Number of credits: 4	
Recommended semester: 2., 4.	
Educational level: II.	
Prerequisites:	
Course requirements: <p>The students' results are evaluated exclusively by continuously checking their performance during the teaching part of the semester. Student are classified in the last lesson of the credit week. During the teaching period of the semester, students actively participate in practical tasks related to reading and interpretation of the source material (provided by the teacher, assigned in advance). Students are required to put in individual work as part of preparation (in form of three assignments). Three times during semester, each of them is assigned an example of a written source in manuscript form (at least two weeks in advance). They are then expected to prepare its elementary paleographic analysis and transription. This is then presented during a lesson, combined with a discussion, during which the source is an object of historical analysis. In case of unsatisfactory fulfillment of the assignment (repeated three times a semester), there is a possibility of a substitute, i.e. the teacher assigns the student another document. There is the limitation, however, that each such unsatisfactorily presened document can be substituted only once. After meeting this requirement, during the last meeting in the semester a colloquy is organised where each student is allotted one of the sources assigned during the semester and, subsequently, reads and interprets it.</p> <p>Grading scale: A = 100% – 92% B = 91% – 84% C = 83% – 76% D = 75% – 68% E = 67% – 60% Fx = 59% – 0%</p> <p>Violation of academic ethics will be punished, and the student will lose all the received points in the relevant assessment. Number of credits: 3	
Recommended semester: 1., 3.	
Educational level: II.	
Prerequisites:	
Course requirements: Students are evaluated based on their engagement at the seminar, a paper on a selected topic (in line with the syllabus) of up to 15 min., their preparation for the classes and their involvement in the discussions of the read texts. Grading scale: A = 100% – 92% B = 91% – 84% C = 83% – 76% D = 75% – 68% E = 67% – 60% Fx = 59% – 0% Violation of academic ethics will be punished, and the student will lose all the received points in the relevant assessment. Maximum number of unjustified absences: 2 Scale of assessment (preliminary/final): 50/50	
Learning outcomes: Environmental History has become one of the key topics in Slovak historiography in the recent years. Environmental history (EH) is an extremely broad, even amorphous, subject. It is concerned about the relationship between people and environment, but unlike economic history or historical geography (to which it is closely related), the environment itself shares centre stage with the people who use it. Good EH is certainly relevant, simply because environmental change by definition is something that happens historically, over time, and to ignore a time dimension is to deprive its study of any concept. The “global 20th century,” particularly its second half, unfolded in Slovakia under the conditions of state socialism and a planned economy. During this period, the country encountered both successes and failures in implementing Soviet models in agriculture and industries, especially heavy and chemical industries. A crucial aspect of this topic is the growing influence of experts who, starting from the early 1960s, frequently challenged decisions made by the authorities. In response to the severe environmental degradation experienced throughout the Eastern Bloc and the increasing	

environmental consciousness in postindustrial society, environmentalism emerged as a form of citizen activism in the late 1980s. Popular environmental movements, with their oppositional nature, played an important role in the eventual collapse of communist regimes. The aim of the second half of this course is to map out international contacts between Slovak environmentalists and their foreign counterparts and analyse how and to what extent they absorbed global environmental discourse. The first official environmental groups under the communist rule were formed in the late 1950s in Czechoslovakia and soon nature protection enthusiasts took first tentative steps beyond the borders. A small number of people had a chance to take part in the growing international youth environmental movement in the West, but it was only in the 1980s that the East-West transfer intensified.

Class syllabus:

1. The Environmental History and Historiography (Europe, Slovakia)
2. The Roots of Environmental Consciousness
3. Woods and Trees as Historic Landscapes
4. History, Nature and Culture in Slovak Nature Conservation
5. Influence of Man on Animal Life
