TABLE OF CONTENTS

1. J-2-OSx-044/22	Assessment and Management of the Acutely Deteriorating Patient.....	2
2. J-2-OSx-016/22	Communication in Nursing.....	5
3. J-2-OSx-SS1/22	Defense of Diploma Thesis (state exam).....	8
4. J-2-OSx-005/22	Evidence Based Nursing.....	10
5. J-2-OSx-007/22	Health Promotion and Prevention.....	12
6. J-2-OSx-026/22	Management and Quality of Services in Health Service.....	14
7. J-2-OSx-027/22	Management of Human Resources in Health Service.....	16
8. J-2-OSx-045/22	Mentoring in Nursing.....	18
9. J-2-OSx-002/22	Nursing Ethics.....	20
10. J-2-OSx-004/22	Nursing II-1.....	23
11. J-2-OSx-013/22	Nursing II-2.....	26
12. J-2-OSx-SS2/22	Nursing II. (state exam).....	29
13. J-2-OSx-046/22	Nursing Practice.....	36
14. J-2-OSx-012/22	Nursing Research II-1.....	39
15. J-2-OSx-018/22	Nursing Research II-2.....	41
16. J-2-OSx-029/22	Nursing Research II-3.....	43
17. J-2-OSx-041/22	Nursing care for seniors and geriatric patients (1).....	45
18. J-2-OSx-042/22	Nursing care for seniors and geriatric patients (2).....	47
19. J-2-OSx-043/22	Nursing care for seniors and geriatric patients (3).....	50
20. J-2-OSx-001/22	Patient safety.....	52
21. J-2-OSx-014/22	Pedagogy in Nursing (2).....	54
22. J-2-OSx-010/22	Summer Practice (1).....	57
23. J-2-OSx-008/22	Winter Practice (1).....	59
24. J-2-OSx-019/22	Winter Practice (2).....	61

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-044/22	Course title: Assessment and Management of the Acutely Deteriorating Patient
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 20s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites:	
Course requirements: The evaluation of students is pursued by written test and practical exam (solution of the simulated situation) by the OSCE method. Overall evaluation: A: 91–100 %, B: 81–90 %, C: 74–80 %, D: 73–66 %, E: 60–65 %, FX: 59% and less. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: By completing the course, the student will acquire theoretical knowledge, practical skills, and clinical competences in recognising, assessing, and managing the acute condition of adult and geriatric patients in a hospital setting, with an emphasis on a holistic approach, clinically correct and safe practice performance, and adherence to the principles of evidence-based practice. The student will be able to describe the standardised procedure of acute patient care according to the ABCDE approach. The student will be able to implement the constituent steps of recognition, assessment, and management of acutely deteriorating patient following the ABCDE framework, within the scope of nursing competency, when solving case studies and simulated scenarios in the safe environment of a simulated care unit. Using modern methodological approaches (ABCDE, (I)SBAR, OSCE), available simulation-based learning technologies (static models for skills training, full-body simulators), and teaching methods such as simulation, demonstration, and practical training, the student will be able to improve technical and procedural skills, non-technical skills, and clinical competences (situation assessment, critical thinking, patient preparation, instrumental performance, teamwork, patient communication, etc.). The student will be able to recognise when it is necessary to immediately call for/request help. The student will be able to identify the interventions that must be carried out (independently, in collaboration, or delegated) as a part of acutely deteriorating patient management. The student will be able to define the principles, and roles of the nurse, within team collaboration while patient resuscitation in the hospital environment and actively participate in a simulated scenario (resuscitation of a hospitalised patient). The student will be able to strengthen his/her ability to respond adequately to the sudden onset of an acutely deteriorating hospitalised patient. Will be able to refine skills in effective, standardised communication of critical events in clinical practice using the (I)SBAR method. The	

acquired clinical competences, together with the ability to justify and argue the chosen course of action, will provide the foundation for clinically correct and safe responses in real-life clinical practice in the context of acute care for adult and geriatric patients.

Class syllabus:

Recognition, assessment and management of the acutely deteriorating patient's condition – systematic, standardized ABCDE approach.

The constituent components of the ABCDE approach – assessment and management within the scope of the nurse competency:

A – Airway – assessment and management.

B – Breathing – assessment and management.

C – Circulation – assessment and management.

D – Disability – assessment and management.

E – Exposure/Examination – assessment and management.

Standardized communication of critical events in clinical practice using the (I)SBAR method.

Resuscitation of a hospitalized patient.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-016/22	Course title: Communication in Nursing
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 21s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 3.	
Educational level: II.	
Prerequisites:	
Course requirements: The evaluation of students is pursued by continuous evaluation of presentations/reports on assigned tasks on the issue of intrapersonal and interdisciplinary communication (team communication), evaluation of a written test and evaluation of elaborated semester paper on a given topic. Overall evaluation: A: 91–100 %, B: 81–90 %, C: 74–80 %, D: 73–66 %, E: 60–65 %, FX: 59% and less. Scale of assessment (preliminary/final): 40/60	
Learning outcomes: By completing the course, the student will enhance the knowledge, skills, and competences in effective verbal, non-verbal, and paralinguistic communication within the context of interpersonal and interdisciplinary relationships in nursing. The student will be able to implement acquired theoretical knowledge and communication skills in the provision of individualised nursing care, and employ selected theoretical models in self-reflection and reflection on nursing practice, as well as in team information handover. The student will be able to specifically adapt communication skills to the needs and preferences of the patient when establishing the nurse–patient relationship, collecting data for the assessment and management of patient needs, communicating with selected groups of patients, delivering “bad” news, and providing palliative nursing care in different stages of the patient’s illness, during the dying phase, after the patient’s death, and in supporting the bereaved through the grieving process.	
Class syllabus: Communication as a fundamental professional competence of the nurse – relational and content aspects of communication, the communication process, communication barriers, and communication skills. Interpersonal communication – verbal, non-verbal communication and paralinguistics, empathy, and active (reflective) listening in nursing practice. Interdisciplinary communication – effective teamwork, communication, and sharing information within the team using the structured SBAR/ISBAR model (identify, situation, background, assessment, recommendation/request).	

Intrapersonal communication – self-reflection and reflection on nursing practice (application of Gibbs reflective cycle).
 Communication in palliative nursing care – the nurse–patient relationship in palliative care, the importance of communication, factors affecting communication, delivering “bad” news, communication with the patient and his/her significant others in the phase of patient’s active dying, and communication with the bereaved after the patient’s death.
 Communication with selected groups of patients.

STATE EXAM DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-SS1/22	Course title: Defense of Diploma Thesis
Number of credits: 5	
Recommended semester: 3., 4..	
Educational level: II.	
<p>Course requirements: The state exam can be carried out by the student after the fulfilment of the obligations stated in the study program. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.</p>	
<p>Learning outcomes: The graduate can know the basics of scientific work in the field of nursing and methods of obtaining scientific and professional information. He/she is able of developing nursing practise, critical thinking and exploiting results of the research. The graduate can know the basics of work in a multimedia environment and understands the basics of one world language. The graduate can enter into practice as a convinced defender of the independence of his/her profession and modern trends in nursing theory and practice. He/she can adhere to the principles of nursing ethics, which he/she is a carrier.</p>	
<p>Class syllabus: Quantitative and qualitative research. Scientific methods and its classification. Ethical aspects of nursing research. Operation with scientific literature and other documents. Searching for literary sources, its utilisation and processing. Processing and storage of scientific information. In-text citation. Reference list. Research project and its phases. Characteristics and importance of the particular phases of the research process. Formulation of research problems, questions and hypotheses. Possibilities of the determination of research problems, aims and tasks in nursing, proposal of their solution, possibilities of verification, method selection. Criteria for selecting a research tool. Preparation and processing of obtained empirical data. Descriptive and inductive statistics and their application in the data processing. Qualitative methods. Qualitative data analysis. Casuistry – a case study. Preparation and utilisation. The methodology of verbal responses processing. Interpretation of obtained data, discussion, conclusions. Formal and content requirements of the master thesis. Presentation of the results - verbal, written. Language and scientific style of the thesis. Preparation of presentation, preparation for defense.</p>

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-005/22	Course title: Evidence Based Nursing
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 24s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Writing a seminar paper focused on the formulation of PICO questions, search and analysis of evidence. The evaluation of students is carried out through evaluation of the seminar paper and written exam. Overall evaluation: A: 91–100%, B: 81–90%, C: 73–80%, D: 72–66%, E: 60–65%, FX: 59% and less. Scale of assessment (preliminary/final): 40/60	
Learning outcomes: After completing the subject, the student characterized the importance of evidence-based nursing for research and nursing practice. Can formulate a clinical question, choose an appropriate strategy for seeking evidence from research studies. Student searches the evidence in appropriate information sources; critically evaluates the level and quality of evidence obtained. Student describes the process of implementing the obtained evidence into clinical practice. The student applies the acquired knowledge in clinical practice.	
Class syllabus: Evidence-based nursing: characteristics, significance, steps of the evidence-based nursing process PICO question formulation Information resources Searching for evidence in information sources Evaluation of the quality of the evidence obtained Clinical guidelines: characteristics, significance, development, implementation into clinical practice Clinical guidelines: searching for clinical guidelines and their analysis Implementation of evidence-based practice into nursing practice Evidence-based nursing - conditions and barriers in teaching and clinical practice

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-007/22	Course title: Health Promotion and Prevention
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 20s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: The evaluation of students takes place in the form of evaluation of the semestral thesis and of the written test (exam). Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: After completing the course, the student can acquire the ability to apply theoretical knowledge from the subject to nursing practice - the student is able to acquire knowledge and skills in the field of health promotion and disease prevention. The student is able to define key terms related to health and health promotion additionally to specify contemporary health promotion programs. He/she can apply interventions related to health promotion in the individual / group / community. This course also contributes to the formation of the student's correct attitude towards their own health. In addition to professional training in the field of health and health promotion, counseling and consultation in nursing practice.	
Class syllabus: Health, health promotion, prevention, health promotion programs – key aspects. Determinants of health, health risk assessment. Health status of the population of the Slovak Republic - diseases of civilization. Health promotion and disease prevention programs. Models and theoretical frameworks of health promotion. Healthy lifestyle, lifestyle changes. Behavior in relation to the health and possibilities of its change. Compliance and health literacy in health prevention and promotion. Screening, preventive examinations, out-patient clinic. Health promotion in nursing practice. Health promotion and prevention in childhood along with adjunctive programs. Adult health promotion and prevention along with adjunctive programs. Health promotion and prevention for the elderly along with adjunctive programs.	

Family health promotion along with adjunctive programs.
Mental health, psychosomatic illness. Mental health programs.
Community health promotion programs and strategies.
Implementation of health promotion programs - projects.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-002/22	Course title: Nursing Ethics
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 14s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Student evaluation is carried out through knowledge test, active participation in seminars, and presentation of the text with discussion. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX # 60% Scale of assessment (preliminary/final): 34/66	
Learning outcomes: The student is able to advance knowledge about the problems of ethics in the context of nursing, understand ethical theories, principles, and their importance in education, practice, and research in nursing. The student is able to apply knowledge to case studies, can analyse them, and identify problems and dilemmas in nursing practice. The student can solve moral problems, argue own attitudes. The course contributes to the formation of moral attitudes of students to nursing, patients, and other health professions in team cooperation.	
Class syllabus: Nursing ethics as a discipline. Basic concepts of nursing ethics: vulnerability (lived experience), care (dialogical-interpretative), and dignity (normative standard). Selected ethical theories (deontology, principlism, utilitarianism, ethics of virtue, and ethics of care) and their reflection in nursing ethics. Ethical aspects of the nurse-patient relationship. Paternalism, trust, the concept of patient advocacy. Moral sensitivity, moral reasoning, and moral distress. Dilemmas in nursing practice and possibilities of their solution: problems of patient information, refusal of nursing care, limitation of resources and distributive justice, everyday moral dilemmas Ethical aspects of caring for the elderly. Ageism. The dignity of the elderly and its implementation in nursing care. Intimacy and sexuality of older people. Ethical aspects of end-of-life care. Withholding or withdrawing of futile treatment, palliative sedation, assisted dying and the role of nurses. Ethical aspects of the relationship between nurses and other health professionals. Dignity and autonomy of nurses.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-013/22	Course title: Nursing II-2
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 14s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-004/22 - Nursing II-1	
Course requirements: The evaluation of students is carried out through oral presentation of the selected topic and oral exam. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less. Scale of assessment (preliminary/final): 20/80	
Learning outcomes: After completing the subject, the student is able to know and able to follow legal regulations related to the nursing profession, define ethical and professional standards and apply them in practice. They can assess and evaluate the work environment and propose measures for improvement. They understand the importance of teamwork and can implement interventions to strengthen it. The student is able to characterize both the content and scope of education, including competency-based education. They can justify the differences between educational and healthcare documentation. They are able to explain the process of standardization and its significance.	
Class syllabus: Work environment issues. Evaluation of the work environment, SWOT analysis. Leadership and management in nursing. Team and team collaboration. Selected tools for evaluating teamwork in nursing. Interventions aimed at strengthening team collaboration – TeamSTEPPS. Nursing Education. Competency-based education. Advanced practice. Nursing Documentation. School documentation vs. healthcare documentation. Compassion and Compassionate Care. Nurse Turnover. Impact of adverse events on healthcare workers. Secondary victims. Standards and care maps.

STATE EXAM DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-SS2/22	Course title: Nursing II.
Number of credits: 5	
Recommended semester: 3., 4..	
Educational level: II.	
<p>Course requirements: The state exam can be carried out by the student after the fulfilment of the obligations stated in the study program. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less.</p>	
<p>Learning outcomes: The graduate knows the principles of nursing, and he/she can apply them in his/her profession. He/she is generally educated and professionally prepared to understand the relationship between nursing science, biomedical sciences, social sciences and human sciences, and he/she is able to transform this knowledge into the holistic approach in nursing practice. The graduate has theoretical knowledge from the fields that describe the organs and systems of a healthy and sick person, deal with his/her psychological processes and characteristics, the social environment, cultural influences, as well as his spirituality, belief and world-view so he/she is able to support and protect health, prevent diseases, educate and motivate people to healthy lifestyle of individuals, family and the entire community and to provide quality nursing care. The graduate has skills and abilities to perform nursing activities for people in health and disease from the prenatal period to the period of dying and death. The graduate has theoretical and practical skills to choose a nursing model and use the nursing process adequately. The graduate is ready to perform tasks of the nursing profession. He/she has the ability to manage and provide nursing care - preventive, educational, supportive, curative, rehabilitative or helpful - to individuals, families and groups. He/ she has the ability to actively and effectively integrate himself/herself into the healthcare team. The graduate understands the human as a result of biological, physical, chemical, psychological, social, spiritual interaction and other influences of the external and internal environment on the human. The graduate knows the basics of scientific work in nursing and methods of obtaining scientific and professional information. By the study of nursing, the graduate gains the motivation to further personal and professional growth through continuing education. He/she is governed by the legislation that is necessary for the performing of the nursing profession. The graduate knows the basics of work in a multimedia environment and understands the basics of one world language. The graduate has the assumptions to continue in further study. The graduate enters into the practice as a convinced defender of the independence of his/her profession and modern trends in nursing theory and practice. The graduate is the carrier of humanistic principles; he/she respects the veneration of life, human dignity and observation of human rights. He/she develops the ability of empathy. He/she adheres to the principles of nursing ethics that he/she is a carrier. The graduate is ready to manage the nursing process in all types and at all levels of healthcare facilities. He/she recognises the organisational principles of various types of primary, secondary and tertiary healthcare. The graduate has theoretical and practical</p>	

skills to choose a nursing model and use the nursing process adequately. The graduate is ready to perform tasks of the nursing profession. He/she has the ability to manage and provide nursing care - preventive, educational, supportive, curative, rehabilitative or helpful - to individuals, families and groups. He/she has the ability to actively and effectively integrate himself/herself into the healthcare team. He/she is capable of developing the nursing practice, critical thinking and exploiting the results of the research. He/she is able to work in the context of evidence-based nursing.

Class syllabus:

Aging of the Slovak population, heterogeneity of the senior population, priorities of clinical geriatrics and gerontological nursing. Frailty syndrome in seniors, characteristics of frailty, factors contributing to frailty, frailty screening, nursing diagnosis, prevention of frailty. Geriatric patients, characteristics, indicators of health status and prognosis, geriatric symptoms and syndroms.

Assessment of the functional status of seniors and geriatric patients: concept of functional diagnostics, goals and areas of screening and in-depth assessment, measurement tools.

Geriatric immobility syndrome. Geriatric instability and falls syndrome. Geriatric malnutrition and dehydration syndrome. Psychological geriatric syndromes – depression, delirium, dementia.

Geriatric syndrome of neglect, abuse, maltreatment; violence against seniors. Nursing diagnostics and interventions in connection with geriatric syndromes. Specifics of the clinical picture, diagnostics, and course of surgical diseases in seniors and geriatric patients.

Management of nursing care in surgery in seniors and geriatric patients undergoing acute and emergency surgery. Preoperative assessment of seniors and geriatric patients, surgical risk, nursing care in the preoperative period. Postoperative complications in elderly and geriatric patients, nursing care in the prevention of postoperative complications.

Postoperative nursing care for seniors and geriatric patients in the intensive care unit and standard nursing unit. Patient safety as a component of quality care: safety culture, international guidelines, legislative standards in the Slovak Republic. Adverse events – types, reporting systems. Communication as a basic professional skill of a nurse. Interpersonal communication, empathy, and active listening in nursing.

Intrapersonal and interdisciplinary communication in nursing. Team communication, team communication tools, structured SBAR/ISBAR model. Communication in palliative nursing care – nurse-patient relationship in palliative care, importance of communication, delivering "bad" news, communication with the patient and their loved ones in the active dying phase, communication with the bereaved after the patient's death.

Patient safety in the operating room: safety checklist for surgery. Minimizing adverse events associated with invasive procedures/surgery. Nosocomial infections, requirements for safe practice: prevention/minimization of the occurrence and spread of infection. Impact of infections on patient care costs. Safety of pharmacotherapy: medication errors and their causes, reduction of medication errors, requirements for safe performance of pharmacotherapy.

Pressure ulcers developed during hospitalization: pressure ulcers as an indicator of quality of care and as an adverse event, key interventions in the prevention of pressure ulcers and in the treatment of pressure ulcers.

Falls during hospitalization: falls as adverse events, screening and assessment of fall risk, preventive and protective interventions, post-fall analysis, staff education. Systematic standardized ABC D E approach to the recognition, assessment, and management of acute patient conditions.

The concept of missing, assigned, and unfinished nursing care in relation to patient safety and the quality of nursing care. Predictors, reasons, and outcomes. Evidence-based nursing, characteristics of the phase, significance, conditions and barriers in teaching and clinical practice.

Standardization of nursing care. Standards and maps of nursing care. Clinical recommended procedures. Individualization versus standardization of nursing care. Professionalism in nursing and its attributes. Professional socialization. Measurement tools in nursing. Issues of translation and modification of measurement tools. Competencies of nurses. Definition and characteristics of the concept. EFN framework of competencies for nurses. Decree No. 208/2024 Z. z. Continuing

education in nursing. Nursing ethics as a discipline. Basic concepts of nursing ethics: vulnerability, care, and dignity. Moral identity and dignity of nurses. Selected ethical theories and their reflection in nursing ethics. Ethical aspects of the nurse-patient relationship: paternalism and autonomy, trust, the concept of patient advocacy. Moral competencies and decision-making: moral sensitivity, moral reasoning, moral distress, and dilemmas. Ethical aspects of caring for seniors. Ageism. The dignity of seniors and its implementation in nursing care. Managers in healthcare. Work activities and the application of basic managerial functions in the work of a healthcare manager in various types of healthcare facilities. Internal environment and external influences on activities in a healthcare organization. Team management. Strategic management in a healthcare organization. Quality management in healthcare. Quality management system in a healthcare organization. Personnel activities and human resources in a healthcare organization. The importance and application of basic legislation in human resource management and its impact on healthcare practice. Educational goals and their function in nursing education – concept, formulation of goals, taxonomy of goals. Educational standards. Didactic methods, characteristics, classification, activating teaching methods in nursing. Mentor in nursing, role and competencies of a mentor. Learning and teaching process in adult education. Clinical supervision of students. Student assessment methods – strategies for assessing students' ability to perform practical tasks. Models and theoretical frameworks for health promotion (opinion model, health promotion model, preparation and procedure model, communication model of behavior change). Individual behavior in relation to health and the possibility of change. Health promotion and prevention. Basic principles and foundations of health promotion. Determinants of health, assessment of health risks. Health literacy and compliance in prevention and health promotion. Screening, preventive examinations, dispensary care. Health promotion and prevention in different age groups and health promotion programs. Quantitative research, objectives, data collection methods (questionnaires, scales), evaluation methods, validity, reliability of research. Qualitative research, objectives, data collection methods (interviews, focus groups), evaluation methods, credibility in qualitative research.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-046/22	Course title: Nursing Practice
Educational activities: Type of activities: practice Number of hours: per week: per level/semester: 300s Form of the course: on-site learning	
Number of credits: 9	
Recommended semester: 4.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-019/22 - Winter Practice (2)	
Course requirements: Elaboration of an educational material / educational program in adult or elderly patients with selected health condition. Final evaluation of the student - communication skills, teamwork, attendance, grooming, hygiene and epidemiological regime, practical skills and theoretical knowledge, ethical standards. Allocation sheet, Safety regulations, and record of arrivals and departures at the workplace List of Practical Outputs Scale of assessment (preliminary/final): 0/100	
Learning outcomes: After completing the subject, the student can provide individualized nursing care to adult and elderly patients with various (predominantly chronic) diseases in various clinical settings, emphasizing a holistic approach, clinically appropriate and safe practice, respecting the principles of evidence-based practice and within the scope of competencies of a nurse with a second degree in higher education. The student can apply the management of chronic symptomatology and patient safety. The student can think clinically and critically. The student can provide patients with adequate and high-quality nursing care in health and disease, respecting professional and ethical norms. The student is able to improve basic and advance nursing techniques and skills (theoretically and practically) and specific diagnostic and therapeutic techniques at the standard care and intensive care units. The student can apply the nursing process method. He/she can apply theoretical knowledge to nursing practice in developing educational material and educational program for the needs of the clinical workplace in adult or elderly patient. Can apply theoretical knowledge in clinical practice in the development of educational material and educational programme for the needs of the clinical workplace. The student will acquire knowledge of technical innovations related to health and nursing care methods.	
Class syllabus: Implementation of the nursing process method in the care of the patient in the acute condition (in case of acute admission) and the planned admission of the adult or elderly patient. Nursing physical examination of a patient. Assessment of patient needs and problems, administration of measuring tools within the scope of	

the nurse's competency (selected areas of assessment). Assessment of health risks and ensuring patient safety.
 Management of symptomatology of chronic diseases.
 Implementation of fundamental and specialised nursing techniques.
 Management of health records within the scope of nursing care.
 Nursing rehabilitation of the patient.
 Discharge planning of the patient for home care and community care.
 Targeted patient/ family education to acquire knowledge and practical skills during hospitalization and discharge planning for home care (self-management of symptomatology, adherence to treatment and regimens).
 Implementation of patient/family education during hospitalization and before discharge to home care (self-management of symptomatology, adherence to treatment and regimen measures).
 Elaboration of educational material or educational program in adult or elderly patient with a selected health condition for the needs of the clinical workplace.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-012/22	Course title: Nursing Research II-1
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 14s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 2.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-005/22 - Evidence Based Nursing	
Course requirements: The evaluation of students takes place in the form of a written knowledge test and evaluation of the elaboration of a research project for a diploma thesis. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: By completion of the subject student gains knowledge of scientific methods in nursing. Student is able to search for literature sources, determine a research problem, and choose adequate research methods. Student is familiar with ethical requirements of the research on a human subject; is able to implement the research results into the practice, and based on the knowledge gained, is able to elaborate master's thesis.	
Class syllabus: Introduction to nursing research. Quantitative and qualitative research in nursing. Types of qualitative and quantitative research. Research project (quantitative and qualitative) with a focus on the master's thesis. Setting problems and goals in quantitative and qualitative research. Hypothesis in quantitative research. Work with scientific literature, search, use, and processing. Evaluation of the quality of literary sources: quantitative and qualitative studies. Citation of bibliographic references. Methods of empirical data collection in quantitative research. Selected methods: questionnaire and scales. Methods of collecting empirical data in qualitative research. Selected methods: interview and focus group. Thematic analysis method. Determination of the research sample in qualitative and quantitative research. Method of selection and representativeness of the research sample. Reliability and quality criteria in quantitative and qualitative research. Validity and reliability. Trustworthiness in qualitative research.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-018/22	Course title: Nursing Research II-2
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 14s Form of the course: on-site learning	
Number of credits: 3	
Recommended semester: 3.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-012/22 - Nursing Research II-1	
Course requirements: The evaluation of students is carried out through written test. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less. Scale of assessment (preliminary/final): 0/100	
Learning outcomes: The Student is able to gain basic understanding of statistical data analysis, including the descriptive and inferential statistics. She/he can understand difference between a sample and a population, is aware of different types of variables, can translate a research hypothesis into the statistical one and can perform basic statistical data analyses. Student can test hypotheses to interpret results of data explorations and statistical analyses.	
Class syllabus: Population and sample, random variable. Representative sample. Methods of sample selection. Exploratory data analysis – plots and summary statistics, normality of distribution. Univariate and bivariate descriptive statistics of location, scale and shape of the distribution. Dependence, association, correlation and regression. Contingency tables. Hypothesis testing, p-value, evidence against the null hypothesis. Parametric tests of the population mean. Nonparametric tests and their limitations. Factor analysis: exploratory and confirmatory, reliability. Case studies from nursing.	
Recommended literature: Čáp, J., Žiaková, K.: Ošetrovateľský výskum – súbor prezentácií. COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-029/22	Course title: Nursing Research II-3
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 14s Form of the course: on-site learning	
Number of credits: 7	
Recommended semester: 4.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-018/22 - Nursing Research II-2	
Course requirements: CPO (70 hours) - preparation of master's thesis The evaluation of students is carried out through preparation of master's thesis, which is evaluated on the basis of the criteria stated in the opinion of the supervisor of the master's thesis. Overall evaluation: A: 100 - 91%, B: 90 - 81%, C: 80 - 73%, D: 72 – 66%, E: 65 – 60%, FX: 59% and less. Scale of assessment (preliminary/final): 0/100	
Learning outcomes: After completing the subject, the student will gain knowledge and skills about scientific methods in the field of nursing (quantitative and qualitative). Can search for relevant literary sources, determine the research problem, choose adequate research methods, select respondents for the elaboration of the diploma thesis. Can use methods of descriptive and inductive statistics and thematic analysis to evaluate data of quantitative and qualitative nature. She/he knows the ethical requirements of research on the human subject. Based on the knowledge, he is able to process a master's thesis.	
Class syllabus: Formal and content requirements for the preparation of the master's thesis - Directive of the Rector of Comenius University in Bratislava on the basic requirements for final theses, rigorous theses and habilitation theses, control of their originality, storage and access to Comenius University in Bratislava. Elaboration of the current overview of knowledge at home and abroad on the topic of the diploma thesis. Realization of the practical part of the master's thesis. Preparation of results and defense of the master's thesis. Preparation for comments and questions of the opponent's master's thesis.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-041/22	Course title: Nursing care for seniors and geriatric patients (1)
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 36s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 1.	
Educational level: II.	
Prerequisites:	
Course requirements: Oral examination. Overall rating: A: 91–100 %, B: 81–90 %, C: 73–80 %, D: 72–66 %, E: 60–65 %, FX: 59% and less. Scale of assessment (preliminary/final): 0/100	
Learning outcomes: After completing the course, the student is able to define and describe the characteristics of the aging of the Slovak population and its effects on society. He/she is able to describe national programs and facilities for the elderly and geriatric population. He/she can characterize the tasks of gerontological nursing, has an overview of the tools for assessing the health and functional condition of seniors and geriatric patients, can use them within their competencies. The student is able to characterize and describe the geriatric patient, individual symptoms and syndromes. He/she is able to apply the specifics of communication with the senior and the geriatric patient.	
Class syllabus: Aging of the Slovak population (socio-demographic and health characteristics) and its impact on the health and social system of the Slovak Republic. Theory of aging, support of healthy aging. The system of health and social care in the Slovak Republic - acute and long-term care facilities for the elderly population and geriatric patients. Gerontological nursing, the role of the nurse, a comprehensive assessment of the health and functional condition of the senior and the geriatric patient. Geriatric patient - characteristics, geriatric fragility, life with chronic disease. Geriatric symptoms and syndromes: overview, classification. Communication with seniors and geriatric patients. Geriatric sensory deficit syndrome.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-042/22	Course title: Nursing care for seniors and geriatric patients (2)
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 36s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-041/22 - Nursing care for seniors and geriatric patients (1)	
Course requirements: The evaluation of students is carried out by evaluation of seminar work focused on the processing of nursing care for patients with selected geriatric syndrome and in the form of an oral exam; Overall evaluation: A: 91–100%, B: 81–90%, C: 74–80%, D: 73–66%, E: 60–65%, FX: 59% and less Scale of assessment (preliminary/final): 40/60	
Learning outcomes: After completing the subject, the student is able to know and follow knowledge of nursing care for the elderly and geriatric patients. The student is able to define individual geriatric syndromes, demonstrate assessment of the geriatric syndromes and characterize the management of care for patients with selected geriatric syndromes. The student is able to identify safe gerontopharmacotherapy and describe changes in the use of drugs in old age. He/she can present the education of geriatric patients/relatives for selected geriatric syndromes. He/she will be able to assess the ECG recording in the range of quality, heart rate and heart rhythm and identify pathological values or changes. He/she is able to use a structured method of SBAR communication.	
Class syllabus: Nutrition and hydration: GS malnutrition and dehydration. Geriatric nutritional assessment. Malnutrition - risk factors, consequences, treatment and prevention. Management of care for patients with malnutrition and dehydration. GS immobility and decubitus. Characteristics, prevalence, nursing diagnosis and interventions. Falls: GS instability and falls. Characteristics, prevalence, programs aimed at minimizing falls, activation of seniors, training / strategies in fall prevention. Neurocognitive disorders: GS 3D - dementia, delirium, depression. Assessment of mental state in an elderly adult patient. Management of care for patients with neurocognitive disorders. Pain and sleep disorders in neurocognitive disorders. Pain classification. Assessment of pain in a patient with a neurocognitive disorder. Management of analgesic treatment based on the doctor's indication, evaluation of treatment effectiveness, non-pharmacological pain relief procedures. Sleep	

disorders in a patient with a neurocognitive disorder. Obstructive sleep apnea. Management of patient care with sleep disorders.
GS neglect, abuse, abuse; violence against the elderly. Definition, epidemiology, risk factors, clinical symptoms, diagnostics, care management.
Safe gerontopharmacotherapy. Factors affecting all drugs in old age. Changes in the use of drugs in old age. Drug interactions, drug effects and specifics of their administration. Education of seniors about pharmacological treatment.
Spirituality in the elderly with regard to chronic disease. Conceptualization of spirituality in the context of the needs of seniors. Tools for assessing the spiritual needs of seniors.
Assessment of the ECG recording in terms of quality, heart rate and heart rhythm and identification of pathological values/changes.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-043/22	Course title: Nursing care for seniors and geriatric patients (3)
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 36s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 3.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-042/22 - Nursing care for seniors and geriatric patients (2)	
Course requirements: The evaluation of students is carried of an oral exam. Overall evaluation: A: 91–100%, B: 81–90%, C: 74–80%, D: 73–66%, E: 60–65%, FX: 59% and less. Scale of assessment (preliminary/final): 0/100	
Learning outcomes: By completing the course, the student is able to present knowledge about the care of geriatric patients in surgical disciplines, in the perioperative period in surgical diseases and after injury. The student is able to explain the peculiarities of the clinical picture and course of surgical diseases in geriatric patients. The student will be able to perform a preoperative assessment and critically evaluate the surgical risk in a geriatric patient. The student will be able to demonstrate critical thinking skills in the management of perioperative care of geriatric patients in general and special surgery and in intensive care. The student is able to implement and present education of geriatric patients/relatives in selected surgical problems according to evidence-based practice (EBP). The student is able to critically evaluate the problems of seniors in surgical nursing, using the SBAR method.	
Class syllabus: Introduction to the issues of treatment and care of geriatric patients in surgical specialties. Main principles of surgical care, principles of surgical performance in geriatric patients. Peculiarities of needs, specifics of the clinical picture and course of surgical diseases in seniors. Evaluation of preoperative assessment and surgical risk. Specifics of preoperative preparation in geriatric patients with comorbidities. Anesthesia in geriatric patients. Education of geriatric patients. Infection in surgery in geriatric patients. Management of nursing care in planned and acute surgery. Postoperative nursing care for geriatric patients. Postoperative complications Planning for the discharge of geriatric patients and ensuring follow-up care.	

Indication and implementation of suturing of a small surgical wound and removal of sutures from a primarily healing wound.

Course ID: JLF.ÚO/J-2-OSx-014/22	Course title: Pedagogy in Nursing (2)
Educational activities: Type of activities: practicals Number of hours: per week: per level/semester: 28s Form of the course: on-site learning	
Number of credits: 4	
Recommended semester: 2.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-007/22 - Health Promotion and Prevention	
Course requirements: The evaluation of students takes place in the form of evaluation of the semestral thesis and of the written test. Overall evaluation: A: 91–100%, B: 81–90%, C: 74–80%, D: 73–66%, E: 60–65%, FX: 59% and less. Scale of assessment (preliminary/final): 50/50	
Learning outcomes: After completing the subject, the student is able to apply theoretical knowledge of pedagogy and didactics to nursing practice - the student can acquire knowledge and skills in creation of educational materials. Additionally, he/she is able to capable of construction of educational plans for healthy or sick individuals as well as families and communities. The graduate of the course can define basic concepts in pedagogy and didactics. The graduate demonstrates the ability to use appropriate methods, forms and means of education. The student is able to develop and implement an educational plan for the individual, family, community. He/she is able to prepare educational materials for individuals, families or communities. This course also contributes to the formation of the correct attitude of the student in professional training in the field of counseling, consulting and providing education in nursing practice.	
Class syllabus: Pedagogy - concept and subject of pedagogy, fundamental pedagogical terms. Education as a subject of pedagogy. Self-education and self-knowledge. Educational process. Key terms - education, educator, stages of the teaching process. Goals and their function in education - concept, goal formulation, taxonomy. Didactic principles in education. Organizational forms of teaching in education. Material-didactic means in education. Teaching methods - concept, classification, activating teaching methods in nursing Pedagogical communication - principles, forms, methods. Motivation in education.	

Educational process in nursing - phases of the educational process. Conditions of the educational process, factors influencing learning. Educational materials - criteria for creating educational materials.

Creation of educational materials for individuals, families and communities with respect to developmental specifics.

Evaluation process in education - methods, competencies of nurses in evaluation, feedback in education, effectiveness of educational strategies.

Educational plan - creation of educational plan, structure of educational plan.

Preparation of an educational plan for an individual, family or community with regard to developmental specifics and disease.

Nurse in the role of advisor / consultant / teacher - competences of the nurse, present and future. E-learning - importance in the education of the individual, family, community.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Jessenius Faculty of Medicine in Martin	
Course ID: JLF.ÚO/J-2-OSx-010/22	Course title: Summer Practice (1)
Educational activities: Type of activities: practice Number of hours: per week: per level/semester: 300s Form of the course: on-site learning	
Number of credits: 13	
Recommended semester: 2.	
Educational level: II.	
Prerequisites: JLF.ÚO/J-2-OSx-008/18 - Winter Practice (1)	
Course requirements: Elaboration of the nursing care for patients with selected geriatric syndrome (application). Final evaluation of the student - communication skills, teamwork, attendance, grooming, hygiene and epidemiological regime, practical skills and theoretical knowledge, ethical standards. Allocation sheet, Safety regulations, and record of arrivals and departures at the workplace List of Practical Outputs. Scale of assessment (preliminary/final): 0/100	
Learning outcomes: By completing the course, the student will be able to provide individualised nursing care to adult and geriatric patients with various (predominantly chronic) diseases in different clinical practice settings, including community facilities, with an emphasis on a holistic approach, clinically correct and safe practice, and with respect for the principles of evidence-based practice. The student will be able to apply strategies of the chronic symptomatology management and patient safety. The student will demonstrate clinical and critical thinking. The student will be able to provide the patients with appropriate and high-quality nursing care in health and illness, while adhering to professional and ethical standards. The student will be able to define and apply procedures of standard nursing interventions (theoretically, and practically) as well as special diagnostic and therapeutic procedures in standard care units, intensive care units, and community facilities. The student will be able to apply the nursing process method. The student will be able to describe the steps of the educational process and apply theoretical knowledge in clinical practice when implementing patient education for adult or geriatric patients. In order to standardise communication of (critical) events in clinical practice, the student will be able to use the structured SBAR communication method effectively. He/she is able to characterize the individual geriatric syndromes and apply theoretical knowledge in clinical practice in nursing care of patients with selected geriatric syndromes.	
Class syllabus: Implementation of the nursing process method in the care of the patient in the acute condition (in case of acute admission) and the planned admission of the adult or elderly patient. Nursing physical examination of a patient. Assessment of patient needs and problems, administration of measuring tools within the scope of	

the nurse's competency (selected areas of assessment). Assessment of health risks and ensuring patient safety.
 Management of symptomatology of chronic diseases.
 Implementation of fundamental and specialised nursing techniques.
 Management of health records within the scope of nursing care.
 Nursing rehabilitation of the patient.
 Discharge planning of the patient for home care and community care.
 Targeted patient/ family education to acquire knowledge and practical skills during hospitalization and discharge planning for home care (self-management of symptomatology, adherence to treatment and regimens).
 Elaboration of nursing plane for patients with selected geriatric syndrome (application).
