

Course descriptions

TABLE OF CONTENTS

1. N-DSSZ-412/22 Abstract of a contribution from a domestic or an international conference (originally AFG, AFK, AFH, AFL).....	3
2. N-DDOB-011/22 An Overview of Important Discoveries in Biology.....	4
3. N-DSSZ-505/22 Bachelor's thesis reviewer.....	6
4. N-DSSZ-504/22 Bachelor's thesis supervisor.....	7
5. N-DSSZ-414/22 Completing a long-term ERASMUS+ internship (minimum 60 days).....	8
6. N-DSSZ-415/22 Completion of SAIA/NŠP internship program or other equivalent (minimum 30 days).....	9
7. N-DSSZ-416/22 Completion of a short-term foreign internship (15-30 days, and related to the topic of the PhD thesis).....	10
8. N-DDOB-010/22 Current Problems in Didactics of Biology.....	11
9. N-DSSZ-303/22 Defence of dissertation thesis (state exam).....	13
10. N-DDOB-012/22 Digital Educational Resources in the Context of Evaluating Their Quality.....	14
11. PriF-DSSZ-001/22 Dissertation 1.....	16
12. PriF-DSSZ-002/22 Dissertation 2.....	18
13. PriF-DSSZ-003/22 Dissertation 3.....	20
14. PriF-DSSZ-004/22 Dissertation 4.....	22
15. PriF-DSSZ-005/22 Dissertation 5.....	24
16. PriF-DSSZ-006/22 Dissertation 6.....	26
17. PriF-DSSZ-007/22 Dissertation 7.....	27
18. N-DDOB-400/22 Dissertation exam (state exam).....	28
19. N-DDOB-009/22 Educational Technologies in Science Education.....	30
20. N-DSSZ-400/22 Grant CU or Grant SAS or equivalent grant.....	32
21. N-DSSZ-413/22 Intellectual Property Rights Document (originally AGJ).....	33
22. N-DSSZ-508/22 Other activities.....	34
23. N-DSSZ-501/22 P1 Pedagogical output as a whole (originally ACA, ACB, BCI, BCB).....	35
24. N-DSSZ-503/22 P2 Pedagogical output as a part (originally BCK).....	36
25. N-DSSZ-502/22 P2 Pedagogical output as part (originally ACC, ACD).....	37
26. N-DSSZ-507/22 Pedagogical activity (4 hours/WS and 4 hours/SS) or alternative pedagogical work.....	38
27. N-DSSZ-026/22 Professional English 1.....	39
28. N-DSSZ-027/22 Professional English 2.....	41
29. N-DDOB-002/22 Scientific Research Methods in Didactics of Science Subjects.....	43
30. N-DSSZ-500/22 Selected topics from university pedagogy for non-teachers.....	45
31. N-DSSZ-506/22 Supervisor of the SSC contribution.....	46
32. N-DDOB-001/22 The Actual Problems Solved in Psychology and Pedagogy.....	47
33. N-DDOB-013/22 The Latest Knowledge in Didactics of Biology.....	49
34. N-DSSZ-404/22 V1 Scientific output as a whole - ESB monograph (originally AAA, ABA), individual authorship less than 3 AH.....	51
35. N-DSSZ-401/22 V1 Scientific output as a whole – ESB monograph (originally AAA, ABA), individual authorship share ≥ 3 AH.....	52
36. N-DSSZ-405/22 V2 Scientific output as part - study in ESB or collection (originally AAB, ABA, ABB), individual authorship less than 3 AH.....	53
37. N-DSSZ-402/22 V2 Scientific output as part - study in ESB or collection (originally AAB, ABA, ABB), individual authorship share ≥ 3 AH.....	54

38. N-DSSZ-411/22 V2 Scientific output as part of ESB, collection - contribution in peer reviewed scientific collection, monograph (originally AEC, AFA, AFC, AED).....	55
39. N-DSSZ-406/22 V3 Scientific output as a part - study in a journal (originally AAB, ABA, ABB), individual authorship less than 3 AH.....	56
40. N-DSSZ-403/22 V3 Scientific output as a part - study in a journal (originally AAB, ABA, ABB), individual authorship ≥ 3 AH.....	57
41. N-DSSZ-410/22 V3 Scientific output in a journal outside the index databases (originally ADE, ADF).....	58
42. N-DSSZ-407/22 V3 Scientific output in a journal registered by CCC, WOS, SCOPUS - JCR/ Q1 – Q2 (originally ADC, ADD, ADM, ADN), first or corresponding author.....	59
43. N-DSSZ-408/22 V3 Scientific output in a journal registered by CCC, WOS, SCOPUS - JCR/ Q3- Q4 (originally ADC, ADD, ADM, ADN), first or corresponding author.....	60
44. N-DSSZ-409/22 V3 Scientific output in the journal registered by CCC, WOS, SCOPUS - JCR/ Q1 – Q2 – Q3 - Q4 (originally ADC, ADD, ADM, ADN), co-author.....	61

COURSE DESCRIPTION

Academic year: 2025/2026							
University: Comenius University Bratislava							
Faculty: Faculty of Natural Sciences							
Course ID: PriF/N-DSSZ-412/22			Course title: Abstract of a contribution from a domestic or an international conference (originally AFG, AFK, AFH, AFL)				
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning							
Number of credits: 4							
Recommended semester:							
Educational level: III.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DDOB-011/22	Course title: An Overview of Important Discoveries in Biology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of Study: Lectures Number of contact hours: per week: 2 per level/semester: 26 Method of study: present, distant	
Number of credits: 5	
Recommended semester: 4.	
Educational level: III.	
Prerequisites:	
Course requirements: The student will be evaluated on the basis of an oral exam/test, must answer 3 questions (for 50 and 2 x 25 points) / 50 test tasks (100 points). Credits will not be awarded to a student who scores less than 60% of the points. The course takes place in person. In the case of a situation that does not allow the present form, the teacher decides on the method of distance form of teaching.	
Learning outcomes: The student will gain a basic overview of the most important biological discoveries that have significantly stimulated the development of biological knowledge. They will learn about the conditions of the creation of individual biological disciplines and eminent personalities, whose knowledge and discoveries meant a clear shift in knowledge of life sciences. To get a good overview, the lectures mention the period from the ancient Greek natural philosophers 6-5th century before the Christ until the 20th century after the Christ.	
Class syllabus: Lectures are focused on topics: 1. Periodization of the history of biology. 2. Life sciences in ancient Greece and Rome. 3. Antiquities, the Middle Ages, Arabic science in Europe, the creation of universities. 4. Modern times, encyclopedists, reformer of anatomy – Vesalius. 5. Humanism and the Renaissance. F. Bacon, mechanism of R. Descart. 6. Iatrochemical school, the birth of physiology – Harvey. 7. Microscope and its use in life sciences. 8. Embryology, modern classification of organisms. 9. Introduction to the concept of biology – Lamarck, Treviranus.	

10. Evolutionary theories, Lamarckism, Darwinism. 11. Comparative anatomy, palaeontology – Cuvier. Cell theory, histology. 12. Mendel, the birth of genetics (Hugo de Vries, Erich Tschermak, Carl Correns). 13. Chromosome theory, DNA structure, molecular biology.	
Recommended literature: Folta, J., Nový, L. (1981). Dejiny prírodných vied v dátach. Bratislava: Smena. Novikov. M. (1946). Dejiny biologických teórií. Vydala Matica slovenská v Turčianskom Sv. Martine. 171 s. Mayr, E. (1982). The Growth of Biological Thought. Belknap Press of Harvard Univ. Press, Cambridge (Mass.). Országh, I., Országhová, Z. (2018). Prehľad vývoja biologických poznatkov. Bratislava: Univerzita Komenského v Bratislave, 298 s. Taton, R. (ed.). (1966-1983). Histoire générale des sciences 1 – 3. Presses Universitaires de France, Paris, 724, 873, 763, 1080 s.	
Languages necessary to complete the course: Slovak in combination with English and French (literature study in English and French)	
Notes: The course is provided in the summer semester, in study programs. The capacity of the subject is not limited.	
Past grade distribution Total number of evaluated students: 1	
ABS	NEABS

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DDOB-010/22	Course title: Current Problems in Didactics of Biology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of Study: Seminar Number of contact hours: per week: 2 per level/semester: 26 Method of study: present	
Number of credits: 5	
Recommended semester: 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: Successful completion of the course is conditioned by the elaboration of a literature search and the passing of the colloquial exam. Credits will not be awarded to a student who receives less than 60%.	
Learning outcomes: Acquirement knowledge about the history and development of the biology didactics in an international comparative framework, its theoretical foundations, methodology and perspectives. Gaining the ability to systematically analyze disciplinary didactic problems and propose their solutions. Development of methodological apparatus. Development of work with national and international source databases, academic writing skills, knowledge of scientific and publishing ethics. Acquisition and development of theoretical knowledge and didactic competencies needed to perform the dissertation exam.	
Class syllabus: History of the development of biology didactics as a scientific field. Starting points and milestones in the development of biology didactics in Slovakia. Methodology and specifics of research and development in the field of biology didactics. Current professional-didactic problems solved within the didactics of biology, world research projects, principles of their design, selection of methods and instruments, implementation, evaluation and interpretation of the obtained results, aspects of applying the obtained results in practice, taking into account the latest trends in biology didactics.	
Recommended literature: Janík, T., & Stuchlíková, I. (2010). Oborové didaktiky na vzestupu: přehled aktuálních vývojových tendencí. Scientia in educatione, 1(1), 5-32. Kostas Kampourakis, Michael J. Reiss (Eds.). (2018) Teaching Biology in Schools: Global Research, Issues, and Trends. Routledge, City. 292 pp.

STATE EXAM DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DSSZ-303/22	Course title: Defence of dissertation thesis
Number of credits: 30	
Educational level: III.	
Course requirements: Conditions for passing the course: Course evaluation takes place as a part of the State examination in accordance to the Study regulations of the Faculty of Natural Sciences UK in Bratislava upon submission of the written part of the dissertation thesis (as final work). Assessment is standard and reflects the student's sufficient orientation in the issue. The conditions for successful course completion are in accordance with the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: The aim of the course is to capitalise on theoretical, methodological and applied knowledge of doctoral studies in the elaboration and subsequent defence of the dissertation thesis, and thus the successful completion of doctoral studies.	
Class syllabus: Brief outline of the course: The student's dissertation thesis will demonstrate his/her ability and readiness for independent scientific and creative activities in the area of research or development or for independent theoretical and creative artistic creativity. It should be characterised by a high degree of analysis and synthesis of knowledge, as well as a sufficient overview of existing literature. The work must be original and created by the author in compliance with the rules of working with information sources. The academic work must not appear to be plagiarised, nor infringe the copyrights of other authors. The author is required to thoroughly cite the information sources used, list the specific results of other authors or team of authors by citing the source, accurately describe the methods and working procedures of other authors or teams of authors, and document the laboratory results and field research of other authors or teams of authors. Style of citation is governed by the practice in the given scientific field, respecting the relevant norms and standards.	
State exam syllabus:	
Recommended literature: Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.	
Languages necessary to complete the course: Required language for successful course completion: Slovak language in combination with English (study literature in English)	
Last change: 24.10.2022	
Approved by: prof. RNDr. Miroslav Prokša, CSc.	

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DDOB-012/22	Course title: Digital Educational Resources in the Context of Evaluating Their Quality
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of Study: Lecture Number of contact hours: per week: 2 per level/semester: 26 Form of the course: present	
Number of credits: 3	
Recommended semester: 1., 2., 3., 4..	
Educational level: III.	
Prerequisites:	
Course requirements: The final grade includes evaluation from the analysis of selected educational solutions and learning environments, a total of a maximum of 100 points. To successfully pass the exam, the student must obtain at least 60 points.	
Learning outcomes: By completing the course, the student will be able to objectively assess the quality of educational digital technologies and the degree of their suitability for integration into the teaching process. They will get acquainted with the main principles and criteria for evaluating the quality of educational software and digital learning environments.	
Class syllabus: Properties of educational technologies and their assessment by experts and teachers; Evaluation of the quality of educational technologies and the possibility of their integration into teaching; The concept of comprehensive quality assessment of educational software and digital learning materials (CEELTES); Creation of educational software in the context of the application of constructivist principles and the concept of quality evaluation of educational digital technologies.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/PriF-DSSZ-001/22	Course title: Dissertation 1
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: Conditions for passing the course: Course evaluation will be conducted individually based on the doctoral student's individual study plan, as well as on the basis of an agreement between the academic supervisor and doctoral student. Evaluation is standard and shall reflect a sufficient orientation of the student in the presented subject matter for successful course completion according to the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: By passing this subject, the student will achieve sufficient orientation in the project issue of the dissertation thesis based on specific individual topics. This set task of knowledge is essential for a firmly established theoretical readiness of the course graduate in terms of his/her awareness, and equally supports his/her potential in a wide field of applied practice. Undoubtedly, the outcomes of his/her education will also be reflected in the student's overview in terms of methodological approaches in the subject matter.	
Class syllabus: Brief outline of the course: The subject Dissertation Thesis is a compulsory part of the doctoral student's study activities. The student requires a supremely individual character with regard to the specifics of the individual topics of the dissertation thesis. The basic syllabus should already be evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the solution to the topic of the dissertation thesis with emphasis on self-study and consultation with the academic supervisor and a wide spectrum of consultants, who will take part in creating the professional potential of the doctoral student for the next (scientific) stage of his/her studies.	
Recommended literature: Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.

Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/PriF-DSSZ-004/22	Course title: Dissertation 4
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 4.	
Educational level: III.	
Prerequisites:	
Course requirements: Conditions for passing the course: Course evaluation will be conducted individually based on the doctoral student's individual study plan, as well as on the basis of an agreement between the academic supervisor and doctoral student. Evaluation is standard and shall reflect a sufficient orientation of the student in the presented subject matter for successful course completion according to the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: By passing this subject, the student will achieve sufficient orientation in the project issue of the dissertation thesis based on specific individual topics. This set task of knowledge is essential for a firmly established theoretical readiness of the course graduate in terms of his/her awareness, and equally supports his/her potential in a wide field of applied practice. Undoubtedly, the outcomes of his/her education will also be reflected in the student's overview in terms of methodological approaches in the subject matter.	
Class syllabus: Brief outline of the course: The subject Dissertation Thesis is a compulsory part of the doctoral student's study activities. The student requires a supremely individual character with regard to the specifics of the individual topics of the dissertation thesis. The basic syllabus should already be evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the solution to the topic of the dissertation thesis with emphasis on self-study and consultation with the academic supervisor and a wide spectrum of consultants, who will take part in creating the professional potential of the doctoral student for the next (scientific) stage of his/her studies.	
Recommended literature: Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.	

Languages necessary to complete the course: Required language for successful course completion: Slovak language in combination with English (study literature in English)

STATE EXAM DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DDOB-400/22	Course title: Dissertation exam
Number of credits: 15	
Educational level: III.	
Course requirements: Conditions for passing the course: Course evaluation takes place as a part of the State examination in accordance to the Study regulations of the Faculty of Natural Sciences UK in Bratislava, as well as submission of the written part of the dissertation thesis within the set deadline. The subjects of the state examination include a discussion about the written work of the dissertation examination (prepared by the doctoral student), as well as other subjects of the oral examination (ad hoc) approved by the Dean. Assessment is standard and reflects the student's sufficient orientation in the issue. The conditions for successful course completion are in accordance with the Study Regulations of the Faculty of Natural Sciences UK.	
Learning outcomes: Educational outcomes: The objective of the course is to gain basic habits and cultural-ethical aspects of working with scientific literature, evaluation, and systemization of the studied knowledge. The doctoral student needs to successfully pass the dissertation examination according to the act on Universities and Study Regulations of the Faculty of Natural Sciences of Comenius University in Bratislava.	
Class syllabus: Brief outline of the course: Based on the description of the starting points, principles, and conclusions from the published results of the studied issues, the aim is to teach the doctoral student how to process critical research. A further objective is to understand the principles of scientific work and its legal, physical, and social attributes. The main output is the elaboration of the written work for the dissertation examination and its successful completion in accordance with the Study Regulations of the Faculty of Natural Sciences UK. The form and content of the work is regulated by article 34, paragraph 4 of the Study Regulations of the Faculty of Natural Sciences UK. The dissertation examination consists of a part consisting of a discussion of the written work for the dissertation examination, as well as a part in which the doctoral student needs to demonstrate theoretical knowledge according to the focus of the dissertation topic. The composition of the Examination Committee, the determination of the Opponent (expert examiner) and the general course of the dissertation examination are governed by the current Study Regulations of the Faculty of Natural Sciences UK.	
State exam syllabus:	
Recommended literature: Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.	
Languages necessary to complete the course:	

Required language for successful course completion: Slovak language in combination with English (study literature in English)
Last change: 19.10.2022

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DDOB-009/22	Course title: Educational Technologies in Science Education
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of Study: Lecture Number of contact hours: per week: 2 per level/semester: 26 Form of the course: present	
Number of credits: 5	
Recommended semester: 3.	
Educational level: III.	
Prerequisites:	
Course requirements: The final grade includes an evaluation for the created teaching models with the support of technology, a total of a maximum of 60 points, and an oral exam, a total of a maximum of 40 points. To proceed to the oral exam, the student must obtain at least 40 points for teaching models. To successfully pass the oral exam, the student must obtain at least 20 points. To successfully pass the exam, the student must obtain at least 60 points.	
Learning outcomes: By completing the course the student will know the possibilities and limits of integration of educational technologies into teaching and especially in science education, understand their importance in the context of supporting the teaching process and will be able to design appropriate and appropriate applications of selected educational technologies and teaching methods supporting constructivist principles, student research, and personalized learning into the science teaching program.	
Class syllabus: Digital resources and digital technologies vs. educational digital resources and educational technologies; Security in the digital world; BYOD in the teaching process - benefits, challenges, limits, and limitations; Digital literacy; Science literacy and its development through science education, Possibilities, and limits of the use of educational technologies in the support of research and research-oriented teaching; Selected educational digital technologies in the teaching of science subjects.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KJ/N-DSSZ-026/22	Course title: Professional English 1
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 1., 3.	
Educational level: III.	
Prerequisites:	
Course requirements: Each course participant is required to achieve proficient knowledge and usage of the English grammar, professional vocabulary, reading and listening comprehension, writing professional texts and oral presentations. Credits will be awarded to students who will demonstrate active participation and deliver all set tasks and assignments successfully. The course participants will be awarded a pass or a fail upon course completion.	
Learning outcomes: Upon completion of the course, PhD students will effectively use the English language for professional purposes. They will proficiently comprehend targeted written and audio texts and present their viewpoints in required forms.	
Class syllabus: Theoretical and practical skills in professional written communication include appropriate structure of formal written texts (emails, application forms, personal statements, cover letters, abstracts, scientific articles, paraphrasing, using citations, citing sources, etc.) The course also focuses on theoretical explanation of correct delivery of oral texts, professional presentations and discussions. The course primary target is to facilitate PhD students with proficient usage of all the aspects of written and oral communication in various settings.	
Recommended literature: Armer, T.: Cambridge English for Scientists CD ROM Writing Professional English Team of authors: Test your Listening Skills: A Handbook for Science Doctoral students Team of authors: Test your Reading Skills: A Handbook for Science Doctoral students

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KJ/N-DSSZ-027/22	Course title: Professional English 2
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: Each course participant is required to achieve proficient knowledge and usage of the English grammar, professional vocabulary, reading and listening comprehension, writing professional texts and oral presentations. Credits will be awarded to students who will demonstrate active participation during seminars and deliver all prior set tasks and assignments successfully. The course participants will be awarded a pass or a fail upon course completion	
Learning outcomes: Doctoral students who successfully pass the examination in Professional English 2 will be enabled to use the English language for specific purposes in all its forms effectively and sufficiently. They will thoroughly comprehend professional texts in written and/or audio form, acquire professional vocabulary and actively participate in various oral communication settings.	
Class syllabus: Theoretical and practical skills in professional writing communication in the English language as a follow up to prior gained knowledge in the previous semester encompass writing professional résumés, summaries, lay summaries, responses to job interview questions, professional CVs, comparing and contrasting in scientific articles, etc. Professional oral communication focusses on research-based scientific presentations and effectively led discussions.	
Recommended literature: Armer, T.: Cambridge English for Scientists CD ROM Writing Professional English Team of authors: Test your Listening Skills: A Handbook for Science Doctoral students Team of authors: Test your Reading Skills: A Handbook for Science Doctoral students	
Languages necessary to complete the course: English	
Notes: B1 level in English is required in order to pass this course. Seminars are held in summer semester. Number of students in one course is limited to twenty.	

Students can choose from four offered time slots.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DDOB-002/22	Course title: Scientific Research Methods in Didactics of Science Subjects
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of teaching: lecture, seminar Recommended range of lessons (in hours): Weekly: 4 For the period of study: 52 Study method: present	
Number of credits: 5	
Recommended semester: 2.	
Educational level: III.	
Prerequisites:	
Course requirements: The course is completed by an exam, the ratio of continuous / final evaluation is 50/50. The condition for successful completion of the course is to obtain at least 60% of the maximum possible evaluation of the course. The rating is given on a scale: 100-60% - graduated, 59-0% - failed.	
Learning outcomes: The aim of the course is to supplement and deepen the doctoral student's knowledge of the latest knowledge of methods, means and implementation of research in the didactics of science subjects with the intention of supporting the doctoral student's scientific work. Outputs are written presentations of the results of own or collective review studies of research methodology in didactics of science subjects in domestic or world language in common forms (article, proceedings, abstract, poster), as well as their oral presentations at domestic and foreign scientific events. Another output of the course is the elaboration of projects and applications for grants in domestic and foreign grant agencies, as well as for grants of UK and PriF UK.	
Class syllabus: The doctoral student participates in lectures and seminars, where the guarantors of the study present their research projects carried out worldwide. They draw attention to the principles of their design, selection of methods and means, implementation, evaluation and interpretation of the obtained results. They draw attention to aspects of applying the obtained results in practice. Considering the latest trends in the didactics of science subjects and which are necessary for the acquisition of the methodological apparatus about regarding regard to the content of the topic of the dissertation. The content of the course is chosen so that it has a complementary character to the main topics of the core of knowledge. Within the course, the doctoral student is guided from the beginning of	

the study to the elaboration of the usual forms of review studies on the results of scientific work in the form of co-authorship and independent authorship according to the hierarchy from poster to article in a quality foreign journal. In the preparation of the course program, the supervisor uses regular professional events at his / her own and other departments of the faculty, so that the doctoral student can present himself / herself several times here, but especially at other domestic and foreign scientific events.

Type, volume, methods and workload of the student - additional information Form of Study: seminar Number of contact hours: per week: 2 per level/semester: 26 Form of the course: present	
Number of credits: 5	
Recommended semester: 1.	
Educational level: III.	
Prerequisites:	
Course requirements: The course is completed by the defense of the semestral thesis (50% of the evaluation) and the colloquial exam (50% of the evaluation). The condition for successful completion of the course is to obtain at least 60% of the maximum possible evaluation of the course. The rating is given on a scale: 100-60% - graduated, 59-0% - failed.	
Learning outcomes: The student will demonstrate the ability to develop and adequately present an overview study in which he/she will present a selected current research problem in the field of psychology and pedagogy with due regard to the topic of the research project of his dissertation. At the same time, he/she can present the necessary knowledge at an appropriate level in a broader basis of pedagogy and psychology relevant to the chosen topic of the study and his/her research project.	
Class syllabus: The content of the course is focused on the presentation of current research problems in the field of psychology and pedagogy, with particular emphasis on areas such as social-emotional (mental) health of students and teachers; family and school cooperation; megatrends in the development of the teaching profession in the EU / OECD countries; learning environment, curriculum access and the digital world; social prevention and social pathology in school conditions - current challenges, classroom interaction, analysis and solutions of situations in school environment, etc.

COURSE DESCRIPTION

Academic year: 2025/2026	
University: Comenius University Bratislava	
Faculty: Faculty of Natural Sciences	
Course ID: PriF.KDPP/N-DDOB-013/22	Course title: The Latest Knowledge in Didactics of Biology
Educational activities: Type of activities: Number of hours: per week: per level/semester: Form of the course: on-site learning	
Type, volume, methods and workload of the student - additional information Form of Study: Seminar Number of contact hours: per week: 2 per level/semester: 26 Method of study: present	
Number of credits: 3	
Recommended semester: 3.	
Educational level: III.	
Prerequisites:	
Course requirements: Successful completion of the course is conditioned by the elaboration of a search of the studied literature. Credits will not be awarded to a student who receives less than 60%	
Learning outcomes: Developing knowledge of biology didactics as a starting point for planning and conducting research and development and creating new knowledge in the field of biology didactics. Gaining an overview of the latest scientific knowledge in the didactics of biology in an international context. Developing work with national and international source databases, academic writing skills, scientific and publishing ethics.	
Class syllabus: The subject is the part of the individual study program of the doctoral student. It is designed for students to acquire knowledge of the theoretical foundations of biology didactics in selected areas that have some relationship to the core topics of the core of the study field to supplement the missing knowledge needed for dissertation issues and for the elaboration of written dissertation exams. The doctoral student develops the theoretical knowledge and didactic competencies needed to take the dissertation exam.	
Recommended literature: Current publications are recommended by the teacher.	
Languages necessary to complete the course: Slovak in combination with English (literature study in English)	
Notes:
