STATE EXAM DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KMJL/A-muMA-220/15	Course title: Hungarian Language and Literature
Number of credits: 3	
Recommended semester: 3., 4..	
Educational level: II.	
Course requirements: The student can take the state exam a) after obtaining at least such number of credits that after obtaining credits for successful completion of state exams, they achieve the necessary number of credits for the proper completion of studies, b) after successful completion of compulsory subjects, compulsory elective subjects, and elective subjects in the composition determined by the study program, c) after fulfilling the student's obligations arising from § 71, par. 3 letter b of the Higher Education Act, d) if no disciplinary action is taken against them. Successful completion of the state exam is one of the conditions for successful completion of the study program. The subject of the state exam is evaluated by the committee for state exams using the grading scale A-FX. The evaluation of the state examination or its part is decided by the examination committee by consensus. If the examination committee does not reach a consensus, the evaluation of the state examination or its part is decided by voting. On the basis of the wording of the study regulations of the faculty (Internal Rules and Regulations 5/2020, Art. 15), the framework dates of state examinations are set by the dean in accordance with the faculty's academic schedule. Departments are obliged to publish the dates of their state exams on the website no later than 5 weeks before they take place. The student registers for the state exam through the academic information system (AIS) at least three weeks before it takes place. The student is entitled to one regular and two resit attempts of the state exam. The regular attempt is the one for which the student applied for the first time within the deadline set for state exams. If the student was evaluated with the FX mark on the regular attempt of the state exam, the student may take resits of the state exam a) on the following dates assigned for state examinations in the relevant academic year or b) on the dates assigned for state examinations in one of the following academic years in accordance with § 65, par. 2 of the Higher Education Act. If the student is unable to come on the day of the state exam for which they have registered on serious grounds, they are obliged to apologize in writing to the chairman of the examination committee in advance or no later than three working days after the date of the state examination or its part, if there were serious obstacles that prevented them to do so in advance. If the student does not attend the state examination or its part without an excuse within the specified period, or if the chairman of the examination committee does not accept their excuse, they are assessed with the FX grade from that attempt of the state exam. Scale of assessment (preliminary/final): 0/100	

Learning outcomes:

The student who passes the state exam has comprehensively mastered the issue of the state exam in the context of specified areas. The student has theoretical and practical skills based on the current state of information from the theory of knowledge organization and bibliometrics, as well as the ability to apply and use the skills creatively. He is able to apply the things he learned about knowledge organization and bibliometrics to interdisciplinary relationships, is able to think critically, offer solutions for the knowledge organization and bibliometrics problems, and use scientific arguments.

Number of credits: 5	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Antirequisites: FiF.KPol/A-boPO-001/22	
Course requirements: - Active participation in the seminar: participation in the seminar is graded, provided that the student is actively involved in the discussion and properly performs the seminar tasks. 10% - Continuous assignments: the aim of continuous assignments is to process the assigned task with the help of professional literature and through it to apply the knowledge of agreement in their own academic practice. The assignments are specified below (including submission deadlines). The deadlines for the elaboration of assignments are strictly given in advance. Assignments are submitted electronically via the Moodle platform. 25% - Written test: The aim of the written test is to test the knowledge of students acquired in the thematic areas of this course. Skills within the seminar part of the course will not be tested through a test. 25% - Final written exam: (hereinafter also exam) takes the form of written work and is key in this course. Through the elaboration of the thesis, the student demonstrates mastering not only the skills of academic writing, but also an understanding of basic political science concepts. The student is required to work critically and academically on a selected topic. The seminar paper must be processed in the range of 4 standard pages (1000 words, including spaces), while compliance with the formal requirements in its elaboration is considered a matter of course (non-compliance with them entitles the teacher to reject the thesis). 40% A: 100% - 92% B: 91% - 84% C: 83% - 76% D: 75% - 68% E: 67% - 60% FX: 59% - 0% Scale of assessment (preliminary/final): 60/40	
Learning outcomes: The course is intended for students of the Faculty of Arts, Comenius. The aim of the course is to introduce the most important concepts of political science and political analysis. Course evaluation consists of testing the acquired knowledge and academic skills. Upon successful completion of this course, students should be able to find answers to the following questions: What areas of current events is political science dealing with? By what means does it study these phenomena? How do we write about given phenomena in political science?

COURSE DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KFDF/A-moFI-161/22	Course title: Introduction into Quantum Theory 2
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Active participation in classes (max. 3 documented absences), preliminary knowledge test in the middle of the instruction period of the semester (max. number of points: 20), final written exam (max. number of points: 30). Total assessment: max. number of points: 50. (100-92% - A, 91-84% - B, 83-76 – C, 75-68 - D, 67-60 – E). Violation of academic ethics may result in the cancellation of the points scored in the relevant assessment item. Scale of assessment (preliminary/final): 100% preliminary	
Learning outcomes: After successfully completing the course, students have a deeper insight into the mathematical structure and the system of postulates of non-relativistic quantum mechanics. They understand the philosophical problems associated with the interpretation of quantum mechanics. They have the mathematical skills necessary to understand not only quantum mechanics, but also much of the exact sciences, and are therefore able to address questions of the philosophy of science at an advanced level.	
Class syllabus: 1. Postulates of quantum mechanics - introduction and comparison with classical mechanics. 2. Postulates of quantum mechanics - analysis of the main physical concepts. 3. Mathematical apparatus of quantum mechanics: Differential equations. 4. Mathematical apparatus of quantum mechanics: The basics of linear algebra. 5. Mathematical apparatus of quantum mechanics: Hilbert space. 6. Mathematical apparatus of quantum mechanics: Operators in quantum mechanics. 7. The generalised Heisenberg uncertainty relation. 8. Position and momentum representation of the state vector. Fourier transforms. 9. Problems of interpretation of quantum mechanics: The "measurement problem", quantum entanglement and the problem of locality. 10. Problems of interpretation of quantum mechanics: ontological/epistemological status of the wave function, wave-particle dualism, determinism vs indeterminism.

COURSE DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KMJL/A-muMA-472/00	Course title: Introduction into Sociolinguistics
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: a) during the semester (throughout) written tests (25%) and homework (25%) on a selected topic in sociolinguistics. b) in the examination period: examination (written part 20%, oral part 30%) The condition for admission to the examination is the achievement of at least 30% of the continuous evaluation. A violation of academic ethics will result in the cancellation of the points obtained in the respective item of the evaluation. Grading scale: A: 100% - 92% B: 91% - 84% C: 83% - 76% D: 75% - 68% E: 67% - 60% FX: 59% - 0%. Credit will not be awarded to a student who does not master 60% of the curriculum. The teacher will accept a maximum of 2 absences. The exact dates and topics for the continuous evaluation will be announced at the beginning of the semester. The exam dates will be published via AIS no later than the last week of the instruction period. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Upon the successful completion of the course, the students will have gained an overview of the most important areas of sociolinguistics, with a special regard to variational sociolinguistics. They will acquire an insight into language that will help them solve independently, without external help, the various linguistic problems they may encounter in the future. They will consider linguistic variability as a fundamental feature of language, something to be constantly reckoned with and a source of different possibilities for expression as well as for signalling one's own linguistic or	

other identity. They will also acquire knowledge that will help them understand the social context of linguistic change.

Class syllabus:

1. Introduction. The subject of sociolinguistics. Directions in sociolinguistics. Related disciplines. Basic elements of the sociolinguistic view of language. Structuralism and sociolinguistics. Issues of norm and language culture from the perspective of sociolinguistics.
2. General issues of language varieties. Registers, including within them stylistic varieties.
3. Other issues of stylistic varieties. Style varieties in the languages of the world. Diglossia. Qualilects.
4. Mediolects and specialized registers. The theory of linguistic accommodation. General intelligibility, the Plain Language Movement.
5. Dialects and the basic concepts related to them (idiolect, dialect, accent, genolect, ethnolect, chronlect). Issues of coiné varieties and standard.
6. The interlingual aspect of linguistic heterogeneity: the dialect continuum. Intercomprehension.
7. Standardization as a kind of language management.
8. Inherent variability: sociolinguistic variables and its types, prestige and stigmatized forms, etc. Basic issues of variational sociolinguistics.
9. Linguistic interlectuality and its interlingual dimension. Code-switching.
10. Systematicity of variability. The connection between social and stylistic stratification. Stereotypes, markers and indicators.
11. Sociolinguistics of language change. Basic issues of historical sociolinguistics. Modes of spread of language change. Social determinants of language change.
12. Other issues of language change. Language innovation and language change.

COURSE DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KLMV/A-AmoLO-26/22	Course title: Logical semantics
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 2 per level/semester: 14 / 28 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Continuous during the semester: active participation (20 points), home preparation (20 points); Final grade: summative test (60 points); Grading scale: A: 100-91 points; B: 90-81 points; C: 80-76 points; D: 75-70 points; E: 69-60 points; Fx: 59-0 points. Violation of academic ethics may result in the cancellation of the points earned in the respective grade item. Scale of assessment (preliminary/final): 40/60	
Learning outcomes: Students deepened their knowledge in the field of logical semantics, its principles, became familiar with linguistic phenomena that violate the principles of logical semantics and linguistic phenomena that distort these principles, and became familiar with the rules of creating and reconstructing compacted texts.	
Class syllabus: Traditional semantics: concept name versus concept; concept versus idea associated with concept name; concept content and scope, conceptual features, scope ratios of concepts. Principles of logical semantics (LS) for the analysis of natural language - p. effective communication, p. objectivity of the meaning of an expression, p. competent language user (practical mastery of the rules of language, basic ability to reason (logically), knowledge base - knowledge of the core lexis of the language, the range of analytical truths and empirical truths that are relevant to the text being analysed, p. p. of complete meaning, p. of compositionality (compositionality) of meaning, p. of predication and supposition de dicto and de re, Parmenides' (Frege's) principle of what a sentence is about, p. of substitutability (Leibniz's principle of salva veritate), p. of possibilism (anti-actualism). Theory of meaning (TM): extensional versus intensional TM; the de dicto and de re substitution of expressions; logical versus linguistic synonymy of expressions. Hyperintentional TM (epistemic and doxastic attitudes; types of contexts) and structuration of meanings of expressions - meaning of expression as a structured procedure. Interaction of logical operators and vectors of condition (and its facticity or irreality), time and relevance (factual, hypothetical and counterfactual conditionals; deductive and abductive predication and retrodiction). Violation of LS principles: idioms, metaphors, oxymorons, privative modifiers. Distortion of the validity of LS principles in condensed text: sentence elision (entymeme), word and phrase elision,	

intra-textual referencing; rules for the formation of elisions and references, and rules for the reconstruction of condensed and unconstrained texts.

STATE EXAM DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KAA/A-muAN-595/22	Course title: Master's Degree Thesis Defence
Number of credits: 10	
Educational level: II.	
Antirequisites: FiF.KAA/A-muAN-595/15	
Course requirements: All matters pertaining to state examination are set out in Article 14 of the Study Regulations of the Faculty of Arts. In the master's study programmes, the state examination consists only of the defence of the Master's thesis. The student chooses the department as a training centre which corresponds to the discipline within which he/she wants to write the final thesis. He/she reports this choice by the deadline set by the department, provided that he/she is able to find a supervisor and a suitable topic in the relevant department. For the successful defence of the Master's thesis as the subject of the state examination in the master's degree programmes conducted at the Department of British and American Studies, students will receive credits according to the current study plan (currently 10 credits). Requirements for the admission to the defence are as follows: - fulfillment of the requirements of the study plan concerning the prescribed composition of courses and their credit value so that after awarding the credits for the state examination the student obtains the required number of credits for the master's degree; - submission of the Master's thesis (electronically via the academic information system AIS) by the thesis submission deadline corresponding to the relevant state examination period according to the academic year schedule set by the faculty. The thesis is evaluated by the standard grading scale (0-59% -FX, 60-67% -E, 68-75% -D, 76-83% -C, 84-91% -B, 92-100% -A) by the supervisor of the thesis and the designated opponent in the assessment reports, which are available to the student no later than 3 working days before the state examination. The supervisor's report shall also include the percentage of compliance results from the originality check protocols (CRZP, Theses), which must be explicitly evaluated by the supervisor with the wording "the thesis shows/does not show signs of plagiarism". The Master's thesis will take the following form: The defence will consist of a thesis presentation (the student chooses the form of the defence, the PPT format can also be used) and the student's response to a broader theoretical question, which is assigned to the student by the supervisor upon the Master's thesis submission. The supervisor will include this question in the assessment report as one of the points of discussion for the defence; it will also be included in the defence report. The thesis presentation must: - Include a clearly articulated thesis statement, - have a clear and logical structure of argumentation and findings, - reflect a new perspective on the issue as a result of adequate and appropriate work with the findings gained through own research, the conclusions of which the student is able to present and formulate.	

The criteria for the evaluation (of the defence) of the Master's thesis at the Department of British and American Studies are as follows: - Quality of the Master's thesis (originality, significance of the analysis, clear formulation of the scientific problem and hypotheses under study, scope of the professional and scientific literature used), - the adequacy of the methodological approach to the topic under study, the analysis logically and coherently answers the research questions, - systematic and logical summary of the results of the analysis, - compliance with citation standards (MLA...), - language level of the presentation (academic language at least at B2 level), - quality of the presentation and communication skills. The evaluation of the thesis will include the areas below with the corresponding weighting (out of 100): PART A: CONTENT • Overall structure and organization (adequacy, scope, objectivity, coherence, cohesion) 15 • Theoretical knowledge related to the research topic 15 • Methodology (identifying concepts, research problems, aims, tasks, choosing adequate methods) 15 • Analysis (quality, depth, complexity) 15 • Originality and contribution (degree of originality, own contribution to knowledge) 10 PART B: FORM • Adequate work with information sources (extent, structure, reliability, adequacy, compliance with a citation style) 15 • Language and style 10 • Typography and layout 5 Scale of assessment (preliminary/final): 0/100 (%)
Learning outcomes: • Upon successful completion of the defence, students will be familiar with the basic requirements for academic writing and with the rules of academic integrity. • They will have mastered the theory of working with sources and have the skills to compile correct bibliographic entries. • They will have understood the principles of writing a Master's thesis, both in terms of form and content, as laid out by the university's regulations. • They will have understood the causes of plagiarism, they will be able to recognize its types and know how to avoid it. • They will have sufficient research skills to obtain, process, and interpret sources. • They will have mastered the basics for writing a Master's thesis. • They will have a deep knowledge of the thesis topic and will be able to approach it both critically and creatively.
Class syllabus: 1. The student presents the Master's thesis in front of the state examination committee, the supervisor and the opponent of the Master's thesis, and those present. 2. The student responds to the comments and questions in the assessments. 3. The student responds to the questions of the state examination committee or the questions in a broader debate. 4. A closed vote of the state examination committee on the evaluation of the Master's thesis defence. 5. Announcement of the evaluation (of the thesis defence) of the Master's thesis.

Course requirements: The student must submit the master's thesis within the deadline specified in the schedule of the current academic year for the relevant date of the state exam. The master's thesis is submitted in electronic form via AIS. The work must meet the parameters determined by the internal quality system of Comenius University. The provisions of Article 14 of Internal Regulation no. 5/2020 (Study Regulations of the Faculty of Arts of Comenius University) apply to the evaluation of the master's thesis. The supervisor of the final thesis and its opponent will prepare evaluations of the master's thesis and propose a grade in the A-FX grading scale, which the student receives a minimum of three working days before the defence. Grading scale: 0-59% -FX, 60-67% -E, 68-75% -D, 76-83% -C, 84-91% -B, 92-100% -A Master's thesis evaluation criteria: 1. The contribution of the master's thesis, the fulfilment of the objectives of the thesis in its assignment, and the requirements for the content of the master's thesis given by the internal quality system of Comenius University. It is assessed whether the student has worked on the chosen topic at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. Demonstration of the ability to work creatively in the study program is evaluated and the degree of demonstration of knowledge and understanding of the diploma thesis is reflected. 2. Originality of the work (master's thesis must not be plagiarized, must not infringe the copyrights of other authors); the documentation for the defence of the master's thesis also includes protocols of originality from the CRZP and Theses systems, to the results of which the thesis supervisor and the opponent express their opinions in their evaluations. 3. Correctness and accuracy of citation of used information sources, research results of other authors and group authors, correctness of the description of methods and working procedures of other authors or group authors. 4. Compliance of the structure of the master's thesis with the prescribed composition defined by the internal quality system of Comenius University. 5. Respecting the recommended length of the master's thesis (the recommended length of the master's thesis is usually 50 – 70 standard pages = 90,000 to 126,000 characters, including spaces), the adequacy of the length of the thesis is assessed by the thesis supervisor. 6. Linguistic and stylistic level of work and formal adjustments. The student orally presents the content, achieved goals, and conclusions of the master's thesis, and answers the questions and comments of the thesis supervisor, opponent, or members of the examination committee. The committee will comprehensively evaluate the quality of the master's thesis, assess the method and form of defence, and the student's ability to adequately respond to comments and questions from the evaluations of the thesis supervisor and the opponent. The	

student receives their final grade based on the average of the assessment of the thesis supervisor and opponent from their evaluations, and the assessment of the examination committee. Scale of assessment (preliminary/final): Scale of assessment (preliminary/final): 0/100
Learning outcomes: The student has mastered the basic requirements of writing a scientific text in compliance with the rules of academic ethics. The student knows the methods used in the field of study, is able to work on the chosen topic of the master's thesis at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. After a successful defence of the master's thesis, the student is able to design, implement, critically reflect, and justify his research intention. The student understands the context of the problem, can clearly define research conclusions, state his positions, and make recommendations. He can respond argumentatively and flexibly to questions about the research topic, its methodology, and its conclusions.
Class syllabus: 1. The student presents the master's thesis in front of the committee for state exams, the opponent of the bachelor's thesis, and those present. 2. The student responds to the evaluations – comments and questions. 3. The student responds to the questions of the committee for state exams or the questions in a broader debate.

STATE EXAM DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KMJL/A-muMA-595/22	Course title: Master's Degree Thesis Defence
Number of credits: 10	
Educational level: II.	
Course requirements: The student must submit the master's thesis within the deadline specified in the schedule of the current academic year for the relevant date of the state exam. The master's thesis is submitted in electronic form via AIS. The work must meet the parameters determined by the internal quality system of Comenius University. The provisions of Article 14 of Internal Regulation no. 5/2020 (Study Regulations of the Faculty of Arts of Comenius University) apply to the evaluation of the master's thesis. The supervisor of the final thesis and its opponent will prepare evaluations of the master's thesis and propose a grade in the A-FX grading scale, which the student receives a minimum of three working days before the defence. Grading scale: 0-59% -FX, 60-67% -E, 68-75% -D, 76-83% -C, 84-91% -B, 92-100% -A Master's thesis evaluation criteria: 1. The contribution of the master's thesis, the fulfilment of the objectives of the thesis in its assignment, and the requirements for the content of the master's thesis given by the internal quality system of Comenius University. It is assessed whether the student has worked on the chosen topic at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. Demonstration of the ability to work creatively in the study program is evaluated and the degree of demonstration of knowledge and understanding of the diploma thesis is reflected. 2. Originality of the work (master's thesis must not be plagiarized, must not infringe the copyrights of other authors); the documentation for the defence of the master's thesis also includes protocols of originality from the CRZP and Theses systems, to the results of which the thesis supervisor and the opponent express their opinions in their evaluations. 3. Correctness and accuracy of citation of used information sources, research results of other authors and group authors, correctness of the description of methods and working procedures of other authors or group authors. 4. Compliance of the structure of the master's thesis with the prescribed composition defined by the internal quality system of Comenius University. 5. Respecting the recommended length of the master's thesis (the recommended length of the master's thesis is usually 50 – 70 standard pages = 90,000 to 126,000 characters, including spaces), the adequacy of the length of the thesis is assessed by the thesis supervisor. 6. Linguistic and stylistic level of work and formal adjustments. The student orally presents the content, achieved goals, and conclusions of the master's thesis, and answers the questions and comments of the thesis supervisor, opponent, or members of the examination committee. The committee will comprehensively evaluate the quality of the master's thesis, assess the method and form of defence, and the student's ability to adequately respond to comments and questions from the evaluations of the thesis supervisor and the opponent. The	

student receives their final grade based on the average of the assessment of the thesis supervisor and opponent from their evaluations, and the assessment of the examination committee. Scale of assessment (preliminary/final): 0/100
Learning outcomes: The student has mastered the basic requirements of writing a scientific text in compliance with the rules of academic ethics. The student knows the methods used in the field of study, is able to work on the chosen topic of the master's thesis at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. After a successful defence of the master's thesis, the student is able to design, implement, critically reflect, and justify his research intention. The student understands the context of the problem, can clearly define research conclusions, state his positions, and make recommendations. He can respond argumentatively and flexibly to questions about the research topic, its methodology, and its conclusions.
Class syllabus: 1. The student presents the master's thesis in front of the committee for state exams, the opponent of the bachelor's thesis, and those present. 2. The student responds to the evaluations – comments and questions. 3. The student responds to the questions of the committee for state exams or the questions in a broader debate.

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KFDF/A-moFI-166/22	Course title: Mathematics in the History of Philosophy
Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Active participation in classes (max. 3 documented absences), preliminary knowledge test in the middle of the instruction period of the semester (max. number of points: 20), final written exam (max. number of points: 30). Total assessment: max. number of points: 50. (100-92% - A, 91-84% - B, 83-76 – C, 75-68 - D, 67-60 – E). Violation of academic ethics may result in the cancellation of the points scored in the relevant assessment item. Scale of assessment (preliminary/final): 100% preliminary	
Learning outcomes: After successfully completing the course, students have knowledge of significant events in the history of ancient and modern mathematics, which are closely related to philosophical thinking. They have a deeper understanding of the role of exact thinking in philosophy. They are able to apply and extend their mathematical skills (algebra, arithmetic, geometry, basics of differential calculus) using particular examples.	
Class syllabus: 1. The relationship between philosophy and mathematics in the history of philosophy. 2. Thales and the idea of mathematical proof. 3. Pythagoreans and the discovery of incommensurability. 4. Zeno's aporias (paradoxes). 5. Aristotle's solution of Zeno's aporia. 6. Zeno's aporias from the perspective of modern science. 7. Plato's philosophy of mathematics. Platonism in the philosophy of mathematics. 8. Aristotle's philosophy of mathematics. The problem of (mathematical) infinity. 9. Euclid's Elements as a model for mathematics and philosophy. 10. Descartes' analytic geometry as a model method. 11. Spinoza's ethics according to the model of geometry. 12. Leibniz as a mathematician. The discovery of infinitesimal calculus.

COURSE DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KFDF/A-moFI-007/22	Course title: Metaethics
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 1 per level/semester: 14 / 14 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II., III.	
Prerequisites:	
Course requirements: a) During the instruction period of the semester: during the instruction part of the semester, each student will give a presentation on one compulsory philosophical text of their choice, and in the penultimate week of the instruction part of the semester a test will be written. Students can score a maximum of 100 points for the test, the minimum for passing the course is 60 points. b) In the examination period there is an oral examination. Admission to the oral exam is subject to the submission of a presentation on the analysis of the philosophical text and successful passing of the test. Violation of academic ethics may result in the cancellation of the points scored in the relevant assessment item. Test grading scale: A: 100%-92%; B: 91%-84%; C: 83%-76%; D: 75%-68%; E: 67%-60% FX: 59%-0% The teacher will accept a maximum of two absences with documentation. The exact date of the preliminary assessment will be announced at the beginning of the semester. Dates of oral examination will be published via AIS no later than the last week of the instruction period. Scale of assessment (preliminary/final): preliminary 50%; final 50%	
Learning outcomes: After successfully completing the course, students have knowledge of basic metaethical problems and concepts (cognitivist and noncognitivist). They have knowledge of the main representatives of metaethical approaches and argumentation strategies in dealing with moral issues. Students can identify the fundamental problems of metaethics (dichotomy of facts and values / descriptions - prescriptions; naturalistic fallacy), can compare and critically evaluate the different positions. The acquired knowledge of metaethical theories can be used and applied in solving selected moral conflicts (euthanasia, abortion, the problem of health, etc.).

Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 28 / 28 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Antirequisites: FiF.KPg/A-muSZ-002/15	
Course requirements: The overall evaluation of the student will be given on the basis of the evaluation of their elaboration of the following tasks: during the teaching part of the course (continuously): - Elaboration of continuous tasks and assignments max. 30 b. - Continuous test of knowledge and skills max. 30 b. in the trial period (at the end): - Final test of knowledge and skills max. 40 b. TOTAL max. 100 points Ongoing evaluation: I. EQUIPMENT AND EXERCISES: Tasks and exercises will focus on the ability of students to apply the acquired theoretical knowledge in solving various tasks: finding a topic, research problem, formulation of research goals, research questions, which theories are most often confirmed in pedagogical research - refuted, deduction of theory towards determination of variables and formulation of hypotheses for quantitatively oriented research, research data collection procedures, used methods and tools of data collection, application of research data analysis procedures - scaling, observation sheets, open, axial coding, or thematic analysis on research data mediated by teachers . For the elaboration of tasks and exercises the student will be able to obtain a total of max. 30 points. II. INTERIM TEST: The continuous test will contain test items focused on the curriculum of the first 3 topics / chapters of the compulsory textbook, for which you can collectively obtain max. 30 points. The midterm test will be completed by the student in person or remotely (according to the current epidemiological situation) via the MS Forms application during the semester after taking over 4 topics. Final rating: III. FINAL TEST: The final test will contain test items focused on the subject matter of the next 4 topics + some items focused on the repetition of topics 1,2 and 3,4, for which you will be able to obtain a max. 40 points. A minimum of 50% success rate is required to successfully complete the course.	

CLASSIFICATION:

A - 91 - 100 (excellent - excellent results),

B - 90 - 81 (very good - above average standard),

C - 80 - 71 (good - normal reliable work),

D - 70 - 61 (satisfactory - acceptable results),

E - 60 - 51 (sufficient - the results meet the minimum criteria),

Fx - 50 - 0 (insufficient).

The teacher accepts max. 2 absences with proven documents.

The exact date of the mid-term evaluation will be announced at the beginning of the semester.

Exam dates will be published via AIS no later than the last week of the semester.

Weight of the mid-term / final evaluation: 70/30.

Scale of assessment (preliminary/final): = 70/30.

Learning outcomes:

Upon successful completion of the course, students know the basic methodological concepts, stages and principles of quantitative and qualitative pedagogical research. They have the skills needed to study and analyze scientific studies in pedagogy and understand the research of others. They are able to design their own educational research, research or action research of the teacher and implement an independent research effort. They have the ability to choose appropriate and meaningful research topics, deftly develop a research project, collect and empirically correct analysis of research data. They can then interpret, defend and publish research data meaningfully and creatively.

Class syllabus:

1. Pedagogical research - definition of basic terms: cognition, science in human cognition, scientific theory, research, pedagogical research, theory, practice, method, methodology. Relation of pedagogical research to practice (R&D). Research - action research - evaluation.

2. Planning, organization and implementation of field pedagogical research: Stages of research work. Research plan and diary of a pedagogical researcher. Research information preparation. Ethics in research work.

3. Thinking about a research problem: The difference between a topic and a research problem. Thinking and judgment of a researcher. Selecting the essential and distinguishing partial phenomena from the general background. Preparation of a research project.

4. Qualitative and qualitative research design: Comparison of qualitative and quantitative research, their philosophical background, goals, focus and procedures in the collection and processing of research data.

5. Qualitative oriented pedagogical research: Selected currents (branches) of qualitative research: Ethnography, Phenomenological analysis, Narrative and Dramaturgical approach, Conversational analysis. Qualitative research procedures. Terrain access. Research methods used in qualitative research. Quality standards of qualitative research.

6. Quantitative oriented pedagogical research and its main phases: Determining the research problem. Variables and hypotheses and their place in pedagogical research. Hypothesis testing in scientific research. Measurement and quantification in pedagogical research.

7. Determination of the selection of research data collection methods: research method, research tool, validity, reliability and correlation coefficient of the research tool. Selection, study and preparation, or creation of tools for collecting research data.

8. Methods of research data collection: Observation, questionnaire, assessment scales, interviews, tests of knowledge and skills, sociometry, semantic differential and pedagogical experiment

9. Processing of obtained research data: Preparation for analysis, Analysis and interpretation of obtained research data (verbal or numerical). Discussion of research conclusions. Making recommendations for practice.

STATE EXAM DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KFDF/A-muFI-501/22	Course title: Methodology of Philosophy
Number of credits: 3	
Educational level: II.	
Course requirements: The students can take the state exam a) After obtaining at least such number of credits that after obtaining credits for successful completion of state exams, they achieve the necessary number of credits for the proper completion of studies, b) After successful completion of compulsory subjects, compulsory elective subjects, and elective subjects in the composition determined by the study program, c) After fulfilling the student's obligations arising from § 71, par. 3 letter b of the Higher Education Act, d) If no disciplinary action is taken against them. Successful completion of the state exam is one of the conditions for successful completion of the study program. The subject of the state exam is evaluated by the committee for state exams using the grading scale A-FX. The evaluation of the state exam or its part is decided by the exam committee by consensus. If the exam committee does not reach a consensus, the evaluation of the state examination or its part is decided by voting. On the basis of the wording of the study regulations of the faculty (Internal Rules and Regulations 5/2020, Art. 15), the framework dates of state exams are set by the dean in accordance with the faculty's academic schedule. Departments are obliged to publish the dates of their state exams on the website no later than 5 weeks before they take place. The student registers for the state exam through the academic information system (AIS) at least three weeks before it takes place. The student is entitled to one regular and two resit attempts of the state exam. The regular attempt is the one for which the student applied for the first time within the deadline set for state exams. If the student was evaluated with the FX mark on the regular attempt of the state exam, the student may take resits of the state exam a) on the following dates assigned for state exams in the relevant academic year, or b) on the dates assigned for state exams in one of the following academic years in accordance with § 65, par. 2 of the Higher Education Act. If the student is unable to come on the day of the state exam for which they have registered on serious grounds, they are obliged to apologize in writing to the chairman of the exam committee in advance or no later than three working days after the date of the state exam or its part, if there were serious obstacles that prevented them to do so in advance. If the student does not attend the state exam or its part without an excuse within the specified period, or if the chairman of the exam committee does not accept their excuse, they are assessed with the FX grade from that attempt of the state exam. Scale of assessment (preliminary/final): 0%/100%	
Learning outcomes: After successfully passing the state final examination in the subject Didactics of Philosophy, students have adequate theoretical knowledge in the field of didactics of philosophy, as well	

as practical skills in conceiving, conducting and organizing a teaching lesson in philosophy at secondary school. On the basis of an oral answer to one selected question, consisting of two sub-questions from the subject Didactics of Philosophy (one question concerning theoretical knowledge would use in the design of a model lesson in the teaching of philosophy), the student demonstrates the ability to interpret and practically demonstrate the acquired knowledge on the subject, as well as to respond promptly in the course of the discussion to the questions raised.

Class syllabus:

1. The student arrives on the registered date of the state exam according to the schedule set by the department.
2. The student receives a question from the subject of the state exam, which is submitted in writing and anonymously in the form of a random selection from printed questions or a generator.
3. The exam committee will provide the student with reasonable time to prepare an oral answer to the question.
4. The student presents the prepared answer to the question in front of the exam committee and answers the additional questions.
5. After the student finishes their answer, the exam committee decides on the results of the state exam in a closed session of the exam committee.

State exam syllabus:

Thematic areas:

Learning outcomes: After successfully completing the course, students have knowledge of the basic concepts of set theory, the historical context of the origin of set theory, and the mathematical and philosophical problems associated with some of the key concepts and axioms of set theory. They are able to handle set concepts and practically provide elementary proofs, which allows them to better understand the emergence of analytic philosophy at the beginning of the 20th century and thus has built a more professional foundation for pursuing a deeper study of the philosophy of mathematics.	
Class syllabus: 1. The position of set theory in mathematics. Set theory as the “foundation of mathematics” 2. The concept of sets: The first definitions of set in B. Bolzano, G. Cantor and R. Dedekind. 3. The “naive” understanding of a set and the implicit definition of a set through axioms. 4. Zermel's axiomatisation of set theory. 5. The concept of infinity and infinite set: Potential and actual infinity in mathematics. 6. George Cantor's understanding of the infinite (finite - transfinite - absolutely infinite; transfinite ordinal and cardinal numbers). 7. Cantor's theorem. Dedekind's definition of an infinite set. 8. Proofs of the existence of an infinite set (Bolzano, Dedekind, Russell). 9. The axiom of infinity in the Zermel-Fraenkel set theory. 10. Problems at the origin of set theory: The origin of Russell's paradox from Cantor's theorem. First attempts to overcome paradoxes. 11. The most controversial axiom of set theory: The “axiom of selection” (AC).	

12. Contemporary philosophical issues in set theory.

STATE EXAM DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KFDF/A-muFI-502/24	Course title: Philosophy
Number of credits: 3	
Educational level: II.	
Course requirements: The students can take the state exam: a) After obtaining at least such number of credits that after obtaining credits for successful completion of state exams, they achieve the necessary number of credits for the proper completion of studies, b) After successfully completing the compulsory subjects, compulsory elective subjects, and elective subjects in the composition determined by the study program, c) After fulfilling the student's obligations arising from § 71, par. 3 letter b of the Higher Education Act, d) If no disciplinary action is taken against them. Successful completion of the state exam is one of the conditions for successful completion of the study program. The subject of the state exam is evaluated by the committee for state exams using the grading scale A-FX. The evaluation of the state exam or its part is decided by the exam committee by consensus. If the exam committee does not reach a consensus, the evaluation of the state examination or its part is decided by voting. On the basis of the wording of the study regulations of the faculty (Internal Rules and Regulations 5/2020, Art. 15), the framework dates of state exams are set by the dean in accordance with the faculty's academic schedule. Departments are obliged to publish the dates of their state exams on the website no later than 5 weeks before they take place. The student registers for the state exam through the academic information system (AIS) at least three weeks before it takes place. The student is entitled to one regular and two resit attempts of the state exam. The regular attempt is the one for which the student applied for the first time within the deadline set for state exams. If the student was evaluated with the FX mark on the regular attempt of the state exam, the student may take resits of the state exam a) On the following dates assigned for state exams in the relevant academic year, or b) On the dates assigned for state exams in one of the following academic years in accordance with § 65, par. 2 of the Higher Education Act. If the student is unable to come on the day of the state exam for which they have registered on serious grounds, they are obliged to apologize in writing to the chairman of the exam committee in advance or no later than three working days after the date of the state exam or its part, if there were serious obstacles that prevented them to do so in advance. If the student does not attend the state exam or its part without an excuse within the specified period, or if the chairman of the exam committee does not accept their excuse, they are assessed with the FX grade from that attempt of the state exam. Scale of assessment (preliminary/final): 0%/100%	
Learning outcomes: In the final state examination in the subject Philosophy, the students demonstrate adequate knowledge of the history of philosophy (history of philosophy of the 20th century), as well as	

of the profile, compulsory elective and elective subjects. On the basis of an oral answer to two selected questions from the subject Philosophy (one question from the history of philosophy and the other from systematic philosophy), the students demonstrate the ability to interpret the acquired knowledge on a given issue, as well as respond promptly in the discussion to the questions raised.

Class syllabus:

1. The student arrives on the registered date of the state exam according to the schedule set by the department.
 2. The student receives a question from the subject of the state exam, which is submitted in writing and anonymously in the form of a random selection from printed questions or a generator.
 3. The exam committee will provide the student with reasonable time to prepare an oral answer to the question.
 4. The student presents the prepared answer to the question in front of the exam committee and answers the additional questions.
 5. After the student finishes their answer, the exam committee decides on the results of the state exam in a closed session of the exam committee.
- The course of the state exam and the announcement of its results are public.

State exam syllabus:

Thematic areas: History of Philosophy:

1. Phenomenological method, the phenomenological understanding of consciousness and intentionality, and the phenomenological critique of naturalism and historicism (Husserl, Heidegger).
2. Existentialism and its view of the authentic form of the life of the human individual and the philosophical approach to existence and being. The issue of freedom and the meaning of human existence (Sartre, Jaspers).
3. Heidegger's philosophy of being and his analysis of the structures of human existence. The concept of the existential and ontological differentiation.
4. Theory of knowledge and understanding of truth and science in classical pragmatism (Peirce, James, Dewey).
5. Critical theory of the Frankfurt School: neo-Marxist critique of Western civilization and the theory of communicative rationality (Horkheimer, Adorno, Habermas).
6. Radical critique of metaphysics and different conceptions of metaphysics in 20th century philosophy (logical positivism, Heidegger, pragmatism, Frankfurt School, Derrida).
7. The notion of structure and the basic features of the structural method in French structuralist and post-structuralist philosophy (Lévi-Strauss, Foucault, Barthes, Althusser).
8. The turn to language and the role of modern logic in early analytic philosophy (Frege, Russell, Wittgenstein). Conceptual analysis as a method of philosophy. Fregean semantics.
9. The concept of philosophy and the philosophy of science in logical positivism and logical empiricism (Vienna Circle, Berlin Society for Empirical Philosophy).
10. Philosophical reflection on the postmodern situation in society and science (Lyotard). Deconstructive reading of texts as a way of philosophizing (Derrida)

Social and ethical problems of science:

1. The social turn in the philosophy of science, its assumptions and consequences
2. Values in science and the problem of value neutrality of scientific knowledge
3. Feminist epistemology and the problem of the social nature of scientific knowledge

The student will be admitted to the test only with a minimum of 10 points from paper. Grading scale: A: 100-92, B: 91-84, C: 83–76, D: 75-68, E: 67-60, FX: 59-0. FX. The exact date for the test and the topics of the paper will be announced at the beginning of the semester. The teacher will accept a maximum of two absences with documentation. Violation of academic ethics may result in the cancellation of the points scored in the relevant assessment item. Scale of assessment (preliminary/final): 100% preliminary	
Learning outcomes: After successfully completing the course, students will know how universal determinism and at the same time the freedom of the sage can be admitted within the Stoic system. They understand the integral connection of the three parts of Stoic philosophy (physics, logic, ethics). They are able to address the dilemma of determinism and freedom on the ground of other philosophical conceptions as well, and not only in antiquity.	
Class syllabus: 1. Hellenism - period, culture, philosophy, Hellenistic schools and their character, the position of Stoicism as a dogmatic school. 2. Stoic physics of the elements: an integrated Stoic universe. Difference between to holon and to pan. Active and passive elements. 3. Stoic psychology: Integration function of the pneuma, its tension and degrees. 4. The doctrine of the Logos, fate, providence and God. The degree of dynamism and autonomy of the pneuma is determined by its fire element. 5. The place of the man-sage in the cosmos in terms of the quality of his soul. 6. Stoic epistemology: imagination (fantasy), instinct, assent, catalepsy, knowledge, division of fantasies according to origin and cognitive relevance. 7. Stoic theory of causes. Stoic cause as something physical. The blending of Stoic and Peripatetic theories of causes.	

8. Stoic theory of division and hierarchisation of causes. Practical examples from life.
9. Stoic theory of free decision and action: degrees of autonomy of the pneuma, freedom as the possibility of independent action, the Stoic sage - is he really free?
10. Modal categories in the Stoic conception of freedom: fate, necessity, chance, possibility, freedom.
11. Stoic ethics, the problem of bliss and Stoic ataraxia, mean and perfect duties.
12. The problem of indifferent things, their articulation and revision of approaches, virtue as a rational disposition, three definitions of Stoic virtue, final connection with the understanding of freedom.

Prerequisites:	
Recommended prerequisites: KAA/A-muAN-301/22 English Language Teaching Methodology 1	
Antirequisites: FiF.KAA/A-muAN-590/15	
Course requirements: 60% Observing all 10 lessons & participating in discussions with the mentor teacher 10% Completed observation worksheets 5% Updated EPOSTL (Context & Methodology) 25% Reflection paper Marking scale: A – 92 to 100% B – 84 to 91% C – 76 to 83% D – 69 to 75% E – 60 to 68% FX (fail, no credits awarded) < 60%. All ten (10) observations and sessions with the mentor teacher must be undertaken to pass. Scale of assessment (preliminary/final): Assessment is 100% coursework.	
Learning outcomes: While visiting local schools and observing lessons with a mentor teacher, students do the following: 1. become familiar with the duties and obligations of being a schoolteacher 2. receive pedagogical insight into lesson planning and implementation 3. analyze how teachers teach and learners learn 4. evaluate and reflect on all aspects of the teaching they observe, i.e., content, delivery, preparedness, classroom management, instructions, etc. 5. reflect on what they observe as it relates to their own strengths and weaknesses as a student teacher 6. discuss what they have observed with their peers and the mentor teacher, training constructive criticism and feedback skills	

Class syllabus:

Students (in groups of 3 according to their study program) are initiated into the school environment by a mentor teacher at a local lower or upper secondary school.

They observe 10 lessons taught by that mentor teacher (or various teachers at that school).

They receive insight into lesson planning and implementation from the mentor teacher.

They provide feedback on those lessons and discuss what they learn with both the mentor teacher and within their groups.

Each completes an online observation worksheet for each lesson and, after observing all 10 lessons, writes about the experience in a reflection paper.

STATE EXAM DESCRIPTION

Academic year: 2024/2025	
University: Comenius University Bratislava	
Faculty: Faculty of Arts	
Course ID: FiF.KPg/A-muPE-595/22	Course title: Thesis defence (state examination subject)
Number of credits: 10	
Educational level: II.	
Antirequisites: FiF.KPg/A-muPE-595/15	
Course requirements: The student must submit the master's thesis within the deadline specified in the schedule of the current academic year for the relevant date of the state exam. The master's thesis is submitted in electronic form via AIS. The work must meet the parameters determined by the internal quality system of Comenius University. The provisions of Article 14 of Internal Regulation no. 5/2020 (Study Regulations of the Faculty of Arts of Comenius University) apply to the evaluation of the master's thesis. The supervisor of the final thesis and its opponent will prepare evaluations of the master's thesis and propose a grade in the A-FX grading scale, which the student receives a minimum of three working days before the defence. Grading scale: 0-59% -FX, 60-67% -E, 68-75% -D, 76-83% -C, 84-91% -B, 92-100% -A Master's thesis evaluation criteria: 1. The contribution of the master's thesis, the fulfilment of the objectives of the thesis in its assignment, and the requirements for the content of the master's thesis given by the internal quality system of Comenius University. It is assessed whether the student has worked on the chosen topic at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. Demonstration of the ability to work creatively in the study program is evaluated and the degree of demonstration of knowledge and understanding of the diploma thesis is reflected. 2. Originality of the work (master's thesis must not be plagiarized, must not infringe the copyrights of other authors); the documentation for the defence of the master's thesis also includes protocols of originality from the CRZP and Theses systems, to the results of which the thesis supervisor and the opponent express their opinions in their evaluations. 3. Correctness and accuracy of citation of used information sources, research results of other authors and group authors, correctness of the description of methods and working procedures of other authors or group authors. 4. Compliance of the structure of the master's thesis with the prescribed composition defined by the internal quality system of Comenius University. 5. Respecting the recommended length of the master's thesis (the recommended length of the master's thesis is usually 50 – 70 standard pages = 90,000 to 126,000 characters, including spaces), the adequacy of the length of the thesis is assessed by the thesis supervisor. 6. Linguistic and stylistic level of work and formal adjustments. The student orally presents the content, achieved goals, and conclusions of the master's thesis, and answers the questions and comments of the thesis supervisor, opponent, or members of the examination committee. The committee will comprehensively evaluate the quality of the master's thesis, assess the method and form of defence, and the student's ability to adequately respond	

to comments and questions from the evaluations of the thesis supervisor and the opponent. The student receives their final grade based on the average of the assessment of the thesis supervisor and opponent from their evaluations, and the assessment of the examination committee. Scale of assessment (preliminary/final): 0/100
Learning outcomes: The student has mastered the basic requirements of writing a scientific text in compliance with the rules of academic ethics. The student knows the methods used in the field of study, is able to work on the chosen topic of the master's thesis at the level of scientific study, with a representative selection of scientific literature, with appropriately chosen scientific procedures and hypotheses that can be verified. After a successful defence of the master's thesis, the student is able to design, implement, critically reflect, and justify his research intention. The student understands the context of the problem, can clearly define research conclusions, state his positions, and make recommendations. He can respond argumentatively and flexibly to questions about the research topic, its methodology, and its conclusions.
Class syllabus: 1. The student presents the master's thesis in front of the committee for state exams, the opponent of the bachelor's thesis, and those present. 2. The student responds to the evaluations – comments and questions. 3. The student responds to the questions of the committee for state exams or the questions in a broader debate.
