TABLE OF CONTENTS

1. 3-UES-1641/25	Advanced research methods	2
2. 3-UES-1647/25	Analysis of social science data in R	4
3. 3-PhD-010/20	Application for PhD grant	7
4. 3-PhD-070/20	International Conferences	8
5. 3-PhD-020/20	Member of project team	9
6. 3-UES-1643/25	Methodology of the pedagogical process	10
7. 3-UES-1644/25	Modern theories of corporate governance	12
8. 3-PhD-080/20	National and Regional Conference	14
9. 3-PhD-250/25	Opposition to final thesis at the first and second level of study	15
10. 3-UES-1645/25	Organisations and institutions in the international system of governance	16
11. 3-PhD-200/25	Publication in a foreign or domestic indexed journal, in the WoS / Scopus database – Q1, Q2	18
12. 3-PhD-220/25	Publication in a foreign or domestic indexed journal, in the WoS / Scopus database – Q1, Q2 (the doctoral student is a member of a large group of auth	19
13. 3-PhD-210/25	Publication in a foreign or domestic indexed journal, in the WoS / Scopus database – Q3, Q4	20
14. 3-PhD-230/25	Publication in a foreign or domestic peer-reviewed journal	21
15. 3-UES-1648/25	Research Internship	22
16. 3-UES-1649/25	Research Internship	24
17. 3-UES-1642/25	Research and publishing	26
18. 3-UES-1640/25	Research design	28
19. 3-UES-1646/25	Seminar in qualitative methods	30
20. 3-UES-1651/25	State examination: defence of the (state exam)	33
21. 3-UES-1650/25	State examination: the Dissertation Examination in European Governance and Politics (state exam)	34
22. 3-PhD-240/25	Thesis supervision at the first and second level of study	35

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1641/25	Course title: Advanced research methods
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 2 / 3 per level/semester: 26 / 39 Form of the course: combined	
Number of credits: 20	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Prerequisites Students have to take 4 modules (3+1) from both Parts (qualitative and quantitative) but the number of taken modules depends on their PhD. Research orientation. Once students have identified their research problem (in the course Research design which is a pre-condition of this course), they will employ the methodology best suited for solving the problem of their own dissertation. Thus, students choose 3 electives from modules in Part which is relevant to their pathway to do PhD. And will help them deepen skills and in this way build their own dissertation and 1 elective from the Part which does not correspond to their Path. For example, if the student is undertaking qualitative research, he/she takes 3 modules from the Part 1 and 1 module from Part 2 to fulfill course requirements but he/she is recommended to take as many as possible Practical modules on research methods taken at summer/winter methodological courses count as any module taken within Qualitative or Quantitative part. Assignments related to the individual Pre-registered Presentation and defence of own design related to modules and dissertation Rating: passed / failed	
Learning outcomes: Learning outcomes Doctoral candidates will be able to identify the key steps and choices in research design, analyze and discuss the strengths and weaknesses of different design choices in their own and others' work, and eventually create and critically reflect upon their own research designs. Part I and Part II run in parallel, each dedicated to qualitative and quantitative research methods, respectively. Students choose modules from both parts upon discussion with their respective supervisor to reflect their individual needs when conducting their PhD. Research. Students read and discuss assigned texts, practical case studies and reflect upon their own research and apply newly acquired skills to their own research plans. Since this course is a practicum for conducting	

empirical social science, the focus of individual modules is on learning techniques for researching and analysing social phenomena on a practical level.

Class syllabus:

Brief outline of the course:

PART 1: QUALITATIVE METHODS

Comparative design and case study

Understanding process tracing

Interpretative approach: qualitative interviewing and analysis

Qualitative Analysis of Textual Data

PART 2: QUANTITATIVE METHODS

Surveys

Experiments

Reporting standards of quantitative research

Open science practices

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1647/25	Course title: Analysis of social science data in R
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 0 / 2 per level/semester: 0 / 26 Form of the course: combined	
Number of credits: 10	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: he course is designed in an interactive way and will devote time to lectures and interactive activities. Students are required to complete all assigned readings prior to class, actively participate in class, and turn in weekly practical assignments. Practical assignments will consist of analysis in the R programming language on data from research published in leading social science research journals. To pass the course, you must complete all assigned readings, actively participate in seminar discussions, and turn in all assigned practical assignments Active participation in seminars with discussion (20%) Weekly practical assignments in R (80%)	
Learning outcomes: Learning outcomes: Students will be introduced to selected advanced quantitative research methods in the social sciences with an emphasis on estimating causal effects; Students will be able to apply the tools of regression analysis to estimate causal effects on experimental, survey, or observational data; Students will be able to actively use the R programming language (tidyverse) to analyze selected social science data and will be able to write a full scientific paper in RMarkdown/Latex; Students will learn the proper procedures for writing R programming code for social science analysis and online management of analysis codes for the purpose of publishing their quantitative analyses in scholarly journals; At the end of the course, students will be able to process their collected data, formulate a compelling hypothesis, apply relevant quantitative research methods, and write a scientific manuscript in RMarkdown (or Latex) ready for submission to a journal with accompanying reproducible R code published online.	
Class syllabus: Brief outline of the course 1. Introduction to the course;	

2. Introduction to the R programming language with emphasis on the tidyverse package and the RMarkdown interface;
3. Correlation and regression analysis, diagnostics of regression models based on residuals;
4. Exploring causal effects using data from experiments I. (Introduction);
5. Exploring causal effects using data from Experiment II (field experiments);
6. Investigating causal effects using data from Experiment III (laboratory experiments);
7. Exploring causal effects using data from questionnaire experiments I. (Introduction)
8. Exploring causal effects using data from questionnaire experiments II (vignettes);
9. Exploring causal effects using data from questionnaire experiments III (conjoint);
10. Exploring causal effects using observational data I. (differences-in-differences);
11. Exploring causal effects using observational data II (regression discontinuity design);
12. Exploring causal effects using observational data III (instrumental variables);
13. Standards for reproducible quantitative analysis in the social sciences.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1643/25	Course title: Methodology of the pedagogical process
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 0 / 2 per level/semester: 0 / 26 Form of the course: combined	
Number of credits: 10	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Prerequisites activity at seminars (20%) development of pedagogical material (lecture, presentation, seminar assignment, research project, competition proposal, debate materials, etc. - 50%) presentation and discussion of pedagogical material (30%) Rating: passed / failed	
Learning outcomes: Students will gain knowledge and experience on how to apply teaching methods at university, how to prepare study and presentation materials, how to use specific pedagogical methods. They will gain practical experience through simulations in the pedagogical process how to react to specific situations, how to motivate students in the 1st and 2nd stage of studies, how to obtain and process feedback. By completing the course, students will also learn how to work with learning alternatives in the online environment and various tools.	
Class syllabus: Brief outline of the course Educational process in general Lectures and seminars (I.) Seminar training (II.) Exercises, practical assignments and other forms of training Clinical Education Practical training and competitions New forms of education - online learning Tips and tricks for activities in virtual space Presentations and evaluation

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1644/25	Course title: Modern theories of corporate governance
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 2 / 1 per level/semester: 26 / 13 Form of the course: combined	
Number of credits: 10	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Prerequisites: Class activity and on-time submission of the thesis (20% of the total grade for the course): the PhD student is required to read the prescribed literature before the start of the scheduled class and prepare a predefined output. Each PhD student will read selected professional books in English + relevant professional articles in English and outputs of his/her colleagues. Each student will prepare a number of position papers (analytical summaries of the readings) - as a presenter and as a discussant. presentation (30% of the total grade) position papers (50% of the total grade). Rating: passed / failed	
Learning outcomes: Learning outcomes: The student will learn the basic concepts of social governance by examining the basic characteristics and dynamics of different approaches to the governance of public issues. Graduates of the course will understand the characteristics of different theories of public policy, which is an important prerequisite public policy making and decision making in government intervention, as well as in the subsequent management of the implementation of the adopted public policies.	
Class syllabus: Brief outline of the course: The course focuses on the basic concepts of public sector governance and public administration. It aims to learn the trade-offs associated with different approaches to the governance of public issues, as well as the trade-offs associated with decisions to intervene or not to intervene in relevant contexts. It also looks at the relationship between approaches to managing public issues and the effectiveness of interventions adopted. In the course, students will cover the following main areas: Theory of the State	

<p>Main approaches to public sector governance NPM and innovative approaches to public sector governance Participatory and deliberative democracy Political-administrative relations Behavioural approaches to public sector governance.</p>

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1645/25	Course title: Organisations and institutions in the international system of governance
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: combined	
Number of credits: 10	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Prerequisites active participation (20%) development of a research project (50%) research project defence (30%) Rating: passed / failed	
Learning outcomes: Learning outcomes Students will gain knowledge of the theoretical and applied perspectives on the existence, dynamics and relationships of functioning in an institutional system in an international environment. Particular emphasis is placed on understanding international norms, rules and values, decision-making processes, international relations, the behaviour of international organisations and other actors, in the context of organisational theories, international relations theories, European integration and human rights theories. Upon successful completion, students will have the knowledge and skills to: demonstrate knowledge of the various forms of cooperation and institutionalisation that exist in global affairs, including international organisations; demonstrate understanding of the key theories of international cooperation; apply these theories to historical and current-day issues of significance; and engage critically with scholarly research, evaluating its accuracy and relevance to global affairs.	
Class syllabus: Brief outline of the course 1. State and international organisations 2. Rationality and its limits; Organizational theories 3. New Institutionalism in Political Science and International Relations 4. New configurations of global power and the dynamic landscape of international 5. Decision-making and the limitations of rationality 6. Positive engagement and human rights standards in international relations and	

7. Activists Beyond Borders: Advocacy Networks in International Politics
8. International and human security
9. Environment and Governance
10. Intergovernmentalism and integration
11. National and international institutional dynamics
12. New intergovernmental and transnational cooperation - the current dynamics of European integration
13. International responsibility

Academic year: 2025/2026							
University: Comenius University Bratislava							
Faculty: Faculty of Social and Economic Sciences							
Course ID: FSEV.ÚEŠMV/3- UES-1648/25				Course title: Research Internship			
Educational activities: Type of activities: internship Number of hours: per week: 120 per level/semester: 1560 Form of the course: combined							
Number of credits: 20							
Recommended semester:							
Educational level: III.							
Prerequisites:							
Course requirements: Prerequisites The course is an internship in an institution related to the field of study, at home or abroad, with a minimum duration of 10 hours per week (min. 120 hours). Prerequisite for recognition of the internship: traineeship agreement a confirmation of the internship from the organisation, specifying the role and timeframe a short report on the internship itself (experience gained, relevance to the study or data collection for the dissertation) Rating: passed / failed							
Learning outcomes: Learning outcomes Students will gain practical experience in the application of acquired theoretical and scientific knowledge in their field of study. They will gain experience in the processing of professional information, the application of knowledge in a specific topic, specific skills depending on the host institution, and thus the opportunity to better succeed in the labour market.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1642/25	Course title: Research and publishing
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: combined	
Number of credits: 10	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: Prerequisites activity at seminars preparation of assignments - written and presentation deliverables final presentation and discussion of the PhD project Rating: passed / failed	
Learning outcomes: Learning outcomes As a result of the course, some specific research methods and procedures are added. Addition of aspects of research design and skills in presenting results - both written and oral. Critical reflection on presentation skills and training in various forms of academic expression. By completing the course, students will also learn how to communicate with professional journals and be prepared to present the results of their research work.	
Class syllabus: Brief outline of the course: Supplementing research methods with some specific procedures - elite research Some specific aspects of research - positionality, intersectionality Grounded Principles of research presentation How to write peer reviews effectively? How to work effectively with reviews? How to write an effective abstract and project Publishing in peer-reviewed journals, the right choice and the efficient process: quality vs. predatory journals Artificial intelligence in science

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1640/25	Course title: Research design
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 2 / 2 per level/semester: 26 / 26 Form of the course: combined	
Number of credits: 10	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Course requirements: 4 Assignments relating to the readings of each module and applied on real-world cases. Assignments are due 2 days prior to the module meeting (in the form of a student memo on the case study and/or own PhD. Project) for following topics: concept operationalization, ethical implications, enquiry design, data Research proposal: presentation + written. The research proposal contains (1) the central research question(s), (2) the literature and/or debate it seeks to address, (3) the argument or theory/hypotheses, (4) the methodology to be used in the project, (5) case selection criteria, and (6) a plan for data collection and analysis that will serve to answer the research question(s). Active class participation	
Learning outcomes: Learning outcomes: Doctoral candidates should be able to identify the key steps and choices in research design, analyse and discuss the strengths and weaknesses of different design choices in their own and others' work, and eventually create and critically reflect upon their own research designs since the purpose is to provide PhD candidates with in-depth knowledge and practical experience in developing a research design - before diving into methods choices and implementation in more detail. The lectures in the research design focus on the relationship between the identification of a research problem, the formulation of research questions, doing effective literature reviews, the development of the theoretical framework, conceptualization and operationalization, choice of a methodological approach, selection of cases and data, and ethical considerations in research design.	
Class syllabus: Brief outline of the course: What is social scientific research How to operationalize key concepts and select sample How to identify and mitigate key ethical implications of your research Designing the enquiry: how to develop relevant research problems and questions Conducting field research: collecting data	

Reporting the enquiry: scholarly work and research proposal

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1646/25	Course title: Seminar in qualitative methods
Educational activities: Type of activities: lecture + seminar / lecture Number of hours: per week: 0 / 2 per level/semester: 0 / 26 Form of the course: combined	
Number of credits: 10	
Recommended semester:	
Educational level: III.	
Prerequisites:	
Recommended prerequisites: 1. Attendance and active participation in discussions and exercises (20%). Attendance points assess activity in the exercises and discussions of the workshop. 2. Midterm exam or assignment prepared after the first part of the semester (30%). Students will demonstrate the knowledge acquired in the first part of the semester. The course coordinator will announce in advance the exact structure of the exam - it will either be a set of questions requiring a shorter answer or a choice of three options for a longer essay. 3. Research proposal (50%). Students will submit a research proposal that uses one of the methods discussed in the workshop. The proposal will be handed in during the exam period; more detailed instructions will be provided in advance. Students are entitled to one make-up term for the final thesis. In accordance with the FSEV UK study regulations, students may miss two weekly blocks, absences will be excused in accordance with the Faculty's study regulations.	
Course requirements:	
Learning outcomes: Learning outcomes: The Workshop in Qualitative Methods is an advanced course for PhD students interested in deepening their understanding of different approaches to the study of European society and politics and of current trends in research on international and transnational phenomena. Throughout the course, students will be able to gain deeper insights into the work of researchers working with different theoretical and methodological frameworks. The course will have an introductory and a final section, focusing on the foundations of qualitative research for PhD students. We anticipate presentations and discussions throughout the semester, welcoming colleagues from FSEV and other national and international departments. Each meeting will begin with an introductory presentation of the research framework and continue with an interactive discussion. We expect students to come to the meetings prepared - with knowledge of the core literature for the week and a willingness to discuss with both local and visiting researchers. In addition to access to a "production room" of	

diverse research styles, students will also get the opportunity to practice academic communication skills (constructive criticism, argument-focused debate, etc.).

Class syllabus:

Brief outline of the course:

(The order of topics and some emphases in the content may change depending on the time availability of the visiting researchers and speakers.)

1. Introduction to the course and introduction of the topics. Introduction of course participants, objectives and syllabus. Methodology in doctoral thesis.
2. Field research, critique of the concept of "terrain" and contexts of its emergence. Legacies of colonialism, ethics and their relevance in contemporary international relations and European studies.
3. Approaches to the study of conflict, peace and cooperation. International and transnational processes, actors and institutions.
4. Qualitative methods and their importance in advancing knowledge in political theory and philosophy. The study of statehood and unrecognized states.
5. Historical and ethnographic methods. Focus on post-socialism.
6. Complexity in the Anthropocene. International relations and interdisciplinary conversations on the topic of cooperation between human actors and other world inhabitants (human and non-human agency).
7. Feminist approaches to the study of politics. Gender as an angle of analysis.
8. Swimming in confusing and difficult to access contexts. Exploratory interviewing and other conversational strategies.
9. Analysis of audiovisual material. Orientation between words and images.
10. The world at home. The study of global processes in local contexts. Urban ethnography and the intersections between research and civic initiatives.
11. Methods of researching legal sources. Orientation in the work of European courts. Locating, collecting and analysing judicial documents.
12. Final colloquium.

Recommended literature:

Recommended reading:

References (both recommended and supplementary) will be listed on the course website.

Students will work with a variety of source types, including monographs, peer-reviewed articles, commentaries, and audio-visual material related to the topic. The reading list will be supplemented each semester with more recent research and research reflecting the work of guest presenters.

STATE EXAM DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1651/25	Course title: State examination: defence of the
Number of credits: 30	
Educational level: III.	
Course requirements: successful defence of the dissertation (100%)	
Learning outcomes: The student is able to develop a research project, define the theoretical background of the research, identify gaps in existing research and related literature for the treatment of the topic, methodologically correct formulation of the research question and hypotheses, and obtain research data to work with. By defending the outcomes of his/her research, he/she will demonstrate the ability to work on the research task and work independently with the literature, to interpret research results, to present his/her research findings, to respond appropriately to questions from referees/ interviewees, public debate and feedback, and to contribute to the development of the programme and the field of study nationally or internationally.	
Class syllabus: dissertation defence: presentation of the results of the work, commenting on the opinions of the supervisor and opponents, dissertation discussion.	
State exam syllabus:	
Last change: 02.10.2025	
Approved by: prof. PhDr. JUDr. Lucia Mokrá, PhD.	

STATE EXAM DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Social and Economic Sciences	
Course ID: FSEV.ÚEŠMV/3- UES-1650/25	Course title: State examination: the Dissertation Examination in European Governance and Politics
Number of credits: 20	
Educational level: III.	
Course requirements: 1) successful defence of the dissertation project (100%)	
Learning outcomes: The student will demonstrate the ability to prepare a research project design, which will then be practically implemented. By completing the dissertation examination, the student will demonstrate the ability to theoretically anchor his/her research and prepare a methodological framework for the research, including identification of the research question, how to obtain research data, and identification and minimization of potential risks and limitations associated with the research. The dissertation project also includes the development of a literature review in the area of inquiry, whereby the student demonstrates the ability to work with professional and scholarly literature and different types of sources. By passing the dissertation examination, the student will gain the knowledge and professional experience to carry out his/her own research project.	
Class syllabus: theoretical background of the dissertation project methodological background of the dissertation project processing of review
