Course requirements: Min. 60% of the total rating Rating scale: A: 100% - 92% B: 91% - 84% C: 83% - 76% D: 75% - 68% E: 67% - 60% FX: 59% - 0% The rating consists of: Group presentations from the read literature: 30% Test: 40% Active participation in discussions: 30% Group presentations: For each seminar, each group should read two mandatory readings. There are three compulsory readings for each seminar, each group reads the first and one of the remaining two readings based on the teacher's decision. Students are expected to provide a concise reading summary focusing on key arguments. During the discussion, presenting students are expected to defend the authors' arguments and try to explain how they understood the reading. Active participation: Students are expected to participate in seminars and actively participate in the discussion. Due to the fact that not everyone is equally well able to discuss in person at the seminar, there is an opportunity to send questions and comments before the seminar, but also after the seminar to the teacher. Written test in the final week: Written answers to open-ended questions, formulated on the basis of the topics covered in the course. The student is obliged to attend lectures as stated in the syllabi. The lecturer may justify the absence if it is caused by incapacity for work or other obstacles on the part of the student. In this case, the teacher can request the fulfillment of a substitute task, e.g. short additional seminar work, which will serve as a substitute for absence.	

Scale of assessment (preliminary/final): 100/0					
Learning outcomes: The course will start with introductory seminars where the students will learn about concepts necessary for the analysis of democratic institutions and then proceed from citizens' interests through political parties and elections to parliaments (legislatures) and governments (executives), and the relationships between them. The course will then proceed to other institutions ensuring separation of powers, mainly focusing on the role of constitutional courts as 'negative legislators' but addressing vertical separation of powers – i.e. territorial organization of states – as well. In the final part of the course, students will learn about mechanisms of citizen control over political institutions, those organized – such as NGOs and social movements, to those that ensure more direct involvement of citizens in the political process, e.g. referenda or deliberative tools.

Course requirements: obtain min. 60% of the total assessment Grading scale: A: 100% - 92% B: 91% - 84% C: 83% - 76% D: 75% - 68% E: 67% - 60% FX: 59% - 0% Preliminary written test - 20% of evaluation. The test will consist of closed and open questions from the topics covered in the course and will take place online on the Moodle platform. Additional information will be provided during seminars. Presentation of the structure of the seminar work - 20% of the evaluation. During the seminar, students will present the research design and structure of their seminar work (see below). During the first meeting, students will receive a list of questions from which to choose the topic of their seminar work. Presentation length max. 20 minutes, the rules for the presentation apply the same as for the seminar paper (however, 5 pieces of literature are enough). Critique of the structure of another student's seminar work - 10% of the evaluation. Students' role will be to provide critical feedback on the presentation. Students choose the topic they want to give feedback during the first meeting, as well as choose their topic of the seminar paper (and thus also the presentation). Seminar work - 30% of evaluation. The student's task will be to answer the submitted question in the range of 1500 words (+ - 10%) - the text must be dense and must support the answer to the research question. The seminar work must also include a critical evaluation of the literature in the analysis of the studied problem. In the analysis, pay attention to the definition of concepts, the logic of the concepts used. It is necessary to use academic literature, at least 15 academic books / scientific articles (from international journals), for which you can also use information about the current problem from relevant sources where it is current (print media, official newspaper websites, reports from research centers and Come.). Under no circumstances use blogs or irrelevant websites (eg	

referaty.sk, etc.) - in case of ambiguity, contact the teacher, seminar work containing such resources will be evaluated 0%

Final written exam (in the examination period) - 20% of evaluation. The exam will take place on the Moodle platform, students will have the task to answer two from three assigned question within one page (2 x 400 words)

The obligations of students (participation, evaluation, repetition) in the course are in accordance with the current Study Regulations of Comenius University, no. 5/2014 and the Study Regulations of Bachelor's, Master's and Doctoral Studies of the Faculty of Arts

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KPol/A-moPO-135/22	Course title: From Socialism to the EU Membership - Economic Transformation in Slovakia
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 0 / 2 per level/semester: 0 / 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: I., II.	
Prerequisites:	
Antirequisites: FiF.KPol/A-moPO-135/20	
Course requirements: 10 % -Active participation 40 % -Presentation (power point)and handout (notes) 50 % -Research paper Presentation–each student should give one short (15-20 minutes with additional 5-10 minutes discussion) presentationduring the course. The students (in a power point presentation) should try to (interestingly) explain the main questions, findings, arguments and conclusions of a chosen issue while focusing on the most important questions and keeping the time limit. A few (3-5) page handout (written summary of the presentation) is required. Max. 20 points could be given for each presentation and another 10 for the quality of power point presentationand the handout. Handout (notes)–summary notes are required from each student. The notes should be prepared according to the course schedule and given (in a printed form) to the lecturer and shared with other students. They should be informative as much as possible to give an idea to other students about the problem as well as with references on useful sources. Max. 10 points could be given for each summary. Research paper–8 to 12 page paper (Times New Roman, 1.5 times spacing, counted without notes, references, tables and figures) is required on a chosen topic agreed by the instructor. Try to avoid simple descriptions and focuson sources of problems,factors influencing the development,comparisons of countries, reforms, institutions etc. Asking questions, trying to answer them, arguing and drawing down conclusions is what is needed instead of just describing a particular event, some policies orinstitutions (it does not mean a good description is not welcomed). The academic style of writing is highly encouraged and appreciated, simplifications and journalist style should be avoided as much as possible. Max. 50 points couldbe given for the seminar paper. Evaluation: A: 100% - 92% B: 91% - 84% C: 83% - 76%	

D: 75% - 68% E: 67% - 60% FX: 59% - 0% Scale of assessment (preliminary/final): 50/50
<p>Learning outcomes:</p> <p>The aim is to give a general overview of the process of economic transformation of CEE countries (with special accent on Slovakia) from the socialist centrally-planned economies to free market economies integrated to the European Union. The students shall be able to examine and understand the characteristics, nature and structure of economic systems (socialism and capitalism) and the revolutionary and unprecedented transformation processes. Different policy choices, strategies and scope of transition and trajectories of CEE countries (economic development, achievements and failures) will be analysed in detail and using a comparative perspective. We will look at the current state of CEE countries as well: what kind of socio-economic models, capitalisms were created, which countries were more and which less successful and what are the major challenges today. By the end of the course, the students shall be able to understand, evaluate and analyse the basic processes of economic transformation in CEE countries after the fall of the iron curtain. This gives them a valuable knowledge and expertise usable in both the public and private sectors and the academic world as well.</p>
<p>Class syllabus:</p> <p>Basic paradigms: socialism, capitalism, welfare state, mixed economy Causes of the collapse of Communism and its economic heritage, need for change The first round of reforms (privatization, liberalization etc.) Evaluating the success of reforms: shock therapy or gradualism, comprehensive big bang vs. half or no reforms The second round of reforms: flat tax revolution, partial pension privatization etc. The EU integration and its effects Where are we now? The macroeconomic perspective Where are we now? The people's perspective, the social effects of transformation processes Transformation of different sectors of economy (banking, industry, energy etc.) Current challenges – reverse processes and the crisis of democracy and market economy in CEE</p>

Learning outcomes: The Roma issue, LGBT communities, gender equality or a continuous political campaign are all topics that are present in social debates in Slovakia. This course aims to introduce students to how different social science disciplines look at these topics and how similar problems are solved using experiments. The course is designed as a simplified guide (step by step) on how to create, implement and graphically evaluate an experiment (classical experiment and qualitative group discussion, so-called "focus group") in social sciences. The course is intended for all students of the Faculty of Arts (regardless of their subject of study). The teachers come from the environment of research in political science and sociology, but the composition of the course and problems fully reflects a broader understanding of multidisciplinary research and reflects research approaches in psychology, economics, or e.g. anthropology, linguistics and information studies. The content of the course is accessible to students of all disciplines who are interested in what is happening around them. The evaluation of the course is based on the implementation of practical tasks. A successful graduate of the course will know the answers to questions such as: How to	

implement experiments in social sciences? What have experiments taught us and what can they teach us? How can I use the experiment or focus group method not only in my field, but also in my future job?

COURSE DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KPol/A-moPO-107/19	Course title: LSD: Laboratory Research in Social Debates 2
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 0 / 2 per level/semester: 0 / 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: I., II.	
Prerequisites:	
Antirequisites: FiF.KPol/A-moPO-107/15	
Course requirements: Active participation in seminars: 10% Submitted assignments: 90% (3 x 30%) Assignments are part of experimental exercises in which students will participate and include tracking assigned activities and filling in pre-prepared questionnaires and other documents. Grading scale: A: 100% - 92% B: 91% - 84% C: 83% - 76% D: 75% - 68% E: 67% - 60% FX: 59% - 0% Scale of assessment (preliminary/final): 100/0	
Learning outcomes: Migration, hate speech, mental well-being, these are all topics that are present in social debates in Slovakia. This course is a free continuation of the LSD1 course, while dealing with different topics and methods. It aims to bring students closer to how different social science disciplines look at these topics, and how similar problems are solved using experiments. The course is designed as a simplified guide (step by step) on how to create, implement and graphically evaluate an experiment (classic experiment and survey experiment) in social sciences. The course is intended for all students of the Faculty of Arts (regardless of their subject of study). The composition of the course and problems fully reflects a broader understanding of multidisciplinary research. The content of the course is accessible to students of all disciplines who are interested in what is happening around them. The evaluation of the course is based on the implementation of practical tasks. A successful graduate of the course will know the answers to questions such as: How to implement experiments in social sciences? What have experiments taught us and what can they teach us? STATE EXAM DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KPol/A-moPO-903/15	Course title: Master's Degree Thesis Defence
Number of credits: 15	
Educational level: II.	
<p>Course requirements:</p> <p>The student must submit the master's thesis within the deadline specified in the schedule of the current academic year for the relevant date of the state exam. The master's thesis is submitted in electronic form via AIS. The work must meet the parameters determined by the internal quality system of Comenius University. The provisions of Article 14 of Internal Regulation no. 5/2020 (Study Regulations of the Faculty of Arts of Comenius University) apply to the evaluation of the master's thesis.</p> <p>The supervisor of the final thesis and its opponent will prepare evaluations of the master's thesis and propose a grade in the A-FX grading scale, which the student receives a minimum of three working days before the defence.</p> <p>Grading scale: 0-59% -FX, 60-67% -E, 68-75% -D, 76-83% -C, 84-91% -B, 92-100% -A</p> <p>Master's thesis evaluation criteria:</p> <ol style="list-style-type: none"> 1. The contribution of the master's thesis, the fulfilment of the objectives of the thesis in its assignment, and the requirements for the content of the master's thesis given by the internal quality system of Comenius University. It is assessed whether the student has worked on the chosen topic at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. Demonstration of the ability to work creatively in the study program is evaluated and the degree of demonstration of knowledge and understanding of the diploma thesis is reflected. 2. Originality of the work (master's thesis must not be plagiarized, must not infringe the copyrights of other authors); the documentation for the defence of the master's thesis also includes protocols of originality from the CRZP and Theses systems, to the results of which the thesis supervisor and the opponent express their opinions in their evaluations. 3. Correctness and accuracy of citation of used information sources, research results of other authors and group authors, correctness of the description of methods and working procedures of other authors or group authors. 4. Compliance of the structure of the master's thesis with the prescribed composition defined by the internal quality system of Comenius University. 5. Respecting the recommended length of the master's thesis (the recommended length of the master's thesis is usually 50 – 70 standard pages = 90,000 to 126,000 characters, including spaces), the adequacy of the length of the thesis is assessed by the thesis supervisor. 6. Linguistic and stylistic level of work and formal adjustments. <p>The student orally presents the content, achieved goals, and conclusions of the master's thesis, and answers the questions and comments of the thesis supervisor, opponent, or members of the examination committee. The committee will comprehensively evaluate the quality of the master's thesis, assess the method and form of defence, and the student's ability to adequately respond to comments and questions from the evaluations of the thesis supervisor and the opponent. The</p>	

<p>student receives their final grade based on the average of the assessment of the thesis supervisor and opponent from their evaluations, and the assessment of the examination committee.</p> <p>Scale of assessment (preliminary/final): 0/100</p>
<p>Learning outcomes:</p> <p>The student has mastered the basic requirements of writing a scientific text in compliance with the rules of academic ethics. The student knows the methods used in the field of study, is able to work on the chosen topic of the master's thesis at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. After a successful defence of the master's thesis, the student is able to design, implement, critically reflect, and justify his research intention. The student understands the context of the problem, can clearly define research conclusions, state his positions, and make recommendations. He can respond argumentatively and flexibly to questions about the research topic, its methodology, and its conclusions.</p>
<p>Class syllabus:</p> <ol style="list-style-type: none"> 1. The student presents the master's thesis in front of the committee for state exams, the opponent of the bachelor's thesis, and those present. 2. The student responds to the evaluations – comments and questions. 3. The student responds to the questions of the committee for state exams or the questions in a broader debate.

Educational activities: Type of activities: seminar Number of hours: per week: 4 per level/semester: 56 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Systematic preparation of the diploma thesis in accordance with the objectives set out in the thesis assignment and according to the individual schedule given to the graduate by supervisor; regular consultations with the thesis supervisor and acquainting the thesis supervisor with the progress on the agreed tasks, which include: study of literature on the thesis topic, submission of the thesis structure, research plan, if necessary modification, reporting the thesis supervisor with the research procedure, first and other results. The evaluation will be awarded to the graduate by the supervisor on the basis of meeting the individual conditions agreed at the beginning of the semester. Grading scale: A: 100% - 92% B: 91% - 84% C: 83% - 76% D: 75% - 68% E: 67% - 60% FX: 59% - 0% Scale of assessment (preliminary/final): 0/100	
Learning outcomes: After completing the course, the student knows the published domestic and foreign academic literature, or archival sources concerning the issues of the thesis, can analyze, interpret and critically evaluate them. The student has the knowledge and skills to process the theoretical part of his thesis. Practically manages theoretical preparation, methodology and research methods, can formulate a research problem, research questions and hypotheses. He/She has a research plan and first preliminary results and is able to process the obtained data, verify hypotheses and formulate conclusions.	
Class syllabus: 1. Defining the main and partial goals of the diploma thesis. 2. Information survey on the issue of diploma thesis.	

3. Analysis, interpretation and critique of academic literature, or historical sources and other information sources on the issue of the diploma thesis.
4. Continuous and consistent creation of citation apparatus for the diploma thesis.
5. Development of the structure of the diploma thesis in the context of its topic and requirements for the structure of the diploma thesis given by the internal quality system of Comenius University.
6. Terminological definition of the diploma thesis area.
7. Processing of the theoretical part of the diploma thesis.
8. Methodological definition of the topic: determination of the research problem, research questions, or variables and hypotheses, appropriate methods, procedures and research sample.

Learning outcomes: The aim of the course is to prepare students to conduct their own empirical research in the field of political science (or social sciences more generally). The course starts with foundational questions in the philosophy of social sciences and continues with familiarization of students with issues related to designing social scientific inquiry. These overarching topics are subsequently followed by introducing students to selected quantitative methods, their logic, their rationales and their use, as well as their limits. By the end, the students should have acquired necessary knowledge to write their own researchproposals and successfully conduct their own researchusing quantitative methods—from finding the research puzzle, through formulating research objectives and utilization of proper methods for data collection and analysis, to making correct conclusions. In addition, the course aims to enhance students’ abilities to read, understand and critically assess published social scientific research.	
Class syllabus: Introduction to the course: topics, requirements, rules and discussion. Designing social research. Basics of Social Science Research. Science and pseudoscience; types of research; research traditions in social sciences; induction and deduction; association and causality; concept formation. Data and datasets. Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester:	
Educational level: I., II.	
Prerequisites:	
Course requirements: Activity/Points: Active participation in the seminars 20 In-class presentation 60 Final written report 20 The condition for taking the final written exam is, in accordance with the provisions of the FiF UK Study Regulations, to achieve at least 60% of the interim assessment, i.e. min. 48 points within this course. A student who does not achieve at least 48 points from the interim assessment will be assessed in this course with a grade FX without the possibility of taking the final exam. In-class presentation: Each student has allocated slot of 15 minutes to present the topic related to migration. Content-wise, the presentation should focus on issue and present background information, supporting arguments and opposing arguments, declaring point of view taken by student (and explaining the reason for such stance). The evaluation takes into account the form of the presentation as well as the presentation (performance itself). Final written report: the student processes the topic that she/he addressed in the presentation into a research proposal. Detailed information about the content and form of the research proposal will be presented at the first meeting. Rating scale: A = 100-92, B = 91-84, C = 83-76, D = 75-68, E = 67-60, FX = 59-0 Scale of assessment (preliminary/final): 80/20	
Learning outcomes: This course is based on realized Erasmus+ program Strategic partnership project: "GlocalEAST - development of a new curriculum in the field of global migration, diaspora and border studies in the East and Central Europe." In this course we solve the complex and interconnected challenges of migration, diaspora and borders on the contemporary scene. The students will have a chance to learn basic theoretical approaches to the migration and to get deeper understanding of the phenomena through examining case studies from the CEE region.	
Class syllabus: <ul style="list-style-type: none"> • History of migration • International protection regime

Learning outcomes: The course reflects on politics and governance in autocratic regimes, not only in the past, but also current trends of political development in Europe and in the world. In this course, students will learn about approaches to defining, studying and analyzing of autocratic regimes. Current political development shows that autocratic (i.e. non-democratic) regimes remain to prove to be vital, particularly by acting as democracies, hence they organize elections, but in the context of „controlled“ political competition. Several new, as well as consolidated democracies face a variety of crises, which leads to weakening of democracy. The course will also address current developments in the countries of East and Central Europe, which despite expectations, caused by relatively successful political and economic transformation of former Soviet satellites (after the fall of iron curtain), and their speedy integration in the EU, have not led to stabilization, attractiveness and spreading of democracy around the world.	
Class syllabus:	

What Democracy is... and is not?; Non-democratic regimes and where to find them; Non-democratic Regimes and their classifications; Thinking about the stability of non-democratic regimes; Ideology and terror. Totalitarianism; Tradition and hierarchy. Monarchies, theocracies.; Elections and political parties. One-party regimes and competitive authoritarianism.

Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 7	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: - Presentation –One short (15-20 minutes with additional 5-10 minutes discussion) presentation should be given by each student during the course. 40% - Handout (notes)–summary notes are required from each student. The notes should be prepared according to the course schedule and given (in a printed form) to the lecturer and shared with other students. 10% - Seminar paper –8 to 12page paper (Times New Roman, 1.5 times spacing, without notes, references, tables and figures) is required on any of the topics in the course schedule (it could be focused more on a particular issue). The topic should be agreed by the course instructor. Try to avoid simple descriptions and write a paper focusing on sources of problems, comparisons of countries, systems, institutions etc. Asking questions, trying to answer them, arguing and drawing down conclusions is what is needed instead of just describing particular issues, policies, institutions (it does not mean a good description is not welcomed).50% Grading scale: A: 100% - 92% B: 91% - 84% C: 83% - 76% D: 75% - 68% E: 67% - 60% FX: 59% - 0% Scale of assessment (preliminary/final): 50/50	
Learning outcomes: The aim of the course is to examine the most important issues and challenges of public budgets and fiscal policies in the developed countries. How the large redistributive welfare systems (like pension and health-care systems) work? How labour markets are regulated and influenced by government policies?What are the most important challenges welfare systems and public budgets face? What about the current and possible future trends? We put a great emphasis on comparing various countries, socio-economic models, institutions, on best practices and on the study of	

reforms/possible reforms, which can help to make public finances and various sectoral policies and institutions more sustainable. We also try to improve the presentation and writing skills.
