solve practical problems in the field using appropriate and appropriate procedures, as well as the skills to communicate facts, concepts, and opinions, and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as

analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills.

Class syllabus:

1. What is world literature? Canon. Prototext, metatext. Adaptation. Palimpsest, pastiche, travesty.
2. Ancient literature. The origins of verbal art. Literature of the Orient.
3. Greek literature. Didactic epic. Drama. Entertainment literature.
4. Roman literature. Satire. Historical writing.
5. Medieval literature. Chivalric epic. Vagrant lyric. Religious drama.
6. Humanist and Renaissance literature. Love songs. From the novella to the novel. Renaissance theatre.
7. Baroque literature. Reflection of the world as labyrinth and theatre.
8. The Enlightened Century. Literature as the engine of the Enlightenment movement.
9. Classical literature. Specific peculiarities of French classicism and "pseudo-classicism".
10. Romantic literature. Nature poetry. Gothic and historical novel.
11. Realistic literature. Realism as an artistic method. Different forms of realism.

The course will broaden the student's knowledge of representative works of world literature, create a better understanding of Slovak literary communication in a broader international context, and contribute to the mastery of literary theory and methodology of literary research. The student will acquire the competences necessary for teaching world literature. The student will learn how to plan and implement individual lessons, practically apply various methods of making the material of the period accessible. The student will be able to use digital technologies in teaching the history of literature. He/she will acquire the prerequisites and motivation to develop the skills necessary for further learning and be prepared to encourage pupils to actively acquire literary-historical knowledge.

The course will lead the student to the active acquisition of information and the effective use of cross-cutting and specialised knowledge, consolidate and develop his/her ability to formulate and defend arguments, stimulate his/her skill to propose and implement solutions to professional problems on their basis, modifying his/her knowledge in the process, and creatively using the appropriate and appropriate methods of the discipline. The student will consolidate and develop communication competences, the ability to interpret facts correctly, to be responsible for the quality of his/her work, to observe the principles of author's ethics, the ability to plan and be actively responsible for his/her own education, to develop and consolidate his/her sense of socially responsible action and civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex018/22	World literature II

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 32 hours of continuous preparation for individual classes with application of specific assignments, including reading of literary texts for individual classes; 15 hours of preparation for presentation of a written final interpretation based on selected textual segments from the work of the author studied, with emphasis on application of acquired knowledge of literary direction, the particularities of the author's poetics, analytical-interpretive skills, and on defending one's arguments. A total of 60 hours of student work.
Teaching methods: lecture, inductive-generative conversation, discussion, demonstration and analysis of concrete examples, analytical and interpretative work with the text, problem-based tasks, guided self-study, e-learning

Number of credits: 2

Recommended semester: 4., 6.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous reading of literary texts and completion of assignments in seminars on the theoretical knowledge and practical skills needed when working with literary texts in the educational process (60 points);
• presentation of a written final interpretation based on selected textual segments from the work of the read author, with emphasis on the application of the acquired knowledge of literary direction, the particularities of the author's poetics, analytical-interpretive skills and on the defence of their arguments (40 points).
The course culminates in a grade resulting from an interim review of learning outcomes during the instructional portion of a given semester of study (100/0).
To pass the course, a minimum of 60 % of the points must be obtained (at least 60 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E. Credit will not be awarded to a student who scores less than 60 % on any component of the assessment (assignments: less than 36 points; final interpretation: less than 24 points).

A (100 - 93 %, excellent - outstanding results): excellent performance: the student has an excellent knowledge of selected literary movements and currents from the second half of the 19th century and from the 20th century. The student is able to apply and adapt the acquired literary knowledge at an excellent level in specific approaches to the literary text applicable to the teaching of literature in school practice, has the ability to creatively solve individual tasks and assignments independently and imaginatively, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is excellent, has well-developed skills for independent further learning;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of selected literary movements and currents from the second half of the 19th century and from the 20th century and of their specific representatives in the required scope, logically, with only slight errors, arranges the presented literary-historical facts, can apply and adapt the acquired literary-scientific knowledge very well in specific approaches to the literary text usable in the teaching of literature in school practice, has the ability to independently solve individual tasks and assignments in the broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of selected literary movements and movements from the second half of the 19th century and from the 20th century. He/she arranges the presented literary-historical facts appropriately and makes mistakes only in places, he/she can reliably apply and adapt the acquired literary-scientific knowledge in specific approaches to the literary text useful in the teaching of literature in school practice, he/she solves individual tasks and assignments reliably independently, he/she has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of selected literary movements and currents from the second half of the 19th century and from the 20th century. The student is able to satisfactorily apply the acquired literary knowledge in specific approaches to literary texts applicable in the teaching of literature in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of selected literary movements and movements from the second half of the 19th century and from the 20th century. The student is able to apply the acquired literary knowledge minimally in specific approaches to literary texts useful in the teaching of literature in school practice, solves individual tasks and assignments with considerable help at a sufficient level, and has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of selected literary movements and movements from the second half of the 19th century and from the 20th century. The student does not know the literary historical facts and their logical connections, cannot apply the acquired literary knowledge in specific approaches to literary texts useful in the teaching of literature in school practice, cannot solve individual tasks and assignments, and has insufficient learning skills.

Learning outcomes:
The student has knowledge of selected literary trends and currents of world literature of the second half of the 19th and 20th centuries and of its representative individual realisations, is familiar with group and individual ideological and aesthetic initiatives and poetics, and is aware of their significance for the understanding of Slovak literature of the 20th century. Can creatively and independently analyse and interpret literary texts, characterise the poeological and value specifics of the work of individual authors and identify different forms of literariness. Has acquired analytical and interpretive skills applicable to professional and school analysis and interpretation of specific

literary texts, understands the specificity and artistic value of selected literary texts, and can actively seek new possibilities in approaching a literary text. The student is able to interpret a literary text in relation to other art forms. Can also work with different possible interpretations of a text in school practice. As a result of the analytical and critical approach to the literary text, the student has developed transferable competences, because especially in the analytical-interpretive part, critical thinking, thinking in context, developing communicative and digital competences are emphasised, on the basis of which the student is able to solve specific tasks, as well as to construct his/her own interpretations of literary texts. The student is able to promptly perceive interpretations of literature in the following years of his/her studies. Based on problem-solving tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further bachelor's and then master's studies, but also to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Literary modernism. Poetic modernism. Symbolism, impressionism, decadence. Subjectivisation, psychologisation, decomposition of normative poetics.
2. Modernist prose. Studies of the inner life. Suppression of the plot. The isolation and loneliness of man. The stream-of-consciousness technique.
3. Modernist drama. Parody and the verbal grotesque. Symbolism, decadence, failure of communication.
4. Naturalism. The biological and social determination of man. Taboo themes. Synesthetic descriptions.
5. Poeticism. Joyful and creative art and life. (Visual) associativity. Unusual characters and settings. Eroticism. Poetic imagery.
6. Surrealism. Psychic automatism. Polythematicism, surprising intermingling of images, banding, disregard for normative poetics.
7. Expressionism. Subjectivised artistic reality. Tendency to be more profound. Contrast. Deformation as the basis of expressionist expression, the tendency to get "beyond" language - from exclamation to pathos.
8. Existential literature. Minimization of action, borderline situations. Man is condemned to be free.
9. Absurd drama. Change in the traditional structure of drama. Tragicomic. Absurdity. A man unable to communicate.
10. Magical realism. The miraculous in the everyday and as part of the real world. Metamorphosis. Supernaturalism of characters and objects. Mixing the harsh with the poetic. Cyclic time.
11. Postmodern literature. Manifestation of pluralism. Intertextuality and intratextuality, fragmentation, decanonization, hybridization, participation, eclecticism and palimpsest. The plural identity of man.

The course curriculum covers a spectrum of cross-cutting and specialized knowledge that builds on the student's general high school education and systematically develops the student's knowledge into a comprehensive and applicable form, including the latest knowledge in the field. The student will acquire knowledge concerning representative individual realizations of world literature of

the second half of the 19th and 20th centuries in its diversity of type, genre and direction. Special emphasis will be placed on literary modernism and other literary movements and currents corresponding to the content of secondary school education (Naturism, Poetism, Surrealism, Expressionism, Existentialism, Absurdist Literature, Magical Realism, and Postmodernism). The student will be able to create simple definitions of literary terms, giving age-appropriate examples. The student will use the acquired knowledge appropriately when working with selected textual material. The student will be able to assess the value and artistic contribution of a literary work in a literary-historical context and will be able to point out the importance of knowledge of the wider literary, cultural and social context. The student will be able to justify and apply various methodological approaches to literary analysis and interpretation, and will be able to use the experience of an artistic text in his/her own individual (reception and production) activity. He/she will develop his/her analytical skills with an emphasis on independent and creative work. On the basis of the acquired knowledge and skills, he/she will be able to apply analytical-interpretive competences to other literary texts, to point out the interrelationships between them and to reflect on new possibilities of literary analysis and
Interpretation. The student will also be oriented in related practical and methodological knowledge, which will be a prerequisite for his/her proper understanding of literary communication in the broader international context and the past in the courses of the continuing master's degree. The student will acquire a base of knowledge and skills that will be deepened and developed in further bachelor's and then master's studies, and will be able to use and creatively apply them in the school environment in the position of a pedagogical assistant, later for the analysis and selection of didactic materials from the world literature of the second half of the 19th century and the 20th century with regard to teaching objectives, and possibly also for the needs of the publishing environment in the position of a textual proofreader. The student will be guided to actively acquire information and to make effective use of cross-cutting and specialised knowledge, will consolidate and develop his/her ability to formulate and defend arguments, and will be able to communicate theoretical knowledge and practical skills to a wider and lay public. An analytical and critical approach to a literary text will stimulate critical thinking, creativity and contextual reasoning, which the student will demonstrate in solving specific assignments as well as in constructing his/her own final interpretation. The student will creatively use appropriate and discipline-appropriate methods in solving problem-based assignments. The student will acquire the aptitude and motivation to develop the skills necessary for further learning and will be prepared to encourage students to actively acquire literary and historical knowledge. The student will consolidate and develop communication and digital competences, the ability to interpret facts correctly, to take responsibility for the quality of his/her work, to observe the principles of authorial ethics, the ability to plan and be actively responsible for his/her own learning, to develop and consolidate a sense of socially responsible action and pluralistic civic attitudes in the spirit of democracy.

COURSE DESCRIPTION

Academic year: 2023/2024

University: Comenius University Bratislava

Faculty: Faculty of Education

Course ID:	**Course title:**
PdF.KSJL/B-SLOex018/22	World literature II

Educational activities:
Type of activities: seminar
Number of hours:
per week: **per level/semester:** 4s
Form of the course: combined

Type, volume, methods and workload of the student - additional information
Scope, type/method of teaching and organizational form: seminar, total 13 hours per semester, combined form (primarily in-person)
Student workload: 13 hours of direct instruction; 32 hours of continuous preparation for individual classes with application of specific assignments, including reading of literary texts for individual classes; 15 hours of preparation for presentation of a written final interpretation based on selected textual segments from the work of the author studied, with emphasis on application of acquired knowledge of literary direction, the particularities of the author's poetics, analytical-interpretive skills, and on defending one's arguments. A total of 60 hours of student work.
Teaching methods: lecture, inductive-generative conversation, discussion, demonstration and analysis of concrete examples, analytical and interpretative work with the text, problem-based tasks, guided self-study, e-learning

Number of credits: 2

Recommended semester: 5.

Educational level: I.

Prerequisites:

Course requirements:
Active participation in the class is required to pass the course. Assessment includes:
• continuous reading of literary texts and completion of assignments in seminars on the theoretical knowledge and practical skills needed when working with literary texts in the educational process (60 points);
• presentation of a written final interpretation based on selected textual segments from the work of the read author, with emphasis on the application of the acquired knowledge of literary direction, the particularities of the author's poetics, analytical-interpretive skills and on the defence of their arguments (40 points).
The course culminates in a grade resulting from an interim review of learning outcomes during the instructional portion of a given semester of study (100/0).
To pass the course, a minimum of 60 % of the points must be obtained (at least 60 points). A minimum of 93 points is required for a final grade of A, a minimum of 85 points is required for a grade of B, a minimum of 77 points is required for a grade of C, a minimum of 69 points is required for a grade of D and a minimum of 60 points is required for a grade of E. Credit will not be awarded to a student who scores less than 60 % on any component of the assessment (assignments: less than 36 points; final interpretation: less than 24 points).

A (100 - 93 %, excellent - outstanding results): excellent performance: the student has an excellent knowledge of selected literary movements and currents from the second half of the 19th century and from the 20th century. The student is able to apply and adapt the acquired literary knowledge at an excellent level in specific approaches to the literary text applicable to the teaching of literature in school practice, has the ability to creatively solve individual tasks and assignments independently and imaginatively, also in a broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her expression is excellent, has well-developed skills for independent further learning;
B (92 - 85 %, very good - above average standard): very good performance: the student has a very good knowledge of selected literary movements and currents from the second half of the 19th century and from the 20th century and of their specific representatives in the required scope, logically, with only slight errors, arranges the presented literary-historical facts, can apply and adapt the acquired literary-scientific knowledge very well in specific approaches to the literary text usable in the teaching of literature in school practice, has the ability to independently solve individual tasks and assignments in the broader literary, literary-historical and cultural context, the linguistic and stylistic level of his/her speech is very good, has very well-developed learning skills;
C (84 - 77 %, good - normal reliable work): good performance: the student has a good knowledge of selected literary movements and movements from the second half of the 19th century and from the 20th century. He/she arranges the presented literary-historical facts appropriately and makes mistakes only in places, he/she can reliably apply and adapt the acquired literary-scientific knowledge in specific approaches to the literary text useful in the teaching of literature in school practice, he/she solves individual tasks and assignments reliably independently, he/she has well-developed learning skills;
D (76 - 69 %, satisfactory - acceptable results): satisfactory performance: the student has a satisfactory knowledge of selected literary movements and currents from the second half of the 19th century and from the 20th century. The student is able to satisfactorily apply the acquired literary knowledge in specific approaches to literary texts applicable in the teaching of literature in school practice, satisfactorily and mostly independently solves individual tasks and assignments, has acceptably developed learning skills;
E (68 - 60 %, sufficient - the results meet the minimum criteria): sufficient performance: the student demonstrates a minimum amount of knowledge of selected literary movements and movements from the second half of the 19th century and from the 20th century. The student is able to apply the acquired literary knowledge minimally in specific approaches to literary texts useful in the teaching of literature in school practice, solves individual tasks and assignments with considerable help at a sufficient level, and has minimal learning skills;
Fx (59 - 0 %, insufficient - additional work required): insufficient performance: the student does not demonstrate sufficient knowledge of selected literary movements and movements from the second half of the 19th century and from the 20th century. The student does not know the literary historical facts and their logical connections, cannot apply the acquired literary knowledge in specific approaches to literary texts useful in the teaching of literature in school practice, cannot solve individual tasks and assignments, and has insufficient learning skills.

Learning outcomes:

The student has knowledge of selected literary trends and currents of world literature of the second half of the 19th and 20th centuries and of its representative individual realisations, is familiar with group and individual ideological and aesthetic initiatives and poetics, and is aware of their significance for the understanding of Slovak literature of the 20th century. Can creatively and independently analyse and interpret literary texts, characterise the poeological and value specifics of the work of individual authors and identify different forms of literariness. Has acquired analytical and interpretive skills applicable to professional and school analysis and interpretation of specific

literary texts, understands the specificity and artistic value of selected literary texts, and can actively seek new possibilities in approaching a literary text. The student is able to interpret a literary text in relation to other art forms. Can also work with different possible interpretations of a text in school practice. As a result of the analytical and critical approach to the literary text, the student has developed transferable competences, because especially in the analytical-interpretive part, critical thinking, thinking in context, developing communicative and digital competences are emphasised, on the basis of which the student is able to solve specific tasks, as well as to construct his/her own interpretations of literary texts. The student is able to promptly perceive interpretations of literature in the following years of his/her studies. Based on problem-solving tasks, the student has acquired the skills to actively gather information and use it to solve practical tasks in the field using appropriate and adequate procedures, as well as the skill to communicate facts, concepts and opinions and to formulate and defend arguments. The student has the competence to independently extend his/her knowledge and the ability to identify and evaluate the broader context of professional issues. They have also developed a number of transferable skills such as analytical thinking, creativity and the ability to think abstractly and critically, reasoning in context, and metacognitive skills. He is not only prepared to deepen and develop the acquired knowledge, skills and competences in further bachelor's and then master's studies, but also to use them and creatively apply them in the school environment in the position of a teaching assistant, or for the needs of the publishing environment in the position of a text proofreader. The student is also able to convey information about literary-theoretical phenomena to the general public and to offer conclusions and literary-analytical justifications to lay audiences.

Class syllabus:

1. Literary modernism. Poetic modernism. Symbolism, impressionism, decadence. Subjectivisation, psychologisation, decomposition of normative poetics.
2. Modernist prose. Studies of the inner life. Suppression of the plot. The isolation and loneliness of man. The stream-of-consciousness technique.
3. Modernist drama. Parody and the verbal grotesque. Symbolism, decadence, failure of communication.
4. Naturalism. The biological and social determination of man. Taboo themes. Synesthetic descriptions.
5. Poeticism. Joyful and creative art and life. (Visual) associativity. Unusual characters and settings. Eroticism. Poetic imagery.
