## COURSE DESCRIPTION

<b>Academic year:</b> 2026/2027	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Faculty of Natural Sciences	
<b>Course ID:</b> PriF.KŽFE/N-DBFZ-004/22	<b>Course title:</b> Behavioural Physiology
<b>Educational activities:</b> <b>Type of activities:</b> <b>Number of hours:</b> <b>per week: per level/semester:</b> <b>Form of the course:</b> on-site learning	
<b>Type, volume, methods and workload of the student - additional information</b> Form of Study: Seminars, consultations, and self-study Number of contact hours: Individual with regard to the doctoral degree Form of the course: on-site learning, distance learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 3.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> The evaluation of the course takes place individually and includes the evaluation of the seminar work, which arises as a result of self-study and is presented to colleagues at the seminar of doctoral students.	
<b>Learning outcomes:</b> By completing the course, the student will gain sufficient orientation in the field of adaptation and control of behavioural processes with emphasis on the focus of the dissertation project in accordance with the specifics of individual topics. The acquired knowledge is necessary for the theoretical knowledge of the graduate, but also supports the development of his potential in a wide range of applied practice. The results of education will also be reflected in the overview of methodological approaches.	
<b>Class syllabus:</b> The course Behavioural Physiology is a part of study program Animal Physiology. It has a partially individual character due to the specifics of individual dissertation topics and is recommended especially to students whose dissertation topic is focused on behavioural research. The basic syllabus is determined as follows: Neurodevelopmental aspects of behavioural regulation, mechanisms, adaptive and pathophysiological consequences. Behavioural endocrinology, organizational and activational effects of hormones on behaviour, prenatal programming of postnatal behavioural strategies. Neurobiological nature and regulation of stereotypes, its drivers, neural plasticity. Reward physiology, effects on drug addiction, neurological diseases due to disturbed organism-environment relations. Learning and memory physiological mechanisms and their applications in behavioural research. Psychopharmacology in behavioural research.

## COURSE DESCRIPTION

<b>Academic year:</b> 2026/2027	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Faculty of Natural Sciences	
<b>Course ID:</b> PriF.KŽFE/N-DBFZ-005/22	<b>Course title:</b> Cell Signalling
<b>Educational activities:</b> <b>Type of activities:</b> <b>Number of hours:</b> <b>per week: per level/semester:</b> <b>Form of the course:</b> on-site learning	
<b>Type, volume, methods and workload of the student - additional information</b> Form of Study: Seminars, consultations, and self-study Number of contact hours: Individual with regard to the doctoral degree Form of the course: on-site learning, distance learning	
<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 3.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> Active participation in the course, preparation and presenting a seminar paper focused on cell signaling related to the topic of the dissertation thesis, its defense and active participation in the discussion of other student presentations.	
<b>Learning outcomes:</b> During the course, students will get acquainted with specific intracellular signaling mechanisms involved in the selected physiological and pathophysiological processes. The aim of the course is also the support of self-study, independent search for professional information and the development of fine skills such as personal communication, teamwork, ingenuity or focus on results.	
<b>Class syllabus:</b> Signaling pathways (mechanisms responsible for signal transduction into the cell), general principles of cellular communication, extracellular signaling, membrane receptors, intracellular signaling receptors, ion channels, second messengers, sensors, effectors, mechanisms turning on and off intracellular signaling, spatial and temporal aspects of cell signaling, cell cycle, proliferation, cell death, physiological signaling (e.g. neuronal signaling), pathophysiological signaling (e.g. stress, inflammation, signaling disorders during diseases).

<b>Academic year:</b> 2026/2027	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Faculty of Natural Sciences	
<b>Course ID:</b> PriF.KŽFE/N-DBFZ-001/22	<b>Course title:</b> Cell and Molecular Animal Physiology
<b>Educational activities:</b> <b>Type of activities:</b> <b>Number of hours:</b> <b>per week: per level/semester:</b> <b>Form of the course:</b> on-site learning	
<b>Type, volume, methods and workload of the student - additional information</b> Form of Study: Seminars, consultations, and self-study Number of contact hours: Individual with regard to the doctoral degree Form of the course: on-site learning, distance learning	
<b>Number of credits:</b> 5	
<b>Recommended semester:</b> 1.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> The study takes place mainly in the form of discussions for presentations prepared by students on selected topics and self-study. The condition for completing the course is active participation in discussions and elaboration of a presentation on a topic determined by the teacher and topic is related to the subject of dissertation. The presentation, which is the basis for evaluation, takes place at a seminar, where the student presents in front of classmates and colleagues and at least two representatives of PhD Study Board. Assessment reflects sufficient orientation of the student in the issue. The conditions for successful completion of the course are also regulated by the Study Regulations of Faculty of Natural Sciences.	
<b>Learning outcomes:</b> Successful completion of the course Cell and Molecular Animal Physiology proves sufficient orientation of the the student in the field related to dissertation thesis following the specifications of individual topics. The acquired knowledge is necessary for the theoretical knowledge of the graduate, but also supports the development of his potential in a wide range of applied practice. The results of education will also be reflected in the overview of methodological approaches.	
<b>Class syllabus:</b> The course Cell and Molecular Animal Physiology is a part of the study program Animal Physiology. It has an individual character with regard to the specifics of individual dissertation topics. Its basic syllabus is also determined according to the individual study plan of the doctoral student. The course is important especially in terms of understanding the molecular and methodological aspects of the dissertation. Emphasis will be given on the molecular regulatory mechanisms of signaling processes and their physiological significance. Regulation at the level of genes, proteins, functions of given proteins and their degradation. Methods of studying regulation at the level of DNA, RNA, proteins and activity. Glucose metabolism and its regulation. Glycolysis,	

Krebs cycle, ketone metabolism, fat metabolism, insulin and mutations in its gene, and their physiological impact.

## STATE EXAM DESCRIPTION

<b>Academic year:</b> 2026/2027	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Faculty of Natural Sciences	
<b>Course ID:</b> PriF.KŽFE/N-DSSZ-303/22	<b>Course title:</b> Defence of dissertation thesis
<b>Number of credits:</b> 30	
<b>Educational level:</b> III.	
<p><b>Course requirements:</b>            Conditions for passing the course:            Course evaluation takes place as a part of the State examination in accordance to the Study regulations of the Faculty of Natural Sciences UK in Bratislava upon submission of the written part of the dissertation thesis (as final work). Assessment is standard and reflects the student's sufficient orientation in the issue. The conditions for successful course completion are in accordance with the Study Regulations of the Faculty of Natural Sciences UK.</p>	
<p><b>Learning outcomes:</b>            Educational outcomes: The aim of the course is to capitalise on theoretical, methodological and applied knowledge of doctoral studies in the elaboration and subsequent defence of the dissertation thesis, and thus the successful completion of doctoral studies.</p>	
<p><b>Class syllabus:</b>            Brief outline of the course: The student's dissertation thesis will demonstrate his/her ability and readiness for independent scientific and creative activities in the area of research or development or for independent theoretical and creative artistic creativity. It should be characterised by a high degree of analysis and synthesis of knowledge, as well as a sufficient overview of existing literature. The work must be original and created by the author in compliance with the rules of working with information sources. The academic work must not appear to be plagiarised, nor infringe the copyrights of other authors. The author is required to thoroughly cite the information sources used, list the specific results of other authors or team of authors by citing the source, accurately describe the methods and working procedures of other authors or teams of authors, and document the laboratory results and field research of other authors or teams of authors. Style of citation is governed by the practice in the given scientific field, respecting the relevant norms and standards.</p>	
<b>State exam syllabus:</b>	
<p><b>Recommended literature:</b>            Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.</p>	
<p><b>Languages necessary to complete the course:</b>            Required language for successful course completion:            Slovak language in combination with English (study literature in English)</p>

<b>Prerequisites:</b>	
<b>Course requirements:</b> Conditions for passing the course: Course evaluation will be conducted individually based on the doctoral student's individual study plan, as well as on the basis of an agreement between the academic supervisor and doctoral student. Evaluation is standard and shall reflect a sufficient orientation of the student in the presented subject matter for successful course completion according to the Study Regulations of the Faculty of Natural Sciences UK.	
<b>Learning outcomes:</b> Educational outcomes: By passing this subject, the student will achieve sufficient orientation in the project issue of the dissertation thesis based on specific individual topics. This set task of knowledge is essential for a firmly established theoretical readiness of the course graduate in terms of his/her awareness, and equally supports his/her potential in a wide field of applied practice. Undoubtedly, the outcomes of his/her education will also be reflected in the student's overview in terms of methodological approaches in the subject matter.	
<b>Class syllabus:</b> Brief outline of the course: The subject Dissertation Thesis is a compulsory part of the doctoral student's study activities. The student requires a supremely individual character with regard to the specifics of the individual topics of the dissertation thesis. The basic syllabus should already be evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the solution to the topic of the dissertation thesis with emphasis on self-study and consultation with the academic supervisor and a wide spectrum of consultants, who will take part in creating the professional potential of the doctoral student for the next (scientific) stage of his/her studies.	
<b>Recommended literature:</b> Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.

<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> The evaluation of the course is individual and includes the evaluation of the seminar report, which arises as a result of self-study and is presented to colleagues at the seminar for doctoral students.	
<b>Learning outcomes:</b> By completing the course, the student acquires an advanced knowledge in the field of physiological adaptations, stress response as a general adaptation syndrome and the civilization diseases. The course follows the individual focus of the students' dissertation projects. An important output is the presentation of a seminar report, in which doctoral students demonstrate their independence in the study of scientific literature and the ability to create their own evaluation of the studied knowledge. The subject participates in forming of the professional potential of the doctoral student in the next stage of his studies.	
<b>Class syllabus:</b> The course Physiology of Adaptations is a part of the study program Animal Physiology. The course has a partially individual character with regard to the individual topics of the dissertation. The syllabus includes following themes: Adaptation and stress. Neuroendocrine system under stress conditions. Sympathetic-adrenomedullar system and stress. Adaptation at the level of catecholamine synthesis and degradation. Adaptive significance of stress response. Signal transmission through the synapse, individual classes of transmitters. Receptor theory. Characteristics of receptors in the neuroendocrine system. Adrenal cortex and stress, pathophysiological consequences of stress. Cell cycle and cancer. Control of food intake and obesity. Reward physiology; drug addiction. Civilization diseases as a result of disturbed organism-environment relations. Ecotoxicology, persistent foreign compounds in the environment.

## COURSE DESCRIPTION

<b>Academic year:</b> 2026/2027	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Faculty of Natural Sciences	
<b>Course ID:</b> PriF.KŽFE/N-DBFZ-002/22	<b>Course title:</b> Special Animal Physiology
<b>Educational activities:</b> <b>Type of activities:</b> <b>Number of hours:</b> <b>per week: per level/semester:</b> <b>Form of the course:</b> on-site learning	
<b>Type, volume, methods and workload of the student - additional information</b> Form of Study: Seminars, consultations, and self-study Number of contact hours: Individual with regard to the doctoral degree Form of the course: on-site learning, distance learning	
<b>Number of credits:</b> 5	
<b>Recommended semester:</b> 2.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> The evaluation of the subject takes place individually according to the individual study plan of the doctoral student and on the basis of mastering the necessary amount of knowledge of animal and human physiology, in agreement with the supervisor who is present at the exam. Due to the diversity of students who apply for doctoral studies in the study program Animal Physiology, the form of the examination is modified. For graduates at medical faculties and students with a state exam in Physiology, the exam is organized in the form of a seminar work, which the student presents to colleagues and at least two representatives of the PhD Study Board. The evaluation is standard and reflects the sufficient knowledge of the student in the given area. Conditions for successful completion of the course are also regulated by the Study Regulations of Faculty of Natural Sciences UK.	
<b>Learning outcomes:</b> By completing the course, the student acquires the necessary amounts of knowledge of animal and human physiology and sufficient orientation in the field in accordance with the specifics of individual topics of the dissertation. The acquired knowledge is necessary for the theoretical background of the graduate and broad understanding for completing doctoral studies in the study program Animal Physiology. Moreover, it also supports the development of his potential in a wide range of application practice. This course contributes to the professional potential of the doctoral student in the next stages of PhD study.	
<b>Class syllabus:</b> The course Special Animal Physiology is a part of the study program Animal Physiology. It has an individual character due to the specificity of individual dissertation projects. Syllabus is determined by the necessary amount of knowledge from the Animal and Human Physiology, determined by the recommended study literature and also according to the individual study plan of the doctoral student. This course is important especially in terms of understanding the basic theoretical and	

methodological aspects of the dissertation with an emphasis on self-study and consultation with the supervisor, program guarantor and a wide range of consultants.
