Educational activities: Type of activities: seminar Number of hours: per week: 2 per level/semester: 28 Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 8.	
Educational level: I.	
Prerequisites:	
Course requirements: a) during the teaching part (ongoing) preparation for teaching and the ability to translate read texts in Chinese (50 points), b) during the exam period: written exam (50 points). The condition for admission to the exam is the achievement of min. 30 points from the interim assessment. Violation of academic ethics results in cancellation of points obtained in the relevant assessment item. Classification scale: A: 100% - 92%; B: 91% - 84%; C: 83% - 76%; D: 75% - 68%; E: 67% - 60%; FX: 59% - 0%. Teachers accept max. 2 absences. The exact date and topic of the interim assessment will be announced at the beginning of the semester. Exam dates will be published via AIS no later than the last week of the teaching session.	
Learning outcomes: Short exercises with simple sentences: one student says a sentence in Slovak/Chinese, the other translates it, says another sentence and so on. The topics are determined in advance so that they can prepare vocabulary. Students work in small groups and interpret sentences spoken by their peers Students interpret the sentences they receive written in Chinese/Slovak on pre-prepared cards Students interpret the sentences based on the text they heard in the recording. Students interpret on the basis of recordings, while the difficulty gradually increases, both by the selection of recordings and the length of the passages. Students also work in smaller groups in simulated dialogues, with two students conversing, one in Slovak, the other in Chinese, and two interpreting. All procedures are varied and alternated within the individual lessons to maintain attention and to avoid excessive exhaustion or stress of the participants. Students, who are not currently interpreting, listen and then discuss the performances of the interpreters, focusing on the strengths and mistakes of the participants. The accuracy of the translation, speed of reactions, verbal expression, as well as the overall confidence of the interpreters' speech are evaluated. The teacher supervises the entire process, determines the topics of discussions, provides comments on the accuracy and promptness of the interpretation. The teacher advises techniques to relieve stress during interpreting. The mentioned procedures are varied, the techniques are alternated even within individual lessons, and there would be no excessive fatigue or excessive stress.	

Class syllabus:

The student improves his interpretation technique, especially consecutive interpretation. We work with recordings in Chinese and Slovak, as well as with short texts that the students interpret. Gradually, the ability of students to remember longer sections of the text is built, moving from simple sentences to sentences. Students become familiar with interpreting techniques, practice the ability to respond quickly to the spoken word and effectively interpret it from Chinese to Slovak and vice versa. Students gradually practice individual situations to gain skill, get rid of blocks and gain the ability to react naturally. In addition to practical knowledge, they are also briefly informed about other aspects of interpreting, for example, the basics of interpreting ethics.
