## COURSE DESCRIPTION

<b>Academic year:</b> 2026/2027	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Faculty of Natural Sciences	
<b>Course ID:</b> PriF.KGe/N-DBGE-006/22	<b>Course title:</b> Advanced methods in genetics
<b>Educational activities:</b> <b>Type of activities:</b> <b>Number of hours:</b> <b>per week: per level/semester:</b> <b>Form of the course:</b> on-site learning	
<b>Type, volume, methods and workload of the student - additional information</b> Form of Study: on-site combined with online (if necessary, online only) Number of contact hours: per week: two-weeks practical per level/semester: 40 A series instructional practicals on selected advanced methods	
<b>Number of credits:</b> 5	
<b>Recommended semester:</b> 1., 3.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> it will be required to participate on the practicals and demonstrate knowledge about the basic principles of the presented methods.	
<b>Learning outcomes:</b> The students will get familiar with unique instruments and techniques available at the Department as well as the Institutions of the Slovak Academy of Sciences involved in the study programme. The instructors will explain the basic principles of the techniques and instruments and the nature of data obtained by the corresponding method. In addition to theoretical knowledge the students will gain an overview about the methodological possibilities that will be available during their PhD studies.	
<b>Class syllabus:</b> The course will take place in a form of a two-weeks workshop at the beginning of the winter semester. The students will rotate between the laboratories according to the time schedule that will be updated at the start of each school year. Each session will be started by a short overview of the method/instrument (in a form of a lecture or video) including examples of its application. The students will get familiar with basic operation of the instrument that will be demonstrated on samples prepared by the instructor (in some cases the students will be able to bring their own samples for analysis). The results of the analysis will be discussed. The students will also learn how the method/instrument can be used for their dissertation projects. Examples of the methods/instruments: fluorescence microscopy; elutriation centrifugation; real-time PCR; droplet PCR; bioanalyzer TapeStation; flow cytometry; scanning of radioactive and chemiluminescent gels, spectrophotometry.	
<b>Recommended literature:</b> Instruction manuals, review articles about the corresponding methods provided by the instructors.	
<b>Languages necessary to complete the course:</b>	

Slovak and English	
<b>Notes:</b> the course will take place in a form of a block of lectures and discussions.

## STATE EXAM DESCRIPTION

<b>Academic year:</b> 2026/2027	
<b>University:</b> Comenius University Bratislava	
<b>Faculty:</b> Faculty of Natural Sciences	
<b>Course ID:</b> PriF.KGe/N-DSSZ-303/22	<b>Course title:</b> Defence of dissertation thesis
<b>Number of credits:</b> 30	
<b>Educational level:</b> III.	
<b>Course requirements:</b> Conditions for passing the course: Course evaluation takes place as a part of the State examination in accordance to the Study regulations of the Faculty of Natural Sciences UK in Bratislava upon submission of the written part of the dissertation thesis (as final work). Assessment is standard and reflects the student's sufficient orientation in the issue. The conditions for successful course completion are in accordance with the Study Regulations of the Faculty of Natural Sciences UK.	
<b>Learning outcomes:</b> Educational outcomes: The aim of the course is to capitalise on theoretical, methodological and applied knowledge of doctoral studies in the elaboration and subsequent defence of the dissertation thesis, and thus the successful completion of doctoral studies.	
<b>Class syllabus:</b> Brief outline of the course: The student's dissertation thesis will demonstrate his/her ability and readiness for independent scientific and creative activities in the area of research or development or for independent theoretical and creative artistic creativity. It should be characterised by a high degree of analysis and synthesis of knowledge, as well as a sufficient overview of existing literature. The work must be original and created by the author in compliance with the rules of working with information sources. The academic work must not appear to be plagiarised, nor infringe the copyrights of other authors. The author is required to thoroughly cite the information sources used, list the specific results of other authors or team of authors by citing the source, accurately describe the methods and working procedures of other authors or teams of authors, and document the laboratory results and field research of other authors or teams of authors. Style of citation is governed by the practice in the given scientific field, respecting the relevant norms and standards.	
<b>State exam syllabus:</b>	
<b>Recommended literature:</b> Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.

<b>Recommended semester:</b> 1.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> Conditions for passing the course: Course evaluation will be conducted individually based on the doctoral student's individual study plan, as well as on the basis of an agreement between the academic supervisor and doctoral student. Evaluation is standard and shall reflect a sufficient orientation of the student in the presented subject matter for successful course completion according to the Study Regulations of the Faculty of Natural Sciences UK.	
<b>Learning outcomes:</b> Educational outcomes: By passing this subject, the student will achieve sufficient orientation in the project issue of the dissertation thesis based on specific individual topics. This set task of knowledge is essential for a firmly established theoretical readiness of the course graduate in terms of his/her awareness, and equally supports his/her potential in a wide field of applied practice. Undoubtedly, the outcomes of his/her education will also be reflected in the student's overview in terms of methodological approaches in the subject matter.	
<b>Class syllabus:</b> Brief outline of the course: The subject Dissertation Thesis is a compulsory part of the doctoral student's study activities. The student requires a supremely individual character with regard to the specifics of the individual topics of the dissertation thesis. The basic syllabus should already be evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the solution to the topic of the dissertation thesis with emphasis on self-study and consultation with the academic supervisor and a wide spectrum of consultants, who will take part in creating the professional potential of the doctoral student for the next (scientific) stage of his/her studies.

<b>Recommended semester:</b> 4.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> Conditions for passing the course: Course evaluation will be conducted individually based on the doctoral student's individual study plan, as well as on the basis of an agreement between the academic supervisor and doctoral student. Evaluation is standard and shall reflect a sufficient orientation of the student in the presented subject matter for successful course completion according to the Study Regulations of the Faculty of Natural Sciences UK.	
<b>Learning outcomes:</b> Educational outcomes: By passing this subject, the student will achieve sufficient orientation in the project issue of the dissertation thesis based on specific individual topics. This set task of knowledge is essential for a firmly established theoretical readiness of the course graduate in terms of his/her awareness, and equally supports his/her potential in a wide field of applied practice. Undoubtedly, the outcomes of his/her education will also be reflected in the student's overview in terms of methodological approaches in the subject matter.	
<b>Class syllabus:</b> Brief outline of the course: The subject Dissertation Thesis is a compulsory part of the doctoral student's study activities. The student requires a supremely individual character with regard to the specifics of the individual topics of the dissertation thesis. The basic syllabus should already be evident within the individual study plan of the doctoral student. The subject is important especially in terms of understanding the basic theoretical and methodological aspects of the solution to the topic of the dissertation thesis with emphasis on self-study and consultation with the academic supervisor and a wide spectrum of consultants, who will take part in creating the professional potential of the doctoral student for the next (scientific) stage of his/her studies.	
<b>Recommended literature:</b> Recommended literature: No specifications regarding the character of a specific topic for the dissertation thesis. Recommended literature is included in the doctoral student's individual study plan.

<b>Number of credits:</b> 3	
<b>Recommended semester:</b> 2., 4.	
<b>Educational level:</b> III.	
<b>Prerequisites:</b>	
<b>Course requirements:</b> Presentation of the aims and preliminary results of the dissertation thesis, within the context of current state-of-the-art in the field. Evaluated will be the quality of presentation and the student's ability to answer the questions from the audience.	
<b>Learning outcomes:</b> The goal of the seminar is to re-evaluate the aims of the dissertation project based on the preliminary results obtained during the first year of the study. The meeting will take place at the end of the summer semester in a form of a miniconference and in the presence of all involved students, their supervisors, teachers as well as others interested in the corresponding topics.	
<b>Class syllabus:</b> During the semester the students will have regular weekly consultations with the supervisor and as a result will prepare a short (15 min) presentation. The scheme of the final meeting will be similar as that for the seminar 1: following the talk, the students and members of the audience will discuss the aims, suggested experimental strategy, methods (their advantages and possible shortcomings) and possible alternative approaches that might help to mitigate potential risks.
