TABLE OF CONTENTS

1. 2-AINa-137/20	Artificial Intelligence.....	3
2. 2-MXX-133/23	Artificial Intelligence for Everyone.....	4
3. 2-IKVa-195/23	Cognitive Anthropology.....	5
4. 2-IKVa-191/19	Cognitive Biology.....	7
5. 2-IKVa-956/18	Cognitive Phenomena (state exam).....	9
6. 2-IKVa-113/18	Cognitive Psychology.....	10
7. 2-IKVa-187/18	Cognitive Science Seminar.....	12
8. 2-IKV-190/16	Cognitive Science and Artificial Intelligence Seminar.....	13
9. 2-IKVa-232/19	Cognitive Semantics and Cognitive Theory of Representation.....	14
10. 2-IKVa-136/18	Computational Cognitive Neuroscience.....	15
11. 2-IKV-188/16	Computational Neuroscience.....	17
12. 2-IKVa-239/22	Deep Learning and Cognition.....	19
13. 2-ERAA-010/19	Elective Mobility Course.....	21
14. 2-MXX-130/21	Elements of AI.....	22
15. 2-MXX-130/21	Elements of AI.....	24
16. 2-IKVa-116/18	Empirical Research Methodology.....	26
17. 1-MXX-233/13	English Conversation Course (1).....	28
18. 1-MXX-234/13	English Conversation Course (2).....	30
19. 1-MXX-141/00	French Language (1).....	32
20. 1-MXX-142/00	French Language (2).....	33
21. 1-MXX-241/00	French Language (3).....	34
22. 1-MXX-242/00	French Language (4).....	35
23. 2-IKVa-105/20	Fundamentals of Programming.....	36
24. 1-MXX-151/00	German Language (1).....	37
25. 1-MXX-152/00	German Language (2).....	38
26. 1-MXX-251/00	German Language (3).....	39
27. 1-MXX-252/00	German Language (4).....	40
28. 2-IKVa-236/19	Grounded Cognition.....	41
29. 2-IKVa-139/25	Human and Machine Vision.....	43
30. 2-MXX-131/21	International Team-based Research Project.....	44
31. 2-IKVa-121/18	Introduction to Cognitive Science.....	46
32. 2-IKVa-115/18	Introduction to Computational Intelligence.....	48
33. 2-IKVa-123/18	Introduction to Neuroscience.....	50
34. 2-IKVa-114/18	Introduction to Philosophy of Mind.....	52
35. 2-IKVa-111/18	Introduction to Psychology.....	54
36. 2-IKVa-138/18	Introduction to Robotics.....	56
37. 2-IKVa-991/18	Master's Thesis (state exam).....	58
38. 2-IKVa-921/22	Master's Thesis Seminar.....	59
39. 2-IKVa-267/18	Mathematical Logic for Cognitive Science.....	61
40. 2-IKVa-102/20	Mathematics for Cognitive Science.....	62
41. 2-ERAA-001/19	Mobility Project I.....	64
42. 2-ERAA-002/19	Mobility Project II.....	65
43. 2-ERAA-003/19	Mobility Project III.....	66
44. 2-IKVa-137/18	Modern Methods in Brain Research.....	67
45. 2-IKV-189/16	Natural Language Processing.....	69
46. 2-ERAA-004/19	New Trends in Cognitive Science.....	71
47. 2-AIN-286/22	Ontologies and Knowledge Engineering.....	72

48. 2-MXX-132/23	Participation in Empirical Research.....	74
49. 2-MXX-132/23	Participation in Empirical Research.....	75
50. 2-IKV-238/15	Philosophy of Artificial Intelligence.....	76
51. 2-MXX-110/00	Physical Education and Sport (1).....	77
52. 2-MXX-120/00	Physical Education and Sport (2).....	78
53. 2-MXX-210/00	Physical Education and Sport (3).....	79
54. 2-MXX-220/00	Physical Education and Sport (4).....	80
55. 2-IKV-167/00	Practical Classes in Robotics.....	81
56. 2-IKV-194/21	Reinforcement Learning.....	83
57. 1-MXX-161/00	Russian Language (1).....	85
58. 1-MXX-162/00	Russian Language (2).....	86
59. 1-MXX-261/00	Russian Language (3).....	87
60. 1-MXX-262/00	Russian Language (4).....	88
61. 2-IKV-192/19	Science, Technology and Humanity: Opportunities and Risks.....	89
62. 2-IKV-122/18	Semester Project.....	91
63. 1-MXX-171/20	Slovak Language for Foreign Students (1).....	92
64. 1-MXX-172/20	Slovak Language for Foreign Students (2).....	93
65. 1-MXX-271/20	Slovak Language for Foreign Students (3).....	94
66. 1-MXX-272/20	Slovak Language for Foreign Students (4).....	95
67. 2-IKV-184/19	Social Cognition.....	96
68. 2-ERAA-005/19	Special Topic of Interest Module I.....	98
69. 2-ERAA-006/19	Special Topic of Interest Module II.....	99
70. 2-MXX-115/17	Sports in Natur (1).....	100
71. 2-MXX-116/18	Sports in Natur (2).....	102
72. 2-AINa-111/20	Web Technologies and Methodology.....	104

COURSE DESCRIPTION

Academic year: 2025/2026					
University: Comenius University Bratislava					
Faculty: Faculty of Mathematics, Physics and Informatics					
Course ID: FMFI.KAI/2-AINa-137/20		Course title: Artificial Intelligence			
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning					
Number of credits: 6					
Recommended semester: 2.					
Educational level: II.					
Prerequisites:					
Antirequisites: FMFI.KAI/2-AIN-137/15

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-195/23	Course title: Cognitive Anthropology
Educational activities: Type of activities: seminar Number of hours: per week: 3 per level/semester: 39 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: N/A	
Course requirements: Semester evaluation - weekly activities Final evaluation - essay or project Scale of assessment (preliminary/final): 30 % / 70 %	
Learning outcomes: The course aims to provide students an introductory understanding of cognitive anthropology, its methods, and its relevance in fields of Cognitive science. Through a combination of theoretical knowledge and case studies, students will gain insights into the researched processes that shape human cultures and societies. The course is designed to provide students with systematic knowledge in the field of cognitive anthropology. It focuses on the historical development of tools and methods, key theories, and methodological approaches relevant to the discipline. Students will engage with the interdisciplinary relationships of cognitive anthropology with other scientific fields such as psychology, linguistics, and neuroscience.	
Class syllabus: Class syllabus: 1. Introduction to Anthropology Definition and scope of Anthropology, Brief history of Anthropology, Main branches of Anthropology, Introduction to Cognitive Anthropology 2. Evolution of Anthropological Methods Early anthropological methods, Participant observation and ethnography, Structured and unstructured Interviews. 3. Quantitative and Qualitative Methods in Anthropology Differences in the use of quantitative and qualitative methods, Statistical analysis in Anthropology, Case studies and narrative analysis. 4. Contemporary Anthropological Methods Use of technical tools in anthropological research, Digital ethnography and online research methods, Visual Anthropology. 5. Ethical Aspects in Anthropological Research Credibility and transparency in research, Ethical dilemmas in fieldwork, The role of the anthropologist: objectivity and engagement.	

6. The Future of Anthropological Methods Interdisciplinary approaches in Anthropology, The role of big data in anthropological research.
7. Differences in Cognitive Anthropology Definition and scope of Cognitive Anthropology, Brief history and reasons for development, Key concepts in Cognitive Anthropology.
8. Culture and Cognition The concept of culture in Cognitive Anthropology, the influence of culture on cognition, Case studies of differences between cultures (innate and learned).
9. Language and Cognition The relationship between language and thought, Linguistic relativity and determinism, The role of language in shaping social cognition.
10. Cognitive Anthropology and Theories of Evolution The evolution of human cognition, Cognitive adaptations and human evolution, The role of culture in human evolution, Dual inheritance theory.
11. Cognitive Anthropology and Technology Culture and technology, Technology as an independent component of culture influencing human development.
12. The Future of Cognitive Approaches to the Study of Cultures Beyond relativism - new trends in Cognitive Anthropology, Cognitive Anthropology and artificial intelligence, Interdisciplinary approaches in Cognitive Anthropology.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-191/19	Course title: Cognitive Biology
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Three assignments, each for max. 25 points (minimum 10 required), active involvement during course / discussion, max. 25 points (min. 20 required). Course total = 100 points (min. 51 required) Scale of assessment (preliminary/final): 75:25	
Learning outcomes: This course provides a comprehensive overview of principles of cognition, seen as a natural biological phenomenon. The main objective is the formulation of substantiated interrelation of cognition and evolution. The interdisciplinarity of research in cognitive biology requires students to think multi-disciplinary and on multiple scales.	
Class syllabus: 1. A Brief History of Cognitive Biology 2. The Underlying Principles of Cognitive Biology: 3. The Basal Level of Cognition: Molecular Mechanisms, Concept of Information; Biosemiotics 4. The Medial Level of Cognition: Cellular Communication, Neural Networks; 5. The Apical Level of Cognition: Organismal Behavior; "Rationality"; Goal-directedness; Emotions; Mechanisms for Learning & Memory; Brain Modularity; 6. The Ontic Level of Cognition: Developmental Processes I: Developmental Genetics; Gene Regulatory Networks; Epigenetic Landscape; 7. The Ontic Level of Cognition: Developmental Processes II: Generative Entrenchment & Ratchet Effects; Developmental Constraints; Hierarchical Processing 8. The Supra-Individual Level of Cognition: From Eliminative Reductionism to Organicism; Social Cognition; Evolution of Complex Systems; 9. Resumé & Outlook

STATE EXAM DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-956/18	Course title: Cognitive Phenomena
Number of credits: 2	
Educational level: II.	
Learning outcomes: The student will become familiar with connections between pieces of knowledge within individual disciplines in the context of selected cognitive phenomena.	
Class syllabus: The course lists a number of cognitive phenomena, that can be looked from the perspective of psychology, computation and neuroscience.	
State exam syllabus: Perception Attention Memory Language Mental representations Learning Embodiment Emotions Social cognition Consciousness	
Recommended literature: Study materials from relevant courses of the program curriculum and various sources to individuals questions, will be provided at course website.	
Last change: 11.05.2021	
Approved by: prof. Ing. Igor Farkaš, Dr.	

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-113/18	Course title: Cognitive Psychology
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Seminar project 30% (includes a demonstration and/or practical exercise) Seminar reading 10% (empirical paper from cognitive psychology) Midterm test 20% Final test 40% Active participation +/- 10% Scale of assessment (preliminary/final): During course: midterm and two seminar projects (30+10+20) = 60% Examination period: final exam 40%.	
Learning outcomes: In this course, students of cognitive science will be introduced to the field of cognitive psychology, including topics pertaining to perception, attention, memory and other higher-order cognitive processes. Neurobiological underpinnings of such cognitive phenomena and processes will be provided to facilitate the interdisciplinary understanding of human cognition. Students will learn to work independently (and in groups), assess scientific articles and search in scientific databases, critically read theoretical and empirical papers, review scientific sources, and present topics of their interest.	
Class syllabus: [1] Sensation & Perception [2] Attention [3] Short-term memory [4] Working memory and Executive functioning [5] Long-term memory (Episodic, Semantic) [6] Mental representation [7] Language [8] Cognition & Emotion [9] Thinking & Reasoning	
Recommended literature: Cognitive Psychology (Sternberg, 2012)

COURSE DESCRIPTION

Academic year: 2025/2026					
University: Comenius University Bratislava					
Faculty: Faculty of Mathematics, Physics and Informatics					
Course ID: FMFI.KAI/2-IKV a-187/18		Course title: Cognitive Science Seminar			
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 1 / 1 per level/semester: 13 / 13 Form of the course: on-site learning					
Number of credits: 2					
Recommended semester: 1.					
Educational level: II.					
Prerequisites:					
Recommended prerequisites: None.					
Course requirements: Active participation in lectures (50%), writing two reflections (50%). Scale of assessment (preliminary/final): Grading: 91-100% = A, 81-90% = B, 71-80% = C, 61-70% = D, 51-60% = E, else Fx.					
Learning outcomes: After the course, the students will have acquired knowledge about cognitive science related research topics in our area, which could help them decide for a topic for their semester project (2nd semester), and/or master thesis (4th semester).					
Class syllabus: The seminar consists of a series of lectures by experts, on cognitive science related research topics. The students choose two topics for which they write a critical reflection.

Academic year: 2025/2026					
University: Comenius University Bratislava					
Faculty: Faculty of Mathematics, Physics and Informatics					
Course ID: FMFI.KAI/2-IKVa-232/19		Course title: Cognitive Semantics and Cognitive Theory of Representation			
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning					
Number of credits: 5					
Recommended semester: 3.					
Educational level: II.					
Prerequisites:					
Course requirements: During semester: reading assignments, discussions in the class, discussion moderation, peer activity (80%) Final: written integration reflection (20%) Scale of assessment (preliminary/final): 80%/20%					
Learning outcomes: Students will gain knowledge of existing theories and conceptual apparatus for analysing meaning and understanding in animals, humans and artificial systems.					
Class syllabus: The goal of the course is to formulate questions and provide views from literature helping to understand how cognitive systems manipulate with meanings. Also, to present cognitive theories of representation bridging the gaps between brain, language and culture.					
Recommended literature: Papers will be provided on the course webpage.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-136/18	Course title: Computational Cognitive Neuroscience
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Each student gives 2 presentations - one during one of the lectures and one during one of the labs. The lecture presentation is based on a scientific paper related to the lecture topic. The lab presentation is related to the particular lab exercise. Students choose topics and dates of their presentations at the beginning of the course. There is also a computational project, usually due by the end of a semester. The final written exam is compulsory. Scale of assessment (preliminary/final): Each of the 2 presentation is worth max. 20%, a project is worth 20% max, total 60%. Final written exam 40% max. Evaluation scale: A 91 – 100 %, B 81 – 90 %, C 73 – 80 %, D 66 – 72 %, E 60 – 65 %, Fx < 60%	
Learning outcomes: After passing this course, students will be familiar with the main theories and approaches of Computational cognitive neuroscience. They will gain an insight of how cognitive processes are affected and controlled by neural circuits in the brain. Students will become familiar with modeling of some basic mechanisms of cognitive functions using the Emergent simulator.	
Class syllabus: <ol style="list-style-type: none"> 1. Introduction to computational cognitive neuroscience. Main concepts in modeling. 2. Spiking neurons models. Biology of individual neuron and its implementation in Emergent. 3. Structure of cortical networks, localist and distributed representations, excitation and inhibition of neurons. 4. Biological mechanism of memory and learning, long-term potentiation and depression of synaptic efficacy. 5. Self-organization, error-driven learning, combination of both. 6. Functional organization of the brain. Overview of brain areas. 7. Visual perception, attention, bottom-up and top-down mechanisms. Spatial neglect. 8. Motor control and reinforcement learning. 9. Memory, memory types, memory phenomena. 10. Language: neurobiology, syntax, semantics, modeling. 11. Executive functions, the role of prefrontal cortex. 12. Agency, theory of mind, self-awareness.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV-188/16	Course title: Computational Neuroscience
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Work on home assignments and sitting the final written exam. Students are required to achieve at least half of marks from home assignments during the semester in order to be admitted to sit the final exam. The final exam is compulsory. Scale of assessment (preliminary/final): Home assignments 50%, final written exam 50%. Grading: A 91-100%, B 81-90%, C 71-80%, D 61-70%, E 51-60%, Fx < 51%	
Learning outcomes: The course will provide students with the basics of computational neuroscience including the basics of the programming metalanguage of the software NEURON, which is used e.g. in the Blue Brain project. The students will learn theoretical and practical principles of application of informatics to the study of processes in neurons and small neural networks. At the same time, they will become familiar with the way of critical thinking, reasoning and problem solving in this research area.	
Class syllabus: <ul style="list-style-type: none"> - Principles of mathematical and computational modeling of dynamic systems - Theory of action potentials in neurons and their implementation in NEURON - Theory of signal processing in dendrites and implementation of dendrites in NEURON - Theory of biological neural networks and connecting the neurons in NEURON - Theory of synaptic transmission and implementation of synapses in NEURON - Implementation of ion channels in NEURON - Theories of coding of information in neural networks

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-239/22	Course title: Deep Learning and Cognition
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Course requirements: weekly activity during the semester, paper presentation and discussion moderation, final group presentation Scale of assessment (preliminary/final): 80/20	
Learning outcomes: The course introduces the field of a highly popular machine learning approach focused on deep learning in artificial neural networks. Aiming at master's students with diverse backgrounds of bachelor's studies (such as students of cognitive science), the course will guide them through different areas of DL, to highlight its successful applications. To better understand the mechanistic principles of DL models, the students will learn the basics about the underlying mathematical concepts of DL and will be shown a few simpler examples of functioning neural network models. Throughout the course, the discussions will also focus on virtues and vice of deep learning and its relation to human cognition.	
Class syllabus: Introduction to human intelligence and artificial intelligence Brief introduction to math needed for DL Current hype in deep learning Deep learning in computer vision Deep learning in natural language processing Deep learning for robotics Deep reinforcement learning - how to act Attention in psychology, neuroscience and machine learning Multimodal models Going beyond deep learning Toward cognitive AI Integrative summary

Academic year: 2025/2026					
University: Comenius University Bratislava					
Faculty: Faculty of Mathematics, Physics and Informatics					
Course ID: FMFI.KAI/2-MXX-130/21		Course title: Elements of AI			
Educational activities: Type of activities: independent work Number of hours: per week: 25 per level/semester: 325 Form of the course: on-site learning					
Number of credits: 2					
Recommended semester: 2., 8.					
Educational level: II.					
Prerequisites:					
Course requirements: Passing the online course https://course.elementsofai.com/ (in English or Slovak version).					
Learning outcomes: The student will get acquainted with selected basic concepts of artificial intelligence and their use in solving various practical tasks.					
Class syllabus: 1. What is artificial intelligence: related areas, AI philosophy. 2. Troubleshooting and UI: Browsing and troubleshooting, browsing and games 3. Probability and chance, Bayes' theorem, naive Bayesian classification. 4. Machine learning: nearest neighbor classifier, regression. 5. Neural networks: basics, creation, modern techniques. 6. Consequences: on predicting the future, the effects of AI on society, summary.					
Recommended literature: Russell S., Norwig P. (2010). Artificial Intelligence: A Modern Approach, (3rd ed.), Prentice Hall. Available in faculty library. Marsland S. (2015). Machine Learning: An Algorithmic Perspective, (2nd ed.), CRC Press.					
Languages necessary to complete the course: Slovak or English					
Notes: The course consists of 20 numerical and 5 text-based tasks. Numerical tasks are checked automatically, text-based tasks are evaluated anonymously by students.					
Past grade distribution Total number of evaluated students: 95

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-116/18	Course title: Empirical Research Methodology
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: None.	
Course requirements: At least 50% of the points within each of the 5 items of evaluation. Scale of assessment (preliminary/final): 1. Course assignments – 20%2. Semestral project: preliminary text – 10%3. Semestral project: full paper – 30%4. Semestral project: presentation – 10%5. Final “open-book“ exam – 30%	
Learning outcomes: Students will acquire knowledge and skills in the field of quantitative, primarily experimental research: from design, through implementation, to data analysis, reporting, and interpretation of findings. After this course, students should be able to (critically) analyze research studies. Course will also provide practical experience with conducting own experiment, including basic statistical analysis.	
Class syllabus: I. BEFORE EXPERIMENTING 1. Course introduction. 2. Variables and operationalization. 3. Deriving and testing research hypotheses. 4. Population and research sample. Generalization. Research ethics. 5. IMRaD. Sections of research report. II. EXPERIMENTING 6. Research design. Introduction to experimental design. 7. Experimental and quasi-experimental design. 8. Data analysis: applied statistics I. 9. Significance testing. 10. Data analysis: applied statistics II. III. AFTER EXPERIMENTING 11. How to write. How to present.	

12. Final “open-book“ exam

University: Comenius University Bratislava					
Faculty: Faculty of Mathematics, Physics and Informatics					
Course ID: FMFI.KJP/1-MXX-233/13		Course title: English Conversation Course (1)			
Educational activities: Type of activities: practicals Number of hours: per week: 2 per level/semester: 26 Form of the course: on-site learning					
Number of credits: 2					
Recommended semester: 1., 3., 7., 9.					
Educational level: I., I.II., II.					
Prerequisites:					
Course requirements: tests, presentations, essays Course prerequisites: https://fmph.uniba.sk/microsites/kjp/katedra-jazykovej-pripravy/poziadavky-na-udelenie-priebezhneho-hodnotenia-aj1aj2aj3-ostatne-kurzy/ Scale of assessment (preliminary/final): 100/0					
Learning outcomes: Continual improvement of all language skills focused on communication/speaking, listening comprehension and writing. The emphasis is on discourse, lexicology and morphology, word-bank broadening of communicational English as well as English for specific purposes appropriate for university students. This course is a follow up of the previously taught ESP course.					
Class syllabus: This course's focus is to broaden spoken/communicational English for students with B2/C1 level of English knowledge.					
Recommended literature: Appropriate study material is supplied based on the participants' level of English by the lecturer. (Sources- The Guardian, The Herald Morning Sun. The Nine News, The West Australian, BBC News and podcasts, CNN podcasts).

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-236/19	Course title: Grounded Cognition
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Course requirements: weekly activity during the semester, paper presentation and discussion moderation, final paper presentation and writing Scale of assessment (preliminary/final): 70/30	
Learning outcomes: The course objective is to provide students with deeper insight into up-to-date research trends in cognitive science, from the perspective of various disciplines (psychological, neural and computational). The course focus is on grounded (embodied) cognition, and its relation to language. The course should also help students in their ability to interpret scientific papers, to formulate, present and defend ideas. The course is primarily taken by mobility students in cognitive science.	
Class syllabus: <ol style="list-style-type: none"> 1. Introduction to language and concepts 2. Towards embodied cognition 3. Mirror neuron system and its role(s) in cognition 4. Common coding theory, motor simulation, mental simulation 5. Language as action 6. Conceptual and linguistic systems - two theories 7. Meaning as statistical covariation 8. Symbol grounding problem 9. Unification attempts 10. Role(s) of language in cognition and thought 11. Grounding abstract concepts. 12. Summary and reflection. 	
Recommended literature: various journal papers related to individual topics

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFLKDMFI+KAI/2-MXX-131/21	Course title: International Team-based Research Project
Educational activities: Type of activities: course / independent work Number of hours: per week: 3 per level/semester: 39 / 30s Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1., 7.	
Educational level: II.	
Prerequisites:	
Course requirements: Continuous assessment: active participation in research in an international student team (25%), presentation of work in a workshop (25%), scientific article (50%) Indicative evaluation scale: A 90 %, B 80 %, C 70 %, D 60 %, E 50 % Scale of assessment (preliminary/final): 100/0	
Learning outcomes: Students will learn in the team to agree on a common research topic, formulate research questions, determine research methods for the problem, collect and evaluate data, discuss their findings, present research results to the professional public, analyze and evaluate the scientific work of their colleagues, prepare a scientific article suitable for publication	
Class syllabus: <ul style="list-style-type: none"> - Research methodology - Design and implementation of a research project in an international group (preferably interdisciplinary) - Methods and tools for collaboration in virtual space, collaboration in science and practice - Academic writing, presentation of research results through scientific articles; objectives, content and structure of scientific articles; forms of academic publication, publication forums and evaluation of their quality - Quality assurance and feedback - peer review - Communication of results through posters or conference presentations 	
Recommended literature: <ul style="list-style-type: none"> - Teachers' own electronic study materials published on the course website or in the Moodle system - Gavora, Peter a kol. 2010. Elektronická učebnica pedagogického výskumu. [online]. Bratislava : Univerzita Komenského, 2010. Dostupné na: http://www.e-metodologia.fedu.uniba.sk/ ISBN 978-80-223-2951-4.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-121/18	Course title: Introduction to Cognitive Science
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Readings 25% Short oral presentations 15% Paper 30% Paper peer review 10% Group work & colloquium 10% Integration reflection 10% Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Content-wise, the students will learn about: History, theories, methods and topics of cognitive science Disciplines of cognitive science, their specific contributions Representational paradigms Cognitive modeling Ethical aspects of cognitive science and technologies Method-wise, the students will acquire the following skills: Think in an interdisciplinary way, appreciate multiple perspectives. Search and critically evaluate scientific knowledge sources. Critically read papers of different disciplines/styles. Orally present topics of interest. Learn about academic honesty practices and plagiarism. Write a scientific paper and cite literature properly. Review their peer's paper. Work independently, participate in discussions.	
Class syllabus: History, object and methods of cognitive science. Representational paradigms: functionalism, cognitivism, connectionism, embodiment, dynamical systems. Computational modeling. Neuroscience. Ethical aspects of research in cognitive science.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-115/18	Course title: Introduction to Computational Intelligence
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning	
Number of credits: 6	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: None.	
Course requirements: Grading: 91-100% = A, 81-90% = B, 71-80% = C, 61-70% = D, 51-60% = E, else Fx. Scale of assessment (preliminary/final): Active participation during the semester (max. 14 points). Written mid-term test (max. 12 points). Final written-oral exam (max. 24 points).	
Learning outcomes: The course objectives are to make the students familiar with basic principles of various computational methods of data processing that can commonly be called computational intelligence (CI). This includes mainly bottom-up approaches to solutions of (hard) problems based on various heuristics (soft computing), rather than exact approaches of traditional artificial intelligence based on logic (hard computing). Examples of CI are nature-inspired methods (artificial neural networks, evolutionary algorithms, fuzzy systems), as well as probabilistic methods and reinforcement learning. After the course the students will be able to conceptually understand the important terms and algorithms of CI, and choose appropriate method(s) for a given task. The theoretical introduction is combined with practical examples.

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-114/18	Course title: Introduction to Philosophy of Mind
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Final paper- analytic-critical study (100%) Grade A: 90% , B: 80% , C 70%, D 60%, and grade E at minimum 50%.	
Learning outcomes: Students acquire knowledge of representative philosophical conceptions, theories and problems within contemporary philosophy of mind. They will be acquainted with main arguments and types of argumentation on the mind/body problem and they will improve their capacity for critical discussion and ability to defend their own attitudes.	
Class syllabus: From the history in studying human mind and consciousness Basic terminology, concepts: mind, consciousness, reason, mental states, subjectivity, mental causality, self etc.; Taxonomy of approaches in the study on the nature of mind (dualism, identity theory, functionalism, naturalism etc.); The concept and problem of consciousness, Medicine and Philosophy (study of normal and pathological cases) Impairments of Consciousness – Novel methods of investigating the states of consciousness. Models and theories of conscious experience.	
Recommended literature: GÁLIKOVÁ, S.: An Introduction to the Philosophy of Mind. Trnava, FFTU, 2013. MASLIN, K., T.: An Introduction to the Philosophy of mind. Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-111/18	Course title: Introduction to Psychology
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: None.	
Course requirements: Seminar project 30% (theoretical assignment, oral presentation) Seminar reading 10% (presenting a psychological study) Midterm test 20% Final test 40% Active participation +/- 10% Scale of assessment (preliminary/final): Midterm: written exam (20%) a seminar projects (30%)m seminar reading (10%). Examination period: final written exam (40%). A: 91–100; B: 81–90; C: 73–80; D: 66–72; E: 60–65; Fx: 0–59.	
Learning outcomes: Students will be familiarized with the subject of psychology as a scientific discipline, its main schools (e.g., behaviorism, gestalt psychology, psychoanalysis, cognitive psychology), approaches, and methods used to investigate mind and behavior (e.g., subjective, objective, projective, physiological). Lectures will provide introductory information on fundamental psychological concepts. Students will learn to work independently, read and understand scientific (behavioral) articles, search through scientific databases, review scientific sources, and present topics of their interest.	
Class syllabus: [1] Introductory lecture [2] Origins and history [3] What is mind [4] Biological psychology [5] Cognitive psychology [6] Psychological methods [7] Personality theories [8] Clinical psychology	

[9] Emotions

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-138/18	Course title: Introduction to Robotics
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 1 / 2 per level/semester: 13 / 26 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Recommended prerequisites: basic programming skills in Python	
Course requirements: activity during the semester (project), final written test Scale of assessment (preliminary/final): 50:50	
Learning outcomes: After completing the course, students will be familiar with the basic concepts of robotics and will have acquired practical skills on how to control the robot in case of simple tasks, either in a simulated environment or with a physical robot. In addition, students will also get the basics of philosophical background of cognitive robotics (cognitivism versus post-cognitivism, empirism versus rationalism).	
Class syllabus: <ol style="list-style-type: none"> 1. Action. Actuators. The robot gear control: via position, via speed. The robot arm control. Forward and inverse kinematics. 2. Perception. Sensors. The basic processing of sensor data: distance, camera image, depth map, tactile map. 3. Control. Decomposition of the control system by function and by activity. Significance of real time. 4. The regular objects recognition. Hough transform. 5. The irregular objects recognition: DOT/HOG, SIFT/SURF/ORB, phase correlation. Representation of objects in robot memory. Sensory-motor approach to perception. 6. Behavioral robotics. Emergence of control in modular control architecture. 7. Cognitive approach to robot control. GOFAI, planning. STRIPS. Sussman's anomaly. Frame problem. 8. Post-cognitive approach to robot control. Dreyfus' criticism of GOFAI. Brooks' subsumption architecture. Situated robots. Embodiment. Interaction principle (robot ACE). 9. Minsky' society model of mind. Inspiration from Piaget's developmental psychology. Dennet's mind types. Robot COG. 	

10. Intelligence as a social phenomenon in group of robots. 11. Robots recognizing and emulating emotions. Robot KISMET. 12. Cloud technology for robots. Robot Pepper. IBM Watson. MicroSoft Azure. 13. Control emerging from interaction of robot with its environment. Delayed reinforcement learning, Genetic programming, Neural network training.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-921/22	Course title: Master's Thesis Seminar
Educational activities: Type of activities: course Number of hours: per week: 4 per level/semester: 52 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Submitting the master's thesis concept, oral presentations in the seminar (shorter and longer), peer activity during the semester, participation in peer reviews of extended abstracts (for the conference), active participation at MEi:CogSci conference (talk). Scale of assessment (preliminary/final): 40% - quality of the master thesis concept 30% - oral presentations about the thesis in the seminar (shorter and longer) 20% - activity during the semester, peer feedback, participation in peer reviews of extended abstracts (for the conference) 10% - active participation at MEi:CogSci conference (talk)	
Learning outcomes: After the course, you should be able to: (1) to formulate and follow a scientific question relevant to cognitive science, (2) to plan, conduct, document and present scientific work, (3) to write an extended scientific abstract, (4) to defend your research and constructively deal with critical commentary, (5) to constructively participate in a peer-review process, (6) to get involved in collaborative work in physical and virtual environments, (7) to engage in scientific discourse, (8) to communicate your expertise in order to contribute constructive criticism to the work of others.	
Class syllabus: Introduction to the course, requirements and grading, plan for the semester. Presentations of the student's mobility projects to 1st year students (joint meeting). Student's short presentations (10 min.). Master Thesis Concept requirement. Student's short presentations (10 min.). Long presentations (several students), feedback Long presentations (several students), feedback Long presentations (several students), feedback Interdisciplinarity - requirement for your master thesis. Rehearsal of conference talks Presentations (talks) at MEi:CogSci conference (during exam period)

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-137/18	Course title: Modern Methods in Brain Research
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Grading: 91-100% = A, 81-90% = B, 71-80% = C, 61-70% = D, 51-60% = E, else Fx. Active participation during the semester: presentations (30%), quick quizzes (10%), EEG practice (10%) Final exam: written test (50%) Scale of assessment (preliminary/final): Pomer hodnotenia za semester voči skúške: 50/50	
Learning outcomes: Students will become familiar with the basic imaging and other research methods used in modern cognitive neuroscience and understand the basic principles of use of these methods. They will get acquainted with the possibilities and suitability of their use, as well as with the advantages and disadvantages of each particular method. Theoretical knowledge will be supported by practical demonstrations of recording and analyzing brain activity (especially by using EEG).	
Class syllabus: An overview of examination and imaging methods – their temporal and spatial characteristics. Basics of electroencephalography (EEG). Physical and physiological principles of EEG. Basics of EEG signal analysis. Artifacts in EEG. EEG spectral analysis. Evoked and event-related potentials. Principles of computed tomography (CT), magnetic resonance imaging (MRI), functional magnetic resonance imaging (fMRI), positron emission tomography (PET), transcranial magnetic stimulation (TMS) and other modern methods used in the study of brain structure and function. The course will also include a brief introduction to other methods that do not directly measure brain activity, but rather its peripheral manifestations. These include electrooculography (EOG), electrodermal activity (EDA) or skin conductivity (SCL), electromyography (EMG), electrocardiography (ECG), respiratory rate and more.	
Recommended literature: Biological Imaging and Sensing / T. Furukawa (Ed.). Berlin : Springer, 2004	
Languages necessary to complete the course: English

COURSE DESCRIPTION

Academic year: 2025/2026					
University: Comenius University Bratislava					
Faculty: Faculty of Mathematics, Physics and Informatics					
Course ID: FMFI.KAI/2-IKV-189/16		Course title: Natural Language Processing			
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning					
Number of credits: 6					
Recommended semester: 2., 4.					
Educational level: II.					
Prerequisites:					
Course requirements:					
Learning outcomes: The students will acquire knowledge and practical experience in the field of natural language processing. They will know how to effectively apply the underlying theory from probability, statistics, computational linguistics, and machine learning, to perform tasks involving unstructured text, such as spelling correction, text generation, sentiment analysis, information extraction, and question answering.					
Class syllabus: (1) Text Processing. (2) Language Modeling (n-grams), Spelling Correction. (3) Text Classification (Naive Bayes), Sentiment Analysis. (4) Named Entity Recognition (HMM, MaxEnt), Relation Extraction. (5) POS Tagging, Parsing. (6) Information Retrieval. (7) Meaning Extraction, Question Answering.					
Recommended literature: Speech and Language Processing, 2nd Edition / Daniel Jurafsky, James H Martin. Upper Saddle River : Prentice Hall, 2008

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-AIN-286/22	Course title: Ontologies and Knowledge Engineering
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1., 3.	
Educational level: I., II.	
Prerequisites:	
Antirequisites: FMFI.KAI/2-AIN-286/15	
Course requirements: Semester: project (60pts), ongoing work assessment (20pts) Exam: written exam (20pts) Min. passing requirements: 50% from the semester and 50% from the exam Indicative assessment scale: A 90%, B 80%, C 70%, D 60%, E 50% Scale of assessment (preliminary/final): 80/20	
Learning outcomes: Students become acquainted with ontologies, with their role in data representation and sharing, with ontological representation and query languages, and with ontology engineering methodologies. They will also get acquainted with Semantic Web standards and with the principles and possibilities of publishing data in the Linked Open Data network, as well as the use of such data in knowledge-based applications.	
Class syllabus: <ul style="list-style-type: none"> - Ontologies and their applications - Well-known ontologies - Ontological representation languages (RDF, RDF Schema, OWL) - Ontologies and databases - SPARQL query language - Linked Open Data network - Ontology engineering - Applications of ontologies in informatics 	
Recommended literature: Staab, S. and Studer, R. eds., 2010. Handbook on ontologies. Springer Science & Business Media. Allemang, D. and Hendler, J., 2011. Semantic web for the working ontologist: effective modeling in RDFS and OWL. Elsevier. Selected relevant recent scientific papers.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKVa-194/21	Course title: Reinforcement Learning
Educational activities: Type of activities: lecture / practicals Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: Work on exercises (50%) Exam: test (50%) Grade A: 90% , B: 80% , C 70%, D 60% and grade E at minimum 50%	
Learning outcomes: The graduate will gain an overview of the methods and techniques used in reinforcement learning. Will gain practical experience with analysis, design and implementation of reinforcement learning problems.	
Class syllabus: 1. Introduction to reinforcement learning 2. Markov decision process 3. Dynamic programming 4. Monte Carlo methods 5. Temporal-Difference learning 6. Exploration and exploitation 7. Value function approximation 8. Policy gradient methods 9. Actor-critic methods 10. Deep reinforcement learning	
Recommended literature: Sutton, Richard S., and Andrew G. Barto. Reinforcement learning: An introduction. MIT press, 2018. Goodfellow, Ian, Yoshua Bengio, and Aaron Courville. Deep learning. MIT press, 2016.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-192/19	Course title: Science, Technology and Humanity: Opportunities and Risks
Educational activities: Type of activities: seminar Number of hours: per week: 3 per level/semester: 39 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: I., I.II., II.	
Prerequisites:	
Course requirements: Semestral evaluation: active participation Final evaluation: essay Weight of the final evaluation: 60% To achieve an A, 90% is needed, for B at least 80%, for C 70%, for D, 60% and for an E, at least 50% of overall assessment.	
Learning outcomes: The students will gain awareness of the contemporary and potential future challenges posed by scientific and technological innovations and their impact on human behaviour, culture and society.	
Class syllabus: Big data: privacy, politics and power, Internet of things, its usefulness and threats, Assistant AI and its place in future society, Job market and inequality, Enhancements and human rights and the right to change self and others, Initiatives for responsible research, Artificial minds, Hybridization between species and between AI and organic minds, Future of minds and trans-humanism, Artificial emotional intelligence, An after human era.	
Recommended literature: - S. Russell: Human compatible. Artificial intelligence and the problem of control. Viking, 2019. - J. Havens: Heartificial intelligence. Embracing our humanity to maximize machines. Penguin, 2016. - P. Boddington: Towards a code of ethics for artificial intelligence. Springer, 2017. - M. Shanahan: The technological singularity. COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Mathematics, Physics and Informatics	
Course ID: FMFI.KAI/2-IKV a-184/19	Course title: Social Cognition
Educational activities: Type of activities: lecture / seminar Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: Activity during the seminars Presentation Final essay Scale of assessment (preliminary/final): Activity during the seminarsPresentationFinal essayGrading: 91-100% = A, 81-90% = B, 71-80% = C, 61-70% = D, 51-60% = E, else Fx	
Learning outcomes: The course will provide an opportunity to acquire knowledge of some of the main topics and problems in the research of social cognition, especially theory of mind. The focus of the course will be on the analysis of relevant theoretical and experimental papers. The course will have an interdisciplinary character – we will discuss influential studies in comparative psychology, developmental psychology, philosophy and other related disciplines.	
Class syllabus: Social cognition in animals and humans. Intentional stance (D. Dennett). Shared intentionality. We-mode. Joint action. Modularity of mind and social cognition. Theory of mind – „classical“(theory theory, simulation theory) and new trends in the research of mindreading (4E cognition, predictive processing). Mirror neurons system. Theory of mind in the brain. Mindreading and autism. Social cognition and cultural transmission. Social cognition and the origins of morality.	
Recommended literature: Carruthers, P., & Smith, P. K. (Eds.). (1996). Theories of theories of mind. Cambridge University Press.	

Goldman, A. I. (2006). Simulating minds: The philosophy, psychology, and neuroscience of mindreading. Oxford University Press.
 Dennett, D. C. (1989). The intentional stance. MIT press.
 Baron-Cohen, S. (1997). Mindblindness: An essay on autism and theory of mind. MIT press.
 Banaji, M. R., & Gelman, S. A. (Eds.). (2013). Navigating the social world: What infants, children, and other species can teach us. Oxford University Press.
