COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KGP/PriF-DSSZ-004/22	Course title: Dissertation 4
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 4.	
Educational level: III.	
Prerequisites:	
Course requirements: Conditions for passing the course: Course evaluation will be conducted individually based on the doctoral student's individual study plan, as well as on the basis of an agreement between the academic supervisor and doctoral student. Evaluation is standard and shall reflect a sufficient orientation of the student in the presented subject matter for successful course completion according to the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: By passing this subject, the student will achieve sufficient orientation in the project issue of the dissertation thesis based on specific individual topics. This set task of knowledge is essential for a firmly established theoretical readiness of the course graduate in terms of his/her awareness, and equally supports his/her potential in a wide field of applied practice. Undoubtedly, the outcomes of his/her education will also be reflected in the student's overview in terms of methodological approaches in the subject matter.	
Class syllabus: Brief outline of the course: The subject Dissertation Thesis is a compulsory part of the doctoral student's study activities. The student requires a supremely individual character with regard to the specifics of the individual topics of the dissertation thesis. The basic syllabus should already be evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the solution to the topic of the dissertation thesis with emphasis on self-study and consultation with the academic supervisor and a wide spectrum of consultants, who will take part in creating the professional potential of the doctoral student for the next (scientific) stage of his/her studies.	
Recommended literature: Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.	

Languages necessary to complete the course: Required language for successful course completion: Slovak language in combination with English (study literature in English)

Course requirements: The course ends with an oral exam in the form of a discussion, where the examiner checks the overall education of the student in the subject area of research. The exam includes a written essay on a selected topic in micropaleontology.	
Learning outcomes: the student acquires skills in methods of micropaleontological research, their usability in other disciplines and application in practice. During the exercises he/she will gain experience in determining microfossils with emphasis on their morphological features and he/she is able to apply the acquired knowledge in the field of biostratigraphy, paleoecology and paleoclimatology. The student is able to independently solve problems using the acquired knowledge.	
Class syllabus: The structure of the course will focus on 1. Definitions and orientations of micropaleontological research; field and laboratory procedures 2. Rhodophyta, Chlorophyta 3. Radiolaria 4. Foraminifera 5. Foraminifera in cuttings 6. Ostracoda 7. (Coccolithophyceae) Calcareous nanoplankton 8. Calpionellidae, 9. Pollen and spores 10. Cuticular and xylotomic analysis. 11. Small mammals; topic are focused on dissertation goal of students

COURSE DESCRIPTION

Academic year: 2023/2024	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KGP/N-DGPA-006/22	Course title: Štúdium oceánu, oceánografia a klíma
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Recommended range of teaching (in hours): Weekly: one-week course For the period of study: 15 Study method: on-site learning, 15-hour course, takes place in full-time (or combined with distance) form through a combination of presentation, problem and cooperative method of teaching.	
Number of credits: 3	
Recommended semester: 2., 4.	
Educational level: III.	
Prerequisites:	
Course requirements: Students solve problem tasks. The final evaluation consists of the evaluation of the test of practical problem tasks and basic theoretical knowledge. The award of the subject evaluation is conditioned by 100% of the submitted final assignments and the completed attendance (max. 2 justified absences). Course evaluation will be given after the course.	
Learning outcomes: The basic aim of the course is to understand how the present day ocean works. Students, who follows this course will be embracing the multidisciplinary of oceanology, that most problems cannot be sorted into physics, chemistry and ecology, giving the structure of this course. The students will understand the physics of present day circulation, learn how to measure chemical properties of seawater in theory, grasp principles of sampling in marine science (applicable in other geoscience), study marine ecology, learn the system science approach through ocean and climate coupling, meet practical problems in the form of case studies from coastal management to protecting coral reef.	
Class syllabus: The course follows a broad multidisciplinary approach to understand the present day oceans. The term Marine Sciences is used to leave room to discuss practicalities like sampling or monitoring techniques. The approach is three fold, based on the disciplines of physics, chemistry and biology, resulting the first three modules: Physical Oceanography, Chemical Oceanography, Marine Ecology, Climate change, Paleoceanography – proxy, Collecting data

Languages necessary to complete the course:

English language in combination with Slovak (most of the lectures through a foreign lecturer and study literature in English)

Notes:

Due to the limited capacity of the paleontological classroom, the exercises can take place in groups with a maximum of 15 students in each group.
