COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex031/22	Course title: Bachelor thesis seminar
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 3	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 40 points on the basis of completed tasks assigned at seminars, which will be continuously solved and evaluated. As part of the exercises, based on the completion of the tasks, the student has the opportunity to obtain max. 30 points. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject is concluded at the end of the semester with a practical output - the processing of the plan and schedule of the bachelor's thesis and the processing of the introductory pages of the bachelor's thesis (min. abstract, content structure, introduction) - as part of the final evaluation based on the acquired knowledge for the whole semester - from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. The rating is given on a scale: And (100-91%, excellent - excellent results) B (90-81%, very good – above average standard), C (80-73%, good - regular reliable work), D (72-66%, satisfactory - acceptable results), E (65-60%, sufficient – the results meet the minimum criteria),	

Fx (59-0%, insufficient - more additional work required)

Learning outcomes:

After completing the subject, the student should be familiar with the basic requirements for creating a bachelor's thesis. Subsequently, the basic methodological framework for the creation of a bachelor's thesis should be clarified with the use of methods in the processing of professional literature. At the same time, students will be familiar with the formal and technical requirements of a bachelor's thesis. Students will get the necessary information to prepare the defense of the final thesis. The student has cross-sectional knowledge about the specifications of writing a professional text for its application use at a level corresponding to the current state of knowledge, he knows how to actively acquire information and use it to solve practical tasks in the field, and he knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Specification of professional text. Professional and scientific written style. Selection and definition of the topic of the professional text. Formal criteria of a bachelor's thesis. Content structure of the bachelor thesis. Work with literature. Plagiarism and compilation. Presentation of bachelor thesis.

STATE EXAM DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCšt037/15	Course title: Bachelor's thesis defence
Number of credits: 12	
Educational level: I.	
Recommended prerequisites: The conditions for registering for the state exam are defined by Art. 27 of the Study Regulations of the Pedagogical Faculty of the Comenius University in Bratislava	
Course requirements: Course requirements: Pursuant to §51, paragraph 3 of Act No. 131/2002, as amended, a final thesis is part of the study according to each study program, which together with its defense forms one subject; the defense of the final thesis is one of the state exams. The basic requirements of final theses are also regulated by the Rector's Internal Regulation. The directive regulates the formal requirements of the bachelor's thesis, its structure, the method of citation, submission and the license agreement. In accordance with the rector's directive V Article 56 VP 23/2021 and the Final thesis must be original, created by the author as a result of his creative activity while observing the rules of working with information sources. The final thesis must not have the character of plagiarism, it must not violate the copyrights of other authors. The author is obliged to consistently cite the information sources used, to mention by name and specific research results of other authors or author collectives by citing the relevant source, to accurately describe the used methods and work procedures of other authors or author collectives, to document laboratory results and field research of other authors or author collectives. The author may not repeatedly submit the same or slightly modified work that he has already defended once as a final thesis, a rigorous thesis or a habilitation thesis. (8) As a rule, the originality of the submitted work is verified by at least two independent anti-plagiarism systems, while the supervisor of the final work, the trainer and the consultant of the rigorous work comment on the result of the originality check as part of the relevant assessment, regardless of the match value that was achieved by the originality check. The rector shall determine by directive the list of permissible anti-plagiarism systems, the use of which is mandatory for verification of originality; this does not exclude the use of other anti-plagiarism systems.	
Learning outcomes: Learning outcomes: By writing a thesis and defending it, the student demonstrates knowledge of the basics of theory and practice of social work at the level of public and non-public sector organizations, his readiness to perform social and legal protection, counseling, diagnosis and forecasting and other forms of social assistance. A bachelor's degree graduate can analyze problems and propose forms and methods of social work, leading to an increase in the client's quality of life. He has basic relevant knowledge in the fields of law, economics, psychology, sociology, demography and others. He has knowledge of the social policy of the state and its development trends, he can coordinate his work with other experts and effectively create a network of assistance to individual and group clients. The result of the defense of the final thesis is evaluated according to the study regulations of the University of Warsaw, with classification grades A to FX.	

Class syllabus:

According to the Rector's Guidelines, the student must demonstrate the ability to work creatively in the field of study, adequate knowledge of the subject and apply his skills in collecting, interpreting and processing basic professional literature. It can also compile, make a synthetic review of the literature, or apply it in practice or solve partial tasks related to the student's future professional focus. The condition for admission to the defense is the student's written consent to the publication and making available of the school work. The examination committee for conducting state examinations as part of the defense evaluates the content and formal level of the school work and its originality. The defense of the final bachelor's thesis is a verification of the ability to solve social problems and other tasks of social work. The student presents the structure, content and results of his final thesis in front of the committee, the consultation and opposition opinions are read and the student answers their comments and questions. In relation to the presented topic, the members of the committee lead a professional discussion with the defending student, in which the student has to demonstrate the ability to respond professionally to the additional questions of the members of the committee

State exam syllabus:**Recommended literature:**

Domestic and foreign professional literature in terms of the assigned topic of the bachelor's final thesis.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex015/22	Course title: Basics of demography
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block , face-to-face, distance learning, combined. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Practical methods (simulation of the method), 5. Guided self-study (work with the text , content analysis)	
Number of credits: 3	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an exam. During the semester, there will be written examinations in which the knowledge gained from lectures and seminars is continuously checked. The maximum assessment from the ongoing inspections is 40 points. The subject is completed by a written exam on the acquired knowledge for the entire semester, from which students have the opportunity to obtain a maximum of 60 points. At least 30 points must be obtained in the final exam. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates all basic concepts and principles of demography and knows how to apply them in practice; B-excellent performance, the student understands the basic range of demographic phenomena, but critical thinking is borderline; C-good performance, the student has learned to orient himself in the basic principles of demography , but is unable to apply them in practice, D- sufficient performance, the student has learned only the basic core of the course content, is unable to apply them in practice, E -sufficient, the student has learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: The study provides basic information about the process of human reproduction, data, factors, methods and measures associated with this process. After completing the course, students master basic demographic concepts and indicators, orient themselves in demographic databases, are able to process a simple characteristic of the demographic development of the chosen territorial unit, can describe the effects of demographic development on various areas of society, focusing mainly on mutual interactions between population and socio-economic development . Great emphasis is	

placed on conveying demographic knowledge that can be directly used in the practical work of a social worker.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

General terms and definitions. Sources of demographic data. The number, growth, structure and distribution of the population. Demographic processes. Birth rate, death rate, marriage rate, divorce rate. Households and families. Theoretical basis of current population development. Current population development of the world. Current population development in Slovakia. Demographic forecasts. Population policies and measures.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex034/22	Course title: Basics of statistics
Educational activities: Type of activities: practicals + seminar Number of hours: per week: per level/semester: 8s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: theoretical foundations of the concepts covered, practical demonstration of the use of software tools; individual work on examples, use of available software for learned statistical terms	
Number of credits: 4	
Recommended semester: 5.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 50 points based on completed tasks assigned at seminars, which will be continuously solved and evaluated. To participate in the final evaluation at the end of the semester, it is necessary to obtain at least 30 points from the interim evaluation. The subject is completed at the end of the semester with a written exam on the acquired knowledge for the entire semester, from which students have the opportunity to obtain max. 25 points and a term paper, from which students have the opportunity to obtain max. 25 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points.	
Learning outcomes: After completing the subject, the student should be able to understand basic mathematical and statistical concepts, laws and principles. He should be able to use the Excel program to collect and prepare survey or research data. Furthermore, he should be able to make descriptive statistics of data and their appropriate presentation in the form of tables and graphs. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical	

behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Basics of statistics - basic statistical terms, statistical file, statistical units, types of variables, measurement scales, data collection, data coding. Univariate descriptive statistics – frequency tables and graphs, descriptive characteristics – measures of central tendency, measures of variability, measures of shape. Two-dimensional descriptive statistics - descriptive tables, contingency tables, graphic display, XY graph, regression line, linear regression, correlation analysis, coefficient of determination. Multivariate descriptive statistics - multiway tables and graphs, partial correlations.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex049/22	Course title: Case study seminar
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 3.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 70 points on the basis of completed tasks assigned at seminars, which will be continuously solved and evaluated. The course is completed by a written work from which students have the opportunity to obtain max. 30 points. The course is completed by a written work from which students have the opportunity to obtain max. 60 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates the possibilities of various procedures for building and solving a research project and knows how to apply them in practice; B-excellent performance, the student masters the basic principles of creation and solution, but critical thinking is borderline; C-good performance, although the student has learned to work with the basic procedures of solving projects, but does not know how to apply them in practice, D- sufficient performance, the student has only learned the basic principles of project preparation and solution, but does not know how to apply them in practice, E -sufficient, student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education:	

After completing the subject, the student should acquire a basic overview of the types and use of case studies, methods and their structure. This knowledge is necessary for the student to be able to search, analyze and work with various information sources, especially when processing records related to the recipient of services in writing, as well as during research tasks and publishing serious problems and their solutions in social work. . The student can creatively solve theoretical and practical tasks in the field using theory and research and development procedures and can solve problems, coordinate procedures in teams and make independent and responsible decisions in a changing environment. Knows and understands the theories, methods and procedures that are used in the field, with possible application in science and research, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. The student can solve problems, coordinate procedures in teams and make independent and responsible decisions in a changing environment, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. Has deep and cross-sectional knowledge in a specialized area, including knowledge of contexts and relationships with related disciplines. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will emphasize responsibility, transparency, ethical behavior, respect for the interests of stakeholders , compliance with the law, as well as the protection and observance of human rights.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex030/22	Course title: Community development and work
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 3	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an exam. During the semester, the student will prepare a written work for 20 points and will have the opportunity to receive 20 points for work at the seminar. To participate in the final exam, it is necessary to obtain at least 20 points out of a possible 40 intermediate ones. The subject is completed by a knowledge test from the entire semester's curriculum, where a maximum of 60 points can be obtained. The minimum number of points from the final exam to pass the subject is 30. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. . A- excellent performance, the student controls and critically evaluates various aspects of community social work and analysis and knows how to apply them in practice; B- excellent performance, the student has mastered the basic aspects of community development and community social work, but critical thinking is borderline; C- good performance, although the student has learned to navigate the basics of community work, but is unable to apply them in practice, D- sufficient performance, the student has learned only the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student has learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education:	

The graduate of the course understands the concept of community development, knows the theoretical basis of community work, understands the concepts of civil society, power, empowerment and participation in public decision-making. He knows the models of community work. Understands the roles and goals of community workers in individual phases of the community work process. The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Examples of community work in Slovakia and elsewhere in the world. Theoretical foundations of community work, concepts of civil society, power, empowerment , participation in public decision-making. Models and methods of community work. The process of community work in neighborhoods. Goals and tasks of community workers in individual phases of the community work process. Values of community work.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex066/22	Course title: Developmental biology
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of developmental biology and knows how to apply them in practice; B-excellent performance, student understands basic aspects of developmental biology, but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of developmental biology, but is unable to apply them in practice, D- sufficient performance, the student has learned only the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student has learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: After completing the course, students should have knowledge of the biological laws of growth and development processes and the factors that determine them. They will acquire knowledge about the integrated bio - psycho - social essence of the human organism. They will understand the temporal-spatial succession and interdependence of changes in the structure and function of the human organism. They become familiar with critical developmental periods and risk factors that disrupt physiological growth and development. They will understand the principles of regulation and adaptation of the organism in the context of environmental influences . Through the course, students will gain the ability to evaluate the adequacy of the demands of the educational process	

on the child's physical and mental performance in relation to the level of his biological graduation . The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights

Class syllabus:

1. definig ontogenesis. Progressive and regressive changes with age. Biological explanation of the concepts of growth and development. Laws of growth and development. Typical and atypical growth and development.
2. Factors determining growth and development: genetic, neurohormonal , environmental factors. Genetic factors: heredity, mutations - gene, chromosome aberrations. Mutagens a teratogens . Mutations. Chromosome aberrations. Prevention of genetic disorders.
3. Neurohormonal regulation. The influence of the mother's hormones on the embryo and fetus. Meaning of nervous and hormonal regulation as a mechanism of biological adaptation.
4. Environmental factors. Definition of environment, external, internal environment. Determination of growth and development processes by environmental factors. Nutrition. Maternal factors. Climatic and geographical factors. Socio-economic level. Morbidity.
5. Ontogenetic development. Division of ontogeny: conventional and biological delineation individual periods. Prenatal, perinatal , postnatal period.
6. Prenatal period – formation and development of the embryo (pregnancy), importance of the placenta, lifestyle of a pregnant woman. Environmental risk factors endangering prenatal development.
7. Perinatal period. Childbirth, high-risk newborn.
8. Postnatal period - characteristics of the newborn, infant , toddler , preschool period from the aspect of somatic changes (growth, motor development) and the risks of developmental disturbances.
9. Methods of assessing physical growth and development, determining biological maturity.
10. Brief overview of the anatomy and physiology of organ systems: support-movement, cardiovascular, body fluids, respiratory, digestive, excretory, sexual, hormonal, nervous
11. Age characteristics of individual systems.
12. Pathologically altered growth and development
13. Prevention of disorders of somatic development - primary, secondary, tertiary

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex050/22	Course title: Domestic violence
Educational activities: Type of activities: practicals + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 5.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex010/22 - Social work history and basics II	
Recommended prerequisites: Social work with the family	
Course requirements: Completion of the course ends with an assessment. During the semester/study block, the student will participate in 6 activities, each of which is evaluated with 10 points, and in the final group colloquium, which is evaluated with 10 points. The course ends with a final assessment - test, for which the student can get max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of domestic violence and knows how to apply them in practice; B-excellent performance, student understands basic aspects of family violence, but critical thinking is borderline; C-good performance, although the student learned to orientate himself in the basics of violence, but he does not know how to apply them in practice, D- sufficient performance, the student learned only the basic core of the course content, he cannot apply them in practice, E -sufficient, the student learned to orientate himself in the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Knowledge of gender aspects of domestic violence and feminist theories of violence against women. Knowledge of victimological and psychological aspects of domestic violence. Knowledge of the socio-legal aspects of violence committed in close relationships and the authorities' competences	

to act to protect and help persons at risk of violence. Knowledge about CAN syndrome. Basic competences and abilities for the performance of appropriate forms of social assistance to persons who are subjected to violence. Skills for establishing and organizing social services in this field of social work. The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.																				
Class syllabus: Cultural and social aspects of violence committed in close relationships. Feminist theories of violence against women. Dynamics of violence and scale of violence in close relationships. Definition of persons: violent person and endangered person. Children with CAN syndrome and their identification. Ex-partner stalking . Criminal, civil and administrative framework of domestic violence. Criminal acts in the field of domestic violence and criminal-procedural forms of victim protection. Responsibility of individual state bodies and institutions (health facilities, ÚPSVaR, SPOaSK department , CPPSaSP , crisis intervention facilities, other facilities and NGOs). Methods and techniques of social work with adult and child victims of domestic violence.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex045/22	Course title: Employment services
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex007/22 - Basics of economy	
Course requirements: Completion of the course ends with an assessment. In the course of the semester, the student has the opportunity to obtain 70 points on the basis of completed tasks assigned at the seminars, which will be continuously solved and on the basis of the student's active participation directly in the seminars. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject is concluded with the defense of the seminar work, which will be focused on selected active measures of the labor market for various risk groups on the labor market - in an integrative framework/meaning in the context of their use/implementation for all actors on the labor market and in employment services. The seminar work and subsequently its defense as part of the final evaluation is based on the acquired knowledge for the entire semester, from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of employment services and knows how to apply them in practice; B-excellent performance, student understands basic aspects of employment services, but critical thinking is borderline; C-good performance, although the student learned to navigate the basics of employment services, but does not know how to apply them in practice, D- sufficient performance, the student learned only the basic core of the course content, but does not know how	

to apply them in practice, E -sufficient, the student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice

Learning outcomes:

Learning outcomes:

Goals and outcomes of education:

After completing the subject, the student should be able to understand the issues of employment policy and the labor market in the Slovak Republic - its goals, functions, tools and the impact of economic policy on employment. He should know the causes of unemployment, history and understand the basic theoretical foundations of unemployment from the point of view of the main theoretical schools. Other areas of knowledge for the graduate of the course should be not only the consequences of unemployment, but also knowledge of the possibilities and limits of solving unemployment in the conditions of the Slovak Republic and the EU. He should know the basic principles of employment services and understand them not only from the point of view of the employed and unemployed, but also from the point of view of employers. At the same time, he should be able to define and know the place and role of a social worker and identify the basic intentions of the possibilities and limits of social work in employment services. The student can creatively solve theoretical and practical tasks in the field using theory and research and development procedures and can solve problems, coordinate procedures in teams and make independent and responsible decisions in a changing environment. Knows and understands the theories, methods and procedures that are used in the field, with possible application in science and research, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. The student can solve problems, coordinate procedures in teams and make independent and responsible decisions in a changing environment, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. Has deep and cross-sectional knowledge in a specialized area, including knowledge of contexts and relationships with related disciplines.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Employment and labor market policy (goals, functions, tools, history). EU employment policy. Projects and programs within the EU and Slovak Republic in the field of employment policy application. Employment services in the Slovak Republic. Unemployment - its definition, measurement, forms, types and consequences. Position of risk groups on the labor market. The role and profile of a social worker in employment services. Personnel agencies and their place and importance in the labor market. Position and role of employers in the labor market. Introduction to social work with the unemployed and employers.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex012/22	Course title: Ethics in social work
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 4	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. The student will be evaluated during the semester by oral reflection of the studied recommended supplementary literature during seminars on the subject (max. 40 points) and ends with the defense of the semester thesis with a total maximum value of 60 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of ethics in social work and analysis and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of social work ethics, but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of social work ethics, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student he learned to navigate the content of the course, but he did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education: After completing the course, the student gains an overview of the issue of ethics in social work. Through theoretical concepts, he gets to the topics of bioethics and professional ethics. Last but not least, students' attention is focused on the topic of values and standards in social work. The theme	

is also the observance of the code of ethics as well as learning to respect the diversity of viewpoints from an ethical point of view and the acceptance of other attitudes, thereby contributing to grasping the principles of working with clients in social work. With these results, it is ensured that the student can master the topics of ethical foundations of social work, which belong to the supporting topics of the core knowledge of the social work field of study. . The student has cross-sectional knowledge of ethics with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

The validity of ethics in social work. Man and his being, foundations of ethics. Basic terms related to ethics (morality, conscience, freedom, guilt, value, etc.). Overview of the development of ethics (moral philosophy) and important ethical theories (concepts of ethics). Bioethics and environmental ethics. Man and his relationship to himself and to life. Principles, values and standards in social work. Professional ethics - its understanding in social work. Codes of ethics of social work/social workers. Ethical problems and ethical dilemmas in social work. Diverse expectations of society from social workers.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex009/22	Course title: Excursion seminar
Educational activities: Type of activities: seminar / excursion Number of hours: per week: per level/semester: 2s / 2s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 2 hours in a block in the form of a seminar, face-to-face Student workload: 6 hours of seminars per semester. Preparation for the presentation of the seminar work 20 hours. A total of 26 hours. Education methods: 1. Monological (lectures, briefing), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Guided self-study (work with text, content analysis, presentation preparation).	
Number of credits: 2	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. Ongoing assessment – 60 points (active participation in practice in a specific practice facility and fulfillment of practice goals) Final evaluation – 40 points (participation and presentation of the final internship report and defense, completion of the internship with evaluation by the internship supervisor) Maximum number of points – 100. At least 91 points must be obtained to obtain an A rating, at least 81 points must be obtained to obtain a B rating, at least 73 points must be obtained to obtain a C rating, at least 66 points must be obtained to obtain a D rating. at least 60 points must be obtained to obtain an E rating. A-excellent performance, the student participated in excursions in selected institutions providing social services and actively participated in the discussion. The content of the seminar work fulfilled the assignment. Presentation at a high level. B-excellent performance, the student participated in excursions in selected institutions providing social services and actively participated in discussions. The content of the seminar work fulfilled the assignment. Presentation at an average level. C-good performance, the student participated in excursions in selected institutions providing social services and at least participated in discussions. The content of the seminar work fulfilled the assignment. Presentation at an average level. D- sufficient performance, the student participated in excursions in selected institutions providing social services. He did not engage in discussions. The content of the seminar work fulfilled the assignment. Presentation at an average level.	

E - sufficient, the student participated in excursions in selected institutions providing social services. He did not engage in discussions. The content of the seminar work deviates from the assignment. Low level presentation.

Learning outcomes:

During the excursion, students visit selected social facilities providing social assistance and care. During the excursion, the students should get information not only about the organizational and personnel structure of the facility, but especially about the work methods and the assistance provided. They go on an excursion in individual social facilities, where they can meet the client, or clients. After completing the excursion, students reflect on their experience at the final evaluation seminar.

Class syllabus:

After completing the subject, the student should be familiar with the basic types of facilities providing social assistance, with their structure, methods and forms of work, with special attention to the work of a social worker. Then reflect on your experiences from the excursion in the final evaluation.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex043/22	Course title: Family social work
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 3	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex002/22 - Social work history and basics I	
Recommended prerequisites: History and foundations of social work I	
Course requirements: The subject ends with an exam. During the semester, students work under the guidance of a teacher and partially present their results for the first time at the end of the semester by submitting part of a case study of a dysfunctional family. This part is evaluated with a maximum of 40 points. In order to advance to the final assessment, the student must achieve a minimum of 22 points in this part. In the exam period, students solve procedural and methodological tasks in a case study assigned by the teacher, according to the teacher's assignment. A student can get a maximum of 60 points for this part. At least 91 points are required to obtain an A rating, at least 81 points to obtain a B rating, at least 73 points for a C rating, at least 66 points for a D rating, and at least 60 points for an E rating. A-excellent performance, the student controls and critically evaluates various aspects of social work with the family and knows how to apply them in practice; B-excellent performance, student masters basic aspects of social work with family, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of social work with the family, but cannot apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, cannot apply them in practice, E -sufficient, student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Students will get information about the perception of the family from the perspective of various scientific disciplines, they will get into the historical context of the development of legislation	

related to the family: students should get an overview of the criteria of family functionality, theoretical models of family functioning, which they can use in practice in the field of family case management. The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.
Class syllabus: Definitions of family in the context of different scientific disciplines. Historical development of the family in the context of the development of legislation in Slovakia. Theoretical models of family functioning, approaches in family therapy. Family functions, their disorders, dysfunctions. Individualizing and systemic approaches in social work with the family. Forms of work with family, their advantages and disadvantages. Social worker, his role, professional competences. Programs of social work with the family in various social events such as divorce, domestic violence, poverty, illness or addiction of a member. The process of working with family, networking

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex019/22	Course title: Forms and methods of social work
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 4	
Recommended semester: 3.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for completing the course: Completion of the course ends with an exam. The student will be evaluated in the form of interim and final evaluation. Continuous assessment takes place during the semester in the form of one control test with a value of max. 20 points and in the form of evaluated discussions in seminars on selected topics in the field of forms and methods of social work, for which the student can receive max. 20 points. To participate in the final assessment, it is necessary to obtain at least 26 points from the interim assessment. The final evaluation takes place orally or in writing. The oral assessment takes place in groups, the student must demonstrate readiness to discuss topics related to the course content. Students are evaluated according to the frequency of entries, but also the adequacy of the answer, for which the student can receive a maximum of 60 points. The written test consists of 8 questions with a maximum score of 60 points. In the oral or written exam, students must obtain min. 36 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of forms and methods social work and analysis and can apply them in practice; B-excellent performance, the student masters the basic aspects of forms and methods social work , but critical thinking is borderline; C-good performance, although the student learned to navigate the basics of forms and methods social work , but does not know how to apply them in practice, D- sufficient performance, the student learned only the basic core of the	

course content, does not know how to apply them in practice, E - sufficient, the student learned to navigate the course content, but did not learn to actively work with it and apply it in practice.

Learning outcomes:

Learning outcomes:

Goals and outcomes of education:

After completing the subject, the student should know the differences between the terms: theory, concept, model, approach, method and form in general and with application to social work so that students get an overall overview of the repertoire of forms and methods of social work and are able to use them adequately when working with used by clients.

The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will emphasize responsibility, transparency, ethical behavior, respect for the interests of stakeholders , compliance with the law, as well as the protection and observance of human rights.

Class syllabus:

Definition of basic terms (method, methodology, methodology, form, approach, theory, etc.) used in social work and their introduction into the context of the theoretical equipment of the scientific discipline of social work. Historical excursion into forms and methods of social work. Classifications and classifications of forms and methods of social work. Socio-political and legislative framework of methods and forms of social work. Advantages and disadvantages of individual forms and methods of work. Selected methods and their use in social work. Overview of methods of working with the individual, family, group, community and institution.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex067/22	Course title: General educational theory
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: The subject will be concluded with an assessment, with the ratio of interim/final assessment being 100/0. The condition for successful completion of the subject is obtaining at least 60% of the maximum possible assessment. The condition for completing the subject is the successful completion of a written test. The classification will be carried out according to the scale: A: 100 – 91 points, B: 90 – 81 points, C: 80 – 73 points, D: 72 – 66 points, E: 65 – 60 points, FX: 59 – 0 points. A-excellent performance, the student controls and critically evaluates various aspects of general pedagogy and knows how to apply them in practice; B-excellent performance, student masters basic aspects of pedagogy, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of pedagogy, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student has learned to navigate in the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Graduates of the subject will have basic knowledge of general pedagogy and will be able to use it creatively in their future study and work activities. The connection between theoretical and practical training will be realized by conducting guided discussions by students and their subsequent analyses. The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new	

knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results						
Class syllabus: Concept and subject of pedagogy; basic pedagogical terms, the system and characteristics of pedagogical disciplines, the relationship of pedagogy to other sciences, factors of the development of the human individual, basic factors of education, the process of education, the basics of scientific research in pedagogy.

Prerequisites: PdF.KSP/B-SOCex010/22 - Social work history and basics II	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 40 points on the basis of completed tasks assigned at seminars, which will be continuously solved and evaluated. As part of the exercises, based on the completion of tasks and exercises, the student has the opportunity to obtain max. 30 points. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject is concluded at the end of the semester with a practical output - simulated situations from the field of information resources and electronic databases - as part of the final evaluation based on the knowledge acquired for the entire semester - from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of information sources and knows how to apply them in practice; B-excellent performance, the student controls the basic elements of information sources, but critical thinking is borderline; C-good performance, the student has learned to orient himself in the given issue, but does not know how to apply them in practice, D- sufficient performance, the student has learned only the basic core of the course content, he is unable to apply them in practice, E -sufficient, the student has learned to orient himself in the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes:	

After completing the course, students should be familiar with information about the basic types of information sources, how to search for them and use them when writing professional papers in the social field. Students should be aware of the services of libraries, information centers that make information resources available. Students should acquire the skill of where and how to search in electronic information databases, familiarize them with citation and bibliographic standards. The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results

Class syllabus:

Characteristics of information sources. Types of information resources - printed, electronic. Internet databases of information resources. Bibliographic-library services of libraries. Citations. Creating a bibliographic link. Principles of working with literature when preparing a thesis. Formal preparation of works. Preparation and creation of a presentation. (p.p.s.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex054/22	Course title: Interventions in divorce process
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 4.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex010/22 - Social work history and basics II	
Course requirements: Completion of the course ends with an assessment. During the semester/study block, the student will participate in 6 activities, each of which is evaluated with 10 points, and in the final group colloquium, which is evaluated with 10 points. The course ends with a final assessment - a test, for which the student can get max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of divorce process interventions and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of interventions in the divorce process, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of the subject matter , but does not know how to apply them in practice, D- sufficient performance, the student has learned only the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student has learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice	
Learning outcomes: Learning outcomes: Goals and outcomes of education: Knowledge about the risks of the divorce process for the healthy psychological and social development of the members of the divorced family. Knowledge of social interventions that ensure the protection of the child's interests and reduce the risks of the negative impact of divorce.	

Knowledge of interventions for parents that support their adaptive behavior during divorce and develop competencies for continued parenting. Knowledge of the system of social legal protection of the child in the process of divorce and competences for the performance of various forms of social work, which are applied in the process of divorce to protect the best interests of the child. . The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Divorce process as a process of significant changes in the family. Divorce paradigms (socio-pathological, therapeutic and transformational) and their application in social work with families in divorce. Divorce Coping, Risks and Divorce Roles for Parents and Children. Interventions in the divorce process for children and parents: social protection, social support, social and psychological counseling, specialized social counseling, mediation, therapy, educational programs for parents and children.

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex001/22	Course title: Introduction to social work study
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 6 hours in a block, face-to-face distance and combined method 6 hours per semester and subject consultations, 10 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Directed self-study (work with text, content analysis).	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the subject ends with an evaluation and presentation of assigned tasks. After completing block teaching, students will be given concepts related to social work. Their task is to search for the given terms in professional literature and define them. Work with a professional text is essential. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student used foreign resources to define the assigned concepts. The resources are professional and up-to-date. Individual terms are defined by several authors; B-excellent performance, the student uses mostly Slovak and Czech resources that are professional and up-to-date. Associated terms are defined by several authors; C-good performance, the student mainly uses Slovak and Czech resources that are professional but older than five years. Associated terms are defined by several authors; D- sufficient performance, the student mainly uses Slovak and Czech resources that are professional but older than five years. Associated terms are defined by one author; E – sufficient, the student uses Slovak and Czech resources that are professional and older than ten years. Associated terms are defined by one author.	
Learning outcomes: Learning outcomes: Goals and outcomes of education:	

After completing the subject, the student should be able to understand the mission of social work, tasks in both its theoretical and practical aspects. On a theoretical level, he should understand texts presenting social work in its basic features. Also get to know the importance of reference sciences for social work. On a practical level, the student should understand the practical performance of social work in various areas of its operation. Last but not least, understand the field of study social work and the connections between the three pillars of the study (theory, professional practice and training in social skills). Based on the student's visit to the chosen social organization and its subsequent defense, he should be familiar with the performance of social work in practice and in confrontation with other students - able to recognize the fields of social work.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Social work as a profession and as a scientific field. Social work as a field of education. The importance of theoretical and practical education of social workers. The importance of reference sciences for social work. Visiting social organizations - familiarization with the performance of social work in practice.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex028/22	Course title: Introduction to social work study
Educational activities: Type of activities: lecture Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, in the form of face-to-face, distance learning, combined lectures. Student workload: 5 hours in a block per semester . Written reflection from professional literature 50 hours, exam preparation 50. Total 106 hours. Education methods: 1. Monological (lectures, briefing). 2. Dialogic (conversation, discussion, colloquium, brainstorming). 3. Guided self-study (work with text, content analysis, presentation preparation).	
Number of credits: 4	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for passing the subject: Completion of the course ends with an exam. The subject is completed by a written reflection of the studied recommended supplementary literature (max. 40 points) no later than the last week of continuous teaching during the semester, supplemented by an oral exam from acquired knowledge for the entire semester during the exam period (max. 60 points). At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student masters and differentiates all the basic theories of social work. It has an overview of social work as a scientific field and its place among other scientific fields. In the written reflection, the student demonstrated knowledge of working with professional text and critical thinking. B-excellent performance, the student masters and differentiates all basic theories of social work. He has an overview of social work as a scientific field. He does not have a sufficient idea of the place of social work among other scientific fields. In the written reflection, the student demonstrated knowledge of working with professional text and critical thinking. C-good performance, the student masters and differentiates all basic theories of social work. He does not have an overview of social work as a scientific field. He does not have a sufficient idea of the place of social work among other scientific fields. In the written reflection, the student demonstrated knowledge of working with professional text and critical thinking.	

D- sufficient performance, the student controls and differentiates all basic theories of social work. He does not have an overview of social work as a scientific field. He does not have a sufficient idea of the place of social work among other scientific fields. In the written reflection, the student did not demonstrate knowledge of working with professional text and critical thinking. E - enough, the student controls, but does not distinguish, all the basic theories of social work. He does not have an overview of social work as a scientific field. He does not have a sufficient idea of the place of social work among other scientific fields. In the written reflection, the student did not demonstrate knowledge of working with professional text and critical thinking.
Learning outcomes: Learning outcomes: Goals and outcomes of education: After completing the subject, the student gains an overview of social work as a scientific field and its place among other scientific fields. At the same time, it is intended to help listeners understand science in social work, the place of theory and methods in science, and last but not least, to introduce theories that have a relevant place in social work. These results ensure that the student subsequently has knowledge of the theories and concepts of social work and their application to social problems, as expected of a graduate of the first level of higher education. At the same time, the expected learning outcomes: the subject belongs to the supporting topics of the core of knowledge of the field of study, social work. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.
Class syllabus: Science, classification of sciences. Theory; theoretical models of social work. Paradigms and dilemmas of social work. Division of theories (review of theories) of social work. Development of theoretical thinking in social work. Diagnostic School; psychodynamic theories; psychosocial approach; functional approach. Humanistic and existential theories; social psychological and communication theories, cognitive-behavioral theories. Task-oriented approach; reality therapy; radical theories and critical theories of social work. Systemic-ecological theories. Systematic theory; Pathology of help.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex006/22	Course title: Law I
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 8s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 8 hours in a block, face-to-face distance and combined method 8 hours per semester and subject consultations, 8 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Directed self-study (work with text, content analysis).	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: The student will get an orientation in the theoretical foundations of the legal system in general. He masters the issue of the foundations of law at the societal and social levels and is oriented in individual branches of public and private law. He has the ability to master administrative law, considered one of the basic branches of public law, methods and activities of public administration, and acquires the ability to interpret individual provisions of the Administrative Code in the context of application procedures. The student has cross-sectional knowledge of the field of law with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.	
Learning outcomes: Types of legal cultures. Legal system. Creation of law and its implementation. Basic branches of law. State and law. Human and civil rights. Concept, subject, system and norms of administrative law. Administrative legal relations in administrative law. Division of public administration. Methods and forms of public administration activity. Responsibility relations in	

public administration. Control in public administration. Branches of public administration. Scope of the Administrative Procedure. Subjects of administrative proceedings. Course of administrative proceedings. Review of decisions by regular and extraordinary remedies. Execution of decisions.

Class syllabus:

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex020/22	Course title: Law II
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 8s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 3	
Recommended semester: 3.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex006/22 - Law I	
Course requirements: Completion of the course ends with an exam. During the semester, the student prepares 4 written papers of 10 points each. Points for written work during the semester will not be awarded if the student gets less than 5 points for written work. The course ends with a final written exam, for which the student can get a maximum of 60 points. In order to obtain a subject evaluation, the following criteria must be met: for an A evaluation, at least 91 points must be obtained, for B at least 81 points, for C at least 73 points, for D at least 66 points, and for an E evaluation at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of legal disciplines and analysis and knows how to apply them in practice; B-excellent performance, the student masters the basic aspects of law with application in the social field, but critical thinking is borderline; C-good performance, although the student learned to orientate himself in the basics of law, but he does not know how to apply them in practice, D- sufficient performance, the student learned only the basic core of the course content, he does not know how to apply them in practice, E -sufficient, the student learned to orient himself in the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: To get an orientation in the issue of family law in the context of theoretical starting points. To control legal institutes of a national nature and an international nature in the context of the law of the European Union. The ability to identify relevant factors affecting the functionality and stability of the family, influences causing disturbances in family coexistence and possibilities of applying the provisions of the Family Act and related legislation in the field of family law relations. Master	

procedural procedures related to proceedings in court, as well as the requirements of administrative proceedings in family law relations.

Identify basic social rights, control their application in social security law when implementing individual social security legal relationships. To orient oneself in the law of social security in the historical context to the present. Know how to correctly interpret and apply the legal norms of subsystems of social security law in practice. Master the legal regulations of individual subsystems of social security law and have the ability to apply them to specific social security legal relationships. The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will emphasize responsibility, transparency, ethical behavior, respect for the interests of stakeholders , compliance with the law, as well as the protection and observance of human rights

Class syllabus:

Theoretical definition of family law. The family and its functions. Sources and system of family law. Marriage. Relationships between parents and children. Educational measures. Substitute care. Guardianship, guardianship, property guardian, conflict guardian. Types of maintenance relationships, scope and conditions of their fulfillment. Determination of parentage and its denial. Adoption.

Constitutional social rights. Concept, subject and system of social security law, its personal and substantive scope. Types of social security legal relations. Benefits and services of social security law. Subsystems of social security law: social insurance, state social support, social assistance (assistance in material need, social services, cash contributions to compensate for severe disability). Proceedings in the listed subsystems of social security law. Institutional security in the matter of social security legal relations

Directed self-study (work with text, content analysis).	
Number of credits: 4	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for completing the course: Completion of the course ends with an exam. During the semester, there will be one written examination for a maximum of 20 points and graded discussions in seminars on selected topics. The course is completed by an oral exam on the acquired knowledge for the entire semester, from which students have the opportunity to obtain max. 60 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of the methodology of science and analysis and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of science methodology, but critical thinking is borderline; C-good performance, although the student learned to orientate himself in the basics of the methodology, but he does not know how to apply them in practice, D- sufficient performance, the student learned only the basic core of the course content, he does not know how to apply them in practice, E -sufficient, the student learned to orient himself in the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: After completing the subject, the student should acquire basic theoretical knowledge in the field of science methodology and logic. This knowledge is important for the subsequent ability to analyze problems and possibilities that open up in various areas of the social sphere. The student has cross-	

sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Science, its main purposes and its importance for practice. Pre-scientific and scientific theories. Paradigms of rationality and their logical reflections. The method of science and the laws of science. Methodological issues of forecasting and modeling. Scientific laws and their main purposes. Determinism in science. Social cognition and the problem of interpretation; logical and historical aspect. The relationship between the methodology of science and logic (key concepts from logic: logical implication, logical forms of reasoning, symbolic expression, axioms, constants and variables, etc.). Logical types of statements (statements of negation, conjunction, disjunction, implication, tautology, equivalence, etc.). Propositional and predication logic. Main principles of logic (principle of identity, principle of contradiction, principle of exclusion of the third, principle of sufficient evidence). Method of generalization in empirical research.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex061/22	Course title: Migration and social work
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 2.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for completing the subject: Completion of the course ends with an assessment. The student will be assessed continuously in the form of reflection on the studied recommended literature and the completion of tasks during the seminar (max. 70 points) and ends with the defense of the semester work (project) with a total maximum value of 30 points. At least 93 points are required to obtain an A rating, at least 86 points to obtain a B rating, at least 78 points for a C rating, at least 69 points for a D rating, and at least 60 points for an E rating. A-excellent performance, the student controls and critically evaluates the possibilities of various procedures for building and solving a research project and knows how to apply them in practice; B-excellent performance, the student masters the basic principles of creation and solution, but critical thinking is borderline; C-good performance, although the student has learned to work with the basic procedures of solving projects, but does not know how to apply them in practice, D- sufficient performance, the student has only learned the basic principles of project preparation and solution, but does not know how to apply them in practice, E -sufficient, student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education: After completing the subject, the student acquires an overview, information and knowledge about the topic of migration and migrants as a target group of social work, and at the same time can define	

the possibilities of social work with this target group in its methods and forms. With these results, it is ensured that the student will subsequently be able to find employment in this sphere of social work as well as be able to work qualifiedly with social work clients - migrants. It is about the development not only of his theoretical knowledge, but also of practical skills and abilities as expected from a graduate of the first level of higher education. The student can creatively solve theoretical and practical tasks in the field using theory and research and development procedures and can solve problems, coordinate procedures in teams and make independent and responsible decisions in a changing environment. Knows and understands theories, methods and procedures that are used in the field, with possible application in science and research, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. The student can solve problems, coordinate procedures in teams and make independent and responsible decisions in a changing environment, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. Has deep and cross-sectional knowledge in a specialized area, including knowledge of contexts and relationships with related disciplines.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Introduction to migration issues. History of migration. Migration today. Legislative framework of migration and asylum issues. IFSW documents on migration. History of social care provided to migrants. Concepts of integration (inclusion). Social work with migrants. Social work with asylum seekers and asylum seekers. Social work with foreigners with additional protection. Human trafficking as a field of work of a social worker.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex040/22	Course title: Outreach social work
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 3	
Recommended semester: 4.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex010/22 - Social work history and basics II	
Course requirements: Completion of the course ends with an exam. During the semester, the student will have 1 written examination for max. 20 points and evaluated references from a visit to an institution providing field social work as part of seminars, for which the student can receive max. 20 points. To participate in the final evaluation, it is necessary to obtain at least 26 points from the interim evaluation. The course is completed by an oral exam on the acquired knowledge for the entire semester, from which students have the opportunity to obtain max. 60 points. At the oral exam, for the final assessment, they must obtain min. 36 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of field social work and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of field social work, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of field social work, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student he learned to navigate the content of the course, but he did not learn to actively work with it and apply it in practice.	
Learning outcomes: By completing the subject, the student will gain an overview of one of the methods of social work - field social work, its history, starting points, goals, basic and specific methods. He will be able to	

identify the specifics of field social work with individual groups of social work clients. Can analyze the client's social situation and apply directly in the field the knowledge gained from field social work philosophy and Harm philosophy reduction . He will be able to prepare complex programs of field social work according to the real social situation of the client and social requirements. He has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge. Can identify and evaluate the ethical, social and other contexts of solved problems. He can independently acquire new knowledge and actively expand his knowledge. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Theoretical definition of field social work. History of field social work. The starting points of field social work: the goal of field social work, programs of field social work. Basic methods of field social work. Specific methods of field social work. Street work . Methods of field social work with selected target groups of social work. Philosophy Harm reduction . Field social worker .

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex056/22	Course title: Palliative and hospice care
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for completing the course: Completion of the course ends with an assessment. The student will be evaluated continuously in the form of reflection on the studied recommended literature and the completion of tasks during the seminar (max. 70 points) and ends with the defense of the semester work (project) with a total maximum value of 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of palliative and hospice care and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of social work in palliative and hospice care, but critical thinking is borderline; C-good performance, the student learned to navigate the basics of palliative and hospice care, but does not know how to apply them in practice, D- sufficient performance, the student learned only the basic core of the course content, but does not know how to apply them in practice, E -sufficient, student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: After completing the subject, the student acquires knowledge in the field of palliative and hospice care and the roles of social work in it. At the same time, he acquires knowledge and skills about the roles of a social worker when working with the dying and his family as a client of social work. These results ensure that the student will subsequently be able to find employment in this area of	

social work as well as be able to work qualifiedly with the dying and his family members as a client of social work. It is about the development not only of his theoretical knowledge, but also of practical skills and abilities as expected from a graduate of the first level of higher education. . The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results. Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.
Class syllabus: Thanatology - the science of death and dying. Palliative care. Hospice care. The needs of the dying and their relatives. The team providing care for the dying and relatives. Social work in hospices. The role of the social worker in hospices. Methods of social work in hospice and palliative care. Counseling and accompanying the dying. Counseling for survivors.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex018/22	Course title: Professional practice and supervision seminar I
Educational activities: Type of activities: seminar / practice Number of hours: per week: per level/semester: 2s / 36s Form of the course: combined	
Type, volume, methods and workload of the student - additional information Type, scope and method of educational activities: 5 hours in a block in the form of a seminar, face-to-face, distance learning, combined, and practice in the range of 36 hours per semester Student workload: 5 hours of seminar per semester. During the semester, practice in a selected institution providing social services in the range of 36 hours. Preparation for the presentation of the seminar work 20 hours. A total of 62 hours. Education methods: 1. Monological (lectures, briefing), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Guided self-study (work with text, content analysis, presentation preparation).	
Number of credits: 2	
Recommended semester: 3.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for completing the subject: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain max. 40 points for active participation in supervision seminars. To participate in the final assessment, it is necessary to obtain at least 20 points from the interim assessment. Professional practice is carried out during the semester or during block teaching and consists of 3 main parts: 1. Pre-practice seminar (4 hours) 2. Performance of professional practice (20% of the time within the performance of practice can be devoted to self-study/preparation - e.g. study of applicable legislation, study of literature on the specifics of social organizations and their clients, etc.) 3. Post-practice seminar (4 hours) The subject is completed at a post -practice seminar, where students present and defend the experiences and results of professional practice - based on the acquired knowledge, skills and competences for the entire semester. In addition to the presentation, students will also prepare a written self-reflection focused on the goal of the practice, which they will hand over to the evaluator. At the final assessment, students have the opportunity to receive max. 60 points.	

At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points.

A-excellent performance, the student participated in a pre -practice seminar, completed a 36-hour internship at the selected institution, regularly attended supervision meetings, engaged in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

B-excellent performance, the student participated in the pre -practice seminar, completed a 36-hour internship at the selected institution, participated in supervision meetings at least once, engaged in self-study and presented and defended the experiences and results of the internship at the post-practice seminar .

C-good performance, the student participated in the pre -practice seminar, completed a 36-hour internship at the selected institution, participated in supervision meetings at least once, did not engage in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

D- sufficient performance, the student participated in a pre -practice seminar, completed a 36-hour internship at the selected institution, did not participate in supervision meetings, did not engage in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

E - sufficient, the student participated in the pre -practice seminar, completed a 36-hour internship at the selected institution, did not participate in supervision meetings, did not engage in self-study, and briefly presented and defended the experiences and results of the internship at the post-practice seminar .

Learning outcomes:

After completing the subject (practical part - practice), the student should be able to understand the mission of social work, the tasks in its practical level, and thanks to experience and trying out the role of a client, should understand the tasks and roles of a social worker in selected organizations working with different target groups of social work . At the same time, he should be able to identify relationships and boundaries in the relationship / possibly relationship disorders/between the client and the social worker and the observance of ethical principles and to realize the importance of the quality personal and professional side of the helping professional.

After completing the subject (seminar), the student should know the essence of the supervision of student professional practices, what topics are suitable for supervision with the support of suitable techniques that can be used in supervision, and at the same time they should understand the meaning of student supervision at both levels (in the school and extracurricular environment).

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will emphasize responsibility, transparency, ethical behavior, respect for the interests of stakeholders , compliance with the law, as well as the protection and observance of human rights.

Class syllabus:

Professional experience in the higher education system of social workers. The process and content of professional practice, the relationship between the supervised student and the supervisor (practice guide). Introductory and orientation phase of professional practice. Trial phase of professional practice. Phase of consolidation and independence

Supervisions are educational in nature. After confronting the real practice of social work (after completed field trips and experience), students come with positive and negative experiences,

experiences, emotions, etc., which are discussed and transformed into topics suitable for supervision.

Practice:

Familiarization with the goals of professional practice and compliance with ethical principles.

Health protection and safety during professional practice - training.

During the internship, the student is in the role of a client of the social organization/facility that he has chosen as a place for professional practice. The student should experience the work of a social client on his own skin, carry out all the activities performed by the client/clients, spend time among them, discuss with him/her - as if he were one of them, which will allow him to better understand the experience and emotions of the client during the performance his future profession.

In addition to the presentation, students will also prepare a written reflection focused on the goal and content focus of the practice. At the final assessment, students have the opportunity to receive max. 60 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points.	

A-excellent performance, the student participated in a pre -practice seminar, completed a 72-hour internship at the selected institution, regularly attended supervision meetings, engaged in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

B-excellent performance, the student participated in a pre -practice seminar, completed a 72-hour internship at the selected institution, participated in supervision meetings at least once, engaged in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

C-good performance, the student participated in the pre -practice seminar, completed a 72-hour internship at the selected institution, participated in supervision meetings at least once, did not engage in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

D- sufficient performance, the student participated in a pre -practice seminar, completed a 72-hour internship at the selected institution, did not participate in supervision meetings, did not engage in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

E - sufficient, the student participated in the pre -practice seminar, completed a 72-hour internship in the selected institution, did not participate in supervision meetings, did not engage in self-study, and briefly presented and defended the experiences and results of the internship at the post-practice seminar .

Learning outcomes:

Learning outcomes:

Goals and outcomes of education:

After completing the course (practical part - practice), the student should know and be able to apply in practice the individual administrative procedures used at the practical workplace, evaluate the applicability of laws, analyze the social environment and know the ways and possibilities of applying accepted principles, laws, and decrees in practice. At the same time, he should be able to analyze the application of social policy at the local, regional and state level and know the procedures and methods (but also their possibilities and limits) in the work of the first contact with the client in social work.

After completing the subject (seminar), the student should be more resilient towards bureaucracy, should recognize the essence and be able to look for alternatives, see other possibilities, create an overview, better understand processes and contexts in the administrative and socio-political sense, but also in the social environment, in which client operates, from which it originates and which affects it. At the same time, he should gain confidence in the first contact with the client and gradually become more autonomous not only in working with the client, but also in supervision and focus more on the client and processes than on himself.

A student can choose an internship workplace and fulfill the goals of the professional internship in the context of the final (bachelor's) thesis chosen by him.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Seminar:

The process and content of professional practice, the relationship between the supervised student and the supervisor (practice guide). Introductory and orientation phase of professional practice. Trial phase of professional practice. Phase of consolidation and independence Supervisions are educational in nature. After confronting the real practice of social work, students come with positive and negative experiences, experiences, emotions, etc., which are discussed and transformed into supervision topics. Practice: Familiarization with the goals of professional practice and compliance with ethical principles. Health protection and safety during professional practice - training. Performance of professional practice: observation of work in the facility: preparation for observation, own observation, evaluation and analysis of the performed observation of the performance of social work in an administrative and socio-political concept and during the first contact. active work: preparation for work (study of legislative documents, relevant literature), own work with the client (only in the form of first contact), own work in the context and administration (administrative procedures) in social work, analysis of the social environment of the workplace) and the application of social policy at various levels (state, regional, local).

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex036/22	Course title: Professional practice and supervision seminar III
Educational activities: Type of activities: seminar / practice Number of hours: per week: per level/semester: 5s / 77s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block in the form of a seminar, face-to-face, distance learning, combined, and practice in the range of 77 hours per semester Student workload: 5 hours of seminar per semester. During the semester, practice in a selected institution providing social services in the amount of 77 hours. Preparation for the presentation of the seminar work 20 hours. A total of 109 hours. Education methods: 1. Monological (lectures, briefing), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Guided self-study (work with text, content analysis, presentation preparation).	
Number of credits: 3	
Recommended semester: 5.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for passing the course: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain max. 40 points for active participation in supervision seminars. To participate in the final assessment, it is necessary to obtain at least 20 points from the interim assessment. Professional practice is carried out during the semester or during block teaching and consists of 3 main parts: 1. Pre-practice seminar (4 hours) 2. Performance of professional practice (20% of the time within the performance of practice can be devoted to self-study/preparation - e.g. study of applicable legislation, study of literature on the specifics of social organizations and their clients, etc.) 3. Post-practice seminar (4 hours) The subject is completed at a post -practice seminar, where students present and defend the experiences and results of professional practice - based on the acquired knowledge, skills and competences for the entire semester. In addition to the presentation, students will also prepare a written reflection focused on the goal and content of the practice. At the final assessment, students have the opportunity to receive a max. 60 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points.	

A-excellent performance, the student participated in a pre -practice seminar, completed a 72-hour internship at a selected institution, regularly attended supervision meetings, engaged in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

B-excellent performance, the student participated in a pre -practice seminar, completed a 72-hour internship at the selected institution, participated in supervision meetings at least once, engaged in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

C-good performance, the student participated in the pre -practice seminar, completed a 72-hour internship at the selected institution, participated in supervision meetings at least once, did not engage in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

D- sufficient performance, the student participated in a pre -practice seminar, completed a 72-hour internship at the selected institution, did not participate in supervision meetings, did not engage in self-study, and presented and defended the experiences and results of the internship at the post-practice seminar .

E - sufficient, the student participated in the pre -practice seminar, completed a 72-hour internship in the selected institution, did not participate in supervision meetings, did not engage in self-study, and briefly presented and defended the experiences and results of the internship at the post-practice seminar .

Learning outcomes:

Learning outcomes:

Goals and outcomes of education:

After completing the course (practical part - practice), the student should be able to identify and analyze the methods and techniques of social work used when working with a client (individual/family/group/community) in a social organization or in the field under supervision. At the same time, he should be able to connect his theoretical knowledge to the practice of social work. Last but not least, he/she should be strengthened (and also acquire them) in the competences of a social worker for a student from the point of view of the competence model.

After completing the subject (seminar), the student should be more resilient , should recognize the essence and be able to look for alternatives, see other possibilities, create an overview, better understand the processes and connections at the theoretical-practical level of working with the client in the context of using various methods and techniques social work. At the same time, he should gain confidence in the process of working with the client and gradually become more autonomous not only in specific work with him, but also in supervision and focus more on the client's perspective, focus on the process and consider how the processes affect each other. He should also be able to identify his place and role in the team, how the cooperation takes place, how the cooperation of experts affects the work with the client in the context of the methods and techniques of social work used.

Supervisions are educational in nature. After confronting the real practice of social work, students come with positive and negative experiences, experiences, emotions, etc., which are discussed and transformed into supervision topics.

The student chooses an internship workplace and fulfills the goals of the professional internship in the context of the final (bachelor's) thesis chosen by him.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical

behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Seminar:

Supervision on topics related to direct work with the client such as:

Ideas about the facility and performance of professional practice with the client (individual/family/group/community). Concerns and fear of working directly with the client. First contact with the client. (individual/family/group/community). Direct work with the client (individual/family/group/community). Social work (what social work is all about). Competences of a social worker. Cooperation in a team. Disparate demands on the student from those involved (client/social worker/society). Termination of cooperation with the client (individual/family/group/community). Separation and related problems, etc.

Supervisions are educational in nature. After confronting the real practice of social work, students come with positive and negative experiences, experiences, emotions, etc., which are discussed and transformed into supervision topics.

Practice:

Acquaintance with the goals of professional practice.

Health protection and safety during professional practice - training.

Performance of professional practice:

observation of work in the facility: preparation for observation, own observation, evaluation and analysis of the performed observation of the performance of social work.

active work: preparation for work, own work with the client (individual/family/group/community) under supervision, analysis and evaluation of work, development of a case study, social diagnosis of the client/assessment of the life situation of the client (individual/family/group/community) . In an exit interview with the practice supervisor.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex005/22	Course title: Psychology I
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 8s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 8 hours in a block, face-to-face distance and combined method 8 hours per semester and subject consultations, 8 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 3	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: The course ends with a final exam - a test for which the student can earn max . 100 points. In order to successfully complete the subject, it is necessary to obtain a min. from the test. 60 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and differentiates all basic psychological constructs and knows how to apply them in practice; B-excellent performance, the student masters the basic psychological constructs, but it is difficult for him to critically differentiate them, and the practical application is only partial; C- good performance, the student has learned to navigate the basics of psychology, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply it in practice, E - sufficiently, the student has learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: The student can define psychology as a scientific discipline, can classify it historically and within the system of sciences. He understands the laws and regularities that explain the psychological activity of a person, his experience and behavior. He knows the basic psychological processes and functions that make up the psyche of an individual. He can define and differentiate individual cognitive processes, motivation and volitional processes as well as affective components of the human psyche. Understands various theoretical starting points that characterize the current state	

of knowledge in psychology. The result of education will be acquired knowledge from the field of psychology, especially general and cognitive psychology, or ontogenetic and social psychology, important and necessary for the professional work of a social worker.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Introduction to psychology - prehistory and history of psychology. Philosophical prerequisites for the emergence of psychology. Development of psychology and individual directions in psychology. Psychology in the system of sciences and terminological definition - definition and subject of psychology. Goals and methods of psychology. Psyche, consciousness and unconsciousness – phylogeny and ontogeny. Cognitive processes – Perception, feelings and sensations, imaginative processes (imagination, fantasy), memory and learning, thinking and intelligence, attention. City, feelings and emotions - the affective component of the human psyche. Motivation and will – motivation of behavior and different theories of motivation of human activity. Personality - personality psychology, personality formation, personality structure - characteristics, character and temperament. Personality dynamics. Different theories of personality then and now – psychoanalytic, behavioral, humanistic, etc.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex021/22	Course title: Risk social phenomena and their prevention
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 3	
Recommended semester: 3.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an exam. During the semester, there will be one written examination with the possibility of obtaining a maximum of 20 points. During the semester, students prepare and present a preventive program at the seminar, for which they can receive a maximum of 20 points. The condition for participation in the final written test is to obtain at least 25 points of the interim assessment. In the final test, students can get a maximum of 60 points. At least 91 points are required to obtain an A rating, at least 81 points to obtain a B rating, at least 73 points for a C rating, at least 66 points for a D rating, and at least 60 points for an E rating. A-excellent performance, the student controls and critically evaluates various aspects of risky social phenomena and analysis and knows how to apply them in practice; B-excellent performance, the student controls the basic aspects of risky social phenomena, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of risky social phenomena, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student he learned to navigate the content of the course, but he did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education: After completing the subject, the student will gain knowledge about risky social phenomena, master the basics of professional terminology, be able to identify the signs and characteristics of individual risky social phenomena, the causes of their occurrence and the possibilities of social prevention -	

primary, secondary, tertiary. After completing the subject, the student has the opportunity to expand his knowledge of individual risky social phenomena through optional subjects. The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Terminological definition – risky social phenomena, social deviations, social pathology. The development of society's view of socio-pathological phenomena. Risky social phenomena associated with the family environment, the structure and function of society, its social processes and social facilities. CAN syndrome. Dissocial behavior disorders. Aggressive behavior, antisocial rituals and bullying. Prostitution. Alcoholic and non-alcoholic addictions. Social aspects of suicidal behavior. Racism and extremism. Universal, selective, indicated, primary, secondary, tertiary prevention of individual risky social phenomena. Objectives of prevention. Factors influencing prevention goals. Forms of social prevention. Strategies for creating preventive programs.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex064/22	Course title: School social work
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 4.	
Educational level: I.	
Prerequisites:	
Recommended prerequisites: History and foundations of social work II	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 40 points based on completed tasks assigned at seminars, which will be continuously solved and evaluated. As part of the exercises, based on the completion of tasks and exercises, the student has the opportunity to obtain max. 30 points. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject is concluded at the end of the semester with a practical output - simulated situations from the field of social work in education - as part of the final evaluation based on the knowledge acquired for the entire semester - from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of social work in education and knows how to apply them in practice; B-excellent performance, the student masters the basic aspects of social work in education, but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of social work in education, but does not know how to apply them in practice, D- sufficient performance, the student only learned the basic core of the course content, but does not know how to apply them in practice, E -sufficient, student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	

Learning outcomes:

After completing the subject, students should be familiar with the possibilities of implementing social work in the field of education. They should be able to identify social problems appearing in the social environment of the school and know the professional work of a social worker in special school educational facilities. At the same time, they should have knowledge of the valid legislation in the field of education and the definition of the competences of a social worker using the methods and forms of social work. Students should have an overview and information about implemented preventive programs. The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights

Class syllabus:

School as a social environment. Social problems and school. Special educational facilities in the field of education. Legislative definition in the field of education. Competences of a social worker. Methods and forms of social work in education. Peer groups, preventive programs.

Number of credits: 4	
Recommended semester: 3.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 40 points on the basis of completed tasks assigned at seminars, which will be continuously solved and evaluated. As part of the exercises, based on the completion of tasks and exercises, the student has the opportunity to obtain max. 30 points. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject is completed at the end of the semester with a practical output - the processing of the introductory pages of the course work - as part of the final evaluation based on the acquired knowledge for the entire semester - from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates the possibilities of various procedures for building and solving a research project and knows how to apply them in practice; B-excellent performance, the student masters the basic principles of creation and solution, but critical thinking is borderline; C-good performance, although the student has learned to work with the basic procedures of solving projects, but does not know how to apply them in practice, D- sufficient performance, the student has only learned the basic principles of project preparation and solution, but does not know how to apply them in practice, E -sufficient, student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	

Learning outcomes:

Learning outcomes:

Goals and outcomes of education:

After completing the course, the student should be ready to work with a professional text, which he will process into a term paper after studying, in which the most up-to-date information sources should be used and valid citation standards should be respected. Knows and understands theories, methods and procedures that are used in the field, with possible application in science and research, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. The student can solve problems, coordinate procedures in teams and make independent and responsible decisions in a changing environment, can formulate information about the procedure and results of solving tasks, communicate professional opinions with experts. Has deep and cross-sectional knowledge in a specialized area, including knowledge of contexts and relationships with related disciplines.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Methodology of creating final theses. Types of final theses and basic starting points for their creation. Preparation, collection, processing of relevant information sources for the creation of a course work. Working with a professional text and its interpretation in the context of creating a course work. Possibilities of using information resources when writing a term paper.

Number of credits: 3	
Recommended semester: 3., 5.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex010/22 - Social work history and basics II	
Course requirements: Conditions for passing the course: Completion of the course ends with an exam. The student will be evaluated in the form of interim and final evaluation. Continuous assessment takes place during the semester in the form of four control tests with max. with a value of 12.5 points or in the form of a semester work with a maximum score of 50 points. To participate in the final evaluation, it is necessary to obtain at least 30 points from the interim evaluation. The final evaluation takes place in written form, the maximum number of points obtained from the final evaluation is 50 points. In the written exam, students must obtain min. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of social legal protection and social guardianship and analysis and knows how to apply them in practice; B-excellent performance, the student masters the basic aspects of social protection and social guardianship , but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of social protection and social guardianship , but does not know how to apply them in practice, D-sufficient performance, the student has learned only the basic core of the course content, does not know how to apply them in practice, E -sufficient , the student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes:	

To provide social work students with information about the starting points and the system of protection of children's rights in Slovakia, legislation on the social protection of children and social guardianship and the history of its development up to the present. Provide the listeners with a set of information on the content, nature and methods aimed at protecting the rights of children in a natural family environment, a substitute environment and an environment created and organized for the implementation of measures of social protection and social guardianship in the context of applicable legal standards. . The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Class syllabus:

Historical origins of the protection of children's rights. Development of legislation regulating social protection and guardianship of the child. Social protection and social guardianship in the context of valid legal norms. Subjects of social protection. Organization and system of social protection, competences of participating entities (conflict guardian, employee of an accredited entity). Social work with children and their families, individual work plans, educational activities with children and the family, interference with parental rights and responsibilities, the importance of preliminary measures, social work with children with ordered institutional care and their families, procedural measures in the case of family violence, networking experts. Organization of alternative family care, its content and forms. Tutoring children and youth as a specific professional activity. Cooperation of curators with other experts in the helping professions, with the police, the court, the prosecutor's office, schools, doctors and substitute education institutions. Roles and competencies of the participating entities, competencies of the social curator for minors, juveniles and adults. The dilemma of support versus supervision.

Prerequisites:	
Course requirements: Conditions for completing the course: Completion of the subject ends with an assessment. During the semester, the student has the opportunity to obtain 40 points on the basis of completed tasks assigned at seminars, which will be continuously solved and evaluated. As part of the exercises, based on the completion of tasks and exercises, the student has the opportunity to obtain max. 30 points. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject is concluded at the end of the semester with a practical output - simulated situations in the field of communication and conflicts - as part of the final evaluation based on the knowledge acquired for the entire semester - from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of communication and analysis and knows how to apply them in practice; B-excellent performance, student controls and basic aspects of communication and conflict management, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of communication, but does not know how to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student has learned to navigate in the content of the course, but did not learn to actively work with it and apply it in practice.	

Learning outcomes:

After completing the course, students should be familiar with the theoretical foundations of the process of communication and conflict resolution, they will acquire communication skills, students will look for relevant factors affecting the effectiveness of communication and the course of conflict, learn to minimize communication disorders in the verbal and non-verbal area, learn to conduct a conversation, introduce with transactional analysis. They will learn to recognize different types of conflicts, different tactics and strategies for conflict management, to work with negotiation and mediation.

The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights

Class syllabus:

Basics of communication theory, communication pattern, non-verbal communication, importance of self-knowledge and knowledge of others, use of transactional analysis, conducting an interview, working with questions, basic communication principles, different types of interviews. Definitions and typologies of conflicts, constructive argument, use of assertiveness in conflicts, decision-making in a conflict situation, static and dynamic strategies, the process of negotiation, effective mediation and the process of concluding an agreement.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex033/22	Course title: Social project and evaluation of social programs
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 4	
Recommended semester: 5.	
Educational level: I.	
Prerequisites:	
Course requirements: The course ends with an assessment. During the semester, the student, under the guidance of the teacher, compiles a social project. Each project has 2 presentations at the specific stage in which it is in front of the whole group. In the last lesson, the student receives a project by an anonymous author from the teacher and prepares an evaluation analysis. A student can get a maximum of 30 points for each presentation, 40 points for an evaluation analysis. Credits will not be awarded to a student who does not achieve a minimum of 17 points for the project presentation. At least 91 points are required to obtain an A rating, at least 81 points to obtain a B rating, at least 73 points for a C rating, at least 66 points for a D rating, and at least 60 points for an E rating. A-excellent performance, the student controls and critically evaluates various aspects of project writing and analysis and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of writing a social project, but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of writing a project, but is unable to apply them in practice, D- sufficient performance, the student has learned only the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student has learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education: Among the main educational outcomes that the student obtains by completing the subject is the ability to write a project, to be able to work with analytical techniques to define the initial situation,	

formulate goals, target groups and appropriately choose methods to achieve them. He should gain an overview of evaluation techniques and the possibilities of their use in social work. The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, he knows how to actively acquire information and use it to solve practical tasks in the field, and he can independently acquire new knowledge and actively expand your knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results. He should gain an overview of evaluation techniques and the possibilities of their use in social work, he can actively acquire information and use it to solve practical tasks in the field, he can independently acquire new knowledge and actively expand his knowledge.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Analysis of the current state of the social problem, identification and formulation of the problem, definition of the target group, formulation of the project goal and its sub- goals . Specification of activities leading to the achievement of goals and their implementation, creation of a budget and criteria for evaluating the effectiveness of the project, monitoring. Evaluation structure , evaluation process , evaluation techniques and their application to social programs in real existing organizations.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex002/22	Course title: Social work history and basics I
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 8s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 8 hours in a block, face-to-face distance and combined method 8 hours per semester and subject consultations, 10 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 4	
Recommended semester: 1.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an exam. Part of the exam is a written reflection on the studied recommended supplementary literature (max. 40 points) no later than the last week of continuous teaching during the semester, supplemented by an oral exam from acquired knowledge for the entire semester during the exam period (max. 60 points). At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of the history of social work and analysis and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of the history of social work, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of the history of social work, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student he learned to navigate the content of the course, but he did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education: After completing the subject, the student gains an overview of the history of social work through which he can define the tasks of social work as well as receive information about the current perception of social work. These results ensure that the student can subsequently design, develop,	

implement, expand, adapt and localize forms and methods of social work. At the same time, based on the results of education, he should be able to design forms of social assistance and entire systems in such a way that they meet the requirements for maintaining and improving the quality of life of the population based on historical contexts.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Help and assistance. Social assistance, social care and social support/support as a task of social work. Help and social theories as a subject of the history of social work. Help in ancient times. Help in the Middle Ages. Help in the modern age, the beginnings of social care provided by the state. The beginnings of social work - the experience phase. Diagnostic to functional school of social work. Social work after World War II. Renewal of social work and social reform. Social work as a science. Social work as a practical activity. The student can independently acquire new knowledge and actively expand his knowledge and can actively acquire information and use it to solve practical tasks in the field.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex010/22	Course title: Social work history and basics II
Educational activities: Type of activities: lecture + seminar Number of hours: per week: per level/semester: 8s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 8 hours in a block, face-to-face distance and combined method 8 hours per semester and subject consultations, 8 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 4	
Recommended semester: 2.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex002/22 - Social work history and basics I	
Recommended prerequisites: History and foundations of social work I	
Course requirements: Completion of the course ends with an exam. During the semester, there will be 1 written examination for max. 20 points and evaluated discussions in seminars on selected topics from the history and basics of social work, for which the student can receive max. 20 points. To participate in the final evaluation, it is necessary to obtain at least 26 points from the interim evaluation. The course is completed by an oral exam on the acquired knowledge for the entire semester, from which students have the opportunity to obtain max. 60 points. At the oral exam, for the final assessment, they must obtain min. 36 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of the history of social work and analysis and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of the history of social work, but critical thinking is borderline; C-good performance, the student has learned to navigate the basics of the history of social work, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student he learned to navigate the content of the course, but he did not learn to actively work with it and apply it in practice.	
Learning outcomes:	

After completing the course, the student should be able to understand the goals and mission of social work, the tasks and roles of a social worker. He should know and be able to identify the fields and levels of social work, the typology of social work clients and understand the various contexts (disorders, boundaries) in the relationship between the social work client and the social worker. This knowledge is important for the subsequent ability to analyze problems and opportunities that open up in various areas of the social sphere. The student has cross-sectional knowledge of the history of social work with a focus on application at a level corresponding to the current state of knowledge, he knows how to actively acquire information and use it to solve practical tasks in the field, and he knows how to independently acquire new knowledge and actively expand his knowledge.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Tasks and place of social work in society. Social work activities. Social worker. The role of the social worker. Social worker as a team member. Social work client/user of social work services. Typology of social work clients/users of social work services. Professional relationship between social worker and social work client/user of social work services. Fields and levels of social work. Social network. Social problem/situation. Social support/social support.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex053/22	Course title: Social work with sex workers
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 4.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex019/22 - Forms and methods of social work	
Course requirements: Completion of the course ends with an assessment. During the semester/study block, the student will participate in 6 activities, each of which is evaluated with 10 points, and in the final group colloquium, which is evaluated with 10 points. The course ends with a final assessment - test, for which the student can get max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of social work with people working in the sex business and knows how to apply them in practice; B-excellent performance, the student masters the basic aspects of the given issue, but critical thinking is borderline; C-good performance, the student has learned to orient himself in the basics of the issue, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student has learned to orient himself in the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Learning outcomes: Goals and outcomes of education: To know feminist theories dealing with work in the sex business. Know the definitions of basic terms and the differences between them (sex business, prostitution, human trafficking, etc.). Understand the various legislative adjustments to work in the sex business and the resulting possibilities	

and limitations for the performance of social work in the given legislative context. Know the possibilities and limits of social work with persons working in the sex business in the Slovak and international context. Understanding the human rights agenda and the advocacy movement of people working in the sex business. The result of the education will be selected knowledge from the field of feminist philosophy, law and methods of social work, which are necessary for the implementation of practice in social work with persons working in the sex business. The student has cross-sectional knowledge of the field with a focus on application use at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

Defining basic terms and their historical formation (sex business, prostitution, human trafficking, etc.). Feminisms about the sex business (with an emphasis on the work of Dworkin , MacKinnon , Leigh , Sprinkle , etc.). Legislative models (especially criminalization , decriminalization , regulation, absence of law). Methods and techniques of social work with persons working in the sex business. Human rights documents and the advocacy movement. Knowledge and skills of a social worker in social work with persons working in the sex business. Social work with persons working in the sex business in Slovakia and abroad.

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex046/22	Course title: Social work with unemployed clients
Educational activities: Type of activities: practicals + seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 4.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex010/22 - Social work history and basics II	
Recommended prerequisites: History and basics of social work II	
Course requirements: Conditions for completing the course: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 40 points on the basis of completed tasks assigned at seminars, which will be continuously solved and evaluated. As part of the exercises, based on the completion of tasks and exercises, the student has the opportunity to obtain max. 30 points. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject is concluded at the end of the semester with a practical output - simulated situations in the field of work with the unemployed and their families - as part of the final evaluation based on the knowledge acquired for the entire semester - from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of social work with the unemployed and knows how to apply them in practice; B-excellent performance, the student masters the basic aspects of social work with the unemployed, but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of social work with the unemployed, but does not know how to apply them in practice, D- sufficient performance, the student has only learned the basic core	

of the course content, does not know how to apply them in practice, E -sufficient, student learned to navigate the content of the course, but did not learn to actively work with it and apply it in practice.

Learning outcomes:

Goals and outcomes of education:

After completing the subject, the student should master the optimal forms, approaches, methods and techniques in social work with the unemployed and be able to motivate unemployed people to increase their education, to look for a job, to improve their communication with a potential employer, etc. The student should know the social consequences of unemployment and risk groups on the labor market and should be able to work with the client's social network and use the client's potential resources for its application on the labor market. Furthermore, he should understand the importance of retraining for the unemployed, projects and programs for the unemployed themselves, but also for families with an unemployed member and the principle of working with a family with an unemployed member.

Based on the completion of the exercises, he will be able to implement various methods (prevention, counseling, crisis intervention, accompaniment, etc.) and specific techniques (role-playing, brainstorming, professional type test, job interview practice, preparation of a resume, motivation letter, job application, work with advertisements, etc.) of social work and by visiting the Labor Office of Social and Family Affairs to understand the institutional dimension of social work with the unemployed. The goal of the exercises is to gain an experiential understanding of the position of an unemployed person on the labor market in the context of the tasks of a social worker and the importance of employment services in the Slovak Republic.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights

Class syllabus:

The role of the social worker and the compilation of his profile in the field of social work with the unemployed. Forms, approaches, methods and techniques of social work with the unemployed. Prevention and interventions in unemployment. Possibilities of social work with the unemployed and the use of resources for employment on the labor market. Specifics of working with risk groups on the labor market. Social work with families with an unemployed member. Preparing for a job interview. Training/training of skills/methods and techniques for working with the unemployed. Visit to ÚPSVaR - experience and evaluation.

University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex070/22	Course title: Specialized texts in a foreign language I
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 2., 4.	
Educational level: I.	
Prerequisites:	
Course requirements: Conditions for completing the subject: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 70 points based on completed tasks assigned at seminars, which will be continuously completed and evaluated. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject ends with a translation of a basic professional text in English, from which the student has the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various texts in a foreign language and knows how to apply them in practice; B-excellent performance, the student controls the basic aspects of the given issue, but critical thinking is borderline; C-good performance, the student has learned to orient himself in professional texts, but he does not know how to apply them in practice, D- sufficient performance, the student has learned only the basic core of the course content, he cannot apply them in practice, E -sufficient, the student has learned to orient himself in the content of the course, but did not learn to actively work with it and apply it in practice.	
Learning outcomes: Acquisition of communication competence in English for the field of substantive communication in social work. The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information	

and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.

Class syllabus:

General English. Language exercise aimed at forming and strengthening communication competence in the field of substantive communication. Language conventions in a common environment. Selected topics from the fields of social and social sciences.

Recommended literature:

Mandatory literature:

Authentic substantive texts from registered databases

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex068/22	Course title: Sport and free time activities
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 1., 3., 5.	
Educational level: I.	
Prerequisites: PdF.KSP/B-SOCex010/22 - Social work history and basics II	
Course requirements: The student will be evaluated in the form of an interim and final evaluation. Continuous evaluation takes place during the semester in the form of point evaluation of active participation in seminars with a maximum point evaluation of 70 points. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The final evaluation takes place in written or oral form, the maximum number of points obtained from the final evaluation is 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points.	
Learning outcomes: After completing the course, the student should be able to understand free time in the context of modern society, define the signs, definition and structure of free time, as well as understand the current problems of free time. He will realize how sport contributes to the quality of life, changes people's lifestyles, affects health and the like. He will learn to create free time, use and adjust sports activities for different client groups. He should understand the meaning of leisure and sports activities and learn to use these activities for the development of the client. Through their own self-experience and experience, the student will try various leisure (outdoor and indoor activities) and sports activities. The student will try to prepare a model promotion of selected sports and leisure activities for selected target groups. At the same time, emphasis is placed on the promotion and effective targeting of these activities.	

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will place emphasis on responsibility, transparency, ethical behavior, respect for the interests of interested persons (English stakeholders), compliance with laws as well as the protection and observance of human rights.																				
Class syllabus: Delimitation of free time. Definition, signs, structure and problems of free time. Sport - its impact on people's lives, its place in free time. The meaning of leisure and sports activities. Specifics of social work with selected groups of clients in the context of sports and leisure activities. Experiential activities - self -experience of students (outdoor-indoor activities), climbing on natural - artificial rock, activities in the gym

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Education	
Course ID: PdF.KSP/B-SOCex048/22	Course title: Volunteering in social work
Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 1., 3., 5.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 70 points on the basis of completed tasks assigned at the seminars, which will be continuously solved and on the basis of the student's active participation directly in the seminars. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject ends with a written test, from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of volunteering in social work and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of volunteering in social work, but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of social work volunteering, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student he learned to navigate the content of the course, but he did not learn to actively work with it and apply it in practice.	
Learning outcomes: After completing the subject, the student should master the issue of volunteering, its historical context, the legislative regulation of volunteering in Slovakia, the various roles of a volunteer, the content of his work and the management of volunteers in an organization. In addition, he should	

be able to holistically connect the topic of volunteering and student experience. . The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will emphasize responsibility, transparency, ethical behavior, respect for the interests of stakeholders , compliance with the law, as well as the protection and observance of human rights

Class syllabus:

Basic concepts and facts about volunteering. History of volunteering. Legislative regulation of volunteering. Volunteering as a space for student practice. Recruitment and selection of volunteers. Content and performance of volunteer work. Management of volunteers

Educational activities: Type of activities: seminar Number of hours: per week: per level/semester: 5s Form of the course: combined	
Type, volume, methods and workload of the student - additional information 5 hours in a block, face-to-face distance and combined method 5 hours per semester and subject consultations, 11 hours preparation of seminar work; 20 hours of preparation for the interim assessment; 30 hours of exam preparation. A total of 66 hours of student work. Education methods: 1. Monological (lectures, instruction), 2. Dialogic (interview, discussion, colloquium, brainstorming), 3. Situational (case studies), 4. Guided self-study (work with text, content analysis)	
Number of credits: 2	
Recommended semester: 2., 4.	
Educational level: I.	
Prerequisites:	
Course requirements: Completion of the course ends with an assessment. During the semester, the student has the opportunity to obtain 70 points on the basis of completed tasks assigned at the seminars, which will be continuously solved and on the basis of the student's active participation directly in the seminars. To participate in the final evaluation, it is necessary to obtain at least 50 points from the interim evaluation. The subject ends with a written test, from which students have the opportunity to obtain max. 30 points. At least 91 points are required to obtain an A grade, at least 81 points are required to obtain a B grade, at least 73 points are required to obtain a C grade, at least 66 points are required to obtain a D grade, and an E grade is required get at least 60 points. A-excellent performance, the student controls and critically evaluates various aspects of volunteering in social work and knows how to apply them in practice; B-excellent performance, the student has mastered the basic aspects of volunteering in social work, but critical thinking is borderline; C-good performance, although the student has learned to navigate the basics of social work volunteering, but is unable to apply them in practice, D- sufficient performance, the student has only learned the basic core of the course content, but is unable to apply them in practice, E -sufficient, the student he learned to navigate the content of the course, but he did not learn to actively work with it and apply it in practice.	
Learning outcomes: After completing the subject, the student should master the issue of volunteering, its historical context, the legislative regulation of volunteering in Slovakia, the various roles of a volunteer, the content of his work and the management of volunteers in an organization. In addition, he should	

be able to holistically connect the topic of volunteering and student experience. . The student has cross-sectional knowledge of the field with a focus on application at a level corresponding to the current state of knowledge, knows how to actively acquire information and use it to solve practical tasks in the field, and knows how to independently acquire new knowledge and actively expand his knowledge. He can solve professional tasks and coordinate sub-activities and take responsibility for team results.

Within the framework of education, we will emphasize the "Concept of social responsibility" according to the International Standard ISO 26000 (corporate social responsibility), which is a reflection of the growing recognition of the need to ensure ecosystem health, social justice and good organizational governance. We will emphasize responsibility, transparency, ethical behavior, respect for the interests of stakeholders , compliance with the law, as well as the protection and observance of human rights

Class syllabus:

Basic concepts and facts about volunteering. History of volunteering. Legislative regulation of volunteering. Volunteering as a space for student practice. Recruitment and selection of volunteers. Content and performance of volunteer work. Management of volunteers
